

Chelmsford City Council Cabinet

27th January 2026

Capital, Treasury Management & Investment Strategies 2026/27

Report by:

Cabinet Member for Finance

Officer Contact:

Phil Reeves, Accountancy Services Manager (section 151 officer), 01245 606562,
phil.reeves@chelmsford.gov.uk

Purpose

To recommend an approach for managing the Council's cash and other types of investment including property; and

to explain how capital expenditure, capital financing and treasury management activities will contribute to the provision of services, how risk is managed, and the implications for future financial sustainability.

Options

1. Accept the recommendations contained within the report and appendices.
2. Recommend changes to the way the Council's investments are to be managed.

Preferred option and reasons

Recommend the report to Council without amendment for consideration and thereby meet statutory obligations.

Recommendations

That Cabinet requests that Full Council approve the Capital, Treasury Management and Investment Strategies.

1. Background

1.1. There are three financial strategies that the Council is obliged by Government to approve when setting a budget:

- Capital Strategy
- Treasury Management Strategy
- Investment Strategy

1.2. Capital Strategy

The Capital Strategy **Appendix 1** sets out a framework for the management of capital finance and links to capital and revenue budget plans being reported to Cabinet in January 2026. The strategy is not reviewed by the Treasury Management and Investment Sub-committee. The strategy should support the Council's objectives in 'Our Chelmsford Our Plan' and sets the framework in which the capital programme is planned. It enables the Council to prioritise the use of limited resources to support long-term priorities whilst balancing services' operational requirements. The strategy reports on deliverability, affordability and the risks associated with the strategy. The aim of this Capital Strategy is also to ensure that members fully understand the overall long-term policy objectives and resulting Capital Strategy requirements, governance procedures and risks.

1.3. Treasury and Investment Strategies

Members of the Treasury Management and Investment Sub-Committee (TMISC) have reviewed the contents of these strategies and recommended that the Cabinet note their contents and seek Council approval for the Strategies. The activities around the management of the Council's cash and external borrowing are known as Treasury Management (TM). Under statute and the CIPFA Code of Practice on Treasury Management ("the Code"), members are required to receive reports on the Council's TM activities. The document in Appendix 2 complies with the Code and relevant Government regulations.

Full Council has overall responsibility for the Treasury Management Strategy but delegates to the TMISC responsibility to monitor activity and recommend changes to the strategy. The Accountancy Services Manager (Section 151 Officer) has delegated responsibility to manage operational TM activities within the approved strategy.

- 1.4. The Ministry of Housing, Communities and Local Government requires the Council to publish and have approved an Investment Strategy. This strategy covers investments that are deemed not to be Treasury Management activities. The Investment Strategy is in **Appendix 3**.

2. Executive Summary

Capital Strategy

- Sets out how this strategy will support the Council towards achieving 'Our Chelmsford Our Plan'.
- Sets limits to amounts that can be borrowed by the Council.
- Summarises the costs of the capital programme.
- Identifies how the Council plans to finance its capital expenditure programme and the cost to the revenue budget.
- Identifies how processes will limit risks associated with the strategy.
- Will ensure that members understand the Capital Strategy requirements, governance procedures and risks.

Treasury Strategy

Investments

- Increase liquidity balance from £5m to £10m to improve cashflow resilience during the year. As the Council's cash balances have reduced, the Council will enter a period of borrowing, additional balance will be needed to ensure Council cash holdings are sufficient to cover risks. This target may be adjusted by officers during the year if liquidity management requires it.
- Reduction of the limit for balances held in Multi-Asset Funds from £12m to £8m.
- No other material changes from the previous year.
- Cash available for investment is expected to reduce as the Council funds the capital programme.
- Prior to completion of the budget, gross interest income of circa £800k is expected for 2026/27 based on an assumed interest rate of 3.71% across the Council's portfolio.

Borrowing

- No material changes from the previous year.
- Borrowing will only be undertaken for the purpose of managing temporary liquidity or to fund the capital programme.
- Limits for external borrowing will be set in the Capital Strategy which will be reported to Cabinet and then Council as part of the 2026/27 Budget.
- Under the Constitution, the Section 151 Officer manages investments and borrowings, so will undertake any borrowing as needed. Prior to

completion of the budget, the Council's cashflow planning forecast estimated £20m of borrowing by the end of the March 2026. Projections suggest external borrowing of £60m by March 2027 may be needed.

- Recognises there are significant risks to the borrowing forecasts given historic experience of slippage in the capital programme.

Non-Cash Investments (Investment Strategy)

- No changes to the principles of last year's investment strategy are recommended.
- No new capital expenditure (investments) will be made where the purpose of the investment is primarily for yield. This restriction is in line with 2025/26 Strategy.
- The strategy has provision to allow for the creation of a stand-alone housing company if needed and subject to appropriate approvals.
- The monitoring of non-treasury investments is undertaken by the Treasury Management and Investment Sub-committee.

3. Conclusion

3.1. Cabinet is asked to accept the endorsement by Treasury Management and Investment Sub-committee and to recommend to the Council the Treasury Management and Investment Strategies.

3.2. Cabinet is asked to recommend the Capital Strategy to Council. This strategy should be reviewed regularly and reported on during the year.

List of appendices:

Appendix 1 - Capital Strategy 2026/27

Appendix 2 – Treasury Management Strategy 2026/27

Appendix 3 – Investment Strategy 2026/27

Background papers:

Nil

Corporate Implications

Legal/Constitutional: The report meets statutory obligations on reporting Treasury Management Activity

Financial: As detailed in the report

Potential impact on climate change and the environment:

Any fund managers will be required to consider ESG (Environmental, Social and Governance) factors in their investment process. All the fund managers would be expected to have signed up to the UN Principles for Responsible Investment (PRI). PRI argues that active participation in ESG and exercising shareholder rights on this basis can help to improve the performance of companies which may otherwise not address such concerns and so being an engaged corporate stakeholder is a more effective way to bring about change in corporate behaviour on ethical issues.

Further requirements from those identified above are not practical given the limited ability to directly influence any immediate change in the financial markets.

Contribution toward achieving a net zero carbon position by 2030:

Our Chelmsford Our Plan

Capital Strategy 2026/27

- 1.1 This capital strategy report provides a high-level overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of local public services along with an overview of how associated risk is managed and the implications for future financial sustainability.

It should be noted that this strategy has not included future receipts which will be realised from disposals of strategic sites such as Chelmer Waterside as the amount and timing of the receipts is not currently known. Future forecasts and outlook should be judged considering the potential upside from these receipts when realised.

Decisions made this year on capital and treasury management will have financial consequences for the authority for many years into the future. They are therefore subject to both a national regulatory framework and a local policy framework, summarised in this report.

Local Government Reorganisation (LGR) is currently under way, and Chelmsford will become part of a larger unitary authority from April 2028. As part of this transition, it is anticipated that a spending restraint order, known as 'Section 24 notice', will take effect at some point during 2026. This notice will impose restriction on both revenue and capital spend.

2026/27 is the last year that the Council will be setting its budget without any constraints. However, even projects within the existing capital programme could still be affected if the contractual commitment is not in place prior to the commencement of the Section 24 notice. It is likely that once the Section 24 notice is in place, a new joint committee made up of members from all merging councils will need to approve any capital spend over £1m, prior to entering into contractual agreements.

Once a new unitary authority is established, further implications are expected for the management of the Council's assets, as asset rationalisation is likely to take place. This will need to be considered during the transition period when decisions on assets and investments are made. Furthermore, during transition, strategies for all merging councils will need to be aligned to form a new unified strategy for the new unitary authority.

- 1.2 Capital expenditure is where the Council spends money on items, such as property or vehicles, that will be used for more than one year. The majority of these assets are used in service delivery. Additionally, in local government it can include spending on assets owned by other bodies, and loans or grants to other bodies which enable them to buy assets. The Council has some limited discretion on what counts as capital expenditure, for example assets costing below £10,000 do not have to be capitalised and can be charged to revenue in year.

- 1.3 **Governance: Capital Investment in Council Services – Capital Schemes and Replacement Programme**

The Replacement Programme is expenditure required to maintain existing levels of service provision. It includes software, vehicles, plant, equipment, grants and improvement loans which are budgeted for annually.

Capital Scheme items are usually building works but can be anything which does not meet the criteria of replacement, including regeneration schemes.

Details of the approved capital schemes, replacement programme and new scheme proposals included in this strategy can be found elsewhere on the agenda as part of the Budget 2026/27 report.

The Prudential Code requires that authorities demonstrate that they make capital spending and investment decisions in line with service objectives and have proper stewardship arrangements, provide value for money, and are prudent, sustainable and affordable.

The Council's constitution and financial regulations govern the capital programme.

- All capital expenditure must be carried out in accordance with the financial regulations and the Council's constitution.
- Capital expenditure must comply with the statutory definition.
- The Capital Programme is approved by Full Council as part of the Council's annual budget report. It reports on the revenue cost of financing the capital expenditure to ensure that it is affordable. This is kept under review and updates are reported to Cabinet and approved by Full Council when required during the year.
- All schemes are formally approved into the capital programme by following an agreed process (see below).
- Officers are not authorised to commit expenditure without prior formal approval as set out in the financial regulations.
- Each scheme must be under the control of a responsible person/project manager.

New Capital Spending – Prioritisation and Approval

New capital spending should only be considered where the proposals are fully funded from new external sources, from internal resources currently available, or where capital financing costs are offset from income/savings generated from the proposal or when increasing revenue costs is considered affordable.

It is always difficult to make choices between competing priorities and with reduced resources this is more challenging. To assist, during 2026/27 it is proposed that monitoring of capital programme projected costs will also include monitoring of resources to ensure the use of limited resources are prioritised.

Funding of new capital projects will require the production of a business case. An annual process is in place where Service managers bid in September for new capital scheme proposals and replacement items to be included in the Council's capital programme.

Business cases are collated by Accountancy who review the proposals and ensure that financial elements are validated and calculate any financing and/or running costs.

The bids are reviewed and prioritised by Management Team then referred to Cabinet which then makes recommendations to Council in February each year.

The Council has introduced a corporate Project Management Toolkit to support good project management practice across the Council. The toolkit provides templates for business cases and guidance on all aspects of project management.

In determining viability, capital business cases must include:

- details of how the proposal will help to achieve the corporate priorities;
- details of the intended outcomes and potential running costs;
- a statement of the risks of undertaking the scheme and how these will be managed;
- details of consultations undertaken in arriving at the proposal and any potential alternatives; and
- robust/validated costs. Proposals will not be taken forward for approval where costs are indicative.

If the above items cannot be included, then the service manager should consider whether a feasibility study should be undertaken prior to submission of the business case.

Due to the impact that the financing of capital schemes has on the revenue budget, all future one-off schemes that are not self-financing (produce income or savings at least equivalent to the additional revenue costs of the proposal), will be automatically included on an Unfunded Priorities list.

Management team will review proposals on the Unfunded Priorities list as part of the budget estimates' cycle. Schemes management team consider as a priority will be progressed to a feasibility study to gain a clearer understanding of potential costs and therefore affordability of the scheme.

The Unapproved Priorities list has been produced in Annex 1 and will be maintained and updated on an annual basis. This list will take time to fully establish but will contain details of potential future schemes linked to the priorities in 'Our Chelmsford Our Plan'. When schemes become 'affordable' and of sufficient priority they will be brought forward for approval following submission of a business case and included in the Capital programme. This list will need to be reviewed with reference to LGR and spending constraints introduced by the Section 24 notice.

Wherever possible, proposals will only be taken forward for approval and added to the capital programme when there is certainty with the cost and outcomes of the proposal. This may be based on quotes or in some cases a full tender exercise. The full cost of the proposal must be identified, including the revenue consequences and financing costs, to ensure that the scheme is affordable. As the timing of the feasibility and tender works will not always align with the budget approval timetable it is likely that approval for the one-off schemes will be sought throughout the year.

Following approval, the agreed Corporate Project Management Toolkit should be used to ensure successful delivery of the project.

There are always going to be schemes which need to be approved outside this process, due to urgent health and safety issues for example, or the need to respond quickly to market opportunities, and these will need approval in line with financial rules.

Governance and reporting arrangements, including risk management, will be reviewed to ensure that it remains fit for purpose and is in line with best practice.

1.4 Funding the Costs of Capital Expenditure

Below is an explanation of the Council's proposed approach to funding capital expenditure.

Methods of Capital Financing

Capital resources, these are the funds that pay for capital expenditure and can come from many sources. Broadly speaking these are:

- **Sales of Assets (Capital Receipts):** Any disposal of property or equipment over £10,000 in value is a capital receipt. These can only be spent on other capital items. The Council seeks to maximise the level of these resources, which will be available to support the Council's plans. The use of cash proceeds from disposals up to £100k will be prioritised to fund assets with the shortest useful life, such as vehicles and equipment, to reduce the requirement to borrow for assets that attract a greater annual Minimum Revenue Provision cost. The use of more strategic disposals, which will result in larger receipts, should be considered with a view to paying down debt and reducing financing costs. Relative benefits of the disposal of assets in exchange for non-cash benefits, such as housing nomination rights which may reduce future Council revenue costs, will also be assessed on a site-by-site basis.
- **Leasing:** This is where we can use an asset in exchange for making a series of payments over several years. Leasing is treated as a debt on the balance sheet. Leasing differs from traditional debt as more often than not the leasing company/property owner retains legal ownership of the asset. Companies are able to obtain capital allowances to reduce the cost to the Council. Leasing will be used following due diligence, comparing the financial and non-financial benefits and risks to the Council versus owning such assets outright.
- **Borrowing** (excluding leasing):
 - The Council can borrow externally from other local authorities, the Government or the private sector.
 - Borrowing can also be carried out internally, where cash balances are "borrowed" to fund capital expenditure.

If the Council undertakes any form of internal or external borrowing, then payments must be made to cover future or current principal debt repayments (Minimum Revenue Provision (MRP)). Before the start of each financial year the Council should prepare a statement of its policy on charging MRP in respect of that financial year and submit it to full Council for approval. The statement should describe how it is proposed to discharge the duty to make prudent MRP charges during that year. The method to calculate MRP is set out in section 1.6 below 'The Borrowing Strategy'. Councils can choose to pay off debt from surplus capital resources, such as capital receipts, at any time.

- **Revenue contributions to capital:** the Council can use revenue budgets set aside to fund capital expenditure.
- **Grants:** there are Government grants and grants from external organisations. These can be used towards specific works that the Council can often bid for or can be non-specific.
- **Section 106 agreements and Community Infrastructure Levy (CIL):** if a new development is undertaken within the City, the Council is legally entitled

to ask for assets or money to mitigate the impact of the development. Wherever possible these contributions are used towards the financing of eligible capital spend.

The circumstances where each type of capital resource will be used depends on the nature of the scheme. Whilst developing scheme proposals, consideration should be given to the types of funding which offer the best value for money for the Council. Clearly, the optimal funding arrangements are those where third parties fund or help fund the investment. The s151 Officer will, at the end of each financial year, determine the appropriate funding for the capital programme.

The Council has limited capital resources and will apply those resources in a way that reduces the revenue burden of the schemes.

1.5 Cost of the Capital Programme

In the 2026/27 budget, the Council is planning capital expenditure as summarised below:

	2024/25 actual	2025/26 forecast	2026/27 budget	2027/28 budget	2028/29 budget
Replacement Programme Updated Budgets Require Approval	£3.558m	£5.393m	£8.013m	£5.966m	£6.337m
Capital Projects – Forecast Variations Require Approval	£31.213m	£26.853m	£22.482m	£5.401m	£5.943m
New Capital Submissions 2026/27 – Additional Budget Requires Approval	£0.000m	£0.126m	£6.439m	£0.060m	£0.000m
Existing Provision for Building Condition Works – Require Approval	£0.000m	£0.812m	£3.207m	£0.641m	£0.000m
New Provision for Building Condition Works – Require Approval	£0.000m	£0.000m	£0.607m	£1.182m	£0.378m
TOTAL	£34.771m	£33.184m	£40.748m	£13.250m	£12.658m

Details of the programme can be found in the Budget Report 2026/27.

This forecast expenditure has been assessed following a full review of the existing programme by Management team. Some schemes previously removed from the approved programme remain on the Unapproved Priorities list as they are considered as possibly being unaffordable or the expected costs have not been validated. An example of this: the proposal for the new cemetery and crematorium infrastructure was removed until an updated business case is brought forward.

Basis for Estimating Future Costs

The above table reflects the forecast capital programme including new scheme proposals and known replacement items. These costs are reflected in the Budget Report 2026/27 and variations from previously reported costs require approval.

The replacement programme will be approved for the years 2026/27 and 2027/28. The two-year approval provides services with the ability to better manage their replacements. They can move items between the two years should it be necessary and are able to place orders in advance as some vehicles have over a year lead-in time for delivery. As the budgets will be approved in advance of spend, a provision for increases in price has been included. Use of this provision will be delegated to the s151 Officer.

There is a high risk that scheme costs will increase due to inflation and supply and demand. Annual reviews of approved scheme budgets will be undertaken to identify and seek approval for the consequences of inflation.

The table includes provisions for works which have been identified from building condition surveys. Decisions will need to be taken on the affordability and priority of these works. Feasibility and option appraisals will be carried out and business cases will need to be completed for some of the larger more complicated projects such as the Riverside Chiller Unit. A delegation is in place to enable the provision to be drawn down as more certainty of the costs is achieved.

The building condition surveys are carried out as part of a rolling programme so additional provisions will be required in future years.

The replacement programme is continually being reviewed by Service Managers to ensure that there is a full cycle of replacements included in the programme. This review has led to an increased replacement programme cost and further reviews could result in additional cost.

This capital programme has been based on what is affordable. Long-term unfunded priorities will only be included when they become affordable.

The planned financing of the whole programme and replacement items is shown in the table below.

	2024/25 Actual	2025/26 Forecast	2026/27 Budget	2027/28 Budget	2028/29 Budget
Capital Receipts	£1.655m	£0.470m	£0.200m	£0.200m	£0.200m
Grants and Contributions	£28.337m	£25.714m	£6.564m	£1.966m	£2.739m
Revenue Contributions	£0.003m	£2.340m	£1.464m	£1.487m	£1.491m
Borrowing	£4.464m	£4.430m	£30.932m	£9.507m	£6.464m
Finance Leases	£0.312m	£0.230m	£1.588m	£0.090m	£1.764m
TOTAL	£34.771m	£33.184m	£40.748m	£13.250m	£12.658m

1.6 Borrowing strategy

The table above shows that the Council will need to borrow to fund its Capital spending.

For details on the governance for Council borrowing, please see Appendix 2 of the Treasury Management Strategy.

Impact of IFRS16 Implementation

Changes to accounting regulations came into effect on the 1st April 2024 which required conversion and restatement of operational leases and contract hire to finance leases. The effect of this conversion is that the outstanding liability on the leases is now shown as a debt on the balance sheet. The conversion increased the level of debt held on the Council's balance sheet.

The converted debt balances at 31st March each year for Private Sector Landlord (PSL) Leases are shown in the table below as they need to be reported and included in the Authorised Limit and Operational Boundary borrowing limits. The costs and income associated with these leases are reflected in service revenue budgets to ensure that the complete cost of housing services can be shown.

The Capital Financing Requirement (CFR) is the calculation of the Council's internal and external borrowing used to finance its capital expenditure. Statutory guidance is that long-term debt should remain below the CFR. Temporary breaches for cashflow are acceptable.

The table below highlights the requirement for external borrowing to finance the capital programme.

Estimates of Gross Debt and the Capital Financing Requirement	31.3.2025 Actual	31.3.2026 Forecast	31.3.2027 Budget	31.3.2028 Budget	31.3.2029 Budget
Leasing (Debt)	£1.537m	£1.086m	£1.900m	£1.351m	£2.333m
IFRS16 Conversion PSL Debt on Balance Sheet	£4.288m	£3.506m	£2.692m	£1.838m	£0.941m
External Borrowing	£11.000m	£20.000m	£60.000m	£68.000m	£68.000m
Total "External Borrowings"	£16.825m	£24.592m	£64.592m	£71.189m	£71.274m
Total Capital Financing Requirement (CFR)	£45.448m	£48.017m	£78.077m	£84.460m	£88.595m
Internal Borrowing (makes up the difference between CFR and external borrowings)	£28.623m	£23.425m	£13.485m	£13.271m	£17.321m

Although new borrowing to finance capital spend is forecast to be £31m, the Council is expected to increase its external borrowing by £40m in 2026/27. This is because resources such as CIL that had been used as internal borrowing for previous expenditure are now funding (applied to) new expenditure, so internal borrowing becomes externalised.

The Council is required to approve a policy for repaying debt (MRP) which is in italics below:

MRP will be determined by charging the expenditure over the expected useful life of the relevant asset on an annuity basis up to a period of 50 years. For those short-term assets with a life of less than 10 years an average life year rate will be applied. When calculating the MRP charge, Interest based on the PWLB annuity rate for a loan with a term equivalent to the life of the asset will be used. For assets acquired under leases, the principal repayment inherent in the lease will be used as the basis for MRP in respect of those assets. When this is not available PWLB rates will be used. This policy does not prevent the Council from making early or one-off repayments of debt from capital receipts or from revenue provisions.

MRP is charged in the year following the one in which the expenditure is incurred or the first year following the one in which the asset becomes operational.

Affordability of the Capital Programme

The table overpage shows the planned repayment of debt. This is a charge to the revenue budgets. The consequences of any capital spend must be considered in relation to the impact on the revenue budgets and whether it is affordable. There are limited sources of new capital financing available, so some additional capital spending will be financed by borrowing. The Council will only commit to additional capital spending where it is affordable. The Council must take a prudent approach to new borrowing, any business cases brought forward must be robust and include forward predictions of affordability, with the aim that projects should be self-funding.

The table provides an indication of the cost to the revenue budget of repaying borrowing, both MRP and interest on external borrowing. Some of the capital schemes, earmarked for being financed by borrowing, will provide an income which will offset the cost of the MRP and interest. The revenue budgets for these schemes have not yet been included. These financing costs could vary due to the timing of the capital spend and the interest rate when the financing is sourced. The borrowing costs included below assume interest rate assumptions made in the Treasury Management Strategy.

Affordability Indicator: Financing Costs to Net Revenue Stream

This is an indicator we are obliged to publish under the Prudential Code. This is the cost for finance arranged for borrowing (MRP, Interest and all leasing including PSLs) and does not include income generated by those assets.

	2024/25 Actual	2025/26 Forecast	2026/27 Budget	2027/28 Budget	2028/29 Budget
Total Financing Costs (excludes income generated by capital schemes)	£2.407m	£2.830m	£4.226m	£5.658m	£6.629m
Affordability Indicator					
Net Revenue Stream	£29.186m	£29.770m	£30.365m	£30.972m	£31.590m
Ratio of financing costs to Net Revenue Stream	8.25%	9.51%	13.92%	18.27%	20.98%

The net revenue stream does not take into account the income generated on capital schemes which understates the cost benefit from self-financing schemes and overstates the ratio.

The table below provides a reconciliation back to table 17 in the 2026/27 Budget Report. The adjustments include the removal of PSLs. The costs and income associated with these leases are reflected in service revenue budgets to ensure that the complete cost of housing services can be shown.

	2024/25 Actual	2025/26 Budget	2026/27 Budget	2027/28 Budget	2028/29 Budget
Total Financing Costs of Capital Programme from Table above	£2.407m	£2.830m	£4.226m	£5.658m	£6.629m
Technical adj. and new schemes financing removed to tie back to budget includes adj. for PSLs, interest and Self-financing schemes	-£2.805m	-£1.295m	-£1.816m	-£2.427m	-£2.428m
Net Revenue Financing Costs	-£0.398m	£1.535m	£2.410m	£3.231m	£4.201m

Affordable borrowing limit: The Council is legally obliged to set an affordable borrowing limit (also termed the authorised limit for external debt) each year and to keep it under review. In line with statutory guidance, a lower “operational boundary” is also set as a warning level should debt approach the limit. The higher borrowing limit may not reflect long-term need and may only be reached for short periods. It therefore can be higher than the Capital Financing Requirement.

Authorised limit and operational boundary for external debt in £ms is shown in the table below.

	2025/26 limit	2026/27 limit	2027/28 limit	2028/29 limit
Authorised limit – total external debt	£50m	£85m	£90m	£90m
Operational boundary – total external debt	£28m	£68m	£72m	£72m

Authorised limit – total external debt – this includes Finance leases.

Operational Boundary – total external debt – this is based on the debt outstanding on forecast finance leases and potential external borrowing.

Governance: Decisions on treasury management investment and borrowing are made daily and are therefore delegated to the Section 151 Officer and staff, who must act in line with the annual treasury management strategy approved by Council. Three times a year, the Treasury Management and Investment Sub-committee meets to review activity and any new material issues, recommend new strategies and review year-end performance.

1.7. Sustainability – Capital Funding

Capital Receipts from Disposals

The consequences of the Capital programme, such as loss of interest on capital receipts spent, or scheme running costs, will be included in the annual revenue budget reports to Council and Medium-Term Financial Forecast. This provides Members with the ability to gain assurance of the affordability and sustainability of the capital expenditure plans.

The Council has a plan for disposals of assets. The Council will be considering plans to dispose of several sites in the period up to the end of March 2029. Not all disposals will result in a capital receipt and there may be other benefits such as nomination rights for the use of affordable housing developed by Registered Social landlords (RSLs) on previously owned Council sites. There could be revenue costs associated with the disposal of assets and a loss of income which should be considered before a decision is made on the disposal.

Sites Under Consideration for disposal are listed below. Individual values of estimated receipts are not shown for commercial reasons.

1. Chelmer Waterside
2. St Michaels Drive Roxwell Garage Site
3. Pease Place East Hanningfield
4. Glebe Road South Car Park
5. Rectory Lane East Car Park
6. Medway Close Garage Site
7. George Street Car Park
8. Railway Street Car Park
9. Odeon Meadows Land
10. Waterhouse Lane Petrol Station

11. Writtle Street Car Park (Land at Cricket Club)
12. Commercial site Land at Westway
13. Various Council owned dwellings currently used as temporary accommodation

Reports have been approved for disposal of items 2-8 and 11 above.

A more cautious approach to the timing of receipts has been taken to move towards a 'worst-case' funding assumption reflecting economic conditions. The development potential of some larger sites is being considered but, due to the uncertainty of the developments and the timing, no receipts are being shown for the period up to 31/3/2029.

On the 31/3/2029 there are no forecast material holdings of capital receipts from asset sales. All of the smaller receipts collected will have been applied to resource the capital spend.

As detailed above, the limited forecast of capital receipts decreases the sustainability of capital funding and unless external sources of funding are identified for individual capital projects then borrowing will be required for future capital spending and the affordability of borrowing will need to be kept under review.

Where a disposal results in a receipt it should be carefully considered how that receipt should be applied to the funding of the capital spend.

Funding of the Replacement Programme

The Council will need to borrow against shorter-life assets to fund them. The forecast borrowing for 2026/27 is £30.9m where replacements for short-life assets is approximately 10% of this but represents 26% of the MRP charge for this spend. This is due to the MRP on short-life assets being spread over a shorter number of years resulting in higher annual MRP charges relative to longer-life one-off capital.

From 2026/27, the ongoing contribution from revenue to fund capital has been increased from £0.369m to £1.369m and this has been included in the budgets. This additional £1m revenue funding will be used to fund short-term replacement assets which will reduce the financing cost of the capital schemes. £1m of borrowing on short-term assets with a 7-year life would result in interest and MRP costs of an estimated £175k per annum.

Although an additional £1m contribution from revenue will be used towards funding short-term assets from 2026/27, it is expected that there will still be a need for short-term replacement assets to be funded by borrowing. The table below provides details of the proposed funding of the replacement programme.

Funding Capital Replacements	2025/26 forecast	2026/27 budget	2027/28 budget	2028/29 budget
Funded Spend	£4.215m	£3.241m	£1.626m	£1.610m
Borrowing	£1.178m	£4.772m	£4.340m	£4.727m
Percentage of replacements funded by borrowing	22%	60%	73%	75%

2026/27 budget includes £1.4m Disabled Facility Grant (DFG) spend funded by grant not included in later years.

As part of LGR, merging authorities will rationalise assets, including short-life assets. The cost of the capital will be reviewed and amended by the new authority.

Risk

To reduce the risk of overspends, it is intended that wherever possible budgets should only be approved following completion of a business case when validated/robust scheme costs have been identified allowing for suitable contingencies and inflation. Once schemes are approved, regular monitoring is undertaken to identify those schemes at risk of overspending or not being delivered on time so that appropriate action can be taken. To support risk management, a corporate project management “tool kit” for officers undertaking large projects is available.

As part of capital planning, a number of potential future projects or needs for additional funding have been identified. These are included in the Unapproved Priorities List (Annex 1). The list will be kept under review, which should improve planning of capital financing and minimise the risk of allocating resources against lower-priority schemes. This will likely be impacted by LGR and the introduction of the section 24 notice.

The updating of building condition surveys has reduced the risk of not identifying high-need capital spend in a timely manner and improved prioritisation in the short term. As these are carried out on a rolling programme there remains a risk that future capital costs have not been included in later years. The next round of condition surveys is due in 2028/29 which will improve the accuracy of longer-term forecasting of costs.

As the Council continues to improve its identification of replacement and refurbishment need, this could result in additional cost. The extra cost will be from services identifying items for replacement which have not been included previously in plans and the need replacement with a higher modern equivalent specification.

The resourcing of the capital spend has been based on assumptions of receipts, grants and contributions being received and applied. To minimise risk, these assumptions have been prudent, however circumstances outside of the Council’s control, such as economic environment, may impact on the timing of receipt of resources.

Future decisions in relation to the method of application of Community Infrastructure Levy to priority schemes may lead to an increase in borrowing costs but may aid prioritisation of funding long-term priorities.

Summary

The responsibility for decision-making and ongoing monitoring in respect of capital expenditure, investment and borrowing, including prudential indicators, remains with Full Council. The level of the Council’s borrowing is significant, reaching a forecast £88.6m by March 2029 with a rising revenue cost, but these matters will be addressed as part of LGR when councils are merged and capital programmes reviewed.

All members need to be fully informed as to all implications of capital investment decisions, in particular those funded from borrowing. Council is asked to approve the ‘Authorised Limit for External Debt’ as shown in the table in section 1.6, £85m in 2026/27.

The borrowing and financing figures discussed do not include any costs for scheme proposals on the Unfunded Priorities list (Annex 1). These should be reviewed and brought forward for consideration on the basis of priority and affordability.

Due to the timing and uncertainty of receipts from disposals, this strategy is currently based on the assumption that there will not be any large receipts in the period covered by the report. If capital receipts are realised for some of the larger strategic sites, such as Chelmer Waterside, within this period, there will be significant benefits to the forecast.

Regular reporting and reviews of capital schemes costs, condition surveys and resources will ensure capital plans remain affordable.

Treasury Management Strategy

- 1.1 Treasury Management at Chelmsford City Council is conducted within the code/framework set by the Chartered Institute of Public Finance and Accountancy. *Treasury Management in the Public Services: Code of Practice 2021 Edition* requires the authority to approve a Treasury Management strategy before the start of each financial year. This report fulfils the authority's legal obligation under the *Local Government Act 2003* to have regard to the CIPFA code.
- 1.2 Treasury Management covers the management of the Council's cash flows, borrowing and investments, and any associated risks. Chelmsford City Council has substantial cashflows and investments from its activities and is therefore exposed to a series of financial risks including the loss of invested funds. Risk also arises from possible changes in interest rates affecting investment income or the cost of any external borrowings.
- 1.3 The Council's investment priorities are, in order of priority:
- (a) the security of capital,
 - (b) the liquidity of its investments; and
 - (c) yield.

The Government regulations and CIPFA both advise that absolute certainty of security of capital and liquidity does not have to be achieved before seeking yield from investments. An appropriate balance of all three should be sought and that balance is determined by the Council in its Treasury Strategy.

- 1.4 Borrowing purely to invest or lend on to make a return is unlawful and this Council will not engage in such activity. The borrowing to fund the capital programme is allowed and including borrowing up to a year in advance to secure the funding or de-risk the interest rates. Officers will aim to minimise borrowing costs by investing surplus cash based on forecast cashflow needs.
- 1.5 In the event of unforeseen major changes to the external environment or financial plans of the authority, it may be necessary for the Council to revise its strategy during the year.
- 1.6 This Treasury Management Strategy will focus solely on investments and debt management activity arising from the organisation's cashflows, taking into account the capital programme. Non-treasury investments will be covered separately under the Investment Strategy (Appendix 2). The monetary limits on borrowing will be set in the Capital Strategy which forms part of the 2026/27 budget papers going to Cabinet and Council in January and February.

2. External Context

- 2.1 The macroeconomic environment has a significant impact on the Council's treasury operations via inflation, interest rate and counterparty risks.

The Council obtains advice on macro-economic issues from its Treasury advisor, MUFG Corporate Markets, and public news sources.

The Economic Environment and Interest Rate Forecast

- 2.2 The Bank Base Rate was maintained at 4.00% in November 2025 by the Bank of England's Monetary Policy Committee (MPC) where the last cut was in August 2025 of 0.25%. At the December meeting the Bank Rate was reduced to 3.75%. Interest rates are generally expected to fall further.
- 2.3 GDP growth for 2025-2028 is currently forecast by the Office for Budget Responsibility to be in the region of 1.5%.

CPI inflation continued to drop in November to 3.2% from 3.6% in October, whilst core inflation fell to 3.2%. Services inflation fell at 4.4%. A further loosening in the labour market and weaker wage growth may be a requisite to UK inflation coming in below 2.0% by 2027.

The number of job vacancies in the three months to November 2025 stood at 729,000 (the peak was 1.3 million in spring 2022). All this suggests the labour market continues to loosen, albeit at a slow pace.

A looser labour market is driving softer wage pressures. The 3-month year-on-year rate of average earnings growth excluding bonuses has fallen from 5.5% in April to 4.6% in September. The rate for the private sector slipped from 4.3% to 4.2%.

- 2.4 The Council has appointed MUFG Corporate Markets as its treasury advisor and part of their service is to assist the Authority to formulate a view on interest rates. MUFG Corporate Markets. Below is their latest forecast after the Bank of England rate change in December. These are forecasts for Bank Rate, average earnings and PWLB certainty rates, gilt yields plus 80 bps. The table does not reflect the Bank of England interest rate cut in December. MUFG Corporate Markets will be revising their interest rate forecast after the December MPC meeting. In summary interest rates are expected to fall.

MUFG Corporate Markets Interest Rate View 22.12.25													
	Mar-26	Jun-26	Sep-26	Dec-26	Mar-27	Jun-27	Sep-27	Dec-27	Mar-28	Jun-28	Sep-28	Dec-28	Mar-29

3. Forecast cashflow and external borrowing for the City Council

- 3.1 Forecast year-end investment balances are in the table below. These are best estimates at this stage (*Please note: if any changes are made to the capital programme in the budget, then the figures below will be amended before the report is presented to Council by the s151 officer.*)

	31/03/2025 Actual (£m)	31/03/2026 Forecast (£m)	31/03/2027 Forecast (£m)	31/03/2028 Forecast (£m)	31/03/2029 Forecast (£m)
Year-end investment held	23	12	17	17	17
Cumulative External Borrowing	11	20	60	68	68

In practice, the amount of borrowing could well be lower than the forecast due to slippage in capital expenditure and CIL incoming arriving earlier than expected. The forecasts made by officers over the last few years have shown the correct trend but significantly overstated the amount of borrowing needed.

Within the £40m of increase in external borrowing forecast in 2026/27, the value of items certain to occur is £10m and the balance £30m of items can be said to be likely to be spent. However, historic experience does highlight the risk that this type of assessment can be materially wrong leading to overstating the level of external borrowing. The TMISC has been provided with confidential details on the assumptions made in the cashflow forecasting.

- 3.2 Cash/ Investment forecast:

During most months, the cash balance can rise and fall by up to £15m due to receipt of various income and payments including precepts to other Essex bodies. The Council should therefore aim to keep sufficient cash in hand to manage these fluctuations and allow for unknown risks.

The Government consulted on proposed changes to the Council Tax regime, and it is expected that, from 2026/27, Council Tax will be collected over 12 instalments by default rather than the 10 instalments that we have been previously used to. The result of this is the Council will no longer benefit from a lift in cashflow at the beginning of the year and fall later in the last two months when traditionally less Council tax income would come in.

A minimum of £10m of investments needs to be held by the Council to satisfy money market regulations (MiFID II requirements required £10m to enable the Council to maintain its professional client status). An investment balance below £10m will reduce the counterparties (banks etc) willing to transact with the Council. £10m should therefore be the minimum average balance targeted.

The Council's officers will aim to hold a continuous £17m of cash and investments made up of £10m cash held for liquidity and a maximum £7m of long-term investments. The Council will borrow where necessarily to maintain its liquidity balance.

The £17m reflects a proposal to increase the liquidity allowance from the previous £5m to £10m due to the Council entering a period of borrowing and advice from the treasury

advisors suggesting the £5m is low. The long-term investments are supported by reserves and other balances in section 4.

The principles to establish how we borrow are in Section 3 below and how investments should be managed are discussed in Section 4 below.

3.3 Borrowing Forecast:

The Capital Strategy published with the Revenue 2026/27 budget papers will include debt limits reflective of the 2026/27 budget.

The CFR (Capital Financing Requirement) is the amount of capital expenditure the Council has financed by (internal and external) borrowing. The capital strategy will update the forecast of the CFR. The table below shows current estimates. This may be amended by s151 before this report is taken to Council.

	March 2025 Actual £m	March 2026 Forecast £m	March 2027 Forecast £m
Capital Financing Requirement	45.4	48.0	78.1
Made up of:			
Surplus cash internally borrowed	28.6	23.4	13.5
External Debt (leasing)	5.8	4.6	4.6
External Borrowing	11.0	20.0	60.0

The Council does reduce investments by internally borrowing the cash (balance sheet resources) to fund the capital programme instead of external loans. This can lower financing costs payable by the revenue budget compared to external borrowing.

4.0 How we intend to Borrow

4.1 This section of the strategy sets out the Council's methods to borrow. The treasury management function ensures that the Authority's cash is organised in accordance with the relevant professional codes, so that sufficient cash is available to meet this service activity and the Authority's Capital Strategy. This will involve both the organisation of the cash flow and, where capital plans require, the organisation of appropriate borrowing facilities. Long-term borrowing is only used to fund the capital programme so the level of borrowing will never exceed the CFR (Capital Financing Requirement) for any meaningful amount of time. As previously stated in Section 3.3, the CFR is the amount of capital expenditure the Council has which will be financed by internal or external borrowing. The CFR will be determined by the decisions in Budget Report 2026/27.

4.2 The Authority is currently maintaining an under-borrowed position. This means that the capital borrowing need (the Capital Financing Requirement) has not been fully funded with external loan debt, as cash supporting the Authority's reserves, balances and cash flow has been used as a temporary measure. This strategy is prudent as medium and longer dated borrowing rates are expected to fall from their current levels. The Section 151 Officer will monitor the position to determine the optimal mix of internal and external borrowing. To seek to strike a balance between minimising interest costs, securing certainty of borrowing costs and ensuring sufficient liquidity.

- 4.3 Examples of where the Council can seek to borrow funds from are:
- Public Works Loan Board (PWLB). This is only allowed if a Council has no approved capital plans to purchase assets primarily for the purposes of yield. More details can be found in the Investment Strategy and paragraph 4.4 below.
 - Other UK Local Authorities. This is usually relatively short-term debt running from a few days to two years in duration.
 - Any institution which meets the Council's investment criteria.
 - UK public or private sector pension funds (Excluding the Essex Local Authority Pension Fund).

- 4.4 The PWLB can lend to local authorities for any duration up to 50 years. The PWLB is the source of loans/funds if no other lender can provide finance. The PWLB will not lend to an authority that plans to buy investment assets primarily for yield. The Section 151 Officer must certify to the PWLB that no such purchases are planned.

From a Treasury Management perspective, it is recommended that the PWLB should be retained as a borrowing option and therefore purchase of investment assets primarily for yield should not be considered. This is recommended not only due to the reduced rates available through PWLB but due to the backstop accessibility of this source of borrowing.

- 4.5 Officers can undertake borrowing within the constraints the following debt indicators, the amounts for each are approved in the Capital Strategy:
- The Authorised Limit is the limit placed by the Council on the absolute level of its gross debt at any time. The Local Government Act 2003 stipulates that it must not be breached at any time. When setting the limits, these will need to be consistent with the liability benchmark as this shows the borrowing requirement to fund the forecast capital programme.
 - The Operational Boundary of external debt is lower, reflecting the planned maximum level of debt at any time, the difference being designed to give headroom to deal with unforeseen movements in cash flow. A sustained or regular trend above the Operational Boundary would require investigation and appropriate action.

The calculations are linked to the CFR (the overall borrowing needed to fund the capital programme).

During the financial year TMISC will receive reports on how any borrowing compares to the indicators.

In Annex 3 of this report, Prudential Borrowing and Investment indicators are shown.

- 4.6 In addition to borrowing via loans, other debt financing models may be used to finance the capital programme where this represents best value for the authority. These forms of debt are included in the overall borrowing limits. Such debt finance models include:
- Sale and leaseback arrangements
 - Hire purchase arrangements

5 How we intend to Invest

5.1 Investment objectives are in order of priority:

- Security of assets – investing in counterparties only where the risks of incurring a capital loss through default, and the risks of late payment of principal and interest, are low. Also, by spreading risk as widely as is practically possible.
- Liquidity – Ensuring that the authority can access enough cash to meet its obligations with appropriate notice. It is recommended for 2026/27 a target of at least £10m of short-notice funds is held. The definition of short notice will be any held for less than or equal to 35 days.
- Yield – subject to the management of risks associated with security and liquidity of assets, the Council will seek to maximise the yield from its investment portfolio.

The Government regulations and CIPFA both advise that absolute certainty of security of capital and liquidity does not have to be achieved before seeking yield from investments. The Council will aim to achieve the optimum return on its investments with proper levels of security and liquidity that is within the Council's risk appetite.

5.2 **Annex 3** sets out the background detail relating to counterparties, also limits of size of investment and durations. These are unchanged from previous years.

5.3 The institutions the Council can invest with are well-capitalised. General credit conditions across the sector are expected to remain benign, limiting the chances of losses to the Council. However, no investments will be made with an organisation if there are substantive doubts about its credit quality, even though it may meet the credit-rating criteria.

5.4 Public Bodies provide much less risk as investment counterparties, but yields can vary depending on the liquidity available within the market. The Council will consider security, liquidity and return when reviewing new investments over different organisations and different investment categories (pooled funds, public bodies, etc.) to provide a satisfactory balance of security of capital and return. The City Council will avoid lending to councils that have a section 114 notice but there is no evidence that a s114 notice makes a loss of investment more likely.

5.5 Changes in valuation of the multi-asset fund holding under IFRS9 accounting standards are chargeable to a company's profit and loss in the financial year. For a Council, if IFRS9 were applied, it would mean the local taxpayer meeting valuation changes through the general fund as cost or gain even if they were due to temporary volatility. The Government has extended the IFRS9 statutory override to apply to existing local authority investments in pooled investment funds that were made before 1st April 2024. The government has extended this specific override for these existing investments until 1st April 2029, to provide local authorities with additional time to manage their investment strategies.

However, any new investments in pooled investment funds made on or after 1st April 2024 are subject to the standard IFRS9 accounting requirements, meaning fair value movements must be recognised directly in the general fund. The override prevents these "paper" fluctuations from immediately impacting the authority's revenue accounts and annual balanced budget requirement.

Additionally, IFRS9 impacts the write-down in the valuation of impaired loans.

5.6 Environmental, social and governance (ESG) considerations are increasingly a factor in global investors' decision-making, but the framework for evaluating investment

opportunities is still developing and therefore the Council's approach does not currently include ESG scoring or other real-time ESG criteria at an individual investment level.

Any fund managers will be required to consider ESG (Environmental, Social and Governance) factors in their investment process. All the fund managers would be expected to have signed up to the UN Principles for Responsible Investment (PRI). PRI argues that active participation in ESG and exercising shareholder rights on this basis can help to improve the performance of companies which may otherwise not address such concerns and so being an engaged corporate stakeholder is a more effective way to bring about change in corporate behaviour on ethical issues.

Therefore, externally managed funds will be required have regard for ESG, but this is not possible for internally managed bank deposits and short-term investments (money market funds).

5.7 The Council's cashflow and need to borrow mean officers expect investments during 2026/27 to be relatively short in duration with main purpose to manage liquidity, with the exception of the multi-assets funds which are regarded as long-term holdings but kept under review by s151 and who is delegated to make decisions regarding their use.

5.8 In practice:

- officers will most likely invest in short-dated money-market funds, as they offer the best way to manage liquidity and reduce investment risk (by spreading counterparties).
- The use of multi-asset funds would probably be reduced over the next few years, given the gradual move to long-term borrowing. However, there will be significant changes to cash and debt holdings due to LGR over the next three years. The decisions regarding the continued use of multi-asset funds will need to be assessed in that light and fund performance.

The indicative budget for interest income for 2026/27 is £800K based on an average investment portfolio of £21m at an interest rate of 3.7%. If actual levels of investments or actual interest rates differ from those forecasts, performance against the budget could be significantly different. The interest income is highly dependent on the timing of capital programme expenditure

6 **Role of the Treasury Management and Investment Sub-committee**

6.1 The Sub-committee will be informed of investment, borrowing activity and significant changes in conditions that may lessen or increase the risks of Treasury Management activity. The Sub-committee will, where necessary, consider changes to the strategy and report back to Council.

6.2 Reporting and reviewing of treasury management activity will include

- Monitoring Treasury management indicators (**Annex 4**): The code requires local authorities to have regard to certain treasury indicators. The indicators will assist in measuring and managing the Council's exposure to Treasury Management risk in 2026/27. The 2021 Prudential Code introduced Prudential indicators and a requirement for monitoring to be reported formally on at least a quarterly basis. However, due to the volume of finance reports already made to formal committees, it is recommended that reporting is three times a year to TMISC or Cabinet. Officers believe the existing 3 meetings of the TMISC are sufficient.
- The indicators include some limits and some indicators. Limits should not be breached, and if they are, TMISC should report that to Full Council, whereas

indicators can be breached during the year if necessary. TMISC should seek clarification on why an indicator is breached and seek appropriate actions.

Investment Strategy

This document ensures compliance with the requirements of the CIPFA Prudential Code and the Ministry of Housing, Communities and Local Government (MHCLG) guidance on local authority investment. The CIPFA code and MHCLG guidance recognise that organisations may make investments for reasons outside of treasury management objectives and these investments may prioritise other objectives above the security of capital.

Contents of the Investment Strategy

1. The types of non-cash investments
2. How Council monitors performance
3. The role of the sub-committee

1 The types of non-cash investments

1.1 Investment Primarily for Yield (overarching principle)

Guidance from the PWLB issued in 2020/21 bans any local authority from borrowing from it if, in the current or following 2 years, the authority has plans in its capital programme to invest in assets to be held primarily for yield. The City Council can access non-PWLB sources to fund capital investment. However, the Council previously approved the principle that keeping access to PWLB borrowing was more important than keeping the option to undertake the purchase of investment property primarily for yield. The recommended overarching principle in the investment strategy is that the Council will not undertake any capital investment with the primary objective of yield. The CIPFA 2021 Prudential and Treasury Management best practice code is explicit that authorities must not borrow for the primary purpose of earning a financial return.

1.2 Service Investments: Loans and Shareholdings

These cover making loans to, and buying shares in, local service providers, local small businesses to promote economic growth, and, for some authorities, subsidiary companies that provide services. Considering the public service objective, Councils can take moderate risk with the principal invested.

The main risk when making service loans is that the borrower will be unable to repay the principal lent and/or the interest due. To limit this risk, and ensure that total exposure to service loans remains proportionate to the size of the Authority, upper limits on the outstanding loans have been set as follows: -

Category of borrower	31 March 2025 Actual			2025/26	2026/27
	Balance owing	Loss allowance	Net figure in accounts	Forecast	Approved Limit
Chelmsford City Football Club	£0.021m	£0.021m	£0.000m	£0.000m	£0.0m
CHESS (Support for Homeless Service)	£0.478m	Nil	£0.478m	£0.462m	£0.467m
Maximum New loans if required.	Nil	Nil	Nil	Nil	£10.000m
TOTAL LIMIT	£0.499m	£0.083m	£0.478m	£0.462m	£10.467m

The above table includes an allowance of up to £10m of new loans should the Council for example decide to create a standalone company to facilitate the creation of additional affordable housing or for other trading purposes. Any decision would be subject to Council approval.

The football club has made the final payment during 2025/26, and the loan repayment has been cleared.

CHESS took out a loan from the Council in March 2025 of £0.478m that is secured against their asset. Repayments of this loan started in April 2025 and all monthly payments have been made to date.

The Council will monitor the financial position of the recipient or potential recipient using (but not limited to) credit ratings where appropriate, published financial information (such as annual accounts), press articles and by maintaining an open dialogue.

Accounting standards require the Authority to set aside an allowance for losses on loans, reflecting the likelihood of non-payment. However, the Authority makes every reasonable effort to collect the full sum lent and has appropriate credit-control arrangements in place to recover overdue repayments.

There may be times to approve items outside this process, due to urgent health and safety issues for example, or the need to respond quickly to market opportunities. These changes will need approval in line with the constitution.

1.3 Commercial Investments:

MHCLG defines property to be a commercial investment if it is held primarily to generate a financial return. This type of investment may also involve making loans to subsidiaries or partners, where the aim is achieving profit.

The Council's commercial property investments are summarised below. No new assets have been acquired since last reported; any increases shown reflect improvement or refurbishment works.

There was a fall in valuation mainly resulting from the transfer of Lockside land into Surplus and the valuation on 1 Springfield Lyons building as a result of property being

vacant and refurbishment works to the building. The value of Meadows Retail Shopping Centre fell due to low rents and occupancy.

Property Type	31.03.2024	31.3.2025 Actual				
	Value in accounts	Acquisitions In Year	Disposals In Year	Transfers to PPE in Year	Works/ Additional Gains or (losses)	Value in accounts
Office	£15.65m	£0.00m	£0.00m	£0.03m	£-1.52m	£14.16m
Other	£4.65m	£0.00m	£0.00m	£-2.38m	£0.12m	£2.38m
Retail	£33.79m	£0.00m	£0.00m	£0.00m	£-0.04m	£33.75m
Industrial	£0.00m	£0.00m	£0.00m	£0.00m	£0.00m	£0.00m
TOTAL	£54.09m	£0.00m	£0.00m	£-2.35m	£-1.44m	£50.29m

Property Type	31.03.2025	31.3.2026 Expected				
	Value in accounts	Acquisitions In Year	Disposals In Year	Transfers to PPE in Year	Works/ Additional Gains or (losses)	Value in accounts
Office	£14.16m	£0.00m	£0.00m	£0.00m	£0.19m	£14.35m
Other	£2.38m	£0.00m	£0.00m	£0.00m	£0.03m	£2.41m
Retail	£33.75m	£0.00m	£0.00m	£0.00m	£0.03m	£33.78m
Industrial	£0.00m	£0.00m	£0.00m	£0.00m	£0.00m	£0.00m
TOTAL	£50.29m	£0.00m	£0.00m	£0.00m	£0.25m	£50.54m

The Council will consider the purchase of commercial property but only where it supports regeneration, facilitates land assembly for future regeneration projects, or supports Council priorities set out in “Our Chelmsford: Our Plan”, but not where the primary purpose would be for yield.

Properties will only be purchased within the Council’s geographic area.

Any properties that generate commercial yield will be monitored by the Treasury Management and Investment Sub-committee until redevelopment occurs.

1.4 Loan Commitments and Financial Guarantees

The Council has entered into a new loan agreement with CHESS (Support for Homeless Services) of £478K to help finance their redevelopment of a Homeless Accommodation in March 2025.

2 How Council monitors performance

2.1 Capacity, Skills and Culture

The Council employs professionally qualified and experienced staff in senior positions with responsibility for making capital expenditure, borrowing and investment decisions. For example, the Accountancy Services Manager (Section 151 Officer) is a qualified accountant with over 30 years' experience and the Head of Property is a member of the Royal Institution of Chartered Surveyors with over 20 years' experience in both Public and Private Sectors. The Council pays for junior staff to study towards relevant professional qualifications including CIPFA and external short courses to keep abreast of developments and maintain up to date skills and knowledge.

Elected members: The Council does not expect members to make investment decisions but to understand the risks the Treasury & Investment Strategies create. The Council therefore provides training for members on the appropriate issues by providing advice and access to MUFG, the Council's Treasury Advisors.

Training and qualifications: Documents and schedules will be kept of training and qualifications of the key roles.

Due Diligence: When undertaking investments there is a need to recognise where the Council is lacking detailed market knowledge and then external advisors will be employed. The Council uses MUFG as Treasury Management Advisors and external property valuers are engaged when undertaking material purchases.

2.2 Investment Indicators (Limits or Indicators)

The Authority must set the following quantitative indicators to allow elected members and the public to assess the Authority's total risk exposure because of its investment decisions.

1) Total investment risk exposure (indicator): The first indicator shows the Authority's total exposure to potential investment losses. This includes amounts the Authority is contractually committed to lend but have yet to be drawn down and guarantees the Authority has issued over third-party loans.

Total investment exposure	31.03.2025 Actual	31.03.2026 Forecast	31.03.2027 Forecast
Treasury management investments	£22.8m	£11.6m	£16.6m
Service investments: Loans	£ 0.5m	£0.5m	£0.4m
Commercial investments: Property	£50.3m	£50.5m	£58.4m
TOTAL INVESTMENTS	£73.6m	£62.6m	£75.4m

The commercial property forecast values shown above are projected changes. It has been assumed that valuations remain relatively static in 2025/26, with increase in 2026/27 resulting from the planned reletting of 1 Springfield Lyons.

2) How investments are funded (indicator): Investments funded from borrowing have more risk than those funded from surplus resources, so Government guidance is that there should be indicators on how investments are funded. Since the Authorities do not normally associate particular assets with specific borrowing liabilities, this guidance is difficult to comply with. However, the following table probably best describes any borrowing link to investments.

Investments funded by borrowing	31.03.2025 Actual	31.03.2026 Forecast	31.03.2027 Forecast	31.03.2028 Forecast
Service investments: Loans	£0.5m	£0.5m	£0.5m	£0.4m
Commercial investments: Property*	£6.7m	£7.9m	£9.5m	£9.3m
Total funding by borrowing	£7.2m	£8.4m	£10.0m	£9.7m

In 2019/20 to alleviate the temporary costs of the pandemic, the Council choose not to make revenue contributions to capital. The overall level of borrowing would have been lower, and the commercial assets (Aquarium offices) would not have been funded from internal borrowing. The additional borrowing in 2027 relates to remodelling works to existing properties and development of existing sites.

3) Rate of return received (indicator): This indicator shows the net investment income received less the associated costs, including the cost of borrowing where appropriate, calculated as a proportion of the sum initially invested.

The increase in income for 2026/27 assumes the let of 1 Springfield Lyons.

Investments net rate of return (income)	2024/25 Actual	2025/26 Forecast	2026/27 Forecast
Treasury management investments	4.9%	4.1%	3.6%
Service investments: Loans	N/A	5.4%	5.4%
Commercial investments: Property	5.8%	6.1%	6.3%
Treasury Management Income (draft estimate 26/27)	£1.8m	£1.0m	£0.8m
Investment Rent Income (draft estimate 26/27)	£2.9m	£3.1m	£3.7m

4) Other investment indicators

The Section 151 Officer has identified the following estimates to help assess Risks and Proportionality of investment activity at the Council.

Estimates	2024/25 Actual	2025/26 Estimate	2026/27 Estimate	2027/28 Estimate	2028/29 Estimate
Income from Treasury Management as Percentage of Net Revenue Stream	3.9%	2.2%	1.6%	1.6%	1.4%
Commercial Income as percentage of Net Revenue Stream	11.8%	12.2%	14.0%	13.7%	13.5%
Total Borrowing Undertaken to Fund Investment Properties	£6.7m	£7.9m	£9.5m	£9.3m	£9.2m

The estimates/indicators reflect historic decisions, and the schemes included in the proposed/approved Capital programme.

5) Investment Indicator Limits

Below are limits on investments which reflect the estimates above plus allowance for some headroom or flexibility to undertake higher levels of investment activity. The limit is that recommended by the Section 151 Officer. These limits are required under Government guidance and should not be exceeded. If the Council does exceed these limits, then it is expected not to rashly dispose of investments but instead should avoid entering any further investments except for short-term Treasury Management activity until appropriate alleviation of the breach is undertaken.

Limits	2025/26 Limit	2026/27 Limit	2027/28 Limit	2028/29 Limit
Commercial Income as percentage of Net Revenue Stream	19%	19%	19%	19%

3 Role of Treasury and Investment Sub-committee

The non-cash investments require continuous monitoring, and the role of the sub-committee is to undertake that ongoing assessment. At a previous sub-committee meeting, it was agreed that the following would be the basis of the ongoing monitoring:

- Any changes in the portfolio in the period (acquisitions and sales).
- All charges and receipts, indicating any arrears.
- Capital expenditure; planned or reactive.

- Performance against budgets; both expenditure and income.
- Any potential changes to the income through lease renewals and rent reviews.

The Sub-committee is also responsible for recommending the Investment Strategy. The strategy requires Full Council approval.

Unfunded Priorities List Identified December 2025

	Proposed Schemes	Brief Overview of Proposal
	<u>Leader</u>	
1	Accommodation Strategy – Coval Lane Building	To relocate staff in Coval Lane to Duke Street with the intention to rent out the majority of the Coval Lane Building with the aim of covering fixed costs whilst also generating a rental income.
	<u>Active Chelmsford</u>	
2	SWF Leisure Gym & Studio expansion	To convert existing "gym" to enhance health & fitness facilities to enable daytime use in line with the swimming pool
3	Hylands Walled Garden	To bring walled garden into use (TBA) with a commercial partner. Feasibility, followed by market testing – will likely need some CCC financial input.
	<u>Strategic Outdoor Sports Provision</u>	
4	Melbourne Park Changing Room Pavilion, Flood lighting and surface replacement of multi-sport Courts	Enhancement of existing community facility
5	Coronation Park additional Rugby Pitch	Provision of additional facility for community
6	Additional 3G Pitch – Warren Farm Sports Area additional floodlit artificial pitch	Provision of additional facility for community
7	Saltcoats Park and Compass Gardens – new cricket and football facilities and sports pavilion	Provision of additional facility for community
	<u>Connected Chelmsford</u>	
8	Museum Re-imagining The Bothy, Oaklands Park	Adaptations to expand use of asset
	<u>Greener Chelmsford</u>	
9	Sandford Mill Future Use of Area	
10	Rivers, Waterways and bridges – development and improvement	Parks, Green Spaces and Waterways Strategy 2022 and Improvement Plan for Rivers and Waterways Policy Board 2022
11	Cemetery and Crematorium Infrastructure	To enable provision of current service at new location
	<u>Growing Chelmsford</u>	
12	Local Plan Digital Platform	Replacement digital solution to engage, prepare, consult and monitor future Local Plan
13	Public Realm – Market Square (1)	Enhancement to Market Square to make the space more attractive and active
14	Public realm – Half Moon Square to Stone Bridge (2)	Improve public realm in city centre
15	Public Realm – Stone Bridge to Baddow Road (3)	Improve public realm in city centre

16	Public Realm – Springfield Road (4)	Improve public realm in city centre
17	ECC Army and Navy Contribution	Contribution to ECC to enable development of highways
18	ECC East Chelmsford Cycling & Walking Connectivity	Contribution to ECC to enable works
19	Q-Tech Park	Economic development initiative
20	Car Parking – Future requirements	Potential decked car park
21	North-East Chelmsford Garden Community Infrastructure Ringfenced CIL	New development
22	South Woodham Ferrers Town Infrastructure – Ringfenced CIL	Improve facilities
23	Land Bank	To create a provision to acquire new land for the future (not from CIL)
24	Park and Ride	Additional facility

Treasury Investment Types

Enhanced Money Market and Money Market Funds. The Council has access to enhanced money market funds (AAA rated) which offer a rate of return but require 2 – 5 days' notice to withdraw funds.

The Council invests short-term cash in several AAA-rated money market funds. These funds provide a rate of interest (3.97%-4.04% at 12th December 2025) and most importantly allow same-day access to funds. Interest rates are linked to the BOE base rate and so any increase in this will feed through to the rates earned for the Council.

These funds spread the Council's investment over many financial institutions, so reducing risk. Historically the funds have proved very safe.

UK Public Bodies. Debt Management Agency Deposit Facility, Government Treasury Bills or Gilts are all investments with the UK Central Government. These are the safest possible form of UK investment, so the Council will place no limit on the amount that can be invested.

Local Authorities / Bank Deposits Collateralised (guaranteed against local authority loans). These are theoretically as safe as lending to Government, but what would happen should a Local Authority go bankrupt has never been tested in law. It is therefore prudent to place some limit on investments with each local authority but recognising this type of investment is much safer than most alternatives.

Unsecured UK bank investments. The changes to UK Bank regulation from the adoption of a "bail-in" approach to recapitalising banks and the move to ringfencing of UK bank retail operations have increased the amount that could be lost in the event of a bank failure. With the completion of ringfencing activities by major banks to protect retail investors from investment banking losses, different banks have placed local authority depositors in either the retail or investment banking divisions. It should be noted that the credit scores for the banks to which the Council lends have either remained the same or improved because of ringfencing. The Council believes that it is prudent to invest with banks who are on MUFG suggested lists. MUFG only suggest investments with UK banks for up to 6 months for the majority of those listed. The Council differs from MUFG advice in terms of the length of investment, up to a period of 365 days. But only if the credit rating criteria (below) are met and no information is available that identifies unacceptable risk. The Council will not invest with any bank that is not on the suggested MUFG list.

Unsecured building society investments. MUFG recommend a pool of Building Societies that it suggests clients could invest with. Where our criteria do differ to MUFG relates to the suggested duration periods where MUFG only recommend up to a maximum of 6 months. The Council current policy goes beyond MUFG advice and lends up to 365 days.

It is recommended that the Council's treasury strategy takes a different approach to investing with building societies than that suggested by MUFG. If a building society has a long-term credit rating of at least A- then investments for up to 365 days should be allowed. This is the same as the Council's previous counterparty policy for Building Societies but is a higher risk approach than MUFG based on duration.

Unsecured Non-UK bank investments. MUFG has different the approach for investment with non-UK banks compared to UK banks. This reflects the different risks and ownership structures that affect the security of the investment. The Council first uses MUFG advice to select appropriate non-UK banks and then uses credit rating information to make

investment decisions. The Council uses credit rating of AA- for selecting investments with non-UK banks of up to a maximum of 365 days and A- for investments of up to 100 days.

The Council may differ from MUFG advice in terms of the length of investment, if the credit rating criteria above are met. The Council will not invest with any bank that is not on the suggested MUFG list. In practice, the Council's approach is more conservative than MUFG who, for non-UK banks with a Fitch rating of between A- to A+, suggest in many cases durations up to 6 months. The Council is broadly consistent with MUFG where the suggested duration is up to 2 years for the non-UK banks with a rating of AA-.

Registered Social Landlord (RSL) Loans. The Council can lend to RSLs in the pursuit of treasury management objectives but must treat any loans made for policy reasons as capital expenditure. The option to lend for Treasury purposes has been on the Council's counterparty list for several years but there has not been a suitable opportunity.

Covered Bonds, Reverse Repurchase Agreements and Supranational Bonds. These are all different investment products but have in common the highest levels of credit rating. They are either backed by a pool of guaranteed bank assets or UK and/or foreign Governments. The Council takes advice from MUFG before undertaking any of these investments, so an investigation of the individual strength of each investment has been determined. They are rarely used by the Council.

Multi-Asset, Bond and Property Funds. These potentially offer the Council income and capital growth of the sum invested. There are several types of funds including property funds, bond funds, equity funds and multi-asset funds. Funds seek to reduce risk by building a pool of investments and as such are considerably safer than an investment of comparable size in a specific single asset.

However, any fund exposes the Council to market price volatility. Officers will carefully consider any investment opportunities and always keep any ownership under review. A review of the risks and benefits of using Funds was made in the summer of 2019 and which concluded that Multi-Asset, Bond and Property funds provide a suitable method to invest Council funds.

As at the end of November 2025, the Council has an investment of around £6.6m in 2 Multi-Asset funds.

Counterparty – Duration and Monetary Limits

The Council uses credit ratings and MUFG’s advice to determine suitable counterparties. MUFG employs a sophisticated modelling approach utilising credit ratings from the three main credit rating agencies – Fitch, Moody’s and Standard & Poor’s. The credit ratings of counterparties are supplemented with the following overlays:

- “watches” and “outlooks” from credit rating agencies.
- CDS spreads that may give early warning of changes in credit ratings.
- sovereign ratings to select counterparties from only the most creditworthy countries.

Link combines credit ratings and any assigned Watches and Outlooks in a weighted scoring system which is then combined with an overlay of CDS spreads. The result is a series of colour-coded bands which indicate the relative creditworthiness of counterparties.

The Council’s policy has been and is recommended to differ from MUFG advice when it comes to duration of investments with Banks (UK and Foreign) and Building Societies. The Council’s officers have focused more on long-term credit ratings and an assessment of systematic importance to the UK economy when assessing investment duration. This means the Council has a slightly longer duration and slightly less Counterparties than suggested by MUFG, but still maintains diversification of investments and security of the Council’s assets.

The duration that an investment is made affects the amount of risk to the capital invested. The longer the investment the more risk of some unexpected change occurring to the financial strength of the deposit taker. Perhaps, more importantly the Council can only invest for durations that enable Council’s liquidity to be managed effectively. To reduce these risks limits can be placed on the length of investments. The Council is required by law to identify the proposed investment criteria under the categories Specified and Non-Specified, as shown below:

Specified Investments				
- investments of duration less than or equal to 365 days and denominated in sterling.				
- investments made to UK Government, UK local authorities or institutions of high credit quality.				
- high credit quality defined as a minimum A- by Fitch or the equivalent score of the other main rating bodies (Standard & Poor’s, Moody’s).				
Specified Counterparty	Minimum Credit Criteria	Max. Limit £m	Max. maturity period	Change from Prev. approach
Enhanced Money Market Funds (Variable Unit Price) Up to 5 funds	AAA	£6m each fund	2-5-day notice	None
Money Market Funds (per fund)	AAA	£6m each fund	Instant Access	None

Debt Management Agency Deposit Facility, Government Treasury Bills or Gilts	UK Government	No Limit	365 days	None
Local Authorities / Bank Deposits Collateralised (guaranteed against local authority loans)	UK Government	£10m each authority	365 days	None
UK Banks	A-	£3m for each group	365 days	None
Building Societies	A-	£3m for each group	365 days	None
Non-UK Banks	AA-	£3m each group	365 days	None
Non-UK Banks	A-	£3m each group	100 days	None
Registered Social Landlord Loans	A-	£3m each group	365 days	None
Covered Bonds	AA-	£6m	365 days	None
Reverse Repurchase Agreements (each agreement)	AA-	£6m	365 days	None
Supranational Bonds (per institution)	AAA	£6m	365 days	None

The counterparty limit for 2025/26 is £3m per financial institution and it is recommended that this is retained for 2026/27. Reducing the £3m limit would reduce the number of institutions willing to take Council deposits, as a smaller investment would be judged too small to be economic for large institutions. Indeed, there are many institutions who will not accept £3m from the Council as this is too small for them.

Non-specified Investments

These do not meet the criteria of specified investments. They are identified separately to ensure the Council understands that these are higher risk, either due to counter party risk, liquidity risk, market risk or interest rate risk.

Counterparty	Min. Credit Criteria	Max. Limit £m	Max. maturity period	Change from existing approach
Multi-Asset or Bond funds	Unrated	£5m per fund	n/a	None
Covered Bonds (per bond)	AA-	£6m	3 years	None
Supranational Bonds (per each institution)	AAA	£6m	3 years	None
Debt Management Agency Deposit Facility, Government Bills or Gilts	UK Government	No Limit	5 years	None
Local Authorities / Bank Deposits Collateralised (guaranteed against local authority loans)	UK Government	£10m each authority	5 years	None

Treasury Management Indicators

Limits

- 1) **Long-Term Treasury Management Investments (Limit)** – The purpose of this indicator is to manage the Authority’s exposure to the risk of incurring losses by seeking early repayment of its investment or the costs of enforced borrowing for liquidity purposes. The prudential limits on the long-term treasury management investment will be: -

Price Risk Indicator	2024/25	2025/26	2026/27
Limit on total principal invested beyond year end	£10m	£10m	£10m
Investment Funds	£8m	£8m	£8m

The £8m shown is a maximum limit for investment funds which have no fixed maturity date such as Multi Asset. Additionally, there is a separate £10m limit for sums invested in fixed term investments over 365 days in duration. The £10m limit for cash invested over 365 days is only expected to be used if cash balances turn out materially higher than forecast, which is unlikely.

- 2) **Counterparty limit** – The Council will be informed whether investments have been made within the approved limits for counterparties and any breaches will be reported during the year. The limits are shown in Annex 3.

3) Maturity structure of borrowing:

These gross limits set to reduce the Authority’s exposure to large amounts falling due for refinancing in a short space of time. Officers will have regard to prevailing interest rate assumptions when undertaking borrowing.

The Council is asked to approve the following treasury indicators and limits: -

Maturity structure of fixed interest rate borrowing 2026/27		
	Lower	Upper
Under 12 months	0%	100%
12 months to 2 years	0%	100%
2 years to 5 years	0%	100%
5 years to 10 years	0%	50%
10 years to 25 years	0%	50%
25 years to 50 years	0%	50%
Maturity structure of variable interest rate borrowing 2026/27		
	Lower	Upper
Under 12 months	0%	100%
12 months to 2 years	0%	100%
2 years to 5 years	0%	100%
5 years to 10 years	0%	50%
10 years to 25 years	0%	50%
25 years to 50 years	0%	50%

The borrowing limits are set within the capital strategy and the above shows the maturity structure of loans.

Indicators that are Targets

- 1) **Liquidity** – The liquidity indicator is a voluntary measure that seeks to ensure that the Council has the necessary funds to meet unexpected payments within a rolling period without additional borrowing.

Liquidity Risk Indicator	Target
Total minimum cash available within 35 days	£10m

2) Liability Benchmark (indicator):

This indicator is a tool to help establish whether the Council is likely to be a long-term borrower or long-term investor and as a result aids long-term planning. The liability benchmark itself represents an estimate of the cumulative amount of external borrowing the Council must hold to fund its current capital and revenue plans while keeping treasury investments at the minimum level required to manage day-to-day cash flow.

Ref.	Liability Benchmark	31/03/25 Actual (£m)	31/03/26 Forecast (£m)	31/03/27 Forecast (£m)	31/03/28 Forecast (£m)	31/03/29 Forecast (£m)
1	Capital Financing Requirement (CFR)	45	48	78	84	89
2	Less: Balance sheet resources	57	33	28	26	31
3	Net loans requirement (Negative shows surplus cash/ Positive are external borrowing requirement)	-12	15	50	58	58
4	Plus: Liquidity allowance.	14	5	10	10	10
5	Liability benchmark (Total forecast external borrowing) (Negative shows net surplus cash/ Positive are external borrowing requirement)	2	20	60	68	68

<----- Forecast - Externally borrowed ----->

The table above shows

Row 1 our capital financing requirement, being total external and internal borrowing needed to fund the capital programme. The forecast 31/03/26 has capital programme needing £48m of borrowing with forecast external loans borrowing of £20m (ref/row 5).

Row 2: shows the balance sheet resources (cash) available to use as internal borrowing instead of external debt. Where most of the resource is cash from revenue reserves and capital grants.

Row 3 A positive figure means external borrowing is being forecast. However, further allowance must be made to ensure the Council has a minimum level of liquidity cash available (row 4). The higher borrowing than actually needed in 2024/25 meant the Council had more cash to invest resulting in increased liquid funds held in row 4, £14m compared to the £5m minimum liquidity target.

Row 5 shows the forecasts year end external borrowing required. The new projection shows external borrowing needed of £20m at end of 2025/26 and £60m at the end of 2026/27.
