

## Chelmsford Policy Board

6 November 2025

### Strategic Housing and Employment Land Availability Assessment (SHELAA) – Autumn 2025 Report

---

#### Report by:

Director of Sustainable Communities

---

#### Officer contacts:

Liz Harris-Best

Principal Planning Officer (Housing Policy) [liz.harrisbest@chelmsford.gov.uk](mailto:liz.harrisbest@chelmsford.gov.uk),  
01245 606378

---

#### Purpose

To inform the Board of the updated SHELAA Report covering the assessment that has taken place across Spring 2025 – Summer 2025 following the close of the consultation on the Chelmsford Local Plan Pre-Submission (Regulation 19) Document on the 18 March 2025.

#### Recommendations:

1. To note the Strategic Housing and Employment Land Availability Assessment (SHELAA) – Autumn 2025 Report and authorise publication
- 

#### 1. Introduction

- 1.1 The purpose of this report is to provide the Board with the latest assessment; the SHELAA Autumn 2025 Report – to note and approve for publication.
- 1.2 The SHELAA is routinely updated on an annual basis and at appropriate times during a Local Plan preparation period.

- 1.3 The SHELAA assesses on a high-level basis the likely development potential of sites submitted by landowners and developers.
- 1.4 It accords with paragraph 72 of the National Planning Policy Framework (NPPF) which requires Local Planning Authorities to have a clear understanding of the land within their administrative area that may be suitable, available and achievable for development over a timeframe of up to and over 5 years. From this, Local Planning Authorities, through the planning policies set out in their development plan, are required to identify a sufficient supply and mix of development sites.
- 1.5 The SHELAA provides a high-level profile of promoted sites. Criteria are developed from National and Local Plan policy and applied to assess sites. The assessment enables Officers to identify site characteristics, highlight site strengths and potential constraints, and establish a likeliness of developability or deliverability.
- 1.6 The SHELAA does not allocate sites for development.
- 1.7 To identify potential sites, the Council has issued 'calls for sites' at appropriate intervals during the review of the Local Plan. This current SHELAA has reviewed sites submitted between 20 June 2024 – 18 March 2025, the period between the end of the consultation on the Preferred Options Local Plan document and the close of the consultation on the Pre-Submission (Regulation 19) Document. Existing submissions have also been reviewed against some changes to the criteria, where mapping layers have been updated i.e. minerals and flood information and, in some cases, where representations to the Pre-Submission (Regulation 19) Document have highlighted errors or amendments.
- 1.8 The assessment considers the suitability, availability and achievability of each promoted site. A report of the outcomes is produced and when approved, published on our web page.

## 2. Purpose of the SHELAA

- 2.1 The national Housing and Economic Land Availability Assessment Planning Practice Guidance (PPG) recognises land availability assessments to be an important source of evidence to inform plan-making and decision-taking, and the identification of land supply.
- 2.2 The SHELAA serves as an evidence-based document to provide a high-level profile of sites promoted by developers and landowners: identifying a wide range of site characteristics; highlighting the strengths and constraints that sites may face in achieving the local authority requirements; and establishing the likelihood of site developability/deliverability.

- 2.3 As noted in paragraph 1.6 above, it is not the purpose of the SHELAA to allocate land for future development. The role of site allocation falls to the local plan, which allocates development sites. The role of the SHELAA, together with other evidence based documents, is to provide information on the range of sites which are available to meet the Council's requirements and inform decisions of where to allocate future development. The outcomes of these decisions are fed into the Local Plan.
- 2.4 In accordance with the PPG, Chelmsford's SHELAA is designed to:
- Identify sites and broad locations with potential for development;
  - Assess the development potential of a site; and
  - Assess the suitability of a site for development and the likelihood of development coming forward (the availability and achievability).
- 2.5 As part of this process the SHELAA assessment identifies any constraints in place that are preventing a site from being available. It also considers whether the proposed use is economically viable.
- 2.6 The Council has used the provisional findings from the SHELAA Autumn 2025 Report (see Appendix 1) to help guide the determination of which sites are proposed for allocation in the Focused Consultation Additional Sites (Regulation 19) Document.

### 3. Overview of the SHELAA Autumn 2025 Report

- 3.1 The latest SHELAA assessment has been carried out across Spring / Summer 2025. This assessment looked at a total of 398 unique sites within the Chelmsford administrative area. Of this, 394 of those sites comprised previously submitted sites and 3 amendments were received to them. 4 sites were new.
- 3.2 To avoid double counting, the site areas and yields of 75 sites were discounted from the calculations of available land. Of those 75 sites, 33 had either been allocated in the Local Plan or have an approved planning permission, whilst the remaining 42 sites lie wholly within another SHELAA submission.

3.3 The locations of the sites are set out on the map below:

3.4 The map shows that many of the sites are located within the northern and eastern areas of the administrative area of Chelmsford. Most of the sites are located within the countryside, outside of the Metropolitan Green Belt.

3.5 All sites were reassessed in relation to minerals and waste constraints and impact on flood risk, as mapping layers for both criteria have been updated since the last assessment.

3.6 The Council also received 25 representations to the Chelmsford Local Plan Pre-Submission (Regulation 19) Document that included references to and critiques on the 2024 SHELAA outputs. These are details in full in Appendix 2 along with the Council's response. Where the Council response results in

amendments to a site assessment, this change has been incorporated in the 2025 SHELAA.

- 3.7 The SHELAA Autumn 2025 Report (Appendix 1) that has been produced is a comprehensive document detailing the assessment process and outcomes.
- 3.8 A full breakdown of the assessment statistics is featured in the SHELAA Assessment Statistics Document.
- 3.9 A summary of the statistics is shown in the table below. The first table shows how the site areas are broken down by proposed use. The second table shows how the site areas and indicative yields are broken down by RAG rating categories.

*Table 1*

| <b>Proposed Use</b>         | <b>Number of Sites</b> | <b>Site Area (ha)</b> |
|-----------------------------|------------------------|-----------------------|
| Residential                 | 258                    | 1,523.341             |
| Residential – G&T           | 5                      | 2.37                  |
| Residential – Older Persons | 3                      | 8.61                  |
| Residential - Other         | 1                      | 0.8                   |
| Employment                  | 19                     | 278.753               |
| Retail                      | 0                      | 0                     |
| Community Facility          | 4                      | 113.085               |
| Renewable Power Generation  | 0                      | 0                     |
| Mixed Use                   | 33                     | 1,632.686             |
| <b>TOTAL</b>                | <b>323</b>             | <b>3,559.645</b>      |

*Table 2*

| <b>Category</b> | <b>Number of Sites</b> | <b>Site Area (ha)</b> | <b>Yield (dwellings)</b> |
|-----------------|------------------------|-----------------------|--------------------------|
| Green           | 25                     | 191.046               | 2,746                    |
| Yellow          | 14                     | 280.658               | 1,974                    |
| Amber           | 168                    | 2,180.504             | 30,515                   |
| Red             | 116                    | 907.437               | 14,159                   |
| <b>TOTAL</b>    | <b>323</b>             | <b>3,559.645</b>      | <b>49,394</b>            |

- 3.10 The figures only show the sites that have been promoted through the SHELAA. The site areas and yields are used as a guide only. The actual number of dwellings that will be allocated / developed will be considered within the review of the Local Plan or as part of a planning application. Planning permission will need to be granted for development to take place.

## 4. Conclusion

- 4.1 The SHELAA Autumn 2025 Report is an evidence base document which is routinely updated. It covers the latest assessment of sites promoted to us. In accordance with NPPF and PPG requirements, sites have been assessed against a range of Suitability, Availability and Achievability criteria accounting for national and local planning policies to gauge potential for development.
- 4.2 Findings of the SHELAA Autumn 2025 Report; together with findings from numerous other evidence base documents, will help guide the determination of which sites are promoted for allocation in the Local Plan Review to ensure an appropriate land supply is identified to meet need across the Local Plan period.
- 4.3 It is recommended that the Board confirm they have noted the content of the SHELAA Autumn 2025 Report and authorise its publication on the Council's SHELAA webpage.

## Corporate Implications

### Legal/Constitutional:

N/A

### Financial:

N/A

### Potential impact on climate change and the environment:

Site promoters to be able to submit parcels of land for a range of uses including residential, employment, community facilities and renewable power generation. This enables officers to better identify sites most likely to achieve sustainable development. Criteria within the SHELAA ensures that promoted sites are scored favourably based upon their sustainability.

Contribution toward achieving a net zero carbon position by 2030:

Sites allocated within the Local Plan Review – which will be informed by the SHELAA – will need to comply with the relevant planning policies and Building Regulations which are currently working towards a net zero carbon position by 2030.

# **Strategic Housing and Employment Land Availability Assessment (SHELAA) Autumn 2025**

Part 1 of 9  
Non-Technical Summary

November 2025

## **NON-TECHNICAL SUMMARY**

## Introduction

The National Planning Policy Framework requires Local Planning Authorities to produce and update a land availability assessment. The Strategic Housing and Employment Land Availability Assessment (SHELAA) is the assessment developed and used by Chelmsford City Council.

The SHELAA is a study of sites promoted by landowners and developers that may have development potential. It forms part of the evidence base of the Local Plan and is published every year.

The outcomes of the SHELAA are used to help the Council make decisions on plan making. It helps us to understand where we can allocate future development, by showing us the locations of potential development sites.

The SHELAA is not a decision making document and does not allocate sites for development or grant planning permission.

## Policy Background

The Government requires Local Authorities to understand how much housing and employment land they have available in their area.

The main role of the SHELAA is to:

- Identify sites and broad locations with potential for development
- Assess their development potential
- Assess their suitability for development and the likelihood of development coming forward (the availability and achievability)

The SHELAA provides a high-level profile of the sites and highlights their strengths and constraints. It is an assessment of whether the site is likely to be developable.

The SHELAA can include:

- Sites that have planning permission but where development has not yet started
- Site allocations within the Local Plan which do not yet benefit from planning permission and
- Sites which do not have planning permission and are not allocated for development, but which land promoters believe would be suitable for development.

Members of the public, site owners, developers and interested parties can submit sites that have potential for new development to the Council for consideration for allocation as part of the local plan. This process is known as 'Call for Sites'.

The Council maintains a 'Call for Sites' database which is open all year round. It allows the Council to hold an up to date database of sites within its area that may be suitable for development.

The Call for Sites process contains cut off times, when the database is stopped and the SHELAA is carried out. Sites that are submitted after the cut off deadline will be assessed within the following SHELAA review.

## Methodology

To undertake the SHELAA, Chelmsford City Council follows the five stages summarised in the flow chart. Refer to the Methodology document for full details.

The SHELAA assessment is undertaken at stage 4 where sites are assessed against suitability, availability, and achievability criteria. All criteria are detailed within the Criteria Note.

The assessment is desk-based meaning no site visits take place. Sites are assessed using information given to us by the land promoter and using mapping software.

The sites are RAG (Red, Amber, Yellow, Green) rated according to their assessment scores and their compliance with national and local policy. The scores are published on the Site Performance Summaries, accompanied by GIS mapping.

The RAG rating is shown below:

|        |                                                                                                                                                                                      |
|--------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Red    | Site is contrary to national policy and/or faces significant constraints or adverse impacts that cannot be mitigated.                                                                |
| Amber  | Site scores less well against criteria or has some characteristics contrary to a local policy and faces moderate constraints that would require mitigation.                          |
| Yellow | Site scores well against criteria but has some characteristics contrary to local policy. Site faces minor constraints that would require mitigation. Site is considered developable. |
| Green  | Site scores highly against criteria and demonstrates compliance with national and local policy. Site faces minimal constraints and is considered deliverable.                        |

## SHELAA 2024 Assessment

The 2025 SHELAA assessed a total of 398 sites. The locations of the sites are shown on the map below:

The map shows that many of the sites are located within the northern and eastern areas of the administrative area of Chelmsford. Most of the promoted sites are located within the countryside, outside of the Metropolitan Green Belt.

We use the SHELAA to help us understand how many new homes (dwellings) could be provided on a site. This is known as the Yield. We use the estimated yield and the land area of a site to help us understand how much land we need to allocate for development and the likely locations for it.

To avoid double counting, we do not include any sites already identified within the Council's 5-year housing supply, Housing Site Schedule or sites that lie within other SHELAA sites. This year, out of 398 sites, 75 sites were removed from the SHELAA to prevent double counting.

A full breakdown of these statistics is featured in the SHELAA Assessment Statistics document. A summary of the statistics is shown in the tables below. The first table shows how the site areas are broken down by proposed use. The second table shows how the site areas and indicative yields are broken down by RAG rating categories.

| <b>Proposed Use</b>         | <b>Number of Sites</b> | <b>Site Area (ha)</b> |
|-----------------------------|------------------------|-----------------------|
| Residential                 | 258                    | 1523.341              |
| Residential – G&T           | 5                      | 2.37                  |
| Residential – Older Persons | 3                      | 8.61                  |
| Residential - Other         | 1                      | 0.8                   |
| Employment                  | 19                     | 278.753               |
| Retail                      | 0                      | 0                     |
| Community Facility          | 4                      | 113.085               |
| Renewable Power Generation  | 0                      | 0                     |
| Mixed Use                   | 33                     | 1632.686              |
| <b>TOTAL</b>                | <b>323</b>             | <b>3,559.645</b>      |

| <b>Category</b> | <b>Number of Sites</b> | <b>Site Area (ha)</b> | <b>Yield (dwellings)</b> |
|-----------------|------------------------|-----------------------|--------------------------|
| <b>Green</b>    | 25                     | 191.046               | 2746                     |
| <b>Yellow</b>   | 14                     | 280.658               | 1974                     |
| <b>Amber</b>    | 168                    | 2180.504              | 30515                    |
| <b>Red</b>      | 116                    | 907.437               | 14159                    |
| <b>TOTAL</b>    | <b>323</b>             | <b>3,559.645</b>      | <b>49,394</b>            |

The figures only show us the sites that have been promoted through the SHELAA. The site areas and yields are used as a guide only. The actual number of dwellings that will be allocated / developed will be considered within the review of the Local Plan or as part of a planning application. Planning permission will need to be granted for development to take place.

## Conclusions

The SHELAA will be used, alongside other factors, to guide the Council decisions on where to allocate future sites for development in the Local Plan.

Proposed development allocations will be consulted on separately within the Local Plan. Planning permission will need to be granted before any site can be developed.

# **Strategic Housing and Employment Land Availability Assessment (SHELAA) Autumn 2025**

Part 2 of 9  
Assessment Statistics

November 2025

## **SHELAA 2025 ASSESSMENT STATISTICS**

1. The outputs from the SHELAA can be used to calculate gross figures for area of land available and indicative number of dwellings (yield) deliverable outside of that already identified within the Council's Housing Site Schedule.
2. To calculate this, a refinement of the SHELAA sites is first undertaken. SHELAA sites which have an approved planning consent or have been allocated within the Local Plan are included within the Council's Housing Site Schedule. Therefore, the gross outputs would represent, potentially significant, double counting of land and a double counting of indicative yield within the various site categories. As a result, the area and yield of these sites are discounted to give a more accurate picture of the quantum of land available.
3. Additionally, there are instances where submissions lie wholly within other submissions. Again, to avoid a double counting of yield and area, these sites are also discounted from the outputs.

### **Limitations of the statistics**

4. It should also be noted that there are some sites which overlap each other. Since some of these overlapping sites may fall within differing categories and have varying levels of Greenfield/PDL splits between them it is impossible to discount site areas and site yields in a fair and consistent manner. As such the reporting output figures should be viewed with some caution as, although most of the double counting has been removed, there will be elements of site overlapping, but is not possible to give an accurate figure for how much and in which categories.
5. Furthermore, the indicative number of dwellings for each SHELAA site has been generated solely using the assumptions from the Viability Study that supports the Achievability element of the SHELAA. The Viability Study follows a typology approach. A number of assumptions have been made to establish each typology including build form and scale, density, and gross-to-net development ratios. Each SHELAA site is attributed a typology and using the typology assumptions along with the size of the SHELAA site, an indicative figure for the number of dwellings (yield) can be calculated. The figure **DOES NOT** dictate the number of dwellings that can/should/will be delivered on site, as it does not factor Suitability nor Availability considerations. Instead, is just reflecting what the Viability Study has tested to gauge the Achievability of the site.
6. For the purpose of these statistics, this indicative yield is used as it is the best gauge that we have available to us.

### **Outputs: 2025 Assessment**

7. The 2025 SHELAA assessed a total of 398 sites, of which 75 sites have been discounted from the calculations of available land below. Of these 75 sites, 33 have either been allocated within the Local Plan or have an approved planning permission, whilst the remaining 42 lie wholly within another SHELAA submission. As stated above, these sites areas and indicative yields have been discounted to avoid, potentially significant, double counting. Tables 1 and 2 below provide details of these 75 sites:

**Table 1:** SHELAA sites allocated within the Local Plan or have an approved planning permission, where the permission covers the entire SHELAA submission.

| <b>Site Reference</b> | <b>Site Address</b>                                                                                   | <b>Permitted Planning Reference</b> | <b>Site Area (ha)</b> | <b>Yield</b> | <b>RAG Rating</b> | <b>PDL / GF</b> |

|               | No. Sites                 | Area (ha)     | Yield (dwellings) | No. Sites  | Area (ha)      | Yield (dwellings) |               |
| <b>Green</b>  | 2                         | 1.02          | 42                | 7          | 113.093        | 1894              | 1936          |
| <b>Yellow</b> | 3                         | 1.81          | 113               | 8          | 868.601        | 11428             | 11541         |
| <b>Amber</b>  | 6                         | 15.476        | 1399              | 29         | 512.505        | 7393              | 8792          |
| <b>Red</b>    | 0                         | 0             | 0                 | 20         | 428.455        | 5820              | 5820          |
| <b>TOTAL</b>  | <b>11</b>                 | <b>18.306</b> | <b>1,554</b>      | <b>64</b>  | <b>1922.65</b> | <b>26,535</b>     | <b>28,089</b> |

9. Taking account of the above discounts, the SHELAA outputs are detailed below in Tables 4, 5 and 6.

**Table 4:** Proposed Uses

| Proposed Use                | Number of Sites | Site Area (ha)   |
|-----------------------------|-----------------|------------------|
| Residential                 | 258             | 1523.341         |
| Residential – G&T           | 5               | 2.37             |
| Residential – Older Persons | 3               | 8.61             |
| Residential - Other         | 1               | 0.8              |
| Employment                  | 19              | 278.753          |
| Retail                      | 0               | 0                |
| Community Facility          | 4               | 113.085          |
| Renewable Power Generation  | 0               | 0                |
| Mixed Use                   | 33              | 1632.686         |
| <b>TOTAL</b>                | <b>323</b>      | <b>3,559.645</b> |

**Table 5:** Contribution to housing by Category

| Category      | Number of Sites | Site Area (ha)   | Yield (dwellings) |
|---------------|-----------------|------------------|-------------------|
| <b>Green</b>  | 25              | 191.046          | 2,746             |
| <b>Yellow</b> | 14              | 280.658          | 1,974             |
| <b>Amber</b>  | 168             | 2,180.504        | 30,515            |
| <b>Red</b>    | 116             | 907.437          | 14,159            |
| <b>TOTAL</b>  | <b>323</b>      | <b>3,559.645</b> | <b>49,394</b>     |

10. As can be seen from Table 5, a yield of 2,746 dwellings may be achieved from Green sites and 1,974 from Yellow sites. Amber and Red sites, those which are not currently developable, amounts to 44,674 dwellings.

**Table 6:** Contribution to housing by Category and land type

|               | Previously Developed Land |               |                   | Greenfield |                 |                   | Yield Total |
|---------------|---------------------------|---------------|-------------------|------------|-----------------|-------------------|-------------|
|               | No. Sites                 | Area (ha)     | Yield (dwellings) | No. Sites  | Area (ha)       | Yield (dwellings) |             |
| <b>Green</b>  | 1                         | 0.12          | 4                 | 24         | 190.926         | 2,742             | 2,746       |
| <b>Yellow</b> | 0                         | 0             | 0                 | 14         | 280.658         | 1,974             | 1,974       |
| <b>Amber</b>  | 21                        | 23.833        | 1,412             | 146        | 2,147.29        | 29,103            | 30,515      |
| <b>Red</b>    | 8                         | 6.22          | 228               | 108        | 901.217         | 13,931            | 14,159      |
| <b>TOTAL</b>  | <b>30</b>                 | <b>30.173</b> | <b>1,644</b>      | <b>292</b> | <b>3,520.09</b> | <b>47,750</b>     | 49,394      |

11. Table 6 provides a greater level of detail including the land type. The indicative yield of previously developed (brownfield) dwellings from Green sites amounts to 4, compared to a yield of 2,742 greenfield dwellings. The indicative yield of previously developed (brownfield) dwellings from Yellow sites amounts to 0, compared to an indicative yield of 1,974 greenfield dwellings. Finally, the Amber and Red rated sites together yield 1,640 dwellings from previously developed (brownfield) sites and 43,034 dwellings from greenfield sites.

# **Strategic Housing and Employment Land Availability Assessment (SHELAA) Autumn 2025**

Part 3 of 9  
Methodology

November 2025

## METHODOLOGY

## 1. Introduction

- 1.1 Chelmsford City Council conduct a Strategic Housing and Employment Land Availability Assessment (SHELAA) to gain an understanding of the potential developability of sites proposed for future development.
- 1.2 The SHELAA forms part of the evidence base for the preparation and review of the Local Plan. The purpose of the SHELAA is to help the Council make informed decisions of where to allocate future development and in preparing annual housing and employment trajectories.
- 1.3 As part of the review of the Local Plan, the Council have reviewed and refined the SHELAA methodology to reflect emerging national and local priorities as well as to provide greater clarity and transparency to stakeholders on how the process is carried out. To ensure a justified and robust approach is taken, the Planning Advisory Service have been involved as part of this reviewing and refining process.
- 1.4 This report has been prepared to set out the revised SHELAA methodology.

## 2. Policy Background

- 2.1 Paragraph 69 of the National Planning Policy Framework (NPPF)<sup>1</sup> sets out the requirement for local authorities to undertake land availability assessments to establish their understanding of sites that may be suitable, available and achievable for development:

*“Strategic policy-making authorities should have a clear understanding of the land available in their area through the preparation of a strategic housing land availability assessment. From this, planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability”*

- 2.2 Planning Practice Guidance (PPG) for Housing and Economic Land Availability Assessments elaborates future

*“...the assessment does not in itself determine whether a site should be allocated for development” but to “provide information on the range of sites which are available to meet the local authority’s requirements...”*

*“An assessment should:*

- Identify sites and broad locations with potential for development;*
- Assess their development potential; and*
- Assess their suitability for development and the likelihood of development coming forward (the availability and achievability).”*

---

<sup>1</sup> NPPF 2023 Update

- 2.3 To adhere to the guidance, the Council undertake a 'Call for Sites' facility enabling site owners, developers, interested parties, and members of the public to put forward sites for consideration. This facility is accessible through the Council's Consultation Portal, is open for submissions all year round and enables promoters to submit new sites for consideration and/or to propose amendments to existing SHELAA sites.
- 2.4 This approach provides flexibility to promoters and further seeks to ensure that the Council hold a continued up-to-date catalogue of sites that may be available within the administrative area.
- 2.5 Cut-off periods to the 'Call for Sites' facility are scheduled so that the assessment can be carried out. The assessment is desk-based and considers a wide range of suitability, availability and achievability criteria (see Criteria Note), which together help determine whether each site is likely deliverable, likely developable or neither.
- 2.6 To be developable, the NPPF states that:
- "Sites should be in a suitable location for housing development with a reasonable prospect that they will be available and could be viably developed at the point envisaged".*
- 2.7 To be deliverable, a site must meet additional criteria. The NPPF states that deliverable sites:
- "... should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:*
- a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until the permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).*
- b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years."*
- 2.8 To reiterate national guidance, it is not the purpose of the SHELAA to allocate land for future development. Instead, the assessment provides a high-level profile of the promoted sites; identifies a wide range of site characteristics; highlights the strengths and constraints that sites may face in achieving the local authority requirements; and establishes the likelihood of site developability/deliverability. Together this information is considered alongside other evidence base documents to enable officers and Members to make informed decisions of where to allocate future development.

### 3. Methodology

- 3.1 In undertaking the SHELAA, Chelmsford City Council follow five stages detailed within Figure 1 on the following page. Explanation of our processes at each stage follow below.

Figure 1: Methodology Flowchart

### **Stage 1: Reviewing the SHELAA Criteria**

- 3.2 Prior to each assessment, the Council undertake an internal review of the existing SHELAA criteria and assessment process. This is to ensure the criteria remain in alignment with National Policy; are reflective of the sustainability objectives set out within the Sustainability Appraisal, as well as emerging local policy priorities; and are feasible to be measured through desk-top methods.
- 3.3 The SHELAA is undertaken in-house by dedicated officers within the Spatial Planning Team. The assessment process has been developed (and is continually reviewed) to maximise the utilisation of available digital software including GIS mapping. This ensures that a robust desk-top site assessment can be undertaken with algorithms in place to minimise, as far as possible, any subjective assessment decisions or human error.
- 3.4 The assessment criteria cover proposals not only for residential and employment/commercial use, but also for community facilities (including education, healthcare, places of worship, sports, leisure, or recreation facilities) and renewable power generation. A full breakdown of the criteria is featured in the Criteria Note.
- 3.5 The inclusion of these uses reflects the aims within the NPPF, particularly in relation to promoting healthy communities and planning for climate change. Understanding what land may be available for community facilities or renewable power generation helps the City Council make informed decisions of where to allocate these uses to sustainably support future housing and employment development.
- 3.6 Impartial feedback has been sought on the SHELAA Criteria Note from the Planning Advisory Service, who have helped to ensure that the assessment criteria is reasonable and forms a robust assessment.

### **Stage 2: Call for Sites**

- 3.7 The Council maintain a 'Call for Sites' facility that is open for submission all year round and enables promoters to submit new sites to be included within the SHELAA and/or to propose amendments to existing promoted sites. This facility is accessible through our website at: <https://www.chelmsford.gov.uk/planning-and-building-control/planning-policy-and-local-plan/call-for-sites-shelaa-and-parish-maps/>
- 3.8 Promoters are required to complete the relevant submission form, which requires them to provide an OS map outlining the site, site ownership details, proposed use/s, delivery timescales, known legal issues, and an overview of some of the site's characteristics.
- 3.9 Sites will be considered for the SHELAA providing most of the site (over 50% of the promoted area) falls within the Chelmsford administrative area, detailed in Figure 2 below. There is no site size threshold for submission.

Figure 2: Chelmsford Administrative Area

Source: CCC, 2022.

3.10 At the scheduled ‘Call for Sites’ cut-off times, all new submitted sites and proposed amendments are individually reviewed to ensure that the promoter has provided enough information to be able to carry out an assessment, to make any proposed amendments to sites, and to ensure that any new sites are not a duplication of an

existing SHELAA site.

### **Stage 3: Pre-Assessment Checks**

- 3.11 Using Council databases and GIS software, the entire catalogue of SHELAA sites (new and existing) are checked to see if they feature on the Brownfield Register, have been granted planning Permission in Principle, have received planning permission for development, or have previously been refused planning permission. Where areas of/whole sites have permission and are well underway with or have completed development, these areas/sites will be omitted from the SHELAA. Simply having permission granted is not enough to remove an area/site from the SHELAA as these do not always get built-out.
- 3.12 Again, using GIS software, SHELAA sites are also checked for the presence of any human hazards on site (this includes gas and oil pipelines, electricity towers/lines, electricity substations, and sewage pumping stations). Any hazardous areas identified within promoted sites are discounted from the SHELAA.
- 3.13 At this stage, a list of sites to be omitted from the assessment is produced. Sites can be omitted for the following circumstances:
- If the site consists wholly of a human hazard
  - If the site is considered to be identical or almost identical to another submission. Where a site is considered almost identical to another site, the assessing officer makes a judgement to remove the site if they feel the discrepancy would not likely impact the assessment outcome
  - If subsequent to submission, the site has commenced/completed development
  - If removal of site is requested by the landowner. In the case where only a portion of a SHELAA site is owned, only this portion will be omitted from the submission
  - If removal of site is requested by the person/organisation who submitted the site or if the promotor is no longer contactable
- 3.14 Sites that are omitted from the SHELAA through Stages 2 and 3 are listed within the List of Omitted Sites document with their reason for omission.

### **Stage 4: Site Assessment**

- 3.15 Sites that have passed through the pre-assessment checks are brought through to Stage 4 where they are each profiled and assessed against suitability, availability, and achievability criteria<sup>2</sup>. The sites are then RAG rated determined by their scores and compliance with national and local policy, as summarised in Table 1 below.

---

<sup>2</sup> Note: Sites are assessed individually with the area of assessment defined by the red line boundary provided by the promoter. If two or more adjoining SHELAA sites come forward for development at a later stage, then any in combination effects are identified and appropriately addressed with stakeholders at that stage.

Table 1: SHELAA RAG Rating Summary

|        |                                                                                                                                                                                      |
|--------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Red    | Site is contrary to national policy and/or faces significant constraints or adverse impacts that cannot be mitigated.                                                                |
| Amber  | Site scores less well against criteria or has some characteristics contrary to local policy and faces moderate constraints that would require mitigation.                            |
| Yellow | Site scores well against criteria but has some characteristics contrary to local policy. Site faces minor constraints that would require mitigation. Site is considered developable. |
| Green  | Site scores highly against criteria and demonstrates compliance with national and local policy. Site faces minimal constraints and is considered deliverable.                        |

- 3.16 The Criteria Note provides a full technical breakdown of how each proposed use is assessed and RAG rated. The criteria that are used have been developed based upon policy requirements in both the NPPF and Chelmsford's Local Plan, and to reflect the current Sustainability Appraisal site appraisal criteria. This is to ensure that the SHELAA can highlight the most suitable sites, favour sites that look likely to achieve sustainable development, and to provide alignment between the SHELAA and subsequent iterations of the Sustainability Appraisal which will look to test the economic, environmental, and social impacts of the Reviewed Local Plan.
- 3.17 The assessment is desk-based and utilises the evidence sources detailed in Table 2 below to determine the suitability, availability, and achievability of each site.

Table 2: Evidence Sources Utilised within SHELAA

| Criterion                                | Evidence used to undertake assessment                                                                                                                                                                      |
|------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Suitability Criteria</b>              |                                                                                                                                                                                                            |

| Timescale for deliverability             | SHELAA submission form                                                                                                                                                                                     |

\*See Policies Map at: <https://www.chelmsford.gov.uk/planning-and-building-control/planning-policy-and-local-plan/adopted-local-plan/>

- 3.18 To ensure the SHELAA is transparent, most of the criteria is assessed using maps, documents or websites that are accessible to the public. GIS maps that are not accessible to the public feature designations are generally ones provided to the Council by third parties (such as the Environment Agency or Essex County Council).
- 3.19 The Council also do not publish the SHELAA submission forms in line with GDPR since these forms contain personal and sensitive information. Therefore, the information detailed on these forms is not visible to the public.
- 3.20 The Viability Study has been prepared using the outputs of the latest Local Plan Viability Assessments.
- 3.21 In addition to the assessed criteria, the proximity of each site to defined settlement boundaries, retail allocations and employment allocations is recorded, as well as the general gradient of the site, and utilities (water, electric, gas, sewage) that are already present on site. These features are not scored against but provide greater clarity of the general character of the site.
- 3.22 Performance for each site is summarised in a concise report, with RAG rating and details of their suitability, availability, and achievability outcomes. All SHELAA sites are also plotted digitally and displayed on an interactive GIS map to provide additional spatial context. The most up-to-date assessment outcomes can be viewed in the Site Performance Summaries document. The GIS map is viewable here:  
<https://chelmsford.gov.maps.arcgis.com/apps/webappviewer/index.html?id=d5bae70913a14999b423522592e3cd62>

#### **Stage 5: Refinement of Sites**

- 3.23 A refinement of sites will be undertaken by the Council to ensure that the final site performance summaries are accurate.
- 3.24 Dependent on the findings from the assessment undertaken within Stage 4, there are instances whereby further information may be sought, or additional information inputs identified.

## **4. Uses of SHELAA outcomes**

- 4.1 The purpose of the SHELAA is not to allocate land for future development. The assessment helps officers and Members make their own informed decisions of where to allocate future development.
- 4.2 The assessment does this by highlighting areas of likely deliverable land. This is a particularly useful feature when looking at how the Council's Housing and Employment targets are going to be met within the plan period, and further into the future, as the assessment offers an indicator of how many dwellings could possibly be delivered, what size site is needed and whether the type of development would likely be viable or not.

- 4.3 Additionally, the assessment acts as a sieve to filter through sites that could be eligible to be added onto the Council's Part 1 of the Brownfield Register. If the assessment deems the site to be predominantly previously developed land, an officer will review the site against the Brownfield Register Regulations to see if it is eligible to be added to the register.

# **Strategic Housing and Employment Land Availability Assessment (SHELAA) Autumn 2025**

Part 4 of 9  
Criteria Note

November 2025

## CRITERIA NOTE

## **How to use this Criteria Note**

This Criteria Note has been prepared to explain how SHELAA sites are assessed.

It sets out the Suitability, Availability and Achievability criteria that are used to assess the SHELAA sites based upon their determined proposed use.

The document is split into sections that cover:

- Policy background
- Pre-assessment checks
- Policy restrictions
- Criteria, and
- RAG rating categorisation

You can use this document to see how a SHELAA site has been assessed or to gauge how a site will be assessed in the future.

To do this, you will first need to make a note of the proposed use of the site. This needs to be one of the following:

- Residential
- Employment
- Retail
- Community Facility
- Mixed Use
- Renewable Energy Generation

If the site has been assessed in the SHELAA before, you can find the proposed use in the top section of the site performance summary of the site.

The Criteria Note features a section dedicated to each proposed use which details the criteria used to assess the Suitability, Availability and Achievability of sites of this proposed use.

Taking the 'Residential' proposed use as an example, the annotated extract below explains how to interpret the criteria.

There is a short segment that follows the list of Suitability/Availability/Achievability criteria respectively to explain how the tallied score of these will be interpreted as a RAG rating. Be aware that if the site has scored poorly against any of the underlined criteria, this may result in a capped RAG rating for Suitability/Availability/Achievability performance, as appropriate. Please refer to the section titled 'Capped Constraints' for more details.

At the end of the Criteria Note, the section on 'Overall Scores & Site Categorisation' provides detail on how the performance against Suitability, Availability and Achievability determine the overall RAG rating categorisation for the site. The section also explains how each colour RAG rating can be interpreted.

# 1. Overview

- 1.1. The Strategic Housing and Employment Availability Assessment (SHELAA) is a desk-based assessment that, in line with the NPPF and PPG guidance, scores sites promoted for development against Suitability, Availability and Achievability criteria. Based on performance, a RAG rating process is then used to determine whether a site is likely deliverable (Green), developable (Yellow), or neither (Amber if constraints are mitigable, or Red if non-mitigable).
- 1.2. Site promoters can propose a whole range of uses for a site including residential, employment, retail, community facilities, renewable power generation or a mix of all the above. The criteria for which the site is assessed against is dependent on the proposal<sup>1</sup>.
- 1.3. The Suitability criteria for each promoted use are assessed predominantly using GIS maps in conjunction with information provided by the site promoter. Details of how each criterion is assessed and where relevant maps can be viewed are provided against each criterion.
- 1.4. Availability and Achievability are assessed using information provided by site promoters within a site submission in relation to ownership, legal constraints, relocation of uses and timescales for delivery. The viability aspect of the Achievability criteria is predominantly assessed using the typology appraisals within the SHELAA Viability Study.
- 1.5. All criteria have been developed based upon policy requirements set out within the NPPF and Chelmsford's Local Plan, including the supporting Integrated Impact Assessment to ensure sustainable development is favoured. Where appropriate, additional constraints are also in place to either discount non-developable land from a site assessment or to cap a site's overall performance where policy non-compliances are not mitigable.
- 1.6. This Criteria Note sets out the Suitability, Availability and Achievability criteria for which each proposed use is assessed against – including applicable constraints – and identifies which National Policies, Local Plan

---

<sup>1</sup> Note: Sites are assessed individually with the area of assessment defined by the red line boundary provided by the promoter. If two or more adjoining SHELAA sites come forward for development at a later stage, then any in combination effects are identified and appropriately addressed with stakeholders at that stage.

Policies and Sustainability Objectives are reflected within the assessment.

## 2. Pre-Assessment Checks

- 2.1. Prior to assessing sites against the Suitability, Availability and Achievability criteria detailed in the next section, the catalogue of sites is checked to ensure sites are suitable to be assessed.
- 2.2. This involves checking whether the site features within the Brownfield Register, checking the site's planning history, and checking whether the site features a hazard to human health.

### Brownfield Register

- 2.3. Regulation 4 of The Town and Country Planning (Brownfield Land Register) Regulations 2017 sets out that as part of the criteria to be on the Brownfield Register, a site must be suitable, available, and achievable for residential development.
- 2.4. As such, any SHELAA sites promoted for residential use that are identified to be on Chelmsford's Brownfield Register are automatically considered to be suitable, available and achievable and will be categorised as either Yellow or Green dependent upon identified policy compliancy and constraints.
- 2.5. Note however, that this is not to say that sites determined as suitable, available and achievable within this assessment are to be added to the Brownfield Register. There are additional strict criteria that a site must meet to feature on the Brownfield Register, set out in legislation, and this is dealt with in a separate assessment.

### Planning History

- 2.6. The purpose of the SHELAA is to identify land within the administrative area that may be suitable, available and achievable for future development. The catalogue of SHELAA sites is therefore checked for both permitted and refused planning applications as this helps to identify the following:
  - If a whole or part of a SHELAA site has live planning permission and development is underway then the whole/part of the site being developed is removed from the SHELAA. Note that just having planning permission is not enough to remove a site from the SHELAA as development does not always commence and permissions can expire.

- If a site has had a planning application refused, the reasons for refusal may indicate that the site is unsuitable for development. In this scenario, the unsuitability of the site will be reflected within the assessment scores.

## Hazards to Human Health

- 2.7. For sites proposed for residential, employment, retail uses, if any portion of the site lies within land considered to be a hazard to human health, this part of the site will be discounted from the SHELAA assessment.
- 2.8. Land is a hazard to human health if it features one or more of the following: gas pipelines, electricity towers, electricity substations, gas installation buffers, gas pipeline feeders, high pressure gas pipelines, gas pipeline buffers and oil pipelines. The location of the pipelines and buffers are as determined by the Health and Safety Executive's Planning Advice for Developments near Hazardous Installations (PADHI).
- 2.9. After the hazard to human health areas are discounted, the remaining portion of the site is to be assessed against the Suitability, Availability and Achievability criteria covered within the latter portion of this note.

### 3. Capped Constraints

- 3.1. In assessing the Achievability of a site, two criteria are considered: viability and timescale for delivery. Should a site be considered likely unviable, then it will be capped at Amber as this is viewed as a moderate constraint that would require mitigation. In terms of deliverability, if the site has an anticipated development time that exceeds 5 years, then the site will be capped at Yellow as it would be considered developable rather than deliverable in accordance with the NPPF definitions.
- 3.2. In assessing the Suitability of a site, if any part of the site meets one or more criterion listed below, the site's RAG rating will be capped at Red if the constraint is contrary with national policy, and Amber if the constraint goes against local policy. The purpose of this is to ensure that promoted sites that will not/cannot be compliant with national policy or Chelmsford's Local Plan policies are not identified as deliverable or developable sites.

#### National Policy Constraints

- 3.3. If any part of a SHELAA site meets one or more of the following criteria, the site will be attributed a Red RAG rating:
- Site lies within the Green Belt  
(NPPF section 13, Integrated Impact Assessment Objectives 1 and 14, Strategic Policy S11; Policies DM6)
  - Site lies within one of the following international or national designated site of importance for biodiversity: Site of Special Scientific Interest (SSSI), Ancient Woodland, Special Protection Area (SPA), Special Area of Conservation (SAC) or a Ramsar Site  
(NPPF section 15, Integrated Impact Assessment Objectives 1 and 14; Strategic Policy S4; Policies DM13, DM16, DM17 and DM24)

#### Local Policy Constraints

- 3.4. Providing a national policy constraint has not been identified, if any part of a SHELAA site meets one or more of the following criteria, the site will be attributed an Amber RAG rating:
- Where a site proposed for a non-employment use lies within an existing/proposed employment area  
(Integrated Impact Assessment Objective 3; Strategic Policy S8; Policy DM4)

- Site is in excess of 400m walking distance from any existing/proposed public transport services  
(Integrated Impact Assessment Objective 6; Strategic Policies S9, S10 and S11; Policies DM20 and DM24)
- Where a site has identified constraints that would prevent the implementation of a vehicle access route to the site  
(Integrated Impact Assessment 6; Strategic Policies S9 and S10; Policy DM20)
- Site lies within an area of defined Open Space  
(Integrated Impact Assessment Objective 5; Policies DM21, DM24 and DM26)
- Site lies within the Green Wedge  
(Integrated Impact Assessment Objective 14; Strategic Policy S11; Policy DM7)
- Where a site is promoted for a residential use but features a neighbouring constraint in the form of an adjacent employment/industrial use or an adjacent major road or dual carriageway, where there is no potential to mitigate impacts of these uses  
(Integrated Impact Assessment Objective 5; Policy DM29)
- Where development is proposed for a residential use but is in excess of 2km walking distance from Chelmsford City Centre or South Woodham Ferrers Town Centre and in excess of 2km walking distance away from any one of the following key services: GP surgery, school, convenience goods store  
(Integrated Impact Assessment Objectives 4, 5 and 6; Strategic Policies S5 and S7)
- Where the promoted use of the site would result in the loss of a community facility such as a school, GP surgery, place of worship, or a sports and leisure facility  
(Integrated Impact Assessment Objectives 4 and 5; Strategic Policy S5; Policies DM21 and DM22)

3.5. In exceptional circumstances, there may be additional constraints not listed above that may result in the performance of a site to be capped. Any such instances will be detailed within the relevant site assessment sheet.

## 4. Residential Criteria

- 4.1. Any sites that have been promoted for a residential use will be assessed against the Suitability, Availability and Achievability criteria detailed below.

### Suitability Criteria

- 4.2. Note that any underlined criteria represent where Policy Constraints are in place. If a site achieves a score of (0) against such criteria, the site will be capped at an Amber or Red RAG rating dependent on whether the site is contrary to local or national policy.

- 4.3. **Proximity to Employment Areas**  
(Strategic Policy S8; Policies DM4 and DM29)

- (5) Site is outside of any existing/proposed employment allocation
- (3) Site is adjacent to an existing/proposed employment allocation
- (0) Site is wholly/partially located within an existing/proposed employment allocation

**How this is assessed:**

Using the Local Plan GIS map, the proximity of the promoted site to areas labelled Proposed Employment Area, Existing Employment Area and rural Employment Area is observed.

- 4.4. **Impact on Retail Areas**  
(Strategic Policy S12; Policy DM5)

- (5) Development does not result in the loss of established shops and services within Chelmsford City Centre, South Woodham Ferrers Town Centre or any designated Neighbourhood Centres
- (0) Development would result in the loss of established shops and services within Chelmsford City Centre, South Woodham Ferrers Town Centre or any designated Neighbourhood Centres

**How this is assessed:**

Using the Local Plan GIS map, the site is checked to see if it falls within the City Centre, South Woodham Ferrers Town Centre or a designated Neighbourhood Centre. If so, information submitted by the promoter is used to determine whether loss of shops or services would occur.

- 4.5. **Proximity to the Workplace**  
(Integrated Impact Assessment Objective 3; Strategic Policies S7 and S8)

- (5) Site is within 2km walking distance of an employment allocation
- (0) Site is in excess of 2km walking distance of an employment allocation

How this is assessed:

Using the Local Plan GIS map, the GIS analytics feature showing walking distances from a promoted site is used to see if the site falls within the specified ranges to a Proposed Employment Area, Existing Employment Area or Rural Employment Area.

4.6. **Public Transport**

(Integrated Impact Assessment Objective 6; Strategic Policies S9, S10 and S11; Policies DM20 and DM24)

*Public transport services consist of proposed/existing bus stops, rail stations and park and ride facilities*

- (5) Site is within 400m walking distance of one or more services
- (0) Site is in excess of 400m walking distance from all services

How this is assessed:

Using a combination of the Local Plan GIS map and Essex Highways maps (<https://www.essexhighways.org/getting-around>), the GIS analytics feature showing walking distances from a promoted site is used to see if the site falls within the specified ranges to a bus stop, rail station and park and ride facility.

4.7. **PROW and Cycling Connectivity**

(Integrated Impact Assessment Objectives 5 and 6; Strategic Policies S2 and S9; Policies DM20 and DM24)

- (5) Site is within 100m walking distance to either a PROW or cycle network
- (0) Site is not connected to either an existing PROW or cycle network

How this is assessed:

Using the Essex Highways map (<https://www.essexhighways.org/getting-around>), the distance between the boundary of the site and the nearest PROW and cycle path is measured.

4.8. **Vehicle Access**

(Strategic Policies S9 and S10; Policy DM20)

- (5) A route exists enabling vehicle access into/adjacent to the site
- (3) There are no visible constraints that would likely prevent the implementation of a route to enable vehicle access into/adjacent to the site
- (0) There are visible constraints that would likely prevent the implementation of a route to enable vehicle access into/adjacent to the site

How this is assessed:

Using a standard GIS (or OS) map, it is observed whether the existing road network connects to the site and if not, whether any physical features (such as a river, or housing, or protected areas) exist that would prevent implementation of an access route.

**4.9. Impact on Designated Heritage Assets**

(Integrated Impact Assessment Objectives 13; Strategic Policy S3; Policies DM13 and DM24)

Designated heritage assets include: Grade 1 listed buildings, Grade 2\* listed buildings, Grade 2 listed buildings, Scheduled Ancient Monuments, Registered Parks or Gardens of Special Historic Interest, Conservation Areas

- (5) Site does not contain any designated heritage assets
- (3) Site is adjacent to one or more designated heritage assets
- (0) Site contains one or more designated heritage assets

How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to areas Scheduled Monuments and Registered Park and Garden of Special Historic Interest is observed. Historic England's map (<https://historicengland.org.uk/listing/the-list/>) is used to observe the proximity of the site to any Listed Buildings.

**4.10. Impact on Non-Designated Heritage Assets**

(Integrated Impact Assessment Objective 13; Strategic Policy S3; Policies DM14 and DM24)

Non-designated heritage assets include: protected lanes, buildings of local land value and the inventory of landscape of local interest

- (5) Site does not contain any non-designated heritage assets
- (3) Site is adjacent to one or more non-designated heritage assets
- (0) Site contains one or more non-designated heritage assets

How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to protected lanes is observed. Essex Garden Trust's Historic Designated Landscapes of Essex Handbook is used to observe the proximity of the site to a landscape of local interest. The Register of Buildings of Local Value is used to identify such assets, with proximity of these to the site observed using a GIS map.

**4.11. Impact on Archaeological Assets**

(Integrated Impact Assessment Objective 13; Strategic Policy S3; Policies DM15 and DM24)

- (5) Site is not thought to contain any assets of archaeological interest
- (3) Site is thought to be adjacent to one or more assets of archaeological interest
- (0) Site is thought to contain one or more assets of archaeological interest

How this is assessed:

Using the Council's Monuments & Geological Sites GIS map, the proximity of the promoted site to identified archaeological sites is observed. Where there is uncertainty, the Council's Heritage Officer will be consulted.

4.12. **Mineral and Waste Constraints**

(Integrated Impact Assessment Objective 12; Policy DM30; Essex Mineral Plan; Essex and Southend-on-Sea Waste Plan)

- (5) Less than 5ha of a site is within a Minerals Safeguarding Area. Site is not within a Minerals or Waste Consultation Area
- (4) Site is wholly or partially within an identified Minerals Consultation Area and/or a Waste Consultation Area but planning permission for the safeguarded uses would have expired prior to the intended delivery of development, the safeguarded use has otherwise ceased, and the site or infrastructure is considered unsuitable for a subsequent minerals and/or waste use
- (2) Site is wholly or partially within an identified Minerals Safeguarding Area and requires further assessment to be undertaken in the form of a Minerals Resource Assessment
- (0) Site is wholly or partially within an identified Minerals Consultation Area and/or Waste Consultation Area where safeguarded infrastructure is permanent in nature or where the allocated activity would not have ceased prior to the intended delivery of development

How this is assessed:

Using the Local Plan GIS map alongside GIS information provided by Essex County Council, the proximity of promoted sites to identified Minerals Safeguarding Areas, Minerals Consultation Areas and Waste Consultation Areas is observed. Where a promoted site lies within a Minerals or Waste Consultation Area or has an area of 5ha or greater within a Minerals Safeguarding Area, Essex County Council will be consulted to confirm whether the Minerals/Waste infrastructure is temporary or permanent in nature and whether a Minerals Resource Assessment is required.

4.13. **Impact on Areas of Defined Open Space**

(Integrated Impact Assessment Objective 5; Policies DM21, DM24 and DM26)

'Other' Green Space includes (but is not limited to) areas of planned

strategic landscape enhances, future recreation areas and Sustainable Drainage Systems (SuDS)

- (5) Site does not lie within an area defined as Open Space, an existing/proposed Country Park or 'Other' Green Space
- (3) Site partially lies within an area defined as Open Space, an existing/proposed Country Park or 'Other' Green Space
- (0) The majority of the site (90% or more) lies within an area defined as Open Space, an existing/proposed Country Park or 'Other' Green Space

How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to areas of defined Open Space, Country Park or Other Green Space is observed.

4.14. **Impact on the Green Belt and Green Wedge**

(NPPF section 13, Integrated Impact Assessment Objective 14; Strategic Policy S11; Policies DM6 and DM7)

- (5) Site does not lie within the Metropolitan Green Belt or Green Wedge
- (3) Site partially lies within the Metropolitan Green Belt or Green Wedge
- (0) The majority of the site (90% or more) lies within the Metropolitan Green Belt or Green Wedge

How this is assessed:

Using the Local Plan GIS map, the area of the promoted site that falls within the Green Belt or Green Wedge is measured.

4.15. **Land Classification**

(Integrated Impact Assessment Objective 7; Strategic Policies S4, S7, S8)  
*Agricultural Land Classification are as per Natural England's ALC map East Region (ALC008)*

- (5) Site is predominantly Previously Developed Land
- (3) Site is predominantly Greenfield and primarily within the agricultural land classification/s: Grade 4, Grade 5, non-agricultural use, or urban use
- (0) Site is predominantly Greenfield and primarily within the land classification/s: Grade 1, Grade 2 or Grade 3

How this is assessed:

Using a GIS map with aerial photos, area measurement/s are taken to determine the proportionate ratio of Greenfield land to PDL that make up the promoted site. Greenfield land and PDL are as defined within the NPPF. Using Natural England's map ALC008, the Agricultural Land Classification for the promoted site is observed.

4.16. **Impact on Protected Natural Features**

(NPPF section 15, Integrated Impact Assessment Objectives 1 and 13; Strategic Policy S4; Policies DM13, DM16, DM17 and DM24)

*International/national protected natural features include: Ancient Woodland, Special Protection Areas, Special Areas of Conservation, RAMSAR, SSSIs, Marine Conservation Zone, and the Nature Recovery Network.*

*Local protected natural features include: Local Nature Reserves, the Essex Wildlife Trust Nature Reserve, TPOs, Ancient Woodland including ancient and veteran trees and Coastal Protection Belt.*

- (5) Site is in excess of 100m of any locally designated protected natural features and in excess of 500m of any international/national designated protected natural features
- (3) Site does not comprise of any protected natural features but is within 100m of a locally designated protected natural feature or within 500m of an international/national designated protected natural feature
- (0) Site partially or wholly comprises of one or more protected natural features or is within 15 metres from the boundary of Ancient Woodland or is within 15 metres from the boundary of Ancient Woodland.

How is this assessed:

Using the Local Plan GIS map, the shortest distance between the promoted site boundary and the closest locally designated and nationally/internationally designated protected natural feature is measured.

**4.17. Impact on Flood Risk**

(Integrated Impact Assessment Objective 9; Strategic Policies S2 and S9; Policy DM18)

*Flood Risk Zones are as determined by the Environment Agency*

- (5) Site is wholly within Flood Zone 1
- (4) Site is wholly or partially within Flood Zone 2, with the remainder in Flood Zone 1
- (2) Up to 25% of the site area is within Flood Zone 3
- (1) 25%-50% of the site area is within Flood Zone 3
- (0) Over 50% of the site area is within Flood Zone 3

How this is assessed:

Using the Local Plan GIS map – or updated GIS map from the Environment Agency – the areas of the promoted site that fall within Flood Zones 2 and 3 are measured.

**4.18. Impact on Air Quality Management Areas**

(Integrated Impact Assessment Objective 10; Policy DM30)

- (5) Site is in excess of 500m from a designated AQMA
- (3) Site is within 500m from a designated AQMA
- (0) Site is within a designated AQMA

How this is assessed:

Using the Local Plan GIS map, the GIS analytics feature shows a 500m buffer around the designated AQMAs. The relationship between the designation and buffer to the promoted site is then observed.

**4.19. Ground Condition Constraints**

(Integrated Impact Assessment Objective 7; Policy DM30)

The type and level of contamination identified on site provides an indication as to the level of ground treatment required to ensure the development is safe.

- (5) Ground treatment is not expected to be required
- (3) Ground treatment is expected to be required on part of the site
- (0) Ground treatment is expected to be required on the majority (90% or more) of the site

How this is assessed:

Using the Council's Environmental Restrictions GIS map, the proximity of the promoted site to areas of ground contamination can be observed. Areas of promoted sites that lie within areas of ground contamination are considered to require ground treatment.

**4.20. Neighbouring Constraints**

(Integrated Impact Assessment Objective 5; Policy DM29)

For the purpose of this assessment, a site has a neighbouring constraint if existing B2 or B8 use classes are present on or adjacent to the site; if existing sports venues that have large spectator capacity (the racecourse, cricket stadium and Melbourne stadium in particular) are adjacent to the site; or if a major road or dual carriageway runs adjacent to the site.

- (5) Site has no neighbouring constraints
- (3) Site has neighbouring constraints with potential for mitigation
- (0) Site has neighbouring constraints with no potential for mitigation

How this is assessed:

The SHELAA submission form asks for details of current uses on and adjacent to the promoted site. The information provided by the site promoter in addition to using GIS maps with aerial photos enable the proximity of the promoted site to unsuitable neighbours to be observed. It is assumed, for the benefit of doubt, that there is potential for mitigation unless a B2/B8 use sits on or adjacent to the site or that a major road/dual carriageway runs adjacent to the site.

**4.21. Proximity to Key Services**

(Integrated Impact Assessment Objectives 4 and 5; Strategic Policies S5 and S7)

Key services include: GP surgeries, mainstream non-selective state funded primary or secondary schools, and supermarkets/convenience goods stores

- (5) Site is within 800m walking distance of all services and/or the City Centre/South Woodham Ferrers Town Centre
- (3) Site is within 2km walking distance of all services and/or the City Centre/South Woodham Ferrers Town Centre
- (0) Site is in excess of 2km walking distance of one or more services and the City Centre/South Woodham Ferrers Town Centre

How this is assessed:

Using the Local Plan GIS map, the analytics feature showing walking distances from a promoted site is utilised to observe the proximity of the site to GP surgeries, mainstream non-selective state-funded schools, and convenience stores.

4.22. **Impact on Community Facilities**

(Integrated Impact Assessment Objectives 4 and 5; Strategic Policy S5; Policies DM21 and DM22)

- (5) Development would not result in the loss of nor put additional strain on an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility
- (3) Development would put additional strain on but not result in the loss of on an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility
- (0) Development would result in the loss of an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility

How this is assessed:

Using the SHELAA submission form and a GIS map, the development proposal is compared against the existing use to determine whether any community uses will be gained or lost. Development that would yield 20 or more dwellings is considered to add strain on existing facilities unless such facilities are incorporated within the proposal

## Suitability Scoring

- 4.23. The maximum 'Suitability' score for sites assessed under the Residential Criteria is 100 (i.e. 20 criteria applied, each with a maximum score of 5). **Unless a capped constraint determines otherwise**, a Suitability RAG rating will then be attributed as follows:

- Sites scoring 80% or over are Green

- Sites scoring 40%-79% are Yellow
- Sites scoring less than 40% are Amber

4.24. In exceptional circumstances, suitability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## Availability Criteria

### 4.25. **Ownership**

- (5) Held by developer/willing owner/public sector
- (3) Promoter has an option to purchase site or collaborate with existing owner
- (0) Known to be in particularly complex/multiple ownership

#### How this is assessed:

This is determined using details provided within the SHELAA submission form. Where there is uncertainty, the site promoter will be contacted to clarify.

### 4.26. **Land Condition**

- (5) Vacant land and buildings
- (4) Established single use
- (3) Low intensity land use
- (2) Established multiple uses

#### How this is assessed:

Using the SHELAA submission form in conjunction with GIS maps, the current use of the land is determined.

### 4.27. **Legal Constraints**

- (5) Site does not face any known legal issues
- (3) Site may possibly face legal issues
- (0) Site faces known legal issues

#### How this is assessed:

This is determined using details provided within the SHELAA submission form. GIS maps are also used to identify if ransom strips exist.

## Availability Scoring

4.28. The maximum unweighted 'Availability' score for sites assessed under the Residential Criteria is 15 (i.e. 3 criteria applied, each with a maximum score of 5). An Availability RAG rating will then be attributed as follows:

- Sites scoring 80% or over are Green
- Sites scoring 40%-79% are Yellow
- Sites scoring less than 40% are Amber

4.29. In exceptional circumstances, availability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## Achievability Criteria

### 4.30. **Viability**

- (5) Development is likely viable
- (3) Development is marginal
- (0) Development is likely unviable

#### How this is assessed:

Using the SHELAA Viability Study, the site is algorithmically attributed a typology. Where each typology has then been appraised as either likely viable, marginal, or likely unviable, the appropriate category is attributed to the site.

### 4.31. **Timescale for Deliverability**

- (5) Up to 5 years
- (4) Over 5 years

#### How this is assessed:

This is determined using details provided within the SHELAA submission form. Where these details are not provided, the assessing officer makes a judgement based upon whether any mitigation is required, and the yield of dwellings anticipated.

## Achievability Scoring

4.32. The maximum unweighted 'Achievability' score for sites assessed under the Residential Criteria is 10 (i.e. 2 criteria applied, each with a maximum

score of 5). **Unless a capped constraint determines otherwise**, an Achievability RAG rating will then be attributed as follows:

- Sites scoring 100% or over are Green
- Sites scoring 60%-99% are Yellow
- Sites scoring less than 60% are Amber

4.33. In exceptional circumstances, achievability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## 5. Employment Criteria

- 5.1. Any sites that have been promoted for an employment use will be assessed against the Suitability, Availability and Achievability criteria detailed below. For the purpose for this assessment, this includes proposals for hotels and travelling show person sites.

### Suitability Criteria

- 5.2. Note that any underlined criteria represent where Policy Constraints are in place. If a site achieves a score of (0) against such criteria, the site will be capped at an Amber or Red RAG rating dependent on whether the site is contrary to local or national policy.

5.3. **Public Transport**

(Sustainability Appraisal Objective 6; Strategic Policies S9, S10 and S11; Policies DM20 and DM24)

*Public transport services consist of proposed/existing bus stops, rail stations and park and ride facilities*

- (5) Site is within 400m walking distance of one or more services
- (0) Site is in excess of 400m walking distance from all services

**How this is assessed:**

Using a combination of the Local Plan GIS map and Essex Highways maps (<https://www.essexhighways.org/getting-around>), the GIS analytics feature showing walking distances from a promoted site is used to see if the site falls within the specified ranges to a bus stop, rail station and park and ride facility.

5.4. **PROW and Cycling Connectivity**

(Sustainability Appraisal Objectives 5 and 6; Strategic Policies S2 and S9; Policies DM20 and DM24)

- (5) Site is within 100m walking distance to either a PROW or cycle network
- (0) Site is not connected to either an existing PROW or cycle network

**How this is assessed:**

Using the Essex Highways map (<https://www.essexhighways.org/getting-around>), the distance between the boundary of the site and the nearest PROW and cycle path is measured.

5.5. **Vehicle Access**

(Strategic Policies S9 and S10; Policy DM20)

- (5) A route exists enabling vehicle access into/adjacent to the site

- (3) There are no visible constraints that would likely prevent the implementation of a route to enable vehicle access into/adjacent to the site
- (0) There are visible constraints that would likely prevent the implementation of a route to enable vehicle access into/adjacent to the site

How this is assessed:

Using a standard GIS (or OS) map, it is observed whether the existing road network connects to the site and if not, whether any physical features (such as a river, or housing, or protected areas) exist that would prevent implementation of an access route.

#### 5.6. **Strategic Road Access**

(Sustainability Appraisal Objective 6; Strategic Policies S7 and S9)

- (5) Site has direct access to or is adjacent to the strategic road network
- (4) Site has direct access to or is adjacent to a primary road network
- (2) Site has direct access to or is adjacent to a safeguarded trunk road or B-road
- (0) Site has no direct access to nor is adjacent to the strategic road network, primary road network, a safeguarded trunk road or a B-road

How this is assessed:

Using a standard GIS (or OS) map, it is observed whether the existing road network connects or can be connected to the site and if so, what type of road network this is.

#### 5.7. **Impact on Designated Heritage Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM13 and DM24)

Designated heritage assets include: Grade 1 listed buildings, Grade 2\* listed buildings, Grade 2 listed buildings, Scheduled Ancient Monuments, Registered Parks or Gardens of Special Historic Interest, Conservation Areas

- (5) Site does not contain any designated heritage assets
- (3) Site is adjacent to one or more designated heritage assets
- (0) Site contains one or more designated heritage assets

How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to areas Scheduled Monuments and Registered Park and Garden of Special Historic Interest is observed. Historic England's map (<https://historicengland.org.uk/listing/the-list/>) is used to observe the proximity of the site to any Listed Buildings.

### 5.8. **Impact on Non-Designated Heritage Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM14 and DM24)

Non-designated heritage assets include: protected lanes, buildings of local land value and the inventory of landscape of local interest

- (5) Site does not contain any non-designated heritage assets
- (3) Site is adjacent to one or more non-designated heritage assets
- (0) Site contains one or more non-designated heritage assets

#### How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to protected lanes is observed. Essex Garden Trust's Historic Designated Landscapes of Essex Handbook is used to observe the proximity of the site to a landscape of local interest. The Register of Buildings of Local Value is used to identify such assets, with proximity of these to the site observed using a GIS map.

### 5.9. **Impact on Archaeological Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM15 and DM24)

- (5) Site is not thought to contain any assets of archaeological interest
- (3) Site is thought to be adjacent to one or more assets of archaeological interest
- (0) Site is thought to contain one or more assets of archaeological interest

#### How this is assessed:

Using the Council's Monuments & Geological Sites GIS map, the proximity of the promoted site to identified archaeological sites is observed. Where there is uncertainty, the Council's Heritage Officer will be consulted.

### 5.10. **Mineral and Waste Constraints**

(Sustainability Appraisal Objective 12; Policy DM30; Essex Mineral Plan; Essex and Southend-on-Sea Waste Plan)

- (5) Less than 5ha of a site is within a Minerals Safeguarding Area. Site is not within a Minerals or Waste Consultation Area
- (4) Site is wholly or partially within an identified Minerals Consultation Area and/or a Waste Consultation Area but planning permission for the safeguarded uses would have expired prior to the intended delivery of development, the safeguarded use has otherwise ceased, and the site or infrastructure is considered unsuitable for a subsequent minerals and/or waste use
- (2) Site is wholly or partially within an identified Minerals Safeguarding Area and requires further assessment to be undertaken in the form of a Minerals Resource Assessment

- (0) Site is wholly or partially within an identified Minerals Consultation Area and/or Waste Consultation Area where safeguarded infrastructure is permanent in nature or where the allocated activity would not have ceased prior to the intended delivery of development

How this is assessed:

Using the Local Plan GIS map alongside GIS information provided by Essex County Council, the proximity of promoted sites to identified Minerals Safeguarding Areas, Minerals Consultation Areas and Waste Consultation Areas is observed. Where a promoted site lies within a Minerals or Waste Consultation Area or has an area of 5ha or greater within a Minerals Safeguarding Area, Essex County Council will be consulted to confirm whether the Minerals/Waste infrastructure is temporary or permanent in nature and whether a Minerals Resource Assessment is required.

**5.11. Impact on Areas of Defined Open Space**

(Sustainability Appraisal Objective 5; Policies DM21, DM24 and DM26)  
'Other' Green Space includes (but is not limited to) areas of planned strategic landscape enhances, future recreation areas and Sustainable Drainage Systems (SuDS)

- (5) Site does not lie within an area defined as Open Space, an existing/proposed Country Park or 'Other' Green Space
- (3) Site partially lies within an area defined as Open Space, an existing/proposed Country Park or 'Other' Green Space
- (0) The majority of the site (90% or more) lies within an area defined as Open Space, an existing/proposed Country Park or 'Other' Green Space

How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to areas of defined Open Space, Country Park or Other Green Space is observed.

**5.12. Impact on the Green Belt and Green Wedge**

(NPPF section 13, Sustainability Appraisal Objective 14; Strategic Policy S11; Policies DM6 and DM7)

- (5) Site does not lie within the Metropolitan Green Belt or Green Wedge
- (3) Site partially lies within the Metropolitan Green Belt or Green Wedge
- (0) The majority of the site (90% or more) lies within the Metropolitan Green Belt or Green Wedge

How this is assessed:

Using the Local Plan GIS map, the area of the promoted site that falls within the Green Belt or Green Wedge is measured.

**5.13. Land Classification**

(Sustainability Appraisal Objective 7; Strategic Policies S4, S7, S8)

*Agricultural Land Classification are as per Natural England's ALC map East Region (ALC008)*

- (5) Site is predominantly Previously Developed Land
- (3) Site is predominantly Greenfield and primarily within the agricultural land classification/s: Grade 4, Grade 5, non-agricultural use, or urban use
- (0) Site is predominantly Greenfield and primarily within the land classification/s: Grade 1, Grade 2 or Grade 3

How this is assessed:

Using a GIS map with aerial photos, area measurement/s are taken to determine the proportionate ratio of Greenfield land to PDL that make up the promoted site. Greenfield land and PDL are as defined within the NPPF. Using Natural England's map ALC008, the Agricultural Land Classification for the promoted site is observed.

**5.14. Impact on Protected Natural Features**

(NPPF section 15, Sustainability Appraisal Objectives 1 and 13; Strategic Policy S4; Policies DM13, DM16, DM17 and DM24)

*International/national protected natural features include: Ancient Woodland, Special Protection Areas, Special Areas of Conservation, RAMSAR, SSSIs, Marine Conservation Zone, and the Nature Recovery Network.*

*Local protected natural features include: Local Nature Reserves, the Essex Wildlife Trust Nature Reserve, TPOs, Ancient Woodland including ancient and veteran trees and Coastal Protection Belt.*

- (5) Site is in excess of 100m of any locally designated protected natural features and in excess of 500m of any international/national designated protected natural features
- (3) Site does not comprise of any protected natural features but is within 100m of a locally designated protected natural feature or within 500m of an international/national designated protected natural feature
- (0) Site partially or wholly comprises of one or more protected natural features or is within 15 metres from the boundary of Ancient Woodland.

How is this assessed:

Using the Local Plan GIS map, the shortest distance between the promoted site boundary and the closest locally designated and nationally/internationally designated protected natural feature is measured.

**5.15. Impact on Flood Risk**

(Sustainability Appraisal Objective 9; Strategic Policies S2 and S9; Policy DM18)

*Flood Risk Zones are as determined by the Environment Agency*

- (5) Site is wholly within Flood Zone 1

- (4) Site is wholly or partially within Flood Zone 2, with the remainder in Flood Zone 1
- (2) Up to 25% of the site area is within Flood Zone 3
- (1) 25%-50% of the site area is within Flood Zone 3
- (0) Over 50% of the site area is within Flood Zone 3

How this is assessed:

Using the Local Plan GIS map – or updated GIS map from the Environment Agency – the areas of the promoted site that fall within Flood Zones 2 and 3 are measured.

**5.16. Impact on Air Quality Management Areas**

(Sustainability Appraisal Objective 10; Policy DM30)

- (5) Site is in excess of 500m from a designated AQMA
- (3) Site is within 500m from a designated AQMA
- (0) Site is within a designated AQMA

How this is assessed:

Using the Local Plan GIS map, the GIS analytics feature shows a 500m buffer around the designated AQMAs. The relationship between the designation and buffer to the promoted site is then observed.

**5.17. Ground Condition Constraints**

(Sustainability Appraisal Objective 7; Policy DM30)

The type and level of contamination identified on site provides an indication as to the level of ground treatment required to ensure the development is safe.

- (5) Ground treatment is not expected to be required
- (3) Ground treatment is expected to be required on part of the site
- (0) Ground treatment is expected to be required on the majority (90% or more) of the site

How this is assessed:

Using the Council's Environmental Restrictions GIS map, the proximity of the promoted site to areas of ground contamination can be observed. Areas of promoted sites that lie within areas of ground contamination are considered to require ground treatment.

**5.18. Impact on Community Facilities**

(Sustainability Appraisal Objectives 4 and 5; Strategic Policy S5; Policies DM21 and DM22)

- (5) Development would not result in the loss of nor put additional strain on an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility

- (3) Development would put additional strain on but not result in the loss of an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility
- (0) Development would result in the loss of an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility

How this is assessed:

Using the SHELAA submission form and a GIS map, the development proposal is compared against the existing use to determine whether any community uses will be gained or lost. Development that would yield 20 or more dwellings is considered to add strain on existing facilities unless such facilities are incorporated within the proposal

## Suitability Scoring

5.19. The maximum 'Suitability' score for sites assessed under the Employment Criteria is 80 (i.e. 16 criteria applied, each with a maximum score of 5).

**Unless a capped constraint determines otherwise**, a Suitability RAG rating will then be attributed as follows:

- Sites scoring 80% or over are Green
- Sites scoring 40%-79% are Yellow
- Sites scoring less than 40% are Amber

5.20. In exceptional circumstances, suitability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## Availability Criteria

### 5.21. Ownership

- (5) Held by developer/willing owner/public sector
- (3) Promoter has an option to purchase site or collaborate with existing owner
- (0) Known to be in particularly complex/multiple ownership

How this is assessed:

This is determined using details provided within the SHELAA submission form. Where there is uncertainty, the site promoter will be contacted to clarify.

#### 5.22. **Land Condition**

- (5) Vacant land and buildings
- (4) Established single use
- (3) Low intensity land use
- (2) Established multiple uses

How this is assessed:

Using the SHELAA submission form in conjunction with GIS maps, the current use of the land is determined.

#### 5.23. **Legal Constraints**

- (5) Site does not face any known legal issues
- (3) Site may possibly face legal issues
- (0) Site faces known legal issues

How this is assessed:

This is determined using details provided within the SHELAA submission form. GIS maps are also used to identify if ransom strips exist.

### Availability Scoring

5.24. The maximum unweighted 'Availability' score for sites assessed under the Employment Criteria is 15 (i.e. 3 criteria applied, each with a maximum score of 5). An Availability RAG rating will then be attributed as follows:

- Sites scoring 80% or over are Green
- Sites scoring 40%-79% are Yellow
- Sites scoring less than 40% are Amber

5.25. In exceptional circumstances, availability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

### Achievability Criteria

#### 5.26. **Viability**

- (5) Development is likely viable
- (3) Development is marginal
- (0) Development is likely unviable

How this is assessed:

Using the SHELAA Viability Study, the site is algorithmically attributed a typology. Where each typology has then been appraised as either likely viable, marginal, or likely unviable, the appropriate category is attributed to the site.

5.27. **Timescale for Deliverability**

- (5) Up to 5 years
- (4) Over 5 years

How this is assessed:

This is determined using details provided within the SHELAA submission form. Where these details are not provided, the assessing officer makes a judgement based upon whether any mitigation is required, and the yield of dwellings anticipated.

## Achievability Scoring

5.28. The maximum unweighted 'Achievability' score for sites assessed under the Employment Criteria is 10 (i.e. 2 criteria applied, each with a maximum score of 5). **Unless a capped constraint determines otherwise**, an Achievability RAG rating will then be attributed as follows:

- Sites scoring 100% or over are Green
- Sites scoring 60%-99% are Yellow
- Sites scoring less than 60% are Amber

5.29. In exceptional circumstances, achievability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## 6. Retail Criteria

- 6.1. Any sites that have been promoted for a retail use will be assessed against the Suitability, Availability and Achievability criteria detailed below.

### Suitability Criteria

- 6.2. Note that any underlined criteria represent where Policy Constraints are in place. If a site achieves a score of (0) against such criteria, the site will be capped at an Amber or Red RAG rating dependent on whether the site is contrary to local or national policy.

6.3. **Public Transport**

(Sustainability Appraisal Objective 6; Strategic Policies S9, S10 and S11; Policies DM20 and DM24)

*Public transport services consist of proposed/existing bus stops, rail stations and park and ride facilities*

- (5) Site is within 400m walking distance of one or more services
- (0) Site is in excess of 400m walking distance from all services

How this is assessed:

Using a combination of the Local Plan GIS map and Essex Highways maps (<https://www.essexhighways.org/getting-around>), the GIS analytics feature showing walking distances from a promoted site is used to see if the site falls within the specified ranges to a bus stop, rail station and park and ride facility.

6.4. **PROW and Cycling Connectivity**

(Sustainability Appraisal Objectives 5 and 6; Strategic Policies S2 and S9; Policies DM20 and DM24)

- (5) Site is within 100m walking distance to either a PROW or cycle network
- (0) Site is not connected to either an existing PROW or cycle network

How this is assessed:

Using the Essex Highways map (<https://www.essexhighways.org/getting-around>), the distance between the boundary of the site and the nearest PROW and cycle path is measured.

6.5. **Vehicle Access**

(Strategic Policies S9 and S10; Policy DM20)

- (5) A route exists enabling vehicle access into/adjacent to the site
- (3) There are no visible constraints that would likely prevent the implementation of a route to enable vehicle access into/adjacent to the site

- (0) There are visible constraints that would likely prevent the implementation of a route to enable vehicle access into/adjacent to the site

How this is assessed:

Using a standard GIS (or OS) map, it is observed whether the existing road network connects to the site and if not, whether any physical features (such as a river, or housing, or protected areas) exist that would prevent implementation of an access route.

#### 6.6. **Impact on Designated Heritage Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM13 and DM24)

Designated heritage assets include: Grade 1 listed buildings, Grade 2\* listed buildings, Grade 2 listed buildings, Scheduled Ancient Monuments, Registered Parks or Gardens of Special Historic Interest, Conservation Areas

- (5) Site does not contain any designated heritage assets
- (3) Site is adjacent to one or more designated heritage assets
- (0) Site contains one or more designated heritage assets

How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to areas Scheduled Monuments and Registered Park and Garden of Special Historic Interest is observed. Historic England's map (<https://historicengland.org.uk/listing/the-list/>) is used to observe the proximity of the site to any Listed Buildings.

#### 6.7. **Impact on Non-Designated Heritage Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM14 and DM24)

Non-designated heritage assets include: protected lanes, buildings of local land value and the inventory of landscape of local interest

- (5) Site does not contain any non-designated heritage assets
- (3) Site is adjacent to one or more non-designated heritage assets
- (0) Site contains one or more non-designated heritage assets

How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to protected lanes is observed. Essex Garden Trust's Historic Designated Landscapes of Essex Handbook is used to observe the proximity of the site to a landscape of local interest. The Register of Buildings of Local Value is used to identify such assets, with proximity of these to the site observed using a GIS map.

#### 6.8. **Impact on Archaeological Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM15 and DM24)

- (5) Site is not thought to contain any assets of archaeological interest
- (3) Site is thought to be adjacent to one or more assets of archaeological interest
- (0) Site is thought to contain one or more assets of archaeological interest

##### How this is assessed:

Using the Council's Monuments & Geological Sites GIS map, the proximity of the promoted site to identified archaeological sites is observed. Where there is uncertainty, the Council's Heritage Officer will be consulted.

#### 6.9. **Mineral and Waste Constraints**

(Sustainability Appraisal Objective 12; Policy DM30; Essex Mineral Plan; Essex and Southend-on-Sea Waste Plan)

- (5) Less than 5ha of a site is within a Minerals Safeguarding Area. Site is not within a Minerals or Waste Consultation Area
- (4) Site is wholly or partially within an identified Minerals Consultation Area and/or a Waste Consultation Area but planning permission for the safeguarded uses would have expired prior to the intended delivery of development, the safeguarded use has otherwise ceased, and the site or infrastructure is considered unsuitable for a subsequent minerals and/or waste use
- (2) Site is wholly or partially within an identified Minerals Safeguarding Area and requires further assessment to be undertaken in the form of a Minerals Resource Assessment
- (0) Site is wholly or partially within an identified Minerals Consultation Area and/or Waste Consultation Area where safeguarded infrastructure is permanent in nature or where the allocated activity would not have ceased prior to the intended delivery of development

##### How this is assessed:

Using the Local Plan GIS map alongside GIS information provided by Essex County Council, the proximity of promoted sites to identified Minerals Safeguarding Areas, Minerals Consultation Areas and Waste Consultation Areas is observed. Where a promoted site lies within a Minerals or Waste Consultation Area or has an area of 5ha or greater within a Minerals Safeguarding Area, Essex County Council will be consulted to confirm whether the Minerals/Waste infrastructure is temporary or permanent in nature and whether a Minerals Resource Assessment is required.

#### 6.10. **Impact on Areas of Defined Open Space**

(Sustainability Appraisal Objective 5; Policies DM21, DM24 and DM26)

‘Other’ Green Space includes (but is not limited to) areas of planned strategic landscape enhances, future recreation areas and Sustainable Drainage Systems (SuDS)

- (5) Site does not lie within an area defined as Open Space, an existing/proposed Country Park or ‘Other’ Green Space
- (3) Site partially lies within an area defined as Open Space, an existing/proposed Country Park or ‘Other’ Green Space
- (0) The majority of the site (90% or more) lies within an area defined as Open Space, an existing/proposed Country Park or ‘Other’ Green Space

How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to areas of defined Open Space, Country Park or Other Green Space is observed.

6.11. **Impact on the Green Belt and Green Wedge**

(NPPF section 13, Sustainability Appraisal Objective 14; Strategic Policy S11; Policies DM6 and DM7)

- (5) Site does not lie within the Metropolitan Green Belt or Green Wedge
- (3) Site partially lies within the Metropolitan Green Belt or Green Wedge
- (0) The majority of the site (90% or more) lies within the Metropolitan Green Belt or Green Wedge

How this is assessed:

Using the Local Plan GIS map, the area of the promoted site that falls within the Green Belt or Green Wedge is measured.

6.12. **Land Classification**

(Sustainability Appraisal Objective 7; Strategic Policies S4, S7, S8)

*Agricultural Land Classification are as per Natural England’s ALC map East Region (ALC008)*

- (5) Site is predominantly Previously Developed Land
- (3) Site is predominantly Greenfield and primarily within the agricultural land classification/s: Grade 4, Grade 5, non-agricultural use, or urban use
- (0) Site is predominantly Greenfield and primarily within the land classification/s: Grade 1, Grade 2 or Grade 3

How this is assessed:

Using a GIS map with aerial photos, area measurement/s are taken to determine the proportionate ratio of Greenfield land to PDL that make up the promoted site. Greenfield land and PDL are as defined within the NPPF. Using Natural England’s map ALC008, the Agricultural Land Classification for the promoted site is observed.

6.13. **Impact on Protected Natural Features**

(NPPF section 15, Sustainability Appraisal Objectives 1 and 13; Strategic

Policy S4; Policies DM13, DM16, DM17 and DM24)

*International/national protected natural features include: Ancient Woodland, Special Protection Areas, Special Areas of Conservation, RAMSAR, SSSIs, Marine Conservation Zone, and the Nature Recovery Network.*

*Local protected natural features include: Local Nature Reserves, the Essex Wildlife Trust Nature Reserve, TPOs, Ancient Woodland including ancient and veteran trees and Coastal Protection Belt.*

- (5) Site is in excess of 100m of any locally designated protected natural features and in excess of 500m of any international/national designated protected natural features
- (3) Site does not comprise of any protected natural features but is within 100m of a locally designated protected natural feature or within 500m of an international/national designated protected natural feature
- (0) Site partially or wholly comprises of one or more protected natural features or is within 15 metres from the boundary of Ancient Woodland

How is this assessed:

Using the Local Plan GIS map, the shortest distance between the promoted site boundary and the closest locally designated and nationally/internationally designated protected natural feature is measured.

**6.14. Impact on Flood Risk**

(Sustainability Appraisal Objective 9; Strategic Policies S2 and S9; Policy DM18)

*Flood Risk Zones are as determined by the Environment Agency*

- (5) Site is wholly within Flood Zone 1
- (4) Site is wholly or partially within Flood Zone 2, with the remainder in Flood Zone 1
- (2) Up to 25% of the site area is within Flood Zone 3
- (1) 25%-50% of the site area is within Flood Zone 3
- (0) Over 50% of the site area is within Flood Zone 3

How this is assessed:

Using the Local Plan GIS map – or updated GIS map from the Environment Agency – the areas of the promoted site that fall within Flood Zones 2 and 3 are measured.

**6.15. Impact on Air Quality Management Areas**

(Sustainability Appraisal Objective 10; Policy DM30)

- (5) Site is in excess of 500m from a designated AQMA
- (3) Site is within 500m from a designated AQMA
- (0) Site is within a designated AQMA

How this is assessed:

Using the Local Plan GIS map, the GIS analytics feature shows a 500m buffer around the designated AQMAs. The relationship between the designation and buffer to the promoted site is then observed.

**6.16. Ground Condition Constraints**

(Sustainability Appraisal Objective 7; Policy DM30)

The type and level of contamination identified on site provides an indication as to the level of ground treatment required to ensure the development is safe.

- (5) Ground treatment is not expected to be required
- (3) Ground treatment is expected to be required on part of the site
- (0) Ground treatment is expected to be required on the majority (90% or more) of the site

How this is assessed:

Using the Council's Environmental Restrictions GIS map, the proximity of the promoted site to areas of ground contamination can be observed. Areas of promoted sites that lie within areas of ground contamination are considered to require ground treatment.

**6.17. Impact on Community Facilities**

(Sustainability Appraisal Objectives 4 and 5; Strategic Policy S5; Policies DM21 and DM22)

- (5) Development would not result in the loss of nor put additional strain on an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility
- (3) Development would put additional strain on but not result in the loss of on an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility
- (0) Development would result in the loss of an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility

How this is assessed:

Using the SHELAA submission form and a GIS map, the development proposal is compared against the existing use to determine whether any community uses will be gained or lost. Development that would yield 20 or more dwellings is considered to add strain on existing facilities unless such facilities are incorporated within the proposal

## Suitability Scoring

6.18. The maximum 'Suitability' score for sites assessed under the Retail Criteria is 75 (i.e. 15 criteria applied, each with a maximum score of 5). **Unless a capped constraint determines otherwise**, a Suitability RAG rating will then be attributed as follows:

- Sites scoring 80% or over are Green
- Sites scoring 40%-79% are Yellow
- Sites scoring less than 40% are Amber

6.19. In exceptional circumstances, suitability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## Availability Criteria

### 6.20. **Ownership**

- (5) Held by developer/willing owner/public sector
- (3) Promoter has an option to purchase site or collaborate with existing owner
- (0) Known to be in particularly complex/multiple ownership

#### How this is assessed:

This is determined using details provided within the SHELAA submission form. Where there is uncertainty, the site promoter will be contacted to clarify.

### 6.21. **Land Condition**

- (5) Vacant land and buildings
- (4) Established single use
- (3) Low intensity land use
- (2) Established multiple uses

#### How this is assessed:

Using the SHELAA submission form in conjunction with GIS maps, the current use of the land is determined.

### 6.22. **Legal Constraints**

- (5) Site does not face any known legal issues
- (3) Site may possibly face legal issues
- (0) Site faces known legal issues

How this is assessed:

This is determined using details provided within the SHELAA submission form. GIS maps are also used to identify if ransom strips exist.

## Availability Scoring

6.23. The maximum unweighted 'Availability' score for sites assessed under the Retail Criteria is 15 (i.e. 3 criteria applied, each with a maximum score of 5). An Availability RAG rating will then be attributed as follows:

- Sites scoring 80% or over are Green
- Sites scoring 40%-79% are Yellow
- Sites scoring less than 40% are Amber

6.24. In exceptional circumstances, availability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## Achievability Criteria

6.25. **Viability**

- (5) Development is likely viable
- (3) Development is marginal
- (0) Development is likely unviable

How this is assessed:

Using the SHELAA Viability Study, the site is algorithmically attributed a typology. Where each typology has then been appraised as either likely viable, marginal, or likely unviable, the appropriate category is attributed to the site.

6.26. **Timescale for Deliverability**

- (5) Up to 5 years
- (4) Over 5 years

How this is assessed:

This is determined using details provided within the SHELAA submission form. Where these details are not provided, the assessing officer makes a judgement based upon whether any mitigation is required, and the yield of dwellings anticipated.

## Achievability Scoring

6.27. The maximum unweighted 'Achievability' score for sites assessed under the Retail Criteria is 10 (i.e. 2 criteria applied, each with a maximum score of 5). **Unless a capped constraint determines otherwise**, an Achievability RAG rating will then be attributed as follows:

- Sites scoring 100% or over are Green
- Sites scoring 60%-99% are Yellow
- Sites scoring less than 60% are Amber

6.28. In exceptional circumstances, achievability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## 7. Community Facility Criteria

- 7.1. Any sites that have been promoted for a community facility will be assessed against the Suitability, Availability and Achievability criteria detailed below. For the purpose for this assessment, this includes proposals for education, healthcare, places of worship, sports, leisure, or recreation facilities.

### Suitability Criteria

- 7.2. Note that any underlined criteria represent where Policy Constraints are in place. If a site achieves a score of (0) against such criteria, the site will be capped at an Amber or Red RAG rating dependent on whether the site is contrary to local or national policy.

- 7.3. **Proximity to Employment Areas**  
(Strategic Policy S8; Policies DM4 and DM29)

- (5) Site is outside of any existing/proposed employment allocation
- (3) Site is adjacent to an existing/proposed employment allocation
- (0) Site is wholly/partially located within an existing/proposed employment allocation

**How this is assessed:**

Using the Local Plan GIS map, the proximity of the promoted site to areas labelled Proposed Employment Area, Existing Employment Area and rural Employment Area is observed.

- 7.4. **Impact on Retail Areas**  
(Strategic Policy S12; Policy DM5)

- (5) Development does not result in the loss of established shops and services within Chelmsford City Centre, South Woodham Ferrers Town Centre or any designated Neighbourhood Centres
- (0) Development would result in the loss of established shops and services within Chelmsford City Centre, South Woodham Ferrers Town Centre or any designated Neighbourhood Centres

**How this is assessed:**

Using the Local Plan GIS map, the site is checked to see if it falls within the City Centre, South Woodham Ferrers Town Centre or a designated Neighbourhood Centre. If so, information submitted by the promoter is used to determine whether loss of shops or services would occur.

- 7.5. **Public Transport**  
(Sustainability Appraisal Objective 6; Strategic Policies S9, S10 and S11; Policies DM20 and DM24)

*Public transport services consist of proposed/existing bus stops, rail stations and park and ride facilities*

- (5) Site is within 400m walking distance of one or more services
- (0) Site is in excess of 400m walking distance from all services

How this is assessed:

Using a combination of the Local Plan GIS map and Essex Highways maps (<https://www.essexhighways.org/getting-around>), the GIS analytics feature showing walking distances from a promoted site is used to see if the site falls within the specified ranges to a bus stop, rail station and park and ride facility.

**7.6. PROW and Cycling Connectivity**

(Sustainability Appraisal Objectives 5 and 6; Strategic Policies S2 and S9; Policies DM20 and DM24)

- (5) Site is within 100m walking distance to either a PROW or cycle network
- (0) Site is not connected to either an existing PROW or cycle network

How this is assessed:

Using the Essex Highways map (<https://www.essexhighways.org/getting-around>), the distance between the boundary of the site and the nearest PROW and cycle path is measured.

**7.7. Vehicle Access**

(Strategic Policies S9 and S10; Policy DM20)

- (5) A route exists enabling vehicle access into/adjacent to the site
- (3) There are no visible constraints that would likely prevent the implementation of a route to enable vehicle access into/adjacent to the site
- (0) There are visible constraints that would likely prevent the implementation of a route to enable vehicle access into/adjacent to the site

How this is assessed:

Using a standard GIS (or OS) map, it is observed whether the existing road network connects to the site and if not, whether any physical features (such as a river, or housing, or protected areas) exist that would prevent implementation of an access route.

**7.8. Impact on Designated Heritage Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM13 and DM24)

Designated heritage assets include: Grade 1 listed buildings, Grade 2\* listed buildings, Grade 2 listed buildings, Scheduled Ancient Monuments, Registered Parks or Gardens of Special Historic Interest, Conservation Areas

- (5) Site does not contain any designated heritage assets

- (3) Site is adjacent to one or more designated heritage assets
- (0) Site contains one or more designated heritage assets

How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to areas Scheduled Monuments and Registered Park and Garden of Special Historic Interest is observed. Historic England's map (<https://historicengland.org.uk/listing/the-list/>) is used to observe the proximity of the site to any Listed Buildings.

**7.9. Impact on Non-Designated Heritage Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM14 and DM24)

Non-designated heritage assets include: protected lanes, buildings of local land value and the inventory of landscape of local interest

- (5) Site does not contain any non-designated heritage assets
- (3) Site is adjacent to one or more non-designated heritage assets
- (0) Site contains one or more non-designated heritage assets

How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to protected lanes is observed. Essex Garden Trust's Historic Designated Landscapes of Essex Handbook is used to observe the proximity of the site to a landscape of local interest. The Register of Buildings of Local Value is used to identify such assets, with proximity of these to the site observed using a GIS map.

**7.10. Impact on Archaeological Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM15 and DM24)

- (5) Site is not thought to contain any assets of archaeological interest
- (3) Site is thought to be adjacent to one or more assets of archaeological interest
- (0) Site is thought to contain one or more assets of archaeological interest

How this is assessed:

Using the Council's Monuments & Geological Sites GIS map, the proximity of the promoted site to identified archaeological sites is observed. Where there is uncertainty, the Council's Heritage Officer will be consulted.

**7.11. Mineral and Waste Constraints**

(Sustainability Appraisal Objective 12; Policy DM30; Essex Mineral Plan; Essex and Southend-on-Sea Waste Plan)

- (5) Less than 5ha of a site is within a Minerals Safeguarding Area. Site is not within a Minerals or Waste Consultation Area

- (4) Site is wholly or partially within an identified Minerals Consultation Area and/or a Waste Consultation Area but planning permission for the safeguarded uses would have expired prior to the intended delivery of development, the safeguarded use has otherwise ceased, and the site or infrastructure is considered unsuitable for a subsequent minerals and/or waste use
- (2) Site is wholly or partially within an identified Minerals Safeguarding Area and requires further assessment to be undertaken in the form of a Minerals Resource Assessment
- (0) Site is wholly or partially within an identified Minerals Consultation Area and/or Waste Consultation Area where safeguarded infrastructure is permanent in nature or where the allocated activity would not have ceased prior to the intended delivery of development

**How this is assessed:**

Using the Local Plan GIS map alongside GIS information provided by Essex County Council, the proximity of promoted sites to identified Minerals Safeguarding Areas, Minerals Consultation Areas and Waste Consultation Areas is observed. Where a promoted site lies within a Minerals or Waste Consultation Area or has an area of 5ha or greater within a Minerals Safeguarding Area, Essex County Council will be consulted to confirm whether the Minerals/Waste infrastructure is temporary or permanent in nature and whether a Minerals Resource Assessment is required.

**7.12. Impact on Areas of Defined Open Space**

(Sustainability Appraisal Objective 5; Policies DM21, DM24 and DM26)  
‘Other’ Green Space includes (but is not limited to) areas of planned strategic landscape enhances, future recreation areas and Sustainable Drainage Systems (SuDS)

- (5) Site does not lie within an area defined as Open Space, an existing/proposed Country Park or ‘Other’ Green Space
- (3) Site partially lies within an area defined as Open Space, an existing/proposed Country Park or ‘Other’ Green Space
- (0) The majority of the site (90% or more) lies within an area defined as Open Space, an existing/proposed Country Park or ‘Other’ Green Space

**How this is assessed:**

Using the Local Plan GIS map, the proximity of the promoted site to areas of defined Open Space, Country Park or Other Green Space is observed.

**7.13. Impact on the Green Belt and Green Wedge**

(NPPF section 13, Sustainability Appraisal Objective 14; Strategic Policy S11; Policies DM6 and DM7)

- (5) Site does not lie within the Metropolitan Green Belt or Green Wedge

- (3) Site partially lies within the Metropolitan Green Belt or Green Wedge
- (0) The majority of the site (90% or more) lies within the Metropolitan Green Belt or Green Wedge

How this is assessed:

Using the Local Plan GIS map, the area of the promoted site that falls within the Green Belt or Green Wedge is measured.

**7.14. Land Classification**

(Sustainability Appraisal Objective 7; Strategic Policies S4, S7, S8)

*Agricultural Land Classification are as per Natural England's ALC map East Region (ALC008)*

- (5) Site is predominantly Previously Developed Land
- (3) Site is predominantly Greenfield and primarily within the agricultural land classification/s: Grade 4, Grade 5, non-agricultural use, or urban use
- (0) Site is predominantly Greenfield and primarily within the land classification/s: Grade 1, Grade 2 or Grade 3

How this is assessed:

Using a GIS map with aerial photos, area measurement/s are taken to determine the proportionate ratio of Greenfield land to PDL that make up the promoted site. Greenfield land and PDL are as defined within the NPPF. Using Natural England's map ALC008, the Agricultural Land Classification for the promoted site is observed.

**7.15. Impact on Protected Natural Features**

(NPPF section 15, Sustainability Appraisal Objectives 1 and 13; Strategic Policy S4; Policies DM13, DM16, DM17 and DM24)

*International/national protected natural features include: Ancient Woodland, Special Protection Areas, Special Areas of Conservation, RAMSAR, SSSIs, Marine Conservation Zone, and the Nature Recovery Network.*

*Local protected natural features include: Local Nature Reserves, the Essex Wildlife Trust Nature Reserve, TPOs, Ancient Woodland including ancient and veteran trees and Coastal Protection Belt.*

- (5) Site is in excess of 100m of any locally designated protected natural features and in excess of 500m of any international/national designated protected natural features
- (3) Site does not comprise of any protected natural features but is within 100m of a locally designated protected natural feature or within 500m of an international/national designated protected natural feature
- (0) Site partially or wholly comprises of one or more protected natural features or is within 15 metres from the boundary of Ancient Woodland.

How is this assessed:

Using the Local Plan GIS map, the shortest distance between the promoted site boundary and the closest locally designated and nationally/internationally designated protected natural feature is measured.

**7.16. Impact on Flood Risk**

(Sustainability Appraisal Objective 9; Strategic Policies S2 and S9; Policy DM18)

*Flood Risk Zones are as determined by the Environment Agency*

- (5) Site is wholly within Flood Zone 1
- (4) Site is wholly or partially within Flood Zone 2, with the remainder in Flood Zone 1
- (2) Up to 25% of the site area is within Flood Zone 3
- (1) 25%-50% of the site area is within Flood Zone 3
- (0) Over 50% of the site area is within Flood Zone 3

How this is assessed:

Using the Local Plan GIS map – or updated GIS map from the Environment Agency – the areas of the promoted site that fall within Flood Zones 2 and 3 are measured.

**7.17. Impact on Air Quality Management Areas**

(Sustainability Appraisal Objective 10; Policy DM30)

- (5) Site is in excess of 500m from a designated AQMA
- (3) Site is within 500m from a designated AQMA
- (0) Site is within a designated AQMA

How this is assessed:

Using the Local Plan GIS map, the GIS analytics feature shows a 500m buffer around the designated AQMAs. The relationship between the designation and buffer to the promoted site is then observed.

**7.18. Ground Condition Constraints**

(Sustainability Appraisal Objective 7; Policy DM30)

The type and level of contamination identified on site provides an indication as to the level of ground treatment required to ensure the development is safe.

- (5) Ground treatment is not expected to be required
- (3) Ground treatment is expected to be required on part of the site
- (0) Ground treatment is expected to be required on the majority (90% or more) of the site

How this is assessed:

Using the Council's Environmental Restrictions GIS map, the proximity of the promoted site to areas of ground contamination can be observed. Areas of promoted sites that lie within areas of ground contamination are considered to require ground treatment.

7.19. **Impact on Community Facilities**

(Sustainability Appraisal Objectives 4 and 5; Strategic Policy S5; Policies DM21 and DM22)

- (5) Development would not result in the loss of nor put additional strain on an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility
- (3) Development would put additional strain on but not result in the loss of on an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility
- (0) Development would result in the loss of an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility

How this is assessed:

Using the SHELAA submission form and a GIS map, the development proposal is compared against the existing use to determine whether any community uses will be gained or lost. Development that would yield 20 or more dwellings is considered to add strain on existing facilities unless such facilities are incorporated within the proposal

## Suitability Scoring

- 7.20. The maximum 'Suitability' score for sites assessed under the Community Facility Criteria is 85 (i.e. 17 criteria applied, each with a maximum score of 5). **Unless a capped constraint determines otherwise**, a Suitability RAG rating will then be attributed as follows:

- Sites scoring 80% or over are Green
- Sites scoring 40%-79% are Yellow
- Sites scoring less than 40% are Amber

- 7.21. In exceptional circumstances, suitability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## Availability Criteria

### 7.22. Ownership

- (5) Held by developer/willing owner/public sector
- (3) Promoter has an option to purchase site or collaborate with existing owner
- (0) Known to be in particularly complex/multiple ownership

How this is assessed:

This is determined using details provided within the SHELAA submission form. Where there is uncertainty, the site promoter will be contacted to clarify.

### 7.23. Land Condition

- (5) Vacant land and buildings
- (4) Established single use
- (3) Low intensity land use
- (2) Established multiple uses

How this is assessed:

Using the SHELAA submission form in conjunction with GIS maps, the current use of the land is determined.

### 7.24. Legal Constraints

- (5) Site does not face any known legal issues
- (3) Site may possibly face legal issues
- (0) Site faces known legal issues

How this is assessed:

This is determined using details provided within the SHELAA submission form. GIS maps are also used to identify if ransom strips exist.

## Availability Scoring

7.25. The maximum unweighted 'Availability' score for sites assessed under the Community Facility Criteria is 15 (i.e. 3 criteria applied, each with a maximum score of 5). An Availability RAG rating will then be attributed as follows:

- Sites scoring 80% or over are Green
- Sites scoring 40%-79% are Yellow
- Sites scoring less than 40% are Amber

- 7.26. In exceptional circumstances, availability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## Achievability Criteria

### 7.27. **Viability**

- (5) Development is likely viable
- (3) Development is marginal
- (0) Development is likely unviable

#### How this is assessed:

Viability for this use is determined based upon supporting documentation provided by promoters. Where this is not provided or there is an undetermined outcome, viability is deemed marginal and further viability testing is recommended if site comes forward.

### 7.28. **Timescale for Deliverability**

- (5) Up to 5 years
- (4) Over 5 years

#### How this is assessed:

This is determined using details provided within the SHELAA submission form. Where these details are not provided, the assessing officer makes a judgement based upon whether any mitigation is required, and the yield of dwellings anticipated.

## Achievability Scoring

- 7.29. The maximum unweighted 'Achievability' score for sites assessed under the Community Facility Criteria is 10 (i.e. 2 criteria applied, each with a maximum score of 5). **Unless a capped constraint determines otherwise**, an Achievability RAG rating will then be attributed as follows:

- Sites scoring 100% or over are Green
- Sites scoring 60%-99% are Yellow
- Sites scoring less than 60% are Amber

- 7.30. In exceptional circumstances, achievability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## 8. Mixed Uses Criteria

- 8.1. Any sites that have been promoted for a mix of residential and at least one of: employment, retail or community facility use, will be assessed against the Suitability, Availability and Achievability criteria detailed below.

### Suitability Criteria

- 8.2. Note that any underlined criteria represent where Policy Constraints are in place. If a site achieves a score of (0) against such criteria, the site will be capped at an Amber or Red RAG rating dependent on whether the site is contrary to local or national policy.

8.3. **Proximity to Employment Areas**

(Strategic Policy S8; Policies DM4 and DM29)

- (5) Site is outside of any existing/proposed employment allocation
- (3) Site is adjacent to an existing/proposed employment allocation
- (0) Site is wholly/partially located within an existing/proposed employment allocation

**How this is assessed:**

Using the Local Plan GIS map, the proximity of the promoted site to areas labelled Proposed Employment Area, Existing Employment Area and rural Employment Area is observed.

8.4. **Impact on Retail Areas**

(Strategic Policy S12; Policy DM5)

- (5) Development does not result in the loss of established shops and services within Chelmsford City Centre, South Woodham Ferrers Town Centre or any designated Neighbourhood Centres
- (0) Development would result in the loss of established shops and services within Chelmsford City Centre, South Woodham Ferrers Town Centre or any designated Neighbourhood Centres

**How this is assessed:**

Using the Local Plan GIS map, the site is checked to see if it falls within the City Centre, South Woodham Ferrers Town Centre or a designated Neighbourhood Centre. If so, information submitted by the promoter is used to determine whether loss of shops or services would occur.

8.5. **Proximity to the Workplace**

(Sustainability Appraisal Objective 3; Strategic Policies S7 and S8)

- (5) Site is within 2km walking distance of an employment allocation
- (0) Site is in excess of 2km walking distance of an employment allocation

How this is assessed:

Using the Local Plan GIS map, the GIS analytics feature showing walking distances from a promoted site is used to see if the site falls within the specified ranges to a Proposed Employment Area, Existing Employment Area or Rural Employment Area.

8.6. **Public Transport**

(Sustainability Appraisal Objective 6; Strategic Policies S9, S10 and S11; Policies DM20 and DM24)

*Public transport services consist of proposed/existing bus stops, rail stations and park and ride facilities*

- (5) Site is within 400m walking distance of one or more services
- (0) Site is in excess of 400m walking distance from all services

How this is assessed:

Using a combination of the Local Plan GIS map and Essex Highways maps (<https://www.essexhighways.org/getting-around>), the GIS analytics feature showing walking distances from a promoted site is used to see if the site falls within the specified ranges to a bus stop, rail station and park and ride facility.

8.7. **PROW and Cycling Connectivity**

(Sustainability Appraisal Objectives 5 and 6; Strategic Policies S2 and S9; Policies DM20 and DM24)

- (5) Site is within 100m walking distance to either a PROW or cycle network
- (0) Site is not connected to either an existing PROW or cycle network

How this is assessed:

Using the Essex Highways map (<https://www.essexhighways.org/getting-around>), the distance between the boundary of the site and the nearest PROW and cycle path is measured.

8.8. **Vehicle Access**

(Strategic Policies S9 and S10; Policy DM20)

- (5) A route exists enabling vehicle access into/adjacent to the site
- (3) There are no visible constraints that would likely prevent the implementation of a route to enable vehicle access into/adjacent to the site
- (0) There are visible constraints that would likely prevent the implementation of a route to enable vehicle access into/adjacent to the site

How this is assessed:

Using a standard GIS (or OS) map, it is observed whether the existing road network connects to the site and if not, whether any physical features (such as a river, or housing, or protected areas) exist that would prevent implementation of an access route.

### 8.9. **Strategic Road Access**

(Sustainability Appraisal Objective 6; Strategic Policies S7 and S9)

- (5) Site has direct access to or is adjacent to the strategic road network
- (4) Site has direct access to or is adjacent to a primary road network
- (2) Site has direct access to or is adjacent to a safeguarded trunk road or B-road
- (0) Site has no direct access to nor is adjacent to the strategic road network, primary road network, a safeguarded trunk road or a B-road

#### How this is assessed:

Using a standard GIS (or OS) map, it is observed whether the existing road network connects or can be connected to the site and if so, what type of road network this is.

### 8.10. **Impact on Designated Heritage Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM13 and DM24)

Designated heritage assets include: Grade 1 listed buildings, Grade 2\* listed buildings, Grade 2 listed buildings, Scheduled Ancient Monuments, Registered Parks or Gardens of Special Historic Interest, Conservation Areas

- (5) Site does not contain any designated heritage assets
- (3) Site is adjacent to one or more designated heritage assets
- (0) Site contains one or more designated heritage assets

#### How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to areas Scheduled Monuments and Registered Park and Garden of Special Historic Interest is observed. Historic England's map (<https://historicengland.org.uk/listing/the-list/>) is used to observe the proximity of the site to any Listed Buildings.

### 8.11. **Impact on Non-Designated Heritage Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM14 and DM24)

Non-designated heritage assets include: protected lanes, buildings of local land value and the inventory of landscape of local interest

- (5) Site does not contain any non-designated heritage assets
- (3) Site is adjacent to one or more non-designated heritage assets
- (0) Site contains one or more non-designated heritage assets

How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to protected lanes is observed. Essex Garden Trust's Historic Designated Landscapes of Essex Handbook is used to observe the proximity of the site to a landscape of local interest. The Register of Buildings of Local Value is used to identify such assets, with proximity of these to the site observed using a GIS map.

**8.12. Impact on Archaeological Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM15 and DM24)

- (5) Site is not thought to contain any assets of archaeological interest
- (3) Site is thought to be adjacent to one or more assets of archaeological interest
- (0) Site is thought to contain one or more assets of archaeological interest

How this is assessed:

Using the Council's Monuments & Geological Sites GIS map, the proximity of the promoted site to identified archaeological sites is observed. Where there is uncertainty, the Council's Heritage Officer will be consulted.

**8.13. Mineral and Waste Constraints**

(Sustainability Appraisal Objective 12; Policy DM30; Essex Mineral Plan; Essex and Southend-on-Sea Waste Plan)

- (5) Less than 5ha of a site is within a Minerals Safeguarding Area. Site is not within a Minerals or Waste Consultation Area
- (4) Site is wholly or partially within an identified Minerals Consultation Area and/or a Waste Consultation Area but planning permission for the safeguarded uses would have expired prior to the intended delivery of development, the safeguarded use has otherwise ceased, and the site or infrastructure is considered unsuitable for a subsequent minerals and/or waste use
- (2) Site is wholly or partially within an identified Minerals Safeguarding Area and requires further assessment to be undertaken in the form of a Minerals Resource Assessment
- (0) Site is wholly or partially within an identified Minerals Consultation Area and/or Waste Consultation Area where safeguarded infrastructure is permanent in nature or where the allocated activity would not have ceased prior to the intended delivery of development

How this is assessed:

Using the Local Plan GIS map alongside GIS information provided by Essex County Council, the proximity of promoted sites to identified Minerals Safeguarding Areas, Minerals Consultation Areas and Waste Consultation Areas is observed. Where a promoted site lies within a Minerals or Waste Consultation Area or has an area of 5ha or greater within a Minerals Safeguarding Area, Essex County Council will be consulted to confirm whether the Minerals/Waste infrastructure is temporary or permanent in nature and whether a Minerals Resource Assessment is required.

8.14. **Impact on Areas of Defined Open Space**

(Sustainability Appraisal Objective 5; Policies DM21, DM24 and DM26)  
'Other' Green Space includes (but is not limited to) areas of planned strategic landscape enhances, future recreation areas and Sustainable Drainage Systems (SuDS)

- (5) Site does not lie within an area defined as Open Space, an existing/proposed Country Park or 'Other' Green Space
- (3) Site partially lies within an area defined as Open Space, an existing/proposed Country Park or 'Other' Green Space
- (0) The majority of the site (90% or more) lies within an area defined as Open Space, an existing/proposed Country Park or 'Other' Green Space

How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to areas of defined Open Space, Country Park or Other Green Space is observed.

8.15. **Impact on the Green Belt and Green Wedge**

(NPPF section 13, Sustainability Appraisal Objective 14; Strategic Policy S11; Policies DM6 and DM7)

- (5) Site does not lie within the Metropolitan Green Belt or Green Wedge
- (3) Site partially lies within the Metropolitan Green Belt or Green Wedge
- (0) The majority of the site (90% or more) lies within the Metropolitan Green Belt or Green Wedge

How this is assessed:

Using the Local Plan GIS map, the area of the promoted site that falls within the Green Belt or Green Wedge is measured.

8.16. **Land Classification**

(Sustainability Appraisal Objective 7; Strategic Policies S4, S7, S8)

*Agricultural Land Classification are as per Natural England's ALC map East Region (ALC008)*

- (5) Site is predominantly Previously Developed Land

- (3) Site is predominantly Greenfield and primarily within the agricultural land classification/s: Grade 4, Grade 5, non-agricultural use, or urban use
- (0) Site is predominantly Greenfield and primarily within the land classification/s: Grade 1, Grade 2 or Grade 3

How this is assessed:

Using a GIS map with aerial photos, area measurement/s are taken to determine the proportionate ratio of Greenfield land to PDL that make up the promoted site. Greenfield land and PDL are as defined within the NPPF. Using Natural England's map ALC008, the Agricultural Land Classification for the promoted site is observed.

**8.17. Impact on Protected Natural Features**

(NPPF section 15, Sustainability Appraisal Objectives 1 and 13; Strategic Policy S4; Policies DM13, DM16, DM17 and DM24)

*International/national protected natural features include: Ancient Woodland, Special Protection Areas, Special Areas of Conservation, RAMSAR, SSSIs, Marine Conservation Zone, and the Nature Recovery Network.*

*Local protected natural features include: Local Nature Reserves, the Essex Wildlife Trust Nature Reserve, TPOs, Ancient Woodland including ancient and veteran trees and Coastal Protection Belt.*

- (5) Site is in excess of 100m of any locally designated protected natural features and in excess of 500m of any international/national designated protected natural features
- (3) Site does not comprise of any protected natural features but is within 100m of a locally designated protected natural feature or within 500m of an international/national designated protected natural feature
- (0) Site partially or wholly comprises of one or more protected natural features or is within 15 metres form the boundary of Ancient Woodland.

How is this assessed:

Using the Local Plan GIS map, the shortest distance between the promoted site boundary and the closest locally designated and nationally/internationally designated protected natural feature is measured.

**8.18. Impact on Flood Risk**

(Sustainability Appraisal Objective 9; Strategic Policies S2 and S9; Policy DM18)

*Flood Risk Zones are as determined by the Environment Agency*

- (5) Site is wholly within Flood Zone 1
- (4) Site is wholly or partially within Flood Zone 2, with the remainder in Flood Zone 1
- (2) Up to 25% of the site area is within Flood Zone 3
- (1) 25%-50% of the site area is within Flood Zone 3

- (0) Over 50% of the site area is within Flood Zone 3

How this is assessed:

Using the Local Plan GIS map – or updated GIS map from the Environment Agency – the areas of the promoted site that fall within Flood Zones 2 and 3 are measured.

**8.19. Impact on Air Quality Management Areas**

(Sustainability Appraisal Objective 10; Policy DM30)

- (5) Site is in excess of 500m from a designated AQMA
- (3) Site is within 500m from a designated AQMA
- (0) Site is within a designated AQMA

How this is assessed:

Using the Local Plan GIS map, the GIS analytics feature shows a 500m buffer around the designated AQMAs. The relationship between the designation and buffer to the promoted site is then observed.

**8.20. Ground Condition Constraints**

(Sustainability Appraisal Objective 7; Policy DM30)

The type and level of contamination identified on site provides an indication as to the level of ground treatment required to ensure the development is safe.

- (5) Ground treatment is not expected to be required
- (3) Ground treatment is expected to be required on part of the site
- (0) Ground treatment is expected to be required on the majority (90% or more) of the site

How this is assessed:

Using the Council's Environmental Restrictions GIS map, the proximity of the promoted site to areas of ground contamination can be observed. Areas of promoted sites that lie within areas of ground contamination are considered to require ground treatment.

**8.21. Neighbouring Constraints**

(Sustainability Appraisal Objective 5; Policy DM29)

For the purpose of this assessment, a site has a neighbouring constraint if existing B2 or B8 use classes are present on or adjacent to the site; if existing sports venues that have large spectator capacity (the racecourse, cricket stadium and Melbourne stadium in particular) are adjacent to the site; or if a major road or dual carriageway runs adjacent to the site.

- (5) Site has no neighbouring constraints
- (3) Site has neighbouring constraints with potential for mitigation
- (0) Site has neighbouring constraints with no potential for mitigation

How this is assessed:

The SHELAA submission form asks for details of current uses on and adjacent to the promoted site. The information provided by the site promoter in addition to using GIS maps with aerial photos enable the proximity of the promoted site to unsuitable neighbours to be observed. Given the nature of mixed use sites, it is assumed in this assessment, for the benefit of doubt, that unless the constraint surrounds the boundary of the site, mitigation is possible.

8.22. **Proximity to Key Services**

(Sustainability Appraisal Objectives 4 and 5; Strategic Policies S5 and S7)

Key services include: GP surgeries, mainstream non-selective state funded primary or secondary schools, and supermarkets/convenience goods stores

- (5) Site is within 800m walking distance of all services and/or the City Centre/South Woodham Ferrers Town Centre
- (3) Site is within 2km walking distance of all services and/or the City Centre/South Woodham Ferrers Town Centre
- (0) Site is in excess of 2km walking distance of one or more services and the City Centre/South Woodham Ferrers Town Centre

How this is assessed:

Using the Local Plan GIS map, the analytics feature showing walking distances from a promoted site is utilised to observe the proximity of the site to GP surgeries, mainstream non-selective state-funded schools, and convenience stores.

8.23. **Impact on Community Facilities**

(Sustainability Appraisal Objectives 4 and 5; Strategic Policy S5; Policies DM21 and DM22)

- (5) Development would not result in the loss of nor put additional strain on an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility
- (3) Development would put additional strain on but not result in the loss of on an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility
- (0) Development would result in the loss of an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility

How this is assessed:

Using the SHELAA submission form and a GIS map, the development proposal is compared against the existing use to determine whether any community uses will be gained or lost. Development that would yield 20 or more dwellings is considered to add strain on existing facilities unless such facilities are incorporated within the proposal.

## Suitability Scoring

8.24. The maximum 'Suitability' score for sites assessed under the Mixed Use Criteria is 105 (i.e. 21 criteria applied, each with a maximum score of 5).

**Unless a capped constraint determines otherwise**, a Suitability RAG rating will then be attributed as follows:

- Sites scoring 80% or over are Green
- Sites scoring 40%-79% are Yellow
- Sites scoring less than 40% are Amber

8.25. In exceptional circumstances, suitability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## Availability Criteria

### 8.26. **Ownership**

- (5) Held by developer/willing owner/public sector
- (3) Promoter has an option to purchase site or collaborate with existing owner
- (0) Known to be in particularly complex/multiple ownership

How this is assessed:

This is determined using details provided within the SHELAA submission form. Where there is uncertainty, the site promoter will be contacted to clarify.

### 8.27. **Land Condition**

- (5) Vacant land and buildings
- (4) Established single use
- (3) Low intensity land use
- (2) Established multiple uses

How this is assessed:

Using the SHELAA submission form in conjunction with GIS maps, the current use of the land is determined.

**8.28. Legal Constraints**

- (5) Site does not face any known legal issues
- (3) Site may possibly face legal issues
- (0) Site faces known legal issues

How this is assessed:

This is determined using details provided within the SHELAA submission form. GIS maps are also used to identify if ransom strips exist.

## Availability Scoring

8.29. The maximum unweighted 'Availability' score for sites assessed under the Mixed Use Criteria is 15 (i.e. 3 criteria applied, each with a maximum score of 5). An Availability RAG rating will then be attributed as follows:

- Sites scoring 80% or over are Green
- Sites scoring 40%-79% are Yellow
- Sites scoring less than 40% are Amber

8.30. In exceptional circumstances, availability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## Achievability Criteria

**8.31. Viability**

- (5) Development is likely viable
- (3) Development is marginal
- (0) Development is likely unviable

How this is assessed:

Using the SHELAA Viability Study, the site is algorithmically attributed a typology. Where each typology has then been appraised as either likely viable, marginal, or likely unviable, the appropriate category is attributed to the site. For uses that are not featured within the Viability Study, viability is determined based upon supporting documentation provided by promoters. Where this is not provided or there is an undetermined outcome, viability is deemed marginal and further viability testing is recommended if site comes forward.

### 8.32. **Timescale for Deliverability**

- (5) Up to 5 years
- (4) Over 5 years

#### How this is assessed:

This is determined using details provided within the SHELAA submission form. Where these details are not provided, the assessing officer makes a judgement based upon whether any mitigation is required, and the yield of dwellings anticipated.

## Achievability Scoring

8.33. The maximum unweighted 'Achievability' score for sites assessed under the Mixed Use Criteria is 10 (i.e. 2 criteria applied, each with a maximum score of 5). **Unless a capped constraint determines otherwise**, an Achievability RAG rating will then be attributed as follows:

- Sites scoring 100% or over are Green
- Sites scoring 60%-99% are Yellow
- Sites scoring less than 60% are Amber

8.34. In exceptional circumstances, achievability factors not listed above may be taken into account to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## 9. Renewable Power Generation Criteria

- 9.1. Any sites that have been promoted for a renewable power generation facility will be assessed against the Suitability, Availability and Achievability criteria detailed below. This includes proposals from solar farms, wind farms, biomass farms or hydroelectric generation.

### Suitability Criteria

- 9.2. Note that any underlined criteria represent where Policy Constraints are in place. If a site achieves a score of (0) against such criteria, the site will be capped at an Amber or Red RAG rating dependent on whether the site is contrary to local or national policy.

9.3. **Public Transport**

(Sustainability Appraisal Objective 6; Strategic Policies S9, S10 and S11; Policies DM20 and DM24)

*Public transport services consist of proposed/existing bus stops, rail stations and park and ride facilities*

- (5) Site is within 400m walking distance of one or more services
- (0) Site is in excess of 400m walking distance from all services

**How this is assessed:**

Using a combination of the Local Plan GIS map and Essex Highways maps (<https://www.essexhighways.org/getting-around>), the GIS analytics feature showing walking distances from a promoted site is used to see if the site falls within the specified ranges to a bus stop, rail station and park and ride facility.

9.4. **PROW and Cycling Connectivity**

(Sustainability Appraisal Objectives 5 and 6; Strategic Policies S2 and S9; Policies DM20 and DM24)

- (5) Site is within 100m walking distance to either a PROW or cycle network
- (0) Site is not connected to either an existing PROW or cycle network

**How this is assessed:**

Using the Essex Highways map (<https://www.essexhighways.org/getting-around>), the distance between the boundary of the site and the nearest PROW and cycle path is measured.

9.5. **Vehicle Access**

(Strategic Policies S9 and S10; Policy DM20)

- (5) A route exists enabling vehicle access into/adjacent to the site

- (3) There are no visible constraints that would likely prevent the implementation of a route to enable vehicle access into/adjacent to the site
- (0) There are visible constraints that would likely prevent the implementation of a route to enable vehicle access into/adjacent to the site

How this is assessed:

Using a standard GIS (or OS) map, it is observed whether the existing road network connects to the site and if not, whether any physical features (such as a river, or housing, or protected areas) exist that would prevent implementation of an access route.

#### 9.6. **Strategic Road Access**

(Sustainability Appraisal Objective 6; Strategic Policies S7 and S9)

- (5) Site has direct access to or is adjacent to the strategic road network
- (4) Site has direct access to or is adjacent to a primary road network
- (2) Site has direct access to or is adjacent to a safeguarded trunk road or B-road
- (0) Site has no direct access to nor is adjacent to the strategic road network, primary road network, a safeguarded trunk road or a B-road

How this is assessed:

Using a standard GIS (or OS) map, it is observed whether the existing road network connects or can be connected to the site and if so, what type of road network this is.

#### 9.7. **Impact on Designated Heritage Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM13 and DM24)

Designated heritage assets include: Grade 1 listed buildings, Grade 2\* listed buildings, Grade 2 listed buildings, Scheduled Ancient Monuments, Registered Parks or Gardens of Special Historic Interest, Conservation Areas

- (5) Site does not contain any designated heritage assets
- (3) Site is adjacent to one or more designated heritage assets
- (0) Site contains one or more designated heritage assets

How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to areas Scheduled Monuments and Registered Park and Garden of Special Historic Interest is observed. Historic England's map (<https://historicengland.org.uk/listing/the-list/>) is used to observe the proximity of the site to any Listed Buildings.

#### 9.8. **Impact on Non-Designated Heritage Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM14

and DM24)

Non-designated heritage assets include: protected lanes, buildings of local land value and the inventory of landscape of local interest

- (5) Site does not contain any non-designated heritage assets
- (3) Site is adjacent to one or more non-designated heritage assets
- (0) Site contains one or more non-designated heritage assets

How this is assessed:

Using the Local Plan GIS map, the proximity of the promoted site to protected lanes is observed. Essex Garden Trust's Historic Designated Landscapes of Essex Handbook is used to observe the proximity of the site to a landscape of local interest. The Register of Buildings of Local Value is used to identify such assets, with proximity of these to the site observed using a GIS map.

**9.9. Impact on Archaeological Assets**

(Sustainability Appraisal Objective 13; Strategic Policy S3; Policies DM15 and DM24)

- (5) Site is not thought to contain any assets of archaeological interest
- (3) Site is thought to be adjacent to one or more assets of archaeological interest
- (0) Site is thought to contain one or more assets of archaeological interest

How this is assessed:

Using the Council's Monuments & Geological Sites GIS map, the proximity of the promoted site to identified archaeological sites is observed. Where there is uncertainty, the Council's Heritage Officer will be consulted.

**9.10. Mineral and Waste Constraints**

(Sustainability Appraisal Objective 12; Policy DM30; Essex Mineral Plan; Essex and Southend-on-Sea Waste Plan)

- (5) Less than 5ha of a site is within a Minerals Safeguarding Area. Site is not within a Minerals or Waste Consultation Area
- (4) Site is wholly or partially within an identified Minerals Consultation Area and/or a Waste Consultation Area but planning permission for the safeguarded uses would have expired prior to the intended delivery of development, the safeguarded use has otherwise ceased, and the site or infrastructure is considered unsuitable for a subsequent minerals and/or waste use
- (2) Site is wholly or partially within an identified Minerals Safeguarding Area and requires further assessment to be undertaken in the form of a Minerals Resource Assessment
- (0) Site is wholly or partially within an identified Minerals Consultation Area and/or Waste Consultation Area where safeguarded infrastructure is

permanent in nature or where the allocated activity would not have ceased prior to the intended delivery of development

**How this is assessed:**

Using the Local Plan GIS map alongside GIS information provided by Essex County Council, the proximity of promoted sites to identified Minerals Safeguarding Areas, Minerals Consultation Areas and Waste Consultation Areas is observed. Where a promoted site lies within a Minerals or Waste Consultation Area or has an area of 5ha or greater within a Minerals Safeguarding Area, Essex County Council will be consulted to confirm whether the Minerals/Waste infrastructure is temporary or permanent in nature and whether a Minerals Resource Assessment is required.

**9.11. Impact on Areas of Defined Open Space**

(Sustainability Appraisal Objective 5; Policies DM21, DM24 and DM26)  
'Other' Green Space includes (but is not limited to) areas of planned strategic landscape enhances, future recreation areas and Sustainable Drainage Systems (SuDS)

- (5) Site does not lie within an area defined as Open Space, an existing/proposed Country Park or 'Other' Green Space
- (3) Site partially lies within an area defined as Open Space, an existing/proposed Country Park or 'Other' Green Space
- (0) The majority of the site (90% or more) lies within an area defined as Open Space, an existing/proposed Country Park or 'Other' Green Space

**How this is assessed:**

Using the Local Plan GIS map, the proximity of the promoted site to areas of defined Open Space, Country Park or Other Green Space is observed.

**9.12. Impact on the Green Belt and Green Wedge**

(NPPF section 13, Sustainability Appraisal Objective 14; Strategic Policy S11; Policies DM6 and DM7)

- (5) Site does not lie within the Metropolitan Green Belt or Green Wedge
- (3) Site partially lies within the Metropolitan Green Belt or Green Wedge
- (0) The majority of the site (90% or more) lies within the Metropolitan Green Belt or Green Wedge

**How this is assessed:**

Using the Local Plan GIS map, the area of the promoted site that falls within the Green Belt or Green Wedge is measured.

**9.13. Land Classification**

(Sustainability Appraisal Objective 7; Strategic Policies S4, S7, S8)

*Agricultural Land Classification are as per Natural England's ALC map East Region (ALC008)*

- (5) Site is predominantly Previously Developed Land
- (3) Site is predominantly Greenfield and primarily within the agricultural land classification/s: Grade 4, Grade 5, non-agricultural use, or urban use
- (0) Site is predominantly Greenfield and primarily within the land classification/s: Grade 1, Grade 2 or Grade 3

How this is assessed:

Using a GIS map with aerial photos, area measurement/s are taken to determine the proportionate ratio of Greenfield land to PDL that make up the promoted site. Greenfield land and PDL are as defined within the NPPF. Using Natural England's map ALC008, the Agricultural Land Classification for the promoted site is observed.

9.14. **Impact on Protected Natural Features**

(NPPF section 15, Sustainability Appraisal Objectives 1 and 13; Strategic Policy S4; Policies DM13, DM16, DM17 and DM24)

*International/national protected natural features include: Ancient Woodland, Special Protection Areas, Special Areas of Conservation, RAMSAR, SSSIs, Marine Conservation Zone, and the Nature Recovery Network.*

*Local protected natural features include: Local Nature Reserves, the Essex Wildlife Trust Nature Reserve, TPOs, Ancient Woodland including ancient and veteran trees and Coastal Protection Belt.*

- (5) Site is in excess of 100m of any locally designated protected natural features and in excess of 500m of any international/national designated protected natural features
- (3) Site does not comprise of any protected natural features but is within 100m of a locally designated protected natural feature or within 500m of an international/national designated protected natural feature
- (0) Site partially or wholly comprises of one or more protected natural features or is within 15 metres from the boundary of Ancient Woodland.

How is this assessed:

Using the Local Plan GIS map, the shortest distance between the promoted site boundary and the closest locally designated and nationally/internationally designated protected natural feature is measured.

9.15. **Impact on Flood Risk**

(Sustainability Appraisal Objective 9; Strategic Policies S2 and S9; Policy DM18)

*Flood Risk Zones are as determined by the Environment Agency*

- (5) Site is wholly within Flood Zone 1
- (4) Site is wholly or partially within Flood Zone 2, with the remainder in Flood Zone 1
- (2) Up to 25% of the site area is within Flood Zone 3

- (1) 25%-50% of the site area is within Flood Zone 3
- (0) Over 50% of the site area is within Flood Zone 3

How this is assessed:

Using the Local Plan GIS map – or updated GIS map from the Environment Agency – the areas of the promoted site that fall within Flood Zones 2 and 3 are measured.

**9.16. Impact on Air Quality Management Areas**

(Sustainability Appraisal Objective 10; Policy DM30)

- (5) Site is in excess of 500m from a designated AQMA
- (3) Site is within 500m from a designated AQMA
- (0) Site is within a designated AQMA

How this is assessed:

Using the Local Plan GIS map, the GIS analytics feature shows a 500m buffer around the designated AQMAs. The relationship between the designation and buffer to the promoted site is then observed.

**9.17. Neighbouring Constraints**

(Sustainability Appraisal Objective 5; Policies DM29 and DM30)

For the purpose of this assessment, renewable power generation is considered to have possible adverse effects if a neighbouring use consists of residential development or community facilities

- (5) Site is unlikely to have an adverse effect on neighbouring uses
- (3) Site is likely to have an adverse effect on neighbouring uses with potential for mitigation
- (0) Site is likely to have an adverse effect on neighbouring uses with no potential for mitigation

How this is assessed:

The SHELAA submission form asks for details of current uses on and adjacent to the promoted site. The information provided by the site promoter in addition to using GIS maps with aerial photos enable the proximity of the promoted site to unsuitable neighbours to be observed.

**9.18. Impact on Community Facilities**

(Sustainability Appraisal Objectives 4 and 5; Strategic Policy S5; Policies DM21 and DM22)

- (5) Development would not result in the loss of nor put additional strain on an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility
- (3) Development would put additional strain on but not result in the loss of on an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility

- (0) Development would result in the loss of an existing/proposed school/healthcare facility/place of worship/sports, leisure, or recreation facility

How this is assessed:

Using the SHELAA submission form and a GIS map, the development proposal is compared against the existing use to determine whether any community uses will be gained or lost. Development that would yield 20 or more dwellings is considered to add strain on existing facilities unless such facilities are incorporated within the proposal

## Suitability Scoring

9.19. The maximum 'Suitability' score for sites assessed under the Renewable Power Generation Criteria is 80 (i.e. 16 criteria applied, each with a maximum score of 5). **Unless a capped constraint determines otherwise**, a Suitability RAG rating will then be attributed as follows:

- Sites scoring 80% or over are Green
- Sites scoring 40%-79% are Yellow
- Sites scoring less than 40% are Amber

9.20. In exceptional circumstances, suitability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## Availability Criteria

### 9.21. Ownership

- (5) Held by developer/willing owner/public sector
- (3) Promoter has an option to purchase site or collaborate with existing owner
- (0) Known to be in particularly complex/multiple ownership

How this is assessed:

This is determined using details provided within the SHELAA submission form. Where there is uncertainty, the site promoter will be contacted to clarify.

### 9.22. Land Condition

- (5) Vacant land and buildings
- (4) Established single use
- (3) Low intensity land use

- (2) Established multiple uses

How this is assessed:

Using the SHELAA submission form in conjunction with GIS maps, the current use of the land is determined.

9.23. **Legal Constraints**

- (5) Site does not face any known legal issues
- (3) Site may possibly face legal issues
- (0) Site faces known legal issues

How this is assessed:

This is determined using details provided within the SHELAA submission form. GIS maps are also used to identify if ransom strips exist.

## Availability Scoring

9.24. The maximum unweighted 'Availability' score for sites assessed under the Renewable Power Generation Criteria is 15 (i.e. 3 criteria applied, each with a maximum score of 5). An Availability RAG rating will then be attributed as follows:

- Sites scoring 80% or over are Green
- Sites scoring 40%-79% are Yellow
- Sites scoring less than 40% are Amber

9.25. In exceptional circumstances, availability factors not listed above may be considered to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## Achievability Criteria

9.26. **Viability**

- (5) Development is likely viable
- (3) Development is marginal
- (0) Development is likely unviable

How this is assessed:

Viability for this use is determined based upon supporting documentation provided by promoters. Where this is not provided or there is an undetermined outcome, viability is deemed marginal and further viability testing is recommended if site comes forward.

#### 9.27. **Timescale for Deliverability**

- (5) Up to 5 years
- (4) Over 5 years

##### How this is assessed:

This is determined using details provided within the SHELAA submission form. Where these details are not provided, the assessing officer makes a judgement based upon whether any mitigation is required, and the yield of dwellings anticipated.

### Achievability Scoring

9.28. The maximum unweighted 'Achievability' score for sites assessed under the Renewable Power Generation Criteria is 10 (i.e. 2 criteria applied, each with a maximum score of 5). **Unless a capped constraint determines otherwise**, an Achievability RAG rating will then be attributed as follows:

- Sites scoring 100% or over are Green
- Sites scoring 60%-99% are Yellow
- Sites scoring less than 60% are Amber

9.29. In exceptional circumstances, achievability factors not listed above may be taken into account to give a different overall score. These exceptions will always be explained fully within the relevant site's output report.

## 10. Overall Scores and Site Categorisation

- 10.1. Sites will each be RAG rated based upon their performance against the SHELAA criteria. A summary of the categorisation features in Table 1 below:

*Table 1: SHELAA RAG Rating Summary*

|        |                                                                                                                                                                                      |
|--------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Red    | Site is contrary to national policy and/or faces significant constraints or adverse impacts that cannot be mitigated.                                                                |
| Amber  | Site scores less well against criteria or has some characteristics contrary to local policy and faces moderate constraints that would require mitigation.                            |
| Yellow | Site scores well against criteria but has some characteristics contrary to local policy. Site faces minor constraints that would require mitigation. Site is considered developable. |
| Green  | Site scores highly against criteria and demonstrates compliance with national and local policy. Site faces minimal constraints and is considered deliverable.                        |

- 10.2. The process of attributing a RAG rating is a two-step process. Firstly, each site will receive an individual RAG rating for their Suitability, Availability and Achievability performance, as explained within the criteria above. The purpose of this step is to flag up where the strengths and weaknesses fall within each site.
- 10.3. The second step is to determine an overall RAG rating for the site. This is determined by taking the Suitability, Availability and Achievability RAG ratings, and identifying the least favourable colour of the three as detailed in Table 2 below:

Table 2: SHELAA Site Categorisation

| Site Rating | Permutation | Suitability Rating        | Availability Rating       | Achievability Rating      |
|-------------|-------------|---------------------------|---------------------------|---------------------------|
| Red         | 1           | Red                       | Red/ Amber/ Yellow/ Green | Red/ Amber/ Yellow/ Green |
|             | 2           | Red/ Amber/ Yellow/ Green | Red                       | Red/ Amber/ Yellow/ Green |
|             | 3           | Red/ Amber/ Yellow/ Green | Red/ Amber/ Yellow/ Green | Red                       |
| Amber       | 4           | Amber                     | Amber/ Yellow/ Green      | Amber/ Yellow/ Green      |
|             | 5           | Amber/ Yellow/ Green      | Amber                     | Amber/ Yellow/ Green      |
|             | 6           | Amber/ Yellow/ Green      | Amber/ Yellow/ Green      | Amber                     |
| Yellow      | 7           | Yellow                    | Yellow/ Green             | Yellow/ Green             |
|             | 8           | Yellow/ Green             | Yellow                    | Yellow/ Green             |
|             | 9           | Yellow/ Green             | Yellow/ Green             | Yellow                    |
| Green       | 10          | Green                     | Green                     | Green                     |

Note: Colours highlighted in bold are definitive in determining the category band of a site.

# **Strategic Housing and Employment Land Availability Assessment (SHELAA) Autumn 2025**

Part 5 of 9  
Viability Study

November 2025

## Contents

|    |                                  |   |
|----|----------------------------------|---|
| 1. | Introduction .....               | 2 |
| 2. | Background .....                 | 2 |

| 4. | Non-residential Market .....     | 6 |
| 5. | Conclusion .....                 | 8 |

## 1. Introduction

- 1.1. The NPPF requires that policy-making authorities have a clear understanding of the land available in their area through the preparation of a strategic housing land availability assessment. Chelmsford City Council have therefore developed a Strategic Housing and Employment Land Availability Assessment (SHELAA).
- 1.2. The SHELAA is a desktop assessment that gauges the suitability, availability, and achievability of promoted sites through assessment against robustly developed criteria.
- 1.3. The outputs of the SHELAA are considered alongside additional evidence base material to aid selection of sites to come forward for allocation within Chelmsford's Local Plan.
- 1.4. When assessing the achievability aspect of a site, Planning Practice Guidance advises that:

*"A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of a site."*<sup>1</sup>

## 2. Background

- 1.1. HDH Planning and Development Ltd were commissioned by Chelmsford City Council to produce the Local Plan Viability Study Including CIL Viability Review January 2018 and re-commissioned to produce subsequent studies to support the Review of the Local Plan – the Local Plan Viability Update (August 2023) and the Regulation 19 Viability Note (November 2024).
- 1.2. These studies establish and financially appraise a range of residential and non-residential typologies to determine the likeliness of development viability. The results of the Local Plan Viability Assessments allow officers to assess the deliverability of sites coming forward for development in the Local Plan period.
- 1.3. Chelmsford City Council have used the results from the latest Local Plan Viability Assessments to determine the economic viability aspect of the SHELAA.
- 1.4. Where any assumptions or recommendations are not specifically mentioned in this report, it is advisable to refer to the Local Plan Viability Assessments for an explanation as to how these have been determined.

---

<sup>1</sup> Housing and economic land availability assessment, Paragraph: 020 Reference ID: 3-020-20190722

### 3. Residential Market Results

3.1. The Local Plan Viability appraisals use the residual valuation approach, they assess the value of a site after considering the costs of development, the likely income from sales and/ or rents and a developers' return. The Residual Value represents the maximum bid for a site where the payment is made in a single tranche on the acquisition of a site. For the proposed development to be viable, it is necessary for the Residual Value to exceed the Existing Use Value (EUV) by a satisfactory margin, being the Benchmark Land Value (BLV).

3.2. The economic viability aspect of the SHELAA applies the outputs from the latest Local Plan viability assessments to the assigned typology in the SHELAA. Where the typology number differs from the Local Plan Viability Assessments, the typology reference in the Local Plan Viability Assessments is shown in brackets in the below tables.

3.3. A traffic light system has been applied to visually distinguish the outcomes of the appraisals:

- **Green** – indicated that the Residual Value per hectare exceeds the Benchmark Land Value per hectare and therefore suggests that the typology is likely viable for development.
- **Amber** – indicates that the Residual Value per hectare falls below the Benchmark Land Value but above the Existing Use Value per hectare and therefore suggests that viability of the typology is marginal.
- **Red** – indicates that the Residual Value per hectare falls below the Existing Use Value per hectare and therefore that the typology is likely unviable for development.

3.4. A summary of the outputs for residential sites located in the Chelmsford/wider Chelmsford area are shown below in Table 1:

Table 1: Regulation 19 Viability Note Outputs (November 2024) – Chelmsford

| Typology | Site Description                 | Location         | EUV       | BLV       | RV        |
|----------|----------------------------------|------------------|-----------|-----------|-----------|
| Site 1   | Large GF - 300 Urban Edge        | Wider Chelmsford | 25,000    | 525,000   | 1,269,210 |
| Site 2   | Large GF - 100 Urban Edge        | Wider Chelmsford | 25,000    | 525,000   | 1,189,455 |

|--------------|--------------------------------|-----|--------|---------|---------|

3.6. As well as mainstream housing, the Sheltered and Extracare sectors were tested separately in the Local Plan Viability assessments. The economic viability of two of the most common forms of older persons housing in Chelmsford have been applied in the SHELAA. The typologies are set out in Table 3 below and the economic outputs in Table 4:

| Table 3: Older Person's Housing Typologies |                   |              |                      |                    |                      |
|--------------------------------------------|-------------------|--------------|----------------------|--------------------|----------------------|
| No.                                        | Typology          | Units per ha | Min area needed (ha) | Gross to net ratio | Form and scale       |
| 30                                         | Sheltered housing | 120          | 0.5                  | 80%                | 50% 1 bed, 50% 2 bed |
| 31                                         | Extracare         | 120          | 0.5                  | 70%                | 60% 1 bed, 40% 2 bed |

3.7. A summary of the outputs for the Sheltered and Extracare sectors are shown below in Table 4:

Table 4: Older persons outputs - Local Plan Viability Update (August 2023)

| Typology     | Site Description  | EUV       | BLV       | RV        |
|--------------|-------------------|-----------|-----------|-----------|
| 30 (Site 8)  | Sheltered housing | 1,100,000 | 1,320,000 | 4,360,964 |
| 31 (Site 11) | Extracare         | 1,100,000 | 1,320,000 | 4,878,642 |

#### 4. Non-residential Market

4.1. The Local Plan Viability Assessments include a range of employment and retail uses reflective of the economic make up of Chelmsford. The non-residential typologies are listed below in Table 5:

| Table 5: Non-Residential Typologies |                         |                      |                    |                                                             |
|-------------------------------------|-------------------------|----------------------|--------------------|-------------------------------------------------------------|
| No.                                 | Typology                | Min area needed (ha) | Gross to net ratio | Form and scale                                              |
| 32                                  | Offices (Central)       | 0.06                 | 70%                | 5 storeys, GIA 2,000m <sup>2</sup>                          |
| 33                                  | Offices (Business Park) | 0.27                 | 25%                | 3 storeys, GIA 2,000m <sup>2</sup>                          |
| 34                                  | Industrial              | 1                    | 40%                | 1 storey, GIA 4,000m <sup>2</sup>                           |
| 35                                  | Industrial small        | 0.1                  | 40%                | 1 storey, GIA 400m <sup>2</sup>                             |
| 36                                  | Distribution            | 1.14                 | 35%                | 1 storey, GIA 4,000m <sup>2</sup>                           |
| 37                                  | Retail (Prime)          | 0.025                | 80%                | 200 m <sup>2</sup> No provision for parking / loading space |
| 38                                  | Retail (Elsewhere)      | 0.19                 | 80%                | Unspecified                                                 |
| 39                                  | Supermarket             | 0.67                 | 30%                | GIA 2,000m <sup>2</sup>                                     |
| 40                                  | Retail Warehouse        | 0.8                  | 50%                | GIA 4,000m <sup>2</sup>                                     |

4.2. For non-residential or mixed development, the economic viability aspect of the SHELAA applies a typology from Table 3 above and the relevant output from the Local Plan Viability Update (August 2023) for a greenfield or brownfield site as per

the proposed uses set out in Tables 6 – 9 below, using the same traffic light system for ease of reference:

Table 6: Employment appraisal results – Greenfield

| GREENFIELD          |                  |                   |                |            |                    |              |

## **5. Conclusion**

- 5.1. The green, amber and red results detailed above are fed directly into the SHELAA assessment database. Each site that is assessed is assigned one or more typologies based upon the site's characteristics, and the associated viability likelihood is applied to determine a viability score. More detail on scoring can be found in the Criteria Note.
