The policy is consistent with national planning policy, and appropriately covers healthcare facilities.

How will Future Development Growth be Accommodated?

This section of the consultation document sets out Strategic Policies which underpin and guide the Spatial Strategy including policies related to securing infrastructure and delivering growth.

How will Future Development Growth be Accommodated? (paragraph 6.1)

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Paragraph 6.1	0	0	1	1

Summary of Representations – main issues and suggested changes:

- Add that the strategic policies in this section secure 'facilities' as well as infrastructure (Essex Police).

Strategic Policy S6 – Housing and Employment Requirements

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Policy S6 – Housing and Employment Requirements	19	24	74	74

Summary of Representations – main issues and suggested changes:

- Support/some support for requirements and approach (Essex County Council, Basildon Borough Council, Rochford District Council, Brentwood Borough Council, Castle Point Council, Anglian Water Services Ltd, Broomfield Parish Council, S J R Farming, Hawridge Land, Dominus Chelmsford Limited, Obsidian Strategic Asset Management Ltd, Dandara Eastern, Cliffords Group Ltd, Wates Developments and Hammonds Estates LLP, Vistry Group, C J H Farming Ltd, Seax Development, Miscoe Enterprises Ltd, Home Builders Federation, This Land, Hill Farm (Chelmsford) Ltd, Van Diemans Property Company, Mrs A Mossman, A.G. & P.W.H Speakman, The Bucknell Family, Redrow Homes & Speakman Family, Crest Nicholson, Whirledge & Nott, Croudace Homes, Dandara, Pigeon (Sandon) Ltd, Daniel James Developments, Woolsington One, Welbeck Strategic Land V Limited)
- Support supply buffer (Broomfield Parish Council, Wates Developments and Hammonds Estates LLP, Dandara)
- Use some supply buffer to target affordable homes for local people in perpetuity e.g., through a Community Land Trust (Broomfield Parish Council)
- Expand para 6.16 for employment growth and skills capacity to aim to match levels of housing growth to help reduce out commuting (Essex County Council)
- Request whether Chelmsford can accommodate any of their unmet housing need (Castle Point Council and Southend-on-Sea City Council)
- Amend Part A to read 'at least' 1,000 net new homes (Mrs A Mossman)
- Use updated annual housing requirement (913 as stated in Turley, March 2024) and give high priority to bring empty properties back into use (Danbury Parish Council)
- Explore a higher housing requirement to meet all the housing needs of the area's residents including those living in unsuitable accommodation and newly forming households (Tritton Farming Partnership LLP)
- Need to consider how the ageing population affects housing needs as there is a significant growing need for more specialist housing units (Opus Little Waltham Developments Ltd)

- Housing for older people should have its own requirements and standalone policy (McCarthy Stone)
- Include requirements for elderly persons within the policy. Allocated sites will not meet needs alone (Mrs Mary Rance)
- Increase requirements above the minimum Standard. Reasons cited include to deliver greater choice and more affordable housing, address the housing crisis, reduce reliance on windfall sites, help meet neighbouring area's unmet needs, past housing delivery records and the significant new infrastructure coming to the area (Hill Residential Ltd, Tritton Farming Partnership LLP, Higgins Group, Gladman Developments Ltd, Bloor Homes (Eastern), Richborough, Martin Grant Homes)
- Expand Table 1 to reflect the amendments made to the yields of existing allocations and increase supply buffer to 20% to address in part an historic under delivery of affordable housing (Richborough)
- Need a more balanced/diverse pool of allocations, including small-medium sites (Martin Grant Homes) which are not/less constrained by infrastructure burdens rather than relying on Garden Communities (Richborough, Welbeck Strategic Land V Limited)
- Based on previous delivery rates, apply a non-implementation rate to allow for an element of under-implementation (Obsidian Strategic Asset Management Ltd), allocate more housing sites (Dandara, Welbeck Strategic Land V Limited) and identify Green Belt and non-Green Belt reserve sites (Newell Properties Development Ltd)
- No evidence that windfalls will continue to come forward given likely declining opportunities within built up areas. Affordable housing delivery will likely be lower than required. There is no assessment of the potential for double counting with the 3,745 homes that have permission and are capable of being built out in the next 5 years and beyond (Martin Grant Homes)
- The Duty to Co-operate Statement is unclear on what co-operation has taken place in relation to housing delivery and any unmet housing needs (Obsidian Strategic Asset Management Ltd)
- Plan needs to allocate more sites that could deliver more quickly based on previous housing delivery records and given Hammonds Farm will come forward later in the plan period (Dandara Eastern, Welbeck Strategic Land V Limited)
- Until the Gypsy and Traveller Accommodation 2024, we are unable to comment on numbers (IBA Planning Ltd, Vistry Group)
- Reconsider if the large strategic allocations will meet Gypsy and Travellers and Travelling Showpeople needs within a reasonable timescale. Confirm if the Gypsy and Traveller Accommodation Assessment includes Roselawn Farm in the baseline (IBA Planning Ltd)
- Do not support/object to policy (IBA Planning Ltd, Vistry Group, Chelmsford Garden Community Consortium, Mrs Mary Rance, McCarthy Stone, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)
- The evidence base and planning logic for Hammonds Farm is questionable (Dandara Eastern)

- No need to allocate sites 16a and 16b and their potential benefits do not out outweigh the significant adverse impacts. Alternative locations with less harmful impacts have not been properly considered. Hammonds Farm is not needed to address the area's housing requirements (as recommended by the Strategic Housing Needs Assessment). Existing employment allocations and commitments can meet minimum employment requirements, so Junction 18 of the A12 employment allocation is not needed (Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)
- As Little Boyton Hall Farm Rural Employment Area (Location 15) is inaccessible by bus, walking or cycling it will lead to an increase in congestion on local roads (Chignal Parish Council)
- Spatial Strategy should support the rural and City economy and Chelmsford's status as a regional hub for employment (Hill Farm (Chelmsford) Ltd, Van Diemans Property Company)
- Encourage development of existing employment sites in sustainable locations given long lead-in times for large strategic site allocations (Rosehart Properties Ltd)
- Scenario 3 of the Employment Land Review (ELR) 2023 does not fully account for the planned growth in the economically active population
- The employment requirements are insufficient to meet the growing need of logistics in the area, given the locational advantages on the A12 corridor and the shift to larger warehouses and greater automation. In line with national policy, an objective assessment of the requirements of the logistics sector across the sub-region is required (Greystoke CB)
- Need to consider sites for employment in rural areas (The Bucknell Family)
- Spatial Strategy lacks a proportionate, district wide distribution of growth and infrastructure (Whirledge & Nott, Croudace Homes)
- Extend plan period to 2042/3 to allow for any timetable slippage and increase developments requirements accordingly (Gladman Developments Ltd, Greystoke CB)
- Various comments from landowners/developers promoting their proposed development sites will accord with the proposed Spatial Strategy
- There should be a high priority to bring empty properties back into use
- Support housing requirements
- Do not agree. An additional 4,000 homes are unnecessary, unsustainable, and make compliance with the Vision impossible.

CCC response to the comments made
Policy updated to reflect the proposed transitional arrangements for housing need and use of the new Standard Method to set housing figures and annual targets.
Policy updated to reflect the Gypsy and Traveller Accommodation Assessment (GTAA) 2024 which has been published.
Policy updated to reflect the Employment Land Review Focused Update 2024 which considers the most up-to-date assumptions and data regarding future economic growth prospects for Chelmsford between 2022 and 2041.
This plan seeks to meet and where appropriate exceed the minimum employment requirements over the plan period.

The size and type of housing, including that for new households and older people, is set out in policy DM1, and it is not appropriate to include it here.
Do not amend Reasoned Justification as employment growth and skills capacity is addressed in Policy S8 and reducing out commuting is not a plan requirement.
References to the employment evidence are included within the policy.
CCC has engaged with Castle Point Council and Southend-on-Sea City Council through the Duty to Co-operate and advised that Chelmsford cannot accommodate any of their unmet housing need.
Site allocation policies have been amended to require contributions towards police facilities.
See relevant site allocation policies for responses to site specific comments.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.

Strategic Policy S7 – The Spatial Strategy

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Policy 7 – The Spatial Strategy	21	32	144	144

Summary of Representations – main issues and suggested changes:

- Support/broad support expressed (Essex County Council, Anglian Water Services Ltd, Richard Speakman, Hawridge Land, Hallam Land Management, Cliffords Group Ltd, Gladman Developments Ltd, Wates Developments and Hammonds Estates LLP, Mr J Bolingbroke, C J H Farming Ltd, Seax Development, North Chelmsford Villages Community Group, Miscoe Enterprises Ltd, Cliffords Group Ltd, A.G. & P.W.H Speakman, The Bucknell Family, Redrow Homes & Speakman Family, Dandara, Pigeon (Sandon) Ltd, Daniel James Developments, Welbeck Strategic Land V Limited)
- Most new allocations will come forward from 2029 which will enable alternative wastewater treatment solutions to be developed where capacity is constrained (Anglian Water Services Ltd)
- Mostly support but using the Settlement Hierarchy to allocate future development is not effective or sustainable in practice. Delete references to the Settlement Hierarchy in the policy (Broomfield Parish Council)
- Delete requirement for GS9a to make a financial contribution to the Chelmsford North East Bypass as it is not needed (Essex County Council)
- Amend paras 6.43 and 6.49 and site policies to read that SGS6, 7, 8, 16a and 16b will help to deliver strategic infrastructure including the Chelmsford North East Bypass (Essex County Council)
- Amend para 6.24, bullet 1 to read ‘Sustainable urban extensions of Chelmsford, Great Leighs and South Woodham Ferrers for new housing and employment’ (Essex County Council)

- Add to all site policies infrastructure requirements to ensure wastewater treatment and disposal is available, including any required mitigation with the sewerage network (Environment Agency)
- After ‘infrastructure’ in line 2 of the penultimate paragraph add ‘and facilities’ (Essex Police)
- Site allocations and their respective policies need to be informed by Heritage Impact Assessments (Historic England)
- Reconsider if the large strategic allocations will meet Gypsy and Travellers and Travelling Showpeople needs within a reasonable timescale. Confirm if the Gypsy and Traveller Accommodation Assessment includes Roselawn Farm in the baseline (IBA Planning Ltd)
- Support rejection of Chatham Green and to expansion of SGS2 and SGS8 (Broomfield Parish Council)
- Expand reasons for rejecting expansion of Broomfield village to include landscape capacity and sensitivity, risk of settlement coalescence and primary school capacity concerns (Broomfield Parish Council)
- Agree with dismissal of alternative development sites (Wates Developments and Hammonds Estates LLP)
- Clarify in reasonable alternative text that significant expansion of North East Chelmsford is proposed during the plan period to 2041 (Wates Developments and Hammonds Estates LLP)
- There are no overriding constraints to the allocation of land at Junction 17 A12 (Greystoke CB)
- Enlarge Little Boyton Hall Rural Employment Area (Growth Site 15) and allocate for E(g)(i-ii) alongside B2 and B8 (C J H Farming Ltd)
- Requirements for masterplans on strategic sites should be on a site-by-site basis to reflect issues such as land use and landownership (C J H Farming Ltd, Pigeon (Sandon) Ltd)
- Object to 10 Traveller pitches for SGS6 (Chelmsford Garden Community Consortium) and additional travelling showpeople plot (Vistry Group)
- Unable to comment on Gypsy and Traveller requirements in absence of the Gypsy and Traveller Accommodation 2024 (Chelmsford Garden Community Consortium, Vistry Group)
- Reinstate adopted plan wording for around 1,200 new homes and around 1,000sqm of business floorspace for SGS10 (Vistry Group)
- Do not support/opposition expressed for policy (IBA Planning Ltd, Obsidian Strategic, Dominus Chelmsford Limited, Bloor Homes (Eastern), Vistry Group, Tritton Farming Partnership LLP, Dandara Eastern, This Land, Crest Nicholson, Mr Paul Hopkins, Richborough, ARU, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Mr and Mrs Andrew Parker, Mrs Fiona McCallum, Taylor Wimpey, Martin Grant Homes, Croudace Homes, Barratt David Wilson (Eastern Counties))
- Increase the housing requirement to help deliver more homes (Hallam Land Management), ensure development needs are met (Farming Partnership LLP, Newell Properties Development Ltd) and to address uncertainties with windfall sites (Urban Provincial, Martin Grant Homes)

- Proposed allocations fall short of housing requirements (Opus Little Waltham Developments Ltd)
- Housing trajectory is unrealistic without more allocations including within the Green Belt (Newell Properties Development Ltd)
- Existing allocated large-scale sites are not meeting the time-scales as predicted in the draft Plan (Dandara)
- The 20% buffer is largely formed by dwellings which are potentially undeliverable in the Plan period (Martin Grant Homes)
- Projected housing supply in the first five years is too ambitious and needs to be revised. Confirm status of allocated sites rolled forward to demonstrate delivery (Martin Grant Homes)
- Provide evidence to explain (i) how the preferred options were selected and (ii) the availability of services, functional relationships and sustainability used to inform the Settlement Hierarchy (Martin Grant Homes)
- Amend Settlement Hierarchy to read 'Chelmsford Urban Area'
- Allocate more small/medium housing and employment sites (Opus Little Waltham Developments Ltd, Richard Speakman, H R Philpot & Sons, Hill Farm (Chelmsford) Ltd, Van Diemans Property Company, Dandara, Mrs Carolyn Morling, Mr James Gardner, Bellway Strategic Land, Martin Grant Homes) including housing sites under 1ha (Tritton Farming Partnership LLP)
- Allocate a greater variety of site sizes cross more parts of the plan area including in/on the edge of Chelmsford Urban Area and in/around villages e.g., to ensure a more balanced distribution of growth and support rural areas and (Bloor Homes (Eastern), Seax Development, Gladman Developments Ltd, S J U 2016 discretionary settlement trustees, Dominus Chelmsford Limited, Hill Residential Ltd, Higgins Group, Miscoe Enterprises Ltd, Tritton Farming Partnership LLP, Bellway Homes Ltd, H R Philpot & Sons, Cliffords Group Ltd, Mr Graham Weal, A.G. & P.W.H Speakman, The Bucknell Family, Crest Nicholson, Mrs Carolyn Morling, Mr James Gardner, Taylor Wimpey, Martin Grant Homes, Barratt David Wilson (Eastern Counties))
- Provide Almshousing to help meet local affordable housing needs (Seax Development, Miscoe Enterprises Ltd)
- Provide housing for the elderly to meet local needs (J & T Wardrop and the Wardrop Trust)
- Plan needs a co-living policy (Highgate Capital Ltd)
- Review the Green Belt to identify the most sustainable strategy and sustainable Green Belt releases (Obsidian Strategic, Vistry Group, Mrs R Armstrong and Mr B Howard, H R Philpot & Sons, Newell Properties Development Ltd, Whirledge & Nott, Croudace Homes, Taylor Wimpey, Martin Grant Homes, J & T Wardrop and the Wardrop Trust, Barratt David Wilson (Eastern Counties))
- Not undertaking a Green Belt Review has led to unsustainable development patterns e.g., increased journey times to the City Centre, a lack of community infrastructure in areas and poor cohesivity with existing communities (Barratt David Wilson (Eastern Counties))

- Allocate additional/expand existing employment sites (including in the Green Belt) to provide flexibility and support existing employment areas/businesses (S J R Farming, Hill Farm (Chelmsford) Ltd, Saxtons 4x4)
- Policies S7, S8 and S11 should more clearly support rural businesses changing, expanding, adapting and improving to avoid disagreements at planning application stage (Strutt & Parker)
- Review of the role of the Green Wedge to promote active travel corridors and improve accessibility of the Green Wedge to areas of wildlife/ecological value (Cliffords Group Ltd)
- Review the Green Wedge to establish areas of land that serve little contribution to the role and function of the Green Wedge and to identify the most sustainable development options (Miscoe Enterprises Ltd, Hill Farm (Chelmsford) Ltd, Mr Graham Weal, The Bucknell Family, Mr Paul Hopkins)
- Plan is too reliant on large strategic sites (e.g. Garden Communities) making it inflexible/unreliable. There are delivery and viability risks/issues with such sites, long lead in times and the housing trajectory is over ambitious (Urban Provincial, Opus Little Waltham Developments Ltd, Richard Speakman, Hill Residential Ltd, Obsidian Strategic, Tritton Farming Partnership LLP, Bloor Homes (Eastern), Dandara, Bellway Homes Ltd, This Land, Dandara, Martin Grant Homes, Bellway Strategic Land, Martin Grant Homes, Croudace Homes, Welbeck Strategic Land V Limited, Barratt David Wilson (Eastern Counties))
- Concern/objection to Hammonds Farm allocation. Comments cited include previously scored poorly, physically and spatially detached from Chelmsford, requires significant infrastructure investment and too optimistic modal shift targets. More sustainable, accessible locations have been dismissed (Dandara, Bellway Homes Ltd, This Land, Bellway Strategic Land, Croudace Homes, Barratt David Wilson (Eastern Counties), Gladman Developments Ltd, Vishal Sharma)
- Council has ignored its evidence base (Croudace Homes) including by selecting Hammonds Farm over better performing sites (Mr and Mrs Andrew Parker)
- SGS16a and b are not needed to meet the area's housing and employment requirements; are in unsustainable and inaccessible locations; would have significant adverse impacts that cannot be adequately mitigated including on flood risk, highway network, landscape, heritage, loss of agricultural land, wildlife, ecology and minerals safeguarding; are situated within a highly sensitive setting; would significantly impact multiple Parishes and contradict relevant 'made' and emerging Neighbourhood Plans, and are premature as the land is a potential new area for a 'National Landscape' designation (Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Croudace Homes)
- There is large-scale public objection to Hammonds Farm and there have been no changes since the plan adoption to warrant removing the land's current level of high protection (Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)

- The proposed benefits of the Hammonds Farm development (e.g. new country park) do not outweigh the harm; the Council's evidence base is questionable/unsound and not all impacts have been properly assessed. More sustainable options to SGS16a and have been rejected without proper interrogation including the continued expansion of NEC, smaller-scale allocations across the Settlement Hierarchy and Green Belt development through a review. A landscape assessment, heritage assessment, flood risk statement and transport technical note are submitted alongside the representation (Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)
- Hammonds Farm would be a long-term option and commencing before completion of North East Chelmsford will split available infrastructure funding and market interest. The Spatial Strategy fundamentally departures from the adopted Local Plan and 'made' Neighbourhood Plans, and the rationale for this 'U'-turn is unclear and unjustified (Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)
- Separation between Chelmsford and Danbury would largely disappear with Hammonds Farm contrary to the Spatial Principles (The Danbury Society)
- Hybrid Spatial Strategy options were not part of the consultation (The Danbury Society)
- Constraints at SGS6 and Great Leighs SGS7 (e.g. heritage, Critical Drainage Area) could delay delivery (Wates Developments Limited, Urban Provincial)
- Splitting the Settlement Hierarchy by Outside and Within the Green Belt is not justified and fails to reflect development opportunities across the plan area (Hill Residential Ltd, Higgins Group)
- South Woodham Ferrers should be its own category in the hierarchy given its scale and service provision
- Delete requirement for proposals within Special Policy Areas to be considered against an approved masterplan as education priorities date quickly requiring regular costly updates. Instead assess proposals against prevailing plan policies (ARU)
- Spatial Strategy should specifically recognise the needs of the logistics sector in Chelmsford (Greystoke CB)
- Increase capacity of GS17b to at least 30 dwellings in line with the SHELAA (Mrs A Mossman)
- Expand allocations 3b, 3c and 3d at East Chelmsford (Redrow Homes & Speakman Family)
- Expand 14b for 50 homes (Dandara)
- 20 units at 11c fails to make effective use of land. Allocate for more homes to help deliver improvements to local services and facilities (Welbeck Strategic Land V Limited)
- Increase allocation for Danbury. Question suitability of allocating through the Neighbourhood Plan which is not time-controlled risking delayed site delivery (Richborough)
- Provide more flexibility on growth outside settlement limits (Park View Group)

- Various comments from landowners/developers/promoters promoting that their proposed development sites should be allocated in the Spatial Strategy and added to the Key Diagram
- Various comments disagreeing with the Council's SHELAA 2024 site assessment methodology and/or scoring of their submitted sites
- The A132/B1012 Improvements fail to consider the increase in traffic flows from the development to the east of SWF
- The Secretary of State regarded about 1000 homes acceptable for SGS10
- Better to build on brownfield land or the edge of large towns
- Consider traffic impacts of RHS Hyde Hall Special Policy Area which will be improved/enlarged causing increased traffic on Willow Grove
- Support expressed including protection of the Green Wedge and Green Belt
- Opposition expressed e.g., development proposals will spoil the countryside, adversely impact on road safety and congestion
- Build on brownfield land or the edge of large towns
- Opposition expressed to Hammonds Farm allocation. Reasons include it is not properly evidenced or justified; loss of agricultural land; more sustainable locations are available; lack of existing infrastructure; landscape, biodiversity and heritage impacts, increased traffic impacts and congestion; no guarantee that the development and infrastructure can be delivered in the time scale; shortage of GPs; pollution; detached from Chelmsford; not close to new and existing transport infrastructure such as the new bypass; would require disproportionate investment in highways infrastructure, and lack of existing utility provision
- There is no advantage to Hammonds Farm over North East Chelmsford
- Hammonds Farm should not be the sole major growth area
- Need to undertake a Green Belt Review to identify sustainable new housing Green Belt settlements to sustain their vitality and services
- Unclear why expansion of North East Chelmsford is no longer deliverable since the Issues and Options consultation
- There is nothing to prevent mineral extraction and housing development in North East Chelmsford over the plan period
- Plan is premature as Labour propose 'grey belt' land which could be a better alternative to Hammonds Farm
- Re-distribute growth around planned new infrastructure i.e. North East Chelmsford and away from Hammonds Farm
- Concerns about 14a and 14b e.g., loss of agricultural land and flood risk
- Question classification of Ford End as a Service Settlement as it lacks services including a shop
- Opposition expressed to SGS2 and SGS3
- Consider growth east of Great Baddow, north of Writtle village, and land surrounding Galleywood and Danbury instead of proposed spatial strategy
- Large solar farms should be designated and shown as semi industrial on Local Plan diagrams.

CCC response to the comments made

Wording added to Settlement Hierarchy to clarify that ‘Chelmsford’ includes its Urban Area such as Chelmer Village, Great Baddow and Springfield.
The Settlement Hierarchy ranks settlements according to their size, function, characteristics and sustainability. It is one of many factors used to inform where development is most sustainable and informs planning decisions so is retained.
Reference to exception sites in the Policy expanded to include affordable and community-led developments.
Reference to ‘sustainable urban extensions’ in the Reasoned Justification expanded to clarify these include extensions at Great Leighs and South Woodham Ferrers, as well as Chelmsford.
Reasoned Justification updated to reflect latest predicted losses of Grade 2 and Grade 3 agricultural land as a result of development in the Plan.
Requirement for GS9a to make a financial contribution to the Chelmsford North East Bypass deleted as evidence shows it would be unreasonable to require this site to contribute to this.
Reasoned Justification amended to refer to SGS6, 7a, 7b, 7c and 8 helping to deliver strategic infrastructure including Section 1a of the Chelmsford North East Bypass.
All numbers and locations updated to reflect latest housing, employment and Gypsy and Traveller numbers and site allocations.
Site policies have been amended to ensure wastewater treatment and disposal is available, including any required mitigation with the sewerage network.
Reference to the need for police facilities has been added to Policy S9 and relevant site policies. The Plan should be read as a whole, so it is not necessary to duplicate in this Policy.
Heritage Impact Assessments were published alongside the Preferred Options Local Plan and have been used to inform site allocation policies.
Large strategic allocations will meet Travelling Showpeople needs in full with delivery on some sites within the first five years of the Plan.
The 2024 Gypsy and Traveller Accommodation Assessment includes Roselawn Farm in the baseline and is published as part of the evidence base.
Due to the lack of available and suitable alternative sites for Gypsies, Travellers and Travelling Showpeople, and the need to build cohesive and inclusive communities, the most appropriate way to meet these needs is through larger strategic site allocations.
Information on reasonable alternatives that have been considered and rejected is contained within the Spatial Strategy Topic Paper, Preferred Options Consultation Document and IIA.
The housing supply includes a small supply buffer, and the Council can demonstrate a Five Year Housing Land Supply which will be monitored through the Authority Monitoring Report throughout the Plan period. Housing figures are ‘around’ and allow for more units to come forward if sites can accommodate them in a sustainable manner. For these reasons no further housing allocations are required.
The Housing Trajectory and timings within it are considered deliverable as established through the Council’s Five Year Housing Land Supply Methodology (April 2024). The Trajectory is updated annually, and the Pre-Submission Local Plan uses the latest available Housing Site Schedule (April 2024).
The site allocations, with the addition of existing permissions and windfall sites as set out in the April 2024 Housing Site Schedule, creates a good range of site sizes to assist in delivery of sites to meet housing needs over the Plan period.

The Council can meet its development requirements without needing to undertake a Green Belt review. This approach accords with National Planning Guidance.
The 'small sites' (under 1ha) are an important part of the Plan to ensure delivery of a variety of sites in a timely manner, and to meet NPPF requirements to provide 10% of small sites. The enlargement of these sites would be likely to put greater pressure on local facilities and infrastructure which could make such sites unsuitable for development.
Policy DM1 has been amended to introduce a new requirement for 10% market housing for Older Persons on greenfield sites of more than 500 dwellings.
There is no requirement or local need for the Plan to include a co-living policy.
The employment allocations alongside existing commitments are expected to meet the identified employment needs. The use of 'around' employment floorspace figures in specific site allocation policies allows for an appropriate degree of flexibility in provision. DM4 protects, and allows for expansion of, existing employment uses – the Plan should be read a whole, so it is not necessary to repeat in Policy S7.
Suitable brownfield sites have been allocated within the Urban Area. There are not sufficient brownfield sites to meet the Local Plan's development requirements so greenfield sites must be allocated.
The requirement for Masterplans for strategic sites and SPAs goes beyond just land use and ownership and are required to ensure wider community and stakeholder engagement at an early stage of the planning process. Reference to these being approved before a planning application is submitted has been amended to require them to be approved before a planning application is determined. It is noted that a masterplan for ARU was approved in 2024.
Policies DM8 and DM11 provide support for the growth and expansion of rural businesses – no need to add further details to Strategic Policies.
The SHELAA has been updated to inform the Pre-Submission Local Plan and any appropriate changes or updates have been made.
It is not necessary to allocate specific sites for renewable energy production as the suite of policies within the Plan allow for such developments to come forward. A number of planning applications for such large-scale development, including a large DCO for 'Longfield Solar Farm' have been approved in the Council's administrative area, demonstrating that the policies are sufficient to allow for such development to come forward and that there is no specific need to allocate sites.
See relevant site allocation policies for responses to site specific comments.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.

CCC responses to site allocation consultation comments appear under the relevant specific site policy. For example, see page 112 for CCC responses to Hammonds Farm (SGS16a).

Strategic Policy S8 - Delivering Economic Growth

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses

Strategic Policy 8 - Delivering Economic Growth	8	1	22	22

Summary of Representations – main issues and suggested changes:

- Policy is broadly supported (Gladman, C J H Farming Ltd, Van Diemans Property Company, Wates Development and Hammonds Estates LLP)
- Bullet 1 should also refer to active modes of transport (Essex County Council)
- Add a new bullet supporting regional growth sector priorities and clustering of economic activity (Essex County Council)
- Add reference in para 6.58 to the need for an appropriate mix of uses to reflect market need (Essex County Council)
- Amend para 6.59 to remove the reference to South East Local Enterprise Partnership and include a reference to the Local Skills Improvement Plan (Essex County Council)
- Paragraph 6.62 should refer to the importance of the strategic sites and Garden Communities creating the agglomeration for economic development (Essex County Council)
- Reference ECC's Developers Guide to infrastructure contributions in the Reasoned Justification. Para 6.63 should reflect the need for Employment and Skills Plans to be agreed by the LPA and ECC ahead of agreeing S.106 Agreements (Essex County Council)
- Concerns expressed that the SGS15 scored lowest in average sustainable accessibility in the Transport Impact Appraisal (Chignal Parish Council)
- In accordance with the NPPF and PPG, the policy should be amended to reference the logistics sector (Greystoke CB)
- Additional smaller employment sites should be allocated to further diversify Chelmsford's economy (Hill Farm (Chelmsford) Ltd, Van Diemans Property Company)
- Add an additional bullet to refer to low carbon transport infrastructure (CNG Fuels Ltd)
- The South East Marine Plan policies such as SE-EMP-1 should be used as evidence to support the local plans policies (Marine Management Organisation).

CCC response to the comments made
Various amendments to strengthen and update the policy including references to active and sustainable modes of transport and support for regional growth sector priorities and clustering of economic activity.
The policy includes B8 development as stated in Reasoned Justification – no further change considered necessary.
Additional references to the South East Marine Plan have been added to Section 1 (Introduction) of the plan. As the plan is read as a whole, it is not considered necessary to repeat this in Policy S8.
The policy already refers to the sectors which will be nurtured - reiterating this in the Reasoned Justification in relation to strategic sites would be duplication.

The plan will allow for a range of different employment uses to come forward, where appropriate – there is no evidence to justify a specific reference to low carbon transport infrastructure.
The policy for SGS15 Little Boyton Hall Farm requires a range of measures to promote active travel safe to the site.
The plan allocates a range of employment sites to meet the employment floorspace requirements in the Policy S6 – no further allocations required.

Strategic Policy S16 – Connectivity and Travel

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Policy 16 – Connectivity and Travel	14	2	26	26

Summary of Representations – main issues and suggested changes:

- Support for the policy (Essex County Council, Sport England, Wates Developments and Hammonds Estates LLP, Cliffords Group Ltd, Dandara / Dandara Eastern, Gladman Developments Ltd, Hill Residential, Dominus Chelmsford Ltd, CJH Farming Ltd, The Bucknell Family, Chris & Helen Copping, Pigeon (Sandon) Ltd, Daniel James Developments
- Welcome further text relating to Bio/CNG and alternative fuels (CNG Fuels)
- Add a reference to how the policy can support the LCWIP routes through physical provision or financial contributions (Essex County Council)
- Include actions to remove barriers to travel for vulnerable users (Essex County Council)
- Encourage the plan to take account of the challenging targets for mode share and road safety as already in place in London (Transport for London)
- Walkable neighbourhood principles may not always be achievable, particularly for logistics development (Greystoke CB)
- Clarification sought on definition and thresholds for major and strategic development (ARU)
- Add reference to development proposals having regard to the principles in Active Design as well as the Essex Design Guide as the Walkable Communities Principle provides guidance on practical measures for implementing walkable neighbourhoods (Sport England)
- Include reference to the modal hierarchy, distinguish between the bullets points in Part A and clarify alternatives for commercial vehicles (Wates Developments and Hammonds Estates LLP)
- Concerns about future traffic and impact on Great Baddow and the Baddow bypass
- There needs to be greater provision for disabled parking close to the shops in the City Centre, and better public transport
- Better public transport is needed particularly from Chelmer Village to Springfield and Beaulieu Park.

CCC response to the comments made
Strategic Policy S1 includes the modal hierarchy – the plan should be read as a whole, so it is not necessary to repeat it in Policy S16.
The bullet points under Section A seek to achieve different measures to achieve active and sustainable transport and are retained.
Reasoned Justification describes alternatives for commercial vehicles – no further change considered necessary.
Reasoned justification amended to include a wider definition of vulnerable users.
Reference to how development can support the delivery of LCWIP routes added to the Reasoned Justification.
The definition and thresholds for major and strategic development in the policy are appropriate – no further change considered necessary.
Reference to the London Plan is noted. The Chelmsford Local Plan includes targets for mode share and seeks to improve safety and connectivity.
Reference added to development proposals having regard to the principles in Active Design.
Walkable neighbourhood principles are already addressed adequately in the policy – no further change considered necessary.

Strategic Policy S9 – Infrastructure Requirements

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Policy 9 – Infrastructure Requirements	23	3	48	48

Summary of Representations – main issues and suggested changes:

- Support for the policy (Sport England, Environment Agency, Gladman, Anglian Water, Tritton Farming Partnership LLP, Dominus Chelmsford Limited, Whirledge and Nott, Croudace Homes, Vistry Group)
- The list of transport infrastructure measures should better reflect the correct user hierarchy prioritisation of sustainable modes (Wates Developments and Hammonds Estates LLP)
- The policy fails to specifically address the potential impacts of sites 16a and 16b on Danbury, combined with planned housing growth in Maldon, South Woodham Ferrers and Danbury, and the potential new power station. Modelling has already shown that mitigation is needed for Eves Corner and Well Lane junctions, without additional growth (Danbury Parish Council)
- Add active and sustainable travel to education and health facilities (Essex County Council)
- Separate Chelmsford North East Bypass and new Park and Ride sites bullets, refer to bypass phasing and future actions, and separate bus priority and inter-urban public transport bullets (Essex County Council)
- Update route-based strategies for the A414 and A132, including requirements for physical or financial contributions where development adds traffic (Essex County Council)

- Provide evidence to support the strategy for the A132, it is close to capacity and improvements may not deliver the required improvements
- Support principle of a sustainable bridge connection from Site 16a directly into Sandon Park and Ride but some qualifying text is needed (Wates Developments and Hammonds Estates LLP)
- There are opportunities to improve the National Cycle Network in the area, namely improvements to NCN1 and an additional route the junction 19 which would link to Beaulieu Station and North Chelmsford, as well as providing a link to the countryside for leisure cyclists and is a better alternative to the existing cycle route (Cycling UK)
- Would not support buses through the Park and Ride site, and would prefer a connection nearby (Essex County Council)
- The supporting text refers to new development creating demand for cycling, rail and road use only. The wording should be updated to include reference to walking and buses (Wates Developments and Hammonds Estates LLP)
- Clarify the supporting text to evidence the requirement and timing for the Chelmsford North East Bypass (CNEB) Phases 1b and 2. The requirement appears to be associated primarily with background increases in traffic using the A12, rather than trips from Hammonds Farm (Wates Developments and Hammonds Estates LLP).
- Support for the conclusion of the Transport Impact Appraisal of Preferred Spatial Approach (March 2024) that by maximising the potential for sustainable accessibility to and from the site along the A12 corridor, the impact on the strategic highway network should not be considered severe – rather than a requirement to ensure that background traffic flows along the A414 are not unreasonably delayed by the addition of development trips as stated elsewhere in the appraisal (Wates Developments and Hammonds Estates LLP)
- Include a reference to the Chelmer Waterside access bridge, to be consistent with Strategic Policy S17 (Essex County Council)
- The Army and Navy improvements are wider than the junction itself and include connecting routes (Essex County Council)
- Further assessment work is underway on some road locations, and we will work with the Council on appropriate mitigation if necessary (Highways England)
- Any new Park and Ride site for West Chelmsford should be outside the Green Belt (Writtle Parish Council)
- There is a need for joint working between South Essex authorities to improve sustainable travel connectivity north-south, particularly for access to jobs; and to address implications and opportunities arising from Thames Freeport (Castle Point Council)
- Changes to the strategic road network should be considered in the context of potential impacts on the wider network, including the A12 in London (Transport for London)
- Concerns about future traffic and impact on Great Baddow and the Baddow bypass
- Add provision of 5G mobile service to the utilities section (Essex County Council)

- Encourage opportunities to enhance and establish green infrastructure along sustainable transport and the Public Rights of Way networks (Essex County Council)
- Include a policy reference to incorporating urban greening (Natural England)
- Strengthen reference to the capacity of foul drainage and waste water treatment to address pollution prevention (Chelmsford & Central Essex RSPB Local Group)
- Add further text relating to low carbon refuelling facilities (CNG Fuels)
- Reword policy to be consistent with Policy DM16, and to clarify that bespoke mitigation measures, where appropriate, would be in addition to RAMS contributions (Natural England).
- Add references to the requirement for a range of developer funded police facilities to provide for effective community safety, cohesion and policing to create sustainable new communities (Essex Police)
- The Cathedral School is at full capacity and would need to expand to two form entry to meet demand, but a strategic approach is required to include independent schools in overall longer-term education planning and funding as part of a cohesive strategy (The Cathedral School)
- All the required infrastructure should be set out in each site policy to make it clearer what they are expected to provide (Dandara, Hill Residential Ltd) and clearly linked to proposed growth
- It is unclear how infrastructure will be delivered, implemented and funded (Higgins Group)
- Policy should address the need to mitigate impacts on primary, community, acute and ambulance service capacity (Mid and South Essex Integrated Care Board (ICB))
- Lack of hospital capacity, with sufficient car parking, and GP capacity is an issue
- If we cannot provide the infrastructure, we should not build the houses and there should be legal requirements to ensure that schools, GPs, cycle routes, bus lanes are provided
- Evidence documents refer to uncertainty in forecasting forward beyond 2041 and therefore do not test more than 3,000 dwellings at East Chelmsford Garden Community (Hammonds Farm) (Wates Developments and Hammonds Estates LLP).

CCC response to the comments made
It is not necessary to list transport infrastructure by order of the modal hierarchy – no further change considered necessary.
Cross-boundary issues related to sustainable travel connectivity north-south, and to address Thames Freeport are addressed in Section 1 of the plan (or Introduction) – the plan should be read as a whole, so it is not necessary to repeat them here.
Qualifying text relating to the bridge connection from Site 16a is provided in the site policy (SGS16a).
Reasoned Justification refers to new development creating demand for measures to encourage sustainable travel choices which includes for walking and buses.
Reasoned Justification amended to the reflect the latest position regarding the funding for the Chelmsford North East Bypass (CNEB). With section 1a being funded by the Housing Infrastructure Fund, followed by section 1b and section 2,

which are anticipated to be subject to a future round of Department for Transport/Major Road Network funding combined with developer contributions and will be delivered at a later date.
Reference to ‘emergency services infrastructure’ replaced with “Police, ambulance and fire and rescue facilities” for completeness. Adding additional references to policing and police facilities would add unnecessary duplication.
Requirements for developer funded police facilities is addressed in the Infrastructure Delivery Plan and such detail is not appropriate within a Strategic Policy – no further change considered necessary.
Policy already contains a specific section on utilities which includes foul drainage and waste water treatment. Requirements for utilities is addressed in the Infrastructure Delivery Plan and relevant site allocation policies informed by the Water Cycle Strategy including SGS7a– no further change considered necessary.
It is not necessary to list other examples of sites that Beaulieu Park rail station will encourage sustainable travel to – no further change considered necessary.
The requirement for ‘Improvements to the Improvements to the Army and Navy Junction’ has been expanded to include the routes connecting to the junction as part of a sustainable transport package.
For completeness, reference to the A1016 has been added to ‘New foot/cycle bridge across A131’.
Reference to new and improved active and sustainable travel routes has been expanded to include reference to ‘bridges’ to reflect additional items identified by the updated IDP. The need for such routes to connect to education and health centres has also been added to this bullet point.
The need for a new active and sustainable route and bridge over the A12 from East Chelmsford Garden Community to connect to Sandon Park and Ride has been amended to connect ‘close’ to the Park and Ride.
Reasoned Justification amended to refer to 5G mobile connectivity.
The requirement for bus priority measures has been expanded to also include ‘bus services’ and has been separated into two bullet points from the requirement for ‘Improvements to inter-urban public transport’.
Measures to promote the greening of sustainable transport and Public Rights of Way is outside the scope of this Policy and is addressed by Policy S4 – no further change considered necessary.
Reasoned Justification updated to reflect the latest position with regards to the CNEB, Route Based Strategies for Mid Essex and Local Transport Plan.
The provision of new lock and replacement of weir gates at Chelmer Waterside, the provision of serviced moorings along the River Chelmer, and cemetery space and crematorium provision have been added to the policy requirements to reflect additional items identified by the updated IDP.
The IDP sets out how infrastructure will be delivered, implemented and funded so it is not necessary to repeat this detail in the policy - no further change considered necessary.
Contributions towards addressing cumulative recreational pressure on SSSIs has been added as a policy requirement to reflect the site specific policies requiring this.
Reasoned Justification updated to require major developments to provide suitable alternative and accessible natural greenspace on-site, in addition to financial contributions in accordance with the adopted RAMS Supplementary Planning Document.

Strategic Policy S10 – Securing Infrastructure and Impact Mitigation

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Policy 10 – Securing Infrastructure and Impact Mitigation	11	2	28	28

Summary of Representations – main issues and suggested changes:

- Supportive of the policy (Environment Agency, Anglian Water, Vistry Group, Chelmsford Garden Community Consortium, Essex County Council, NHS Property Services Ltd, Wates Developments and Hammonds Estates LLP)
- Include reference to 'facilities' within the policy and Reasoned Justification (Essex Police)
- Include reference to green and 'blue' infrastructure (Essex County Council)
- Amend 'emergency services' to 'police, ambulance and fire and rescue facilities' (Essex Police)
- Delete second policy paragraph as it should not be for a development, especially for one that has been allocated in the local plan, to subsequently demonstrate that there is sufficient capacity within local infrastructure to support that development (Home Builders Federation)
- Any reliance placed on planning obligations to fund infrastructure need to consider how much growth is being directed to locations that relate to such infrastructure, and whether such growth is sufficient to provide the requisite funding (Tritton Farming Partnership LLP)
- New housing sites necessitate developer funded police and healthcare facilities to be provided. Further changes are set out by Essex Police throughout the Plan (Essex Police, Mid and South Essex Integrated Care Board)
- Policies S9 and S10 should address the need to mitigate impacts on primary, community, acute and ambulance service capacity (Mid and South Essex Integrated Care Board)
- Greater clarity is sought within the evidence base with regards to specific details on the infrastructure being required for each site and how that will be secured. At present there is no link between Policy S9 and Policy S10 which should explain which infrastructure is relevant to which site and how delivery will be secured (Whirledge & Nott, Croudace Homes)
- Include reference to the fact the IDP is a living document that will continue to be updated in the Reasoned Justification (Essex County Council)
- Supportive of the reference to 'flood protection' in the Reasoned Justification (Environment Agency).

CCC response to the comments made
Last sentence of the policy regarding the need to ensure that the cumulative impact of planning policy, standards and infrastructure requirements do not render most sites and development identified in the Local Plan unviable and therefore undeliverable has been moved to the Reasoned Justification.

Definition of infrastructure expanded to include green and ‘blue’ infrastructure.
Reasoned Justification expanded to clarify that the Infrastructure Delivery Plan is a ‘living’ document that will be reviewed to ensure the most up-to-date information is used to inform the planning application process.
All site allocation policies have been updated to clarify that financial contributions for infrastructure listed in the site policy and Policy S9 will be sought in accordance with Policy S10.

Strategic Policy S11 – The Role of the Countryside

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Policy 11 – The Role of the Countryside	8	4	29	29

Summary of Representations – main issues and suggested changes:

- Support policies which prevent development on the land between the A12 Bypass and the Green Belt, even if the Green Belt boundary changes (Essex Local Access Forum)
- Preserve agricultural land within the Green Belt between Chelmsford and south of the A12 as a breathing space for inhabitants
- Amend policy to align with Council’s response to the climate and ecological emergency to add significant material weight to developments that assist in delivering net zero emissions (CNG Fuels)
- Add more protection for the rural villages to prevent encroachment from larger settlements (Sandon Parish Council)
- Undertake a Green Wedge review (The Bucknell Family, Cliffords Group Ltd, Vistry Group, Obsidian Strategic Asset Management Ltd, Miscoe Enterprises Ltd and Hill Farm (Chelmsford) Ltd)
- Policy should be more flexible to allow sustainable development to come forward outside of defined built-up areas (Gladman Developments Ltd)
- Support principle of Green Wedges but no need for a specific Green Wedge Policy (Obsidian Strategic Asset Management Ltd)
- Support reference to Landscape Character Assessments, Historic Landscape Characterisation Study, Sensitivity and Capacity Assessments evidence base (Chignal Parish Council)
- Support policy (Writtle Parish Council)
- Question whether all areas of Green Belt serve the five key purposes as the context and role of these areas has evolved, particularly, land south of Chelmsford (Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)
- A Green Belt Review should be undertaken (Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Newell Properties Development Ltd, Hill Residential Ltd, Vistry Group, Higgins Group)

- Amend to refer to the Essex Green Infrastructure Strategy (2020) and the Essex Green Infrastructure Standards Technical Guidance, Essex Green Infrastructure Standards Non-Technical Guidance and the Local Nature Recovery Strategy (Essex County Council)
- Suggests policy wording in relation to rural economic development, with particular regard to existing businesses in rural locations, is clarified and more supportive of growth, expansion and diversification to avoid different interpretations at planning application stage (Strutt and Parker)
- Consider a small-scale alteration to the Green Wedge boundary and an extension to Widford Employment Area (Saxtons 4x4)
- Comments from landowners/developer suggesting alternative development sites are taken forward.

CCC response to the comments made
Plan seeks to prevent the encroachment of growth into undeveloped areas and the coalescence of existing built-up areas – no further changes needed.
Development growth in the Green Belt has been discounted as there is sufficient and suitable land is available outside the Green Belt to meet the development needs in a sustainable way. It would also undermine national planning policy. A Green Belt Review is not required.
The Green Wedge is a locally important designation. Changes to the Green Wedge boundaries to allow development growth has been discounted as there is sufficient and suitable land elsewhere to meet development needs in a sustainable way. No Green Wedge Review is required, and the deletion of Green Wedge policies would be inappropriate.
Other policies in the plan adequately deal with net zero carbon, Green Wedge and Rural Area development including DM8 and DM31. The plan should be read as a whole, so further provision in S11 would be duplication.
CCC has prepared its own Green Infrastructure Strategy and Action Plan for the plan area – it is not necessary to also refer to the Essex-wide documents.
Reasoned Justification amended to clarify that reference is made to the spatial role and function of land.
A range of alternative development sites have been considered and rejected when developing the Spatial Strategy. More information is set out in the IIA, Spatial Strategy Topic Paper and Preferred Options Local Plan.

Strategic Policy S12 – Role of City, Town and Neighbourhood Centres

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Strategic Policy S12 – Role of City, Town and Neighbourhood Centres	0	0	3	3

Summary of Representations – main issues and suggested changes:

- Support the distinction of centres with Chelmsford City Centre listed first (which is contrary to Policy S7) (Dominus Chelmsford Limited)
- Consider adding Hammonds Farm Neighbourhood Centre to the list of centres identified in para. 6.125 (Essex County Council)
- The policy lacks a reference to the benefits of/need for appropriate residential uses on upper floors in the city centre/designated centres (Dominus Chelmsford Limited/ Highgate Capital Limited).

CCC response to the comments made
As Hammonds Farm has not yet been built, the exact scale and location of a neighbourhood centre is currently unknown, so no change is proposed.
Strategic Policy S17 adequately covers the opportunities for residential uses on upper floors in Part C: Living in the City Centre. Residential use on the upper floors of designated centres is also covered by Policy DM5.

Strategic Policy S17 – Future of Chelmsford City Centre

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Strategic Policy S17 – Future of Chelmsford City Centre	6	1	9	9

Summary of Representations – main issues and suggested changes:

- Proposals for flood defences and flood management are welcome. The supporting text could include encouragement for developers to liaise with the Chelmsford Flood Resilience Partnership (The Environment Agency)
- Support for innovative and sustainable approaches, long-term resilience, nature-based solutions and natural flood management (Anglian Water Services Ltd)
- Support for policy approach, and specifically for The Meadows with some enhancements to text proposed (Dominus Chelmsford Limited)
- Amend text to refer to Park and Ride as part of bus connections (Essex County Council)
- Opportunity corridors supported – suggest amendment to reflect availability of planning tool for urban greening, and provide clarification of appropriate land uses (Essex County Council)
- The Meadows was only built in 1992 and does not need to be rebuilt, the proposal is unsustainable
- Proposals for The Meadows should include health facilities.

CCC response to the comments made
The policy has been redrafted to reduce its length and remove repetition. Detail that was contained within Part F. is now largely contained in the relevant site policies SGS1a and SGS1w.
Part D. Bullet 2, reference to Park and Ride has been added.

Figure 15, Area 5, has been updated to include the allocation of Andrews Place (SGS1cc).
Reference to the Chelmsford Flood Resilience Partnership is made in Strategic Policy S9. The plan should be read as a whole, so further provision in S17 would be duplication.

Strategic Policy S13 – Monitoring and Review

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Policy S13 – Monitoring and Review	4	0	6	6

Summary of Representations – main issues and suggested changes:

- Support for policy (Richborough, Vistry Group, Higgins Group, Hill Residential Group, Gladman)
- Add a commitment for the future review to be completed and adopted within five years to ensure a rolling up-to-date Local Plan (Richborough)
- A full review is always necessary over a focussed review (Hill Residential Ltd).

CCC response to the comments made
No changes have been made as the policy meets the necessary requirements and sets a date for a future review.

Where Will Development Growth be Focused?

This section of the consultation document provides the site policies for delivering the Spatial Strategy.

Section 7 – Where Will Development Growth be Focused? (Paragraph 7.1 to 7.6)

Consultation point	Yes	No	Comments	Total number of responses
Section 7 - Where Will Development Growth be Focused? (Paragraph 7.1 to 7.6)	0	0	3	3

Summary of Representations – main issues and suggested changes:

- Recommend policy wording relating to the capacity of water recycling centres is included in all site allocation policies (Environment Agency)
- Suggest adding reference to police facilities (Essex Police)
- Suggest change to the name of this area to better reflect its location (Dominus Chelmsford Limited).

CCC response to the comments made
Reference to the capacity of water recycling centres added to the relevant policies for affected sites at SGS7 and SGS10.
Plan text adjusted to refer to emergency services facilities.

Growth Area 1 – Central and Urban Chelmsford (paragraph 7.7-7.11 and Figure 16)

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Chelmsford Urban Area (paragraph 7.7 - 7.11 and Figure 16)	2	0	11	11

Summary of Representations – main issues and suggested changes:

- Support the approach to use brownfield land (Basildon Borough Council), the role of this area in the strategy (Gladman) and the opportunity for green/blue and natural infrastructure (Anglian Water Services Ltd)
- Suggest additional wording to ensure early discussions with developers (Anglian Water Services Ltd)
- Suggested wording changes to reflect education provision and delivery, and provision of bus services (Essex County Council)
- Additional site proposed for consideration for a co-living scheme (Highgate Capital Limited)
- Opposed to removal of car parks to allow for development

- Concern for the level of public service provision and securing promised infrastructure.

CCC response to the comments made
Support to using brownfield land noted.
Wording has been altered throughout Section 7 to clarify land and provision of primary and early years and childcare facilities, where this is a site policy requirement.
Contributions for bus services may not always be appropriate, depending on location, so this is covered through the requirement for development to maximise opportunities for active and sustainable travel for relevant site policies.
Plan is supported by an updated evidence base including an updated Infrastructure Delivery Plan.
Allocated sites are supported by the evidence base including Housing Capacity in Chelmsford City Centre and Urban Area. The NPPF promotes the use of brownfield sites for new homes and other identified needs and the car parks allocated in the Local Plan are promoted for redevelopment – no changes.

Location 1 – Chelmsford Urban Area (paragraph 7.12)

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Chelmsford Urban Area (paragraph 7.12)	0	0	1	1

Summary of Representations – main issues and suggested changes:

- Suggest wording changes to reflect opportunities for active and sustainable travel (Essex County Council).

CCC response to the comments made
Reference to active and sustainable travel has been included.

Strategic Growth Site Policy 1a - Chelmer Waterside

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Growth Site Policy 1a - Chelmer Waterside	4	0	9	9

Summary of Representations – main issues and suggested changes:

- Clarification sought on costs of any relocation and adequacy of width of waterside margin (Chelmsford Canoe Club)
- Suggest adding reference to police facilities (Essex Police)
- Early engagement will be required on sewer constraints (Anglian Water Services Ltd)

- Amend text to include a flood risk and management requirement and potential financial contributions (Environment Agency)
- Add reference to the role of multifunctional green infrastructure in water management (Essex County Council)
- The Cathedral School is at full capacity and would need to expand to meet demand, and a strategic approach is required (The Cathedral School)
- Additional site proposed for consideration in the allocation area, for co-living scheme (Highgate Capital Limited).

CCC response to the comments made
Reference added in the Reasoned Justification to the presence of a large diameter sewer through site CW1d.
The Policy and the Reasoned Justification have been adjusted to refer to facilities alongside infrastructure, and to police, ambulance and fire and rescue.
An additional bullet has been added for the requirement for financial contributions towards provision of a new lock and replacement weir gates.
Flood risk is covered within the Policy and at Para. 7.15.
CCC will continue to work closely with ECC as the Local Education Authority on the plan to ensure that education requirements are met.

Strategic Growth Site Policy 1w – Meadows Shopping Centre and Meadows Surface Car Park

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Strategic Growth Site Policy 1w – Meadows Shopping Centre and Meadows Surface Car Park	1	3	14	14

Summary of Representations – main issues and suggested changes:

- Additional text suggested in relation to education contributions, parking, pedestrian and cycle routes (Essex County Council)
- A Heritage Impact Assessment should be undertaken before the next consultation stage (Historic England)
- Amend text to include a flood risk and management requirement and potential financial contributions (Environment Agency)
- Suggest adding reference to police facilities (Essex Police)
- Consider sewer assets and easements, and the need for maintenance access, which should shape the layout (Anglian Water Services Ltd)
- Consider on-site health care facilities to meet growing needs (Mid and South Essex Integrated Care Board)
- Support allocation but propose greater development density and a higher number of homes (Dominus Chelmsford Limited)
- Do not agree with building homes here, it is not a sustainable option to demolish it

- Opposed to the removal of car parks to allow for development, and active travel should feature
- Concerns expressed about loss of shops and jobs, the centre has good occupancy and could be revamped for shopping
- Proposals for The Meadows should include health and education facilities.

CCC response to the comments made
Additional bullet added to the Policy and Reasoned Justification to require safeguarding of access for maintenance of foul and surface water drainage infrastructure, and the presence of a wastewater pumping station on the site.
Flood risk is covered within the Policy and through a link to Policy S10 at Para. 7.40.
Clarification made to bullet relating to loss of car parking, and enhancement of bus services.
An additional bullet has been added for the requirement for financial contributions towards provision of a new lock and replacement weir gates.
The Policy and Reasoned Justification adjusted to refer to facilities alongside infrastructure, and to police, ambulance and fire and rescue.
The site policy requires financial contributions to education provision and/or onsite provision of other community facilities including healthcare provision.
The site policy requires proposals to seek to retain an equivalent amount of commercial floorspace compared to the existing shopping centre.
Allocated sites are supported by the evidence base including Housing Capacity in Chelmsford City Centre and Urban Area. The NPPF promotes the use of brownfield sites for new homes and other identified needs and the car parks allocated in the Local Plan are promoted for redevelopment – no changes.

Strategic Growth Site Policy 1b – Former St Peter's College, Fox Crescent

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Growth Site Policy 1b – Former St Peter's College, Fox Crescent	1	0	9	9

Summary of Representations – main issues and suggested changes:

- Support for the policy requirement to provide or make financial contributions to sport, leisure and recreation facilities, and for commuted sums in lieu of loss of open space (Sport England)
- Add reference to police facilities (Essex Police)
- Add reference to specialised supported housing (Essex County Council)
- Change wording relating to how special schools are referred to (Essex County Council)
- Add additional text in relation to green infrastructure (Essex County Council).

CCC response to the comments made

The Policy and Reasoned Justification have been adjusted to refer to facilities alongside infrastructure, and to police, ambulance and fire and rescue.
An additional bullet has been added to outline the requirement for inclusion of 60 units of specialist residential housing.
Bullet 3 - the wording around special schools has been clarified.
Text added in relation to green infrastructure.

Strategic Growth Site Policy 1x – Former Kay Metzeler Premises, Brook Street

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Growth Site Policy 1x – Former Kay Metzeler Premises, Brook Street	2	0	7	7

Summary of Representations – main issues and suggested changes:

- The Cathedral School is at full capacity and would need to expand to meet demand, and a strategic approach is required (The Cathedral School)
- A Heritage Impact Assessment should be undertaken before the next consultation stage (Historic England)
- Add a reference to police facilities (Essex Police)
- Consider sewer assets and easements, and the need for maintenance access, which should shape the layout (Anglian Water Services Ltd)
- Add additional text in relation to green infrastructure and nature recovery networks (Essex County Council).

CCC response to the comments made
This site is no longer available for development and will not be allocated.

Strategic Growth Site Policy 1d – Riverside Ice and Leisure Land, Victoria Road

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Growth Site Policy 1d – Riverside Ice and Leisure Land, Victoria Road	2	0	11	11

Summary of Representations – main issues and suggested changes:

- The Cathedral School is at full capacity and would need to expand to meet demand, and a strategic approach is required (The Cathedral School)
- Amend text to include flood risk and management requirement and potential financial contributions (Environment Agency)
- Suggest adding reference to police facilities (Essex Police)

- Consider sewer assets and easements, and the need for maintenance access, which should shape the layout (Anglian Water Services Ltd)
- Add additional text in relation to pedestrian and cycle links, and active and sustainable travel (Essex County Council)
- Opposed to the removal of car parks to allow for development.

CCC response to the comments made
Additional bullet added to the Policy to require safeguarding of access for maintenance of foul and surface water drainage infrastructure, and the presence of a wastewater pumping station on the site.
Additional bullet added to the Policy to require provision of SuDs and flood risk management.
The Policy and Reasoned Justification have been adjusted to refer to facilities alongside infrastructure, and to police, ambulance and fire and rescue.
An additional bullet has been added for the requirement for financial contributions towards provision of a new lock and replacement weir gates.
CCC will continue to work closely with ECC as the Local Education Authority on the plan to ensure that education requirements are met.
Allocated sites are supported by the evidence base including Housing Capacity in Chelmsford City Centre and Urban Area. The NPPF promotes the use of brownfield sites for new homes and other identified needs and the car parks allocated in the Local Plan are promoted for redevelopment – no changes.

Strategic Growth Site Policy 1e – Civic Centre Land, Fairfield Road

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Growth Site Policy 1e – Civic Centre Land, Fairfield Road	0	0	5	5

Summary of Representations – main issues and suggested changes:

- Add reference to police facilities (Essex Police)
- Consider sewer assets and easements, and the need for maintenance access, which should shape the layout (Anglian Water Services Ltd)
- Add additional text in relation to active and sustainable travel, and Chelmsford Transport Interchange Project (Essex County Council)
- Opposed to the removal of car parks to allow for development.

CCC response to the comments made
Additional bullet added to the Policy to require safeguarding of access for maintenance of foul and surface water drainage infrastructure.
The Policy and Reasoned Justification have been adjusted to refer to facilities alongside infrastructure, and to police, ambulance and fire and rescue.
A proposed Chelmsford Transport Interchange Project is considered to be at too early a stage to be included in this iteration of the Plan.

Allocated sites are supported by the evidence base including Housing Capacity in Chelmsford City Centre and Urban Area. The NPPF promotes the use of brownfield sites for new homes and other identified needs and the car parks allocated in the Local Plan are promoted for redevelopment – no changes.

Strategic Growth Site Policy 1f – Eastwood House Car Park, Glebe Road

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Growth Site Policy 1f – Eastwood House Car Park, Glebe Road	0	0	5	5

Summary of Representations – main issues and suggested changes:

- Add additional text in relation to green infrastructure and nature recovery networks (Essex County Council)
- Consider sewer assets and easements, and the need for maintenance access, which should shape the layout (Anglian Water Services Ltd)
- Add reference to police facilities (Essex Police)
- Opposed to the removal of car parks to allow for development.

CCC response to the comments made
Additional bullet added to the Policy to require safeguarding of access for maintenance of foul and surface water drainage infrastructure.
The Policy and Reasoned Justification have been adjusted to refer to facilities alongside infrastructure, and to police, ambulance and fire and rescue.
Text added in relation to green infrastructure.
Allocated sites are supported by the evidence base including Housing Capacity in Chelmsford City Centre and Urban Area. The NPPF promotes the use of brownfield sites for new homes and other identified needs and the car parks allocated in the Local Plan are promoted for redevelopment – no changes.

Strategic Growth Site Policy 1y – Land Between Hoffmanns Way and Brook Street (Marriages Mill)

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Growth Site Policy 1y – Land Between Hoffmanns Way and Brook Street (Marriages Mill)	2	0	5	5

Summary of Representations – main issues and suggested changes:

- Add additional text in relation to green infrastructure and nature recovery networks (Essex County Council)

- Add reference to police facilities (Essex Police)
- Include reference to removal of modern buildings and retaining a link to the nearby Grade II listed Marconi 1912 Building (Historic England)
- The Cathedral School is at full capacity and would need to expand to meet demand, and a strategic approach is required (The Cathedral School).

CCC response to the comments made
The Policy and Reasoned Justification have been adjusted to refer to facilities alongside infrastructure, and to police, ambulance and fire and rescue.
Text added in relation to green infrastructure.
Bullets under 'historic and natural environment' amended to include the requirement for the removal of modern buildings, and retaining a visual link with the 1912 Building.
CCC will continue to work closely with ECC as the Local Education Authority on the plan to ensure that education requirements are met.

Policy GR1 – Growth Sites in Chelmsford City Centre/Urban Area

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Policy GR1 – Growth sites in Chelmsford City Centre/Urban Area	2	0	10	10

Summary of Representations – main issues and suggested changes:

- Support for requirements to make contributions towards new/enhanced sport, leisure and recreation facilities (Sport England)
- Add additional text in relation to active and sustainable travel, and additional bullet for sites to enhance existing pedestrian and cycle routes (Essex County Council)
- Add additional text in relation to green infrastructure and nature recovery networks (Essex County Council)
- Sustainable drainage systems should be a consideration on all proposed development sites, and aligned with green and blue infrastructure provision wherever possible (Anglian Water Services Ltd)
- Add reference to police facilities (Essex Police)
- Concerned about traffic generation in the City Centre, public transport, sustainable travel and car clubs should be considered
- Other sites could also be considered such as Andrews Place (Chelmer Housing Partnership (CHP)).

CCC response to the comments made
Policy amended to include the requirement for suitable SuDS and flood risk management.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.

The Policy and Reasoned Justification have been adjusted to refer to facilities alongside infrastructure, and to police, ambulance and fire and rescue.
Text added in relation to active and sustainable travel.
Text added in relation to green infrastructure.

Growth Site Policy 1g – Chelmsford Social Club, Springfield Road

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Site Policy 1g – Chelmsford Social Club, Springfield Road	0	0	0	0

CCC response to the comments made
No changes.

Growth Site Policy 1h – Ashby House Car Parks, New Street

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Site Policy 1h – Ashby House Car Parks, New Street	0	0	1	1

Summary of Representations – main issues and suggested changes:

- Opposed to the removal of car parks to allow for development.

CCC response to the comments made
Allocated sites are supported by the evidence base including Housing Capacity in Chelmsford City Centre and Urban Area. The NPPF promotes the use of brownfield sites for new homes and other identified needs and the car parks allocated in the Local Plan are promoted for redevelopment – no changes.

Growth Site Policy 1i – Rectory Lane Car Park West

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Site Policy 1i – Rectory Lane Car Park West	0	0	1	1

Summary of Representations – main issues and suggested changes:

- Opposed to the removal of car parks to allow for development.

CCC response to the comments made
Allocated sites are supported by the evidence base including Housing Capacity in Chelmsford City Centre and Urban Area. The NPPF promotes the use of brownfield sites for new homes and other identified needs and the car parks allocated in the Local Plan are promoted for redevelopment – no changes.

Growth Site Policy 1z – Granary Car Park, Victoria Road

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Site Policy 1z – Granary Car park, Victoria Road	2	3	8	8

Summary of Representations – main issues and suggested changes:

- A Heritage Impact Assessment should be undertaken due to proximity to Grade II listed Springfield Water Mill (Historic England)
- The Cathedral School is at full capacity and would need to expand to meet demand, and a strategic approach is required (The Cathedral School)
- Scale of development should be much more modest due to its location, such as a small terrace to mirror existing nearby houses
- Retain site as City open space; this natural open space should be protected
- Concerns about increased strain on local infrastructure including education
- Previous proposals have not been financially viable
- Opposed to the removal of car parks to allow for development; it is a very important and convenient car park for the nearby hotel, sports events, shopping.

CCC response to the comments made
Bullet 7 amended to include layout, height and design considerations to reduce visual impact on the setting of the Grade II listed Springfield Water Mill.
The site is informed by a Heritage Impact Assessment published alongside the Preferred Options Consultation Document.
The plan is informed by a wide range of evidence base reports including an updated Infrastructure Delivery Plan, Viability Assessment, Housing Capacity in Chelmsford City Centre and Urban Area and Open Space Assessment.
CCC will continue to work closely with ECC as the Local Education Authority on the plan to ensure that education requirements are met.
Allocated sites are supported by the evidence base including Housing Capacity in Chelmsford City Centre and Urban Area. The NPPF promotes the use of brownfield sites for new homes and other identified needs and the car parks allocated in the Local Plan are promoted for redevelopment – no changes.

Growth Site Policy 1k – Former Chelmsford Electrical and Car Wash, Brook Street

No comments.

CCC response to the comments made
No changes. However, the site policy has been updated to reflect that a planning application has been submitted.

Growth Site Policy 1aa – Coval Lane Car Park

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Site Policy 1aa – Coval Lane Car Park	0	1	4	4

Summary of Representations – main issues and suggested changes:

- Scale of development should be much more modest to be in keeping with surrounding development
- Concerns about increased traffic from new development
- Development should be conditional on provision of a further Park and Ride site at Widford
- Opposed to the removal of car parks to allow for development; loss of parking may impact on West End businesses; there is not enough on-street parking to accommodate the local residents' needs
- Cumulative effect of other nearby development should be considered including office to housing conversions at Paragon House.

CCC response to the comments made
The consequential change of adding SuDS and flood risk management to the over-arching Policy GR1 means that the bullet is deleted from this policy.
The plan is informed by a wide range of evidence base reports including an updated Infrastructure Delivery Plan, Viability Assessment, Transport Modelling, Housing Capacity in Chelmsford City Centre and Urban Area and Open Space Assessment.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
Policy S9 states that additional Park and Ride facilities will be considered in West Chelmsford.
Site policy already requires the development character, scale and layout to have regard and respond to the site's surrounding context.

Allocated sites are supported by the evidence base including Housing Capacity in Chelmsford City Centre and Urban Area. The NPPF promotes the use of brownfield sites for new homes and other identified needs and the car parks allocated in the Local Plan are promoted for redevelopment – no changes.

- Add reference to providing a safe and convenient pedestrian link (Essex County Council).

CCC response to the comments made
Reference to safe and convenient pedestrian access added.

Growth Site Policy 1bb – Glebe Road Car Park

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Site Policy 1bb – Glebe Road Car Park	0	1	3	3

Summary of Representations – main issues and suggested changes:

- A Heritage Impact Assessment should be undertaken due to location in the West End Conservation Area (Historic England)
- Opposed to the removal of car parks to allow for development; this is the only overnight car park; there is already not enough parking for local residents
- Concern that overlooking and noise will be an issue.

CCC response to the comments made
The consequential change of adding SuDS and flood risk management to the over-arching Policy GR1 means that the bullet is deleted from this policy.
Bullet 4 amended to define the local context of 2-3 storeys, and that services should be screened from the streetscene.
The site is informed by a Heritage Impact Assessment published alongside the Preferred Options Consultation Document.
Allocated sites are supported by the evidence base including Housing Capacity in Chelmsford City Centre and Urban Area. The NPPF promotes the use of brownfield sites for new homes and other identified needs and the car parks allocated in the Local Plan are promoted for redevelopment – no changes.
Policy DM29 requires development proposals to not be overbearing or result in result in excessive noise.

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Site Policy 1u – Rivermead, Bishop Hall Lane	0	0	1	1

Summary of Representations – main issues and suggested changes:

- Add reference to provision of new bridges for safe and convenient connections to the pedestrian and cycle network (Essex County Council).

CCC response to the comments made

The site has been built-out as is therefore deleted from the plan.

Growth Site Policy 1v – Railway Sidings, Brook Street

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Site Policy 1v – Railway Sidings, Brook Street	0	0	1	1

Summary of Representations – main issues and suggested changes:

- Add reference to provision of safe and convenient pedestrian and cycle routes (Essex County Council).

CCC response to the comments made
Reference to safe and convenient pedestrian and cycle access added.

Location 2 – West Chelmsford

Strategic Growth Site Policy 2 – West Chelmsford

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Growth Site Policy 2 – West Chelmsford	3	2	20	20

Summary of Representations – main issues and suggested changes:

- Add reference to ‘multifunctional’ green infrastructure to ensure consistency throughout the Plan (Essex County Council)
- Minor policy change suggested to reflect the provision of a primary school and early years nursery (Essex County Council)
- Add reference to active and sustainable modes of transport, where alternatives to the private car are prioritised, and financial contributions towards bus services (Essex County Council)
- Provide safe and convenient pedestrian and cycle connections, links to the urban area and accessibility for bus services (Essex County Council)
- Provide a safe traffic free environment around school pedestrian entrances having regard to the requirements set out in ECC’s Developers’ Guide to Infrastructure Contributions (Essex County Council)
- Support for requirements to make contributions towards new/enhanced sport, leisure and recreation facilities, and inclusion of these facilities in the masterplan (Sport England)
- Add reference to police facilities (Essex Police)

- Concerns of the impact from development on local services such as Writtle GP surgery (Good Easter Parish Council)
- Unclear what healthcare provision is envisaged as part of the proposed neighbourhood centre; a new GP surgery could be provided here (Good Easter Parish Council)
- Concerns about the potential traffic impact on Roxwell Road/A1060, a proportion of the traffic should be able to use Chignall Road via Trent Road/Avon Road (Good Easter Parish Council)
- The proposed multi-user crossing will cause further congestion, although its purpose and intended users is not clear (Good Easter Parish Council)
- Buses will be delayed by traffic queues without space to provide a bus lane
- The commitment to CIL funding is welcome, and assurance is sought that this will not change in future (Writtle Parish Council).

CCC response to the comments made
Text relating to provision of education has been updated to reflect ECC requirements, and types of provision have been clarified.
Reference to traffic free environments around school entrances are considered too detailed for the Policy but would be dealt with at masterplanning or planning application stage.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
Provision of a new stand-alone early years and childcare nursery removed from supporting on-site development and site infrastructure requirements to reflect latest ECC position regarding need.
Requirement for pedestrian and cycle connections expanded to ensure these are ‘safe and convenient’.
Additional requirements for a ‘new dedicated pedestrian and cycle links to the existing urban area’ and the need to ‘provide well-connected and integrated internal road layouts which allow good accessibility for bus services’ added to policy to reflect the removal of a bus link via Avon Road.
Policy and Reasoned Justification updated to expand reference to ‘multifunctional’ green infrastructure to ensure consistency across the Plan.
Policy and Reasoned Justification updated to expand reference to ‘active and’ sustainable transport to ensure consistency across the Plan.
Site infrastructure requirements updated to include reference to Police, ambulance and fire and rescue facilities.
The necessary contributions to healthcare are covered by site infrastructure requirements. Full details of what these may be will be informed through the planning application process and advice of NHS Mid and South Essex Integrated Care Board.

<u>Location 3 – East Chelmsford</u>

<u>Strategic Growth Site Policy 3a – East of Chelmsford, Manor Farm</u>

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**

Strategic Growth Site Policy 3a – East of Chelmsford, Manor Farm	2	1	16	16

Summary of Representations – main issues and suggested changes:

- Support policy requirements including for development to provide or make financial contributions to new or enhanced sport, leisure and recreational facilities (Sport England)
- Add to policy requirements for a foul drainage strategy and SuDs as part of a multifunctional green and blue infrastructure delivery framework should an alternative development strategy be taken forward for this site (Anglian Water Services Ltd)
- Support the allocation ((Hopkins Homes Ltd)
- Para. 7.135 – The site has no existing or planned access for horse riders and any proposals could conflict with the residential area and country park users (Hopkins Homes Ltd)
- Do not support Para. 7.141 - Requirement for a Minerals Resource Assessment is inconsistent with Policy S8 of the Minerals Local Plan which exempts land already allocated in adopted plans (Hopkins Homes Ltd)
- Ensure any need for minerals extraction is factored into the housing trajectory to allow for the potential delays to delivery (Hopkins Homes Ltd)
- In absence of any justification, with reference to the CIL Regulations, delete the requirement to fund the creation of a visitors' centre at Sandford Mill (Hopkins Homes Ltd)
- Requirements for financial contributions for education, community and healthcare, sports, leisure and recreation duplicate S9 and S10. If retained in the policy, amend to state that contributions will be “appropriate and proportionate” (Hopkins Homes Ltd)
- A new plan policy is required to address the cumulative recreational pressure on Blakes Wood and Lingwood Common SSSI, Woodham Walter Common SSSI, Danbury Common SSSI and other wildlife sites from increased levels of recreational pressure arising from the new residents at Growth Sites 16a, 3a and 13 (Natural England)
- Add to SGS3a and d policies that active travel connections should be to existing and proposed development areas within East of Chelmsford and at East Chelmsford Garden Community (Wates Developments and Hammonds Estates LLP)
- Expand SGS3a and d to require appropriate measures to enable public transport access to and from the site, and to ensure public transport strategy proposals integrate with existing and proposed development areas within East Chelmsford and at the East Chelmsford Garden Community (Wates Developments and Hammonds Estates LLP)
- Amend Historic and Natural Environment, bullet 4 to refer to ‘multifunctional’ green infrastructure (Essex County Council)
- Amend Movement and Access bullet to refer to ‘safe and convenient’ pedestrian and cycle connections (Essex County Council)

- Amend Site infrastructure requirements bullet 7 to 'Provision of a new northwest safe and convenient pedestrian/cycle link through the Country Park to provide a connection to future off-site cycle links.' (Essex County Council)
- For consistency with other parts of the plan refer to `active and sustainable travel' in para. 1 of the policy (Essex County Council)
- Object to site for multiple reasons including potential contamination of land, flood risk, housing density and positioning, education and medical care, biodiversity and traffic impacts (Great Baddow Parish Council)
- Under 'Site infrastructure requirements' expand bullet point 10 to refer to police facilities as required by Essex Police (Essex Police)
- Support proposal to improve the cycle crossing of the River Chelmer at Sandon Mill (Cycling UK)
- Include requirement for a more direct cycle route to the city centre which follows Essex Yeomanry Way to the Army and Navy (Cycling UK)
- It appears that the extension to Sandon Park and Ride is now intended to serve Hammonds Farm development
- The SGS3a masterplan should consider pollution sampling from the former nearby landfill site and the nuclear bunker
- The Local Plan is undermined by speculative applications such as the proposed warehouse development at Sandon
- There aren't enough trained professionals to staff the new infrastructure needed e.g. schools
- Unsustainable to build new homes close to the flood plain adjacent to the Army and Navy
- Proposed new developments will increase flooding potential.

CCC response to the comments made
Policy S9 already requires developments to provide foul drainage infrastructure.
The site policy already requires flood mitigation measures including SuDS.
Various site policy adjustments have been made including deletion of horse-riding reference as there are no existing or planned access points for horse riders; new requirements to address the cumulative recreational pressure on nearby SSSIs; new requirement for multifunctional green infrastructure; new requirements for active and sustainable travel and connections with East Chelmsford Garden Community and, new requirement for financial contributions towards Police, ambulance and fire and rescue facilities.
Requirements for financial contributions are informed by the plan evidence base including the updated Infrastructure Delivery Plan.
A Minerals Resource Assessment remains a policy requirement.
The plan is informed by a wide range of evidence including a Strategic Flood Risk Assessments and Sequential and Exception Testing.
The Council cannot prevent planning applications from being submitted.
The site already has an approved masterplan.
The site policy already requires safe and convenient pedestrian and cycle connections.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.

Strategic Growth Site Policy 3b – East of Chelmsford, Land North of Maldon Road (Employment)

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Growth Site Policy 3b – East of Chelmsford, Land North of Maldon Road (Employment)	0	0	10	10

Summary of Representations – main issues and suggested changes:

- Expand policy to require the development to prepare a strategy for responding to the National Grid Electricity Transmission plc (NGET) overhead transmission lines within the site which demonstrates how the NGET Design Guide and Principles have been applied at the masterplanning stage and how the impact of the assets has been reduced through good design (National Grid Electricity Transmission)
- Under 'Site infrastructure requirements' expand bullet point 5 to refer to police facilities as required by Essex Police (Essex Police)
- Replace Site Infrastructure Requirements, bullet 1 with 'New 56 place stand-alone early years and childcare nursery (Use Class E(f)) on 0.13 hectares of suitable land allocated for education and childcare use (Essex County Council)
- Support allocation (Redrow Homes & Speakman Family)
- Amend Movement and Access bullet 3 to refer to 'safe and convenient' pedestrian and cycle connections (Essex County Council)
- Amend para. 7.151 to refer to 'safe and convenient cycle/footway' (Essex County Council)
- Amend Historic and Natural Environment, bullet 3 to refer to 'multifunctional' green infrastructure (Essex County Council).

CCC response to the comments made
Various site policy adjustments have been made including a new requirement to prepare a strategy for responding to the National Grid Electricity Transmission plc (NGET) overhead transmission lines; revised requirement for a 56 place stand-alone early years and childcare nursery; new requirement for multifunctional green infrastructure, and new requirements for active and sustainable travel connections and, new requirement for financial contributions towards Police, ambulance and fire and rescue facilities.

Strategic Growth Site Policy 3c – East of Chelmsford, Land South of Maldon Road

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses

Strategic Growth Site Policy 3c – East of Chelmsford, Land South of Maldon Road	0	0	5	5

Summary of Representations – main issues and suggested changes:

- Amend Movement and Access bullet 3 to refer to ‘safe and convenient’ pedestrian and cycle connections (Essex County Council)
- Given that SGS3c and SGS3d are at planning application stage, the policy should not include additional infrastructure requirements e.g., a Pegasus crossing unless some flexibility is given (Redrow Homes & Speakman Family)
- Support allocation, but expand the site allocation (Redrow Homes & Speakman Family)
- Object to site for multiple reasons including potential contamination of land, flood risk, housing density and positioning, education and medical care, biodiversity and traffic impacts (Great Baddow Parish Council).

CCC response to the comments made
Various site policy adjustments have been made including new requirements for safe and convenient pedestrian and cycle connections.
It is right that the site policy has been updated since the adoption of the Local Plan. Requirements are informed by the plan evidence base including the IDP.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
Objections to the site are noted. The plan allocation is rolled over from the adopted plan and is supported by evidence. Matters such as housing positioning are considered at planning application stage.

Strategic Growth Site Policy 3d – East of Chelmsford, North of Maldon Road

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Strategic Growth Site Policy 3d – East of Chelmsford, North of Maldon Road	0	0	6	6

Summary of Representations – main issues and suggested changes:

- Amend Movement and Access bullet 3 to refer to ‘safe and convenient’ pedestrian and cycle connections (Essex County Council)
- Amend para. 7.176 to read 'A safe and convenient cycle/footway should connect the site to Sandon Park and Ride to the east to maximise use of the existing Park and Ride site (Essex County Council)
- Amend Historic and Natural Environment, bullet 3 to refer to ‘multifunctional’ green infrastructure (Essex County Council)

- Support allocation but given that SGS3c and SGS3d are at planning application stage, the policy should not include additional infrastructure requirements e.g., a Pegasus crossing unless some flexibility is given (Redrow Homes & Speakman Family).

CCC response to the comments made
Various site policy adjustments have been made including requirements for safe and convenient cycle/footway connections and multifunctional green infrastructure.
It is right that the site policy has been updated since the adoption of the Local Plan. Requirements are informed by the plan evidence base including the IDP.

Location 4 – Growth Site Policy 4 – Land North of Galleywood Reservoir

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Site Policy 4 – Land North of Galleywood Reservoir	0	0	4	4

Summary of Representations – main issues and suggested changes:

- For consistency with other parts of the plan, strengthen references to active travel in policy and para 7.190 (Essex County Council)
- Policy text should require multifunctional green infrastructure (Essex County Council).
- The viability and deliverability of this site is questioned as it has been allocated for over four years (Park View Group).

CCC response to the comments made
Policy adjustments include strengthened requirements for safe and convenient pedestrian and cycle connections and to provide multifunctional green infrastructure.
The site has planning permission and is expected to be delivered between 2025 and 2026.

Location 5 – Growth Site Policy 5 – Land Surrounding Telephone Exchange, Ongar Road, Writtle

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Site Policy 5 – Land Surrounding Telephone Exchange, Ongar Road, Writtle	1	0	4	4

Summary of Representations – main issues and suggested changes:

- Support allocation. The site is expected to be surplus to operational requirements (as a telephone exchange) by 2031. Adjust boundary to fully reflect our land ownership and ensure deliverability (Telereal Securitised Property GP Limited)
- Use a minimum or indicative capacity of 25 to enable a future planning application to determine the exact quantum, layout, form, mix and tenure of new homes (Telereal Securitised Property GP Limited)
- Amend policy to enable a future planning application to be informed by an arboricultural impact assessment with regards to the potential retention of trees on site (Telereal Securitised Property GP Limited)
- Policy text in relation to infrastructure requirements should be modified to be appropriate and proportionate (Telereal Securitised Property GP Limited)
- For consistency with other policies, amend to strengthen references to active travel (Essex County Council)
- Split bullet 1 under Site Development Principles into two for consistency with other site policies (Essex County Council)
- Policy text should require multifunctional green infrastructure (Essex County Council).

CCC response to the comments made
Site boundary has been reduced to reflect the land promoted for development.
The use of the 'around' housing figure would allow for a higher density development to be brought forward where this conforms with other policies in the Plan as a whole.
Various site policy adjustments have been made including requirements for safe and convenient cycle/footway connections, to provide multifunctional green infrastructure, to provide new and enhanced cycle routes and footpaths where appropriate, and to include reference to an arboricultural impact assessment.

Growth Area 2 – North Chelmsford (paragraphs 7.200-7.205 and Figure 17)

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Growth Area 2 – North Chelmsford (paragraphs 7.200-7.205 and Figure 17)	2	1	9	9

Summary of Representations – main issues and suggested changes:

- Support for the importance of North East Chelmsford and Chelmsford Garden Community in delivering significant levels of growth (Cliffords Group Ltd, Daniel James Developments)
- Support for inclusion of Little Boyton Hall (C J H Farming Ltd)
- Excluding development at Boreham is a missed opportunity (Gladman)

- There is currently no right of way through the Green Wedge from Broomfield, so reference to this should be removed (Broomfield Parish Council).

CCC response to the comments made
It is appropriate to retain the reference to using the Green Wedge for sustainable travel to reflect local aspirations for active travel connectivity.
Figures have been updated to reflect the revised Spatial Strategy.
Development in Boreham village has been considered but rejected due to for example, the impact on the local road network and landscape capacity and sensitivity concerns.

Location 6 – North East Chelmsford (Chelmsford Garden Community)

Strategic Growth Site Policy 6 – North East Chelmsford (Chelmsford Garden Community)

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Growth Site 6 – North East Chelmsford Garden Community	7	0	31	31

Summary of Representations – main issues and suggested changes:

- Support for the policy (Cliffords Group Ltd, Hallam Land Management)
- Support the policy subject to detailed proposed amendments to wording including replacing 20% biodiversity with 10%, and replacing a new Country Park with three new destination parks and (Vistry Group, Chelmsford Garden Community Consortium)
- Support for measures to encourage physical activity and new or enhanced sport, leisure and recreation facilities (Sport England)
- Support for the inclusion of a country park and green infrastructure, and 20% BNG (Natural England)
- An assessment of what is being provided as suitable alternative natural greenspace is needed (Natural England)
- The distinction between public green spaces and wildlife habitats could be made, with greater focus on integrating biodiversity rather than segregation; planting and biodiversity features should use native species; and would like riparian corridors to maintain a buffer zone for public space rather than private gardens (Environment Agency)
- Ensure that sufficient flood risk measures are incorporated and, where possible, as part of multi-functional green and blue infrastructure; and nature based solutions to provide environmental gains, rather than carbon intensive ‘grey infrastructure’ mitigation (Anglian Water Services Ltd)
- Refer to ‘multifunctional’ green infrastructure to ensure consistency throughout the Plan (Essex County Council)
- Make a reference to active and sustainable travel (Essex County Council)

- Strengthen the supporting text to reference the importance of the innovation park, the critical success factors needed, skills and the employment mix (Essex County Council)
- Clarify the wording relating to the quantity and type of education provision (Essex County Council)
- Provide a safe traffic free environment around school pedestrian entrances having regard to the requirements set out in ECC's Developers' Guide to Infrastructure Contributions (Essex County Council)
- Policy should require renewable and low carbon energy schemes, rather than just encourage them (Essex County Council)
- Stewardship principles are supported. Add additional bullets requiring stewardship activities to be in place for the first housing occupations and for an Asset Schedule of ownership and responsibility for community assets to be prepared (Essex County Council)
- Add to the end of para. 7.216 "Appropriate funding will also need to be made for police facilities to provide for community safety, cohesion and policing as required by Essex Police." (Essex Police)
- Ten Gypsy and Traveller plots have already been provided through the adopted Local Plan; there is now sufficient provision within this community, and it would be desirable to consider locations elsewhere (Chelmsford Garden Community Council)
- Additional land proposed at Domsey Lane, Cranham Road, and Wheelers Hill (Daniel James Developments, Hallam Land Management).

CCC response to the comments made
The Policy and Reasoned Justification have been adjusted to refer to facilities alongside infrastructure, and to police, ambulance and fire and rescue.
Text relating to provision of education has been updated to reflect ECC requirements, and types of provision have been clarified. Reference to traffic free environments around school entrances are considered too detailed for the Policy but would be dealt with at masterplanning or planning application stage.
The distinction between public green spaces and wildlife habitats is now covered by updates to Policy DM16; but has also been added to the Reasoned Justification for this policy.
Policy amended to include reference to capacity for wastewater treatment and disposal, and safeguarding of access for the maintenance of foul and surface water drainage infrastructure.
References to safe and convenient travel have been included.
Reference to multifunctional green infrastructure has been added.
The references to country parks have been replaced with Destination Parks.
Stewardship requirements have been clarified, but an asset schedule will be part of stewardship arrangements and does not need to be included in the Policy.
Travelling Showpeople provision is now required instead of Gypsy and Traveller provision, in line with the revised Spatial Strategy.
Referring to only 10% BNG for new Garden Communities would be inconsistent with Policy DM16, which requires 20% BNG on these sites. The Local Plan is supported by the plan evidence base including an updated Viability Assessment.
A number of initiatives are underway in relation to employment uses and labour and skills, the suggested amendments are considered too detailed for this Policy.

The encouragement of appropriate development of renewable, low carbon and decentralised energy schemes within the site policy has been amended to state where these are deliverable and do not give rise to environmental or other amenity impacts. However, this remains something that will be encouraged and not required as there is insufficient evidence or policy to require this on site.

Location 7 – Great Leighs

Strategic Growth Site Policy 7a – Great Leighs – Land at Moulsham Hall

Consultation point	Yes	No	Comments	Total number of responses
Strategic Growth Site 7a – Great Leighs – Land at Moulsham Hall	2	3	19	19

Summary of Representations – main issues and suggested changes:

- Support for the policy (Environment Agency)
- Policy requirement to provide or make financial contributions to new or enhanced sport, leisure and recreational facilities is welcomed (Sport England)
- Policy change suggested to reflect Essex Police (Essex Police)
- Make reference to 'multifunctional' green infrastructure to ensure consistency throughout the Plan (Essex County Council)
- Policy change suggested to clarify wording for the primary school provision and childcare facilities (Essex County Council)
- Provide additional safe and convenient pedestrian and cycle connections to Great Leighs village, and ensure good accessibility for buses (Essex County Council)
- Add a reference to active and sustainable travel (Essex County Council)
- Provide a safe traffic free environment around school pedestrian entrances having regard to the requirements set out in ECC's Developers' Guide to Infrastructure Contributions (Essex County Council)
- There are woodlands on or in proximity to several allocations including those at Great Leighs, including Ancient Semi Natural Woodland, Plantations on Ancient Woodland Sites and Priority Habitat Woodland. Decisions should be made in line with paragraph 186 (c) of the NPPF. Council is also referred to information in Natural England and Forestry Commission's Standing Advice on Ancient Woodland (Forestry Commission England)
- Phasing conditions may be needed to align development with Anglian Water's investment plans (Environment Agency)
- The policy does not mention the site location is within the RAMS zone of influence, meaning that an assessment of suitable alternative natural greenspace may be needed (Natural England)
- Clarify wording in relation to the capacity of Great Leighs Water Recycling Centre (Anglian Water)
- Further land is promoted adjacent to the site (Harris Strategic Land Ltd)

- The policy should include a clear requirement for buffer habitat to protect the Essex Wildlife Trust Phyllis Currie Nature Reserve and a financial contribution towards mitigating increased recreational impacts (Essex Wildlife Trust).

CCC response to the comments made
Policy wording has been amended to clarify the requirement for sufficient wastewater capacity and disposal. This leaves the reference to phasing conditions, and further references to constraints, as unnecessary.
Text relating to provision of education has been updated to reflect ECC requirements, and types of provision have been clarified. Reference to traffic free environments around school entrances are considered too detailed for the Policy but would be dealt with at masterplanning or planning application stage.
Requirement for pedestrian and cycle connections expanded to ensure these are 'safe and convenient'.
Policy and Reasoned Justification updated to expand reference to 'multifunctional' green infrastructure to ensure consistency across the Plan.
Policy and Reasoned Justification updated to expand reference to 'active and' sustainable transport to ensure consistency across the Plan.
Site infrastructure requirements updated to include reference to Police, ambulance and fire and rescue facilities.
The requirement for a habitat buffer is already covered by the Policy and Reasoned Justification.
The requirement for RAMS contributions has been removed from all site policies and is covered by Policy S4 and DM16. Policy S4, S9 and DM16 collectively cover an updated requirement for relevant major developments to provide suitable alternative and accessible natural greenspace on-site, in addition to financial contributions in accordance with the adopted RAMS Supplementary Planning Document – no change considered necessary to the site policy.
Policies S4 and DM17 protects sites of international, national, regional and local nature conservation importance including Ancient Woodlands.

Strategic Growth Site Policy 7b – Great Leighs – Land East of London Road

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Strategic Growth Site 7b – Great Leighs – Land East of London Road	0	0	12	12

Summary of Representations – main issues and suggested changes:

- Add a reference to active and sustainable travel, and that bus enhancements should be funded by the developer (Essex County Council)
- Provide additional safe and convenient pedestrian and cycle connections to Great Leighs village, especially for older persons (Essex County Council)
- Add reference to 'multifunctional' green infrastructure to ensure consistency throughout the Plan (Essex County Council)
- Seek clarification on the affordable housing and specialist residential accommodation mix (Essex County Council)

- Policy changes suggested to reflect Essex Police (Essex Police)
- There are woodlands on or in proximity to several allocations including those at Great Leighs, including Ancient Semi Natural Woodland, Plantations on Ancient Woodland Sites and Priority Habitat Woodland. Decisions should be made in line with paragraph 186 (c) of the NPPF. Council is also referred to information in Natural England and Forestry Commission's Standing Advice on Ancient Woodland (Forestry Commission England)
- Phasing conditions may be needed to align development with Anglian Water's investment plans (Environment Agency)
- Clarify wording in relation to the capacity of Great Leighs water recycling centre (Anglian Water)
- The policy does not mention the site location is within the RAMS zone of influence, meaning that an assessment of suitable alternative natural greenspace may be needed (Natural England).

CCC response to the comments made
Policy wording has been amended to clarify the requirement for sufficient wastewater capacity and disposal. This leaves the reference to phasing conditions, and further references to constraints, as unnecessary.
Requirement for pedestrian and cycle connections expanded to ensure these are 'safe and convenient'.
Policy and reasoned Justification updated to expand reference to 'multifunctional' green infrastructure to ensure consistency across the Plan.
Site infrastructure requirements updated to include reference to Police, ambulance and fire and rescue facilities.
Policy and reasoned Justification updated to expand reference to 'active and' sustainable transport to ensure consistency across the Plan.
The policy sets out that the site will be required to provide affordable housing - no change considered necessary to the site policy.
The requirement for RAMS contributions has been removed from all site policies and is covered by Policy S4 and DM16. Policy S4, S9 and DM16 collectively cover an updated requirement for relevant major developments to provide suitable alternative and accessible natural greenspace on-site, in addition to financial contributions in accordance with the adopted RAMS Supplementary Planning Document – no change considered necessary to the site policy.
Policies S4 and DM17 protects sites of international, national, regional and local nature conservation importance including Ancient Woodlands.

Strategic Growth Site Policy 7c – Great Leighs – Land North and South of Banters Lane

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Strategic Growth Site 7c – Great Leighs – Land North and South of Banters Lane	0	1	13	13

Summary of Representations – main issues and suggested changes:

- Support for the allocation (Landvest and Harding Homes)
- Add a reference to active and sustainable travel, and that bus enhancements should be funded by the developer (Essex County Council)
- Provide additional safe and convenient pedestrian and cycle connections to Great Leighs village, especially for older persons (Essex County Council)
- Add a reference to 'multifunctional' green infrastructure to ensure consistency throughout the Plan (Essex County Council)
- Policy change suggested to reflect Essex Police (Essex Police)
- There are woodlands on or in proximity to several allocations including those at Great Leighs, including Ancient Semi Natural Woodland, Plantations on Ancient Woodland Sites and Priority Habitat Woodland. Decisions should be made in line with paragraph 186 (c) of the NPPF. Council is also referred to information in Natural England and Forestry Commission's Standing Advice on Ancient Woodland (Forestry Commission England)
- Clarify wording in relation to the capacity of Great Leighs Water Recycling Centre (Anglian Water)
- Phasing conditions may be needed to align development with Anglian Water's investment plans (Environment Agency)
- The policy does not mention the site location is within the RAMS zone of influence, meaning that an assessment of suitable alternative natural greenspace may be needed (Natural England).

CCC response to the comments made
Policy wording has been amended to clarify the requirement for sufficient wastewater capacity and disposal. This leaves the reference to phasing conditions, and further references to constraints, as unnecessary.
Requirement for pedestrian and cycle connections expanded to ensure these are 'safe and convenient'.
Policy and reasoned Justification updated to expand reference to 'multifunctional' green infrastructure to ensure consistency across the Plan.
Site infrastructure requirements updated to include reference to Police, ambulance and fire and rescue facilities.
Policy and reasoned Justification updated to expand reference to 'active and' sustainable transport to ensure consistency across the Plan.
Reasoned Justification amended to include any enhancements to bus services required to support the site needing to be funded by the developer.
The requirement for RAMS contributions has been removed from all site policies and is covered by Policy S4 and DM16. Policy S4, S9 and DM16 collectively cover an updated requirement for relevant major developments to provide suitable alternative and accessible natural greenspace on-site, in addition to financial contributions in accordance with the adopted RAMS Supplementary Planning Document – no change considered necessary to the site policy.
Policies S4 and DM17 protects sites of international, national, regional and local nature conservation importance including Ancient Woodlands.

<u>Location 8 – Strategic Growth Site Policy 8 – North of Broomfield</u>

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Location 8 – Strategic Growth Site Policy 8 – North of Broomfield	7	0	33	33

Summary of Representations – main issues and suggested changes:

- Requirement to provide or make financial contributions to new or enhanced sport, leisure and recreational facilities and providing a coherent network of public open space, formal and informal sport, recreation and community space within the site is welcomed (Sport England)
- Address the missing link between Goulton Road and the start of the segregated cycle tracks on Broomfield Road as the current situation is a major barrier to active travel between the site and the city centre (Cycling UK)
- Need more religious facilities/community spaces including for Muslim population in North Chelmsford (Essex Muslim Centre)
- Policy change suggested to add ‘and police facilities as required by Essex Police’ (Essex Police)
- Refer to a robust traffic strategy for the local road network, in lieu of the hospital access road and to add flexibility about how the new health care facility could be achieved (Broomfield Parish Council)
- For consistency with other parts of the plan, strengthen references to active travel and refer to ‘safe and convenient’ pedestrian and cycle connections (Essex County Council)
- Amend to reflect ECC’s preferred wording for ‘new 56 place stand-alone early years and childcare nursery (Use Class E(f)) on 0.13 hectares of suitable land allocated for education and childcare use’, and refer to ‘nursery’ rather than ‘nursery school’ in supporting text (Essex County Council)
- Refer to `multifunctional’ green infrastructure to ensure consistency throughout the Plan (Essex County Council)
- Add individual bullets requiring financial contributions to the North East Bypass and education (Essex County Council)
- Amend reference to ‘good accessibility for buses’ rather than ‘bus priority measures’ (Essex County Council)
- The requirement for a health care facility could be met by a contribution for delivery on an alternative site (Broomfield Parish Council)
- Some allocations have woodland on/near to the site including Ancient Semi Natural Woodland, Plantations on Ancient Woodland Sites and Priority Habitat Woodland. Proposals should reduce any impact on irreplaceable habitat. Decisions should reference Natural England and Forestry Commission’s Standing Advice on Ancient Woodland – plus supporting Assessment Guide and “Keepers of Time” – Ancient and Native Woodland and Trees Policy in England (Forestry Commission England).

CCC response to the comments made
Various site policy adjustments have been made including reference to active and sustainable travel, multifunctional green infrastructure, financial contributions towards Police, ambulance and fire and rescue facilities and good accessibility for

bus services. Amended requirement for financial contributions to delivery of Section 1a of the Chelmsford North East Bypass.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
Mitigation measures for the impact of development on the Main Road corridor will be included within a traffic assessment at planning application stage.
An alternative solution to delivering a healthcare facility is not relevant to the site allocation and would require a separate planning application.
Site policy already requires provision of pedestrian and cycle connections.
There are no specific proposals for a religious facility on this site. Policies and S9 and DM20 support the development of community facilities within the plan area.
The site policy includes requirements for a woodland buffer. Policies S4 and DM17 protects sites of international, national, regional and local nature conservation importance including Ancient Woodlands.

Location 9 – Growth Site Policy 9a – Waltham Road Employment Area

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Location 9 – Growth Site Policy 9a – Waltham Road Employment Area	1	11	16	16

Summary of Representations – main issues and suggested changes:

- Support for the allocation which is in a suitable location and complimentary to the existing provision with no known constraints (LVJ Maldon Limited)
- The use of ‘around’ 3,500sqm is supported but flexibility is needed so that further land can be included to meet employment needs. Boundary should be enlarged to include land to the north (LVJ Maldon Limited)
- Designated heritage assets in and outside the Boreham Roman Road/Plantation Road Conservation Area are unlikely to be impacted (Historic England)
- For consistency with other parts of the plan, strengthen references to active travel in the policy (Essex County Council)
- The existing employment area is a bad example of town planning, an eyesore with larger industrial type operations and in an inappropriate location for employment space, and this proposal would make it worse (Boreham Conservation Society)
- Any additional highway works would adversely infringe on the rural setting of this country road
- Concern over the loss of prime agricultural land, increased flood risk and that the site lacks mains utilities (Boreham Conservation Society)
- Concerns it would generate additional traffic movements through Boreham (already approaching capacity) on top of those already proposed due to the A12 widening scheme (Boreham Conservation Society)

- Existing cycle and walkways are poorly maintained (Boreham Conservation Society)
- The size boundary appears much larger than necessary so could lead to uncontrolled development
- The proposal contradicts ECC's Boreham Traffic Mitigation Scheme
- The planned solar farm development and train station would generate additional traffic movements on top of those from this site
- The proposal would ruin the countryside adjacent to a local wildlife site
- Would lead to increased pollution, the existing employment area is already a nuisance to neighbours
- The existing employment area does not benefit the local community as occupiers are mainly large operators and all employees must travel by car.

CCC response to the comments made
The site allocation, quantum and boundary are supported by the plan evidence base including the Heritage Impact Assessment, traffic modelling, Strategic Flood Risk Assessment and Employment Land Review – no changes proposed.
Waltham Road Employment Area is a well-established site and its expansion will provide further rural inward investment opportunities and also reflect the aspirations of national policy to support the sustainable growth and expansion of business in rural areas.
Site policy adjusted to require safe and convenient pedestrian and cycle links.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.

Location 14 – Ford End

Growth Site 14a – Land West of Back Lane, Ford End

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Growth Site 14a – Land West of Back Lane, Ford End	1	17	20	20

Summary of Representations – main issues and suggested changes:

- Ford End is within Great Leighs Water Recycling Centre catchment area which has some capacity to accommodate flows from small scale growth. There are no Anglian Water assets within the indicated areas for growth at Ford End (Anglian Water)
- A Heritage Impact Assessment (HIA) would be beneficial to identify any necessary mitigation and enhancement measures. Amend policy is require a Heritage Impact Assessment with a planning application (Historic England)
- Object to the allocation. Concerns include access, flooding, heritage impacts and neighbour amenity (Great Waltham Parish Council)
- Policy changes suggested relating to education provision (Essex County Council)
- Support the allocation expressed

- Concerns expressed relating to loss of Grade 2 agricultural land, impacts on heritage assets, flood risk, limited pedestrian and cycle connections to the site and, noise, air and light pollution
- Proposal will increase traffic and congestion, previous requests for road calming measures were rejected by Essex Highways
- Lack of existing infrastructure to support the development including a suitable road network, local shops, school and utility capacity and public transport
- Unsuitable/unsafe access and egress to the site, including roads being too narrow for vehicles and pedestrians
- Concerns over impacts on settlement character and countryside
- The development will not contribute to the local economy
- There more suitable sites within the vicinity as set out in the SHELAA
- Impact on neighbour amenity owing to (amongst other matters) the ground levels being higher at the allocation site.

CCC response to the comments made
Following further consideration, this site has been removed from the plan and it is no longer considered deliverable given existing site constraints including poor pedestrian access and impact on heritage assets.
Heritage Impact Assessments were published alongside the Preferred Options Local Plan and have been used to inform site allocation policies.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.

Growth Site 14b – Land South of Ford End Primary School

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Growth Site 14b – Land South of Ford End Primary School	2	18	24	24

Summary of Representations – main issues and suggested changes:

- Support but allocate the whole site (5.37ha) for around 50 homes. This would deliver substantial benefits (Dandara Eastern)
- Support and consider a greater quantum on a single site rather than Growth Site 14a (Great Waltham Parish Council)
- Development should include appropriate access arrangements, traffic management, and mitigation and contributions towards education (Great Waltham Parish Council)
- Development would not affect any designated heritage assets (Historic England)
- Ford End is within Great Leighs Water Recycling Centre catchment area which has some capacity to accommodate flows from small scale growth. There are no Anglian Water assets within the indicated areas for growth at Ford End (Anglian Water)

- Policy changes suggested relating to education provision (Essex County Council)
- Support expressed for site
- Concerns expressed relating to loss of Grade 2 agricultural land, impacts on heritage assets, flood risk and drainage, limited pedestrian and cycle connections to the site and, noise, air and light pollution
- Proposal will increase traffic and congestion, previous requests for road calming measures were rejected by Essex Highways
- Lack of existing infrastructure to support the development including a suitable road network, local shops, school and utility capacity and public transport
- Unsuitable/unsafe access and egress to the site, including roads being too narrow for vehicles and pedestrians
- Concerns over impacts on settlement character and countryside
- The development will not contribute to the local economy
- There more suitable sites within the vicinity as set out in the SHELAA
- Impact on neighbour amenity owing to (amongst other matters) the ground levels being higher at the allocation site.
- The development will conflict with the school's current access arrangements, impacting on the safety of children
- Concerns that houses will overlook the school and impact on the safety of children.

CCC response to the comments made
The site allocation is supported by the plan evidence base including Strategic Flood Risk Assessments, Water Cycle Studies, Landscape Sensitivity and Capacity Study, new Air Quality Assessment and traffic modelling. The Small Sites Planning Briefs/Concept Framework 2024 considers that there are no overriding site constraints which mean that the site is unsuitable or undeliverable.
The 'small sites' (under 1ha) are an important part of the Plan to ensure delivery of a variety of sites in a timely manner, and to meet NPPF requirements to provide 10% of small sites. The enlargement of these sites would be likely to put greater pressure on local facilities and infrastructure which could make such sites unsuitable for development.
This allocation will provide housing on a site no larger than one hectare to help meet requirements in national planning policy - the site boundary is acceptable.
The site policy sets our development principles including access arrangements and infrastructure requirements including contributions towards education.
The use of the 'around' housing figure would allow for a higher density development to be brought forward where this conforms with other policies in the Plan as a whole.
The Reasoned Justification has been amended to recognise that speeding by vehicles on Main Road (B1008) is an issue and as such traffic calming should be provided as part of the development including speed reduction measures.
Ford End is a Service Settlement with a primary school and bus service making it suitable for small scale development.
The allocation will help to support the services and facilities in the village and help to maintain a diverse housing supply.
The site policy requires appropriate active and sustainable travel connections to be provided within the site with links into the wider network, including the primary

school. It also includes provision for appropriate improvements, as necessary, to the local and strategic road network.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
The plan has been changed to recognise that there is limited parking and drop-off at the primary school and that future access arrangements into the development site could exacerbate this issue. Therefore, the plan provides a new area of parking for the primary school's use adjacent to the site allocation. This is shown on the Draft Policies Map.
The site policy has been expanded to require development to be set back from Main Road (B1008) and to restrict the height of new development to two-storey.
The site policy requires the development to be appropriate to the character of the area.
To meet our development needs it is inevitable that some agricultural land will be used for development.

Location 15 – Little Boyton Hall Farm Employment Area

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Location 15 – Little Boyton Hall Farm Employment Area	2	1	8	8

Summary of Representations – main issues and suggested changes:

- Existing and prospective tenants support the proposal. They respect for example, the location, provision of parking and landscaping (Christopher Philpot)
- Support but amend policy to optimise flexibility and deliverability of the site for example by removing the need for a masterplan or changing the timing of when it is required (CJH Farming Ltd)
- Expand the range of uses that can come forward, provide a flexible site capacity, and expand the allocation boundary (CJH Farming Ltd)
- Grade II listed Little Boyton Hall is adjacent to the site but impacts are considered unlikely. Amend policy text to ensure it is protected (Historic England)
- Add additional text in relation to green infrastructure (Essex County Council)
- For consistency with other parts of the plan, strengthen references to active travel (Essex County Council)
- Concerns expressed including loss of agricultural land, site is unsustainable, will be harmful to the landscape and adversely impact on views from the north which is largely ignored by the consultant (Chignal Parish Council)
- The site is near an Ancient Woodland. Consider direct and indirect effects of development during the construction and operational phases (Forestry Commission England)
- The site is very tranquil, is poorly served by public transport and difficult to cycle to, hence most users will drive

- Whilst the site is intended to be served from the A1060, occupiers might access from Chignal/Mashbury/High Easter where the lanes are in a very poor condition.

CCC response to the comments made
The plan requires masterplans all Strategic Growth Sites to inform the planning application process and to help ensure that the resulting development is amongst other considerations well designed and high quality.
The type of employment floorspace to be provided will help meet future needs as identified in the Employment Land Review 2024.
The site policy includes protection for the setting of Little Boyton Hall Grade II Listed Building.
Amendments have been made to strengthen references to active travel and to require 'multifunctional' green infrastructure.
To meet our development needs it is inevitable that some agricultural land will be used for development.
The site allocation is supported by the plan evidence base including a Landscape Sensitivity and Capacity Study 2024 and traffic modelling.
The site allocation requires the protection of the nearby Ancient Woodland Nightingale Wood.
The site allocation requires the provision of safe and convenient pedestrian and cycle connections and opportunities to maximise the provision of public transport.
The site allocation requires vehicular access to be via the existing site access road off the A1060.

Growth Area 3 – South and East Chelmsford (paragraphs 7.340-7.348 and Figure 18)

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Area 3 – South and East Chelmsford (Paragraphs 7.340-7.349 and Figure 18)	2	5	10	10

Summary of Representations – main issues and suggested changes:

- Support expressed (Pigeon (Sandon) Ltd, Cycling UK)
- In para. 7.341 add reference to 'multifunctional' green infrastructure to ensure consistency throughout the Plan (Essex County Council)
- Reword 'Site infrastructure requirements' sections in revised site policies to simply refer to school land requirements i.e. 'A new primary school (Use Class F1(a)) with co-located early years and childcare nursery (Use Class E(f)) on 2.1 hectares of suitable land allocated for education and childcare use' (Essex County Council)
- Expand para. 7.343 to refer to 'new' bus services as well as enhanced (Essex County Council)
- Amend para 7.345 to reflect that only Location 10 will provide improvements to the A132/B1012 Rettendon Turnpike Junction as development at Danbury

and Bicknacre will only provide site access and local walking and cycling improvements as appropriate (Essex County Council)
- Require financial contributions for provision of new and/or enhanced bus services in the 'Movement and Access / Site Infrastructure Requirements' sections of site policies (Essex County Council)
- Do not support. Need a Green Belt Review to identify a more sustainable distribution of new housing including within/around Key Service Settlements in the Green Belt (Whirledge & Nott, Croudace Homes)
- Various comments from landowners/developers promoting their proposed development sites including within the Green Belt.

Main issues raised in relation to locations in Growth Area 3 appear under the specific sites e.g. SGS16a.

CCC response to the comments made
Various text amendments made including reference to `multifunctional' green infrastructure and new bus services.
Site policies have been reworded in respect to school land requirements.
The amount of development required during the plan period 2022-2041 can be accommodated outside of the Green Belt so there is no need to carry out a Green Belt review. This accords with national policy and guidance.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.

Location 16 – East Chelmsford

Strategic Growth Site 16a – East Chelmsford Garden Community (Hammonds Farm)

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Strategic Growth Site 16a – East Chelmsford Garden Community (Hammonds Farm)	9	4410	4433	4448

It should be noted that in some cases, members of the public raised similar points to stakeholders listed in brackets. This is especially the case in relation to comments made by Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group to this Strategic Growth Site which have been replicated and amplified by many individuals. To avoid duplication, these comments have not been repeated in the public comments. However, this does not affect the consultation process as this report focuses on the main issues received rather than the number of representations to any individual section of the plan.

Summary of Representations – main issues and suggested changes:

- Supportive of Garden Communities and that they follow TCPA Garden City Principles, and recommend that East Chelmsford is progressed having regard to the key principles set out in the Essex Design Guide - Garden Communities (Essex County Council)
- Fully support the numbers and types of homes/employment proposed in the site allocation (Wates Developments and Hammonds Estates LLP)
- Support the introduction of new employment uses in the area that will help strengthen Chelmsford's economy (CNG Fuels)
- The delivery of Site 16b is conditional upon the masterplan of Site 16a, and consequently the expectation of delivery by 2030 maybe unrealistic (Greystoke CB)
- Identify in the policy that the Garden Community has potential to support an innovative and bespoke housing mix to assist in optimising delivery, and achieving Garden City Principles (Wates Developments and Hammonds Estates LLP)
- Inconsistent with two very recently adopted neighbourhood plans (Little Baddow Neighbourhood Plan (2023) and the Sandon Neighbourhood Plan (2023)) as well as with the Reg 15 Submission Version of the emerging Danbury Neighbourhood Plan (2024) (Croudace Homes)
- The site is not needed in the Plan, the housing numbers could be met by extending North East Chelmsford Garden Community
- Building more at North East Chelmsford Garden Community would be more suitable as it has the infrastructure in place already, and would preserve this rural area, its good quality farmland and protect the community here (Little Baddow Society, Danbury Parish Council)
- All of the previous five options included additional growth in North East Chelmsford Garden Community so why is development not going there
- The housing numbers are not needed until the end of the Plan period so it is premature to consider the site now
- Development should be on brownfield sites, not greenfield sites
- This is Green Belt land and should not be built on
- Green Belt land to the southwest of Chelmsford should be considered instead (Boreham Conservation Society, Barratt David Wilson (Eastern Counties))
- A continuation of development between Regiment Way and the route of the new NE Bypass to the West of Broomfield would be better (Boreham Conservation Society)
- The site is in an unsuitable location, detached from Chelmsford. Development would result in urban sprawl and there should be no development to the east of the A12 as it is a defensible boundary (Boreham Conservation Society, Richborough, This Land Ltd, Croudace Homes, Barratt David Wilson (Eastern Counties))
- Unacceptable loss of high grade agricultural land (Sandon Parish Council, Great Baddow Parish Council, CPRE Essex, Boreham Conservation Society, Danbury Parish Council)
- There is no evidence showing actual land quality, only general agricultural land classifications have been provided (Sandon Parish Council, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)
- Additional crime in the area

- The site was not selected in the current adopted Local Plan and nothing has changed for the reasons it was not selected then, so it should not go ahead now (This Land Ltd, Danbury Parish Council, Croudace, Barratt David Wilson (Eastern Counties))
- Support the allocation of sites for Gypsy, Traveller and Travelling Showpeople housing needs (Basildon Borough Council)
- No evidence that a Gypsy and Traveller site is needed, and this is not a suitable location for one
- Support for additional employment in the area
- 'Supporting on-site development', bullet 3 should be amended as it is premature to assume the school will be an all-through school. However, the primary and secondary school should be co-located to provide the option of an all-through school, but a statutory process is required to be followed to determine the type(s) of school(s) established (Essex County Council)
- ECC's document 'SEND Sufficiency Plan For Engagement Autumn 2023' identifies a lack of special educational needs schools in the east of Essex. Due to the number of schools proposed at site 16a, consider a SEND school for children aged up to 16 years (and beyond if possible) on the site for the provision of children and young people in east Essex (Maldon District Council)
- No infrastructure is in place to support this development (roads, healthcare – GPs and Hospitals, dentists, education, waste water and sewerage, emergency services) (Boreham Conservation Society, Woodham Walter Parish Council, Danbury Parish Council)
- The amount of infrastructure required will delay the delivery timeframe for the site (This Land Ltd, Croudace Homes)
- The site policy does not plan sufficiently for the provision and use of shared space, community facilities (such as local shops, meeting places, sports venues, cultural buildings, public houses and places of worship) and other local services to enhance the sustainability of communities and residential environments (Great Baddow Parish Council)
- Policy should be more positive requiring the development to provide renewable, low carbon and decentralised energy schemes on site (Essex County Council)
- Supports in principle the Movement and Access requirements for the site to provide substantive active and sustainable travel connections to the Chelmsford Urban Area and key destinations (Essex County Council)
- Site requirements should be amended to help ensure wider connectivity to and from the site is achieved (Essex County Council)
- Include in the site infrastructure measures to ensure the community is highly walkable with safe and lit pathways which connect forming a walking and cycling network to surrounding areas such as Danbury, Little Baddow, Sandon and Great Baddow (Great Baddow Parish Council)
- There are opportunities to improve the National Cycle Network in the area, including improvements to NCN1 which has some significant issues deterring its use (Cycling UK)
- The proposed cycle route link to Boreham junction will be very important to provide an active travel link to Beaulieu Station, North Chelmsford and a link to the countryside for leisure cyclists and is a better alternative to the existing cycle route (Cycling UK)

- No suitable mitigation measures set out for transport/highways impacts (Little Baddow Society)
- The impact assessment indicates that the development in this location will cause issues on the A12 between J17 and J19, which National Highways has no plans to mitigate
- The proposed mitigation to reduce congestion on the A414 acknowledges that this will drive more rat-running through Little Baddow and Sandon, exacerbating an already significant problem
- Traffic congestion will impact wider Villages and areas such as Little Baddow, Great Baddow, Bicknacre, Danbury, Sandon and Boreham, Woodham Walter, as well as residents from Maldon (Sandon Parish Council, Great Baddow Parish Council, Chelmer Valley Landscape Group, Little Baddow Society, Boreham Conservation Society, Little Baddow Society, Little Baddow History Centre, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Woodham Walter Parish Council, Danbury Parish Council)
- Unacceptable impact on the local (rat-running and congestion, including the A414 and Eves Corner) and strategic road (A12 capacity and junctions) networks with no evidence to support the proposal (Sandon Parish Council, Essex Waterways Ltd, Chelmer Valley Landscape Group, Little Baddow Society, Boreham Conservation Society, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, This Land Ltd, Woodham Walter Parish Council, Danbury Parish Council, Croudace Homes, Barratt David Wilson (Eastern Counties))
- Will result in delays along the A414 from Danbury for buses from SWF and Maldon unless dedicated bus lanes are factored into the road improvements along this section of the A414 (South Woodham Ferrers Residents Party, Danbury Parish Council)
- More traffic onto the A130/A12 causing further commuter delays at the Howe Green and Sandon junctions. There may also be negative effects on the use of the Sandon Park and Ride (South Woodham Ferrers Residents Party)
- Impact of wider projects including the Lower Thames crossing, A12 widening, Norwich to Tilbury Pylons, Bradwell power station on traffic flows has not been considered (Great Baddow Parish Council, Boreham Conservation Society)
- Impact of traffic using the new station has not been sufficiently accounted for in the traffic modelling (Sandon Parish Council)
- The impact of additional houses in North East Chelmsford Garden Community would be less on local roads and the A12 than this location
- No traffic modelling has taken place to support this site
- Traffic modelling evidence is insufficient and the impact of the proposed development on the main road network (A12 and A414) is highly likely to be severe (Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Danbury Parish Council)
- Impact of construction traffic on already congested local road network (Chelmer Village Council)
- Encourage ongoing discussions with the Public Transport Operator and the Local Highway Authority to assist with the continuing delivery of infrastructure in Growth Area 3 (Basildon Borough Council)
- Further evidence on how active travel corridors will be made safe and lit to encourage sustainable travel is required (Great Baddow Parish Council)

- Challenge the deliverability of sustainable travel opportunities to deliver a 60% modal share for active and sustainable transport, particularly to the two Stations. If not achieved the impact on the A12 cannot be effectively mitigated (Strutt and Parker Farms Ltd, Gladman Developments Ltd, This Land Ltd, Croudace Homes)
- Increased use of City Centre train station which is nearing capacity (Barratt David Wilson (Eastern Counties))
- Remove the word 'dedicated', from bullet point 6 under Movement and access, so that all avenues for providing car clubs with operators can be explored (Wates Developments and Hammonds Estates LLP)
- Agree with the policy requirement for significant new multifunctional green and blue infrastructure, and this should form the framework for delivering suitable SuDS and flood risk management and achieving 20% BNG (Anglian Water)
- Support that at least half the gross site area is multifunctional green and blue infrastructure, to provide sufficient space to maximise all opportunities including public access and amenity (Anglian Water)
- A distinction between public green spaces and habitats for wildlife should be explicitly clarified in the site policy (Environment Agency)
- While the Local Plan promotes habitat enhancement and biodiversity through measures like vegetation planting, and encourages designs that incorporate biodiversity features, we would like to see it specified that native species are used in all cases (Environment Agency)
- Add an explicit preference to retaining riparian corridors as public open space over private gardens. Include buffer zones alongside rivers reserved as public space, rather than private land that backs directly onto a river (Environment Agency)
- Supports the Historic and Natural Environment masterplanning principles to include conserve and enhance biodiversity and avoid adverse effects on the River Chelmer, and Old Hare Wood Local Wildlife Sites, Waterhall Meadows Essex Wildlife Trust Nature Reserve, and Long Spring Wood and Hall Wood ancient woodlands, and Blakes Wood and Lingwood Common SSSI. Also reference Danbury Common SSSI (National Trust)
- The site currently floods, and this will be made worse both within and around the site if built on. It could impact rivers if suitable waste water/sewerage facilities are not sufficient to deal with flooding and climate change impacting the health of waterway users as well as pollution to wildlife (Sandon Parish Council, Great Baddow Parish Council, Chelmer Valley Landscape Group)
- Insufficient modelling has been undertaken to review the full effects of flood risk, including future climate change and if this will adversely affect flooding (Great Baddow Parish Council, Chelmer Valley Landscape Group, Little Baddow Society, Boreham Conservation Society, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Danbury Parish Council)
- Significant areas of the allocation lie within Flood Zone 2 and 3. The site allocation does not pass the sequential test as there are reasonably available sites appropriate for the proposed development in areas with a lower risk of flooding (Strutt and Parker Farms Ltd, Richborough, This Land Ltd, Tayor Wimpey)
- Pollution and harm to the river environment from the development, including the Chelmer and Blackwater Navigation Landscape Conservation Area

(Sandon Parish Council, Great Baddow Parish Council, Chelmer Valley Landscape Group, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Woodham Walter Parish Council)

- Additional pressure on the Chelmer and Blackwater Navigation for recreational purposes including walking, cycling, canoeing, paddle-boarding and boating as well as visitor parking without any proposals to provide improvements or mitigation (Essex Waterways Ltd, Chelmer Valley Landscape Group)
- The proposed new bridge will split the development in half, be unduly prominent in the river valley, create noise and moving visual intrusion, and be detrimental to the character and appearance of the designated Chelmer and Blackwater Navigation Conservation Area and views from Boreham House. No amount of landscape enhancement will mitigate the harm it will cause (Essex Waterways Ltd, Chelmer Valley Landscape Group, Boreham Conservation Society)
- Impact on users' enjoyment of existing footpaths and rivers for recreation and pleasure
- Harm to the rural landscape and urbanisation of the area, including Waterhall Meadow, an ancient flood meadow (Sandon Parish Council, CPRE Essex, Little Baddow Society, Boreham Conservation Society, Essex Wildlife Trust, Danbury Parish Council, Croudace Homes)
- The impact on the landscape would be damaging and hard to mitigate (Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)
- Increased air pollution
- Harm to the natural environment and protected areas of wildlife/habitats in the vicinity (Sandon Parish Council, CPRE Essex, Essex Wildlife Trust, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Richborough)
- Harm to wildlife in the area and loss of habitat for species including, muntjac, bats, badgers, foxes, birds (Sandon Parish Council, Little Baddow Society, Boreham Conservation Society, Essex Wildlife Trust, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)
- There are several areas of Lowland Mixed Deciduous Woodland, which are Priority Habitat Woodland, within or adjacent to the site which need to be considered. Lowland Mixed Deciduous Woodlands are on the Priority Habitat Inventory, England. Fragmentation of woodland reduces its ecological value and woodlands can suffer loss or deterioration from development nearby (Forestry Commission England)
- Any planning application for major residential development should be required to include a robust assessment of the residual recreational impact of the development on the nearby SSSI's, local wildlife sites and ancient woodlands, and that mitigation measures are included where appropriate. This should consider cumulative development in the area (National Trust, Natural England, Essex Wildlife Trust, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Richborough)
- The site has been submitted for consideration for it to be designated as an Area of Outstanding Natural Beauty/National Landscape and proposals for development are premature until this has been considered by Natural England (Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Danbury Parish Council, Croudace Homes)

- Undertake a Heritage Impact Assessment (HIA) in advance of Regulation 19 to determine whether the site is suitable for allocation, to inform its capacity, and to identify any necessary mitigation and enhancement measures. If the site is deemed suitable incorporate any mitigation and enhancement measures into the site policy (Historic England)
- Impact on heritage and archaeological assets in the area (Little Baddow Society, Little Baddow History Centre, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Richborough)
- Maintain the character of and biodiversity along Graces Walk (Cycling UK)
- Agree with the principle of bullet 4 of Historic and Natural Environment, but adjust to reflect that all of the listed buildings are outside of the development's ownership, rendering it impossible to enhance the structures themselves (Wates Developments and Hammonds Estates LLP)
- The policy wording in relation to heritage assets utilises the statutory language of 'preservation'. Suggest a more appropriate term would be 'conservation', to reflect national planning policy (Wates Developments and Hammonds Estates LLP)
- Remove Church Lane as a 'Protected Lane' as the Protected Lanes Study for Chelmsford Borough Council: Summary Report 2009 states that it does not meet the 'protected lane' threshold (Wates Developments and Hammonds Estates LLP)
- It is not yet known whether the site contains a viable minerals resource that would require extraction prior to development (Little Baddow Society, Little Baddow History Centre, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Croudace Homes, Tayor Wimpey)
- Ensure any Anglian Water assets within and adjacent to the site that may be affected by the development are reflected in the site policy including a requirement for appropriate safeguarding of suitable access for the maintenance of foul and surface water drainage infrastructure (Anglian Water)
- Expand policy to require the development to prepare a strategy for responding to the National Grid Electricity Transmission plc (NGET) overhead transmission lines present within the site which demonstrates how the NGET Design Guide and Principles have been applied at the masterplanning stage and how the impact of the assets has been reduced through good design (National Grid Electricity Transmission)
- Houses should not be built close to the pylons on site
- The National Grid Transmission Overhead Lines, UK Power Networks Overhead Lines and Cadent Local High Pressure Gas Mains constrain the site for development (This Land Ltd)
- Support the reference in `Site infrastructure requirements' regarding early years, primary and secondary provision subject to some minor amended wording including adding a reference to accordance with Policy S10 (Essex County Council)
- Support for the provision of open spaces, sports, and physical activity provided in the policy (Sport England)
- Under the subheading 'site infrastructure requirements' and in bullet point 8 at the end add "and police facilities as required by Essex Police" (Essex Police)
- Uncertainty over the viability of the site in respect of the scale and cost of highways improvements that will be required (Strutt and Parker Farms Ltd, Richborough, Gladman Developments Ltd, Tayor Wimpey)

- The site is in multiple ownerships and therefore constraints associated with land values and timely delivery (Richborough)
- Support bullet points 1-3 of Site Infrastructure Requirements, but welcome further flexibility through additional text stating “or the equivalent land take needed to deliver the school places identified as needed by the Local Authorities with Responsibility for Education (LARE)”, given the requirement could flex over time. References to the education provider should be renamed as the Local Authorities with Responsibility for Education (Wates Developments and Hammonds Estates LLP)
- Support the principle of providing contributions towards the facilitation of necessary highway transport infrastructure under bullets 4 and 5 Site infrastructure requirements, but add clarity that the appropriate improvements will be defined by the Transport Assessment (Wates Developments and Hammonds Estates LLP)
- In relation to bullet 6 of Site Infrastructure Requirements clarification is sought in the wording that the definition of bus-based rapid transit refers only to the sustainable modes bridge over the A12, and does not require the provision of dedicated bus corridors throughout the development (Wates Developments and Hammonds Estates LLP)
- Bullet 8 of Site Infrastructure Requirements could be interpreted as open-ended, add additional wording so it reads “Provide and/or financial contributions to healthcare provision as required by the NHS Mid and South Essex Integrated Care Board to address the needs of the development.” (Wates Developments and Hammonds Estates LLP)
- Stewardship principles are supported and should be established early on with an asset schedule prepared to outline management and maintenance of assets (Essex County Council)
- Do not support the description of a masterplanning principle within Para. 7.224 (Section 3) that there should be a “choice of unimpeded route corridors within the developed area, able to carry rapid transit services”. Whilst bus priority is supported in principle, this could suggest a need for a continuous dedicated bus-only corridor through the site. The principle of bus priority and rapid transit can be achieved through a combination of measures (Wates Developments and Hammonds Estates LLP)
- Add a new line at the end of para. 7.362 as follows “Appropriate funding will also need to be made for police facilities to provide for community safety, cohesion and policing as required by Essex Police.” (Essex Police)
- Joint working between the Councils is needed to ensure there are no detrimental impacts on Basildon Borough and its residents from development in Growth Area 3 (Basildon Borough Council).

CCC response to the comments made
As the site is allocated as a new Garden Community and the largest new Strategic Allocation, an additional requirement for a Travelling Showpeople site for 13 serviced plots has been included to ensure the Plan seeks to meet the higher identified Travelling Showpeople’s needs identified by the updated GTAA.
The policy has been amended to clarify that the new Country Park will be primarily informal and natural in nature to better reflect the aspiration for this area set out in the Reasoned Justification – that the area is expected to retain and improve habitats for wildlife and provide new and enhanced recreational opportunities, including the waterways.

The policy now includes a requirement to provide necessary mitigation to address the cumulative recreational pressure on SSSIs in proximity to the site.
Danbury Common has been added as a SSSI to be conserved and enhanced, and to avoid adverse effects on within the policy requirements and Reasoned Justification.
Site infrastructure requirements and Reasoned Justification have been expanded to include contributions towards addressing cumulative recreational pressure on SSSIs in proximity to the site.
The Reasoned Justification has been expanded to explain that high quality semi-natural greenspaces of at least 12ha each should be provided to meet Natural England's 8ha/1000 new population metric and minimum circular dog-walking route on or off site of 2.3km which make use of existing Public Rights of Way and/or highways.
Reference to the precise uses of the multifunctional green and blue infrastructure being defined through the masterplanning process has been added to the Reasoned Justification. This now sets out that this will include delineating specific areas where wildlife and ecological areas are prioritised.
For clarity the policy requirements now require the area to the east of Sandon Brook notated on the Policies Map for Future Recreation/SuDS/Biodiversity should focus on informal recreation, natural and semi natural green infrastructure uses rather than formal sports recreation requiring floodlighting or significant servicing.
The need to provide visual and acoustic screening to the A12 and minimise the impact of lighting in particular within the employment areas has been added as a requirement to the policy.
The Reasoned Justification has been expanded to include buffer zones alongside rivers, reserved as public space, as part of compensatory measures to provide landscape enhancement as part of a scheme.
The Reasoned Justification has been expanded to note that the achievement of 20% biodiversity net gain on site will be subject to site constraints.
Reference to the need for the new Country Park to include high quality semi-natural greenspace to be used in conjunction with the existing PROW network to provide circular dog-walking routes of at least 2.3km has been added to the Reasoned Justification.
To reflect that it is as yet unknown if the school on site will be a through school or not the policy wording and Reasoned Justification amended to include a co-located primary and secondary school with early years and childcare nursery (with potential for a sixth form centre).
Reference to traffic free environments around school entrances are considered too detailed for the Policy but would be dealt with at masterplanning or planning application stage. No changes required.
Policy requirement and Reasoned Justification for new and enhanced pedestrian, cycle and where appropriate bridleway connections within the site expanded to ensure both the Reasoned Justification and policy requirement include reference to links to the River Chelmer Navigation, Little Baddow and Great Baddow.
Reference to a 'dedicated' car club for residents and businesses on site has been amended to ensure it is also available to wider users in the area.
The Council has undertaken various Heritage Impact Assessments to inform the Local Plan, with a specific assessment being undertaken for the Hammonds Farm site. The levels of harm identified within the Hammonds Farm Heritage Impact Assessment are considered to be justified. Whilst parts of the site are identified as being of high heritage value, other parts, particularly to the south are of variable or

lower heritage value. The heritage harms identified do not necessarily rule out the development, rather they need to be avoided, minimise or mitigated as part of the masterplan for the proposals. Reference to heritage assets which require consideration have been updated in the policy requirements and Reasoned Justification.
The requirement for a detailed Heritage Impact Assessment to be prepared has been added as a policy requirement as the site, particularly land to the north of Rumbolds Farm, Hammonds Road, contains a significant number and configuration of crop marks requiring further investigation. The Reasoned Justification sets out the requirements for such an assessment, and that once complete the evaluation will inform the location of development parcels and open space within the masterplan.
The Little Baddow, Danbury, Boreham and Sandon Parish Councils response included a reference to Little Baddow Parish Councils proposals for three conservation areas to be designated; at Great Graces, St Marys Church and North Hill. Further work is being undertaken to explore a conservation area on North Hill by CCC. Conservation areas at Grace Graces and St Marys Church are not justified and the duty to preserve and enhance the setting of the various designated heritage assets at these sites is considered adequate.
Wording used in the description of how various heritage assets should be treated e.g. preserved/conserved etc, and their significance complies with National Policy and Guidance. No changes required.
The requirement for a sensitively designed new bridge to assist in preserving and enhancing the character or appearance of the Chelmer and Blackwater Navigation Conservation Area and its setting has been added to the policy.
The need to provide appropriate landscape buffers within the site to protect the settings of The Hammonds, Phillows and Rumbolds farmsteads which are within the site (the latter farmhouse being a non-designated heritage asset) has been added as a policy requirement.
Reference to Boreham has been added to the policy requirement to protect and celebrate landmark views, including those to Danbury, Little Baddow and Sandon Churches.
The need to provide substantial linear landscape buffers to retain the significance of the Hurrells Protected Lane and Graces Walk has been added as a policy requirement. Church Lane is identified within the 2010 Protected Lanes Study so is considered as such.
The requirement for heritage trails has been expanded to also require ecological trials to be delivered. The need to recognise and celebrate the site's rich historic, social and natural history through such trials has also been added to this policy requirement.
The Reasoned Justification has been expanded to ensure heritage, social history and natural environment celebration and interpretation plays a positive role in reinforcing local character and promoting heritage and understanding such as the works of renowned local nature writer J. A. Baker who has connections with this area.
The need for development on the eastern and northern margins of the site to be lower density and landscaped to reflect a transition to the open countryside beyond has been added as a policy requirement.
A further policy requirement to provide public art which contributes towards place creation and celebrates the historic, social and environmental context of the site and the local area has been added.

The need for the layout of the site to provide a strategy for responding to the National Grid Electricity Transmission overhead transmission lines present within the site has been added as a policy requirement with further guidance on this included within the Reasoned Justification.
The design and layout of the site needing to incorporate appropriate safeguarding of suitable access for the maintenance of foul and surface water drainage infrastructure has also been added as a new policy requirement and set out in the Reasoned Justification.
Financial contributions to the delivery of the Chelmsford North East Bypass (CNEB) has been removed as a policy requirement as the full CNEB is not required to support the Local Plan growth. Contributions towards, or the provision of, other sections of the CNEB are a requirement of site SGS6, 7a, 7b, 7c and 8 as they are directly related to the need for these sections.
The policy requirement to provide a new active and sustainable route and bridge over the A12 to connect to Sandon Park and Ride has been amended for it to be 'close to' Sandon Park and Ride.
The policy requirement for traffic calming measures has been expanded to clarify that this is to deter traffic on local roads from using Church Road and now also includes reference to Plantation Road and Main Road in Boreham.
For clarity and consistence, reference to 'active' and sustainable transport has been added to the Reasoned Justification.
The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This is given in Appendix 2 and includes a review of the Transport Technical Note, prepared by Stomor (June 2024) on behalf of Little Baddow, Danbury, Boreham and Sandon Parish Councils. Essex Highways response has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform the Pre-Submission Local Plan.
The highways modelling undertaken for the Local Plan is strategic and area-wide in nature. More detailed modelling to assess the impact of proposed development on the local road network and the detailed mitigation required to accommodate new trips associated with it, will be required and undertaken as part of the planning application process for allocated sites in the Local Plan.
Updated junction modelling has been undertaken as part of the Pre-Submission Local Plan Highways Modelling Appraisal. Early concept development accesses onto the wider road network are also included in the latest Local Plan Pre-Submission modelling, based on outline developer proposals.
Overall, the Pre-Submission Local Plan Highways Modelling Appraisal, undertaken by Essex Highways, concludes that by maximising the potential for sustainable accessibility to and from the sites along the A12 corridor, the impact on the strategic highway network should not be considered severe. However, continued discussions with National Highways will be necessary to best ensure that future development growth in Chelmsford can be supported by the strategic highway network over the long-term.
It is not within the practical scope of the Local Plan highways modelling to assess the scale of mitigation required along alternative sustainable corridors into the city centre from the Hammonds Farm site. However, the Local Plan transport modelling evidence base does recognise the need for a city centre sustainable access corridor study to be undertaken as part of the Hammonds Farm planning application, should proposals for a bus service to Beaulieu Rail Station be

compromised by access difficulties at the Boreham Interchange. No changes required.
Site infrastructure requirement has been amended to require the provision or contributions towards other community facilities, including police, ambulance and fire and rescue facilities.
The encouragement of appropriate development of renewable, low carbon and decentralised energy schemes, and mass waste collection systems within the site policy has been amended to state where these are deliverable and do not give rise to environmental or other amenity impacts. However, this remains something that will be encouraged and not required as there is insufficient evidence or policy to require this on site.
As with the North East Chelmsford Garden Community a further policy requirement has been added to require stewardship activities to be in place in advance of the first housing occupations to ensure timely delivery of community development activities. Any further references to the requirements to stewardship arrangements will be determined through the relevant Stewardship Strategy, once agreed.
As with other site allocations where there may be mineral recourses a Minerals Recourse Assessment is required to be undertaken. An initial assessment has bene undertaken and additional wording added to the Reasoned Justification which acknowledges that is a workable mineral resource that would be sterilised by the non-mineral development and thus the supporting statement to the application needs to demonstrate that the need for the built development is such that it outweighs the sterilisation of the mineral resource.
The plan is informed by an up to date and proportionate flood risk evidence base including Level 1 and 2 SFRAs and Sequential & Exception Test supported by detailed modelling. The flood risk reports make use the most recent national policy and legislation available at the time of writing (Autumn 2024, pre the 12th December 2024 NPPF) and are informed by discussions with the Environment Agency, considers risks from all sources of flooding and include climate change modelling.
In response to the Flood Risk Summary Statement prepared by Stomor (June 2024) on behalf of Little Baddow, Danbury, Boreham and Sandon Parish Councils, the Level 2 SFRA site summary table including the key messages section has been amended and updated. An updated site boundary has also been tested and included in the assessment.
The new SFRA Level 2 site summary table for 16a assessed the site allocation boundary included within the Pre-Submission Local Plan. Except for the bridge across the Chelmer approximately 400m east of the A12 and an access road, no development is proposed in Flood Zones 2 and 3. The bridge and access road are classed as ‘essential infrastructure and are therefore included in the assessment. At planning application stage, the site-specific Flood Risk Assessment (FRA) produced by the applicant will need to demonstrate that the bridge and access road will not increase flood risk elsewhere. As a water compatible use, the Country Park has not been assessed for flood risk.
Being a large strategic allocation, the wider site includes an area of flood risk. As shown on the Policies Map, development will only be located in areas at least risk of flooding. The areas at higher risk of flooding will form the country park, which will largely be natural in character, and other open space.
As stated in the NPPF, the exception test is a method used to demonstrate that flood risk to people and property will be managed appropriately, where alternative

sites at a lower flood risk are not available. The exception test is applied following the sequential test. The Sequential and Exception Test for this site has been informed by the Level 2 SFRA and IIA and has been updated to reflect updated information, the revised site boundary and considerations of reasonable alternatives as part of the IIA. This has informed the Pre-Submission Local Plan.
The Local Plan is informed by an Air Quality Assessment 2024 which overall concludes that the impact of the Local Plan in 2041 can be considered negligible for all pollutants.
The need to conserve and enhance biodiversity and wildlife sites is covered by the Policy requirement to Conserve and enhance biodiversity and avoid adverse effects on the River Chelmer, and Old Hare Wood local wildlife sites, Waterhall Meadows Essex Wildlife Trust Nature Reserve, and Long Spring Wood and Hall Wood ancient woodlands, and Blakes Wood, Danbury Common, and Lingwood Common. In addition, Policy DM16 requires all developments to conserve and enhance the network of habitats, species and sites (both statutory and non-statutory, including priority habitats and species) of international, national and local importance commensurate with their status and give appropriate weight to their importance. Collectively these requirements will ensure all habitats are protected appropriately. No further changes required.
The use of native species in planting on sites is set out in Policy DM16. The Plan should be read as a whole so it is not necessary to repeat this in site policies. No changes required.
Natural England has confirmed to CCC that they are not taking on any additional new Area of Outstanding Natural Beauty (AONB) designation projects at the current time. They have also advised that there is no formal application process for National Park or National Landscape (AONB) designation and that any future search will be England-wide. As such, the site allocation is not considered premature and Natural England are not objecting to the site allocation in principle. A copy of the Natural England letter confirming their position in December 2023 is attached at Appendix 3.
A full Plan Viability Assessment has been undertaken which shows the site, with the required infrastructure identified, is viable to develop. No changes required.
Where relevant design guidance in the Neighbourhood Plans for Little Baddow, Sandon and Danbury will be used to assist in masterplanning and planning application process for the site. No changes required.
To meet our development needs it is inevitable that some agricultural land will be used for development.
The site a greenfield site but not ‘Green Belt’ land, where different planning policy and guidance applies.
Policy S7 tested a range of reasonable alternative options and sites. Alternative spatial strategies and sites for allocation in the Local Plan are covered in more detail within the Spatial Strategy Topic Paper and IIA.
The detailed mix of employment uses and size and type of units will be determined through the masterplan process. No changes required.
The Housing Trajectory and timings within it are established through the Council’s Five Year Housing Land Supply Methodology (April 2024). The Trajectory is updated annually, and the Pre-Submission Local Plan uses the latest available Housing Site Schedule (April 2024).
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process.

Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.

Strategic Growth Site 16b – Land adjacent to A12 Junction 18 Employment Area

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Strategic Growth Site 16b – Land adjacent to A12 Junction 18 Employment Area	5	4331	4337	4348

It should be noted that in some cases, members of the public raised similar points to stakeholders listed in brackets. This is especially the case in relation to comments made by Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group to this Strategic Growth Site which have been replicated and amplified by many individuals. To avoid duplication, these comments have not been repeated in the public comments. However, this does not affect the consultation process as this report focuses on the main issues received rather than the number of representations to any individual section of the plan.

Summary of Representations – main issues and suggested changes:

- Inconsistent with two very recently adopted neighbourhood plans (Little Baddow Neighbourhood Plan (2023) and the Sandon Neighbourhood Plan (2023)) as well as with the Reg 15 Submission Version of the emerging Danbury Neighbourhood Plan (2024)
- The site is not needed in the Plan, the housing numbers could be met by extending North East Chelmsford Garden Community
- Building more at North East Chelmsford Garden Community would be more suitable as it has the infrastructure in place already, and would preserve this rural area, its good quality farmland and protect the community here (Little Baddow Society, Danbury Parish Council)
- All of the previous five options included additional growth in North East Chelmsford Garden Community so why is development not going there
- The housing numbers are not needed until the end of the Plan period so it is premature to consider the site now
- Development should be on brownfield sites, not greenfield sites
- This is Green Belt land and should not be built on
- Green Belt land to the southwest of Chelmsford should be considered instead (Boreham Conservation Society)
- A continuation of development between Regiment Way and the route of the new NE Bypass to the West of Broomfield would be better (Boreham Conservation Society)
- The site is in an unsuitable location, detached from Chelmsford. Development would result in urban sprawl and there should be no development to the east of the A12 as it is a defensible boundary (Boreham Conservation Society)

- Unacceptable loss of high grade agricultural land (CPRE Essex, Boreham Conservation Society, Danbury Parish Council)
- There is no evidence showing actual land quality, only general agricultural land classifications have been provided (Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)
- Additional crime in the area
- The site was not selected in the current adopted Local Plan and nothing has changed for the reasons it was not selected then, so it should not go ahead now (Danbury Parish Council)
- No evidence that a Gypsy and Traveller site is needed, and this is not a suitable location for one
- Support the cluster of employment opportunities coming forward at Locations 3, 16a and 16b that will help strengthen Chelmsford's economy (Wates Developments and Hammonds Estates LLP, CNG Fuels)
- Support for the range and types of uses in the allocation but consider it should be a minimum of 55,000 sqm, or state in the policy that more than 43,000 sqm will be supported where it can be successfully demonstrated as deliverable through the planning application processes (Pigeon (Sandon) Ltd)
- The site is in single ownership and there has been pre-application engagement so there is no need for the requirement for a masterplan in the policy. If the requirement remains request paragraph 7.386 is amended to read 'The development of the site will be subject of a masterplan agreed with the Council prior to the determination of a planning application' (Pigeon (Sandon) Ltd)
- Standardise the buildings within the site for sustainability and emphasise active travel movement to the site for employees from the local area (Great Baddow Parish Council)
- The site should provide employment for higher paid/skilled employment areas. In particular, Business Innovation Hub, Corporate Offices, Research and Development Centres, Co-Working Spaces, Incubators and Accelerators, High-Tech Manufacturing, commitments to apprenticeships and working with local schools to develop career pathways, and research and new methods of food production, to mitigate the decrease in agricultural land (Great Baddow Parish Council)
- Employment space should be closer to the City Centre with better transport links
- The employment space should be smaller than proposed
- Support for additional employment in the area
- Support Movement and Access bullet 2 that site access must be provided "in a manner that complements and does not prejudice access to East Chelmsford Garden Community (Hammonds Farm)" (Wates Developments and Hammonds Estates LLP)
- Site can come forward via an access which is completely independent of Hammonds Farm and does not prejudice access to Hammonds Farm. Notwithstanding, fully committed to working collaboratively with 16a to ensure site access arrangements and connections are deliverable in respect of both sites (Pigeon (Sandon) Ltd)
- Essex County Council's document 'SEND Sufficiency Plan For Engagement Autumn 2023' identifies a lack of special educational needs schools in the east of Essex. Due to the number of schools proposed at site 16a, consider

the development of a SEND school for children aged up to 16 years (and beyond if possible) to be located to the east of Chelmsford for the provision of children and young people in east Essex (Maldon District Council)

- Remove reference to early years and childcare nursery in paragraph 7.389 as there is not a policy requirement for one on this site (Essex County Council)
- No infrastructure in place to support this development (roads, healthcare – GPs and Hospitals, dentists, education, waste water and sewerage, emergency services) (Boreham Conservation Society, Woodham Walter Parish Council, Danbury Parish Council)
- There are opportunities to improve the National Cycle Network in the area, including improvements to NCN1 which has some significant issues deterring its use (Cycling UK)
- The proposed cycle route link to Boreham junction will be very important to provide an active travel link to Beaulieu Station, North Chelmsford and a link to the countryside for leisure cyclists and is a better alternative to the existing cycle route (Cycling UK)
- Site infrastructure requirements, bullet 1, amend to read 'Provide safe and convenient pedestrian and cycle links to Sandon Park and Ride and to the east of the site, and routes associated with the East of Chelmsford allocations including East Chelmsford Garden Community (Hammonds Farm)' (Essex County Council)
- Pedestrian and cycle links to the south are not necessarily the most desirable in terms of connectivity and desire lines for movement. The policy should allow for greater flexibility including exploring options for links to the east of the site to connect to the wider road and footpath network (Pigeon (Sandon) Ltd)
- No suitable mitigation measures set out for transport/highways impacts (Little Baddow Society)
- There should be an emphasis of active and sustainable travel for workers on the site (Great Baddow Parish Council)
- Concern over the impact on A12 Junction 18 and if congested traffic will use local roads (Great Baddow Parish Council)
- The impact assessment indicates that the development in this location will cause issues on the A12 between J17 and J19, which National Highways has no plans to mitigate
- The proposed mitigation to reduce congestion on the A414 acknowledges that this will drive more rat-running through Little Baddow and Sandon, exacerbating an already significant problem
- Encourage ongoing discussions with the Public Transport Operator and the Local Highway Authority to assist with the continuing delivery of infrastructure in Growth Area 3 (Basildon Borough Council)
- Traffic congestion will impact wider Villages and areas such as Little Baddow, Great Baddow, Bicknacre, Danbury, Sandon and Boreham, Woodham Walter, as well as residents from Maldon (Chelmer Valley Landscape Group, Little Baddow Society, Boreham Conservation Society, Little Baddow History Centre, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Woodham Walter Parish Council, Danbury Parish Council)
- Unacceptable impact on the local (rat-running and congestion, including the A414 and Eves Corner) and strategic road (A12 capacity and junctions) networks with no evidence to support the proposal (Chelmer Valley

Landscape Group, Little Baddow Society, Boreham Conservation Society, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Woodham Walter Parish Council, Danbury Parish Council)

- Will result in delays along the A414 from Danbury for buses from SWF and Maldon unless dedicated bus lanes are factored into the road improvements along this section of the A414 (South Woodham Ferrers Residents Party, Danbury Parish Council)
- More traffic onto the A130/A12 causing further commuter delays at the Howe Green and Sandon junctions. There may also be negative effects on the use of the Sandon Park and Ride (South Woodham Ferrers Residents Party)
- Impact of wider projects including the Lower Thames crossing, A12 widening, Norwich to Tilbury Pylons, Bradwell power station on traffic flows has not been considered (Boreham Conservation Society)
- The impact of additional houses in North East Chelmsford Garden Community would be less on local roads and the A12 than this location
- No traffic modelling has taken place to support this site
- Traffic modelling evidence is insufficient and the impact of the proposed development on the main road network (A12 and A414) is highly likely to be severe (Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Danbury Parish Council)
- The site currently floods, and this will be made worse both within and around the site if built on. This could impact rivers if suitable waste water/sewerage facilities are not sufficient to deal with flooding and climate change impacting the health of waterway users as well as pollution to wildlife (Chelmer Valley Landscape Group)
- Insufficient modelling has been undertaken to review the full effects of flood risk, including future climate change and if this will adversely affect flooding (Chelmer Valley Landscape Group, Little Baddow Society, Boreham Conservation Society, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Danbury Parish Council)
- Significant areas of the allocation lie within Flood Zone 2 and 3. The site allocation does not pass the sequential test as there are reasonably available sites appropriate for the proposed development in areas with a lower risk of flooding
- Pollution and harm to the river environment from the development, including the Chelmer and Blackwater Navigation Landscape Conservation Area (Chelmer Valley Landscape Group, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Woodham Walter Parish Council)
- Additional pressure on the Chelmer and Blackwater Navigation for recreational purposes including walking, cycling, canoeing, paddle-boarding and boating as well as visitor parking without any proposals to provide improvements or mitigation (Chelmer Valley Landscape Group)
- The proposed new bridge will split the development in half, be unduly prominent in the river valley, create noise and moving visual intrusion, and be detrimental to the character and appearance of the designated Chelmer and Blackwater Navigation Conservation Area and views from Boreham House. No amount of landscape enhancement will mitigate the harm it will cause (Essex Waterways Ltd, Chelmer Valley Landscape Group, Boreham Conservation Society)

- Impact on users' enjoyment of existing footpaths and rivers for recreation and pleasure
- Harm to the rural landscape and urbanisation of the area, including Waterhall Meadow, an ancient flood meadow (CPRE Essex, Little Baddow Society, Boreham Conservation Society, Danbury Parish Council)
- The impact on the landscape would be damaging and hard to mitigate (Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)
- Increased air pollution
- Harm to the natural environment and protected areas of wildlife/habitats in the vicinity (CPRE Essex, Essex Wildlife Trust, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)
- Harm to wildlife in the area and loss of habitat for species including, muntjac, bats, badgers, foxes, birds (Little Baddow Society, Boreham Conservation Society, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)
- There are several areas of Lowland Mixed Deciduous Woodland, which are Priority Habitat Woodland, within or adjacent to the site which need to be considered. Lowland Mixed Deciduous Woodlands are on the Priority Habitat Inventory, England. Fragmentation of woodland reduces its ecological value and woodlands can suffer loss or deterioration from development nearby (Forestry Commission England)
- Any planning application for major residential development at the East Chelmsford Growth location should be required to include a robust assessment of the residual recreational impact of the development on the nearby SSSI's, local wildlife sites and ancient woodlands, and that mitigation measures are included where appropriate. This should take account of cumulative development in the area (Essex Wildlife Trust, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)
- The site has been submitted for consideration for it to be designated as an Area of Outstanding Natural Beauty/National Landscape and proposals for development are premature unit this has been considered by Natural England (Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group, Danbury Parish Council)
- Supportive of the Historic and Natural Environment, and Design and Layout principles (Pigeon (Sandon) Ltd)
- A Heritage Impact Assessment (HIA) should be undertaken in advance of Regulation 19 to determine whether the site is suitable for allocation, to inform its capacity, and to identify any necessary mitigation and enhancement measures. If the site is deemed suitable, incorporate any mitigation and enhancement measures into the site policy (Historic England)
- Impact on heritage and archaeological assets in the area (Little Baddow Society, Little Baddow History Centre, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)
- It is not yet known whether the site contains a viable minerals resource that would require extraction prior to development (Little Baddow Society, Little Baddow History Centre, Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group)

- The site falls below the threshold for the need to carry out a Minerals Resource Assessment so remove requirement from the site policy (Essex County Council)
- Houses should not be built close to the pylons on site
- Support for the provision of open spaces, sports, and physical activity provided in the policy (Sport England)
- The delivery of Site 16b is conditional upon the masterplan of Site 16a, and consequently the expectation of delivery by 2030 maybe unrealistic (Greystoke CB)
- Buildings should be sustainably built (Great Baddow Parish Council)
- A Waste Infrastructure Assessment is not required as the affected area will fall outside of the proposed red line boundary for future planning applications (Pigeon (Sandon) Ltd)
- Joint working between the Councils is needed to ensure there are no detrimental impacts on Basildon Borough and its residents from development in Growth Area 3 (Basildon Borough Council).

CCC response to the comments made
This site is for an employment allocation and matters raised which relate to housing or other issues directly within or relating specifically to Site 16a are covered in the feedback for Site 16a.
The policy requirement to protect important views into and through the site from across the Chelmer Valley has been expanded to also include reference to Danbury Ridge.
The policy requirement to mitigate the visual impact of the development has been expanded to include the impact of lighting.
The policy requirement to provide for a mix of building sizes and styles including building design measures to soften visual impact has been expanded to ensure layout, scale, massing and materials are included in this consideration.
The Landscape Sensitivity and Capacity Study 2024 notes that the site has moderate overall landscape sensitivity rating, with a low landscape value rating, and medium to high overall capacity rating. The policy includes requirements to conserve and enhance the local landscape character and has been amended to identify further views to be protected and measures to soften the developments visual impact.
As with all other relevant site allocations the requirement for a masterplan to be agreed with the Council prior to the submission of a planning application has been amended to be required prior to the determination of a planning application.
All site allocation figure is ‘around’ and would allow for more units to come forward if the site can accommodate it in a sustainable manner. This is the approach used consistently through the Plan. No changes required.
The policy requirement to provide safe and convenient pedestrian and cycle connections has been expanded to include connection within the site and to the wider area including to local bus stops, Sandon Park and Ride, Woodhill Road, routes associated with the East of Chelmsford allocations including East Chelmsford Garden Community (Hammonds Farm) and Danbury and the east of the site.
The requirement for a Waste Infrastructure Assessment has been removed following advice from the Waste Authority (ECC), as the entrance to site 16B is not within 250m of the Waste Consultation Area for Sandon Quary.

Suitable brownfield sites have been allocated within the Urban Area. There are not sufficient brownfield sites to meet the Local Plan's development requirements so greenfield sites must be allocated.
The site is allocated for the needs and uses as identified in the Council's Employment Land Review. For this site that is Use Classes E(g)(i-iii), B2 and B8. Thes site policy also allows for other appropriate ancillary employment generating uses so provides flexibility for a range or suitable uses. No changes required.
Reference to early years and childcare nursery in the Reasoned Justification has been removed as ECC has confirmed that there is not a requirement for one on this site.
The infrastructure necessary to support this site allocation is set out within the site policy and Policy S9. Relevant changes have been made to these policies based on the infrastructure needs identified in the updated IDP.
The Council undertook various Heritage Impact Assessments to inform the Local Plan, with a specific assessment being undertaken for the Hammonds Farm site and wider area which covers 16b. Reference to heritage assets which require consideration are included in the policy requirements and Reasoned Justification. No changes required.
CCC has raised the consideration of a special educational needs (SEND) school with ECC through the Duty to Cooperate. More certainty would be needed on the type of provision needed and the fit with ECC's overall strategy. Not enough detailed evidence to change the Plan currently, but CCC will review after Pre-Submission consultation.
Financial contributions to the delivery of the Chelmsford North East Bypass (CNEB) has been removed as a policy requirement as the full CNEB is not required to support the Local Plan growth. Contributions towards, or the provision of, other sections of the CNEB are a requirement of site SGS6, 7a, 7b, 7c and 8 as they are directly related to the need for these sections.
The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This is given in Appendix 2 and includes a review of the Transport Technical Note, prepared by Stomor (June 2024) on behalf of Little Baddow, Danbury, Boreham and Sandon Parish Councils. Essex Highways response has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform the Pre-Submission Local Plan.
The highways modelling undertaken for the Local Plan is strategic and area-wide in nature. More detailed modelling to assess the impact of proposed development on the local road network and the detailed mitigation required to accommodate new trips associated with it, will be required and undertaken as part of the planning application process for developments identified as preferred sites in the Local Plan.
Updated junction modelling has been undertaken as part of the Pre-Submission Local Plan Highways Modelling Appraisal. Early concept development accesses onto the wider road network are also included in the latest Local Plan Pre-Submission modelling, based on outline developer proposals.
Overall, the Pre-Submission Local Plan Highways Modelling Appraisal, undertaken by Essex Highways, concludes that by maximising the potential for sustainable accessibility to and from the sites along the A12 corridor, the impact on the strategic highway network should not be considered severe. However, continued discussions with National Highways will be necessary to best ensure that future

development growth in Chelmsford can be supported by the strategic highway network over the long-term.
As with other site allocations where there may be mineral recourses a Minerals Resource Assessment is required to be undertaken. No changes required.
CCC has raised the consideration of a special educational needs (SEND) school with ECC through the Duty to Cooperate. More certainty would be needed on the type of provision needed and the fit with ECC's overall strategy. Not enough detailed evidence to change the Plan currently, but CCC will review after Pre-Submission consultation.
The plan is informed by an up to date and proportionate flood risk evidence base including Level 1 and 2 SFRAs and Sequential & Exception Test supported by detailed modelling. The flood risk reports make use the most recent national policy and legislation available at the time of writing (Autumn 2024, pre the 12th December 2024 NPPF) and are informed by discussions with the Environment Agency, considers risks from all sources of flooding and include climate change modelling of surface water risk and fluvial risk from Sandon Brook.
As stated in the NPPF, the exception test is a method used to demonstrate that flood risk to people and property will be managed appropriately, where alternative sites at a lower flood risk are not available. The exception test is applied following the sequential test.
The Local Plan is informed by an Air Quality Assessment 2024 which overall concludes that the impact of the Local Plan in 2041 can be considered negligible for all pollutants.
Natural England has confirmed to CCC that they are not taking on any additional new Area of Outstanding Natural Beauty (AONB) designation projects at the current time. They have also advised that there is no formal application process for National Park or National Landscape (AONB) designation and that any future search will be England-wide. As such, the site allocation is not considered premature and Natural England are not objecting to the site allocation in principle. A copy of the Natural England letter confirming their position in December 2023 is attached at Appendix 3.
Where relevant design guidance in the Sandon Neighbourhood Plan will be used to assist in the Masterplanning and planning application process for the site. No changes required.
To meet our development needs it is inevitable that some agricultural land will be used for development.
The site a greenfield site but not 'Green Belt' land, where different planning policy and guidance applies.
Policy S7 tested a range of reasonable alternative options and sites. Alternative spatial strategies and sites for allocation in the Local Plan are covered in more detail within the Spatial Strategy Topic Paper and IIA.
The delivery of Site 16b is not conditional upon the masterplan of Site 16a. They can come forward independently of one another. The expected delivery timeframe is therefore considered reasonable. No changes required.
The policy requires the development to avoid ecological impacts and provide on-site ecological mitigation, compensation and enhancement measures. With the Reasoned Justification setting out that ecological assets on the site shall be maintained and enhanced, with the local wildlife sites Old Hare Wood to the north east and Sandon Pit to the south being protected. The design of the scheme should also enhance and protect Sandon Brook, which runs along the eastern

boundary of the site, and which is recognised as being important for biodiversity. No changes required.
Relevant buildings on site will be required to be built in accordance with Policy DM31 to ensure they are built in a sustainable manner. The Plan should be read as a whole, so no changes required.

Location 10 – South Woodham Ferrers

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Location 10 – South Woodham Ferrers	2	5	25	25

Summary of Representations – main issues and suggested changes:

- Support expressed (Sport England)
- Traffic concerns from this site and other sites proposed in both Chelmsford and Maldon
- Proposed capacity improvements on A132/B1012 are not sufficient
- Retail offer in SWF is limited, increasing the retail offering would provide employment opportunities
- Improve bus services that connect to Chelmsford, Baddow, Danbury and Bicknacre and employment areas
- Better pedestrian and cycle connection is needed including safe crossing points on Burnham Road
- Rail service is at capacity with little or no potential for future expansion (South Woodham Ferrers Residents Party)
- Increase inclusivity for accessibility and teens/young adults
- Flooding concerns
- New education and healthcare facilities are needed
- Habits have changed following Covid. Use more brownfield sites for housing need and retain green space for future generations and wildlife (South Woodham Action Group)
- Create a public woodland north of the site managed in perpetuity to encourage habitat improvement and countryside access (South Woodham Ferrers Residents Party)
- Minor policy change suggested to policy and supporting text to add ‘and police facilities as required by Essex Police’ (Essex Police)
- Refer to `multifunctional’ green infrastructure to ensure consistency throughout the Plan (Essex County Council)
- Amend to reflect the provision of proportionate financial contributions towards the co-located primary and early years nursery (Essex County Council)
- Refer to active and sustainable travel (Essex County Council)
- Provide a safe traffic free environment around school pedestrian entrances in line with in ECC’s Developers’ Guide to Infrastructure Contributions (Essex County Council)

- Support expressed but policy should remain generic in terms of its requirements including around 1,200 homes, around 1,000 sqm, avoid ‘maximise’, and for proposals to generally accord with an approved masterplan (Vistry Group)
- Amend to ensure CIL compliant requirements and reflect evidence provided with the recent planning application in terms of infrastructure (Vistry Group)
- There is limited capacity for growth at SWF Water Recycling Centre. Policy should require the need to demonstrate sufficient capacity for wastewater treatment and disposal to serve the site, including sewer connections and mitigation within the sewerage network (Anglian Water)
- The South East (Inshore) Marine Plan must be considered and a Marine Conservation Zone (MCZ) assessment may need to be undertaken. Project-level Habitats Regulations Assessment (HRA) must consider all impacts taken alone or in combination (Natural England)
- Refer to the marine/coastal/intertidal element particularly where both terrestrial and marine habitats have the potential to be impacted by the policy and interpretation of the South East Marine Plan (Marine Management Organisation)
- Expand policy to require the development to prepare a strategy for responding to the National Grid Electricity Transmission plc (NGET) overhead transmission lines within the site which demonstrates how the NGET Design Guide and Principles have been applied at the masterplanning stage and how the impact of the assets has been reduced through good design (National Grid Electricity Transmission).

CCC response to the comments made
Reference added to the Policy relating to layout responding to overhead transmission lines.
Changing the requirement from maximising sustainable travel would make the policy less effective; reference added to active and sustainable travel.
The Policy and Reasoned Justification have been adjusted to refer to facilities alongside infrastructure, and to police, ambulance and fire and rescue.
Text relating to provision of education has been clarified.
Any revised or subsequently approved masterplan would be the relevant and up to date masterplan against which development proposals would be assessed.
Infrastructure requirements are sufficiently flexible to accommodate on-site provision or financial contributions.
Reference to marine and terrestrial planning is addressed in Section 1 – adding here would be repetition.
Policy amended to demonstrate that there is sufficient capacity for wastewater treatment and disposal to serve the site, including any associated sewer connections and any required mitigation within the sewerage network.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
The amount and type of development reflects the resolution to grant planning permission and the number is reflected in the 5 year Housing Sites Schedule April 2024. If this permission is not implemented and a new proposal comes forward, the site capacity will be considered on its individual merit.

Location 11 – Bicknacre

Growth Site 11a – South of Bicknacre

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Site 11a – South of Bicknacre	1	2	8	8

Summary of Representations – main issues and suggested changes:

- Support for 42 new homes whilst acknowledging the adopted plan was for 35 new homes (Woodham Ferrers and Bicknacre Parish Council)
- The site is near Thrift Wood SSSI and all identified impacts on the designated features of the SSSI will need to be considered. The cumulative effect on Thrift Wood SSSI of all the Bicknacre sites should be considered (Natural England)
- Minor policy changes suggested relating to green and blue infrastructure, education provision and pedestrian and cycle connections (Essex County Council)
- There are woodlands on the site or nearby including Ancient Semi Natural Woodland, Plantations on Ancient Woodland Sites and Priority Habitat Woodland. Decisions should be made in line with the NPPF. The Council is also referred to Natural England and Forestry Commission's Standing Advice on Ancient Woodland (Forestry Commission England)
- Amend to reflect what has occurred on site, including the removal of large sections of hedgerow along the Main Road
- Insufficient infrastructure to support the development, including lack of public transport, the condition of roads and capacity at doctors' surgery
- Will place further strain on existing facilities
- Traffic, congestion, noise, light and road safety concerns during the construction phase of the development.

CCC response to the comments made
The site has been built-out as is therefore deleted from the plan.

Growth Site 11b – Land at Kingsgate, Bicknacre

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Site 11b – Land at Kingsgate, Bicknacre	0	54	64	64

Summary of Representations – main issues and suggested changes:

- Object to the allocation. Reasons include the requirement for further housing in Bicknacre has already been satisfied since the adoption of the existing Local Plan (2020) and we are discussions to find an affordable housing site; any further housing need could be accommodated at Hammonds Farm or elsewhere; flooding concerns and drainage capacity and loss of Grade 3 agricultural land (Woodham Ferrers and Bicknacre Parish Council)
- All Bicknacre sites should take account of the cumulative effect on Thrift Wood SSSI (Natural England)
- There are woodlands on the site or nearby including Ancient Semi Natural Woodland, Plantations on Ancient Woodland Sites and Priority Habitat Woodland. Decisions should be made in line with the NPPF. The Council is also referred to Natural England and Forestry Commission's Standing Advice on Ancient Woodland (Forestry Commission England)
- The site is approximately 300m of Bicknacre Priory Scheduled Monument. A Heritage Impact Assessment (HIA) should be undertaken in advance of Regulation 19 to determine whether the site is suitable for allocation, to inform its capacity, and to identify any necessary mitigation and enhancement measures. If the site is deemed suitable it is expected that mitigation and enhancement measures are incorporated into the Policy (Historic England)
- Minor policy changes suggested relating to education provision for clarification and consistency (Essex County Council)
- Insufficient infrastructure to support the development, including lack of public transport, police and fire services, the condition of roads and capacity at doctors' surgery and the school
- Will place further strain on existing facilities and utilities
- Bicknacre has met its housing requirement with circa. 77 new homes being built/under construction and further affordable housing may be delivered – the village does not need more housing/there is sufficient housing to meet local need
- Increase in traffic, congestion and on street parking and the degradation of the condition of existing roads – concerns on pedestrian and road safety and quality of life
- Impact on settlement character and the community
- Concerns on flooding, including Sandon Brook overflowing
- Drainage issues/lack of capacity and sewerage concerns
- Loss of agricultural land
- Impact on wildlife and their habitats
- Noise and air pollution impacts – Chelmsford's Air Quality Strategy June 2022 is out of date and air pollution is likely to increase
- Concerns on pedestrian safety, including children and the vulnerable and the lack of/suitable existing footways within the village
- Impact on adjacent bridleway
- Concerns on antisocial behaviour
- Traffic, congestion, noise, light and road safety concerns during the construction phase of the development.

CCC response to the comments made

The site allocation is supported by the plan evidence base including a Strategic Flood Risk Assessment, Landscape Sensitivity and Capacity Study 2024 and traffic modelling. The Small Sites Planning Briefs/Concept Framework 2024 considers that there are no overriding site constraints which mean that the site is unsuitable or undeliverable.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
To meet our development needs it is inevitable that some agricultural land will be used for development.
Site policy includes new requirements to undertake an archaeological assessment and to assess, and where appropriate mitigate, the potential cumulative effect on the designated features of Thrift Wood SSSI.
The 'small sites' (under 1ha) are an important part of the Plan to ensure delivery of a variety of sites in a timely manner, and to meet NPPF requirements to provide 10% of small sites. The enlargement of these sites would be likely to put greater pressure on local facilities and infrastructure which could make such sites unsuitable for development.
Heritage Impact Assessments have been undertaken and were published alongside the Preferred Options Local Plan. Site policies consider significance of designated and non-designated heritage assets.
The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
The Local Plan is informed by an Air Quality Assessment 2024 which overall concludes that the impact of the Local Plan in 2041 can be considered negligible for all pollutants.
Policy DM17 provides protection for preserved woodlands.
Minor policy amendment made in respect to requirements for education provision.

Growth Site 11c – Land West of Barbrook Way, Bicknacre

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Site 11c – Land West of Barbrook Way, Bicknacre	0	104	123	123

Summary of Representations – main issues and suggested changes:

- Support in principle but a greater site area and quantum of development should be allocated. The allocation ignores the Council's evidence base of the site's suitability and sustainability to deliver more houses – the wording of the policy is not justified or effective (Wellbeck Strategic Land V Limited)
- Consider the criteria of the Strategic Housing and Employment Land Availability Assessment has been applied inconsistently – the site should score higher (Wellbeck Strategic Land V Limited)
- Object to the allocation. Reasons include the requirement for further housing in Bicknacre has already been satisfied since the adoption of the existing Local Plan (2020) and we are discussions to find an affordable housing site; any further

housing need could be accommodated at Hammonds Farm or elsewhere; flooding concerns and drainage capacity; loss of Grade 3 agricultural land and there is a ransom strip between Barbrook Way and the site so the site is not deliverable (Woodham Ferrers and Bicknacre Parish Council)

- All Bicknacre sites should take account of the cumulative effect on Thrift Wood SSSI (Natural England)
- There are woodlands on the site or nearby including Ancient Semi Natural Woodland, Plantations on Ancient Woodland Sites and Priority Habitat Woodland. Decisions should be made in line with the NPPF. The Council is also referred to Natural England and Forestry Commission's Standing Advice on Ancient Woodland (Forestry Commission England)
- Development would not affect any designated heritage assets (Historic England)
- Minor policy changes suggested relating to education provision for clarification and consistency (Essex County Council)
- Insufficient infrastructure to support the development, including lack of public transport, police and fire services, the condition of roads and capacity at doctors' surgery and the school
- Will place further strain on existing facilities and utilities
- Bicknacre has met its housing requirement with circa. 77 new homes being built/under construction and further affordable housing may be delivered – the village does not need more housing/there is sufficient housing to meet local need
- Increase in traffic, congestion and on street parking and the degradation of the condition of existing roads – concerns on pedestrian and road safety and quality of life
- Impact on settlement character and the community
- Concerns on flooding, including Sandon Brook overflowing
- Drainage issues/lack of capacity and sewerage concerns
- Loss of Grade 3 agricultural land – the site has always been used for animal grazing
- Impact on wildlife and their habitats
- Disagree with the site's rating in the Strategic Housing and Employment Land Availability Assessment – it has been incorrectly scored and should be lower
- Impact on neighbour amenity
- Junction/road safety concerns, including the location of the drop off point of The Sandon School bus at Barbrook Way/Priory Road
- Noise and air pollution impacts – Chelmsford's Air Quality Strategy June 2022 is out of date and air pollution is likely to increase
- Concerns on pedestrian safety, including children and the vulnerable and the lack of/suitable existing footways within the village
- There is a ransom strip at the entrance at the site – the site is not deliverable
- Site contributes to community wellbeing
- Concerns on soil composition and subsidence
- There is a water main running through the site – homes cannot be built on this or within its easements
- Concerns for protected trees within and near the site
- Concerns on antisocial behaviour

- Heritage impacts
- Traffic, congestion, noise, light and road safety concerns during the construction phase of the development.

CCC response to the comments made
The site allocation is supported by the plan evidence base including a Strategic Flood Risk Assessment, Landscape Sensitivity and Capacity Study 2024 and traffic modelling. The Small Sites Planning Briefs/Concept Framework 2024 considers that there are no overriding site constraints which mean that the site is unsuitable or undeliverable.
The Local Plan is informed by an Air Quality Assessment 2024 which overall concludes that the impact of the Local Plan in 2041 can be considered negligible for all pollutants.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
The Council is confident that the site can be accessed from Barbrook Way and that the site is deliverable – see Appendix 4 for a letter from the site promoters' Welbeck Land.
To meet our development needs it is inevitable that some agricultural land will be used for development.
Site policy includes new requirements to undertake an archaeological assessment and to assess, and where appropriate mitigate, the potential cumulative effect on the designated features of Thrift Wood SSSI.
The 'small sites' (under 1ha) are an important part of the Plan to ensure delivery of a variety of sites in a timely manner, and to meet NPPF requirements to provide 10% of small sites. The enlargement of these sites would be likely to put greater pressure on local facilities and infrastructure which could make such sites unsuitable for development.
Heritage Impact Assessments have been undertaken and were published alongside the Preferred Options Local Plan. Site policies consider significance of designated and non-designated heritage assets.
The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
Policy DM17 provides protection for preserved woodlands.
The site policy requires the retention of existing natural landscaping and trees on the boundary of the site.
Minor policy amendment relating to requirements for education provision.

Location 12 – St Giles, Bicknacre

Growth Site 12 – St Giles, Moor Hall Lane, Bicknacre

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Growth Site 12 – St Giles, Moor Hall Lane, Bicknacre	1	1	5	5

Summary of Representations – main issues and suggested changes:

- Support the allocation (Woodham Ferrers and Bicknacre Parish Council)
- Minor policy changes suggested relating to 'multifunctional' green infrastructure and pedestrian and cycle connections (Essex County Council)
- All Bicknacre sites should take account of the cumulative effect on Thrift Wood SSSI (Natural England)
- Limited existing infrastructure to support the development, including public transport, the condition of road and capacity at doctors' surgery
- Will place further strain on existing facilities.

CCC response to the comments made
Minor policy wording changes to refer to 'multifunctional' green infrastructure and to 'safe and convenient' pedestrian and cycle connections.
Site policy includes new requirements to undertake an archaeological assessment and to assess, and where appropriate mitigate, the potential cumulative effect on the designated features of Thrift Wood SSSI.
The site policy requires financial contributions to services and facilities including healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
The site policy requires the development is provide, or make financial contributions to, new or enhanced sport, leisure and recreation facilities.

Location 13 – Danbury

Strategic Growth Site Policy 13 – Danbury

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Strategic Growth Site Policy 13 – Danbury	1	3	9	9

Summary of Representations – main issues and suggested changes:

- Add additional text in relation to safe and convenient pedestrian and cycle connections, and active and sustainable travel (Essex County Council)
- Include reference to traffic management measures at Eves Corner (Essex County Council)
- Add reference to the proximity to proposed schools and social infrastructure offered by the Hammonds Farm proposal (Wates Developments and Hammonds Estates LLP)
- Recommend an additional policy to recognise the cumulative recreational pressure on SSSIs and wildlife sites (Natural England)
- There are woodlands on or in proximity to the allocation including Ancient Semi Natural Woodland, Plantations on Ancient Woodland Sites and Priority Habitat Woodland. Decisions should be made in line with the NPPF and the

Council is referred to the Natural England and Forestry Commission's Standing Advice on Ancient Woodland (Forestry Commission England)
- Allocation is welcomed but it could deliver a greater number of homes (Martin Grant Homes)
- New housing could come forward in Danbury outside of the Neighbourhood Plan process if housing needs are not being met within an expected timeframe (Richborough)
- Concern about the recreational pressure and physical damage on vulnerable sites and land within the National Trust's ownership (National Trust)
- Additional site is promoted off Runsell Lane (Gleeson Land).

CCC response to the comments made
Bullet added to require contributions towards addressing cumulative recreational pressure on SSSIs in proximity to sites; and Reasoned Justification clarified on how measures will be costed.
Reference added to safe and convenient pedestrian and cycling connections.
Text relating to traffic management measures at Eves Corner has been updated.
Policies S4 and DM17 protects sites of international, national, regional and local nature conservation importance including Ancient Woodlands.
The allocation of around 100 homes is supported by the plan evidence base including a Strategic Flood Risk Assessment, Landscape Sensitivity and Capacity Study 2024 and traffic modelling.
Policy has been expanded to require contributions towards addressing cumulative recreational pressure on SSSIs in proximity to the site.

Location 17 – East Hanningfield

Growth Site 17a – Land North of Abbey Fields, East Hanningfield

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Growth Site 17a – Land North of Abbey Fields, East Hanningfield	1	16	18	18

Summary of Representations – main issues and suggested changes:

- Support the allocation and policy requirements, subject to the relevant legislation and planning policy (Chelmsford Diocese Board of Finance)
- A greater quantum of development may be possible on the site (Chelmsford Diocese Board of Finance)
- The delivery of site could be within two years of the adoption of the Local Plan (Chelmsford Diocese Board of Finance)
- Development would not affect any designated heritage assets (Historic England)
- Minor policy changes suggested relating to education provision for clarification and consistency (Essex County Council)
- Development would be out of keeping with the existing settlement pattern

- Impact on local services
- Lack of public transport
- Site access is below standards
- Junction/road safety concerns
- Concerns on flooding
- Increase/exacerbation of traffic, congestion and on street parking in Abbey Fields
- No sewerage capacity
- Loss of wildlife habitat/impact on biodiversity, trees (including preserved trees) and landscaping
- Noise and pollution impacts
- A right of access by the owners of the adjacent field may impact on the allocation.

CCC response to the comments made
Minor policy amendment relating to requirements for education provision.
The site allocation is supported by the plan evidence base including Strategic Flood Risk Assessments, Water Cycle Studies, Landscape Sensitivity and Capacity Study, new Air Quality Assessment and traffic modelling. The Small Sites Planning Briefs/Concept Framework 2024 considers that there are no overriding site constraints which mean that the site is unsuitable or undeliverable.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
The 'small sites' (under 1ha) are an important part of the Plan to ensure delivery of a variety of sites in a timely manner, and to meet NPPF requirements to provide 10% of small sites. The enlargement of these sites would be likely to put greater pressure on local facilities and infrastructure which could make such sites unsuitable for development.
Heritage Impact Assessments have been undertaken and were published alongside the Preferred Options Local Plan. Site policies consider significance of designated and non-designated heritage assets.
The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
The site policy requires the character, scale and layout of the development to have regard and respond to the site's surrounding context.
The site policy requires the retention of existing natural landscaping and trees in and on the boundary of the site.

<u>Growth Site Policy 17b – Land East of Highfields Mead, East Hanningfield</u>

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Growth Site Policy 17b – Land East of Highfields Mead, East Hanningfield	1	15	18	18

Summary of Representations – main issues and suggested changes:

- Support the allocation (Hawridge Land and Mrs A Mossman)
- The allocation boundary should reflect the total site area (circa 1.25ha) and the quantum of housing should be flexible/increased (circa 30-35 dwellings) to maximise the site's deliverability (Hawridge Land and Mrs A Mossman)
- Development would not affect any designated heritage assets (Historic England)
- Minor policy changes suggested relating to education provision for clarification and consistency (Essex County Council)
- Limited existing infrastructure to support the development, including public transport and capacity at doctors' surgery and school
- Loss of wildlife habitat/impact on biodiversity, trees and landscaping
- Increase in traffic, congestion and on street parking
- Concerns on pedestrian safety
- Concerns on flooding and drainage
- Impact on settlement character
- Impact on neighbour amenity
- No sewerage and water capacity
- Noise and pollution impacts.

CCC response to the comments made
The site allocation is supported by the plan evidence base including Strategic Flood Risk Assessments, Water Cycle Studies, Landscape Sensitivity and Capacity Study, new Air Quality Assessment and traffic modelling. The Small Sites Planning Briefs/Concept Framework 2024 considers that there are no overriding site constraints which mean that the site is unsuitable or undeliverable.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
The 'small sites' (under 1ha) are an important part of the Plan to ensure delivery of a variety of sites in a timely manner, and to meet NPPF requirements to provide 10% of small sites. The enlargement of these sites would be likely to put greater pressure on local facilities and infrastructure which could make such sites unsuitable for development.
Heritage Impact Assessments have been undertaken and were published alongside the Preferred Options Local Plan. Site policies take into account significance of designated and non-designated heritage assets.
The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
The site policy requires the retention of existing natural landscaping and trees on the boundary of the site.
Minor policy amendment relating to requirements for education provision.

Special Policy Areas (SPA)

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Special Policy Areas (paragraphs 7.464-7.465)	0	0	0	0
SPA1 – Broomfield Hospital Special Policy Area	0	1	1	1
SPA2 – Chelmsford City Racecourse Special Policy Area	0	0	1	1
SPA3 – Hanningfield Reservoir Special Policy Area	0	1	3	3
SPA4 – RHS Hyde Hall Gardens Special Policy Area	0	0	2	2
SPA5 – Sandford Mill Special Policy Area	1	0	3	3
SPA6 – ARU Writtle Special Policy Area	2	1	7	7

SPA1 – Broomfield Hospital Special Policy Area

Summary of Representations – main issues and suggested changes:

- Support SPA rationale. Designate the former BAE Systems site as a SPA given its unique and historical context and potential need to provide future specialist electronic technology floorspace related to defence (Rosehart Properties Ltd).

SPA2 – Chelmsford City Racecourse Special Policy Area

Summary of Representations – main issues and suggested changes:

- For consistency with other parts of the plan, amend policy to refer to ‘active and sustainable means of travel’ (Essex County Council).

SPA3 – Hanningfield Reservoir Special Policy Area

Summary of Representations – main issues and suggested changes:

- Welcome involvement early in application process to comment on details of avoidance and mitigation measures deemed necessary for proposed developments that may impact on Hanningfield Reservoir SSSI (Natural England)
- Support SPA policy approach but expand policy to include proposals for renewable energy which would reduce reliance on the grid and contribute towards achieving climate change goals (Essex & Suffolk Water)
- Remove policy requirement to show a demonstrable need for a renewable energy scheme as the treatment works is a regulated industry (Essex & Suffolk Water)
- Delete requirement for very special circumstances for water infrastructure and ancillary development to demonstrable need and be directly associated with

the role, function and operation of the operation of the site (Essex & Suffolk Water)
- Include new text to support, in principle, appropriate proposals including additional infrastructure requirements linking the site to the wider water infrastructure network, renewable energy and leisure activities (Essex & Suffolk Water).

SPA4 – RHS Hyde Hall Gardens Special Policy Area

Summary of Representations – main issues and suggested changes:

- For consistency with other parts of the plan, amend policy to refer to 'active and sustainable means of travel' (Essex County Council)
- RHS Hyde Hall causes significant traffic congestion at its special events, this will worsen as it expands but there is no provision to address this or improve the access road in application 21/01961/OUT.

SPA5 – Sandford Mill Special Policy Area

Summary of Representations – main issues and suggested changes:

- For consistency with other parts of the plan, amend policy to refer to 'active and sustainable means of travel' (Essex County Council)
- Fully support. This SPA needs to move forward as quickly as possible (Essex Waterways Ltd).

SPA6 – ARU Writtle Special Policy Area

Summary of Representations – main issues and suggested changes:

- Support. The facility is located within Writtle Key Service Settlement and is significant for educational excellence and driving the local economy. As such, the plan should provide new housing allocations near the ARU campus (Vistry Group)
- For consistency with other parts of the plan, amend policy to refer to 'active and sustainable means of travel' and 'safe and convenient' cycling and walking connectivity (Essex County Council)
- Expand to note the importance of ARU Writtle to supporting local employment to reduce inequality, opportunities to shift to a greener economy and investment into the rural economy (Essex County Council)
- Support the policy principles but the current designation will not ensure future development reflects the operational and functional requirements of ARU Writtle. The need for its growth and success is reflected throughout the plan. As such, amend policy to acknowledge that ARU intends to grow and expand to sustain its long-term future success and to delete the requirement to identify a 'demonstrable need' every time an application is determined (ARU)
- Expand the SPA boundaries of the Titchmarsh Campus and Rural Education and Training Centre along Cow Watering Lane to reflect the new and improved facilities/development that will be required (ARU)

- Inclusion of the Titchmarsh Campus does not affect any designated heritage assets (Historic England)
- Support sympathetic improvements to the ARU Writtle site in line with Green Belt policy. The Norwich to Tilbury powerline proposals will have a significant impact on ARU Writtle (Writtle Parish Council).

CCC response to the comments made
Changes proposed for SPA3 including deleting the requirement for water infrastructure and ancillary development to demonstrable very special circumstances have not been taken forward as this would contradict national planning policy.
Policy SPA2, SPA3, SPA4, SPA5 and SPA6 have been amended to include active and sustainable means of transport
Policy SPA6 has been updated to include reference to National Cycle Route 1 which runs through the site.
Policy and SPA boundaries has been amended to include the Titchmarsh Campus.
Reference to 'demonstrable need' in SPA6 has not been removed as this was retained at the previous Local Plan examination.

Protecting and Securing Important Assets

This section of the consultation document provides other non-strategic policies of the Local Plan that will shape Chelmsford's development opportunities whilst protecting its important physical attributes.

Securing the right types of homes

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Policy DM1 – Size and Type of Housing	3	9	20	20
Policy DM2 – Affordable Housing and Exception Sites	3	4	19	19
Policy DM3 – Policy DM3 – Gypsy, Traveller and Travelling Showpeople Sites	2	0	3	3

Policy DM1 – Size and Type of Housing

Summary of Representations – main issues and suggested changes:

- Support for the requirement for 100% of all new homes to be accessible and adaptable to enable people to live independently for longer (Mid and South Essex Integrated Care Board, Essex County Council, Dominus Chelmsford Limited)
- ECC has commissioned `Supported and Specialist Housing and Accommodation Needs Assessment' which will inform the Specialist

Residential Accommodation requirements when complete (Essex County Council)

- Give more support and priority to build to rent (Wates Development and Hammonds Estates LLP, Dominus Chelmsford Limited)
- Self and custom build plots should be taken forward on standalone sites not part of strategic housing allocations (Bloor Homes – Eastern)
- The 5% requirement for self and custom build plots should be capped at 5% (Bloor Homes – Eastern)
- Self-build homes should be encouraged rather than required by evidence of local need (Whirledge & Nott, Croudace)
- The impact of self-build homes on development viability should also be considered (Whirledge & Nott, Croudace)
- The Specialist Residential Accommodation requirement is too generic and needs to specifically allocate land to meet older persons housing need identified in the SHNA (Bloor Homes – Eastern, Sedum Ltd)
- Provision of Specialist Residential Accommodation for older and disabled people is too low to meet the identified needs and does not provide enough certainty that these needs will be met in a planned way which supports the optimum arrangement of support services (Lewis and Scott Retirement Living)
- A dedicated specialist housing policy which allows development adjacent to defined settlement boundaries would be more effective (Lewis and Scott Retirement Living)
- The process for determining when a commuted sum in lieu of on-site provision of Specialist Residential Accommodation is acceptable, how the sums will be used and what part ECC plays in this should be clarified (Essex County Council)
- All new homes should be required to have solar panels built in (Sandon Parish Council)
- Disagree with the requirement for 100% of new dwellings to be accessible and adaptable based on the additional cost of achieving these standards (Chelmsford Garden Community Consortium, Vistry)
- The policy might become outdated as building regulations and market requirements evolve across the plan period (Higgins Group, Hill Residential Limited)
- Need to justify requiring 100% of all new homes to be accessible and adaptable as it is not currently a requirement and if it does become a requirement, it does not need to be included in policy (Home Builders Federation, Dandara, Bellway)
- The requirement for 100% accessible and adaptable homes should only apply to houses and ground floor flats (Chelmer Housing)
- Set a requirement that a percentage of market homes are wheelchair accessible (Mid and South Essex Integrated Care Board)
- Specify M4(3)b to ensure the wheelchair housing is provided with adaptions already in place on completion (Chelmer Housing)
- The Specialist Residential Accommodation and self-build requirements should not apply to 100% affordable housing or affordable-led development and sites should be allocated to meet these needs rather than a requirement on strategic sites (Chelmer Housing)

- The changes to Table 4 in terms of specifying a range, not a specific percentage mix, of housing is supported but flexibility should be increased to 10 percentiles and include a link to the most recent evidence base (Dandara)
- Include Table 4 in the policy to ensure it is adhered to (Dandara PO24-9372)
- Include additional policy text to enable a flexible approach to the mix in Table 4 (Higgins Group, Hill Residential Limited, Dominus Chelmsford Limited)
- Need a clearer distinction between greenfield strategic allocations and urban developments on the requirement for and provision of housing mix, Specialist Residential Accommodation and self-build homes (Dominus Chelmsford Limited)
- Flawed assumptions underpin the Council's viability assessment and the evidence for conclusions in para. 8.6 on the viability of Build to Rent schemes is unsound (Dominus Chelmsford Limited)
- Proposal for a different mix of affordable housing expressed as a percentage range that should apply to all affordable housing tenures (Chelmer Housing)
- Explain the policy thresholds in supporting text (Whirledge & Nott, Croudace)
- Include a co-living policy to avoid potential appeals or unregulated forms of co-living. Wording for a dedicated policy provided (Highgate Capital Limited)
- Include reference to the Nationally Designed Space Standards or greater (Chelmer Housing).

CCC response to the comments made
Various policy amendments have been made including requiring 50% of new dwellings to be accessible and adaptable dwellings (Part A ii) and a new requirement for large greenfield sites to also provide older persons market housing.
How the sums will be used and what part Essex County Council will play in commuted sums in lieu of on-site provision of Specialist Residential Accommodation will be covered in Planning Obligations Supplementary Planning Document.
Requirements for the installation of solar panels on new homes is covered by Policy DM31.
The Planning Obligations Supplementary Planning Document will promote wheelchair user dwellings on ground floor in flatted schemes where possible, but the policy target is acceptable.
The Planning Obligations Supplementary Planning Document will encourage wheelchair accessible market homes in Specialist Residential Accommodation. This is supported by the updated Local Plan Viability Assessment, 2024.
The Planning Obligations Supplementary Planning Document will clarify that 100% affordable housing led schemes will be exempt from providing self-build requirements. The policy remains appropriate.
The policy thresholds are tested in the relevant evidence base documents and explained where not linked to an evidence base document.
The policy requirements reflect the most up to date national planning and guidance and the Local Plan evidence base including the latest Strategic Housing Needs Assessment (SHNA) (2023), including the 2024 addendum report.
The impact of self-build homes on development viability is considered in the updated Local Plan Viability Update, 2024.

The Local Plan Viability Update 2023 and 2024 has been undertaken in accordance with national policy and guidance and clearly sets out the balance of policy priorities.
The Council's expectations for co-living housing proposals will be set out in the Co-Living Housing Planning Advice Note which will be published for consultation in early 2025.
Requirements for all new dwellings to adhere to the Nationally Described Space Standards is addressed in Policy DM26.
The Local Plan will be reviewed every five years. This will address relevant changes such as changes to Building Regulations. Higher accessibility standards have been tested in the Local Plan Viability Update 2024 should Building Regulations change in the regard.

DM2 - Affordable Housing and Exception Sites

Summary of Representations – main issues and suggested changes:

- Support policy as drafted (Wates Developments and Hammonds Estates LLP)
- Support but amend to allow for the submission of a Viability Appraisal at application stage should there be any unique circumstances or changes to local market conditions (Bloor Homes (Eastern))
- Support but add to A) i that this is subject to viability to not undermine deliverability (Vistry Group)
- Support but unclear why community-led exception sites cannot include neighbourhood plan allocations (Broomfield Parish Council)
- Clarification sought on whether Broomfield is eligible for a Rural Exception Site following the Community Governance Review (Broomfield Parish Council)
- To not impact on the delivery of affordable homes, amend policy to state that First Homes will not be required on 100% affordable, affordable-led and rural exception site developments (Chelmer Housing Partnership (CHP))
- For clarification, add to para. 8.23 the requirements in terms of wider types of affordable (Chelmer Housing Partnership (CHP))
- To not jeopardise site viability, policy must recognise that a tenure mix in 2024 (at para. 8.23) will unlikely reflect the needs in subsequent years (Obsidian Strategic Asset Management Ltd)
- Policy should only allow 35% market homes to increase the number of genuinely affordable home supported by a return to council house building, suspension of the Right to Buy for 10 years and increased role for co-operative developers
- Policy should recognise that First Homes is not mandatory and no more than a material consideration (Obsidian Strategic Asset Management Ltd)
- Part ii is inconsistent with national policy and should be amended to expect the mix, size, type and cost of housing to have close regard to the most recent evidence on housing needs, such as the Strategic Housing Market Assessment and monitoring data (Home Builders Federation)
- Should be flexibility in the mix set out in para 8.23 especially on percentage discount on First Homes because of the national cap at £250,000 (Home Builders Federation)

- For clarification, amend policy to add where sites deliver 100% affordable schemes the revised mix should be 70% Affordable Rent, and 30% Shared Ownership and that the Local Housing Allowance cap should be removed on affordable rent where the site is delivered as 100% affordable or affordable-led development (Chelmer Housing Partnership (CHP))
- Table 5 should apply across all affordable tenures. Request that the affordable housing unit mix (including rent and shared ownership) is 1 Bed 5-10% 2 Bed 20-25% 3 Bed 40-50% 4 Bed 15-20% (Chelmer Housing Partnership (CHP))
- Clarify detail in Table 5 and that it is only to be used as a guide as opposed to absolute requirements in decision-making (Hill Residential Ltd, Higgins Group, Dandara)
- To ensure adherence with Table 5, add into the policy alongside a reference to using the most recent housing needs assessment (Dandara)
- A one-sized fits all 35% requirement discourages a brownfield first approach (Dominus Chelmsford Limited)
- Include reference to the national policy of Vacant Building Credit (Dominus Chelmsford Limited)
- To help the NHS recruit and retain staff, consider the need for affordable housing for NHS staff and those employed by other health and care providers in housing needs assessments, site selection and allocation policies (NHS Property Services Ltd)
- Amend to allow groups of affordable housing within large strategic allocations/development phases (rather than 'pepper potting') as this would achieve the policy's social objectives (Whirledge & Nott, Croudace Homes)
- Do not support. Amend policy to enable a viability case to be made at the planning application stage (Croudace Homes, Whirledge & Nott)
- Do not support. Amend policy to allow a transparent open book viability assessment to be undertaken and for development to come forward with an alternative approach to affordable housing delivery should site-specific viability matters arise at the planning application stage (Martin Grant Homes)
- Do not support. The Viability study should be re-run for sheltered and extra care housing incorporating our revised assumptions relating to for example, unit size, unit mix and non-chargeable/communal. This is likely to show that sheltered and extra care housing is unviable (McCarthy Stone)
- Consider the Retirement Housing Consortium paper 'A briefing note on viability' prepared for Retirement Housing Group by Three Dragons, May 2013 (updated February 2016 ('RHG Briefing Note') (McCarthy Stone)
- An unprecedented housing crisis is currently affecting the Council, therefore a new policy DM2 Part C is proposed, which would supersede DM2 Parts A and B and come into force when more than 250 households are living in temporary accommodation, and it has been accepted by the Council that there is a duty to house them (Omtech Services Limited).

CCC response to the comments made
The policy requirements including those related to First Homes have been updated to reflect the Strategic Housing Needs Assessment (SHNA) 2024 addendum report.
Amendments added from the Planning Obligations Supplementary Planning Document to clarify how affordable housing should be designed within

developments to maximise tenure integration to achieve mixed, inclusive and sustainable communities
The policy requirements are supported by the Local Plan Viability Assessment, 2024.
Para. 73 of NPPF states that exception site for community-led housing should be on land which is not already allocated for housing – no change required to Policy DM1.
The rural exception site part of the policy relates to retention orders imposed by Statutory Instruments referenced in Planning Obligations Supplementary Planning Document.
Exemptions to First Homes requirements are set out in para. 66 of NPPF – no change required to Policy DM2.
The Local Plan will be reviewed every five years to reflect the most up to date national planning and guidance and any updated Local Plan evidence base.
Prioritisation mechanisms for First Homes will be set out in the updated Planning Obligations Supplementary Planning Document.
The 35% affordable housing requirement will help to address Chelmsford's housing crisis declared by the Council in 2022. Levels of homelessness also continue to rise and increasing the percentage of affordable housing on greenfield sites would be unviable. It is not necessary to introduce an additional threshold based on the numbers of households living in temporary accommodation but the proposed Housing Requirement is being increase, which in turn will increase affordable housing delivery across the plan period.
Changes have been made to explain the circumstances where the Council will consider a viability assessment at planning application stage.
Changes have been made to explain what the requirements for Affordable Private Rent dwellings in Build to Rent Schemes will be and the reasons for this.

Policy DM3 – Gypsy, Traveller and Travelling Showpeople Sites

Summary of Representations – main issues and suggested changes:

- Support (Wates Developments and Hammonds Estates LLP, Writtle Parish Council)
- Add 'Green Wedge' in (A)i to align with para. 8.42 (Broomfield Parish Council).

CCC response to the comments made
The policy requires new sites to be outside the Green Belt unless very special circumstances apply, in line with national planning policy. New text has been inserted to clarify that new sites shouldn't be in the Green Wedge unless it can be demonstrated that a development would not adversely impact on the role, function, character and appearance of the Green Wedge. Clarification has also been provided on new sites in the rural area not having a significant impact the intrinsic character and beauty of the countryside in the supporting / explanatory text.

Securing Economic Growth

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Policy DM4 – Employment Areas and Rural Employment Areas	7	0	8	8
Policy DM5 – Designated Centres	2	0	3	3

Policy DM4 – Employment Areas and Rural Employment Areas

Summary of Representations – main issues and suggested changes:

- Support for the policy (CNG Fuels Ltd, JH Farming Ltd, Pigeon Sandon Ltd, Wates Developments and Hammonds Estates LLP, Essex County Council)
- Expand policy criteria for allow redevelopment or changes of use from E(g), B2 and B8 Use Classes to uses which provide low carbon/renewable energy transport refuelling infrastructure" (CNG Fuels Ltd)
- Add additional text into para. 3 of the policy for proposals to consider opportunities to promote multifunctional green infrastructure (Essex County Council)
- Support for the approach but new allocations may not, per se, lead to overall economic growth if they lead to older premises becoming less attractive and lost through change of use (Basildon Borough Council)
- Consider amending to strengthen the policy for example, make it clearer that the redevelopment of existing employment areas should be for employment uses only and planning permission would only be granted for a change of use from employment where the first four criteria apply, and/or there is no reasonable prospect for the site to continue in those uses (Basildon Borough Council).

CCC response to the comments made
Policy adjusted to refer to multifunctional green infrastructure.
The criteria relating to redevelopment of existing uses offers flexibility and a positive approach as set out in the NPPF. Policy S2 supports development that provides opportunities for renewable and low carbon energy technologies and schemes so no changes are considered necessary to S8.
Policy already sets out the circumstances where redevelopment or change of use from E(g), B2 and B8 Use Classes will be granted.

Policy DM5 – Designated Centres

Summary of Representations – main issues and suggested changes:

- Support for the policy (Wates Developments and Hammonds Estates LLP, Dominus)
- Car parking at South Woodham Ferrers must be protected if the town centre is to flourish.

CCC response to the comments made
There are no proposals affecting car parking in SWF in the plan.

Protecting the Countryside

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Policy DM6 – New Development in the Green Belt	2	0	6	6
Policy DM7 – New Buildings and Structures in the Green Wedge	7	1	14	14
Policy DM8 – New Buildings and Structures in the Rural Area	2	2	4	4
Policy DM9 – Infilling in the Green Belt, Green Wedge and Rural Area	1	0	4	4
Policy DM10 – Change of Use (Land and Buildings) and Engineering Operations	1	0	4	4
Policy DM11 – Extensions to Existing Buildings within the Green Belt, Green Wedge and Rural Area	1	0	4	4
Policy DM12 – Rural and Agricultural/Foresty Workers' Dwellings	1	0	3	3

Policy DM6 – New Development in the Green Belt

Summary of Representations – main issues and suggested changes:

- Support expressed (Chelmsford & Central Essex RSPB Local Group, and Wates Developments and Hammonds Estates LLP)
- Alter Green Wedge boundary and extend the western boundary of Widford Employment Area (Map 3) to support growth in this sustainable location, with existing transport and pedestrian links (Saxtons 4x4)
- Policy contradicts the strategy of resisting development in the Green Belt and contradicts the Settlement Hierarchy which confirms that settlements within the Green Belt are sustainable (Hill Residential Ltd and Higgins Group)
- Policy lacks clarity and fails to link to the strategic policies (Hill Residential Ltd and Higgins Group).

CCC response to the comments made
The Green Wedge is a locally important designation. Changes to the Green Wedge boundaries to allow development growth has been discounted as there is sufficient and suitable land elsewhere to meet development needs in a sustainable way.

The policy seeks to protect the Green Belt in accordance with National Planning Policy. The Settlement Hierarchy informs planning decisions in relation to the most sustainable settlements but does not override National Policy regarding Green Belt – no changes considered necessary.

Policy DM7 – New Buildings and Structures in the Green Wedge

Summary of Representations – main issues and suggested changes:

- Support expressed (Chelmsford & Central Essex RSPB Local Group, and Wates Developments and Hammonds Estates LLP, Broomfield Parish Council)
- An alteration to the Green Wedge boundary should be considered and an extension to Widford Employment Area (Map 3) allowed (Saxtons 4x4)
- For consistency with other parts of the plan refer to `active and sustainable travel' in criteria v (Essex County Council)
- In terms of C) replacement buildings within a floodplain, there is opportunity to seek betterment and long-term sustainability even if the flood hazard affecting existing development may not increase, this should be clarified in the policy (Environment Agency)
- Policy is overly restrictive without a detailed assessment to ensure land within the Green Wedge performs its intended purposes
- Be more flexible to residential development, particularly where it would provide opportunities to enhance the Green Wedge
- Supports the intentions behind the principle of the Green Wedge but questions the approach to the Green Wedge, when other less onerous planning policies can protect open countryside if the housing strategy is performing as it should (Obsidian Strategic Asset Management Ltd)
- Various comments from landowners/developers promoting their sites for development in the Green Wedge
- Expand policy to include small-scale commercial development that is sustainably located, accessible and well connected (Cliffords Group Ltd and Hill Farm (Chelmsford) Ltd).

CCC response to the comments made
For consistency with other parts of the Plan reference is made to 'active and sustainable travel' in Part A, criteria v.
The Green Wedge is a locally important designation. Changes to the Green Wedge boundaries to allow development growth has been discounted as there is sufficient and suitable land elsewhere to meet development needs in a sustainable way. No Green Wedge Review is required, and the deletion of Green Wedge policies would be inappropriate.
The Plan and its policies should be read as a whole. Flooding is covered by DM18 which requires measures to mitigate flood risk, safe means of escape, not increase flood risk elsewhere etc. Such issues will be addressed through site-specific Flood Risk Assessments – no changes considered necessary.
Policy will ensure that the Green Wedge is sufficiently protected and Part A, criteria vi allows for appropriate facilities e.g. for sport – no changes considered necessary.

The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.

Policy DM8 – New Buildings and Structures in the Rural Area

Summary of Representations – main issues and suggested changes:

- Support expressed (Chelmsford & Central Essex RSPB Local Group, and Wates Developments and Hammonds Estates LLP)
- Part B should be more flexible (Mr Parker)
- Address inconsistences regarding allowing new Buildings/Dwellings on Previously Developed Land (Mr Parker)
- Amend to refer to renewable energy and low carbon development, related transport infrastructure and specific locational requirements of different sectors to support the rural economy (CNG Fuels).

CCC response to the comments made
Requirements for renewable energy and low carbon development and transport infrastructure are adequately covered by Policies S2 and DM19. No changes considered necessary.
The policy is considered clear in how development on previously developed land will be considered. No changes considered necessary.

Policy DM9 – Infilling in the Green Belt, Green Wedge and Rural Area

Summary of Representations – main issues and suggested changes:

- Support expressed (Wates Developments and Hammonds Estates LLP)
- Policy needs to mention flood risk constraints (Environment Agency)
- Overly restrictive to development in the Green Wedge
- Unclear how a decision-maker will determine if a gap is ‘small’ and is contrary to the NPPF.

CCC response to the comments made
The Plan and its policies should be read as a whole. Flooding is already covered by DM18 which requires measures to mitigate flood risk, safe means of escape, not increase flood risk elsewhere etc. Such issues will be addressed through site-specific Flood Risk Assessments. No changes considered necessary.
The Reasoned Justification sets out how to determine a ‘small’ gap. No changes considered necessary.

Policy DM10 – Change of Use (Land and Buildings) and Engineering Operations

Summary of Representations – main issues and suggested changes:

- Support expressed (Wates Developments and Hammonds Estates LLP)
- Policy needs to mention flood risk constraints (Environment Agency)

- Refer to Policy S8 of the Essex Minerals Local Plan and emphasise the importance of effective early engagement with relevant site promoters (Essex County Council).

CCC response to the comments made
The Plan and its policies should be read as a whole. Flooding is already covered by DM18 which requires measures to mitigate flood risk, safe means of escape, not increase flood risk elsewhere etc. Such issues will be addressed through site-specific Flood Risk Assessments. No changes considered necessary.
Planning applications where consultation with the Minerals Planning Authority is required are already picked up at any relevant pre-application processes or the 'vetting' stage of a planning application. No changes considered necessary.

Policy DM11 – Extensions to Existing Buildings within the Green Belt, Green Wedge and Rural Area

Summary of Representations – main issues and suggested changes:

- Support expressed (Wates Developments and Hammonds Estates LLP)
- Policy needs to mention flood risk constraints (Environment Agency)
- Refer to Policy S8 of the Essex Minerals Local Plan and emphasise the importance of effective early engagement with relevant site promoters (Essex County Council).

CCC response to the comments made
The Plan and its policies should be read as a whole. Flooding is already covered by DM18 which requires measures to mitigate flood risk, safe means of escape, not increase flood risk elsewhere etc. Such issues will be addressed through site-specific Flood Risk Assessments. No changes considered necessary.
Planning applications where consultation with the Minerals Planning Authority is required are already picked up at any relevant pre-application processes or the 'vetting' stage of a planning application. No changes considered necessary.

Policy DM12 – Rural and Agricultural/Foresty Workers' Dwellings

Summary of Representations – main issues and suggested changes:

- Support expressed (Wates Developments and Hammonds Estates LLP)
- Policy needs to mention flood risk constraints (Environment Agency)
- Refer to Policy S8 of the Essex Minerals Local Plan and emphasise the importance of effective early engagement with relevant site promoters (Essex County Council).

CCC response to the comments made
The Plan and its policies should be read as a whole. Flooding is already covered by DM18 which requires measures to mitigate flood risk, safe means of escape, not increase flood risk elsewhere etc. Such issues will be addressed through site-specific Flood Risk Assessments. No changes considered necessary.

Planning applications where consultation with the Minerals Planning Authority is required are already picked up at any relevant pre-application processes or the 'vetting' stage of a planning application. No changes considered necessary.

Protecting the Historic Environment

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Policy DM13 – Designated Heritage Assets	3	0	3	3
Policy DM14 – Non-Designated Heritage Assets	2	0	2	2
Policy DM15 - Archaeology	0	1	2	2

Policy DM13 – Designated Heritage Assets

Summary of Representations – main issues and suggested changes:

- Support expressed (C J H Farming Ltd, Pigeon (Sandon) Ltd, Historic England).

CCC response to the comments made
No changes.

Policy DM14 – Non-Designated Heritage Assets

Summary of Representations – main issues and suggested changes:

- Support expressed (Historic England, Writtle Parish Council).

CCC response to the comments made
The policy has been updated to provide clarity in the considerations of identifying non-designated heritage assets in planning decisions.

Policy DM15 – Archaeology

Summary of Representations – main issues and suggested changes:

- Support expressed (Historic England)
- To reflect para. 8.128 and national policy, re-word the policy to recognise instances where the level of significance of the remains do not warrant protection, preservation or enhancement, and their loss could be justified. New policy text is proposed (Wates Developments and Hammonds Estates LLP).

CCC response to the comments made

Planning legislation and case law are based on preservation; therefore it is inappropriate to amend the wording.
Additional wording has been added to the policy and Reasoned Justification following the archaeological evidence base to clarity archaeological significance.

Protecting the Natural Environment

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Policy DM16 – Protection and Promotion of Ecology, Nature and Biodiversity	16	6	32	32
Policy DM17 – Trees, Woodland and Landscape Features	5	5	14	14
Policy DM18 – Flooding/SUDS	4	1	12	12
Policy DM19 – Renewable and Low Carbon Energy	2	1	6	6

Policy DM16 – Protection and Promotion of Ecology, Nature and Biodiversity

Summary of Representations – main issues and suggested changes:

- Support policy (Wates Developments and Hammonds Estates LLP, Dominus Chelmsford Limited, Natural England, (Pigeon (Sandon) Ltd, Chelmsford and Central Essex RSPB, Anglian Water)
- Local Plan should set criteria based policies to ensure the protection of designated biodiversity and geological sites. Such policies should clearly distinguish between international, national and local sites (Natural England)
- Sites of Special Scientific Interest (SSSIs), European sites (Special Areas of Conservation and Special Protection Areas) and Ramsar sites should be included on the Policies Map (Natural England)
- Reference to swift boxes and bricks is welcome but there is no indication which is preferable – policy change suggested to require swift bricks in accordance with best practice (Swifts Local Network: Swifts & Planning Group)
- Minor policy changes suggested relating to green infrastructure and reference to Essex Green Infrastructure Standards 2022 (Essex County Council)
- Would like to see a distinction between public green spaces and habitats for wildlife as it is not explicitly clarified (Environment Agency)
- Specify that native species should always be used for biodiversity landscaping/planting (Environment Agency)
- Plan makes no explicit preference to retaining riparian corridors as public open space over private gardens (Environment Agency)

- Add a link to the Essex LNRS in the policy (Anglian Water)
- Oppose the 20% BNG requirement on Garden Community sites as it exceeds national requirements (Bellway Homes, Bellway Strategic Land, Chelmsford Garden Community Consortium)
- No assessment of the cumulative impact of the 20% BNG requirement and the tree planting requirement (3 trees per dwelling) (Bellway Homes, Bellway Strategic Land)
- 20% BNG would undermine viability and significantly reduce the capacity of development sites which will impact the Council's growth requirements (Bellway Homes, Bellway Strategic Land)
- The viability impacts of the costs related to BNG habitat management and BNG credits has not been appropriately assessed. The Biodiversity Net Gain and Local Nature Recovery Strategies – Impact Assessment (BNG IA) is based on broad costs, not specific development sites and does not have up-to-date or realistic estimate costs (Dandara Eastern, Home Builders Federation)
- BNG IA makes no consideration to a potential reduction in the developable area to accommodate BNG provision – this assumption should be tested (Home Builders Federation)
- BNG IA underestimates the cost of delivery BNG off-site (Bellway Homes, Home Builders Federation)
- For typology testing, undertake sensitivity testing to understand the impacts of delivering BNG off-site (Home Builders Federation)
- Amend policy to clarify that developers would not be required to meet standards beyond national and local policy (Home Builders Federation)
- Concerns on the deliverability of providing 20% minimum on large sites, which are usually greenfield, as they usually have a relatively high BNG baseline value (Whirledge & Nott, Croudace Homes)
- The 20% biodiversity net gain requirement on large sites has not been justified in evidence base as being financially viable or practically deliverable/viable (Whirledge & Nott, Croudace Homes)
- The viability of delivery 20% BNG need to be tested locally and on current market prices (Chelmsford Garden Community Consortium, Vistry Group)
- 20% BNG should be expressed as a target/aspiration rather than a requirement (Whirledge & Nott, Croudace Homes, Chelmsford Garden Community Consortium, Vistry Group)
- No evidence demonstrating the implications of what a 20% (BNG) uplift would require and whether the proposed allocations can achieve this in comparison to omitted sites that have a stronger BNG potential (Obsidian Strategic Asset Management Ltd)
- More sites will be needed to deliver the Local Plan housing requirement as 20% BNG will reduce developable areas resulting in lower yield of dwellings on sites. Further work is needed with site promoters to identify sites (Obsidian Strategic Asset Management Ltd)
- Policy repeats the BNG requirements of Strategic Policy S4 and national policy – the policy should avoid unnecessary repetition/it is an unnecessary

duplication and remove references to the amount of BNG requirement (Dandara Eastern, Hill Residential Ltd, Higgins Homes)

- The requirement for Garden Communities to deliver 20% BNG should be clarified in terms of when it is delivered, i.e. per phase or on completion (Chelmsford Garden Community Consortium, Vistry Group)
- For Garden Communities the policy should require 10% BNG per phase with an aspiration of 20% overall net gain (Chelmsford Garden Community Consortium, Vistry Group)
- Policy should be flexible to take account of; site specific circumstances which may require off-site provision, the viability considerations of off-site vs. on-site and circumstances where off-site provision outside of the administrative may deliver substantial benefits (Chelmsford Garden Community Consortium, Vistry Group).

CCC response to the comments made
Sites of Special Scientific Interest (SSSIs), European sites (Special Areas of Conservation and Special Protection Areas) and Ramsar sites are shown on the Draft Policies Map.
Reasoned Justification has been amended to clarify the relationship between public open space and SANGS, and biodiversity net gain provision.
Reasoned Justification has been amended to include the use of native species for landscaping.
Reasoned Justification has been amended to include opportunities to retain riparian corridors as public open space.
Reasoned Justification has been amended to confirm that public open space requirements or the provision of SANGs are separate to biodiversity net gain and will not be considered as an alternative to or a replacement for net gain provisions, and that where possible, the provision of both on site should be segregated to ensure the quality of the habitat for wildlife is maximised.
The LNRS is at draft stage, and it is not considered appropriate to link to its specific priorities until they have been adopted.
Reasoned Justification has been expanded to clarify that major developments will be required to provide on-site measures in addition to paying the RAMS tariff to help mitigate increased recreational impacts on international coastal designated sites.
The policy requirements have been tested through the Local Plan Viability assessments.
Reasoned Justification has been amended to clarify where off-site provision will be considered.
The policy includes the BNG targets of 10% and 20% for clarity and completeness.
A range of biodiversity features that can be considered is included in the Reasoned Justification and in the Council's making Places SPD. Inclusion of a specific policy requirement to provide swift bricks is not supported. The use of swift boxes and/or bricks with depend on site-by-site circumstances and specifying a preference would be inappropriate.
Policy has been amended to note that the achievement of 20% biodiversity net gain on sites 6 and 16a will be subject to site constraints.

Policy DM17 – Trees, Woodland and Landscape Features

Summary of Representations – main issues and suggested changes:

- Support expressed (Chelmsford & Central Essex RSPB Local Group, Swifts Local Network: Swifts & Planning Group, Dandara, Pigeon (Sandon) Ltd)
- Consider adding to reasoned justification the contribution to the Big Green Internet Project that aims to connect woodlands from Tendring via Chelmsford to Epping Forest (Essex County Council)
- Add a reference to Ancient Woodlands and how they are irreplaceable habitats. As such, the policy requirement for replacement of trees of a "size and type suitable for location" may not be entirely appropriate (Forestry Commission)
- New development should consider any impacts on ancient woodland and ancient and veteran trees in line with the NPPF. Support for the Forestry Commissions conclusions (Natural England)
- Clarify the term 'preserved trees' and expand policy to include the strict protection of irreplaceable habitats (including ancient or veteran trees and ancient woodlands) as afforded by the NPPF (Wates Development and Hammonds Estates LLP)
- Amend policy to ensure existing nest sites for building-dependent species such as swifts and house martins are protected. Alternatively, mitigation should be provided (Swifts Local Network: Swifts & Planning Group)
- Part C – New Trees is supported but additional wording sought for Part C to ensure new tree planting is adequate (Wates Development and Hammonds Estates LLP)
- The requirements of Part C of three new trees per dwelling is questioned by a number of developers as:
    - Prioritising trees in the landscaping and layout may impact negatively on the design of a scheme (Dandara)
    - Quality of trees, specimen type and location best dictate tree coverage rather than a stringent quantum. For the Meadows, this would lead to over 2,400 trees which cannot be realistically accommodated (Dominus Chelmsford Ltd)
    - It may impact on viability and should be fully evidenced and considered along with the requirements for BNG (Obsidian Strategic Asset Management Ltd, Richborough, McCarthy and Stones)
- To avoid ambiguity, clarify 'significant' with regards the number of trees to be delivered on strategic employment sites (Pigeon (Sandon) Ltd, CNG Fuels).

CCC response to the comments made
The Reasoned Justification for DM16 has been amended to clarify irreplaceable habitats such as ancient woodland and ancient or veteran trees.
Policy covers ancient woodlands and aged and veteran trees found outside ancient woodlands.

Reasoned Justification has been amended to include the use of native species for landscaping.
Reasoned Justification has been to include opportunities to retain riparian corridors as public open space.
Protection for nesting birds is covered by separate legislation. However, the Reasoned Justification states that the presence of protected species is a material consideration when the Council is considering a development proposal which, if carried out, would be likely to result in harm to the species or its habitat – no further change considered necessary.
Reasoned Justification already states that trees for on-site planting will be determined by the size, position, and type of location available.
Reasoned Justification already states that a judgement will be made on a case by case basis over what will be considered 'significant' taking into account the nature, scale and size of the development, the site and immediate locality with more guidance to be set out in the Making Places SPD.
Reasoned Justification has been amended to clarify that a significant number of new trees on major new employment and infrastructure sites must be provided as part of landscaping requirements.
The policy requirements have been tested through the Local Plan Viability assessments.

Policy DM18 – Flooding/SUDS

Summary of Representations – main issues and suggested changes:

- Support expressed (Chelmsford & Central Essex RSPB Local Group, Wates Developments and Hammonds Estates LLP, Dominus Chelmsford Limited)
- Policy should not prohibit appropriate land uses such as open space or attenuation measures being in flood zones (Pigeon (Sandon) Ltd)
- Add 'unless it is demonstrated to be unviable' in relation to use of SuDS under Part C to ensure development viability is not undermined (CNG Fuels Ltd)
- Support the use of SuDS schemes where appropriate to support aquifer recharge and reduce flooding. However, use of infiltration SuDS is not appropriate on all sites. Recommend guidance be referenced: The Environment Agency's Approach to Groundwater Protection, particularly statements G1 and G9 to G13; The CIRIA C753 SUDS Manual; The Susdrain website; The Sustainable Drainage Systems: Non-Statutory Technical Standards guidance on gov.uk and the Recommendations To Update (Environment Agency)
- Support the inclusion of SuDS into sites that may come forward for redevelopment and regeneration where such features would also be beneficial for the management of surface water flooding and environmental enhancement (Environment Agency)
- The policy should include: 'B) provide a safe dry refuge above the 0.1% (1 in 1000) AEP with allowance for climate change' and 'safeguarding land from development that is required, or likely to be required, for current or future flood management' (Environment Agency)

- Amend part B) ii) to clarify that brownfield sites will be treated as greenfield with discharge rates limited to the equivalent 1 in 1 year greenfield rate unless this is demonstrated as not practical (Anglian Water Services Ltd)
- Agree that opportunities for providing betterment should be explored on strategic and regeneration sites, and through retrofitting SuDS within existing urban areas at risk of surface water flooding (Anglian Water Services Ltd)
- Add reference to integrated water management measures such as rainwater/stormwater harvesting and reuse, to minimise potable water demands through utilising non-potable water for irrigation, and flushing toilets in residential properties (Anglian Water Services Ltd)
- Final paragraph of the policy is inadequate to address surface water connections to the public sewer network and amended wording suggested to reflect discharge of surface water following the sustainable drainage hierarchy (Anglian Water Services Ltd)
- Policy needs to have flexibility in approach and allow different techniques to address site specific characteristics. Integrate reference to the Lead Local Flood Authority into the policy (Higgins Group, Hill Residential Ltd)
- Amend section C to provide more consideration to the use of Green Infrastructure SuDS together to maximise benefits through multifunctionality (Essex County Council)
- Comment from landowners/developer suggesting that their proposed development site will accord with the preferred plan (Dandara).

CCC response to the comments made
The policy does not prevent development on sites at risk of flooding where they comply with the requirements of the policy and national planning policy and guidance.
In line with the NPPG, all new development is required to incorporate water management measures to reduce surface water run-off by using for example SuDS. The Pre-Submission plan is supported by an updated Viability Report (2024).
The policy supports using SuDS but is also flexible by allowing solutions for the disposal of surface water.
Various site policy changes have been made including new requirements to provide a safe dry refuge, to manage surface water run-off so that the discharge rate will not exceed the equivalent 1 in 1 greenfield rate, for rainwater / stormwater harvesting, to the sustainable drainage hierarchy, to include reference to the utilisation of Green Infrastructure, and to clarify surface water connections to the foul sewer.
A new sentence has been added to the Reasoned Justification of Strategic Policy S2 to for developments to accord with latest technical guidance, or as updated and amended, including The Environment Agency's Approach to Groundwater Protection; The CIRIA C753 SUDS Manual; and Sustainable Drainage Systems: Non-Statutory Technical Standards – adding to DM18 would be duplication.
Policy already results in an improvement on a current situation. The Council requires site specific FRAs to provide surface water flows that mimic the greenfield runoff rate which is an improvement on the present situation as it will require water to be held on site for longer and perhaps permanently. This has

been a long-standing technical requirement which can already be found in ECC's Sustainable Drainage Design Guide and the EDG – no further changes considered necessary.
Policy DM25 addresses measures to reduce non-potable water consumption, and the use of recovered water for tasks such as flushing toilets. No change required to DM18.
Amendments have been made to Policies S2, DM24 and DM25 to require to the use of integrated water management techniques. No change to DM18 as this is specific to flooding and the measures to address this.
No change in relation to safeguarding land from development that is required, or likely to be required, for current or future flood management. At this stage, we do not have a list of sites where we can identify land to be safeguarded for flood risk management interventions.
The policy supports open space and attenuation measures in flood zones.

Policy DM19 – Renewable and Low Carbon Energy

Summary of Representations – main issues and suggested changes:

- Support expressed (Chelmsford & Central Essex RSPB Local Group, Wates Developments and Hammonds Estates LLP, CNG Fuels)
- Policy should encourage biodiversity, not just impact on it, for example by the establishment of hedgerows and buffer strips (Chelmsford & Central Essex RSPB Local Group, Essex County Council)
- Para 8.163 should refer to the EDG – Solar Farm Guiding Principles (Essex County Council)
- Make the policy and supporting paragraphs more explicit at acknowledging evolving technological carbon reduction advances such as BIO-CNG fuel for the transport sector (CNG Fuels).

CCC response to the comments made
The promotion of biodiversity is addressed in the Solar Farm SPD.
The policy scope is considered appropriate and compliant with national policy.

Delivering and protecting Community Facilities

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
DM20 – Delivering Community Facilities	3	1	6	6
DM21- Protecting Community Facilities	3	2	5	5
DM22 – Education Establishments	1	1	2	2

DM20 – Delivering Community Facilities

Summary of Representations – main issues and suggested changes:

- Support for the policy (Wates Developments and Hammonds Estates LLP, Dandara, Sport England)
- There should be sufficient provision of cemetery space (Environment Agency)
- Refer in policy to vehicle parking being standards in accordance with Policy DM27 (Essex County Council)
- The policy of protecting the Green Belt is leading to other social and economic issues within some Green Belt settlements such as a decline in community infrastructure (Barratt David Wilson (Eastern Counties)).

CCC response to the comments made
It is not considered necessary to cross reference to Policy DM27 – this would also add duplication to the plan.
Development growth in the Green Belt has been discounted as there is sufficient and suitable land is available outside the Green Belt to meet the development needs in a sustainable way. It would also undermine national planning policy.

DM21 – Protecting Community Facilities

Summary of Representations – main issues and suggested changes:

- Support for the policy (Wates Developments and Hammonds Estates LLP, Sport England)
- Support the need for applicants to provide evidence for the change of use of a public house, particularly focusing on the pub's economic viability and importance to the local community (Chelmsford & Mid Essex CAMRA)
- Support policy premise amend to make it more effective and robust in relation to the use of the term 'economically viable' as viability can be manipulated through intentionally undermining performance. A facility could be successful under an alternative operating model such as community ownership (Theatres Trust)
- Support for the provision of sufficient, quality community facilities but the policy is not flexible enough. The disposal of no longer suitable or redundant healthcare sites and properties helps to fund new or improved services. Having to meet criterion (ii) adds unjustified delay to vital reinvestment in facilities and services for the community (NHS Property Services Ltd)
- The Spatial Principles do not consider the need for sustainable new housing in Green Belt settlements to sustain their vitality and support existing community infrastructure and services (Barratt David Wilson (Eastern Counties)).

CCC response to the comments made
It is not reasonable to remove requirement Aii), proposals would still need to demonstrate these tests.
It is not necessary to add additional wording in relation to an alternative operating model.

DM22 – Education Establishments

Summary of Representations – Main Issues:

- Support as drafted (Wates Developments and Hammonds Estates LLP)
- Support principle of policy but delete requirement for expansion proposals to be considered against an approved masterplan as education priorities date quickly requiring frequent costly masterplan updates. Instead assess development proposals against prevailing plan policies (ARU).

CCC response to the comments made
Proposals for expansions would still be required to be considered against a masterplan (particularly for ARU) as it is located within a SPA where development would otherwise be constrained – no change.

Making High Quality Places

This section of the consultation document provides the basis for the promotion of Chelmsford as a high-quality place to live, work, visit and study in.

Section 9 - Making Places

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Policy DM23 – High Quality and Inclusive Design	4	1	10	10
Policy DM24 – Design and Place Shaping Principles in Major Developments	6	1	9	9
Policy DM25 – Sustainable Buildings	9	2	19	19
Policy DM31 – Net Zero Carbon Development (In Operation)	8	7	29	29
Policy DM26 – Design Specification for Dwellings	3	0	3	3
Policy DM27 – Parking Standards	1	0	1	1
Policy DM28 – Tall Buildings	2	0	4	4

Policy DM23 – High Quality and Inclusive Design

Summary of Representations – main issues and suggested changes:

- Overall support (Wates Developments and Hammonds Estates LLP, Hill Residential Ltd, Dominus Chelmsford Limited)
- Policies DM23 and DM24 appear to overlap especially in respect of major developments (Dandara)

- Expand policy to take a comprehensive and co-ordinated approach to development including respecting site constraints and utilities situated within sites (National Grid Electricity Transmission, National Grid Gas Transmission)
- A number of further design criteria are suggested to minimise fire risk and spread of fire, ensure safe access, and reduce risks to water sources (Essex County Fire and Rescue Service)
- Design should be flexible and not be over prescriptive and limiting, to account for changes in building techniques, market expectations, viability and best practice (Higgins Group)
- The cross reference to Policy DM25 is not necessary (Vistry Group)
- Clarify the supporting text to avoid contradiction with main part of policy (CNG Fuels Limited).

CCC response to the comments made
Site constraints and facilities are considered to be covered by Part A) of the Policy and specific site policies, so no change is required.
Design criteria is relation to fire safety are covered by Building Regulations, so it is not necessary to repeat them in the Policy.

Policy DM24 – Design and Place Shaping Principles in Major Developments:

Summary of Representations – main issues and suggested changes:

- Overall support for the policy (Wates Developments and Hammonds Estates LLP, Dominus Chelmsford Limited, Chelmsford & Central Essex RSPB Local Group); and in particular the reference to Sport England's Active Design Guidance (Sport England)
- Residential institutions (Class C2) should also be subject to Health Impact Assessment and to seek Livewell Accreditation (Essex County Council)
- Swift bricks should be required in accordance with best practice (Swifts Local Network: Swifts & Planning Group)
- Design codes would not be sufficiently flexible to respond to specific circumstances (CNG Fuels)
- Further definition of the circumstances where design codes would be expected would help to clarify whether both a design code and a masterplan would be required (CJH Farming, Pigeon (Sandon) Ltd).

CCC response to the comments made
Bullet 6 amended to include utilising integrated water management techniques.
A range of biodiversity features that can be considered is included in the Reasoned Justification and in the Council's making Places SPD. Inclusion of a specific policy requirement to provide swift bricks is not supported.
References in the Policy to Masterplans are considered to be clear and provide sufficient scope.

Policy DM25 – Sustainable Buildings

Summary of Representations – main issues and suggested changes:

- Overall support for the policy (Wates Developments and Hammonds Estates LLP, Chelmsford & Central Essex RSPB Local Group, CJH Farming, Pigeon (Sandon) Limited, Dominus Chelmsford Limited)
- Support the principle for a water efficiency target, but recommend a more ambitious standard of 80-100 litre/person/day (Essex County Council); 100 litre/person/day as a minimum using a fittings based approach (Anglian Water Services)
- Support for rainwater harvesting (Essex County Council, Anglian Water Services)
- SuDS can be utilised to minimise overall water use (Anglian Water Services)
- Support for development having regard to the Essex Parking Guidance, and the Electric vehicle Charge Point Strategy (Essex County Council)
- Swift bricks should be required in accordance with best practice (Swifts Local Network: Swifts & Planning Group)
- Concern at the introduction of requirements in S2, DM31 and DM25 that go beyond Building Regulations, which may impact viability and deliverability of residential development (Hopkins Homes Ltd, Dandara, Whirledge and Nott, Croudace Homes) and become out of date as standards evolve (Boyer Planning)
- Provision for electric vehicle charging is covered by Building Regulations so should not be duplicated (Hopkins Homes Ltd, Home Builders Federation, Dandara); or the policy should set out where requirements go beyond Building Regulations (Chelmsford Garden Community Consortium, Vistry Group)
- Include a threshold for provision of public EV charging points, which may not be a reasonable requirement on smaller sites (Whirledge and Nott, Croudace Homes)
- Water efficiency targets are covered by Building Regulations, and the policy does not allow for flexibility and therefore is likely to become out of date quickly (Dandara, Hill Residential Ltd)
- Policy should recommend rather than require rainwater harvesting and be limited to garden irrigation (Chelmsford Garden Community Consortium, Vistry Group)
- The threshold for BREEAM assessment should be raised to 1,000sqm, less is unlikely to lead to enhanced sustainable design (Chelmsford Garden Community Consortium, Vistry Group).

CCC response to the comments made
Policy amended to require a water efficiency standard of 90 litres/person/day; and for non-residential buildings above a threshold to meet a national water consumption measure.
Policy amended to include utilising integrated water management techniques.
EV charging point infrastructure requirements have been updated to reflect ECC's Parking Standards update; therefore the reference to the EV parking standards set out in the Policy is considered appropriate.
A range of biodiversity features that can be considered is included in the Reasoned Justification and in the Council's making Places SPD. Inclusion of a specific policy requirement to provide swift bricks is not supported.

Policy DM31 – Net Zero Carbon Development (In Operation)

Summary of Representations – main issues and suggested changes:

- Fully support the policy (Wates Developments and Hammonds Estates LLP, Dominus Chelmsford Limited, Obsidian Strategic Asset Management Ltd, Essex County Council)
- Supportive of the need to support net zero carbon development and the principles of what the policy in seeking to achieve (ARU, Chelmsford & Central Essex RSPB Local Group, Dandara, Vistry Group, Chelmsford Garden Community Consortium)
- Striving to achieve net-zero carbon homes at a faster rate than the Council's and the UK Government's target of net zero carbon emissions is commendable (McCarthy Stone, Gleeson Land)
- Support the principle of energy efficient and sustainable buildings but this should be in line with Building Regulations (Richborough, Home Builders Federation)
- Going beyond Building Regulations goes against the written Ministerial Statements, the NPPF and Planning Policy Guidance (McCarthy Stone, Croudace Homes, Whirledge & Nott, Home Builders Federation)
- Any over provision of Building Regulations should be advisory or supportive, rather than a policy requirement (Richborough)
- The impact of this policy on the viability and deliverability of residential development has not been considered in the plan, its evidence base, or by the IIA (Hopkins Homes Ltd, Home Builders Federation)
- The policy should be amended to provide flexibility with regard to achieving Net Zero Carbon depending on viability (Gleeson Land, Dandara, Croudace Homes, Whirledge & Nott, Higgins Group)
- Exceeding national requirements and setting local standards provide inconsistency across the country, hampering investment and has the potential to impact upon viability and the delivery of housing in the area (Richborough, Vistry Group, Chelmsford Garden Community Consortium, Gladman, Higgins Group, Hill Residential Ltd)
- For the policy to be flexible and justified over the plan period, the requirements need to better reflect the Building Regulations requirements and allow applicants to take a combined approach subject to each individual site (Hill Residential Ltd)
- The implications of such a policy have not been properly assessed in the supporting evidence base (Home Builders Federation)
- The Local Plan Viability Study should be updated to reflect the costs identified in Report 1 of the Essex Net Zero Policy Study – Technical Evidence (Essex County Council)
- The size threshold for requirements 1-5 to apply is too low (ARU)
- Requirement 2: Future Homes Standard will ensure all new homes to be zero carbon ready so it is unnecessary to include this as it will already be addressed through building regulations by the time the local plan review is adopted (Home Builders Federation)

- Supports the policy and the securing of financial contributions where on-site carbon mitigation requirements cannot be met. NHS property could benefit from carbon offset funds (NHS Property Services Ltd)
- Requirement 4: On-site renewable energy generation needs to be applied flexibly. The level of energy use from unregulated sources is beyond the control of the developer and as such it is unreasonable to require the developer to make a payment in order to offset use from these sources (Pigeon (Sandon) Ltd, Higgins Group, Hill Residential Ltd, Home Builders Federation)
- The use of solar PV is a key contributor to achieving Net Zero, but other technologies and approaches may be more suitable for various developments and there needs to be flexibility to deliver what is necessary for the site (Hill Residential Ltd, ARU)
- Requirement 5: Monitoring development for the first five years is beyond the scope of what local planning authorities can require of a developer. Energy use will depend significantly on the occupant and how they use it (Home Builders Federation)
- Suggest amendments to Table 7 to improve clarity, which will be reflected in a revised Essex 'model policy' document to support the policy (Essex County Council)
- Applying this policy retrospectively to allocations within the adopted Local Plan would impact their viability and deliverability (Hopkins Homes Ltd)
- Relying solely on renewable fuel provided on sites is too greater risk. A "safety net" of mains electricity from the grid should be available in case the installation, designs or calculations fall short of expectations (Chelmsford & Central Essex RSPB Local Group)
- Other local authorities are mentioning the use of sustainable building materials (such as the use of home grown timber) in their new local plans (Forestry Commission England)
- Consider developing the points raised on overheating in the Reasoned Justification into a specific plan policy to give greater weight to mitigating overheating risk in new development proposals (Essex County Council)
- The new Essex evidence-led 'model policy' to address embodied carbon emissions from new development, and its supporting evidence base, should be included as an additional policy (Essex County Council).

CCC response to the comments made
Local Authorities have statutory powers to set planning policies which require energy efficiency standards that are better than Building Regulations as long as these are evidenced and justified, and policies can be expressed using energy metrics if they are supported by an evidence base that justifies their viability. The legal justification is set out in the Essex Open Legal Advice - Energy Policy and Building Regulations (February 2024), which should be read alongside the TCPA resource page (16th July 2024) which addresses the latest situation regarding the Written Ministerial Statement (WMS) 13th December 2023, including a guest blog by Estelle Dehon KC which highlights important clarifications on the WMS 2023

confirmed through published correspondence directly with the former Secretary of State for Levelling Up, Housing and Communities. No changes required.
The Building Regulations set minimum standards that must be achieved for energy performance in new homes and buildings. These are a 'floor' and not a 'ceiling'. Planning policy is necessary to address the shortcomings within the Building Regulations 2021 and the proposed Future Homes Standard 2025, which do not adequately address operational carbon emissions from new development as they only cover a proportion of energy use of a building, namely regulated energy use and they rely on grid decarbonisation to achieve 'net zero'. Regulated energy use only makes up about half of the energy used in a building. The other half is known as 'unregulated' energy and this is not covered by Building Regulations at all. Policy DM31 covers both types and so ensures that carbon emissions from a buildings total energy use are addressed and hence delivers truly net zero carbon buildings in operation. No changes required.
It is widely acknowledged by industry that the 'Standard Assessment Procedure' (SAP) software is not an accurate software for predicting the energy performance of a building. It was never intended to be, it is a compliance software only. The former Government recognised this issue and began consulting upon the introduction of new software to replace SAP – known as the Home Energy Model. However, this has not progressed further yet. It is therefore reasonable to require major developments to use existing and well-established reliable and accurate predictive energy modelling software to demonstrate policy compliance. Minor developments may follow the 'minimum fabric specifications approach' as set out in the Reasoned Justification to provide some flexibility to smaller developers who may not wish to invest in predictive energy modelling software. In addition, as part of the wider Essex Authorities work on supporting the implementation of the net zero policy, a 'SAP conversion tool' which can be used on smaller developments to demonstrate policy compliance using SAP outputs has been created. Reference to this has been added to the Reasoned Justification.
Essex wide viability reports support the policy requirements and have fed into CCC Local Plan Viability testing and are shown to be viable. No changes required.
CCC Local Plan Viability testing has been updated to reflect the costs identified in Report 1 of the Essex Net Zero Policy Study – Technical Evidence (July 2023).
The policy applies to 1 dwelling and above, and this is supported by the Essex evidence base. The policy does seek to limit the potential burden of reporting requirements for minor developments (under 10 dwellings) by offering a 'minimum standards approach' to be followed as an alternative to submitting an energy strategy which includes the use of predictive energy modelling. No changes required.
The Future Homes Standard is not in place yet, it has only been consulted upon and the new Government has not yet responded. There is no guarantee it will be in place in a certain timescale. Therefore, to ensure all new homes and buildings are fossil fuel free in Chelmsford, the method that is under direct control of the local authority is the Local Plan and Policy DM31. No changes required.
Solar PV was selected to be modelled in the evidence base to demonstrate net zero because it is the cheapest, and most mature and commonly available renewable energy technology that is suitable for buildings to incorporate. Consideration has been given to the request to replace solar PV with renewable energy generation. However, as the Evidence is based on solar PV as this is the cheapest, most mature, commonly available and cost effective technology

reference to ‘rooftop’ before solar PV has been added to this policy requirement to make this clear, and is what the evidence justifies the policy requiring.
The Essex Net Zero Policy Study (July 2023) demonstrates that it is technically feasible at reasonable cost to accommodate sufficient rooftop solar PV on new homes to match the predicted annual average energy demand from the building. The Policy includes an energy offsetting clause that can be triggered in circumstances where it is not practically feasible to achieve this. The developable area of a site will not be reduced as a result of the Requirement 4 because evidence shows the requirement can be met through rooftop solar PV. The requirement is based on the buildings total energy use – and that includes both regulated and unregulated energy uses - because that is the true impact of the development proposal and can be reliably predicted at design stage through energy modelling.
Development sites will still be connected to the mains electricity grid as normal to ensure consistency in energy supply and meet the fluctuations in energy demand. The renewable energy generation on-site will also be connected to the electricity grid. It is just that roof top solar PV on buildings will be used by those occupiers in the first instance and any excess then is exported to the grid which benefits the decarbonisation of the grid too. Vice versa happens when not enough electricity is generated by the roof top solar PV to meet the energy needs of the occupiers, for example, in winter. No changes required.
The requirement for in-use monitoring applies to large scale developments of 100 dwellings or more and only requires energy information to be collated from a sample of dwellings equating to 10%. This is 10 homes on a 100 home scheme. It is considered a reasonable sample to require in order for a developer to benefit from a meaningful set of results which can then be used to aid continuous learning and improvement on the delivery of net zero homes. The Policy is flexible in how this information is to be collected, the developer can consider the most appropriate method for them and put forward a monitoring strategy at the appropriate time in the planning process. No changes required.
The energy offsetting mechanism enables flexibility in the policy to accommodate those developments where it is not technically feasible to achieve an on-site energy balance to still achieve ‘net zero’. This is a well established approach. No changes required.
The table relating to ‘Minimum Standards Approach Fabric Specifications (Domestic)’ has seen minor amendments to improve clarity, which is a reflection of changes to the revised Essex ‘model policy’.
Matters of overheating have been included into Policy S2 to give greater weight to mitigating overheating risk in new development proposals.
The new Essex evidence-led ‘model policy’ to address embodied carbon emissions from new development, and its supporting evidence base, was not available at an appropriate time to test and include as an additional policy in the Pre-Submission Local Plan. No changes required.
The policy supports delivery of the Council’s declared climate and ecological emergency in 2019 and proposed work towards reaching net zero by 2030.

Policy DM26 – Design Specification for Dwellings

Summary of Representations – main issues and suggested changes:

- Support for the policy (Wates Developments and Hammonds Estates LLP)

- Swift bricks should be required in accordance with best practice (Swifts Local Network: Swifts & Planning Group)
- Support expressed for the overall policy objective, but further clarification on the Council's open space requirements and private amenity spaces would be helpful in this policy wording (Vistry Group).

CCC response to the comments made
A range of biodiversity features that can be considered is included in the Reasoned Justification and in the Council's making Places SPD. Inclusion of a specific policy requirement to provide swift bricks is not supported.

Policy DM27 – Parking Standards

Summary of Representations – main issues and suggested changes:

- Support for the policy (Wates Developments and Hammonds Estates LLP).

CCC response to the comments made
No changes. However, policy changes have been made to reflect the latest ECC Parking Guidance.

Policy DM28 – Tall Buildings

Summary of Representations – main issues and suggested changes:

- Support for the policy (Wates Developments and Hammonds Estates LLP, Historic England)
- More clarification is needed on how a site is assessed for its suitability for higher intensity development (Highgate Capital Limited)
- Add additional wording to include other locations that are well served by public transport (Vistry Group).

CCC response to the comments made
Suitability for higher intensity development is covered in the Reasoned Justification.
Proposals outside the City Centre will be considered on their merits, where a view on the suitability of other locations can be taken.

Protecting Living and Working Environments

Key statistics:

Consultation point	**Yes**	**No**	**Comments**	**Total number of responses**
Policy DM29 – Protecting Living and Working Environments	1		1	1
Policy DM30 – Contamination and Pollution	2		3	3

Policy DM29 – Protecting Living and Working Environments

Summary of Representations – main issues and suggested changes:

- Support for the policy (Wates Developments and Hammonds Estates LLP).

CCC response to the comments made
No changes. However, policy changes have been made for clarification.

Policy DM30 – Contamination and Pollution

Summary of Representations – main issues and suggested changes:

- Support for the policy (Wates Developments and Hammonds Estates LLP, Chelmsford & Central Essex RSPB Local Group)
- Re-development of land affected by contamination is encouraged as it is a sustainable approach (Environment Agency).

CCC response to the comments made
Reasoned Justification amended to ensure developments accord with the latest technical guidance with regards to land contamination.

Monitoring Framework

This section of the consultation document deals with how the Council will monitor the Local Plan's success in meeting the challenges and opportunities set out in the Strategic Priorities to ensure that it is effective in delivering the objectives of the Local Plan.

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Table 8	0	0	1	1

Summary of Representations – main issues and suggested changes:

- S14 Page 326 - Amend `Key Trigger' to read: 'Number of Health Impact Assessments on development for 50 or more dwelling, C2 (Residential Institutions) and non-residential development in excess of 1,000 m2' and `Trigger for Action' to read: '(1) Health Impact Assessment is not submitted on one or more development for 50 or more dwellings, one or more C2 (Residential Institutions) and one or more non-residential development in excess of 1000 m2' (Essex County Council)
- S14 Page 326 - Consider if reference should be made to `initial assessments' (Essex County Council)
- S14 Page 326 - Provide further clarification on the process and details for `an initial assessment' for developments for example, desktop, rapid and full/comprehensive (Essex County Council)

- S14 Page 326 - Consider an additional indicator that captures how HIA's are effectively and positively influencing proposals and achieving what they are set out to do (Essex County Council).

CCC response to the comments made
Not necessary to add Use Class after C2 and to do so would be inconsistent with the rest of the Local Plan.
Suggestions relating to types of HIA assessment are addressed in changes set out under Strategic Policy S14.
No change to include the proposed additional HIA indicators as it is unclear how this would be monitored.

Draft Policies Map

This section of the consultation document sets out the Draft Policies Map which illustrate sites for development or protection within the Local Plan.

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Draft Policies Map (Paragraphs 11.1-11.3)	1	4	5	5
Map 3 – Chelmsford Urban Area	1	4	5	5
Map 5 – South Woodham Ferrers	0	0	1	1
Map 8 - Bicknacre	0	2	2	2
Map 11 – Chatham Green	0	1	1	1
Map 12 - Danbury	0	1	1	1
Map 16 - Galleywood	0	0	1	1
Map 23 – Little Waltham	0	1	1	1
Rural Employment Areas				
None	0	0	0	0
Other Maps				
None	0	0	0	0
Legend	0	0	0	0

Chelmsford Urban Area (Map 3)

Summary of Representations – main issues and suggested changes:

- Revise Chelmsford Urban Area to include areas of development and land east and south of the A12 (along Main Road and Paynes Lane, Boreham) (Aquilia Developments, CNG Fuels)
- Revise to allocate Chantry Farm, Waltham Road, Boreham for Specialist Housing for the elderly (Mark Jackson Planning)
- SGS16a (Hammonds Farm) - Exclude land north of the River Chelmer from the Country Park and site boundary and retain in agricultural use, add the

indicative route for the access route to Junction 19, and reduce the eastern development boundary to exclude land in Flood Zones 2 and 3 adjacent to Sandon Brook (Wates Developments and Hammonds Estates LLP)
- Allocate land at north west Chelmsford, north of the existing settlement boundary (Dandara Eastern)
- Allocate land north of Runsell Lane to help meet local housing needs whilst minimising harm and protecting the purposes of the Green Belt (Obsidian Strategic)
- Expand Widford Industrial Estate to the west to support Saxtons 4x4 and to better align with the Spatial Strategy (Saxtons 4x4)
- Expand Growth Site 15 to include further land to the west to reflect the full extent of the deliverable site (CLH Farming Ltd).

South Woodham Ferrers (Map 5)

Summary of Representations – main issues and suggested changes:

- A dual carriageway on the A132 and a northern bypass on the B1012 are required rather than 'Route Capacity Improvements'.

Bicknacre (Map 8)

Summary of Representations – main issues and suggested changes:

- Revise settlement boundary to include the entire Priory Pet & Country Supplies Store site, Horseshoe Farm to reflect recent planning history (Strutt & Parker)
- Allocate land north of Roxwell Road as an extension to Location 2 – West Chelmsford which performs better when compared against Hammonds Farm (Taylor Wimpey)
- Object to allocation of a new Garden Community at Hammonds Farm which is not deliverable by 2041 or justified by the evidence base Farm (Taylor Wimpey)
- Unclear why the Defined Settlement Boundary cuts through gardens.

Chatham Green (Map 11)

Summary of Representations – main issues and suggested changes:

- Increase the settlement boundary to make it more sustainable by including Pondside Nursery and Yard and allocating it for employment or residential development (Mr and Mrs Andrew Parker).

Danbury (Map 12)

Summary of Representations – main issues and suggested changes:

- Allocate land north of Runsell Lane to help meet local housing needs whilst minimising harm and protecting the purposes of the Green Belt (Obsidian Strategic).

Galleywood (Map 16)

Summary of Representations – main issues and suggested changes:

- The defined settlement boundary has been drawn to exclude any worthwhile housing sites apart from site 4. The plan should be more flexible to allow the growth of Galleywood (Park View Group).

Little Waltham (Map 23)

Summary of Representations – main issues and suggested changes:

- Remove Green Wedge notation from land between 148 The Street and The Warren, Braintree Road and allocate for housing (Mr Paul Hopkins).

No comments to other maps.

CCC response to the comments made
The site boundaries have been reviewed ahead of publishing the Pre-Submission Draft Policies Map. Boundaries are supported by the plan evidence base including the Landscape Sensitivity and Capacity Study and Employment land Review 2023.
Boundary changes have been made for site policy 16a (Hammonds Farm) including change to the eastern boundary to remove flood zones 2 & 3, removal of section of the northern parcel and revised Country Park boundary and inclusion of areas for future recreation use for SuDS and or biodiversity – see more information under the site policy.
Further expansion at West Chelmsford (Location 2) and Broomfield (Location 8) have been considered and tested but rejected due to their impact on and the capacity of the local road network and their relative remoteness from the strategic road network. Unbuilt allocated sites rolled forward from the adopted Local Plan are considered to represent sustainable and sound development allocations which have been previously subject to Independent Examination.
There are no proposed changes to the Green Belt. Proposed site allocations are focused at settlements outside the Green Belt, informed by a Settlement Hierarchy to select sustainable locations.
The site boundary for Site 15 Little Boyton Hall Farm is supported by the evidence base including the Landscape Sensitivity and Capacity Study and therefore no changes are proposed.
There is no evidence to suggest that a dual carriageway on the A132 and a northern bypass on the B1012 are required.
The Bicknacre DSB was proposed for extension on the Preferred Options Draft Policies Map to include the building, not the garden in relation to the approved planning application at Priory Pet & Country Supplies Store site, Horseshoe Farm. The garden has not been included in line with criterion 7 of the DSB methodology i.e. exclude land of predominantly open character at the edge of a settlement.
The DSB methodology guidance states that the Urban Area Boundary/DSB will normally be drawn approximately 25m from the rear and side elevations of houses with large gardens (as well as pubs, churches and community halls).
Chatham green is not included within the spatial strategy as an area of growth. Chatham Green has been considered and tested but rejected due to its relative isolation from existing services and facilities which would lead to higher reliance on

the use of the private car, landscape capacity and sensitivity concerns and capacity limits at the wastewater recycling facilities serving the area.
Minor adjustments are proposed to Defined Settlement Boundaries as part of the Pre-Submission Local Plan, and these are set out in the Urban Area and Defined Settlement Review Technical notes which forms part of the evidence base. These include changes around the proposed site allocations for new housing and employment. Chelmsford UAB will be extended with the inclusion of Location 16a (Hammonds Farm) and the employment site at Location 16b.
The Green Wedge is a locally important designation. Changes to the Green Wedge boundaries to allow development growth has been discounted as sufficient and suitable land elsewhere to meet development needs in a sustainable way.

Appendices

This section of the consultation document contains four appendices.

Key statistics:

Consultation point	Yes	No	Comments	Total number of responses
Appendix A – Schedule of Superseded Documents and Policies	0	1	1	1
Appendix B – Development Standards	0	0	0	0
Appendix C – Development Trajectories	0	0	2	2
Appendix D – Glossary	1	1	5	5

Appendix A – Schedule of Superseded Documents and Policies

Summary of Representations – main issues and suggested changes:

- One comment received which relates to Policy DM2.

Appendix B – Development Standards:

No comments.

Appendix C – Development Trajectories

Summary of Representations – main issues and suggested changes:

- It seems highly unlikely that housing sites expected to deliver within the next 12 months will do, so the plan needs to allocate more deliverable smaller sites (Opus Little Waltham Developments Ltd)
- There is no evidence that 3,000 new homes at Hammonds Farm will be completed within the plan period, with a potential further 1,000 homes beyond 2041. Although large sites can deliver more homes per year over a longer time, they also have longer lead-in times. To secure short-term immediate boosts in supply – a good mix of smaller sites is necessary (Taylor Wimpey).

Appendix D – Glossary

Summary of Representations – main issues and suggested changes:

- Add the following heritage related terms: listed buildings, conservation areas, scheduled monuments, registered parks and gardens and designated and non-designated heritage assets (Historic England)
- Add ‘constituted community organisation’ referred to in para. 1.43 (Essex County Council)
- Add terms related to specific cohorts for supported and specialist housing and accommodation such as older people and people with a learning disability (Essex County Council)
- Add a definition for Renewable and Low Carbon Energy (CNG Fuels Ltd)
- Add detail relating specifically to police, ambulance and fire and rescue facilities (Essex Police).

CCC response to the comments made
The Housing Trajectory and timings within it are established through the Council’s Five Year Housing Land Supply Methodology (April 2024). The Trajectory is updated annually, and the Pre-Submission Local Plan uses the latest available Housing Site Schedule (April 2024).
The heritage related terms proposed to be included were already in the Glossary but some have been updated or tweaked for clarity and consistency.
A definition has been added for ‘renewable and low carbon energy’ for completeness.
The definition of ‘infrastructure’ has been updated for clarity and completeness
It is not considered necessary to include the remaining terms suggested.

REVIEW OF CHELMSFORD LOCAL PLAN

REGULATION 18 – PREFERRED OPTIONS

Chelmsford City Council has published its Regulation 18 Preferred Options consultation on the Review of its adopted Local Plan. This consultation is accompanied by a Preferred Options Integrated Impact Assessment.

The consultation runs for six weeks from **10am on Wednesday 8 June 2024 until 4pm on Wednesday 19 June 2024.**

Regulation 18 Preferred Options Consultation Document
This Regulation 18 Preferred Option consultation is the second formal stage in the preparation of the review of the adopted Chelmsford Local Plan, and a further opportunity for residents, businesses, developers, and other interested parties to get involved.

This is a full draft of the reviewed Local Plan. It includes updated and new policies and sets out proposed sites where new homes, employment and other facilities could be located. It also contains policies that we would use to decide planning applications.

Regulation 18 Preferred Options Integrated Impact Assessment (IIA) Consultation Document

The adopted Local Plan was developed alongside a comprehensive Sustainability Appraisal (SA) and Habitats Regulations Appraisal (HRA) process. For this review process, the Council is including other aspects of sustainable development in an Integrated Impact Assessment (IIA), which covers the following:

- Sustainability Appraisal
- Strategic Environmental Assessment
- Habitats Regulations Assessment
- Health Impact Assessment
- Equality Impact Assessment.

We are consulting on the Integrated Impact Assessment which assesses the Preferred Options against a range of social, environmental and economic indicators.

Broomfield and Danbury Neighbourhood Plans Regulation 16 Consultations

We are also consulting on two Neighbourhood Plans. These have been developed by Broomfield and Danbury Parish Councils, and cover a wide range of issues such as landscape, transport, recreation, heritage, building design, and business. When they are adopted, both Neighbourhood Plans will become part of the Local Plan and will be used for planning decision making.

Find out more at:
www.chelmsford.gov.uk/broomfieldplan and www.chelmsford.gov.uk/danburyplan.

Where to view the documents and how to make representations:

View and comment online
You can view and comment on the consultation documents on the City Council's Consultation Portal at: www.chelmsford.gov.uk/planningpolicyconsult. This is our preferred method to comment.

If you have not used this system before or have any difficulties logging in, please see our guidance notes at:www.chelmsford.gov.uk/lp-portal-guide or call us on (01245) 606330.

View in person
Paper copies can be viewed at the City Council Customer Service Centre, Civic Centre, Duke Street, Chelmsford, CM1 1JE Monday to Friday 10am to 4pm (Please note we are closed on bank holidays).

Comment via email
Comments may be submitted by email: planning.policy@chelmsford.gov.uk
Please include your name and postal address in your message.

A specially designed response form can be downloaded at www.chelmsford.gov.uk/lp-review or made available on request by telephoning (01245) 606330 or emailing planning.policy@chelmsford.gov.uk.

Paper comments
You can submit your comments by post or deliver them in person in the following ways:
Post: Spatial Planning Services, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, CM1 1JE
By hand: Monday to Friday 10am to 4pm - Customer Service Centre, Civic Centre, Duke Street, Chelmsford, CM1 1JE (outside of these hours you can use the post box outside the Customer Service Centre).

If you do not have access to a computer, you can request paper copies. A charge will be made to cover printing and postage costs.

If you have difficulties making representations by e-mail or post due to a disability, please call us (01245) 606330.

How to find out more:

We will be hosting an online virtual exhibition for the Local Plan Preferred Options Consultation as well as having in-person exhibitions at the Council Offices. Here you can view our exhibition boards which contain a summary of the consultation (please note both forms of exhibition will have the same information available).

Local Plan Virtual exhibitions: Will be available to view via www.chelmsford.gov.uk/lp-exhibition

Local Plan in-person exhibition: Drop in exhibitions will take place at the Civic Centre, where you will be able to speak to a representative of the Council. There is no booking required to attend these exhibitions, which will take place at the Chelmsford City Council Chamber, accessed via Customer Service Centre, Civic Centre, Duke Street, Chelmsford, CM1 1JE on the following dates and times:

- Thursday 16 May 2024, 6pm to 8pm
- Friday 17 May 2024, 1pm to 3pm
- Saturday 18 May 2024, 10am to 12noon
- Thursday 13 June 2024, 6pm to 8pm
- Friday 14 June 2024, 1pm to 3pm
- Saturday 15 June 2024, 10am to 12noon *(with British Sign Language interpreter available on this date).*

Further Local Plan exhibitions will be on display as follows. These will not be staffed.

- Monday 20 May to Friday 24 May, 7am to 6.30pm at High Chelmer Shopping Centre, 15a Exchange Way, Chelmsford, CM1 1XB
- Thursday 30 May, Friday 31 May, Monday 3 June to Friday 7 June, Monday 10 June and Tuesday 11 June, 9am to 4pm, South Woodham Town Council, Champions Manor Hall, Hullbridge Road, SWF.

Local Plan Website: Please visit our website www.chelmsford.gov.uk/lp-review for further information on the consultation and the Local Plan review process.

Please note that any representations must be received by the Council no later than 4pm on Wednesday 19 June 2024. We are unable accept anonymous representations and any comments received after the closing date cannot be accepted.

The Council will acknowledge receipt of your comments and fully consider them, although we will not enter into individual correspondence.

All duly-made comments will be published on the Council's Consultation Portal in accordance with the General Data Protection Regulations.

Section 149 of the Equality Act 2010 requires that the Council should avoid any form of discrimination and also foster good relations between different ethnic groups. Comments which are deemed to be discriminatory will be inadmissible and will not be accepted.

Spatial Planning Services Manager May 2024

Welcome

Thank you for visiting today

What is the Local Plan

Our Local Plan shapes future growth and development of Chelmsford City Council's area. It sets out a positive vision, identifies where and how new development should take place in the future as well as areas and land uses that will be protected.

Why are we reviewing the adopted Chelmsford Local Plan?

We adopted our current Local Plan in May 2020, and good progress is being made with implementing it.

We need to review the plan at least every five years to make sure it remains up to date and meets the changing needs for development growth to 2041.

This consultation is called the Preferred Options. It is the second of three stages of consultation towards updating the adopted Local Plan and has been prepared following the Issues and Options public consultation in 2022. It is your opportunity to feed into the review process and help to shape the plan and the future of your area.

Government requirements mean that we must provide more homes but our aim is to get the right type of development in the right places to meet the growing needs of local people and businesses, while protecting our environment.

If the Local Plan becomes out of date, the Council could have very little influence over the location of new development and supporting infrastructure. Sites could be promoted for development in locations that the Council and its communities want to protect, and which are not considered sustainable.

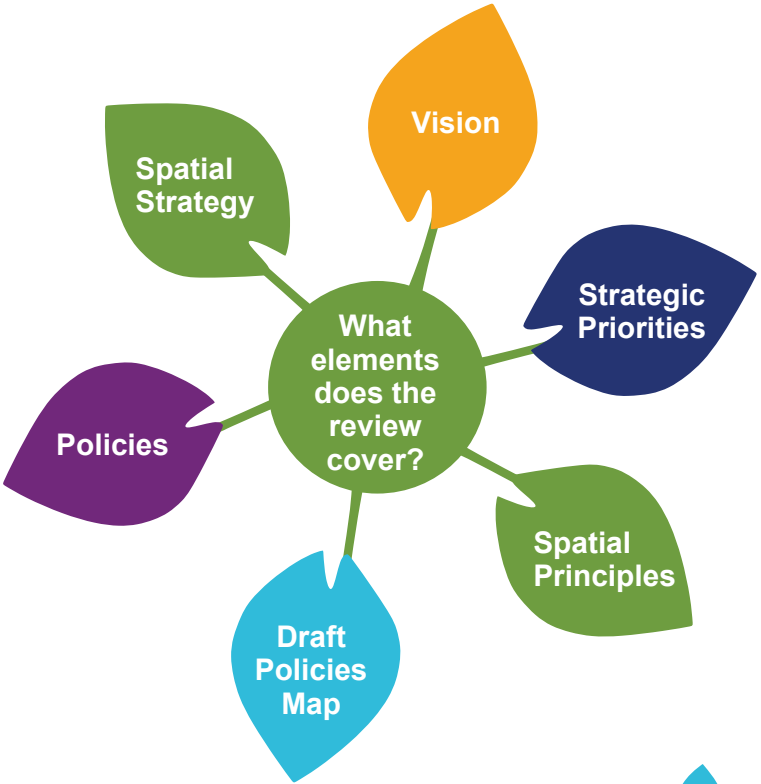
What is included in the consultation?

We want to make sure we cover the right issues and that all the suitable options for accommodating change are considered. The Preferred Options document is a full draft local plan, and includes the following key changes to the adopted Local Plan:

- Updated draft Strategic Priorities
- New draft Vision
- The amount of future development needed, including for homes and jobs
- Draft Spatial Strategy, including new site allocations, for accommodating this future development to 2041 and beyond
- Reviewed planning policies.

Many parts of the adopted Local Plan and its policies are still up to date and generally performing well, so they require no or only partial changes. Some changes and new policies are needed to reflect the latest national planning policy requirements, the Council's new ambitions and aspirations, and new development growth to 2041 and beyond.

The Local Plan is still evolving and no firm decisions have been made at this stage. However, we will not be reopening the debate on development sites which have already been allocated in the adopted Local Plan.



Chelmsford Local Plan

Preferred Options – Background and Challenges

Chelmsford is already an attractive place, comprising the City of Chelmsford, the town of South Woodham Ferrers, numerous villages within attractive countryside and a rich and diverse natural and historic environment. The growth that has taken place, over past 25 years, has helped shape Chelmsford into the successful place it is now.

Vital new infrastructure has been delivered alongside new homes, jobs, shops and leisure opportunities. Chelmsford's economy shows strengths across many sectors, but especially finance, health and education.

Taking into account the projected population increase, we are determined to ensure that future growth continues to take place in a sustainable way. This will bring further improvements to the quality of life for residents and much needed new community and transport infrastructure whilst at the same time protecting and enhancing the natural and historic environment.

The Local Plan will be forward looking, shaping the sustainable planning of Chelmsford's development and infrastructure needs not just in the foreseeable future but also providing a longer-term framework.

Previous consultation

We consulted on the first stage of reviewing the Local Plan, called the Issues and Options, from August to October 2022.

A total of 1,178 responses were received from 711 people or organisations, along with a petition. Responses came from a wide variety of groups and individuals including residents, developers, landowners and their agents, businesses and statutory bodies such as other Local Authorities and Parish/Town Councils.

We have published a document setting out a review of the consultation activity, a summary of the representations we received, and how these comments have been used to develop the Preferred Options document that we are consulting on now.

You can read this 'You said, We Did' feedback report on our website at **www.chelmsford.gov.uk/lp-review.**

All the comments received can also be viewed on the Council's planning policy consultation portal at **www.chelmsford.gov.uk/planningpolicyconsult.**

Challenges

Population – is predicted to increase by 11.5% to 202,300 by 2041. Demographic changes will shape the type and size of accommodation necessary over the Local Plan period.

Economy – 12.5% growth in jobs is anticipated by 2041. Due to its location and high education standards, Chelmsford is expected to accommodate a major share of the forecast new employment growth. Significant additional land for employment is proposed through the Local Plan.

Transport – Chelmsford occupies a key place on the regional road and rail network. New development can generate additional service provision and transport investment, through direct provision of facilities and/or financial contributions from developers.

Environment – Chelmsford enjoys a high quality environment including recreational space, parks, gardens, nature reserves and the designated Green Wedge – and over 1,000 Listed Buildings. Development proposals need to balance the needs of development with the preservation and enhancement of natural and historic assets.

Housing – The Council has declared a housing crisis, with many individuals and families in temporary or unsuitable accommodation, an often expensive private rented sector, and an overall limited supply of affordable housing. The Local Plan can help to address this through housing allocations, setting an appropriate mix of homes, and working with housing partners.

Climate change – A climate and ecological emergency was declared in 2019 to tackle the consequences of climate change and reduce our impact on the planet. Closer to home, the Local Plan can set requirements for zero carbon development, boost active and sustainable travel, require expansion of natural habitats, and improve water efficiency and flood risk management.

Communities – health inequalities and wellbeing opportunities can be tackled through the Local Plan by providing the conditions for stronger and more-connected communities.

Chelmsford Local Plan

What has been considered

The Spatial Strategy, setting out where new development should be located, takes the following as a starting point:

Strategic Priorities + Vision + Spatial Principles + Settlement Hierarchy

Our Strategic Priorities

Our Strategic Priorities are the key priorities which set the overall policy direction for the Local Plan.

Priorities for climate	Priorities for growth	Priorities for place
1. Addressing the Climate and Ecological Emergency	4. Ensuring sustainable patterns of development and protecting the Green Belt	7. Creating well designed and attractive places, and promoting the health and social wellbeing of communities
2. Promoting smart, active travel and sustainable transport	5. Meeting the needs for new homes	8. Delivering new and improved strategic and local infrastructure
3. Protecting and enhancing the natural and historic environment, and support an increase in biodiversity and ecological networks	6. Fostering growth and investment and providing new jobs	9. Encouraging resilience in retail, leisure, commercial and cultural development

The proposed updated Vision

Guiding Chelmsford's growth towards a greener, fairer and more connected community

The Local Plan Vision is a high-level guiding statement that sets out what is important for a place and how change will be managed in the future. It is a core part of a Local Plan and all the policies in the Plan will together deliver the Vision. We have reviewed the Local Plan Vision to reflect the new local priorities within the Council's Corporate Plan - Our Chelmsford, Our Plan. We have also considered other national and local priorities and Chelmsford's challenges and opportunities. It has also been simplified, shortened and purposefully aligned to the Corporate Plan, to make it easier to use.

Spatial Principles

The Spatial Principles will ensure that the Local Plan focuses growth in the most sustainable locations.

a) Locate development at well-connected and sustainable locations
b) Protect the Green Belt from inappropriate development
c) Promote the use of suitable previously developed land for development
d) Continue the renewal and enhance the vitality of Chelmsford City Centre and its Urban Area
e) Focus development at the higher order settlements outside the Green Belt and respect the development pattern and hierarchy of other settlements
f) Respect the character and appearance of landscapes and the built environment, and preserve or enhance the historic and natural environment and biodiversity
g) Locate development to avoid or manage flood risk and reduce carbon emissions
h) Ensure development is served by necessary infrastructure and encourage innovation
i) Locate development to utilise existing and planned infrastructure effectively
j) Ensure development is deliverable.

Settlement Hierarchy

Another factor for developing the Spatial Strategy and choosing areas for growth is the Settlement Hierarchy, which ranks towns and villages according to their size, function, characteristics and sustainability.

How much growth are we planning for?

The adopted Local Plan has allocated sites for development which are now coming forward, with Masterplans being approved and planning applications decided or in progress.

We need to work out how many more houses to plan for until 2041 using a formula set by the Government, called the standard method.

Housing requirement for Plan period	**22,567 homes**
Completions 2022-23	822
Adopted Local Plan allocations	12,677
Sites with planning permission	3,745
Windfall allowance (2026-2041)	1,461
New allocations needed	**3,862**

The Local Plan also plans to meet future employment needs by providing additional employment allocations.

Employment requirement for Plan period	**162,646 sqm**
Adopted Local Plan allocations	55,000 sqm
New allocations needed	**107,646 sqm**

New housing development, in particular, will be required to provide supporting infrastructure, services and facilities including for:

- Transport improvements including the New Beaulieu Park Rail Station, Chelmsford North East Bypass, Army and Navy junction improvements, and sustainable travel routes
- Community buildings, schools, healthcare, wellbeing measures, sports and cultural facilities
- Green infrastructure including new Country Parks, open space, green/blue networks, biodiversity and public realm improvements
- Preservation and enhancement of historic assets
- Flood risk management and utility infrastructure

New development allocations will be focused on three growth areas of Central and Urban Chelmsford, North Chelmsford and South and East Chelmsford. This distribution of growth is shown on the Key Diagram.

Discounted locations for development

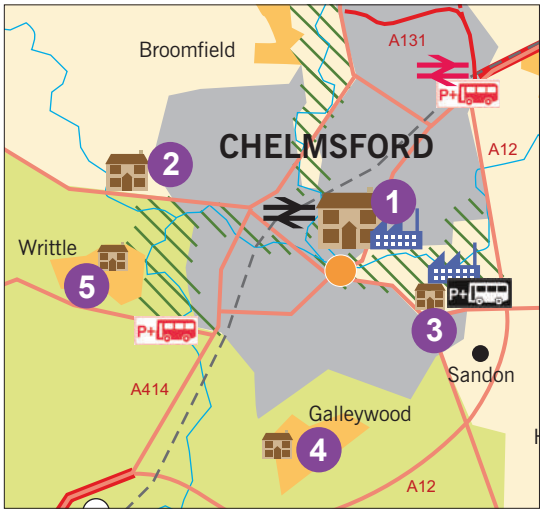
Areas have been discounted as follows:

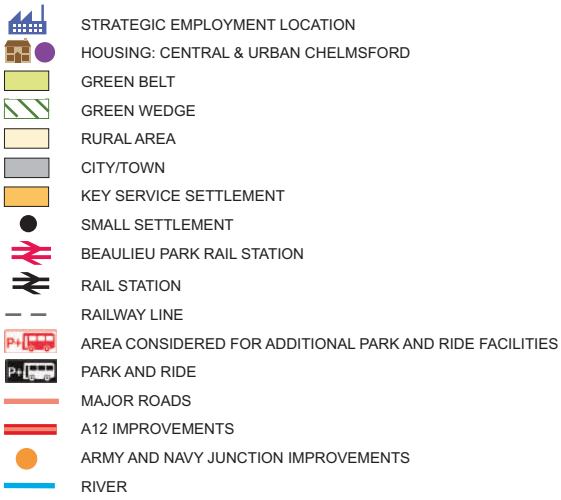
- The Green Belt, a national designation to prevent encroachment of urban growth into undeveloped areas. This covers almost 34% of the land in the south and west of Chelmsford, shaded in green on the Key Diagram
- The Green Wedge, a key local landscape designation of a green network which prevents urban sprawl and provides for wildlife and nature conservation, flood storage and active travel routes. This covers the river valleys where they pass into Chelmsford's urban area, shaded in hatched green on the Key Diagram
- Areas with known severe constraints/capacities including highways and education
- Areas where no land was being promoted through the Call for Sites exercise
- Areas which did not appear in the Issues and Options consultation document (for housing development).

Chelmsford Local Plan

Growth Area 1 – Central and Urban Chelmsford

Development in this area will deliver a number of benefits including green infrastructure and city greening, enhanced bus services, and opportunities to maximise walking and cycling into the City Centre. Previously developed land in the City Centre will be used to strengthen and expand the City as a major residential and employment centre.



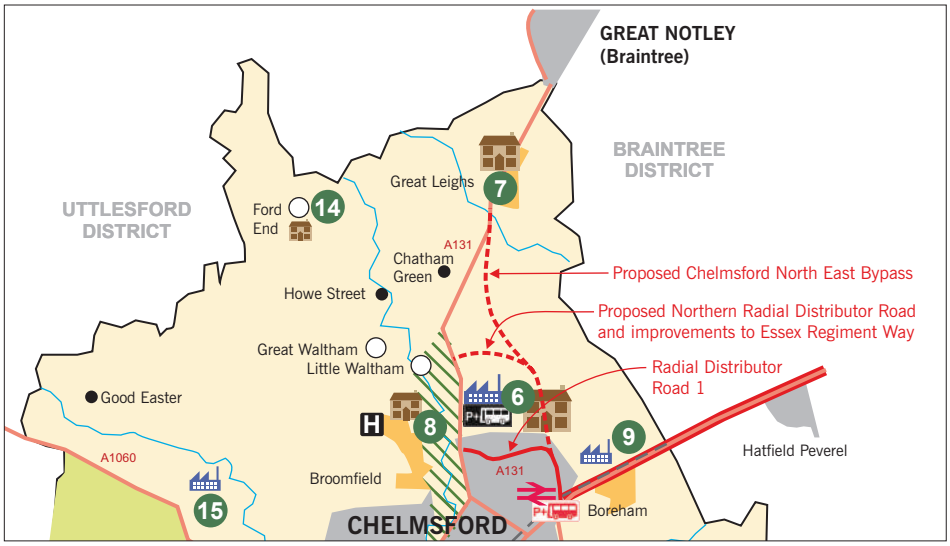


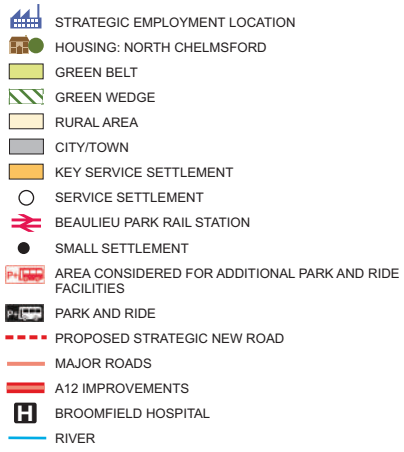
Growth Area 1 – Central and Urban Chelmsford			
Development Allocations		Total Homes	Employment Floorspace
1	Previously developed sites in Chelmsford Urban Area **New sites:** Meadows Shopping Centre/Surface Car Park Former Kay Metzeler, Brook Street Land between Hoffmanns Way and Brook Street Granary Car Park, Victoria Road Coval Lane Car Park Glebe Road Car Park	2,765	4,000sqm Use Class E(g)(i-ii)
2	West Chelmsford	880 plus 5 Travelling Showpeople Plots	
3a	East of Chelmsford - Manor Farm	360	
3b	East of Chelmsford - Land North of Maldon Road		5,000sqm Office/Business Park
3c	East of Chelmsford - Land South of Maldon Road	109	
3d	East of Chelmsford - Land North of Maldon Road	65	
4	Land North of Galleywood Reservoir	24	
5	Land surrounding Telephone Exchange, Ongar Road, Writtle	25	
Area Total		**4,228**	**9,000sqm**

New supporting infrastructure in Growth Area 1
Primary school
Four early years and childcare nurseries
Two new special schools
Country park
Access to Sandford Mill and a visitor centre
Financial contributions to provision of education, community facilities, healthcare, sports and recreation facilities, sustainable transport, local mobility hub and road network enhancements

Growth Area 2 – North Chelmsford

Development in this area will deliver a substantial number of new homes and employment over the Local Plan period, underpinned by a comprehensive package of new infrastructure including new schools, early years and childcare provision, green infrastructure and neighbourhood centres. Significant growth is proposed to Chelmsford Garden Community, along with extensions to two employment sites, and two small village allocations.



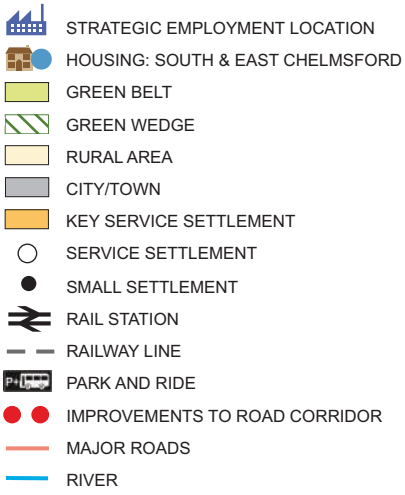


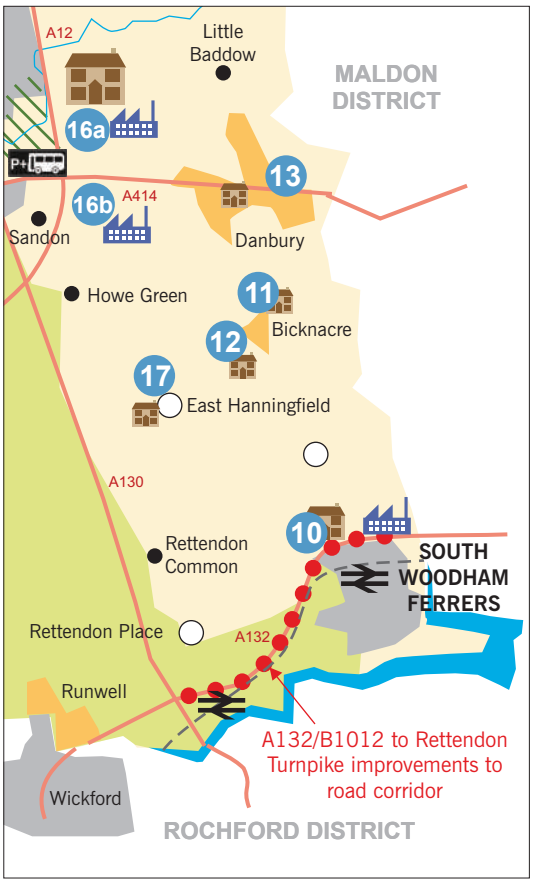
Growth Area 2 – North Chelmsford			
Development Allocations		Total Homes	New Employment Floorspace
6	North East Chelmsford (Chelmsford Garden Community)	6,250, plus 10 Traveller Pitches and 10 Travelling Showpeople Plots	56,946sqm Office/Business Park
7a	Great Leighs - Land at Moulsham Hall	750, plus 5 Travelling Showpeople Plots	
7b	Great Leighs - Land East of London Road	190	
7c	Great Leighs - Land North and South of Banters Lane	100	
8	North of Broomfield	512	
9a	New Site: Waltham Road Employment Area		3,500sqm B2/B8
14a	New Site: Land west of Back Lane, Ford End	20	
14b	New Site: Land south of Ford End Primary School, Ford End	20	
15	New Site: Little Boyton Hall Farm Rural Employment Area		6,000sqm B2/B8
Area Total		**7,842**	**66,446sqm**

New supporting infrastructure in Growth Area 2
Transport including Phase 1 of Chelmsford North East Bypass, Northern Radial Distributor Road, bus infrastructure
Six village/neighbourhood centres
Secondary school
Five primary schools
Seven early years and childcare nurseries
Country park
Financial contributions to Beaulieu Park Railway Station, provision of education and community facilities, healthcare, sports and recreation facilities, sustainable transport and road network enhancements

Growth Area 3 – South and East Chelmsford

Proposals include a high quality and comprehensively planned new Garden Community to the East of Chelmsford at Hammonds Farm, with a wide range of supporting uses. Also proposed is a strategic employment site, along with four smaller village allocations to contribute towards supporting existing village facilities and services.





Growth Area 3 – South and East Chelmsford		
Development Allocations	Total Homes	New Employment Floorspace
16a New Site: East Chelmsford Garden Community (Hammonds Farm)	3,000 (plus 1,500 homes post 2041), plus 20 Traveller Pitches	43,000sqm Business Space
16b New Site: Land adjacent to A12 Junction 18		43,000sqm Business Space
10 North of South Woodham Ferrers	1,220, plus 5 Travelling Showpeople Plots	1,200sqm Business Space
11a South of Bicknacre	42	
11b New Site: Land at Kingsgate, Bicknacre	20	
11c New Site: Land west of Barbrook Way, Bicknacre	20	
12 St Giles, Bicknacre	32	
13 Danbury	100	
17a New Site: Land north of Abbey Fields, East Hanningfield	15	
17b New Site: Land east of Highfields Mead, East Hanningfield	20	
Area Total	**4,469**	**87,200sqm**

New supporting infrastructure in Growth Area 3
Secondary school, up to four primary schools and eight early years and childcare nurseries
Neighbourhood centres
Transport including Bus Based Rapid Transit infrastructure, safe multi-user access routes, and capacity improvements to A132
Country park
Financial contributions to provision of education and community facilities, healthcare, sports and recreation facilities, sustainable transport and road network enhancements

New Sites in Chelmsford City Centre and Urban Area

We are proposing to allocate some additional sites in Chelmsford City Centre.

Using previously developed – or brownfield – land will help to strengthen the City as a major residential centre to build on its past success and continue its regeneration. It will also reduce the amount of greenfield land we need to allocate.

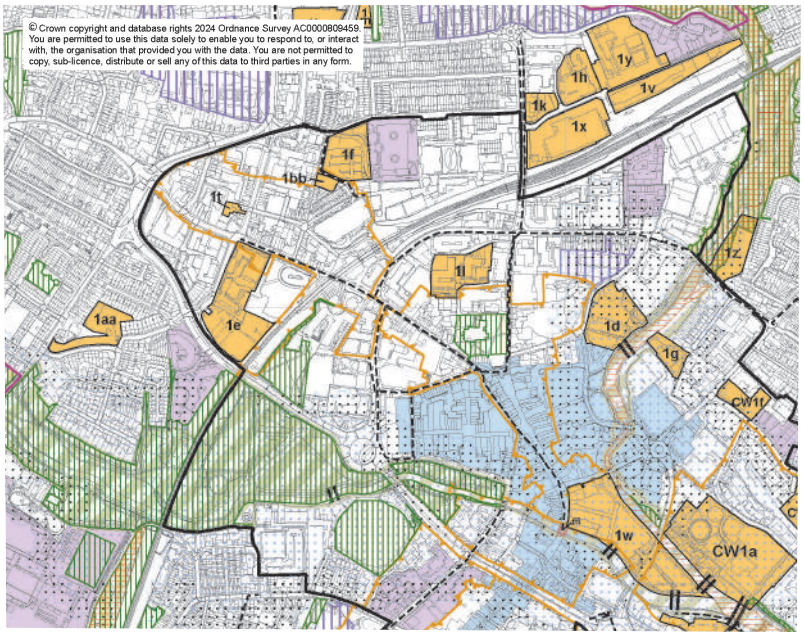
New proposed site allocations will provide around 2,765 new homes including affordable homes.

Site	Proposal	Supporting Infrastructure
1w Meadows Shopping Centre and Meadows Surface Car Park	Around 350 homes	Enhanced pedestrian and cycle routes Local mobility hub Improved access to waterways On-site open space
1x Former Kay Metzeler Premises, Brook Street	Around 185 homes	Play area with equipment Pedestrian and cycle connections Preserve nearby listed buildings Public realm improvements
1y Land between Hoffmans Way and Brook Street	Around 100 homes	Play area with equipment Pedestrian and cycle connections Preserve nearby listed buildings Public realm improvements
1z Granary Car Park, Victoria Road	Around 60 homes	Links to pedestrian/cycle network Preserve nearby listed buildings Retain natural landscaping and setting Make good use of the waterside location
1aa Coval Lane Car Park	Around 40 homes	Retain natural landscaping Provide sustainable drainage and flood risk management
1bb Glebe Road Car Park	12 homes	Conserve the setting of nearby listed buildings

There are 20 allocated sites in the City Centre being brought forward from the adopted Local Plan, including some where numbers have been slightly increased.

Sites in the Urban Area will also be brought forward, as they have already been allocated in the adopted Local Plan. These are at:

- West Chelmsford
- East of Chelmsford
- Galleywood
- Writtle



Chelmsford Local Plan

New Proposed Garden Community

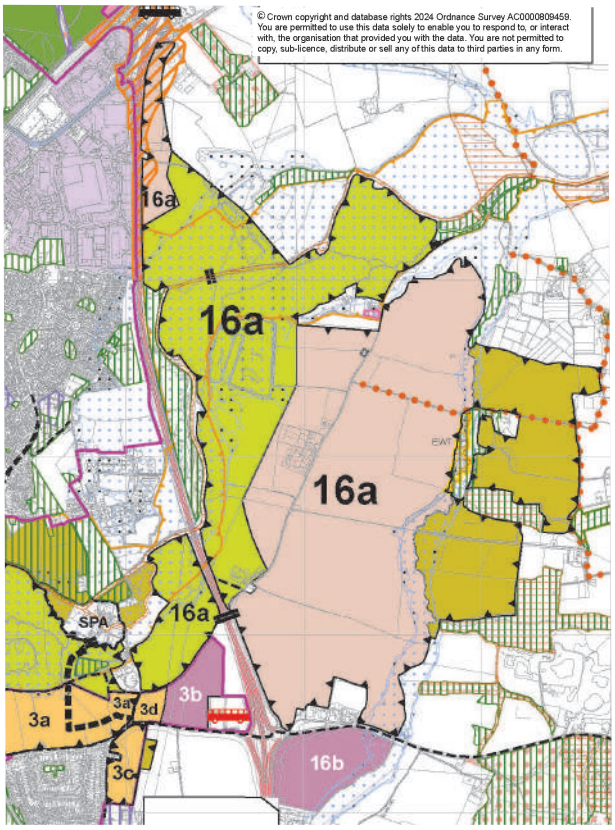
16a – East Chelmsford Garden Community (Hammonds Farm)

We are proposing to allocate land for a new East Chelmsford Garden Community. This is centred on Hammonds Farm, to the east of the A12 and north of the A414 Maldon Road.

New homes including affordable	3,000 (plus 1,500 homes post 2041), and 20 Traveller Pitches
New employment floorspace	43,000sqm
Supporting infrastructure	Country Park and significant new multi-functional green infrastructure and landscape
	Mixed use centres for food and other shopping, community uses, healthcare provision
	All through school, potential sixth form centre, three primary schools, six early years and childcare nurseries
	New access junction from A414 (shared with 16b); pedestrian and cycle connections; mobility hubs and bus transport; safe pedestrian/cycle access routes under and over the A12, including to Park and Ride site, and Beaulieu Park Rail Station
Historic and natural environment	Preserve the Conservation Areas and listed buildings Protect and retain the protected lanes and reinstate historic landscape features
	Conserve Local Wildlife Sites, Nature Reserves, ancient woodlands and SSSI
	Provide sustainable drainage and flood risk management
	Provide a minimum of 20% biodiversity net gain

High quality garden community development will be provided through Garden City Principles. These include:

- community and stakeholder involvement in design and delivery with long-term governance and stewardship arrangements
- meeting the housing needs of all local people
- providing integrated and sustainable transport systems



16b – Land adjacent to A12 Junction 18 – Employment Area

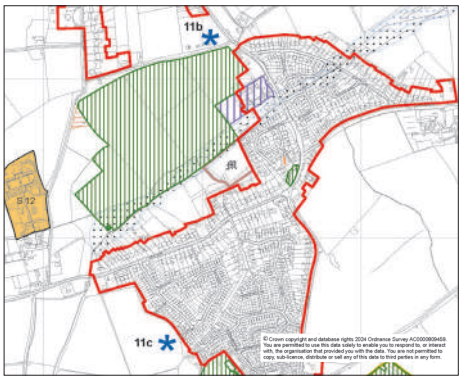
We are also proposing to allocate a separate area of land for new employment uses adjacent to Junction 8 of the A12, south of the A414.

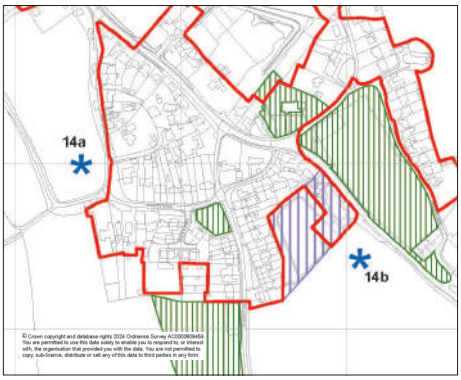
New employment floorspace	43,000sqm for mixed employment types
Supporting infrastructure	New access junction from A414 (shared with 16a) plus multi-user crossings
	Safe pedestrian/cycle access connections including to Park and Ride site, Hammonds Farm, bus stops and Danbury
Historic and natural environment	Preserve Danbury Conservation Area
	Retain boundary trees, plant new trees and extensive landscape buffers

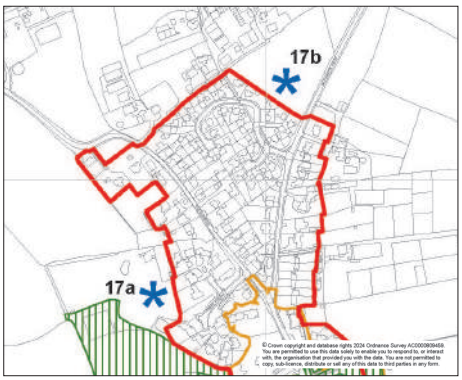
Proposals for Villages

Limited development is proposed in some villages including Bicknacre, Ford End, East Hanningfield, Boreham and Boyton Cross.

We aim to address the Government's requirement to allocate some smaller sites which can be built earlier in the Local Plan period and give smaller development companies the opportunity to build locally. Bicknacre, Ford End and East Hanningfield have primary schools and community facilities, making them suitable for small scale development, which will include affordable homes.

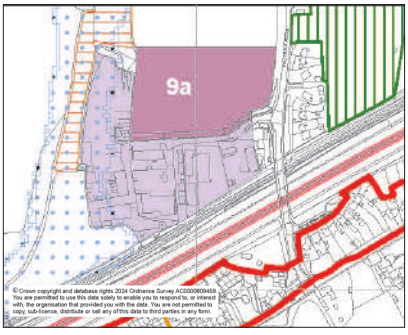


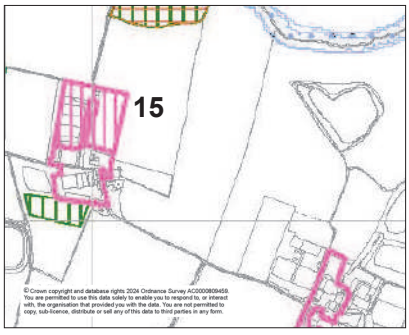




Village	Site	Proposal
Bicknacre	11b Land at Kingsgate, Bicknacre Road	Around 20 homes
	11c Land West of Barbrook Way	Around 20 homes
Ford End	14a Land West of Back Lane	Around 20 homes
	14b Land South of Ford End Primary School	Around 20 homes
East Hanningfield	17a Land North of Abbey Fields	Around 15 homes
	17b Land East of Highfields Mead	Around 20 homes

We also propose to expand two employment sites at Little Boyton Hall Farm, Boyton Cross and Waltham Road, Boreham. Expansion of these well-established employment sites will provide rural employment opportunities and support the sustainable growth and expansion of business in rural areas.





Site	Proposal
9a Waltham Road Employment Area, Boreham	3,500sqm B2/B8 use (general industrial, and storage and distribution)
15 Little Boyton Hall Farm Rural Employment Area, Boyton Cross	6,000sqm B2/B8 use (general industrial, and storage and distribution)

What else is in the Local Plan?

We use the Local Plan policies to deliver the Strategic Priorities (what we want to achieve overall) and the Spatial Strategy (locations for growth). The different types of policies are set out below.

Strategic Policies	High level policies including for climate change, social inclusion, the natural environment, infrastructure, and housing requirements
NEW	Proposed new Strategic Policies: Health and Wellbeing, Creating Successful Places, Connectivity and Travel, Future of Chelmsford City Centre
Site Policies	Covering the amount of development, design guidance, and infrastructure that must be provided
Development Management Policies	All planning applications are considered against these policies to make sure they provide what is needed and protect what is important
NEW	Proposed new Development Management Policy: Net Zero Carbon Development (In Operation)
Special Policy Areas	For Broomfield Hospital, Chelmsford City Racecourse, Hanningfield Reservoir, RHS Hyde Hall Gardens, Sandford Mill, ARU Writtle
Development Standards	For all new residential development including privacy, open space, and recycling and waste guidance
Policies Map	All the proposals shown on a map

Other consultations: Integrated Impact Assessment (IIA)

The Local Plan is subject to an ongoing process of assessing its proposals against a sustainability framework. This covers the potential environmental, social, economic and health performance of the Local Plan and any reasonable alternative approaches.

Other consultations: Neighbourhood Plans

Neighbourhood Plans have been developed by Broomfield and Danbury Parish Councils, and cover a wide range of issues such as landscape, transport, recreation, heritage, building design, and business. When they are adopted, both Neighbourhood Plans will become part of the Local Plan and will be used for planning decision making.

Both Neighbourhood Plans are proposing to allocate land for development as follows:

Broomfield	Community-led housing at Saxon Way with open space and a potential GP surgery A community facility for non-residential day facilities and local/informal green space at Broomfield Place You can find out more at: **www.chelmsford.gov.uk/broomfieldplan**
Danbury	Around 93 homes across five sites at Sandpit Field (around 10 homes) Tyndales Farm West (around 65 homes) South of Jubilee Rise (around 2 homes) Woodhill Road (around 14 homes) Mayes Lane (around 2 homes) You can find out more at: **www.chelmsford.gov.uk/danburyplan**

How to comment

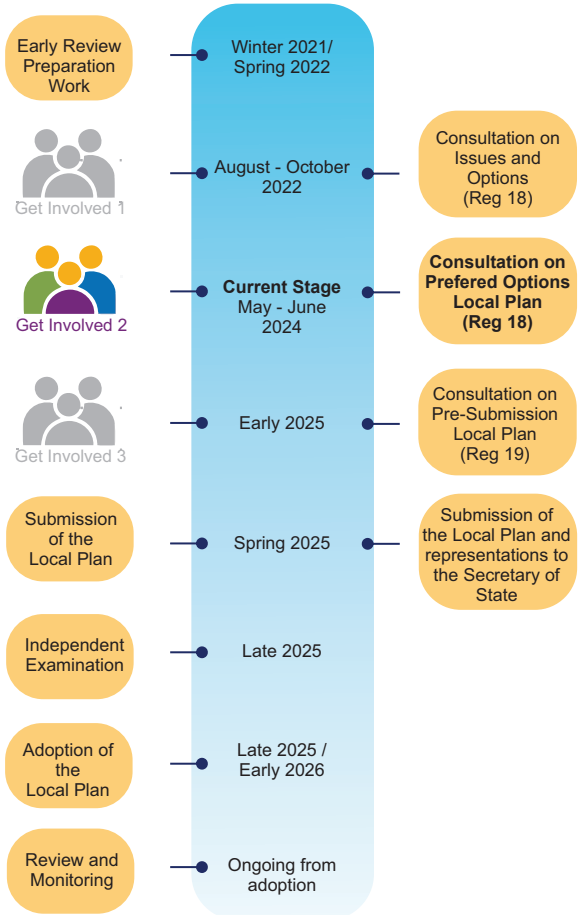
Making your comments through the consultation portal allows you to download the consultation documents and sign up for alerts to future consultation events.

You can also make comments:
By email to **planning.policy@chelmsford.gov.uk**
By post to Spatial Planning Services, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, CM1 1JE.

The consultation on the Preferred Options documents runs for six weeks from 10am on Wednesday 8 May to 4pm on Wednesday 19 June 2024.

What happens next

We will consider all the comments received alongside further studies, the findings of the IIA and national planning policy to finalise the Pre-Submission Local Plan, for public consultation in early 2025.



Chelmsford Local Plan

Planning talking points: planning beyond homes — the big picture

By Corporate Communications

22 May 2024 planning local plan

What image does 'planning' conjure up for you? Most people think of homes: houses, flats and maisonettes being built for the growing population. You might think about the national housing crisis and how difficult it is to afford a home in the UK right now, or about where is and isn't appropriate for new homes to go.

However, planning isn't all about homes. The Local Plan, which guides where and what

SAVE MALDON'S MEDICAL SERVICES-
REF. ST PETER'S HOSPIAL

In a recent meeting held on 19th March, the South Woodham Ferrers Health and Social Care Groups presented concerning evidence to the NHS ICB regarding the potential closure of St Peter's Hospital. We are deeply troubled by the implications of these views which were expressed for our community's access to essential healthcare services. These views are not widely held by others in the Maldon District and believe South Woodham Ferrers would support the retention of St Peter's Hospital Services.

Save Maldon's Medical Services, a grassroots organization dedicated to preserving healthcare access in the whole Maldon District, is spearheading efforts to prevent the closure of St Peter's Hospital Services until a viable alternative, such as a new NHS Community Hospital in Maldon, can be provided.

It is paramount that we rally support from every household in South Woodham Ferrers to ensure that our voices are heard. Dispersing outpatient services across different locations such as Banks or other commercial buildings which might be available, potentially even outside the Maldon District, would be detrimental to the health and wellbeing of our community.

I urge you to amplify our message and raise awareness about this crucial issue. By shining a spotlight on the efforts of Save Maldon's Medical Services and the concerns of South Woodham Ferrers residents, we can work together to safeguard the future of St Peter's Hospital Services. Please write to your Member of Parliament explaining your concerns that services must be maintained in St Peter's for the foreseeable future and/or until a cohesive plan for locating these services is delivered.

Many residents have made their feelings known and we thank them, and Mayor Donna Eley, for their continued support. You can follow Save Maldon's Medical Services on Facebook where we have our 3000 people already involved.

Steve Rogers

REVIEW - PREFERRED OPTIONS CONSULTATION

Chelmsford Local Plan

Chelmsford City Council is consulting on a review of its adopted Local Plan with the Preferred Options consultation running from 8 May 2024 to 19 June 2024.

This is the second of three stages of consultation towards updating the adopted Local Plan, and has been prepared following initial consultation in 2022. The City Council wants to make sure the Plan covers the right issues and that all the suitable options for accommodating change are considered. The consultation is your opportunity to feed into the review process and help to shape the plan and the future of our area.

Chelmsford City Council adopted the current Local Plan in May 2020. It needs to review the plan at least every five years, to make sure it remains up to date and meets the changing needs for development to 2041. The review considers new national policy and chang

Plan, called Strategic Growth Site 10. This is identified for 1,220 new homes, around 1,200sqm of business floorspace and a Travelling Showpeople site alongside supporting infrastructure including a new Neighbourhood Centre and early years and childcare nurseries. No other sites are proposed for allocation in South Woodham Ferrers.

Chelmsford City Council is inviting comments on the Preferred Options Local Plan to ensure that it is fit for purpose to meets local needs. It is not reopening any debates about the principle of already adopted allocated sites. The Council is also consulting on an Integrated Impact Assessment which assesses the impacts of the Preferred Options Local Plan in terms of key sustainability issues.

Why suffer in silence

Hello, my name is Sonia & I'm a Counsellor & Hypnotherapist. My business is home based in South Woodham Ferrers.

Counselling can be used to treat a range of issues including depression, anxiety, grief, relationship issues, trauma & addiction. I offer clients a safe & confidential space in order to explore their presenting issue/s, helping them to identify possible root causes too. I also share coping strategies & small lifestyle changes that can help manage symptoms.

In my experience Hypnotherapy can also be beneficial to help manage depression & anxiety, making a direct change to the subconscious mind where all events, experiences & emotions are stored. I also offer hypnosis for weight loss.

Chelmsford Local Plan Review – Preferred Options Consultation

Chelmsford Local Plan

Chelmsford City Council is consulting on a review of its adopted Local Plan with the Preferred Options consultation running from 8 May 2024 to 19 June 2024.

This is the second of three stages of consultation towards updating the adopted Local Plan, and has been prepared following initial consultation in 2022. The City Council wants to make sure the Plan covers the right issues and that all the suitable options for accommodating change are considered. The consultation is your opportunity to feed into the review process and help to shape the plan and the future of our area.

Chelmsford City Council adopted the current Local Plan in May 2020. It needs to review the plan at least every five years, to make sure it remains up to date and meets the changing needs for development to 2041. The review considers new national policy and changing local circumstances. The aim is to get the right type of development in the right places to meet the growing needs of local people and businesses, while protecting our environment.

The Preferred Options Local Plan is a full draft Local Plan. It includes updated and new Strategic Priorities, site allocations for new homes and employment, and policies that will be used to decide planning applications.

What is proposed in South Woodham Ferrers?
The Preferred Options Local Plan carries forward the allocation of Land North of South Woodham Ferrers from the adopted Local Plan, called Strategic Growth Site 10. This is identified for 1,220 new homes, around 1,200sqm of business floorspace and a Travelling Showpeople site alongside supporting infrastructure including a new Neighbourhood Centre and early years and childcare nurseries. No other sites are proposed for allocation in South Woodham Ferrers.

Chelmsford City Council is inviting comments on the Preferred Options Local Plan to ensure that it is fit for purpose to meets local needs. It is not reopening any debates about the principle of already adopted allocated sites. The Council is also consulting on an Integrated Impact Assessment which assesses the impacts of the Preferred Options Local Plan in terms of key sustainability issues.

How can I get involved?
You can view and comment on the consultation documents during the consultation period on our specially designed consultation portal www.chelmsford.gov.uk/planningpolicyconsult

Alternatively visit out Local Plan web page for details of the consultation, how to make your comments, and about our planned in-person exhibitions at www.chelmsford.gov.uk/lp-review

Local Plan Poster

Review of Chelmsford Local Plan – Get Involved Now!

We are reviewing our Local Plan which sets out how much new development is needed and identifies land for housing, schools, shops and jobs as well as areas for protection, such as open space and sites important for wildlife.

The Council's Local Plan was adopted in 2020. We need to review the plan at least every five years to ensure that it remains up to date and continues to meet our needs for development growth to 2041 and beyond.

We undertook the first stage of consultation in 2022 and have carefully considered all the responses alongside updated evidence, national planning policy, new local priorities, and monitoring data to progress the Preferred Options stage. The Preferred Options document is a full draft local plan and includes:

- updated and new Strategic Priorities
- proposed new sites where new homes, jobs and other facilities could be located
- new and updated policies that the Council would use to decide planning applications

Have Your Say!

The Consultation runs from 10am on Wednesday 8 May 2024 until 4pm on Wednesday 19 June 2024.

Read and comment on the documents at **www.chelmsford.gov.uk/planningpolicyconsult**. They will also be available to read during normal opening hours at the Council's Customer Service Centre in Chelmsford.

There will be an online exhibition and we will also be holding in-person exhibitions at the Civic Centre. These exhibitions will provide an opportunity for you to find out more and discuss the consultation with a Planning Officer. More information can be found at: **www.chelmsford.gov.uk/lp-review**

Chelmsford Local Plan

Local Plan Review Newsletter

NUMBER 2 May 2024

What is a Local Plan?

A Local Plan shapes future growth and development of the City Council's area. It sets out a positive vision, identifies where and how new development should take place in the future as well as areas and land uses that will be protected.

Why are we reviewing the adopted Chelmsford Local Plan?

We adopted our current Local Plan in May 2020 and good progress is being made with implementing it. We need to review the plan at least every five years to ensure that it remains up to date and continues to meet our needs for development growth to 2041 including new homes, employment opportunities, and facilities for local people such as new schools, healthcare provision and upgraded transport infrastructure.

Government requirements mean we must provide more homes but our aim is to get the right type of development in the right places to meet the growing needs of local people and businesses while protecting our environment. If the Local Plan becomes out of date, the Council could have very little influence over the location of new development and supporting infrastructure.

What stage is the review at?

We are currently at the Preferred Options stage in the plan review process, with the plan due to be adopted in 2025/26. Many people and organisations commented on the first Issues and Options stage consultation in 2022. All the responses have been carefully considered and used to progress the Preferred Options alongside an updated plan evidence base, national planning policy, new local priorities, and monitoring data.

A 'You Said We Did' feedback report and the evidence base of technical studies can be read on our website: **www.chelmsford.gov.uk/lp-review**

The Preferred Options document is a full draft local plan. It includes updated and new policies and sets out proposed sites where new homes, jobs and other facilities could be located, and contains policies that the council would use to decide planning applications.

We are inviting comments on the plan so residents can influence it and ensure that it is fit for purpose to meets local needs. We are not reopening any debates about the principle of already adopted allocated sites.

New Development: Where and how much?

The Preferred Options plan follows the approach in the adopted Local Plan by continuing to focus new housing and employment growth to the most sustainable locations in three Growth Areas. The existing site allocations in the adopted plan which are not yet built are carried forward in the Preferred Options plan. Many of these sites are now coming forward, with masterplans being approved and planning applications decided or in progress and some sites have started building.

To meet additional growth needs to 2041 it is estimated that we need to allocate new sites for around 3,862 new homes with provision made for a further 1,500 new homes beyond 2041, and around 162,646sqm of new employment floorspace. This is over and above the new homes and employment land in the current plan. To accommodate this identified additional growth, we have reviewed the Spatial Strategy and are proposing new development sites. The preferred Spatial Strategy (Policy S7) shown in the consultation document has been informed by the outcome of the Issues and Options consultation and further evidence. **We are not considering growth in the Green Belt.**

Central and Urban Chelmsford

Continued focus on strengthening the city as a centre for residential, employment and retail. Two existing allocations carried forward to the west and east of Chelmsford maximise cycling and walking opportunities into the City Centre.

1 Previously developed sites in Chelmsford Urban Area
- 2,765 homes (of which around 750 are on proposed new site allocations)
- 9,000sqm Business space

2 West Chelmsford
- 880 homes
- 5 Travelling Showpeople Plots
- Primary school and 2 nurseries
- Neighbourhood Centre

3a-3d East of Chelmsford
- 3a Manor Farm: 360 homes
- 3b Land North of Maldon Road: 5,000sqm Office/Business Park
- 3c Land South of Maldon Road: 109 homes
- 3d Land North of Maldon Road: 65 homes
- Country Park
- New pedestrian and cycle bridge to Sandford Mill

4 Land North of Galleywood Reservoir
- 24 homes

5 Land surrounding Telephone Exchange, Ongar Road, Writtle
- 25 homes

North Chelmsford

North Chelmsford (Chelmsford Garden Community) will continue as a key area for new neighbourhoods and employment opportunities. New smaller allocations at Ford End and extensions to two existing employment areas. Existing allocations carried forward at Great Leighs and Broomfield.

6 North East Chelmsford (Chelmsford Garden Community)
- 6,250 homes
- 10 Gypsy and Traveller Pitches
- 10 Travelling Showpeople Plots
- 56,946sqm Office/Business Park
- Country Park
- Chelmsford North East Bypass
- 4 Neighbourhood Centres
- 1 all-through school
- 3 primary schools with nurseries
- 2 nurseries

7a-7c Great Leighs
- 7a Land at Moulsham Hall: 750 homes
- 5 Travelling Showpeople Plots
- 7b Land east of London Road: 190 homes
- 7c Land North and South of Banters Lane: 100 homes
- Neighbourhood Centre
- Primary school with nursery

8 North of Broomfield
- 512 homes
- Neighbourhood Centre
- Nursery

9a Waltham Road Employment Area
- 3,500sqm B2/B8 Use

14a & 14b Ford End
- 14a Land west of Back Lane, Ford End: 20 homes
- 14b Land south of Ford End Primary School: 20 homes

15 Little Boyton Hall Farm Rural Employment Area
- 6,000sqm B2/B8 Use

South and East Chelmsford

Proposals include a new garden community at East Chelmsford (Hammonds Farm), and a strategic employment site. New smaller allocations in Bicknacre and East Hanningfield. Existing allocations carried forward at South Woodham Ferrers, Bicknacre and Danbury.

10 North of South Woodham Ferrers
- 1,220 homes
- 5 Travelling Showpeople Plots
- 1,200sqm Business Space
- Neighbourhood Centre
- 2 nurseries and potential primary school

11a-c Bicknacre
- 11a South of Bicknacre: 42 homes
- 11b Land at Kingsgate: 20 homes
- 11c Land west of Barbrook Way: 20 homes

12 St Giles, Bicknacre
- 32 homes

13 Danbury
- 100 homes

16a East Chelmsford Garden Community (Hammonds Farm)
- 3,000 homes to 2041 (plus 1,500 homes post 2041)
- 20 Gypsy and Traveller Pitches
- 43,000sqm Business Space
- Country Park
- Neighbourhood Centres
- 1 all-through school
- 2 primary schools and nursery
- 3 nurseries

16b Land adjacent to A12 Junction 18
- 43,000sqm Business Space

17a & 17b East Hanningfield
- 17a Land North of Abbey Fields: 15 homes
- 17b Land east of Highfield Mead: 20 homes

Highlighted text: Proposed new development allocations in the review of Local Plan.

Local Plan policies

There are a number of new and updated policies included within the Preferred Options Local Plan. These cover many topics including housing, climate change, economy, environment, health and wellbeing, travel and transport, heritage, and design. We are not proposing to fundamentally change the general approach in the adopted Local Plan, but we want to take on board updated information and address some of our major challenges including acting on the climate emergency, responding to the housing affordability crisis and strengthening community ties.

It is important to note that the Local Plan is still evolving, and no firm decisions have been made at this stage. We will continue to gather evidence throughout the Local Plan preparation and the Preferred Options consultation will be an important aspect of this. **All the evidence and comments received will be used to prepare the final draft version of the Local Plan.**

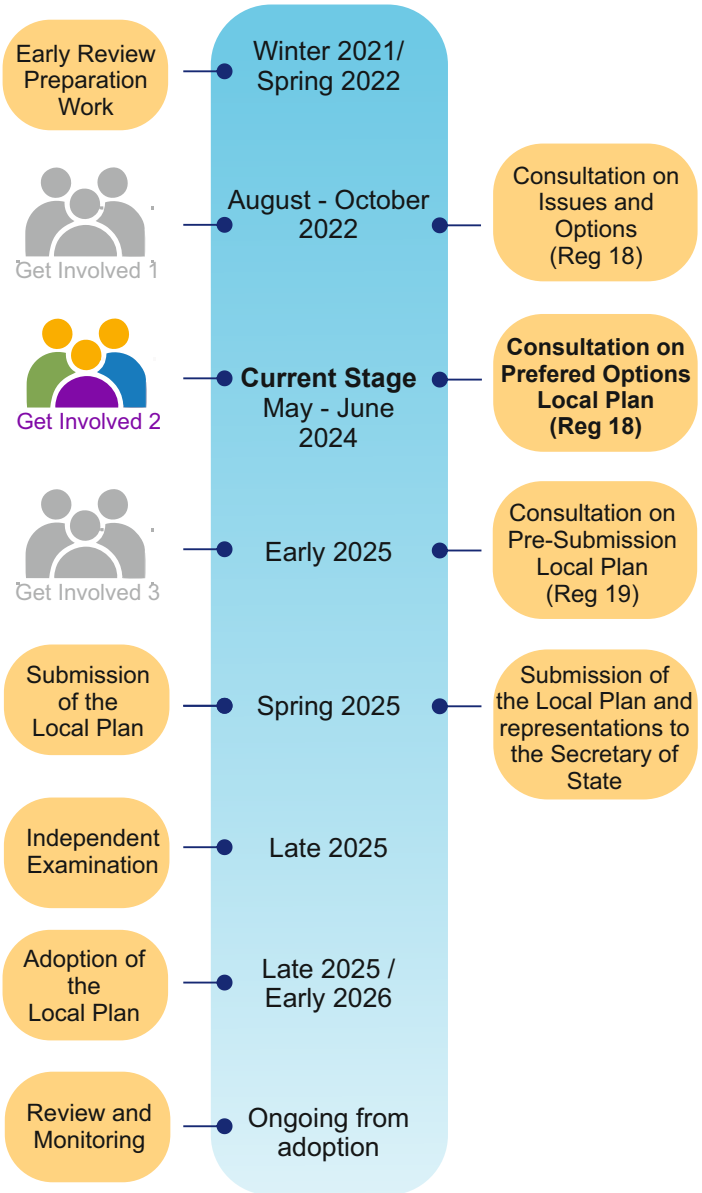
What is the Integrated Impact Assessment (IIA)?

The IIA identifies the key sustainability issues for the Review of the Local Plan. These feed into a framework against which the proposals have been assessed. It covers the potential environmental, social, economic and health performance of the Local Plan and any reasonable alternatives. The IIA includes:

- Sustainability Appraisal (SA)
- Strategic Environmental Assessment (SEA)
- Habitats Regulations Assessment (HRA)
- Health Impact Assessment (HIA)
- Equality Impact Assessment (EqIA)

We will be consulting on the IIA as part of the Preferred Options consultation.

What is the Local Plan timetable?



Where can I view the consultation documents?

The consultation documents will be available to view and comment on via our consultation portal at **www.chelmsford.gov.uk/planningpolicyconsult.** They will be available to read during normal opening hours at the Council's Customer Service Centre in Chelmsford.

There is an interactive online exhibition available during the consultation period – this can be found at **www.chelmsford.gov.uk/lp-review.** We will also be holding in-person exhibitions at Civic Centre, Duke Street, Chelmsford. These exhibitions will provide an opportunity for you to find out more and discuss the consultation with a Planning Officer. These will be held on

- **Thursday 16th May 2024 6pm - 8pm**
- **Friday 17th May 2024 1pm - 3pm**
- **Saturday 18th May 2024 10am - 12pm**
- **Thursday 13th June 2024 6pm - 8pm**
- **Friday 14th June 2024 1pm - 3pm**
- **Saturday 15th June 2024 10am - 12pm (with British Sign Language interpreter available)**

Consultation dates and how to have your say

The consultation on the Preferred Options documents runs for a period of six weeks from 10am on Wednesday 8 May 2024 to 4pm on Wednesday 19 June 2024. Comments made before or after these dates will not be considered.
You can respond:

- Via our consultation portal at www.chelmsford.gov.uk/planningpolicyconsult.
- By email to planning.policy@chelmsford.gov.uk
- By post to Spatial Planning Services, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, CM1 1JE.

Next Steps
All comments will be used to inform the next stage of the process, the Pre-Submission Local Plan. We plan to consult on this in 2025.

The following table documents a summary of key representations made during the summer 2024 consultation on the transport modelling evidence base for Chelmsford City Council's Local Plan Review Preferred Spatial Approach, along with Essex Highways' response to queries raised.

Table Item ID:	Summary Point:	Summary of detailed representation made:	Essex Highways Modelling Response:
Comment by: Wates Developments and Hammonds Estates LLP – Comment ID: PO24-4653			
1.	Clarity needed on the requirement for CNEB contributions	It is unclear currently from the council's current transport evidence base why contributions to the CNEB are required, as this is not indicated by the results of the Transport Testing of the Preferred Option to 2041 (dated March 2024) and the Local Junction Capacity Assessment Modelling (dated May 2024); rather, the March 2024 document concludes that the completion of the CNEB is only required once capacity issues along the A12 mainline are addressed. On this basis, the requirement for the CNEB is associated primarily with background increases in traffic using the A12, rather than development trips at East Chelmsford Garden Community (Hammonds Farm). Clarification of this point, and therefore the robustness of this the policy requirement for S106 contributions towards this infrastructure, are sought and should be addressed more fully in the next iteration of the Plan.	Essex Highways understand that CCC and ECC are reviewing the funding options for delivery of the CNEB. Whilst the strategic modelling undertaken to support the Local Plan transport evidence base suggests that the distribution of trips between Hammonds Farm and the CNEB will be small (<10%), approximately one third of development trips to/from Hammonds Farm are shown in the forecast modelling to access the A12 Junction 19 Boreham Interchange, at the southern end of the CNEB.
Comment by: Wates Developments and Hammonds Estates LLP – Comment ID: PO24-4743			
2.	Disagreement on early conclusions regarding requirements for Hammonds Farm	Do not agree with some of the early conclusions about the requirements for the East Chelmsford Garden Community (Hammonds Farm). The executive summary on Page 11 of the Transport Appraisal of the Preferred Option (March 2024) states that: "Critical to the planning application process should be a requirement to ensure that background traffic flows along the A414 are not unreasonably delayed by the addition of development trips. This may well require significant highway measures in the vicinity of the site access".	The wording used in the Transport Appraisal of the Preferred Spatial Approach does not state that highway measures should be implemented to ensure a nil detriment impact of development at Hammonds Farm. Rather, that there is an expectation that sustainable and active mode measures, along with potential highway capacity improvements will be identified as part of the planning application process to mitigate against "unreasonable delays" to these modes –

Table Item ID:	Summary Point:	Summary of detailed representation made:	Essex Highways Modelling Response:
		We disagree with this statement as it is not consistent with NPPF Paragraph 115, where the key test relates to severity of impact, and not to protecting against "unreasonable delays" or providing "nil detriment" to motorists. Even if subsequent modelling evidence shows an increased period over which drivers would experience delay, it is not the aim of national or local policy to protect the convenience of commuting car drivers.	which could 'help to achieve' a nil detriment impact. By "unreasonable delays" we (Essex Highways) mean, for example, a notable increase in journey times for background traffic flows - including buses and emergency service vehicles and/or delays that lead to a notable worsening of noise and air quality along the A414 corridor.
Comment by: Walshingham Planning, on behalf of Little Baddow, Sandon, Boreham & Danbury Parish Councils – Comment ID: PO24-8576			
3.	5.1.10 Uncertainty in Hammonds Farm forecast beyond 2041	Both December 2023 and March 2024 evidence documents refer to uncertainty in forecasting forward beyond 2041 and therefore do not test more than 3,000 dwellings at East Chelmsford Garden Community (Hammonds Farm). There will always be uncertainty which requires addressing in forecasting, and whilst development locations beyond this Local Plan Review to 2041 are not known, it is considered that a sensitivity assessment of the East Chelmsford Garden Community in 2041 with 4,500 dwellings could provide an initial indication of the scale of impacts and mitigation required and may be helpful during the next stage of Local Plan evidence and formulation of the council's IDP. Trip Generation: The Strategic Growth Site Policy 16a (Hammonds Farm) includes residential proposals for up to 4,500 dwellings to the period 2048. The Chelmsford VISUM model is only forecast to 2041 and allows for only 3,000 dwellings at the Hammonds Farm site. Again, the impact on the local highway network and at key junctions is likely to be far greater than is currently predicted as a result of the additional trips generated by the extra 1,500 dwellings.	Alongside the challenges of forecasting background levels of demand and road infrastructure 20+ years into the future and beyond the current Local Plan period, an assessment of an additional 1,500 dwellings at Hammonds Farm would require an assumption to be made on the mitigation already in place to support a 3,000 dwelling development by 2041. The scope and delivery timeframes for this mitigation have yet to be agreed between developers and ECC/CCC. Observations from the strategic modelling suggest that without capacity improvements, additional development traffic added to the A12 corridor would result in a wider dispersal of background traffic and/or reductions in peak hour trips being modelled. Therefore, the scale of impact from a further 1,500 dwellings, and the mitigation required, would be difficult

Table Item ID:	Summary Point:	Summary of detailed representation made:	Essex Highways Modelling Response:
			to assess using the modelling methodology adopted for the Local Plan evidence base. It is, however, expected that any capacity improvement measures identified as part of the planning application process would be tested with a full 4,500 dwelling build-out, with assumptions to be agreed with developers on the volume of background growth to be applied.
4.	3.4.3 - 3.4.7 Lack of detailed modelling of site accesses at Hammonds Farm	No work has been undertaken to determine the location, type or scale of the Site access onto A414 Maldon Road required to accommodate the vehicle trips predicted to be generated by the Site.	The modelling undertaken for the appraisal of the Local Plan Preferred Approach, is strategic and area-wide in nature and further local/detailed modelling will be required and undertaken as part of the planning application process for the Hammonds Farm development. Whilst access proposals for Hammonds Farm have yet to be fully designed and assessed, the location of accesses onto the wider road network will be included in the Local Plan Pre-Submission modelling, based on outline developer proposals at this stage.
5.	3.4.8 Lack of detailed modelling of junction 19	Whilst it is also proposed to provide an additional access to serve Strategic Growth Site Policy 16a via the A12 Junction 19 to the north, the modelling undertaken in support of the Preferred Spatial Approach does not include detailed analysis of Junction 19 with Local Plan Review development trips and it is therefore unclear if such an access can be accommodated at this junction to serve the Site.	Outputs from a VISSIM microsimulation model of A12 Junction 19, built to assess National Highways' A12 widening DCO proposals, will be referenced and evaluated within the context of the Local Plan appraisal as part of the next stage of modelling.

Table Item ID:	Summary Point:	Summary of detailed representation made:	Essex Highways Modelling Response:
			Early concept development accesses onto the wider road network will be included in the latest Local Plan Pre-Submission strategic modelling, based on outline developer proposals.
6.	3.4.11 – 3.4.13 Future impact on approach to Beaulieu Station not properly assessed	The 'Transport Impact Appraisal of Spatial Approaches' (December 2023) report suggests that delays along the approach to the Beaulieu Rail Station should be monitored over time to determine the long-term viability of the route as a bus access link between the proposed allocated Site at Hammonds Farm and the railway station. Whilst this is typical for new developments as part of travel plan monitoring, proposing such a measure once infrastructure is already provided may be short sighted. The report goes on to say that "should future journey times to Beaulieu Station via the Boreham Interchange increase substantially, consideration should be given to placing additional focus on enhancing the provision of sustainable transport links to the existing rail station in Chelmsford city centre. Services could make use of the existing bus lane along the A1114 Essex Yeomanry Way (Baddow Bypass) and improved access through the redesigned Army and Navy Roundabout. However, PM peak traffic congestion along Parkway in the city centre would need to be managed to help improve travel times for buses heading out of the city centre." These statements and worded solutions do not appear to fully address likely issues of congestion on the local highway network. This highlights the fact that further modelling work would be required to assess this scenario.	It is expected that analysis of outputs from the VISSIM microsimulation model of A12 Junction 19 will help to infer the level of future bus accessibility between Beaulieu Station and the proposed Hammonds Farm development. It is not within the practical scope of the Local Plan appraisal to assess the scale of mitigation required along alternative sustainable corridors into the city centre from the Hammonds Farm site. However, the Local Plan transport modelling evidence base does recognise the need for a city centre sustainable access corridor study to be undertaken as part of the Hammonds Farm planning application – should proposals for a bus service to Beaulieu Rail Station be compromised by access difficulties at the Boreham Interchange.

Table Item ID:	Summary Point:	Summary of detailed representation made:	Essex Highways Modelling Response:
7.	3.4.16 – 3.4.17 Evidence does not demonstrate suitable access to Hammonds can be provided	Given that the proposed bus, walking, and cycling infrastructure improvements appear unlikely to achieve the necessary mode shift away from car use as set out above, there is concern as to the ability of appropriate Site access junctions to be provided to accommodate the likely vehicle trips generated by the proposed allocated Sites. The transport modelling evidence base does not clearly demonstrate suitable access can be provided to serve Strategic Growth Site Policy 16a at Hammonds Farm and Strategic Growth Site 16b to the south.	The modelling undertaken for the appraisal of the Local Plan Preferred Approach, is strategic in nature, but where available, early-stage access proposals provided by developers of Local Plan sites will be modelled as part of the Local Plan Pre-Submission appraisal. More detailed modelling to assess the impact of proposed development on the local road network and the detailed mitigation required to accommodate new trips associated with it, will be required and undertaken as part of the planning application process for developments identified as allocated sites in the Local Plan.
8.	4.2.2 - 4.2.8 Use of 2019 model and historic traffic surveys	Modelling for the critical A12 Junctions 18 and 19 are based upon 2019 traffic surveys that were used to support the strategic VISUM traffic model, which notably, has not been calibrated to turning movements at junctions. Traffic flows for modelling of the A12 Junction 18 have been based upon traffic surveys undertaken just prior to the Covid-19 pandemic. Whilst turning movement proportions have been checked against historic 2016 data, travel behaviour and patterns have changed since the pandemic and thus utilising data from this period may be unrepresentative of current conditions. Traffic survey data is typically valid for a period of three years and when considering the significance and scale of the proposed site allocations, use of recent and up to date traffic	The appendices of the 'T002 - Transport Impact Appraisal of Preferred Spatial Approach – March 2024' report contain the findings of a study undertaken to look at the differences in traffic flow patterns around Chelmsford in the years post-Covid-19. Whilst it is accepted that there are statistical differences between pre and post Covid-19 traffic flows at individual locations on the road network, at an aggregate level, there is no significant difference in either the AM or PM peak. This supports DfT findings that overall volumes are still at pre-pandemic levels and have not yet stabilised. Given that the VISUM model uses count data at an aggregate level, the 2019 validation is considered to still be

Table Item ID:	Summary Point:	Summary of detailed representation made:	Essex Highways Modelling Response:
		survey data would be more appropriate for creating a base scenario for junction assessment. The base traffic survey data used to create the Chelmsford VISUM and local junction models requires updating to reflect current travel behaviour and patterns Significant manipulation of historic pre-Covid-19 pandemic traffic survey data has been undertaken to create baseline survey data to support junction assessments. The base traffic survey data used to create the VISUM and local junction models is therefore questionable and requires updating to reflect current travel behaviour and patterns.	appropriate for use and provides a reliable, stable base for the modelling. Additional junction modelling will be undertaken as part of the Pre-Submission Local Plan appraisal which will use traffic data collected in September 2024 along the A12 corridor to improve base junction model validation/calibration in post-Covid conditions. It should be noted that calibration/validation to turning flows at junctions would not be expected for a strategic assignment model of the size developed for Chelmsford. Nevertheless, effort has been made to ensure that turning flows appear reasonable at key junctions, and where differences are noted, findings have been caveated in the analysis.
9.	4.3.1 - 4.3.13 Using 'Low' trip rates underestimates the volume of development trips	It is suggested that the trip rates used in the forecast modelling are low as a result of internalisation and sustainable and active travel mode-share, however, these vehicle trip rate reducing factors would already be accounted for in the trip rates determined from the TRICS database. As such, these low vehicle trip rates used would in fact be a double counting of sustainable and active travel mode-share trips and thus significantly underestimate the vehicle trip generation of the proposed allocated sites. Given that it has already been identified that the proposed bus, walking, and cycling infrastructure improvements proposed as part of the Strategic Growth Area Policy 16a are	The Local Plan appraisal makes use of the core trip rates already found within the VISUM forecast model, which have been used across several studies in Chelmsford. These include; the appraisal of Army & Navy junction design options (the modelling of which has been approved by DfT), the appraisal of the Chelmsford North-East Bypass, and the impact appraisal of the proposed Chelmsford Garden Community to the north of the city centre. It was considered appropriate to use the same trip rate assumptions to maintain consistency in approach across these studies.

Table Item ID:	Summary Point:	Summary of detailed representation made:	Essex Highways Modelling Response:
		unlikely to achieve the necessary mode shift away from car use, and the fact that a development proposal at Northeast Chelmsford of very similar nature to that proposed as part of the Site allocation at Hammonds Farm uses far higher, and as expected vehicle trip rates, for determining development vehicle trips suggests that vehicle trip rates used in the Chelmsford forecast model is significantly underestimated. Residential vehicle trip rates for the Local Plan Review Preferred Spatial Approach that are used in the Chelmsford forecast model appear to be significantly underestimated and the impact on the local highway network and at key junctions is likely to be far greater than is currently predicted	It is recognised that the trip rates used are representative of an aspirational approach to development planning and the levels of trip generation that could be achieved with the successful implementation and uptake of sustainable and active mode infrastructure through travel plan monitoring, penalties for failing to meet targets, monitor and manage practices etc. The trip rates are, however, not considered 'unrealistic', and are aligned with latest NPPF guidelines for Local Plan development.
10.	4.4.4 - 4.4.15 Impact on A12 J18 & lack of mitigation measures	The impact of a Site Access along A414 Maldon Road to serve Strategic Growth Site Policy 16a and Strategic Growth Site 16b is unknown and may cause additional delay and queuing along the A414 Maldon Road approach to the A12 Junction 18. The existing model only assesses the impact of the additional vehicle trips on the A12 Junction 18 without understanding how vehicles queued back along A414 Maldon Road may block or impact on the operation of a Site access junction. The 'Transport Impact Appraisal of Preferred Spatial Approach' (March 2024) document suggests that initial proposals to mitigate the impact on the A12 Junction 18 are contained in the October 2022 Stantec report 'Hammonds Farm Transport Technical Report'. These proposals will be refined through the ongoing Local Plan master planning and planning application process. A review of the Stantec report does not identify any other mitigation measures beyond those already proposed as part	Where available, early-stage access proposals provided by the Hammonds Farm developer will be modelled as part of the Local Plan Pre-Submission appraisal. However, the modelling undertaken for the appraisal of the Local Plan Preferred Approach, is strategic in nature, with a focus on the wider patterns of impact across the road network in Chelmsford. This is understood to be commensurate with the typical scope of modelling required for a Local Plan transport appraisal. More detailed modelling will be undertaken to assess the impact of development and access proposals on the local road network, and the detailed mitigation required, through developer Transport Assessments as part of the planning

Table Item ID:	Summary Point:	Summary of detailed representation made:	Essex Highways Modelling Response:
		of the Site allocation requirements, which include the sustainable and active travel bridge over the A12 and bus priority link to the north at the A12 Junction 19.	application process for the Hammonds Farm development.
11.	4.4.21 – 4.4.29 A12 J19 Boreham Interchange, insufficient evidence to demonstrate access at Hammonds can be accommodated	In order to demonstrate that the A12 Junction 19 can be considered a suitable option for providing access to the Hammonds Farm site, further modelling work is required Whilst the VISUM strategic forecast model incorporates the latest Junction 19 designs and signal timings published as part of the A12 Chelmsford to A120 widening scheme DCO, it does not allow for the Site access to the Strategic Growth Site Policy 16a at Hammonds Farm. It should also be noted that all modelled junctions except for two, one of which is the A12 Junction 19, were built using demand flows taken directly from the 2041 Chelmsford VISUM forecast model for scenarios with and without Local Plan Review development trips. Current modelling results related to the A12 Junction 19 that are presented in the evidence base in support of the Preferred Spatial Approach cannot be relied on and do not demonstrate that at this stage, an additional access from the A12 Junction 19 to serve the allocation of development at Hammonds Farm can be accommodated.	Updated junction modelling will be undertaken as part of the Pre-Submission Local Plan appraisal, including the use of outputs from a VISSIM microsimulation model of A12 Junction 19, built to assess National Highways' A12 widening DCO proposals. Where available, early-stage access proposals provided by the Hammonds Farm developer will be modelled at A12 Junctions 18 and 19.

Dear

Thank you for your email enquiry and for sharing your report on the natural, cultural, and historical significance of the Little Baddow and Danbury area in Essex with Natural England in support of the Danbury Ridge and the Chelmer Valley National Landscape Working Group's ambition for a National Landscape designation in this area. We acknowledge the accompanying letters of support for the Danbury Ridge and the Chelmer Valley National Landscape you propose submitted to us alongside your report from the National Trust, Essex Wildlife Trust, Essex Waterways & the Essex Bat Group.

By way of update, since our last written correspondence, Natural England are still working on the current round of National Landscape (Area of Outstanding Natural Beauty, AONB) designation projects announced in June 2021, these are:

- A new Yorkshire Wolds AONB
- A new Cheshire Sandstone Ridge AONB
- An extension to the Surrey Hills AONB
- An extension to the Chilterns AONB

Landscape designation is a multi-year process and we remain fully resourced and committed to the above four cases. Additionally, following on from Government's announcement on 29 November 2023, we will be starting work to consider the possibility of designating a new National Park. We are therefore not taking on any additional new designation projects at the current time.

It is important to note that there is no formal application process for National Park or National Landscape (AONB) designation. Natural England takes an evidence-led approach, using information such as the All-England Strategic Landscape Mapping Assessment Tool. We are also guided by government policy steers, and any future search will be England-wide.

Natural England is not in a position to confirm timescales for when our next landscape designation programme will commence, nor to confirm the format for the process. We will, however, keep the report you have submitted to us and supporting documentation on file in addition to any further appendices you wish to submit to us.

Yours sincerely,

West Anglia Area Team

28th October 2024

Dear Jeremy,

Re: Land West of Barbrook Way, Bicknace (Draft Allocation 11c)

Further to our discussions, I write in relation to the above draft allocation, and in response to some third party comments received as part of the Preferred Options Consultation on the Local Plan Review that closed in June 2024. It is understood that concerns have been raised in relation to access being deliverable from Barbrook Way. This Statement seeks to provide comfort that the site is deliverable.

For context prior to entering the Promotion Agreement for the land Welbeck Land undertook significant due diligence into potential access points for the development. This included a detailed topographical survey and significant investigation into any legal issues related to land ownership.

The results of our highways search would indicate the extent of the adopted highway does not include this sliver of land albeit due diligence is ongoing to see if the underlying s38 agreement for Barbrook Way can be secured in order to check that the highways search result is correct and the sliver of land is not, indeed, adopted.

We have also undertaken detailed investigations into any potential third parties (persons or entities) that may be able to successfully claim ownership of the land. Our research has not identified any such party that could realistically make such a claim. With this information we have been able to secure an indemnity insurance policy which benefits the development site, successors in title, service providers and alike to protect against the risk, however slim, of any third party either seeking to claim ownership of the third party strip and being successful in doing so.

These indemnity insurance policies exist precisely for such scenarios which are not unusual, particularly given errors in the mapping on Land Registry UK, often owing to many of the boundaries being drawn historically. Therefore, we strongly believe that the Council should consider this sufficient to demonstrate that the site is deliverable, and there is no reason to discount it or remove its allocation for housing in the forthcoming Plan.

Furthermore, and as provided to the Council we have to date produced several indicative masterplans of varying scale from 160 to 250 dwellings. Given our confidence in our ability to rely on Barbrook Way we have indicated this as our primary access.

However, our detailed investigations have demonstrated that alternative access points are available from Priory Road. Although it is acknowledged that this is not the Council's preferred option, it does

assist in demonstrating that the site is not ransomed. Enclosed are the alternative options for information.

Yours sincerely

Alice Lack MRTPI

Executive Summary

This report sets out:

- Summary of the Pre-Submission (Regulation 19) consultation (Section 1)
- Summary of representations received (Section 2)
- Summary of the main issues raised in the responses received on the Pre-Submission Local Plan and a high-level summary of CCC's response to the comments made, and where relevant, how they have informed any minor modifications proposed by CCC to be submitted to the Inspector examining the Plan (Section 3).

It supersedes the Pre-Submission Regulation 19 Document Feedback Report published in July 2025.

It should be noted that since the Pre-Submission consultation the need arose to carry out a further Regulation 19 Focused Additional Sites Consultation (shortened to 'Additional Sites Consultation' throughout this document). Comments on this Additional Sites Consultation are the subject of their own You Said We Did Feedback Report.

About the Consultation

A comprehensive six-week programme of consultation took place during the formal consultation period from 10am on 4th February 2025 to 4pm on 18th March 2025. The consultation was promoted through a range of activities including email/letter notifications to more than 6,200 contacts registered on the Council's Consultation Portal, on the Council's website, adverts in local publications, site notices and social media. Consultation activities included placing consultation documents on deposit at the Council's Customer Service Centre, organised stakeholder presentations, Duty to Co-operate meetings and public exhibitions.

Summary of responses to the Pre-Submission Consultation Document

A total of 6,725 duly made comments were received to the consultation from 2,798 respondents. The respondents are from a wide variety of groups and individuals including residents, developers, landowners and their agents, businesses and statutory bodies such as other local authorities and Parish/Town Councils. All the comments received can be viewed on the Council's Consultation Portal. An overview of the main issues raised to the plan is provided below:

- A wide range of feedback was received ranging from general comments to technical observations on detailed policy wording
- Most Government agencies or national bodies support the plan outright or offer qualified support subject to some proposed amendments
- Mix of support and opposition from Town/Parish Councils, with many suggesting changes including the deletion of site allocations
- Most public comments were objecting to one or more aspects of the plan, though there was limited support

- Some developers, Parish Councils and the public challenge compliance with the Duty to Cooperate including whether all bodies have been properly engaged and neighbouring unmet housing needs properly considered
- Concerns over the evidence base/ lack of justification for some policies including net zero homes (Policy S2 and DM31), development requirements (Policy S6) and sustainable development measures in DM25
- Mix of support and opposition to the development requirements (Policy S6) and the Spatial Strategy (Policy S7)
- Concerns that the Spatial Strategy is too reliant on larger strategic sites particularly the Garden Communities, has an insufficient supply buffer, is too reliant on windfall sites, and that a sufficient range of reasonable alternatives approaches, and site options have not considered or appraised
- Concerns there are not enough small site housing allocations which does not accord with national policy requirements
- Calls for the expansion of the North-East Chelmsford Garden Community site and clarity sought over why this option is rejected
- Calls from developers for Green Belt and Green Wedge reviews to identify sustainable development opportunities in these areas
- Many detailed wording changes proposed to expand/amend policies from minor changes to the deletion of policy requirements including to some site allocation policies to ensure they are viable and deliverable
- Many objections from the development industry to policy requirements which exceed national planning policy including net zero homes (Policy S2/ DM31) and 20% biodiversity net gain (Policy S4/ DM16)
- Some question the need for policies including a strategic design policy (Policy S15 Successful Places) and specific Green Wedge policies (Policy S11 Countryside)
- Many in the development industry call for an immediate/earlier review of the plan to meet housing needs in full as soon as possible (Policy S13 Monitoring and Review)
- Many in the development industry call for the housing requirement to be increased to meet or exceed the revised Standard Method figure of 1,454 dpa outlined in the 2024 NPPF
- Broad support from the promoters of allocated sites with some requesting higher capacities, larger site areas, more flexible types of employment floorspace and policy requirement changes
- Many alternative site allocations promoted by landowners/developers at a range of site sizes and locations
- Significant levels of opposition to Hammonds Farm (SGS16a) and Junction 18 A12 Employment Area (SGS16b) for multiple reasons including traffic, landscape, flood risk, infrastructure and heritage impacts, with calls for their removal. There is also some limited support for these sites
- High level of objections to some other site allocations in particular Land at Kingsgate, Bicknacre (GS11b) and Land West of Barbrook Way, Bicknacre (GS11c) for multiple reasons including traffic, infrastructure, landscape and flood risk impacts and calls for their removal
- Many developers challenge the delivery rates of strategic site allocations in particular SGS16a, and whether a 5-year housing land supply can be achieved and maintained

- Concerns from Parish Councils and the public that some site allocations do not reflect ‘made’ Neighbourhood Plans
- Calls for changes to masterplan requirements for strategic sites and Special Policy Areas
- Requests for policy and Policy Map changes to some Special Policy Areas including ARU Writtle and Hanningfield Reservoir, and additional Special Policy Areas proposed
- Development industry concerns on how the plan will be used alongside the 2024 National Planning Policy Framework (NPPF) for decision-making
- Criticism from some Parish Councils and the public regarding the consultation including a lack of adequate engagement, inaccessible information and that the process for making comments was too complicated.

Commentary on main issues raised and CCC response

The ‘CCC response’ tables provide a high-level response to the main issues raised within the comments throughout this report. A high-level commentary on the main issues raised in the representations to the Pre-Submission plan is set out below:

Housing requirement and delivery

- There is no longer a national requirement for a supply buffer to be allocated with the risks to supply instead managed through the need to maintain a 5-year land supply and the Housing Delivery Test. A range of development quantums, broad distributions of development and site options available have been tested through the IIA. It is considered that an appropriate range of realistic options and reasonable alternatives have been tested through this iterative process. The NPPF directs Local Planning Authorities to consider historic windfall delivery rates. The Pre-Submission Housing Topic Paper shows trends over a considerable length of time and that assumed average rates are below the actual average allowing a higher figure to be predicted. The ‘small sites’ (under 1ha) are an important part of the Plan to ensure delivery of a variety of sites in a timely manner. This is not only to be met through allocations, but also a combination of windfall sites and custom build housing.
- At the time the Pre-Submission Consultation was carried out (using the Council’s Five-Year Housing Land Supply Methodology - April 2024) the Council could demonstrate a Five-Year Housing Land Supply at the point of submission of the Plan. Following the Pre-Submission Consultation the Council’s Five-Year Housing Land Supply (based on the August 2025 Housing Site Schedule) showed that at the point of submission (Years 2 – 6) it was estimated to be 8,010 dwellings. Using the August 2025 Housing Site Schedule, it was estimated that the housing requirement figure for the Five-Year Housing Land Supply calculation would be 1,622 dwellings per annum on submission. This was based on the proposed Housing Requirement figure of 1,210 dwellings per annum, the estimated shortfall in housing completions from the new base period of the emerging Local Plan (1,672 dwellings) and the required 5% buffer to ensure choice and competition in the market for land. Based on these figures this would only be 4.93 years of housing land

supply (8,010/1,622) on submission. As a result of this the Council undertook an Additional Site Consultation which seeks to rectify this situation and demonstrate that the Local Plan will meet its Five-Year Housing Land Supply at the point of submission. Using the latest housing supply figure in the April 2026 Housing Site Schedule (8,962), and the updated housing requirement figure (including the actual shortfall of 1,783 dwellings that reflects 407 net new completions in 2025/26), the revised Five-Year Housing Land Supply Calculation including a 5% buffer is 5.45 years (8,962/1,645). The housing requirement in the plan meets at least 80% of the revised standard method housing need in line with the Government's latest plan-making transitional arrangements. This is consistent with the NPPF's objective of preparing and maintaining up to-date plans in order to make consistent provision for housing and other needs.

- Delivery rates are set out in the Local Plan Housing Trajectory and are established through the Council's Five-Year Housing Land Supply Methodology. The Trajectory is updated annually, and the Pre-Submission Local Plan used the latest available Housing Site Schedule (April 2024). Minor modifications will be proposed to the Trajectory to reflect the latest published Housing Site Schedule ahead of submission (April 2026). A number of Strategic Growth Sites rolled forward from the adopted Local Plan including greenfield sites have planning permission or resolutions to grant planning permission including North of South Woodham Ferrers, North of Broomfield and North East Chelmsford.

Site allocations

- The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process. With the inclusion of the additional sites identified in the Additional Site Consultation the development requirements can be met within the Local Plan without needing to undertake a Green Belt review. This approach accords with National Planning Guidance, the adopted Local Plan, and the evidence base.
- Further expansion of North East Chelmsford (Chelmsford Garden Community - Location 6) was discounted following the Issues and Options consultation as promoted development sites were found to not be deliverable within the plan period given permitted mineral extraction and land remediation works.
- The site allocations for Hammonds Farm (SGS16a) and Junction 18 A12 Employment Area (SGS16b) are supported by the plan evidence base. All Highways modelling to support the Local Plan has been carried out at a strategic level, considering all proposed growth in the adopted Local Plan, background growth to 2041, neighbouring authorities' growth, and all newly proposed development sites.
- Impacts on the historic environment and landscape will be minimised through the masterplanning and mitigation strategies. The flood risk assessment shows that development would be directed to the areas at lowest risk of flooding. A wide range of site infrastructure is proposed through the requirements of the policy.

- The site allocations for Land at Kingsgate, Bicknacre (GS11b) and Land West of Barbrook Way, Bicknacre (GS11c) are supported by the plan evidence base including a Strategic Flood Risk Assessment, Landscape Sensitivity, Archaeology Assessment and Capacity Study, Heritage Impact Assessment, and traffic modelling. The Small Sites Planning Briefs/Concept Framework 2024 (appended to the Submission Spatial Strategy and Strategic Sites Topic Paper) considers that there are no overriding site constraints which mean that the sites are unsuitable or undeliverable.
- Special Policy Areas (SPAs) are defined within and around existing facilities and institutions to enable their operational and functional requirements to be planned in a strategic and phased manner. SPA6 at Writtle includes an area of open space which should remain unchanged. The requirement for Hanningfield Reservoir SPA to show a demonstrable need for any future proposals in the Green Belt is also unchanged. New SPAs are not considered appropriate as they can be decided against other policies.
- Site allocations are strategic matters for the Local Plan, but where applicable the made Neighbourhood Plans include detailed design and other guidance which can influence future detailed development proposals and planning applications.

General policy matters

- Policies such as S15 Successful Places and specific Green Wedge policies are included as they address and provide more detail for locally important issues which are not explicitly covered by the NPPF.
- Many objections from the development industry to policy requirements which exceed national planning policy including net zero homes (Policy S2/ DM31) and 20% biodiversity net gain (Policy S4/ DM16). These policy requirements are supported by the plan evidence base. The ‘net zero’ evidence base developed for Greater Essex, which supports the plan, demonstrates that the policy requirements are technically feasible to deliver and at reasonable cost, and legally sound for local authorities to set higher standards. A similar policy, based on the same Essex-wide ‘model policy’, has recently been found sound through Uttlesford District Council’s Local Plan examination.
- There is no reason for CCC to commit to an update of the Local Plan earlier than the timeframe set out in Policy S13, which is also set out in Paragraph 34 of the NPPF (2024). The Local Plan is being examined against the 2023 version of the NPPF, to meet the transitional arrangements set out in Annex 1 of the 2024 NPPF, specifically Para 234 a.
- The Council’s Masterplan Procedure (October 2025) has been updated to cover three Masterplan routes, including planning/site briefs for smaller, less constrained sites. Site policies will be updated to reflect the relevant route for each site but the continued requirement for Masterplans for strategic sites and Special Policy Areas will ensure that they satisfy the requirements of their respective plan policies. This can include delivery of all necessary infrastructure and ensuring that new development is delivered as part of a cohesive approach.

Duty to Co-operate and Consultation

- Key bodies were consulted on strategic matters, including Essex County Council, adjoining local authorities, Historic England, Natural England, and the Environment Agency. A total of 153 of these bodies responded to the consultation. Although the formal Duty to Co-operate has now been removed, the Council has co-operated with a range of bodies on strategic planning matters on an on-going basis as evidenced in the Duty to Co-operate Position Statements (evidence base documents DTC001, DTC002 and DTC005), and Statements of Common Ground including those with adjoining authorities who asked for their unmet needs to be considered. A Statement of Co-operation will be published to accompany the Local Plan Submission.
- The consultation exceeded requirements set out in legislation and the Council's Statement of Community Involvement. A full schedule of engagement activity is included in Section 1 of this report, and included direct notification, events, and publications which are included in Appendix 1. In addition, detailed step-by-step guidance for using the consultation portal was published specifically to guide users on how to make comments on the consultation events.

Next Steps

It should be noted that since the Pre-Submission consultation the need arose to carry out a further Regulation 19 Focused Additional Sites consultation. Comments on this Additional Sites Consultation are the subject of their own You Said We Did Feedback Report.

This report and the subsequent Additional Sites 'You Said We Did' Feedback Report will be presented in the Regulation 22 Consultation Statement which will accompany the plan when submitted for Examination.

Introduction

The Pre-Submission consultation represented the third formal stage in the preparation of the Review of the Adopted Chelmsford Local Plan. The consultation document set out the spatial strategy for new homes and jobs for the future growth and development of the city up to 2041. It also contained updated and new policies which would be used to determine planning applications.

The consultation was undertaken in accordance with Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012 and was preceded by an Issues and Options consultation in 2022 and Preferred Options consultation in 2024 both undertaken in accordance with Regulation 18 of the Town and Country Planning (Local Planning) (England) Regulations 2012.

Purpose of this 'You Said We Did' Report

This report sets out the consultation feedback received on the Pre-Submission document from a wide variety of groups and individuals including:

- Residents
- Developers/landowners and their agents
- Businesses
- Statutory bodies such as local authorities, Parish/Town Councils and utilities.

This report is constructed in four parts:

- An Executive Summary includes an overview of the main issues and a commentary on them
- Section 1 provides a summary of the consultation undertaken
- Section 2 gives a summary of the representations received
- Section 3 provides a summary of the main issues raised in the responses received on the Pre-Submission Local Plan and a high-level summary of CCC's response to the comments made, and where relevant, how they have informed any minor modifications proposed by CCC to be submitted to the Inspector examining the Plan. The report is set out in the Pre-Submission document order and therefore the policy numbers may not be in numerical sequence.

This report supersedes the Pre-Submission Regulation 19 Document Feedback Report published in July 2025.

Section 1: Summary of Consultation Undertaken

A comprehensive six-week programme of consultation took place during the formal consultation period from 10am on 4th February 2025 to 4pm on 18th March 2025.

This programme of consultation followed (and exceeded) the requirements set out in legislation, and the commitments in the Council's adopted Statement of Community Involvement (September 2020).

The documents published for consultation on 4th February were:

- Pre-Submission (Regulation 19) Local Plan Consultation Document; and
- Pre-Submission Integrated Impact Assessment (subject of a separate Feedback Report).

These documents were placed on deposit at CCC Customer Service Centre, with electronic versions available to view at most Parish/Town Council offices and local libraries across Chelmsford.

The Council notified more than 6,200 contacts registered on its Consultation Portal. These included the public, statutory agencies such as Essex County Council and Town/Parish Councils, utility companies, businesses, interest groups, and voluntary and community bodies. Council Members and staff were also notified.

A number of consultation events were arranged:

- Three staffed exhibitions, visited by 41 attendees
- 16 days of unstaffed exhibitions
- Four pop-up displays for the whole consultation period
- Five targeted presentations including a Parish/Town Council Forum, Agent/Developers Forum and Local Authority Duty to Co-operate meeting
- A bespoke Local Plan video, attracting 1,100 views since its launch in 2024.

Printed/online materials and advertisements were produced as follows:

- Web page with the consultation documents and links to supporting information including the exhibition panels, attracting 6,400 visits
- Advertisement in a local newspaper (Essex Chronicle), and The City Times and South Woodham Focus (independent community magazines)
- Information packs for all of Chelmsford's 29 Parish/Town Councils
- Six City Life emails via e-shot to approx.10,600 recipients and business bulletin to 5,100 recipients, linking to two City Life news website articles and/or Local Plan webpage
- 25 social media posts/stories/feeds/adverts seen by nearly 50,000 contacts and viewed over 100,000 times
- 140 posters distributed to Parish/Town Councils, CCC offices and leisure facilities, post offices, doctors' surgeries, churches and local shops
- Summary newsletters available at public exhibitions and on request
- 147 site notices placed around 15 proposed new site allocations
- 30 digital screens at CCC venues
- 7 digital screens at bus stops
- Staff e-mail banner and website banner.

A list of organisations consulted, and copies of key consultation materials are given in Appendix 1.

Integrated Impact Assessment of the review of the Adopted Local Plan: Preferred Options Consultation

The Local Plan Integrated Impact Assessment (IIA) was also subject to consultation at the same time. The IIA brings various strands of assessment together, consisting of the Sustainability Appraisal, Strategic Environmental Assessment, Habitats Regulations Assessment, Health Impact Assessment, and Equalities Impact Assessment. Feedback on this document is summarised in a separate report prepared by the Council's IIA Consultants.

Call for Sites and Strategy Housing and Employment Land Availability Assessment (SHELAA)

In addition to the Local Plan and IIA consultations, the Council undertook a Call for Sites to identify available land for consideration for future development. Four new submissions and four amendments to existing sites were submitted through this process. These have been assessed in an updated Strategic Housing and Employment Land Availability Assessment (SHELAA).

Section 2: Summary of Representations Received

For this report, people and organisations who made a comment to the consultation are called ‘respondents’.

Methodology

Respondents had a choice of ways to make their comments, by:

- Answering questions included in a complete version of the consultation document published on the consultation portal
- Answering questions using a stand-alone online questionnaire published on the consultation portal
- Sending written comments in an e-mail
- Sending written comments by post.

The consultation questions focused on whether the Council had met the legal requirements (including the Duty to Co-operate, required at that stage) and whether the plan meets the tests of soundness set out in the National Policy Planning Framework – that it is positively prepared, justified, effective and consistent with national policy.

Whichever method respondents used; all comments have been entered into the Council’s Consultation Portal.

Where respondents did not state which paragraph/section/policy or site they were commenting on, officers have assigned responses to the most relevant part of the Local Plan.

If questions were not answered by a consultee selecting a box, the Council has not sought to tick any boxes to avoid any misrepresentation.

The questions for both online methods of response were identical and have been combined for this report.

To ensure proper consideration of issues, respondents have been divided into types depending on their interface with the Council. Some fall into more than one category, so totals may exceed the overall number of respondents. Similarly, some respondents made their comments via more than one method so the totals for how comments were made is greater than the total number of comments received.

The assessment of responses is high level and focuses on the main issues raised, rather than the number of representations to any individual question. Where many people have made a similar main issue, these have been summarised as one main issue.

Overview of responses

A total of **6,725 comments** were received to the consultation from **2,798 respondents**. The vast majority (5,703 comments or 85%) of these were directed to proposed Strategic Sites 16a (Hammonds Farm) and 16b (Employment site adjacent

to J18 of A12) almost all of which are residents objecting to the inclusion of the sites in the Local Plan.

Comments by respondent type:

Type of Respondent	Explanation	Number of Respondents
Duty to Co-operate (DTC) bodies	Key bodies consulted on strategic matters, including Essex County Council, adjoining local authorities, Historic England, Natural England, Environment Agency	153
Specific bodies/groups	Parish/Town Councils, utility bodies, health and transport consultees etc	270
General and Other bodies/groups	Voluntary groups, religious groups, housing providers, businesses etc	208
Developers/landowners	Landowners, promoters of land and their agents	647
Public	Individual members of the public	5,838

How people made their comments:

Method of making comments	Number of Comments	Percentage (rounded)
Online Consultation Portal	413	6%
E-mail	6,257	93%
Letter	55	1%

The number of representations made to each question are shown in the tables below. These record where people selected an option, and/or where they made a written comment. The figure in brackets represents the percentage of total representations. It should be noted that the number of responses received to each question will not amount to the totals set out above as people did not have to answer every question.

Question 1: Do you consider the Local Plan legally compliant in accordance with the Town and Country Planning (Local Planning) (England) Regulations 2012?	
	Reps received
Yes	323 (5%)
No	5,132 (76%)
No Response	1,271 (19%)
Question 1: Please provide an explanation below	
Response	5,225 (78%)
No Response	1,500 (22%)
Question 1a: Please set out the modifications you consider necessary to make the Local Plan legally compliant including revised wording of any policy or text.	
Response	100 (1.5%)
No Response	6,625 (98.5%)

Question 2: Does the Local Plan comply with the Duty to Co-operate?	
	Reps received
Yes	286 (4%)
No	5,183 (77%)
No Response	1,256 (19%)
Question 2: Please provide an explanation below	
Response	5,251 (78%)
No Response	1,474 (22%)
Question 2a: Please outline any changes to the approach taken which you consider necessary to ensure the Duty to Co-operate is met.	
Response	100 (1.5%)
No Response	6,625 (98.5%)

Question 3: Do you consider the Local Plan 'sound'?	
	Reps received
Yes	174 (2.5%)
No	6,056 (90%)
No Response	498 (7.5%)
Question 3: If no this is because you consider the Local Plan is NOT:	
Positively Prepared	213 (3%)
Justified	359 (5%)
Effective	275 (4%)
Consistent with National Policy	291 (4%)
No Response	6,204 (92%)
Question 3a: Please provide an explanation below and identify the main issues.	
Response	6,595 (98%)
No Response	130 (2%)
Question 3b: Please set out the changes you consider necessary to make the Local Plan 'sound' including revised wording of any policy or text.	
Response	506 (7.5%)
No Response	6,219 (92.5%)

Question 4: If your representation is seeking a change, do you consider it necessary to take part and speak at the Examination?	
	Reps received
Yes	360 (5%)
No	188 (3%)
No Response	6,177 (92%)

Question 6: Do you wish to be notified of the following:	
	Reps received
Submission of the Local Plan for Examination	502 (7.5%)
Publication of the Inspector's Report	500 (7.5%)
Adoption of the Local Plan	500 (7.5%)
No Response	6,220 (92%)

*Note that these percentages will not all total 100% as respondents were able to tick as many options as they felt applicable.

A small number of representations were received after the closing date. Those that were received by email within two hours of the closing time (i.e. by 6pm on 18th March 2025) were deemed ‘duly made’ to allow for any potential delays in emails reaching the Council’s mailbox. These have been analysed and included in the figures in this report. Others received after 6pm were deemed not ‘duly made’.

29 of the representations were partly ‘inadmissible’ due to their content, so the comments have been included but with the inadmissible part redacted. An additional 3 representations had no address details and were not accepted.

A significant number of representations were received by email from ‘Say no to Hammonds Farm’ - a coalition of Councillors from Boreham, Sandon, Danbury and Little Baddow Parish Councils, expressing opposition to new development at Strategic Growth Sites 16a Chelmsford East Garden Community and 16b Land Adjacent to A12 Junction 18 Employment Area.

All the comments received can be viewed in full on the Council’s planning policy consultation portal.

When viewing the portal, you will see the list of recent consultation events. Events which are open for consultation show a green timeline and the word ‘open’. Those which are closed show a red timeline and the word ‘closed’.

To view comments, you need to:

- Choose the event you would like to view comments for
- Select 'learn more' to open the event page
- Click on the ‘what people say’ tab to display a list of all the comments.

You can read all comments, or sort by name or date we received them. Where additional information such as reports or maps were submitted with a comment, these are listed at the end of the comment in PDF format and can be viewed or downloaded.

Responses to Pre-Submission consultation included in the complete version of the full document are prefixed PS25. Responses to the stand-alone questionnaire are prefixed PSQ25. You can find out more about using the consultation portal in our guidance notes.

Section 3: Summary of the main issues raised and CCC response

This section contains a high-level summary of the main issues and changes requested in the Pre-Submission Local Plan document order.

It specifies who has made comments from public sector bodies, infrastructure or service providers and developers/landowners in brackets at the end of relevant bullet points in the 'Summary of Representations' text. This is because it is useful to understand the nature of respondents, particularly where a stakeholder has a legal duty or responsibility over a matter that they are making comments about. It does not specify who has made comments from members of the public as to do so would result in a very long report, so bullet points from the public do not a have brackets.

It should be noted that in some cases, members of the public raised similar points to stakeholders. This is especially the case in relation to comments made by Little Baddow, Boreham, Danbury and Sandon Parish Council Cross Working Group to Strategic Growth Sites 16a (Hammonds Farm) and 16b (Junction 18 of the A12) which have been replicated and amplified by many individuals. To avoid duplication, these comments have not been repeated in the public comments. However, this does not affect the consultation process as this report focuses on the main issues received rather than the number of representations to any individual section of the plan.

Where respondents made the same Duty to Cooperate comments in multiple representations we have sought to report the main issues raised against the Introduction so they can be read together and to avoid duplication. We have also reported the main issues against the most relevant part of the Local Plan.

It is important to note that this report does not summarise every representation or identify every individual detailed issue, as the purpose is to identify main issues and requested changes.

Following the summary of main issues and changes requested for each Consultation Point a 'CCC Response' table provides a high-level summary of CCC's response to the comments made, and where relevant, how they have informed any minor modifications proposed by CCC to be submitted to the Inspector examining the Plan. This includes details of the key changes proposed to be made and suggestions not taken forward and why. Similarly, the 'CCC response' tables do not provide a response to each individual comment.

The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This report entitled Local Plan Pre-Submission - Response to Representations (September 2025) is given in Appendix 2 and includes a review and focused response to representations received relating to the transport modelling evidence base. This has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform any proposed modifications to the Pre-Submission Local Plan.

It should be noted that since the Pre-Submission consultation the need arose to carry out a further Regulation 19 Focused Additional Sites consultation. Comments on this Additional Sites Consultation are the subject of their own You Said We Did Feedback Report.

Summary of main issues raised to the Pre-Submission Plan

All the comments received can be viewed in full on the Council's Consultation Portal. A high-level commentary on the main issues raised in the representations to the Pre-Submission plan is set out below.

- A wide range of feedback was received ranging from general comments to technical observations on detailed policy wording
- Most Government agencies or national bodies support the plan outright or offer qualified support subject to some proposed amendments
- Mix of support and opposition from Town/Parish Councils, with many suggesting changes including the deletion of site allocations
- Most public comments were objecting to one or more aspects of the plan, though there was limited support
- Some developers, Parish Councils and the public challenge compliance with the Duty to Cooperate including whether all bodies have been properly engaged and neighbouring unmet housing needs properly considered
- Concerns over the evidence base/ lack of justification for some policies including net zero homes (Policy S2 and DM31), development requirements (Policy S6) and sustainable development measures in DM25
- Mix of support and opposition to the development requirements (Policy S6) and the Spatial Strategy (Policy S7)
- Concerns that the Spatial Strategy is too reliant on larger strategic sites particularly the Garden Communities, has an insufficient supply buffer, is too reliant on windfall sites, and that a sufficient range of reasonable alternatives approaches, and site options have not considered or appraised
- Concerns there are not enough small site housing allocations which does not accord with national policy requirements
- Calls for the expansion of the North-East Chelmsford Garden Community site and clarity sought over why this option is rejected
- Calls from developers for Green Belt and Green Wedge reviews to identify sustainable development opportunities in these areas
- Many detailed wording changes proposed to expand/amend policies from minor changes to the deletion of policy requirements including to some site allocation policies to ensure they are viable and deliverable
- Many objections from the development industry to policy requirements which exceed national planning policy including net zero homes (Policy S2/ DM31) and 20% biodiversity net gain (Policy S4/ DM16)
- Some question the need for policies including a strategic design policy (Policy S15 Successful Places) and specific Green Wedge policies (Policy S11 Countryside)
- Many in the development industry call for an immediate/earlier review of the plan to meet housing needs in full as soon as possible (Policy S13 Monitoring and Review)

- Many in the development industry call for the housing requirement to be increased to meet or exceed the revised Standard Method figure of 1,454 dpa outlined in the 2024 NPPF
- Broad support from the promoters of allocated sites with some requesting higher capacities, larger site areas, more flexible types of employment floorspace and policy requirement changes
- Many alternative site allocations promoted by landowners/developers at a range of site sizes and locations
- Significant levels of opposition to Hammonds Farm (SGS16a) and Junction 18 A12 Employment Area (SGS16b) for multiple reasons including traffic, landscape, flood risk, infrastructure and heritage impacts, with calls for their removal. There is also some limited support for these sites
- High level of objections to some other site allocations in particular Land at Kingsgate, Bicknacre (GS11b) and Land West of Barbrook Way, Bicknacre (GS11c) for multiple reasons including traffic, infrastructure, landscape and flood risk impacts and calls for their removal
- Many developers challenge the delivery rates of strategic site allocations in particular SGS16a, and whether a 5-year housing land supply can be achieved and maintained
- Concerns from Parish Councils and the public that some site allocations do not reflect 'made' Neighbourhood Plans
- Calls for changes to masterplan requirements for strategic sites and Special Policy Areas
- Requests for policy and Policy Map changes to some Special Policy Areas including ARU Writtle and Hanningfield Reservoir, and additional Special Policy Areas proposed
- Development industry concerns on how the plan will be used alongside the 2024 National Planning Policy Framework (NPPF) for decision-making
- Criticism from some Parish Councils and the public regarding the consultation including a lack of adequate engagement, inaccessible information and that the process for making comments was too complicated.

Summary of CCC response to main issues raised to the Pre-Submission Plan

The 'CCC response' tables in this section provide a high-level response to the main issues raised within the comments throughout this report. A high-level CCC response to the main issues raised in the representations to the Pre-Submission plan is set out below:

Housing requirement and delivery

- There is no longer a national requirement for a supply buffer to be allocated with the risks to supply instead managed through the need to maintain a 5-year land supply and the Housing Delivery Test. A range of development quantums, broad distributions of development and site options available have been tested through the IIA. It is considered that an appropriate range of realistic options and reasonable alternatives have been tested through this iterative process. The NPPF directs Local Planning Authorities to consider historic windfall delivery rates. The Pre-Submission Housing Topic Paper

shows trends over a considerable length of time and that assumed average rates are below the actual average allowing a higher figure to be predicted. The ‘small sites’ (under 1ha) are an important part of the Plan to ensure delivery of a variety of sites in a timely manner. This is not only to be met through allocations, but also a combination of windfall sites and custom build housing.

- At the time the Pre-Submission Consultation was carried out (using the Council’s Five-Year Housing Land Supply Methodology - April 2024) the Council could demonstrate a Five-Year Housing Land Supply at the point of submission of the Plan. Following the Pre-Submission Consultation the Council’s Five-Year Housing Land Supply (based on the August 2025 Housing Site Schedule) showed that at the point of submission (Years 2 – 6) it was estimated to be 8,010 dwellings. Using the August 2025 Housing Site Schedule, it was estimated that the housing requirement figure for the Five-Year Housing Land Supply calculation would be 1,622 dwellings per annum on submission. This was based on the proposed Housing Requirement figure of 1,210 dwellings per annum, the estimated shortfall in housing completions from the new base period of the emerging Local Plan (1,672 dwellings) and the required 5% buffer to ensure choice and competition in the market for land. Based on these figures this would only be 4.93 years of housing land supply (8,010/1,622) on submission. As a result of this the Council undertook an Additional Site Consultation which seeks to rectify this situation and demonstrate that the Local Plan will meet its Five-Year Housing Land Supply at the point of submission. Using the latest housing supply figure in the April 2026 Housing Site Schedule (8,962), and the updated housing requirement figure (including the actual shortfall of 1,783 dwellings that reflects 407 net new completions in 2025/26), the revised Five-Year Housing Land Supply Calculation including a 5% buffer is 5.45 years (8,962/1,645). The housing requirement in the plan meets at least 80% of the revised standard method housing need in line with the Government’s latest plan-making transitional arrangements. This is consistent with the NPPF’s objective of preparing and maintaining up to-date plans in order to make consistent provision for housing and other needs.
- Delivery rates are set out in the Local Plan Housing Trajectory and are established through the Council’s Five-Year Housing Land Supply Methodology. The Trajectory is updated annually, and the Pre-Submission Local Plan used the latest available Housing Site Schedule (April 2024). Minor modifications will be proposed to the Trajectory to reflect the latest published Housing Site Schedule ahead of submission (April 2026). A number of Strategic Growth Sites rolled forward from the adopted Local Plan including greenfield sites have planning permission or resolutions to grant planning permission including North of South Woodham Ferrers, North of Broomfield and North East Chelmsford.

Site allocations

- The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process. With the

inclusion of the additional sites identified in the Additional Site Consultation the development requirements can be met within the Local Plan without needing to undertake a Green Belt review. This approach accords with National Planning Guidance, the adopted Local Plan, and the evidence base.

- Further expansion of North East Chelmsford (Chelmsford Garden Community - Location 6) was discounted following the Issues and Options consultation as promoted development sites were found to not be deliverable within the plan period given permitted mineral extraction and land remediation works.
- The site allocations for Hammonds Farm (SGS16a) and Junction 18 A12 Employment Area (SGS16b) are supported by the plan evidence base. All Highways modelling to support the Local Plan has been carried out at a strategic level, considering all proposed growth in the adopted Local Plan, background growth to 2041, neighbouring authorities' growth, and all newly proposed development sites.
- Impacts on the historic environment and landscape will be minimised through the masterplanning and mitigation strategies. The flood risk assessment shows that development would be directed to the areas at lowest risk of flooding. A wide range of site infrastructure is proposed through the requirements of the policy.
- The site allocations for Land at Kingsgate, Bicknacre (GS11b) and Land West of Barbrook Way, Bicknacre (GS11c) are supported by the plan evidence base including a Strategic Flood Risk Assessment, Landscape Sensitivity, Archaeology Assessment and Capacity Study, Heritage Impact Assessment, and traffic modelling. The Small Sites Planning Briefs/Concept Framework 2024 (appended to the Submission Spatial Strategy and Strategic Sites Topic Paper) considers that there are no overriding site constraints which mean that the sites are unsuitable or undeliverable.
- Special Policy Areas (SPAs) are defined within and around existing facilities and institutions to enable their operational and functional requirements to be planned in a strategic and phased manner. SPA6 at Writtle includes an area of open space which should remain unchanged. The requirement for Hanningfield Reservoir SPA to show a demonstrable need for any future proposals in the Green Belt is also unchanged. New SPAs are not considered appropriate as they can be decided against other policies.
- Site allocations are strategic matters for the Local Plan, but where applicable the made Neighbourhood Plans include detailed design and other guidance which can influence future detailed development proposals and planning applications.

General policy matters

- Policies such as S15 Successful Places and specific Green Wedge policies are included as they address and provide more detail for locally important issues which are not explicitly covered by the NPPF.
- Many objections from the development industry to policy requirements which exceed national planning policy including net zero homes (Policy S2/ DM31) and 20% biodiversity net gain (Policy S4/ DM16). These policy requirements are supported by the plan evidence base. The 'net zero' evidence base developed for Greater Essex, which supports the plan, demonstrates that the policy requirements are technically feasible to deliver and at reasonable cost,

and legally sound for local authorities to set higher standards. A similar policy, based on the same Essex-wide 'model policy', has recently been found sound through Uttlesford District Council's Local Plan examination.

- There is no reason for CCC to commit to an update of the Local Plan earlier than the timeframe set out in Policy S13, which is also set out in Paragraph 34 of the NPPF (2024). The Local Plan is being examined against the 2023 version of the NPPF, to meet the transitional arrangements set out in Annex 1 of the 2024 NPPF, specifically Para 234 a.
- The Council's Masterplan Procedure (October 2025) has been updated to cover three Masterplan routes, including planning/site briefs for smaller, less constrained sites. Site policies will be updated to reflect the relevant route for each site but the continued requirement for Masterplans for strategic sites and Special Policy Areas will ensure that they satisfy the requirements of their respective plan policies. This can include delivery of all necessary infrastructure and ensuring that new development is delivered as part of a cohesive approach.

Duty to Co-operate and Consultation

- Key bodies were consulted on strategic matters, including Essex County Council, adjoining local authorities, Historic England, Natural England, and the Environment Agency. A total of 153 of these bodies responded to the consultation. Although the formal Duty to Co-operate has now been removed, the Council has co-operated with a range of bodies on strategic planning matters on an on-going basis as evidenced in the Duty to Co-operate Position Statements (evidence base documents DTC001, DTC002 and DTC005), and Statements of Common Ground including those with adjoining authorities who asked for their unmet needs to be considered. A Statement of Co-operation will be published to accompany the Local Plan Submission.
- The consultation exceeded requirements set out in legislation and the Council's Statement of Community Involvement. A full schedule of engagement activity is included in Section 1 of this report, and included direct notification, events, and publications which are included in Appendix 1. In addition, detailed step-by-step guidance for using the consultation portal was published specifically to guide users on how to make comments on the consultation events.

Introduction

Consultation point	Total number of responses
Introduction	22

Summary of Representations – main issues and suggested modifications:

- Welcome the ongoing engagement with Historic England and the plan. Acknowledge the work to prepare the Heritage Impact Assessments and integrating their recommendations into the plan (Historic England PSQ25-5798 & 5800)

- Consider the plan ‘sound’ regarding the aspects relevant to our natural environment remit (Natural England PSQ25-6239)
- The Council has complied with the relevant regulations regards its duties to the Integrated Care Board as a statutory consultee (Integrated Care Board PSQ25-5122)
- Welcome the plan’s approach to health and wellbeing and is satisfied that it suitably addresses both creating healthy communities and securing healthcare infrastructure (Integrated Care Board PSQ25-5122)
- Duty to Co-operate requirements have been met. The Council is encouraged to continue to positively and constructively engage on strategic cross-boundary issues particularly in the context of infrastructure (Brentwood Borough Council PSQ25-6159, Rochford District Council PSQ25-6194)
- The Council has complied with its duty to cooperate with regards the county council’s statutory responsibilities. The plan and its evidence base reflect our active involvement throughout the plan preparation and ensures that ECC’s infrastructure and services are identified and can be delivered (Essex County Council PS25-181)
- Support for the Council’s decision to review their Local Plan and welcomes the clarity on its draft proposals (Uttlesford District Council PSQ25-5263)
- Significant cross-boundary engagement has taken place throughout the preparation of the plan, effectively addressing the requirements of Duty to Co-operate (Brentwood Borough Council PSQ25-6157)
- The Local Plan appears to be legally compliant and to align with the Duty to Cooperate (Chelmsford Garden Community Consortium PSQ25-6531, Vistry Group PSQ25-6373)
- Council must justify/do more to justify how they have considered the unmet housing needs of Basildon, Castle Point and/or Southend-on-Sea Councils including evidence of Duty to Cooperate engagement (Redrow Barratt PSQ25-5165, Obsidian Strategic Asset Management Ltd PSQ25-5667)
- Additional work is required to show that the Duty to Cooperate has been complied with following requests to help meet unmet needs from neighbouring Councils. The Duty to Cooperate evidence base is contradictory in this respect. The Plan should also consider unmet needs arising in London (Richborough PS25-165, PS25-177)
- Concern if the Council can demonstrate compliance with the duty to co-operate in relation to meeting unmet housing needs of other authorities despite formal requests, where it should be seeking to plan positively to assist them (Gladman Developments Ltd PSQ25-6316, PSQ25-6317, PSQ25-6309)
- The Statements of Common Ground fail to demonstrate adequate and meaningful engagement with neighbouring authorities on potential unmet needs, including Rochford, Castle Point, and Southend (A.G. & P.W.H. Speakman PSQ25-3043, Weal Properties Ltd PSQ25-3073, Mrs R Armstrong and Mr B Howard Ms Becky Armstrong PSQ25-3079, PSQ25-3038)
- Broad support for the preferred approach which moves Chelmsford further towards the new vision of a greener, more connected district (Broomfield Parish Council PSQ25-5149)
- Para 1.30 - request that the Council updates their Duty to Cooperate Statement and Statement of Common Ground prior to submission (Essex County Council PS25-182)

- The Plan needs to accommodate the 20% shortfall in the housing numbers arising from use of the transitional arrangements and identify safeguarded land from the Green Belt for growth beyond this Plan Period (Croudace Homes PSQ25-6053)
  Additional work is required to show that the Duty to Cooperate has been complied with (Home Builders Federation PSQ25-5471) including requests to help meet unmet needs from neighbouring Councils. The Plan should also consider unmet needs arising in London (Richborough PS25-173, PS25-167, PS25-170, PS25-174)
- General support the approach to growth but inadequate justification to not meet (at least some of) the unmet need of neighbouring councils. Expand SGS3 to assist with early delivery in the Plan period and in meeting the unmet need of Chelmsford and neighbouring authorities (Barratt Redrow PSQ25-5164)
- The Council must demonstrate how they have sought to engage with neighbouring authorities regards their unmet needs. The average annual completion rate has been considerably below the local housing needs figure of 1,210 since 2013. Plan should be meeting the full assessed need, as required by the NPPF and to significantly boost the supply of homes (Obsidian Strategic Asset Management Ltd PSQ25-5704)
- The consultation documents are complicated and difficult to navigate (Woodham Walter Parish Council PSQ25-5836)
- There are inconsistencies between satisfying the NPPF transitional arrangement for plan-making and those relating to decision-taking requiring an early review of the plan (Rosehart Properties Ltd PSQ-3144)
- The time frame from submission to adoption is unlikely to be achievable – extend the plan period to ensure it is 15 years (Martin Grant Homes PSQ25-2603, Greystoke CB PSQ25-6070)
- Plan is unsound. There is no direct evidence of engagement councils in South Essex to understand if they have any unmet needs (House Builders Federation PSQ25-5469)
- The plan should state when engagement with neighbouring authorities will take place and when and how the results of this will be made available to residents
- This plan should be put on hold until a new unitary authority has been created so that a plan will work for the new authority.

CCC Response
The Council has worked with statutory bodies to produce/update Statements of Common Ground for submission alongside the Local Plan.
The consultation exceeded requirements set out in legislation and the Council's Statement of Community Involvement.
The Council will follow the timeline in its latest Local Development Scheme (October 2025). This anticipates adoption in 2026 providing a plan period of around 15 years.
Request for continued co-operation and engagement is welcomed.
The Council has co-operated with other bodies on strategic planning matters on an on-going basis as evidenced in the Duty to Co-operate Position Statements

(evidence base documents DTC001, DTC002 and DTC005), and Statements of Common Ground.
National planning policy requires Councils to maintain an up to date Local Plan.

About Chelmsford

Consultation point	Total number of responses
About Chelmsford	10

Summary of Representations – main issues and requested changes:

- New green and blue infrastructure should be in accordance with Natural England's Green Infrastructure Framework – Principles and Standards for England (Essex Wildlife Trust PSQ25-5056)
- The Key Strategic Objectives at para 2.14 should also refer to the natural environment (Natural England PSQ25-6240, Essex Wildlife Trust PSQ25-5056)
- Update Figure 11 to list all 'outstanding' performing schools (Essex County Council PS25-185)
- Para 2.29 - the description of ARU is underplayed and should mention of its alliance with Cambridge and its campus there (J & T Wardrop and the Wardrop Trust PS25-104)
- Engage with Essex Police to ensure safe and secure communities for current and future residents (Essex Police PSQ25-2650)
- The Green Belt skews the development of Chelmsford towards damaging the arguably more important landscapes to the north and east of Chelmsford. Agree that flood control is important (Chelmsford Rivers and Canal Link group PS25-273)
- Figure 5 does not mention commuters from the North West corridors such as Cambridge.

CCC Response
Strategic Priority 3 already includes protection, management and enhancement of multifunctional green/blue infrastructure networks in line with Natural England's Green Infrastructure Framework.
Paragraph 2.14 contains objectives from an adopted Joint Plan between Colchester, Braintree and Tendring and cannot by amended by the Council. The commitment to the natural environment is set out in Strategic Priorities 1 and 3 and Policies S4 and DM16.
Para 2.39 references partners in the private and public sector.
Figure 5 illustrates the most popular destinations for Chelmsford residents and where the majority of Chelmsford's workforce comes from. This reflects the functional economic geography which Chelmsford shares with Braintree, Maldon and Colchester districts.
Minor modifications will be proposed to Figure 11 to expand list to include all 'outstanding' performing schools.

What are our Strategic Priorities

Consultation point	Total number of responses
What are our Strategic Priorities	46

Summary of Representations – main issues and requested changes:

- Support for all nine strategic priorities (Dominus Chelmsford PSQ25-6200, Croudace Homes PS25-350).

Strategic Priority 1

- Support for Strategic Priority 1 (Essex Wildlife Trust PSQ25-5057, Dandara PSQ25-6271, Sport England PS25-72)
- Welcome the reference relating to stand-alone renewable generation (Infrabee PSQ25-5731)
- Welcome the reference to nature-based solutions and the Essex Local Nature Recovery Strategy (Natural England PSQ25-6241)
- Recommend the use of Secured by Design (SBD) Police Preferred Security Products, which support sustainability agendas and last longer (Essex Police PSQ25-2651)
- Allocating a stand-alone new settlement at Hammonds Farm does not achieve the objective to allocate development in the most sustainable locations (Dandara PSQ25-6008)
- The current approach to defining sustainable locations for development based on settlement boundaries is overly reliant on arbitrary boundaries and a flexible greener outlook could be adopted i.e. walking distance to key services (Mrs Helen Sadler, PS25-32)
- This section seems to rely very heavily on planting trees and related activities with very little attention to care of the watercourses (Chelmsford Rivers and Canal Link group PS25-274)
- Requirements will be challenging for the developers; there are some very worthy, but very limited policies of how these challenges will be met for existing infrastructure without any plan or timescales of how this be achieved.

Strategic Priority 2

- Support for consideration of development layouts which create walkable communities (Sport England PS25-73)
- Recommend engagement to ensure new walking and cycling routes are designed to deter the fear of crime, and in new and existing public realm and green spaces so that women and girls feel included and comfortable (Essex Police PSQ25-2651)
- Consideration should be given to: Home Office strategy of reducing ‘Violence Against Women and Girls’; Safer Parks Executive Summary (greenflagaward.org) (Essex Police PSQ25-2651)

- The draft Plan does not prioritise development in already sustainable locations, such as a promoted site off Galleywood Road, Great Baddow (Obsidian PSQ25-5932), or North-West Chelmsford (Dandara PSQ25-6009)
- It is important that the Local Plan allocates homes in locations which are already accessible by these modes of transport (Dandara PSQ25-6278).

Strategic Priority 3

- Support for the protection of national and locally designated sites, wildlife habitats, and multi-functional green-blue infrastructure (Natural England PSQ25-6454)
- Local Plans should ensure that land of the least environmental value is allocated for development, with a mitigation hierarchy which informs opportunities for enhancement and to maintain connectivity through local ecological networks/wider Nature Recovery Network; and take into account the principles set out in the Nature Recovery Handbook and respond to the Essex LNRS (Essex Wildlife Trust PSQ25-5058)
- Agree that these enhancement measures should be incorporated into the layout of developments wherever possible (Dandara PSQ25-6280)
- It is imperative that the ongoing use of the allotment site at Princes Road, Chelmsford should be maintained, and any future change of use (due to potential sale of land) of should be resisted. Any change of use would increase the area's allotments deficit. It is a green space and wildlife corridor, allotment gardening promotes healthy living, and the allotment association has strong community links (Princes Road Allotment Association PS25-46)
- The current approach to defining sustainable locations for development based on settlement boundaries is overly reliant on arbitrary boundaries and a flexible greener outlook could be adopted i.e. walking distance to key services (Mrs Helen Sadler, PS25-33)
- Hammonds Farm offends Strategic Policy 3 (J & T Wardrop and the Wardrop Trust, PS25-108).

Strategic Priority 4

- Support for Strategic Priority 4 (Writtle Parish Council PSQ25-440, Mrs Mary Rance PSQ25-6496)
- Welcome the updates relating to waste management guidance (Environment Agency PSQ25-6263)
- Agree the Local Plan should ensure sustainable growth, which should be provided at a variety of settlements and sizes including smaller sites in urban areas where higher densities are appropriate (Dandara PSQ26-6281)
- Wording needs to be changed to reflect the new NPPF in respect of grey belt land (J & T Wardrop and the Wardrop Trust PS25-105)
- The next Local Plan Review should involve a full review of the Green Belt boundaries and seek to identify Grey Belt areas in order fully to accommodate the new NPPF calculated housing and employment needs (Rosehart Properties Ltd PSQ25-3167)

- Concerned that this places a restriction on development in the Green Belt without assessing the potential and opportunities for sustainable development in these locations (Higgins Group PSQ25-5621)
- Sustainable sites within the Green Belt should be safeguarded to meet future development needs, through a Green Belt review (Croudace Homes PSQ25-6039)
- The Local Plan needs to include more previously developed land in the rural area for development, and more smaller sustainable sites of 1 hectare or less in the rural area (Mr and Mrs Andrew Parker PS25-131)
- The current approach to defining sustainable locations for development based on settlement boundaries is overly reliant on arbitrary boundaries and a flexible greener outlook could be adopted i.e. walking distance to key services (Mrs Helen Sadler, PS25-35)
- This does not pursue opportunities to enhance the sustainability of existing service settlements, and to recognise that an opportunity exists to deliver new infrastructure, services and facilities which would benefit these settlements so they grow and thrive, especially where this will support local services. Suggest adding an additional strategic priority or amending Strategic Priority 4 (Croudace Homes PS25-350).

Strategic Priority 5

- Agree the Local Plan should meet housing needs in full, and allocate sites which are capable of delivery in the Plan period (Dandara PSQ25-6282)
- Questions how the requirement to significantly boost the supply of housing and achieve this strategic priority can be met without considering the whole of the plan area for growth and development opportunities (Higgins Group PSQ25-5622).

Strategic Priority 6

- Suggested modification to include reference to meeting local and wider strategic needs, and to allocating new employment areas (Greystoke CB PSQ25-6072)
- The Local Plan needs to include more previously developed land in the rural area for development, and more smaller sustainable sites of 1 hectare or less in the rural area. Also suggest changing the settlement boundary for Chatham Green as it allows for no growth in the village, to include the industrial site at Pondside Nursery (Mr and Mrs Andrew Parker PS25-131, PS25-99).

Strategic Priority 7

- Support for Strategic Priority S7 (Sport England PS25-74)
- Recommend engagement to ensure the built environment is designed to be safe, sustainable and inclusive for all future users, to align with Essex Police Fire and Crime Commissioners plan of creating safe communities (Essex Police PSQ25-2651)
- Advised that there may be a need to engage with specialist policing teams (such as Roads Policing, Counter Terrorism Security Advisors etc) when

designing new communities to ensure the necessary security measures are in situ including for alterations to road layouts or new road infrastructure (Essex Police PSQ25-2651)
- Recommends all new developments achieve Secured by Design (SBD) accreditation (secured via planning condition); and take consideration of the Home Office strategy of reducing 'Violence Against Women and Girls' (Essex Police PSQ25-2651)
- Recommends reference is made to the positive effect of good design on waste reduction and recycling and the Essex Waste Partnership's Waste Strategy for Essex 2024 – amended wording suggested to Para 3.32 (Essex County Council PS25-186)
- Recommends reference is made to waste infrastructure – amended wording suggested to Para 3.37 (Essex County Council PS25-187).

Strategic Priority 8

- Welcome the approach to ensuring that the community's sports and leisure needs generated by new development are met without placing pressure on existing facilities which may already be at capacity (Sport England PS25-75)
- Local Plan has been positively prepared with regards to water resources, and the Water Cycle Study should be regularly updated throughout the Plan's life cycle with ongoing engagement with Essex and Suffolk Water (Environment Agency PSQ25-6291)
- Suggested modification to include primary, acute, community and mental healthcare provision (East of England Ambulance Service NHS Trust PSQ25-5232)
- Sustainable sites within the Green Belt should be safeguarded to meet future development needs and address pressure on infrastructure, through a Green Belt review (Croudace Homes PSQ25-6040)
- Recommend adding a reference to further work being undertaken to consider the traffic impact on local junctions and proposed mitigation measures – amended wording suggested to para 3.40 (Essex County Council PS25-188)
- Recommend adding a reference to gigabit speed broadband for clarity and consistency with ECC best practice policy – amended wording suggested to Para 3.42 (Essex County Council PS25-189).

Strategic Priority 9

- Welcome the approach to ensuring that the community's sports facility needs are met to support the increased population of the district (Sport England PS25-76).

CCC Response
Reference to Secured by Design considered too detailed for this Strategic Priority, but it is covered in detailed design guidance published in the Making Places SPD.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process; and can meet its development requirements without needing to undertake a Green Belt review. This approach accords with National Planning Guidance.

Care of watercourses is considered to be covered by references throughout the Local Plan to green/blue infrastructure, along with supporting text to the Vision, Strategic Policy S4, and site policies close to waterways.
The Council is committed to enhancing safety for girls and women in new development through Policy DM24; minor modification will be proposed to Para 9.17 of DM24 to include reference to Home Office strategy 'Tackling Violence Against Women and Girls', and Safer Parks Guidance.
The Essex LNRS has now been adopted, and its importance is already referenced at Strategic Priority 3, Strategic Policies S4, S11, relevant site policies, and Policy DM16.
Engagement is carried out with Police and Fire authorities on Local Plan development, and through consultation on planning applications.
Minor modifications will be proposed to include reference to waste infrastructure, and in relation to the design of waste reduction and recycling; and to refer to gigabit speed broadband; and to reference further traffic impact work.
Minor modification will be proposed to include reference to primary, acute, community and mental healthcare provision.

Our Vision and Spatial Principles

Vision for Chelmsford

Consultation point	Total number of responses
Vision for Chelmsford	16

Summary of Representations – main issues and requested changes:

- Support expressed for Vision (Rosehart Properties Ltd and Bressole Ltd PSQ25-5300, Dandara PSQ25-6010, Dominus Chelmsford Limited PSQ25-6199, Wates Developments and Hammonds Estates LLP PS25-335, Sport England PS25-77, Broomfield Parish Council PSQ25-6492)
- The Local Plan aligns strongly with our vision for Site 16a East Chelmsford Garden Community (Hammonds Farm) (Wates Developments and Hammonds Estates LLP PS25-335)
- Welcome the opportunity to work in partnership on future development to design out crime (Essex Police PSQ25-2654)
- Plan should do more to at least meet minimum housing needs in full - there are a range of other housing sites which should be supported (Martin Grant Homes PSQ25-2606)
- Vision should include the recreational use of the canals, waterways and Sandford Mill (Essex Waterways Ltd PSQ25-5204)
- It is unclear how the bullet points will be used by decision-makers (Dandara PSQ25-6292)
- Clarify if bullets form part of the vision (Dandara PSQ25-6292, Richborough PS25-164)
- Clarify in the vision that development needs are to be met in full, including for market and affordable housing (Richborough PS25-164)

- Hammonds Farm will not lead to a more connected community and does not accord with the Vision for Chelmsford by 2041 or seek to achieve it (Dandara PSQ25-6010)
- Expand bullet two to specifically refer to supporting the logistics sector (Greystoke CB PSQ25-6073)
- For consistency, expand bullet nine to refer to 'fire and rescue facilities' (Essex County Fire & Rescue Service PSQ25-6093)
- Amend bullet 19 to refer to facilitating the provision of gigabit speed broadband (Essex County Council PS25-190)
- Add a reference to the Chelmer Valley landscape as a key asset at the heart of long-term spatial planning in Chelmsford and a long-term aspiration of achieving a formal designation, recognising its wider, indeed, national significance (Chelmer Valley Landscape Group PSQ25-5135)
- Amend vision to acknowledge the importance of community facilities (Chelmsford City Football Club PS25-212)
- The current approach to defining sustainable locations for development based on settlement boundaries is overly reliant on arbitrary boundaries and a flexible greener outlook could be adopted i.e. walking distance to key services (Mrs Helen Sadler PS25-42)
- Alternative strategies and site allocations promoted by landowners/developers.

CCC Response
Paragraph 4.2 already includes a brief explanation of how the bullet points relate to the Vision.
Minor modification will be proposed to refer to gigabit speed broadband and fire and rescue facilities.
The use of waterways, the Chelmer Valley, growing employment sectors and meeting development needs are adequately addressed already in the Vision or elsewhere in the Plan.
The Vision sets out the overarching aspirations for the Local Plan. The priorities and policies set out how the Vision will be delivered and will be used for decision making.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.

<u>Spatial Principles</u>

Consultation point	**Total number of responses**
Strategic Policy S1 - Spatial Principles	40

- Support expressed for Spatial Principles (Redrow Barratt PSQ25-5165, Obsidian PSQ25-5935, Crest Nicholson PSQ25-6069, Dominus Chelmsford Limited PSQ25-6201, Environment Agency PSQ25-6264, Gladman

Developments Ltd, PSQ25-6309, Richborough PS25-165, Vistry Group PS25-294, Wates Developments and Hammonds Estates LLP PS25-336)

- Support except b and f. A Green Belt is required to accommodate future growth requirements (Rosehart Properties Ltd and Bressole Ltd PSQ25-3173)
- Disagreement expressed to part e. A Green Belt review is required to identify sustainable development opportunities in the Green Belt and so that a more balanced approach to the spatial strategy can be achieved
- Support all except e. The settlement hierarchy is not a robust basis for identifying sustainable development locations. Amend to enable settlements outside the Green Belt to protect or create local services through targeted development, where appropriate (Broomfield Parish Council PSQ25-5150)
- Unclear how the principles will be used together and alongside the 2024 NPPF in decision making including for development proposals in the Green Belt (Higgins Group PSQ25-562)
- The Spatial Principles must also consider the urgent need for housing to avoid worsening housing supply and affordability in Essex (Obsidian Strategic Asset Management Ltd PSQ25-5667)
- A new settlement away from Chelmsford's urban area does not follow the principles promoted (Obsidian PSQ25-5935, Dandara PSQ25-6011, PSQ25-6293)
- Focusing new development upon higher order settlements outside the Green Belt (part e) will result in an increasingly unsustainable pattern of development. There has been a consistent failure to undertake a Green Belt Review to identify opportunities for sustainable development on land which no longer meets Green Belt purposes (Barratt David Wilson - Eastern Counties (BDW) PSQ25-6032)
- Amend part c to 'optimise' rather than 'promote' previously developed land for development to better reflect the 2024 NPPF (Dominus Chelmsford Limited PSQ25-6201)
- Parts a and e - Additional growth is required in villages to ensure that they retain their vitality and viability and help meet the housing requirements of the Standard Method (Dandara PSQ25-6293)
- Amend policy to state that the principles are a starting point for determining speculative applications (Gladman Developments Ltd PSQ25-6309)
- Policy should include express support for development that enables and supports healthy lifestyles and advance the well-being of communities (Chelmsford City Football Club PS25-212)
- Policy should be underpinned by a Green Belt Review, demonstrating that the Spatial Strategy is based upon the most sustainable options for meeting Chelmsford's long-term development needs. Exceptional circumstances exist to justify a Green Belt Review (Vistry Group PS25-294)
- Add an additional Spatial Principle to enhance the vitality and sustainability of existing service settlements (Croudace Homes PS25-353)
- The current approach to defining sustainable locations for development based on settlement boundaries is overly reliant on arbitrary boundaries and a flexible greener outlook could be adopted i.e. walking distance to key services (Mrs Helen Sadler PS25-37, PS25-38, PS25-40, PS25-41, PS25-43)

- Need to undertake a Green Belt Review to appraise the opportunities for sustainable development on land that does not contribute strongly to the purposes of the Green Belt
- Amend para 4.7 to reflect the new NPPF (J & T Wardrop and the Wardrop Trust PS25-106)
- Amend para 4.11 to align with para 4.12 to reflect that not only redevelopment within the city but also expansion around settlements can enhance its vitality (Crest Nicholson PSQ25-6069, Taylor Wimpey Strategic Land PS25-311, Higgins Homes PS25-346)
- Amend para 4.15 to include expanded/relocated healthcare services and expanded/relocated emergency services (East of England Ambulance Service NHS Trust PSQ25-5235)
- Amend para 4.15 to include waste infrastructure (Essex County Council PS25-191)
- Amend para 4.16 to include emergency services facilities (East of England Ambulance Service NHS Trust PSQ25-5237)
- Amend para 4.16 to include fire & rescue facilities as a type of infrastructure (Essex County Fire and Rescue Service PSQ25-6095)
- Amend para 4.16 to include police facilities as a type of infrastructure (Essex Police PSQ25-6125)
- Amend para 4.16 to include recycling and other waste infrastructure (Essex County Council PS25-192)
- Engage Essex Police to ensure new infrastructure during construction and the final building stage are safe and secure and do not compromise Emergency Service Access (Essex Police PSQ25-2655)
- Alternative strategies and new/expanded site allocations promoted by landowners/developers including ‘Grey Belt’ land.

CCC Response
The Council can meet its development requirements without needing to undertake a Green Belt review. This approach accords with National Planning Guidance.
Minor modification will be proposed to para 4.16 to clarity that the infrastructure types is not limited to those listed. It is not considered necessary to list additional types of infrastructure (such as waste and emergency services). New infrastructure requirements are also addressed elsewhere in the plan which should be read a whole.
The Settlement Hierarchy is just one of several considerations for the Spatial Strategy, along with the Vision and Spatial Principles, and is considered to be a robust approach.
Other proposed development sites are dealt with in the consideration of Strategic Policy S7 and addressed by the Pre-Submission Integrated Impact Assessment.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.
The Pre-Submission Local Plan will be examined under the 2023 NPPF which does not refer to Grey Belt.

Creating Sustainable Development

Strategic Policy S2 – Addressing Climate Change and Flood Risk

Consultation point	Total number of responses
Strategic Policy S2 – Addressing Climate Change and Flood Risk	16

Summary of Representations – main issues and requested changes:

- Welcome reference to South East (Inshore) Marine Plan (Natural England PSQ25-6242)
- Support new development to provide for active and sustainable travel modes in recognition of the contribution that this can make locally to addressing climate change (Sport England PS25-78)
- Support additions to reasoned justification to include the recommended guidance documents relating to SuDS. Consider additionally or alternatively referring to the guidance under Policy DM18 for improved visibility within the Plan (Environment Agency PSQ25-6265)
- Support the policy and evidence in relation to minimising the risk of flooding from development. To complement the Council's evidence and demonstrate the acceptability of the Hammonds Farm site in flood risk terms, a Flood Risk Strategy is submitted. This sets out the flood performance of the high-level masterplan proposals has been tested in detail with a hydraulic model constructed in 2025, building upon existing EA models. Based on this technical work, there are no flood risk technical constraints identified that would impact the site's deliverability in flood risk terms (Wates Developments and Hammonds Estates LLP PS25-308)
- Support for the policy, but suggest it should also explicitly emphasise support for large-scale renewable energy infrastructure, such as solar farms and energy storage systems (Infrabee PSQ25-5735)
- Future development should take into account and protect rural landscapes and character and also the impact upon drainage and SuDS (Chelmsford Garden Community Council PSQ25-4962)
- Supports the Council's ambition to reduce carbon emissions, however, any emission reduction targets that go beyond Part L of the Building Regulations should consider the forthcoming '2025 Future Homes Standards' and therefore not set a policy expectation that cannot be delivered and create viability issues, especially for existing Local Plan site allocations (Chelmsford Garden Community Consortium PSQ25-6347, Vistry Group PSQ25-6370, Hopkins Homes PS25-263, Vistry Group PS25-133)
- Supports the Council's ambition to reduce carbon emissions, but the policies as drafted (including DM31) go beyond national policy and guidance without evidence to justify the approach towards net zero operational and the use of on-site renewables to provide all (regulated and unregulated) operational energy. In line with the PPG that locally set energy performance standards for new housing should not exceed the equivalent of Level 4 of the Code for

Sustainable Homes. The policies should not be a requirement but applied flexibly (Croudace Homes PSQ25-6041)

- Requirements of the policy and subsequent Development Management policies (DM25 and DM31) have not been sufficiently tested regarding viability for older persons housing (Churchill Living and McCarthy Stone PSQ25-6332)
- The Regulation 19 Viability Note (November 2024) ascribes broad values across the plan area but does not address site specific matters insofar as they relate to Strategic Growth Site 3a. It suggests that the requirement for SANGs "…is only likely to apply to the Hammond's Farm strategic site". However, Natural England's Reg. 18 consultation response has asked that SSSI mitigation be included as a requirement for Strategic Site 3a and there is no indication that it has been considered as part of the Council's viability assessment (Hopkins Homes Ltd PS25-265)
- Although some interventions to mitigate and adapt to climate change will also have positive impacts for biodiversity, it should not be required of BNG measures to have to mitigate and adapt to climate change. The requirement "Assists the delivery of Biodiversity Net Gain that will deliver mitigation and adaptation benefits" will be difficult to evidence for applications and make it more difficult to deliver biodiversity enhancement schemes (Dandara PSQ25-6294)
- Clarify the policy purpose - second sentence should be deleted and first sentence amended to make clear that the bullets that follow are references to specific development management policies. The first two bullet points should be deleted (Vistry Group PS25-133).

CCC Response
Reference to the Environment Agency's Approach to Groundwater Protection; The CIRIA C753 SUDS Manual; and Sustainable Drainage Systems: Non-Statutory Technical Standards has also been added to Policy DM18 for improved visibility within the Plan.
The suite of policies in the Plan seek to protect the character of landscapes and ensure suitable drainage and SuDS support development.
Essex wide viability reports support the policy requirements and have fed into the Council's Local Plan Viability testing and are shown to be viable. No changes required.
Building Regulations (including the Future Homes Standard) set minimum standards that must be achieved for energy performance in new homes and buildings - but these are a 'floor' and not a 'ceiling'. Local authorities are allowed to set higher standards. Planning policy is necessary to address the shortcomings within the Building Regulations 2021 and the proposed Future Homes Standard 2025. These do not adequately address operational carbon emissions from new development as they only cover a proportion of energy use of a building, namely regulated energy use and they rely on grid decarbonisation to achieve 'net zero'.
The 'net zero' evidence base developed for Greater Essex demonstrates that the policy is technically feasible to deliver and at reasonable cost. There are no significant barriers to delivery in terms of skills and supply chains in Essex. In other areas (e.g. Cornwall, Bath and North East Somerset) where the equivalent policy has been in place has also shown that there has been no slowdown in the submission of planning applications or delivery of housing.

The Council's Viability Update Note 2024 adjusts the cost assumptions associated with achieving net zero in accordance with the latest information reported in the Essex Net Zero Policy – Technical Evidence Base produced by Introba Consulting Ltd with Currie & Brown and Etude for Essex Couty Council. Research referred to in the Essex Open Legal Advice – Energy Policy and Building Regulations (2025 update) (Para 54 – 55) (Pre-Submission Local Plan Evidence Base reference CC004) provides evidence of an uplift in values too which is also positive for viability.
When a Planning application is submitted for a site (regardless of whether it is allocated or not) planning law requires that it must be determined in accordance with the Development Plan (in place at the time) unless material considerations indicate otherwise. However, increasing weight should also be given to policies contained in the emerging Local Plan as it progresses through the Local Plan preparation process. It will be a matter for the Development Management process to determine the weight given to emerging policies in the planning balance when coming to a decision on an application.
The approach of using energy metrics to deliver net zero homes aligns with the recommendations of the Government's own advisors, the Climate Change Committee. They recommended a space heating target of 15-20 kwh/m2/year for all new homes by 2025. Policy DM31 sets a space heating requirement that reflects the Climate Change Committee's advice, and which is based on a robust and sound technical evidence base, which includes assessment of potential impact on viability.
It would inhibit the effectiveness of the policy if it was advisory only. Applying the policy 'flexibly in a stepped approach' would create uncertainty among developers regarding what is required and what is only advised, increasing the workload of local authority planning officers who will have to communicate these stepped changes to developers. This outcome can be avoided if all the standards in the policy are implemented as requirements from the point of plan adoption. It should also be noted that the policy itself has elements of flexibility within it. An offsetting mechanism is available as part of Requirement 4 to allow developments to achieve compliance where it is not technically possible to match on-site renewable energy generation with annual average energy demand. The energy performance standards are requirements but how they should be met is not specified which gives developers freedom and flexibility in the design choices adopted to achieve the standard. In addition, alternative routes to compliance are set out for minor development proposals and also for buildings that are certified Passivhaus.
For older persons housing that is in the form of self contained residential units then the policy requirements all apply. However, for 'non residential buildings' (which the reasoned justification notes includes older persons housing that is in the form of a residential institution) then the limit set in requirement 3 of the policy does not apply, and instead the Energy Use Intensity just needs to be reported – no specific target is required to be met. The technical evidence includes cost analysis of the typologies modelled and this has been used to inform the viability assessment for the Local Plan. An allowance has been made for the policy costs in the viability assessment and is shown to be viable.
Additional wording added to the reasoned justification to clarify that Biodiversity Net Gain is to be delivered in accordance with Policy DM16.

The policy supports delivery of the Council's declared climate and ecological emergency in 2019 and proposed work towards reaching net zero by 2030.

Strategic Policy S14 - Health and Wellbeing

Consultation point	**Total number of responses**
Strategic Policy S14 - Health and Wellbeing	12

Summary of Representations – main issues and requested changes:

- Support for policy (Broomfield Parish Council PSQ25-6493, Cliffords Group Ltd PSQ25-3028)
- Support the policy requirements accord with Sport England's Uniting the Movement Strategy and are consistent with the NPPF (Sport England PS25-79)
- All new development proposals should have early engagement with Essex Police, to support and expedite this policy and support and mitigate crime prevention (Essex Police PSQ25-2658)
- Welcome a reference to improving public angling opportunities where developments are adjacent to rivers or lakes (Environment Agency PSQ25-6270)
- Support for policy but it should be expanded to refer/reflect the needs of older people (Mrs Mary Rance PSQ25-6392)
- In the first bullet, also refer to the Essex Joint Health and Wellbeing Strategy to help reduce health inequalities including health and improve the opportunities for adults and children to live well (Essex County Council PS25-195)
- The Council should not view the provision of sports, leisure, and community facilities as a minimum requirement but should maximize opportunities to deliver such development in well-connected and accessible locations (Cliffords Group Ltd PSQ25-3028, PSQ25-4982)
- Remove the requirement on older persons housing providing a Health Impact Assessment as specialist housing for older people has a number of health benefits. Amended wording proposed (Churchill Living and McCarthy Stone PSQ25-6331)
- Health Impact Assessments should not be required on all developments over 50 homes especially if they are allocated in the plan and meet the policy requirements. It should only be required on unallocated developments of over 100 units which will not have had their health impacts assessed as part of the preparation of the local plan (Home Builders Federation PSQ25-5475)
- Amend para 5.26 to refer to `Use Class C2 (Residential Institutions)' to provide consistency with the policy and the EPOA Essex Healthy Places Advice notes for planners, developers and designers (Essex County Council PS25-196)
- Promoted sites (Land south of Pratts Farm Lane, Land at Essex Regiments Way and Back Lane) align with the vision of this policy by promoting active and healthier lifestyles (Cliffords Group Ltd PSQ25-3028)
- Alternative strategies and new/expanded site allocations promoted by landowners/developers.

CCC Response
No requirement to contribute towards priorities in the Essex Joint Health and Wellbeing Strategy added, as this document is subject to change and outside the control of the Council.
Minor modification will be proposed to para 5.26 to include a reference to Use Class C2.
Reference to promoting/supporting angling is considered too detailed for a Strategic Policy.
Site level Health Impact Assessments will provide more detail on the health and wellbeing impacts of specific development projects.
Requirements for Health Impact Assessments accord with the Essex Planning Officers Association (EPOA) – essex-healthy-places-advice-notes-for-planners-developers-and-designers.pdf
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process.

Strategic Policy S15 – Creating Successful Places

Consultation point	Total number of responses
Strategic Policy S15 – Creating Successful Places	2

Summary of Representations – main issues and requested changes:

- All new development proposals should have early engagement with Essex Police, to support the prevention and mitigation of crime across developments (Essex Police PSQ25-2659)
- Question need for the policy as it appears to be covered by other policies in the plan or NPPF (Dandara PSQ25-6014).

CCC Response
This Strategic Policy is considered necessary as it helps to address Strategic Priority 7.

Strategic Policy S3 – Conserving and Enhancing the Historic Environment

Consultation point	Total number of responses
Strategic Policy S3 – Conserving and Enhancing the Historic Environment	5

Summary of Representations – main issues and requested changes:

- Support policy (Historic England PSQ25-5815)

- Welcome the policy and great weight on the preservation/enhancement of designated heritage assets and their setting (Writtle Parish Council PSQ25-453)
- Welcome the recognition of the heritage and leisure importance of the waterway (Chelmsford Rivers and Canal Link group PS25-275)
- As operators of the Chelmer & Blackwater Navigation we are pleased to see that the significance of its structures, landscape character, leisure and recreational value are recognised (Essex Waterways Ltd PSQ25-5205)
- Support policy and its commitments including to celebrate Chelmsford's 'rich history. Support the creation of a Heritage Reference Group, for the waterways to be considered as Heritage Assets and a policy to educate young people on heritage. The Meadows development provides an opportunity to enhance riverside walks and there should be plans for the future use of Sandford Mill and Shire Hall (Chelmsford Civic Society PSQ25-2707).

CCC Response
The support for the policy is welcomed.
Some of the above comments are not Local Plan matters including the creation of a Heritage Reference Group and a policy to educate young people on heritage. Sandford Mill is allocated as a Special Policy Area.
The definition of a heritage asset in the NPPF does not include rivers. However, Springfield Basin is included on the local list and therefore a non-designated heritage asset. Parts of the river network are also within Conservation Areas, i.e. the part of the river can adjacent the High Street and also the entire Navigation, to be considered as part of the designated heritage assets. Parts of the river network have been considerably altered, most notably by the 1960s flood defence works, which created concrete embankments and altered the course of the river. As such it would not be appropriate to treat more of the river network as a heritage asset.
It is understood that Essex Shire Hall Trust propose to bring Shire Hall back into subject to planning permission. Proposals would be adequately considered against policies in the plan.

Strategic Policy S4– Conserving and Enhancing the Natural Environment

Consultation point	**Total number of responses**
Strategic Policy S4 – Conserving and Enhancing the Natural Environment	15

Summary of Representations – main issues and requested changes:

- Support for policy (Broomfield Parish Council PSQ25-6494)
- Pleased with policy wording and satisfied that wastewater treatment capacity and local water environment will be protected by the plan policies (Environment Agency PSQ25-6266)
- Supports the requirement for new development to maximise opportunities for the preservation and connection of natural habitats in accordance with the

Essex Local Nature Recovery Strategy (LNRS (Essex County Council PS25-198)

- Supports policy requirements for BNG. Viability assessments carried out by ECC demonstrates that a 20% BNG is achievable and viable and meets the NPPF requirements. The Environment Act sets 10% as the minimum standard nationally and does not set a maximum (Essex County Council PS25-197)
- Support expressed for the policy including 20% BNG in garden community developments but clear evidence will be required by the Planning Inspector to justify this policy requirement (Essex Wildlife Trust PSQ25-5059)
- Support for this policy which does not require applications to provide more than 10% BNG, other than the Garden Communities (Dandara PSQ25-6295)
- The Natural Environment section of the PPG has been recently updated to cover the role of Local Nature Recovery Strategies (LNRSs). This guidance helps local planning authorities to interpret their duty to “have regard” to LNRSs and integrate LNRSs into local plans and considering them in planning decisions as material considerations (Essex County Council PS25-198)
- The Council's 'Improvement Plan for Rivers and Waterways in and around Chelmsford is supported. We plan to work with the Council to implement its aims (Essex Waterways Ltd PSQ25-5206)
- Para 5.55 – Welcome the reference to additional recreational mitigation measures to address ‘alone’ impacts of new development within the RAMS Zone of Influence (Natural England PSQ25-6243)
- Expand last para of the policy to refer to ‘other mitigation measures’ and ‘future iterations’ of the RAMS in line with para 5.55 (Natural England PSQ25-6243)
- Para 5.47 - Planting around the waterways should not be allowed to interfere with the public enjoyment of the waterways or conceal the rivers from public view. The plan appears to be too heavily skewed away from use of the waterways and this imbalance should be addressed (Chelmsford Rivers and Canal Link group PS25-276)
- Para 5.49 should also require applicants to have regard to the Essex Green Infrastructure Standards (2022) to facilitate securing multifunctional green infrastructure. This has been endorsed by Natural England and aligns with the National Green Infrastructure Framework (Essex County Council PS25-200)
- Delete requirement for developers to demonstrate that wastewater treatment capacity is available ahead of any occupation of development as it is unnecessary and impractical. The Local Plan provides the means, through its evidence base (particularly the WCS), to ensure that new development is located in areas that have the potential to be served by sufficient waste-water capacity (Vistry Group PS25-135)
- The plan should give strong weight to LNRSs for development site allocation at a local level to avoid impacts to existing sensitive natural assets (The Woodland Trust PSQ25-1984)
- The plan should set standards for high-quality green infrastructure for development e.g. by requiring 5 trees per dwelling for major development or per 1,000sqm of non-residential floorspace, and by ensuring no one is more than 300m from their nearest natural green space and set a strong standard for the retention of trees within developments (The Woodland Trust PSQ25-1984)

- The Local Plan should go beyond minimum requirements for BNG and be an example of best practice, e.g. by requiring all developments to deliver 20 % BNG and all units to be maintained for at least 50 years (The Woodland Trust PSQ25-1984)
- The requirement for 20% BNG has not been justified in the Council's evidence base as being financially viable or practically deliverable/viable. It should be expressed as a target rather than an absolute requirement (Croudace Homes PSQ25-6042).

CCC Response
Policy support and partnership working noted.
The plan encourages use of the waterways and their environs including site policies 1a and Special Policy Area 5. Strategic Priority 9 also outlines how some of the ambitions of the Council's Plan for Improving Rivers and Waterways in and around Chelmsford have been translated into the Local Plan.
Part E of Policy S17 Future of Chelmsford City Centre, states that proposals should capitalise on the waterway network to enhance the visibility, access and recreational use of the rivers and Navigation, as appropriate.
Minor modifications will be proposed to para 5.49 to refer to the Essex Green Infrastructure Strategy and the Essex Green Infrastructure Standard.
The policy appropriately requires developments to demonstrate sufficient capacity for wastewater treatment and disposal to serve the site as supported by the plan evidence base and Anglian Water Services Ltd.
The policy does states that the Council will ensure that new development maximises opportunities for the preservation, restoration, enhancement, and connection of natural habitats in accordance with the LNRS or future replacements. Minor modifications will be proposed to para 5.45 to ensure the reference to the LNRS is up to date.
Policy DM16 already sets out the Council's expectations for biodiversity and geodiversity in development. In addition, Policy DM17 sets out the requirement for new tree planting. Access standards are set out in Appendix B and follow the NPPF and Sport England's guidance.
10% BNG is a national requirement. 20% BNG for the Garden Community allocations has been subject to viability testing and is deliverable. Although there is no maximum to the standard, the Council has no plans to go beyond the 10% BNG on all sites as this has not been viability tested.
Minor modifications will be proposed in relation to additional recreational mitigation measures and to subsequent revisions of the RAMS.

Strategic Policy S5 – Protecting and Enhancing Community Assets

Consultation point	**Total number of responses**
Strategic Policy S5 – Protecting and Enhancing Community Assets	8

Summary of Representations – main issues and requested changes:

- Support for policy (Sport England PS25-80, Dandara PSQ25-6013, Cliffords Group Ltd PSQ25-3007)
- It is imperative that the ongoing use of the allotment site at Princes Road, Chelmsford should be maintained, and any future change of use (due to potential sale of land) should be resisted. Any change of use would increase the area's allotments deficit. It is a green space and wildlife corridor, allotment gardening promotes healthy living, and the allotment association has strong community links (Princes Road Allotment Association PS25-46).
- Support policy in principle but it should be more flexible. Where it can be demonstrated that health facilities are surplus to requirements or will be changed, it should be accepted in principle that the facility is neither needed nor viable for its current use, with no requirement for retention of a community facility use on the land (NHS Property Services Ltd PSQ25-5602)
- For consistency, include a reference to "fire & rescue facilities" (Essex County Fire and Rescue Service PSQ25-6097)
- Para 5.58 – Include a reference to the Essex County Fire and Rescue Services role in creating 'resilient' communities (Essex County Fire and Rescue Service PSQ25-6098)
- Promoted sites (Land south of Pratts Farm Lane, Land at Essex Regiment Way and Back Lane) align with the policy (Cliffords Group Ltd PSQ25-3007)
- The allocation of promoted site adjacent to Great Baddow High School, provides an opportunity to address the objectives of this draft policy (Obsidian PSQ25-5936).

CCC Response
The policy is consistent with national planning policy and appropriately covers healthcare facilities.
Minor modifications will be proposed in response to comments from Essex County Fire and Rescue Services.
The Council can meet its development requirements without needing to undertake a Green Belt review. This approach accords with National Planning Guidance.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process.

How will Future Development Growth be Accommodated?

This section of the consultation document sets out Strategic Policies which underpin and guide the Spatial Strategy including policies related to securing infrastructure and delivering growth.

Para 6.1 and Strategic Policy S6 – Housing and Employment Requirements

Consultation point	**Total number of responses**
Para 6.1 and Strategic Policy S6 – Housing and Employment Requirements	72

Summary of Representations – main issues and requested changes:

Windfall allowance

- Need to justify the windfall allowance and why it has increased from 100 to 175 dpa. 100 dpa is most appropriate as set out in the Housing Windfall Assessment, April 2024. The windfall rate appears retrofitted to meet the transitional arrangements and artificially inflates the supply (Richborough PS25-173, PSQ25-166)
- Evidence is needed to support a higher rate of windfall across the entire plan period (Home Builders Federation, PSQ25-5471) and basing it on historic trends is not robust (Bellway Homes Ltd (Essex) PSQ25-6360, PSQ25-6388)
- Windfall allowance should be reviewed considering current market conditions and reduced to reflect current delivery levels (Hill Residential Ltd PS25-354)
- The past windfall average includes 2 years of unusually high supply (350 homes) which disproportionately impacts the calculation and is unlikely to be maintained at a constantly high level over the plan period (Strutt and Parker (Farms) Limited PSQ25-5519)
- Plan is flawed and likely to be ineffective – there is an over reliance on windfall sites (Dandara PSQ25-6015, Dandara Eastern PSQ25-6209) meaning the plan is at risk of falling short on housing delivery (Urban Provincial PSQ25-4972)
- The timing of new housing supply needs to be justified. Windfall sites should be allocated if the Council is certain they will get planning permission (J & T Wardrop and the Wardrop Trust PS25-109)

Housing Requirement

- Support use of the NPPF transitional arrangements and housing requirement of 1,210 dpa. Acknowledge the Plan allocates a ‘minimum’ of 162,646sqm of new employment floorspace which exceeds the recommended minimum employment space requirements over the period to 2041 (Essex County Council PS25-201)
- Broadly supportive of policy and CCC’s commitment to meeting its identified housing and employment needs within the administration’s boundary through-out the plan period (Brentwood Borough Council PSQ25-6159, Rochford District Council PSQ25-6194)
- Accept the plan housing requirements (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6133)
- Largely supportive of the plan. 1,210 dpa is below full local housing needs but the reference to “minimum” strikes an appropriate balance (Dominus Chelmsford Limited PSQ25-6203)
- Support the identified housing requirement of 22,990 new homes as evidenced by the Strategic Housing Needs Assessment. This will assist in addressing the Council’s Housing Crisis declared in 2022. Support utilising the NPPF transition arrangements which will avoid plan-making delays and exceeding the 2023 Standard Method figure of 955 dpa (Wates Developments and Hammonds Estates LLP PS25-310)

- There is no requirement to meet in full the new 2024 Standard Method figure of 1,454 dpa through this Local Plan Review (Wates Developments and Hammonds Estates LLP PS25-310)
- Plan is technically sound but should seek to meet housing requirements in full to address the housing crisis more effectively and allocate more homes including at Ford End (Dandara PSQ25-6296)
- Plan should be meeting housing needs in full (1,454 dpa) (Bloor Homes (Eastern) PSQ25-6141, Richborough PS25-173, PS25-166, Martin Grant Homes, PSQ25-2609, PS25-147), as required by the new NPPF, given the high cost of housing, need to address the housing crisis and need for affordable housing. The greater risk with strategic site delivery requires a higher buffer (Home Builders Federation PSQ25-5471)
- Object to the 1,210 dpa housing requirement/ it is not justified (Martin Grant Homes PSQ25-2609, PS25-147, Cliffords Group Ltd PSQ25-4958, Welbeck Strategic Land V Limited PSQ25-3210, Catesby Land and Planning PSQ25-5603, Greystoke CB PSQ25-6084)
- The SHNA needs to be updated to reflect the up-to-date standard method. Plan should be meeting its minimum housing needs to avoid exacerbating additional unmet housing needs in a region, address chronic affordability issues and deliver needs for affordable homes (Martin Grant Homes PSQ25-2609, PS25-147)
- A modest increase in dwelling stock or affordability ratios could result in the proposed housing requirement falling below 80% of the Standard Method figure. The plan should remain flexible to accommodate potential updates to the Standard Method to avoid becoming outdated before its adoption (Miscoe Enterprises Ltd PSQ25-2987, Cliffords Group Ltd PSQ25-2999, A.G. & P.W.H. Speakman PSQ25-3038, Daniel James Developments PSQ25-3054, Weal Properties Ltd PSQ25-3070, Mrs R Armstrong and Mr B Howard Ms Becky Armstrong PSQ25-3076, Cliffords Group Ltd & Mr Mark Peters PSQ25-6502, Cliffords Group Ltd PSQ4954, PSQ25-4956, The Bucknell Family PS25-286, Taylor Wimpey Strategic Land PS25-315, Crest Nicholson, Dandara Strategic Land, and Taylor Wimpey Strategic Land PS25-326)
- In the absence of overriding constraints or exceptional circumstances, the Plan should be meeting the Council's housing and affordable needs in full. This will significantly boost housing delivery and address the Written Ministerial Statement of January 2025 and the Council's declared Housing Crisis (Barratt David Wilson – Eastern Counties (BDW), PSQ25-6034)
- Providing for 1,210 dpa will result in a shortfall of 4,636 dwellings over the plan period and exacerbate acute affordability issues in Chelmsford. The change from Preferred Options appears to have been made to simply meet the transitional arrangements - further justification is required to evidence why meeting 83% is appropriate. There has been time to consider the 2024 NPPF and additional site allocations could be made to meet needs in full (Bloor Homes (Eastern) PSQ25-6141)
- The evidence base to support the housing requirement and supply is inadequate. It is unclear why adopted allocations have failed to come forward. The plan is reliant on a small number of large sites. Additional allocations are needed. Housing requirement appears to have been arbitrarily set to meet the transitional arrangements and should be more ambitious (Hill Residential Ltd PS25-354)

- There is no plan evidence to justify the uplift from 913 to 1,210 by any of the exceptional circumstances outlined in the PPG. The plan does not meet the transitional arrangements, should be meeting housing need in full and identify additional sites for delivery in the first five years (Gladman Developments Ltd PSQ25-6313)
- Amend the housing requirement and allocate additional sites to increase the supply buffer. Rejection of a higher growth scenario and Land West of Chelmsford as it could result in 'too much' housing is contrary to national policy (Crest Nicholson, Dandara Strategic Land, and Taylor Wimpey Strategic Land PS25-326)
- Plan should allocate more sites to meet the full housing requirement of 1,454 dpa (Greystoke CB PSQ25-6084). Hammonds Farm is questionable based on the evidence base and planning logic and has unrealistic delivery rates as supported by 'Start to Finish' research from Lichfields. More sustainable sites have been dismissed without obvious reasoning including land at North-West Chelmsford and SWF (Dandara PSQ25-6015, Dandara Eastern PSQ25-6209)
- Need to increase housing requirement to help meet unmet needs outside Chelmsford (Strutt and Parker (Farms) Limited PSQ25-5519)
- Housing requirement should be increased to meet or exceed the revised Standard Method figure of 1,454 dpa to meet identified housing needs in full. 1,210 dpa will exacerbate housing affordability and fail to address the Council's declared Housing Emergency. Suggestions that meeting the full could lead to an oversupply of new homes is unsubstantiated, inconsistent with National Policy and not justified (Catesby Land and Planning PSQ25-5603)
- No objection to the new interim housing requirement, but advocate planning for the full 1,454 dpa and allocating further new sites in the plan including a combined site in Boreham (Wates Developments Limited PSQ25-5302)
- Completions in recent years is significantly below the new target of 1,210 net new homes risking a downward trend in housing delivery. Plan should allocate further sites including in the Green Belt/Grey Belt and increase the housing target to meet the NPPF (December 2024) requirements. The 1.8% supply buffer is inappropriate and not evidenced (Newell Properties Development Ltd PSQ25-5043)
- Notwithstanding the transitional arrangements, the plan should still seek to maximise opportunities to deliver housing. Rejecting a higher growth option as it could result in an 'oversupply' of housing is questionable (Taylor Wimpey Strategic Land PS25-315)
- Housing requirement should be reviewed considering Written Ministerial Statements (WMS) of 30 July and 12 December 2024 (Gearston Ltd PSQ25-3045). 1,210 dpa does not appear to be justified beyond its function in maintaining the plan within the transitional arrangements. Need to demonstrate how requirement aligns with current and future demographic trends and housing market signals. Need to reassess the site allocations and consider whether additional land could be released to ensure full housing needs are met (Miscoe Enterprises Ltd PSQ25-2987, Cliffords Group Ltd PSQ25-2999, A.G. & P.W.H. Speakman PSQ25-3038, Daniel James Developments PSQ25-3054, Weal Properties Ltd PSQ25-3070, Mrs R Armstrong and Mr B Howard Ms Becky Armstrong PSQ25-3076, Cliffords Group Ltd & Mr Mark Peters PSQ25-4966, Cliffords Group Ltd PSQ4954,

PSQ25-4956, The Bucknell Family PSQ25-286, Crest Nicholson, Dandara Strategic Land, and Taylor Wimpey Strategic Land PS25-326)

- Concerns that the housing supply has been artificially suppressed to remain within the transitional arrangements. Need to allocate additional housing sites (The Bucknell Family PS25-286) to provide a generous and resilient supply buffer to support housing delivery over the plan period (A.G. & P.W.H. Speakman PSQ25-3038, Daniel James Developments PSQ25-3054, Cliffords Group Ltd PSQ4954)
- The proposed approach to housing delivery and housing requirements under the transitional arrangements, should be seen in the context of the notable housing crisis. Written Ministerial Statements set out a clear expectation that LPAs should take a positive stance to opportunities to deliver housing (Gearston Ltd PSQ25-3045)
- The Plan provides minimal flexibility should sites be delayed and existing allocations should be increased including Growth Site Policy 11c (Welbeck Strategic Land V Limited PSQ25-3210)
- Table 1 – The plan is planning for an insignificant and insufficient amount, meaning the plan lacks flexibility, is vulnerable to changing circumstances and is inconsistent with the Government's wider objectives. Concerns that sites allocated in the adopted Local Plan have not come forward including SWF. Given devolution, the review plan could be in place for a decade so should seek to significantly boost the supply of housing land, rather than just meeting the minimum requirements under the transitional arrangements (Croudace Homes PS25-356)
- Plan is flawed and likely to be ineffective – the 1.5% is inflexible and there is an over reliance on one large strategic allocation. Completions rates are falling, and the delivery of allocated sites are slipping and unrealistic. Hammonds Farm is questionable based on the evidence base and planning logic and has unrealistic delivery rates as supported by 'Start to Finish' research from Lichfields. More sustainable sites have been dismissed without obvious reasoning including land at North-West Chelmsford and SWF (Dandara PSQ25-6015, Dandara Eastern PSQ25-6209)
- 100 dwellings are insufficient to meet Danbury's housing needs identified in the Danbury and AECOM Danbury Local Housing Needs assessments to the detriment of the vibrancy and health of the settlement. Plan should allocate additional land in Danbury (Gleeson Land PSQ25-6262)
- The housing figure is not robust given that historical evidence could mean the target is 10% below average delivery of annual windfall dwellings (Mrs Helen Sadler PS25-28)
- No consideration of constraints when determining the Housing Requirement. One such constraint is the dramatic rise in flood risk from historic overdevelopment observable in hydrometric data at Rushes Lock (Save Sandford Mill Campaign PSQ25-5163)
- The public have not been adequately consulted, and insufficient consideration has been given to the need to meeting affordable housing needs to address the Council's declared Housing Emergency
- The trajectory reflects the 1,400+ requirement rather than the 1,210 figure. If the plan is for 1,400+ homes, it should state that

- Alternative strategies and new/expanded site allocations promoted by landowners/developers.

Submission Date

- The Council is deliberately rushing to submission to avoid having to meet 1.454 dpa (Catesby Land and Planning PSQ25-5603, Barratt David Wilson – Eastern Counties (BDW) PSQ25-6034)
- Plan should meet Chelmsford's Local Housing Needs in full now and not avoid this by rushing submission

Supply buffer

- Reallocation of the supply buffer is pragmatic and appropriate, as the Council had already consulted on an evidence base to support a spatial strategy of this quantum and has updated it housing evidence to support a revised housing requirement. There is no national requirement for a buffer to be allocated in the supply trajectory, but if a supply buffer and/or a higher housing target would be beneficial, more sites could be sought via major modifications. There is land available within the allocation boundary of Strategic Growth Site 16a East Chelmsford Garden Community (Hammonds Farm) (Wates Developments and Hammonds Estates LLP PS25-310)
- The Plan should apply a 5% buffer (Bellway Homes Ltd (Essex) PSQ25-6360, PSQ25-6388, Hill Residential Ltd PS25-354, Strutt and Parker (Farms) Limited PSQ25-5519), a sufficient/higher buffer (Welbeck Strategic Land V Limited PSQ25-3210), a 20% buffer (Home Builders Federation PSQ25-5471, Wates Developments Limited PSQ25-5302, Richborough PS25-173)
- Identify additional residential allocations to ensure sufficiently flexibility and overcome any potential shortfall in projected delivery from strategic allocations. Amend Table 1 to show changes to the yields from the existing allocations and include a 20% buffer. The plan relies on garden communities that can be slow/fail as supported by 'Start to Finish' research by Lichfields. Identify additional residential allocations based on a more dispersed approach including within urban areas and existing sustainable settlements (Richborough PS25-170)
- The Plan is failing to plan for enough new homes. Concerns over the capacity and trajectory of Hammonds Farm. Allocate new development including in Great Leighs and Patching Hall Lane (Bellway Homes Ltd (Essex) PSQ25-6360, PSQ25-6388)
- Policy will exacerbate existing and increasing issues of unaffordability and may need to accommodate unmet needs from neighbouring authorities. Plan should promote delivery and wider benefits of the full CNEB including adding it to the Key Diagram. Plan should allocate additional sites to help fund it including land north of Wheelers Hill (Hallam Land Management PSQ25-6382)
- The plan focuses growth on the garden communities which require long lead in times and can stall – allocate a greater number of sites to help meet the higher Standard Method, provide flexibility and an appropriate buffer (Higgins Group PSQ25-5624)

- Chelmsford is likely to have an increased demand for housing because of new infrastructure developments. Some of Chelmsford's neighbours have significant unmet housing needs. It is unclear how such factors have been considered in determining the housing requirement (Tritton Farming Partnership LLP PSQ25-5672)
- The proposed housing requirement may not stay within 80% as dwelling stock estimates and affordability ratios change. Allocate more housing sites to increase the housing requirement (Gay Bowers Limited PS25-292) to achieve NPPF 2024 levels and increase the housing requirement and buffer. This is expected by recent Written Ministerial Statements (This Land Limited PSQ25-5755)
- Should be planning to meet 100% of the housing requirements and allocating more sites including in Danbury (Landvest Developments Ltd PSQ25-5789)
- Do not object to the quantum of new housing but given the 'built-in' shortfall in housing provision from the transitional arrangements the plan should remove areas from the Green Belt and allocate as safeguarded land for housing delivery after 2041 (Croudace Homes PSQ25-6043)
- The plan's housing requirement may not stay within 80% as dwelling stock estimates and affordability ratios change. Notwithstanding the transitional arrangements, the plan should maximise housing delivery opportunities. Allocate additional and smaller sites including West Chelmsford which are more flexible than larger strategic allocations (Crest Nicholson PSQ25-6076)
- More appropriate and sustainable options to SGS16a and b have been ruled out. The plan has not addressed our previous concerns and is unsound (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6133)
- Policy is not properly justified, effective or represent a positive approach to plan preparation, as other less harmful growth options have not been properly interrogated (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6133)

Review of the plan

- The Council should commit to an early/immediate review of the plan (Martin Grant Homes PSQ25-2609, PS25-147, Bloor Homes (Eastern) PSQ25-6141, Hallam Land Management PSQ25-6382, Crest Nicholson, Dandara Strategic Land, and Taylor Wimpey Strategic Land PS25-326, Higgins Homes PS25-347, Welbeck Strategic Land V Limited PSQ25-3210, Wates Developments Limited PSQ25-5302)

IIA comments

- The full standard method and/or a higher growth scenario needs to be tested in the IIA/plan (Martin Grant Homes PSQ25-2609, PS25-147, (Taylor Wimpey Strategic Land PS25-315, Higgins Homes PS25-347)
- The IIA needs updating to ensure all reasonable alternatives have been assessed (Welbeck Strategic Land V Limited PSQ25-3210)

- Support the IIA conclusion that the proposed housing requirement is an appropriate basis for plan-making in sustainability terms (Hammonds Farm) (Wates Developments and Hammonds Estates LLP PS25-310)
- It is unclear if the IIA has appropriately considered the higher growth option This appears to have been rejected because it results in an 'oversupply' of housing which conflicts with national policy (Crest Nicholson PSQ25-6076, Crest Nicholson, Dandara Strategic Land, and Taylor Wimpey Strategic Land PS25-326)
- The IIA does not appear to have tested an option of extending existing employment areas (Saxtons 4x4 PSQ25-6094)

Employment Requirement

- Should test spatial options in the Green Belt and/or Green Wedge land to address full housing and employment needs including unmet neighbouring council needs (The Bucknell Family PS25-286)
- Plan does not plan for sufficient employment land, allocate sufficient employment sites or align with the evidence base or national policy. The Employment Land Review 2024 Update calculation of employment land requirement should be treated as a minimum (Gearston Ltd PSQ25-3045)
- Plan should commit to an early review to deliver the full objectively assessed housing needs and consequential employment growth requirements. Provide new employment space to match the future growth of the resident workforce in Chelmsford and to reflect the 2024 NPPF local housing need requirements. Consider redeveloping existing established employment sites, such as the BAE site (Rosehart Properties Ltd PSQ25-3182)
- Reliance on Scenario 1 in the Employment Land Reviews, despite a strong office and industrial demand, risks a mismatch between jobs and housing growth. Reassess site allocations and consider other sites including in the Green Wedge. Restricting land release could constrain sustainable growth and infrastructure deficits (Cliffords Group Ltd PSQ25-4958)
- Support for the Employment Land Reviews but demand for logistics development is likely understated so keep the employment quantum as a minimum. The Savills Industrial & Logistical Needs Assessment (March 2022) (submitted alongside the representation) considers amongst other matters there will be future demand from London and the supply of industrial and logistics has been suppressed (Pigeon (Sandon) Ltd PS25-228)
- The identified additional employment floorspace is insufficient to meet the identified needs of the logistics sector in accordance with national policy. There should objectively assess the requirements of the logistics sector across the sub-region. This is expected to increase requirements for logistic space in the plan. Concerns raised over the Employment Land Review including the assumed jobs density (Greystoke CB PSQ25-6084)
- Plan's employment policies are not fully justified. Allocate more employment land including around existing employment areas. Amend the Grey Belt/Green Belt to extend Robjohns Employment Area (Saxtons 4x4 PSQ25-6094)
- The scale of additional employment land provision has not been properly justified, represents a deviation from the Council's evidence base and are over-inflated as there is no overriding quantitative or qualitative need for the

proposed employment floorspace of 162,646sqm and additional employment allocations SGS16a and b (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6133)

- The Employment Land Review shows that the City's employment land needs can be adequately met (with a buffer) by existing commitments / allocations over the plan period. SGS16a and b will result in significant adverse impacts and do not represent the most sustainable growth option. The over-provision of new employment floorspace, which far exceeds historic levels of supply, could saturate the market and dilute demand. Any additional employment land should focus on smaller employment sites, in a range of locations across the City, and include sites within existing built-up areas, where there is already local infrastructure in place to support delivery (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6133)

Gypsy and Traveller and Travelling Showpeople Requirements

- Support approach to meeting identified needs for additional Gypsy, Traveller and Travelling Showpeople accommodation. Continued close and effective working on Gypsy and Traveller accommodation across Essex, through the Essex Planning Officers Association and other strategic planning groups is needed (Brentwood Borough Council PSQ25-6159, Rochford District Council PSQ25-6194)
- Concerns expressed with policy. Acknowledge the GTAA but it is unclear whether the demand for travelling showpeople in the adopted plan and Chelmsford Garden Community DFD has been met. Replacing travelling showpeople provision for gypsy and traveller provision within SGS6 could represent a shortfall in another type of specialist residential accommodation elsewhere (Vistry Group PSQ25-6374)
- Increase the identified unmet need for new permanent plots for Travelling Showpeople from 38 to 41 to reflect the updated GTAA and recent Public Inquiry granting temporary consent for 11 families for 3-years. Allocate land east of Main Road, Broomfield to help provide a 5-year supply of deliverable sites. Object to meeting identified unmet needs through windfalls in Policy DM3 as this is uncertain, and the policy requirements are unworkable (Mr D Bibby and Family and Colleagues PSQ25-6356, PSQ25-6359).

Small Sites Requirement

- Based on a total housing requirement of 22,990, 6.9% of new dwellings could be delivered on small sites - short of the 10% requirement. Self and custom build houses are not within the definition of small sites and small windfall sites cannot be relied upon. Allocate additional small sites including in Little Baddow, Great Leighs and West Hanningfield (Essex Alms Housing PS25-302, PS25-307, PS25-309)
- The plan is not meeting 10% of their housing requirement on small sites and windfall sites are uncertain. More small sites should be allocated including in East Hanningfield (Mr and Mrs B Hearn PS25-171)
- Council should seek to review the approach to small sites given the pressing need for housing and new NPPF targets. The Plan is over reliant on major strategic regeneration and at risk of falling short on housing delivery given

past undersupply. Plan should allocate more smaller scale sites including in Boreham (Urban Provincial PSQ25-4972)

Miscellaneous

- The current approach to defining sustainable locations for development based on settlement boundaries is overly reliant on arbitrary boundaries and a flexible greener outlook could be adopted i.e. walking distance to key services. This would ensure contribution on merit for deliverable well connected sustainable edge of settlement sites including Great Leighs (Mrs Helen Sadler PS25-28, PS25-30, PS25-63).

CCC Response
The Council has co-operated with other bodies on strategic planning matters on an on-going basis as evidenced in the Duty to Co-operate Position Statements (evidence base documents DTC001, DTC002 and DTC005), and Statements of Common Ground including those with adjoining authorities.
At the time the Pre-Submission Consultation was carried out (using the Council's Five-Year Housing Land Supply Methodology - April 2024) the Council could demonstrate a Five-Year Housing Land Supply at the point of submission of the Plan. Following the Pre-Submission Consultation the Council's Five-Year Housing Land Supply (based on the August 2025 Housing Site Schedule) showed that at the point of submission (Years 2 – 6) it was estimated to be 8,010 dwellings. Using the August 2025 Housing Site Schedule, it was estimated that the housing requirement figure for the Five-Year Housing Land Supply calculation would be 1,622 dwellings per annum on submission. This was based on the proposed Housing Requirement figure of 1,210 dwellings per annum, the estimated shortfall in housing completions from the new base period of the emerging Local Plan (1,672 dwellings) and the required 5% buffer to ensure choice and competition in the market for land. Based on these figures this would only be 4.93 years of housing land supply (8,010/1,622) on submission. As a result of this the Council undertook an Additional Site Consultation which seeks to rectify this situation and demonstrate that the Local Plan will meet its Five-Year Housing Land Supply at the point of submission. Using the latest housing supply figure in the April 2026 Housing Site Schedule (8,962), and the updated housing requirement figure (including the actual shortfall of 1,783 dwellings that reflects 407 net new completions in 2025/26), the revised Five-Year Housing Land Supply Calculation including a 5% buffer is 5.45 years (8,962/1,645). The housing requirement in the plan meets at least 80% of the revised standard method housing need in line with the Government's latest plan-making transitional arrangements. This is consistent with the NPPF's objective of preparing and maintaining up to-date plans in order to make consistent provision for housing and other needs. Submission of the plan will be in June 2026 in accordance with the updated Local Development Scheme, October 2025. Submission is later than previously envisaged given the high number of consultation responses received which took longer than expected to process and analyse and to allow time for the Additional Sites Consultation to be undertaken. The Government deadline for plan submission under the new plan-making transitional requirements has also been pushed back to June 2026, allowing more time to prepare all submission documentation.

It is appropriate for the Council to elect to plan for higher growth than the 2023 Standard Method figure, given that the NPPF 2023 Paragraph 61 and PPG (Paragraph 2a-040-20241212) define the housing requirement as the “minimum number of homes a plan needs to provide”, which may exceed local housing need if appropriate. The Council’s decision to proceed with the transition arrangements is consistent with the NPPF’s objective of preparing and maintaining up to-date plans in order to make consistent provision for housing and other needs; the Government’s emphasis on plan-led growth and seeking universal Local Plan coverage.
Reallocating the supply buffer and undertaking an Additional Site Consultation to be able to demonstrate that we can achieve a revised Housing Requirement that meets the NPPF transition arrangements is pragmatic and appropriate as the Council had already prepared and consulted on an evidence base to support a spatial strategy of this quantum and has updated its housing evidence to support the revised housing requirement.
National Planning Policy Framework cannot be disregarded. This states that to determine the minimum number of homes needed, strategic housing policies should be informed by a local housing needs assessment conducted using the standard method. The Strategic Housing Needs Assessment Addendum Report (November 2024) reviews the implications of moving housing delivery to 1,206 homes pa as does the IIA.
As set out in Policy S13 a full or focused formal review of the Local Plan will commence two years after its adoption in line with national planning policy.
A range of development quantums, broad distributions of development and site options available have been tested through the IIA. It is considered that an appropriate range of realistic options and reasonable alternatives have been tested through this iterative process. Information on reasonable alternatives that have been considered and rejected is contained within the Pre-Submission Spatial Strategy and Strategic Sites Topic Paper, Preferred Options Local Plan and the IIA. Responses to the IIA Regulation 19 representations are given in the Pre-Submission IIA Feedback Report.
There is nothing in NPPF that states that we need to meet the proportionate needs of existing settlements, and the Spatial Strategy determines how best to meet the Local Housing Need identified using the Standard Method.
The Pre-Submission plan met the 10% small sites requirement through a combination of windfall and self and custom build houses. Whilst the Additional Sites Consultation might reduce the proportion of allocated small sites because of the increase in the supply overall, the proportion of small sites will continue to exceed the 10% when combined with self and custom build houses.
It is acknowledged that flows at Rushes Lock are likely to increase in future as a result of climate change. Various steps are taken in the plan to reduce flood risk in general to mitigate the impacts of new development. This includes Policy DM18 which requires all new development to demonstrate that the site is safe from all types of flooding and does not worsen flood risk elsewhere. All major development is also required to incorporate integrated water management measures to reduce surface water runoff.
Policy is informed by the Chelmsford Employment Land Review (including the 2023 Report and Focused Update 2024) which considers the most up-to-date assumptions, guidance and data. The ELR considers the indigenous employment needs arising in Chelmsford and – where relevant – any needs identified from

across the relevant Functional Economic Market Area. The approach to the ELR aligns with the PPG and represents an appropriate and proportionate basis for planning for longer-term employment needs including in relation to B8 workforce jobs density. The plan exceeds the minimum employment requirements in the ELR over the plan period through flexible site allocations across a range of different locations and sizes alongside existing commitments. The use of 'around' employment floorspace figures in specific site allocation policies allows for an appropriate degree of flexibility in provision.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process; and can meet its development requirements without needing to undertake a Green Wedge review. This approach accords with the evidence base.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process; and can meet its development requirements without needing to undertake a Green Belt review. This approach accords with National Planning Guidance.
The Settlement Hierarchy is just one of several considerations for the Spatial Strategy, along with the Vision and Spatial Principles, and is considered to be a robust approach.
Windfall development comprises sites that have unexpectedly become available over time, and which were not anticipated by the council as part of a Local Plan. These sites are granted planning permission in accordance with adopted local and national policies and contribute towards housing figures.
Para 75 of the NPPF directs Local Planning Authorities to consider historic windfall delivery rates. The Pre-Submission Housing Topic Paper shows trends over a considerable length of time (12 years at the Pre-Submission Regulation 19 consultation). Average rates assumed at Pre-Submission stage (175) were below the actual average (196) so have been increased to 195 per annum in the Additional Sites Consultation as justified by historic windfall completions.
With the inclusion of the sites proposed by the Additional Sites Consultation a 5% buffer on the proposed new housing requirement will be shown in the 5 year land supply at submission although not a requirement of the 2023 NPPF which the plan will be considered against.
There is no national requirement for a buffer to be allocated in the supply trajectory as the NPPF manages risks to supply through the need to maintain a 5 year land supply and the Housing Delivery Test. Also Para 78c of the NPPF 2024 states that for decision-making a 20% buffer is applied to the 5 year supply of specific deliverable sites where a local planning authority has a housing requirement adopted in the last five years examined against a previous version of the Framework and whose annual average housing requirement is 80% or less of the most up to date local housing need figure calculated using the standard method.
The timing of new supply which include a mix of site typologies utilises information from developers and is explained further in the Housing Pre-Submission Topic Paper and will be updated in the Submission Housing Topic Paper to reflect the latest Housing Site Schedule and the Additional Sites Consultation Document.
The Gypsy and Traveller Accommodation Assessment published in September 2024 identified the need for new permanent pitches against the then relevant Planning Policy for Traveller Sites (PPTS). The Assessment is considered appropriate and robust. The PPTS was amended in December 2024 and the impact of this is reviewed in the Submission Housing Topic Paper. We conducted

a specific 'Call For Sites' for Gypsies &Travellers and this only elicited two submissions both of which now have planning permission. All new proposed allocations are therefore both evidenced and justified.
At the time of the Gypsy and Traveller Accommodation Assessment (GTAA), only 8 plots had been established on land east of Main Road, Broomfield and the need associated with these plots was identified in the assessment. The 5-year supply of Travelling Showpeople Sites will be updated to reflect any new resolutions / grants of planning permission since the Pre-Submission (Regulation 19) Local Plan consultation and commentary on the subsequent impact on the need for Travelling Showpeople plots provided in the Submission Housing Topic Paper. Policies DM1 and DM3 enable the provision of windfall sites for Travelling Showpeople (and Gypsy and Travellers) where not met through allocations of land for those households that remain 'undetermined' in the GTAA following changes to the Annex 1 of the December 2024 PPTS. A response to the critique of Development Management Policy DM3 is provided against this policy.

Para 6.20 and Strategic Policy S7 – The Spatial Strategy

Consultation point	**Total number of responses**
Para 6.20 and Strategic Policy S7 – The Spatial Strategy	92

Summary of Representations – main issues and requested changes:

- Support expressed for the settlement hierarchy, but it is unclear how it is intended to be used by decision-makers. Move the table to the reasoned justification text if it simply explains the distribution of growth, and increase the number of new homes to be delivered through alternative means – see the emerging West Suffolk Local Plan as an example (This Land Limited PSQ25-5759, Miscoe Enterprises Ltd PSQ25-2990, A.G. & P.W.H. Speakman PSQ25-3040, Weal Properties Ltd PSQ25-3072, Mrs R Armstrong and Mr B Howard Ms Becky Armstrong PSQ25-3077, Gearston Ltd PSQ25-3141, Cliffords Group Ltd, PSQ25-4966, The Bucknell Family, PS25-289, Crest Nicholson PSQ25-6079, Taylor Wimpey Strategic Land PS25-316, Pigeon (Sandon) Ltd PS25-230, Crest, Dandara, and Taylor Wimpey Strategic Land PS25-328)
- Support the settlement hierarchy and that Great Baddow is part of Chelmsford Urban Area (Hill Residential Ltd PS25-382)
- Support the identification of Galleywood as a Key Service Settlement (Croudace Homes PSQ25-6048)
- Chelmsford is worthy of its own separate classification in the Settlement Hierarchy (Dominus Chelmsford Limited PSQ25-6204, Higgins Homes PS25-364, Crest Nicholson PSQ25-6079, The Bucknell Family PS25-289, Taylor Wimpey Strategic Land PS25-316)
- If the settlement hierarchy remains in policy, reword to state that 'Development will be brought forward in accordance with the Spatial Strategy Development Locations and Allocations, as well as through development within and adjoining existing settlements and in sustainable locations along

existing transport corridors having regard to other policies within this Plan and the NPPF, read as a whole.' (The Bucknell Family, PS25-289, Crest, Dandara, and Taylor Wimpey Strategic Land PS25-328)

- The settlement hierarchy is not a robust basis for identifying sustainable development locations. Amend to 'development at settlements outside the Green Belt, where this would support existing or new local services to meet the needs of that specific community' (Broomfield Parish Council PSQ25-5151)
- Settlement Hierarchy should remove the distinction in relation the Green Belt (Higgins Group PSQ25-5625, PSQ25-5631)
- Support expressed for the spatial strategy (Anglian Water Services Ltd PSQ25-6396)
- Support significant growth to North-East Chelmsford (Cliffords Group Ltd PSQ25-4966, Gearston Ltd PSQ25-3141, Halley Development PSQ25-3087, PSQ25-5045)
- Support expressed for the spatial strategy but need to consider the wider impacts of the planning growth on neighbouring authority areas, including Brentwood and Rochford Council. CCC should satisfy itself and the Planning Inspectorate that it has considered all reasonable options, including the Green Belt (Brentwood Borough Council PSQ25-6158, Rochford District Council PSQ25-6193)
- Broad support expressed for the spatial strategy which is supported by the plan evidence base including the IIA. Support SGS16a. Documentation submitted alongside our representations demonstrate that SGS16a is deliverable and that there are no fundamental barriers to bringing it forward. The plan is not unduly reliant on large scale garden community developments (SGS6 and 16a will deliver less than half of Chelmsford's total housing supply) and is supported by a wide range of sites at other scales (Wates Developments and Hammonds Estates LLP PS25-313)
- Support the principle of providing Gypsy and Traveller and Travelling Showpeople accommodation on large strategic development allocations, but the proposed site distribution is unfair and unbalanced between the garden communities. Amend this policy (and site allocation policies) to remove 13 Travelling Showpeople pitches from Site SGS16a and reinstate them at SGS6 as this site has sufficient land and access characteristics to accommodate them (Wates Developments and Hammonds Estates LLP PS25-313)
- The submitted Agricultural Land Classification survey and comparative appraisal show that for the Council to meet its development needs, the loss of BMV agricultural land is unavoidable, and that alternative sites to Hammonds Farm would have similar impacts (Wates Developments and Hammonds Estates LLP PS25-313, PS25-319)
- Support the spatial strategy for employment but question limiting employment uses to B2 and B8 of the Use Classes Order. Amend SGS15 to support development in Use Classes E(g)(i-ii), B2 and/or B8 (CJH Farming Ltd PS25-287)
- For clarity amend policy to confirm the numbers within the table are approximates and should not be treated as ceilings. Remove reference to all strategic growth sites requiring a masterplan and instead address on a site-

by-site basis, in the relevant site-specific policies (CJH Farming Ltd PS25-287, Pigeon (Sandon) Ltd PS25-230)

- Support SGS16b (Pigeon (Sandon) Ltd PS25-230)
- Identify the further expansion of Chelmsford Garden Community now or for growth beyond the current plan period to boost housing supply, to help address any unmet needs from elsewhere and to help deliver the full CNEB (Hallam Land Management PSQ25-6375)
- Although the residential strategic growth sites will need to provide specialist housing this will unlikely meet needs in full, so additional allocations are needed (Mrs Mary Rance PSQ25-6498)
- Objections/concerns expressed to the spatial strategy. Examples of reasons put forward include that there has been a failure to test all reasonable alternative spatial options to support higher housing delivery and meet unmet needs from neighbouring areas; too much reliance on the delivery of strategic sites/large-scale garden communities; concerns with proposed allocated sites including their delivery rates, concerns around achieving/maintaining a 5-year supply of homes and, the need to support rural communities and provide an adequate supply buffer. Plan should allocate additional sites including within the Green Belt and/or Green Wedge, smaller-sites and in all/more settlements in the hierarchy (Hill Residential Ltd PSQ25-5194, Mrs R Armstrong and Mr B Howard Ms Becky Armstrong PSQ25-3077, Miscoe Enterprises Ltd PSQ25-2990, Cliffords Group Ltd PSQ25-3004, PSQ25-4966, Weal Properties Ltd PSQ25-3072, A.G. & P.W.H. Speakman PSQ25-3040, Martin Grant Homes PS25-148 and PSQ25-2615, M Scott Properties Ltd PSQ25-6023/6026, Tritton Farming Partnership LLP PSQ25-5679, PSQ25-5685, W. D. Smith & Son PSQ25-6019, This Land Limited PSQ25-5759, Obsidian PSQ25-5937, Richborough PS25-175, Dandara Eastern PSQ25-6213, Bloor Homes (Eastern) PSQ25-6142, Gladman Developments Ltd PSQ25-6314, Croudace Homes PS25-358)
- The Council has not adequately tested alternative options for growth, and it is unclear why other reasonable options have been discounted, including Northwest Chelmsford. Disagree with IIA assessment/rejection of West and Northwest Chelmsford which also scores better in the SHELAA. The Council has discounted all Green Belt sites as a matter of principle, although some could represent more sustainable options for development than SGS16a – a Green Belt Review is required. There is no overriding need for the additional employment allocations at SGS16a and b which will have significant adverse impacts – delete both from the plan (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6137)
- Allocate additional sites across a wider variety of sites sizes to replace or supplement the major strategic allocations. Alternatively, identify land as a ‘reserve’ site including in Rettendon (Croudace Homes PS25-358)
- There are enough sites for Chelmsford to meet the higher growth scenario, including in South Woodham Ferrers. Plan is overly reliant on SGS16a which is questionable based on the evidence base, planning logic and deliverability (Dandara Eastern PSQ25-6213)
- There should be higher housing growth for Danbury (Martin Grant Homes, PS25-148 and PSQ25-2615); proportionate to the new housing requirement (A.G. & P.W.H. Speakman PSQ25-3040)

- Follow a twinned approach to allocating sites in Neighbourhood Plan areas, whereby the Local Plan and the Neighbourhood Plan's allocate sites to ensure houses come forward to help meet local housing needs within the plan period (Richborough PS25-175)
- Delete requirement for a Gypsy and Traveller site at SGS6 – this is not properly evidenced, is contrary to the approved Development Framework Document (DFD) and could result in a shortfall is another type of specialist residential accommodation elsewhere (Chelmsford Garden Community Consortium PSQ25-6339, PSQ25-6345, PSQ25-6354, Vistry Group PSQ25-6376)
- Concerns that the spatial strategy will not achieve at least 10% (2,229 homes) of its housing requirement on sites of less than one hectare in size (Home Builders Federation PSQ25-5473)
- Allocate more land to reinstate the previous housing supply buffer and meet housing requirements in full (Obsidian PSQ25-5937)
- Undertake a full Green Belt review and identify development in the Green Belt. Examples of reasons put forward include to meet housing needs in full, reduce reliance on the garden communities, provide an adequate housing supply buffer and provide a more even distribution of growth across the District (Rosehart Properties Ltd PSQ25-3189, M Scott Properties Ltd PSQ25-6023, PSQ25-6026, Taylor Wimpey Strategic Land PSQ25-5454, Obsidian PSQ25-5937, W. D. Smith & Son PSQ25-6019, Catesby Land and Planning PSQ25-5606, Higgins Group PSQ25-5625, PSQ25-5631, Vistry PS25-304, Barratt David Wilson – Eastern Counties (BDW) PSQ25-5783)
- Council needs to identify 'Grey Belt' sites and consider reasonable alternatives to meet the new standard method requirements and consequential employment growth (Rosehart Properties Ltd PSQ25-3189)
- Council needs to undertake a Green Wedge Review. Without this, the Green Wedge designation cannot be used to reject potential development sites (Mr J Bolingbroke PSQ25-5524)
- Strategic growth areas comprise 70% of the total housing supply and the allocated sites are not delivering as projected. Allocate more proportionate sites to provide some contingency including in Broomfield (Obsidian Strategic Asset Management Ltd PSQ25-5707)
- Number of dwellings for Danbury should be proportionally increased to reflect the need to plan for the Council's new housing requirements (Landvest Developments Ltd PSQ25-5794)
- The spatial strategy has not considered all opportunities to expand the Widford/Robjohns Employment Area Industrial Estate or far enough to provide economic space. The employment and sustainability policies are potentially incongruous. Amend the Green Wedge/Belt to extend Robjohns Employment Area (Saxtons 4x4 PSQ25-6099, PSQ25-6102)
- Policy should be clear that the housing figures are a minimum to be consistent with Strategic Policy 6 and para 61 of the NPPF (2024) to ensure the efficient use of allocated housing land (Vistry Group PS25-137)
- Support additional growth in line with the NPPF targets given the housing delivery targets fall short of the ambitions in the NPPF 2024 (Halley Development PSQ25-3087, PSQ25-5045)

- Add an additional table beneath the Growth Areas Tables to identify safeguarded land including in the Green Belt that could come forward after 2041 or where there is an early review to ensure a more balanced, equitable distribution of new housing and to meet future development needs (Croudace Homes PSQ25-6044, PSQ25-48).
- Allocate the Marriage Mill Cranham Road site as a new development/ employment allocation in S7 (W & H Marriage & Sons Limited PSQ25-6055)
- We need to be consulted for any works in the vicinity of the Exolum pipeline (map attached to representation) (Exolum Pipeline System Ltd PSQ25-480)
- The Strategic Housing Needs Assessment falls short of detailing how the market for co-living accommodate will be met. Allocate a co-living site in Chelmsford City Centre (Highgate Capital Limited PSQ25-5332)
- Amend policy to also focus new growth to accessible locations on the strategic road network to meet the needs of the logistics sector including land at Junction 17 A12. SGS16a and b are too small to meet the needs of the logistics sector (Greystoke PSQ25-6074)
- Changes to the strategic road network should consider potential impacts on the wider network including London's eastern corridor. To avoid reliance on A12 access into London, Growth Area 3 could explicitly refer to strategic connections to wider employment opportunities for Chelmsford's workforce who work in London. Expanded highways should provide improved infrastructure for sustainable modes such as bus lanes (Transport for London PSQ25-6500)
- The new housing figures appear speculative. Hammonds Farm is contrary to Strategic Priority 3 and other land should be released for housing, preferably inside the A12. Windfall sites should be allocated now if the Council is certain of them (J & T Wardrop and the Wardrop Trust PS25-107, PS25-108, PS25-109)
- Quantum allocated within the Chelmsford Urban Area is too low and the plan should be aiming for 4,000 new homes (Dominus Chelmsford Limited PSQ25-6204)
- The current approach to defining sustainable locations for development based on settlement boundaries is overly reliant on arbitrary boundaries and a flexible greener outlook could be adopted i.e. walking distance to key services. This would ensure contribution on merit for deliverable well connected sustainable edge of settlement sites including Great Leighs (Mrs Helen Sadler PS25-28, PS25-64, PS25-39, PS25-54, PS25-55, PS25-57)
- Settlement boundaries must be logical, easily identifiable and follow property boundaries, permanent features and encompass suitable undeveloped sites and historical use is acknowledged (Mrs Helen Sadler PS25-39, PS25-54, PS25-55, PS25-57).
- Chelmsford water recycling centre (WRC) has sufficient dry weather flow (DWF) headroom to accommodate the planned growth in and around the city (Anglian Water Services Ltd PSQ25-6396)
- The Water Cycle Study Stage 2 (WCS) has identified that the current consented Dry Weather Flow (DWF) will be exceeded at the SWF WRC (WRC) based on the proposed growth and that the current headroom is very limited. Before an application can be made to the Environment Agency (EA) to increase the DWF permit, significant modelling will be required. The Anglian

Water PR24 Business Plan identifies a scheme at SWF WRC for AMP8 to enable growth to come forward (Anglian Water Services Ltd PSQ25-6396)

- There are some errors in WCS relating to Great Leighs WRC at para 6.7.1 and Table 6.7. The proposed allocations in Great Leighs catchment will require a DWF permit increase to be accommodated. Agree that development must not be delivered until there is sufficient capacity available at the WRC and this may require a suitable phasing plan to align with our future investment plans (Anglian Water Services Ltd PSQ25-6396)
- Engage Essex Police to ensure new infrastructure during construction and the final building stage are safe and secure and do not compromise Emergency Service Access (Essex Police PSQ25-2656)
- Support the settlement hierarchy, but allocate more growth to Bicknacre and test this as a reasonable alternative (Welbeck Strategic Land V Limited, PSQ25-3210, PSQ25-3215)
- Reject findings of the IIA including the conclusions of Option 2c and Option 3 in relation to land at West Chelmsford. Consider a potential spatial strategy with residential-led development at West Chelmsford along with employment development at Location 16b (not just Howe Green) and / or promoted sites as potential options (Crest, Dandara, and Taylor Wimpey Strategic Land PS25-328)
- Rejection of West Chelmsford in the IIA is not justified. Should assess an option based on smaller sites in West Chelmsford coming forward individually (Crest Nicholson PSQ25-6079) The Bucknell Family PS25-289, Taylor Wimpey Strategic Land PS25-316)
- Reasons for rejecting Option 2b in the IIA and the SHELAA conclusions have failed to have regard to our previously submitted technical evidence. The plan fails to provide a robust housing need and supply that addresses duty to cooperate requirements (Strutt and Parker (Farms) Limited PSQ25-5512, PSQ25-5520)
- SGS16a is not justified in favour of other options in West of Chelmsford. The reasons for rejecting this spatial option in the IIA are disputed including connectivity to the Chelmsford's urban area (Dandara PSQ25-6016, PSQ25-6017)
- Reasons for rejecting strategic growth at Chatham Green in the IIA are not applicable to Land East of Chatham Green e.g. isolated from the strategic highway network and limited capacity at the wastewater recycling facilities serving the area (Tritton Farming Partnership LLP PSQ25-5679, PSQ25-5685)
- The IIA must test growth in Boreham as a reasonable alternative and allocate development here. Reasons include because it is a Key Service Settlement and in proximity to other strategic development (Wates Developments Limited PSQ25-5303, PSQ25-5304, PSQ25-5313, This Land Limited PSQ25-5759, Gearston Ltd PSQ25-3141, Urban Provincial PSQ25-4975, Gladman Developments Ltd PSQ25-6314, Gladman Developments Ltd PSQ25-6314)
- The emerging Boreham Neighbourhood Plan infers that any future development will need to be to the east of the settlement (Wates Developments Limited PSQ25-5313)
- There is no evidence to support a lack of local education capacity as a key issue facing development in Boreham (Urban Provincial, PSQ25-4975)

- Development at Rettendon, Howe Green and East Hanningfield collectively has never been tested through the IIA (Gladman Developments Ltd PSQ25-6314
- Discounting a 'high growth' scenario based only on consideration of one selection of sites is unjustified. Other sites could be tested as a 'high growth' as a reasonable alternative to the spatial strategy (Martin Grant Homes PSQ25-2615)
- Need to explain why the viability assessment supporting the SHELAA (Part 5 of 9) makes different cost assumptions to those set out in 2023 viability assessment (Home Builders Federation PSQ25-5473)
- Amend para 6.26 to refer to healthcare 'provision with some additional provision for emergency services to meet mandated/target response times.' (East of England Ambulance Service NHS Trust PSQ25-5241)
- Para 6.27 - exclude reference to the Green Belt and allow growth in Green Belt Service Settlements to help housing affordability, increase flexibility in housing supply and support rural sustainability (M Scott Properties Ltd PSQ25-6025)
- Sandford Mill - support policy and the opportunity for a mixed-use development incorporating leisure in conjunction with use of the Chelmer & Blackwater Navigation. This should include the provision of Navigation mooring, launching and dry dock facilities in a marina basin re-purposing the Settled Water Tanks together with re-use of the heritage Filter House, and a Visitor Centre for the new Country Parks (Essex Waterways Ltd PSQ25-5207)
- Sandford Mill – the vehicular access to the Manor Farm development is from the A414 and should be extended to Sandford Mill. The road capacity from the north will be unsuitable for the vehicles expected to use the proposed new facilities and this should be reflected throughout the plan (Chelmsford Rivers and Canal Link group (CRACL) PS25-277)
- ARU Writtle - support SPA6 in principle but object to any future expansion being dependent on an approved masterplan – delete such a reference from para 6.55 (ARU PSQ25-6219)
- Refusal to undertaking a Green Belt Review and rushing through a flawed Local Plan under the Transitional Arrangements will result in a skewed and unsustainable growth strategy that fails to meet housing needs in full and an over-reliance on large Garden Communities that will take significant time and infrastructure to deliver.
- Concerns over why the proposed warehouse development at Howe Green has been considered
- Alternative strategies and new/expanded site allocations promoted by landowners/developers
- Various site promoters question the SHELAA assessment of their sites.

CCC Response
The policy shows a hierarchy for which settlements are sustainable and therefore suitable to accommodate future growth. The Spatial Strategy table sets out the specific development allocations whilst the Housing Supply is dealt with separately in Policy S6 and at Table 1. Although this approach may differ to the emerging West Suffolk Local Plan it is appropriate.

Delivering homes by alternative means is not an appropriate position or supported as a policy direction as the council intends to meet identified needs through the site allocations.
Minor modifications will be proposed to the Spatial Strategy table to update numbers of new homes to reflect the most recent housing site schedule ahead of submission (April 2026).
The Review of the Local Plan is proceeding using the transitional arrangements. These are designed for authorities such as Chelmsford that are well advanced with plan preparation. Submission of the plan will be in June 2026 in accordance with the updated Local Development Scheme, October 2025. This will enable the Council to fully consider the outcomes of the Regulation 19 consultations.
As set out in Policy S13 a full or focused formal review of the Local Plan will commence two years after its adoption in line with national planning policy.
A range of development quantums, broad distributions of development and site options available within the district have been tested through the IIA. It is considered that an appropriate range of realistic options and reasonable alternatives have been tested through this iterative process. Information on reasonable alternatives that have been considered and rejected is contained within the Spatial Strategy and Strategic Sites Pre-Submission Topic Paper, Preferred Options Local Plan and the IIA. Responses to the IIA Regulation 19 representations are given in the Pre-Submission IIA Feedback Report.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process; and can meet its development requirements without needing to undertake a Green Belt review. This approach accords with the evidence base.
The correct figure of 767 m3/day has been used in the WCS calculations for Great Leighs WRC and therefore the conclusions are unchanged.
The Green Wedge is a locally important designation. Changes to the Green Wedge boundaries to allow development growth has been discounted as there is sufficient and suitable land elsewhere to meet development needs in a sustainable way. No Green Wedge Review is required.
The Settlement Hierarchy is just one of several considerations for the Spatial Strategy, along with the Vision and Spatial Principles, and is considered to be a robust approach.
There is nothing in NPPF that states that we need to meet the proportionate needs of existing settlements, and the Spatial Strategy determines how best to meet the Local Housing Need identified using the Standard Method.
At the time the Pre-Submission Consultation was carried out (using the Council's Five-Year Housing Land Supply Methodology - April 2024) the Council could demonstrate a Five-Year Housing Land Supply at the point of submission of the Plan. Following the Pre-Submission Consultation the Council's Five-Year Housing Land Supply (based on the August 2025 Housing Site Schedule) showed that at the point of submission (Years 2 – 6) it was estimated to be 8,010 dwellings. Using the August 2025 Housing Site Schedule, it was estimated that the housing requirement figure for the Five-Year Housing Land Supply calculation would be 1,622 dwellings per annum on submission. This was based on the proposed Housing Requirement figure of 1,210 dwellings per annum, the estimated shortfall in housing completions from the new base period of the emerging Local Plan (1,672 dwellings) and the required 5% buffer to ensure choice and competition in the market for land. Based on these figures this would only be 4.93 years of

housing land supply (8,010/1,622) on submission. As a result of this the Council undertook an Additional Site Consultation which seeks to rectify this situation and demonstrate that the Local Plan will meet its Five-Year Housing Land Supply at the point of submission. Using the latest housing supply figure in the April 2026 Housing Site Schedule (8,962), and the updated housing requirement figure (including the actual shortfall of 1,783 dwellings that reflects 407 net new completions in 2025/26), the revised Five-Year Housing Land Supply Calculation including a 5% buffer is 5.45 years (8,962/1,645). The housing requirement in the plan meets at least 80% of the revised standard method housing need in line with the Government's latest plan-making transitional arrangements. This is consistent with the NPPF's objective of preparing and maintaining up to-date plans in order to make consistent provision for housing and other needs. The housing supply includes a small supply buffer although there is no national requirement for a buffer to be allocated in the supply trajectory and the NPPF manages risks to supply through the need to maintain a 5 year land supply and the Housing Delivery Test. Housing figures are 'around' and allow for more units to come forward if sites can accommodate them in a sustainable manner.
The Housing Trajectory and timings within it are considered deliverable as established through the Council's Five Year Housing Land Supply Methodology. The Trajectory is updated annually, and the Pre-Submission Local Plan uses the latest available Housing Site Schedule (April 2024). Minor modifications will be proposed to the Trajectory to reflect the latest published Housing Site Schedule ahead of submission (April 2026). A number of Strategic Growth Sites rolled forward from the adopted Local Plan including greenfield sites have planning permission or resolutions to grant planning permission including North of South Woodham Ferrers, North of Broomfield and North East Chelmsford.
The site allocations, with the addition of existing permissions and windfall sites as set out in the Council's Housing Site Schedule, creates a good range of site sizes to assist in delivery of sites to meet housing needs over the Plan period.
The 'small sites' (under 1ha) are an important part of the Plan to ensure delivery of a variety of sites in a timely manner, and to meet NPPF requirements to provide 10% of small sites.
There is no requirement or local need for the Plan to include a co-living policy. However, a Planning Advice Note was adopted by the Council in July 2025.
Policy is informed by the Employment Land Review 2023 and Focused Update 2024 which considers the most up-to-date assumptions and data regarding future economic growth prospects for Chelmsford between 2022 and 2041. The plan exceeds the minimum employment requirements over the plan period through flexible site allocations across a range of different locations and sizes alongside existing commitments. The use of 'around' employment floorspace figures in specific site allocation policies allows for an appropriate degree of flexibility in provision. DM4 protects, and allows for expansion of, existing employment uses – the Plan should be read a whole, so it is not necessary to repeat in Policy S7.
Policy S8 includes B8 development as stated in reasoned justification – the Plan should be read a whole, so it is not necessary to repeat in Policy S7.
Suitable brownfield sites have been allocated within the Urban Area. There are not sufficient brownfield sites to meet all of the Local Plan's development requirements so greenfield sites must be allocated.
The Council's Masterplan Procedure (October 2025) has been updated to cover three Masterplan routes, including planning/site briefs for smaller, less constrained

sites. Site policies will be updated to reflect the relevant route for each site but the continued requirement for Masterplans for strategic sites and Special Policy Areas will ensure that they satisfy the requirements of their respective plan policies. This can include delivery of all necessary infrastructure and ensuring that new development is delivered as part of a cohesive approach.
Policies DM8 and DM11 provide support for the growth and expansion of rural businesses – no need to add further details to Strategic Policies.
The SHELAA has been updated following the Pre-Submission Local Plan consultation and any appropriate changes or updates have been made.
See relevant site allocation policies for responses to site specific comments.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.
The windfall allowance is supported by the Housing Windfall Assessment April 2024 and 2025. Para 75 of the NPPF (December 2024) allows local planning authorities to make an allowance for windfall sites. Windfall development comprises sites that have unexpectedly become available over time, and which were not anticipated by the council as part of a Local Plan. These sites are granted planning permission in accordance with adopted local and national policies and contribute towards housing figures.
The intention is for most visitors to Sandford Mill to park in the country park car park south of the Navigation and access the site via a foot/cycle bridge. Details of access for commercial vehicles is part of further discussion relating to a current planning application for Site 3a.
The plan can meet the 10% small sites requirement through a combination of windfall and self and custom build houses.
The Gypsy and Traveller Accommodation Assessment published in September 2024 identified the need for new permanent pitches and plots against the then relevant Planning Policy for Traveller Sites (PPTS). The Assessment is considered appropriate and robust. The PPTS was amended in December 2024 and the impact of this is reviewed in the Submission Housing Topic Paper. We conducted a specific 'Call For Sites' for Gypsies &Travellers and this only elicited two submissions both of which now have planning permission. All new proposed allocations for Gypsy and Traveller and Travelling Showpeople sites are both evidenced and justified.

Strategic Policy S8 – Delivering Economic Growth

Consultation point	**Total number of responses**
Strategic Policy S8 – Delivering Economic Growth	6

Summary of Representations – main issues and requested changes:

- Support policy and the priority to use previously developed land in sustainable locations and to focus on locations well-served by active and sustainable travel modes and existing or planned public transport provision. Allocate the

former BAE site which is considered Grey Belt land (Rosehart Properties Ltd PSQ25-5301)

- Support in general but propose that the Cranham Road site be allocated as a rural employment area, or as an extension to Drakes Lane Employment Policy or as a Special Policy Area. The site has extant planning permission for employment development and will contribute towards the local economy (W & H Marriage & Sons Limited PSQ25-6059)
- Support expressed for policy but amend to identify logistics as one of the sectors that the new Local Plan will seek to nurture and grow (Pigeon (Sandon) Ltd PS25-232)
- Amend policy to include reference to nurturing and growing the logistics sector and to state that other employment will be acceptable in other locations beyond the allocations if there is a demonstrable unmet need arising during plan period (Greystoke, PSQ25-6074)
- Amend the 6th bullet point to include south of Chelmsford to be consistent with the spatial strategy and to meet the required increase in logistics space (Greystoke PSQ25-6074)
- Correct para 6.61 to refer to the Planning 'Obligations' SPD and to delete the date of the ECC Developers Guide as this will change over the life of the plan (Essex County Council, PS25-203)
- Plan has not properly considered all opportunities including an extension to Robjohns Employment Area or go far enough to provide key economic space in sustainable locations. Alter the Green Wedge/Belt to enlarge Robjohns Employment Area (Saxtons 4x4 PSQ25-6102).

CCC Response
Minor modifications will be proposed to para 6.61 to correctly reference the Planning 'Obligations' SPD and to delete the date of the ECC Developers Guide.
The policy includes B8 development as stated in reasoned justification – no further change considered necessary.
A range of development quantums, broad distributions of development and site options available within the district have been tested through the IIA. It is considered that an appropriate range of realistic options and reasonable alternatives have been tested through this iterative process. Information on reasonable alternatives that have been considered and rejected is contained within the Spatial Strategy and Strategic Sites Pre-Submission Topic Paper, Preferred Options Local Plan and the IIA. Responses to the IIA Regulation 19 representations are given in the Pre-Submission IIA Feedback Report.
Development growth in the Green Belt has been discounted as there is sufficient and suitable land is available outside the Green Belt to meet the development needs in a sustainable way. A Green Belt Review is not required.
The Green Wedge is a locally important designation. Changes to the Green Wedge boundaries to allow development growth has been discounted as there is sufficient and suitable land elsewhere to meet development needs in a sustainable way. No Green Wedge Review is required.
The plan allocates a range of employment sites to meet the employment floorspace requirements in Policy S6 and to allow for a range of different employment uses to come forward, where appropriate – no further modifications required.

A range of alternative development sites have been considered and rejected when developing the Spatial Strategy. One employment site is proposed for expansion in the Focused Consultation Additional Sites Document. More information is set out in the Pre-Submission Spatial Strategy and Strategic Sites Topic Paper, Preferred Options Local Plan and Focused Consultation Additional Sites Document.

Strategic Policy S16 – Connectivity and Travel

Consultation point	**Total number of responses**
Strategic Policy S16 – Connectivity and Travel	10

Summary of Representations – main issues and requested changes:

- Support for the policy as it would accord with Sport England's Uniting the Movement Strategy and Active Design Guidance (Sport England PS25-81)
- Support for the commitment to creating high quality, sustainable places which promote connectivity for all, especially that all new cycle and walking routes are designed to be safe and secure, and do not promote the fear of crime (Essex Police PSQ25-2661)
- Supportive of sustainable communities promoting a modal shift to active and sustainable modes of transport (Daniel James Developments PSQ25-3057)
- Significant cross-boundary engagement has been undertaken through-out the preparation of the Local Plan, effectively addressing the requirements of Duty to Co-operate. Would emphasise the importance of ongoing and meaningful collaboration between the local authorities in helping to address aspects across all identified strategic priorities, particularly in the context of infrastructure (Brentwood Borough Council PSQ25-6161, Rochford District Council PSQ25-6196)
- Broadly supportive of the policy and the wider sustainable travel strategy but emphasise the importance of ensuring the impacts of growth on sustainable transport networks are carefully considered and mitigated. This will require positive and constructive engagement between Councils to consider how transformational changes to travel patterns, and area wide modal shift, can be successfully delivered through a joined-up and strategic approach (Brentwood Borough Council PSQ25-6161, Rochford District Council PSQ25-6196)
- Improvements to active travel within Chelmsford City boundaries are considered beyond the Chelmsford's own LCWIP, which focuses largely on the urban area of Chelmsford. It should be recognised that the boundaries of Chelmsford's administrative area extend far beyond the city itself, and that active travel has a place for both intra- and inter-borough journeys. Alignment with ECC's County-wide LCWIP proposals and emerging proposals in neighbouring districts and boroughs should be sought and opportunities for joint working pursued (Brentwood Borough Council PSQ25-6161, Rochford District Council PSQ25-6196)
- Policy should recognise that due to the specific locational needs of the logistics sector, as outlined in PPG, the walkable neighbourhood principles may not always be achievable. The policy should be revised to state that

walkable neighbourhood principles within developments area should be achieved where appropriate (Greystoke CB PSQ25-6083)

- There is no evidence supplied to justify why it is considered that a 1,000 sqm non-residential development can reasonably secure the commitments of paragraph d) of policy S16, whilst this is only considered necessary for a far more substantial 100 dwelling development (i.e. ten times the scale of the major development definition). It should be increased to 10,000 sqm (Anglia Ruskin University PSQ25-6215)
- Part A requires caveats as to the extent of its applicability, by reference to scale/type of application and relevance to the scheme proposed (Vistry Group PS25-139)
- The wording "prioritise and maximise" should be deleted, as these provide unreasonable and inappropriate requirements for new development, and are not appropriate terms for use in development management policies (Vistry Group PS25-139)
- The requirement in Part B for new development to achieve a "significant" shift in mode share is imprecise. The scale of shift required will depend on the transportation impacts of the proposed development in question and is a matter to be determined in that context (Vistry Group PS25-139).

CCC Response
Request for continued engagement with neighbouring authorities is welcomed.
The policy is a strategic policy and is applicable to all forms of new development – no further change considered necessary.
The requirement in Part B for new development to achieve a "significant" modal shift is defined within the reasoned justification – no further change considered necessary.
The definition and thresholds for major and strategic development in the policy are appropriate – no further change considered necessary to this policy. Minor modifications will be proposed throughout other areas of the plan to ensure consistency with the definition of what strategic scale development is.
Maximising opportunities for new and improved active and sustainable travel is a key requirement of many site allocation policies. This will include consideration of relevant strategic proposals in the Chelmsford LCWIP, Essex LCWIP, and any adjoining council LCWIPs at site masterplanning/planning application stage – no further change considered necessary.
The Policy wording and reasoned justification set out clearly how walkable neighbourhood principles should be considered – no further change considered necessary.

Strategic Policy S9 – Infrastructure Requirements

Consultation point	**Total number of responses**
Strategic Policy S9 – Infrastructure Requirements	38

Summary of Representations – main issues and requested changes:

General

- Supports requirement for new development to be supported by infrastructure improvements which align with ECC Developers' Guide to Infrastructure Contributions (Essex County Council PS25-213)
- Support the policy and that development must be supported by the provision of infrastructure, services and facilities that are "identified as necessary to serve its needs (Wates Developments and Hammonds Estates LLP PS25-321)
- Supports this overarching policy which ensures the delivery of all necessary supporting infrastructure (Croudace Homes PSQ25-6045)
- Supports the policy and references to utilities infrastructure, flood risk management and green infrastructure which align with our strategic priorities and future investments in the Council's administrative area (Anglian Water Services Ltd PSQ25-6397)
- Support this policy and satisfied that wastewater treatment capacity and local water environment will be protected by the plan policies (Environment Agency PSQ25-6267)
- Support for plan policies which seek to promote, active and sustainable travel and specifically the promotion of Chart (National Highways PSQ25-6446)
- Allocations close to/adjacent to our network may need to consider noise/air quality issues. Noise barriers or bunds are not allowed on the highway network. Consider suitable noise mitigation solutions during the early stages of design to achieve better outcomes. Recommend a specific policy which identifies how air quality and noise impacts would be monitored and managed and what interventions may be required (National Highways PSQ25-6446)
- As this policy is read in conjunction with Strategic Policy S10, re-instate the wording related to ensuring that the cumulative impact of planning policy, standards and infrastructure requirements do not render development in the Local Plan unviable/undeliverable (Dominus Chelmsford Limited PSQ25-6205)

Transport and Highways

- The infrastructure requirements are evidenced and provide an appropriate basis for determining the likely infrastructure improvements to the local and strategic road network (Wates Developments and Hammonds Estates LLP PS25-322)
- Support para 6.91 requiring more detailed analysis of traffic impacts and mitigation options testing as part of future planning applications (Wates Developments and Hammonds Estates LLP PS25-322)
- Overall, support the plan proposals. Request that the additional Park and Ride site for West Chelmsford is located outside the Green Belt (Writtle Parish Council PSQ25-455)
- Support expressed for the policy. It is important that infrastructure items listed are deliverable and viable (Tritton Farming Partnership LLP PSQ25-5681, PSQ25-5693)
- The latest highway modelling report shows that SGS16a and b have a direct impact on the capacity of A12 Junctions 18 and 19. The developers of these

sites will be required to identify and deliver the necessary junction capacity improvements alongside provision of sustainable and active mode infrastructure and services (Essex County Council PS25-208)

- The need for appropriate public transport should be taken into consideration and new road crossings installed at an early stage of the development (Chelmsford Garden Community Council PSQ25-4951)
- Recognise the considerable projects which support active travel in Chelmsford (Transport for London PSQ25-5922)
- Para 6.90 - amend third sentence to clarify that sustainable travel is encouraged from both garden communities (Essex County Council PS25-207)
- Para 6.98 – delete reference to the Army and Navy Sustainable Transport Package approval to avoid confusion with the three applications approvals (Essex County Council PS25-209)
- Para 6.99 – amend to reflect the latest position including the approval of the Army and Navy junction and expansion to Sandon and Chelmer Valley Park and Ride planning applications by ECC (Essex County Council PS25-210)
- Para 6.100 - amend the Route Based Strategy reference so that the strategies for Mid Essex are the focus and that their latest position is clear (Essex County Council PS25-211)
- Although well developed, the National Highways A12 Junction 19 Chelmsford to J25 Marks Farm improvement scheme is not guaranteed to be delivered due to the uncertain political environment. Therefore, a Local Plan traffic modelling scenario was required where the scheme is either delayed or doesn't go ahead at all. The Local Plan traffic modelling has identified a number of locations on the Strategic Road Network which would come under pressure from increased traffic flows. Namely Junctions 17,18 and 19 on the A12. National Highways previously recommended these locations need a more detailed assessment to understand the scale and nature of the impacts, ideally using a micro simulation model and if necessary suitable mitigation measures found to manage the impact on the junctions and the A12. Third party microsimulation modelling work commenced in 2024 in consultation with National Highways, Essex Highways and CCC. National Highways agreed the base model including methodology and baseline data inputs and have since received the future scenario model (including traffic associated with the Chelmsford Local Plan). We are optimistic that a lot of the issues raised will be resolved before the Examination and would like to continue working closely with CCC with the aim of resolving these issues. As part of this work, we will work to develop a greater understanding of the impact of the proposed development upon the A12 and the required mitigation which should go into the IDP (National Highways PSQ25-6446)
- The allocations in the Local Plan will increase the number of residents in proximity of the Strategic Road Network (SRN), in particular site 16a. It is likely that these locations will be impacted by noise pollution from the SRN and raise the potential for exceedances of air quality standards for which extraordinary measures in the form of permeant speed restriction may need to be considered. This could help with flow and may be required as this section of the A12 reaches capacity (National Highways PSQ25-6446)
- Several polices in the proposed Local Plan set out requirements for developments to reduce the impact on or improve local air quality that does not directly relate to the Strategic Road Network and what mitigation may be

required. National Highways will continue to work proactively with CCC on these matters but would recommend a specific policy which identifies how air quality and noise impacts would be monitored and managed and what interventions may be required (National Highways PSQ25-6446)

- Welcome consideration of a dedicated lorry parking facility ideally close to the strategic road network, or alternatively, a policy requiring adequate lorry parking and lay over facilities at proposed employment sites and roadside service facilities (a study is attached to the representation) (National Highways PSQ25-6446)
- Due to the critical nature of the proposed future infrastructure schemes, engagement with Essex Police is strongly advocated to ensure crime has been designed out and impacts upon emergency services minimised (Essex Police PSQ25-2662)
- Para 6.96 refers to Department for Transport/Major Road Network funding combined with potential developer contributions which is assumed will be through planning obligations. Need to ensure sufficient and timely development relating to Sections 1 and 2 of the CNEB. It is understood that without a complete CNEB, delivery of existing allocations (including Chelmsford Garden Community) could result in the A131 being over capacity (Tritton Farming Partnership LLP PSQ25-5681 and PSQ25-5693)
- Changes to the strategic road network should consider potential impacts on the wider network including London's eastern corridor. To avoid reliance on A12 access into London, Growth Area 3 could explicitly refer to strategic connections to wider employment opportunities for Chelmsford's workforce who work in London. Expanded highways should provide improved infrastructure for sustainable modes such as bus lanes (Transport for London PSQ25-5922)
- Explore further growth options in North Chelmsford to help deliver the CNEB including land around Chatham Green and Great Leighs (Tritton Farming Partnership LLP PSQ25-5681)
- There should be no further development within this parish until the CNEB has been completed or the impact on the existing road system will be overwhelming (Chelmsford Garden Community Council PSQ25-4951)
- Concerned about impacts on the road infrastructure around Maldon and Heybridge as reported in the IIA. Whilst there are no decisions on growth options in our emerging Local Plan, some scenarios include the potential for growth in larger villages like Heybridge (Maldon District Council PSQ25-4938)
- Identify further expansion of Chelmsford Garden Community now or for beyond the current plan period to provide additional funding towards the full CNEB, (Hallam Land Management PSQ25-6383)
- Suggests a wording change to the tenth bullet in relation to capacity improvement on the A132 corridor (Vistry Group PSQ25-6378).

Flood Risk Management

- Support the provision of a new lock and weir gates at Chelmer Waterside (Chelmsford Rivers and Canal Link group PS25-278) which will assist with flood risk and open up the rivers for increased recreational use (Essex Waterways Ltd PSQ25-5208)

- Consider surface water drainage needs early in the design process to ensure the most appropriate solution is found (National Highways PSQ25-6446)
- Do not support a new lock and weir gates at Chelmer Waterside which will impact the viability and deliverability of the Meadows allocation (Dominus Chelmsford Limited PSQ25-6205)
- The policy and IDP is being compromised by not reviewing Green Belt. Development near Writtle could reduce the risk of flooding by providing natural flood management interventions to slow the flow of the River Wid upstream of the City Centre (Vistry Group PS25-298).

Community Facilities

- Support the provision of serviced moorings along the River Chelmer which will enable recreational vessels to visit the City Centre and residents to enjoy the waterways (Essex Waterways Ltd PSQ25-5208)
- Support policy which refers to sport, leisure and recreational facilities. This supports the strategic priorities and is consistent with national policy (Sport England PS25-82)
- Supports the delivery of essential healthcare infrastructure in line with housing growth. Health infrastructure should be at the forefront of priorities for infrastructure delivery. Health providers should have flexibility in determining the most appropriate means of meeting healthcare needs from new development. The NHS and its partners will need to work with CCC in forming appropriate mitigation measures (NHS Property Services Ltd PSQ25-5597, PSQ25-5594)
- Sporting and recreational provision should be made in new developments in accordance with local needs (Chelmsford Garden Community Council PSQ25-4951)
- Bullet one should include a reference to SEND provision in line with ECC's Developers' Guide to Infrastructure Contributions (Essex County Council PS25-205)
- Para 6.79 – Add references to the Fire & Rescue Service and Essex Police for consistency (Essex County Fire and Rescue Service PSQ25-6101, Essex Police PSQ25-6126)
- Allotment deficits exist in north and east Chelmsford and at South Woodham Ferrers. Sites need a range of services/facilities including secure site fencing, good accessibility, wide enough access roads, car parking, raised beds, toilets and secure site hut (Princes Road Allotment Association PS25-47)
- Local schools are oversubscribed and there is inadequate health provision. Adequate services should be provided at an early opportunity in future developments (Chelmsford Garden Community Council PSQ25-4951)
- Challenges the requirement for developers to provide the land and pay the full cost of construction of education infrastructure (Vistry Group PSQ25-6378)
- Concern that there will not be a new doctor's surgery, medical centre or hospital despite all the schools, nurseries, housing and business parks to be built.

Green Infrastructure and Natural Environment

- Supports policy which includes multi-functional green infrastructure. This supports the strategic priorities and is consistent with national policy (Sport England PS25-82)
- Para 6.84 – Welcomes the possible need for additional recreational mitigation measures to address 'alone' impacts of new development. Suggests the policy text is amended to reference other measures outlined in any future iterations of the RAMS (Natural England PSQ25-6243).

Utilities

- Amend policy to refer to gigabit speed broadband (Essex County Council PS25-205)
- Currently there are no known new infrastructure interactions within the area (National Grid Electricity Transmission PSQ25-6238).

CCC Response
Minor modifications will be proposed to policy to reference SEND provision and gigabit speed broadband.
Minor modification will be proposed to para 6.79 to include references to sewers, fire & rescue, police and ambulance services and National Highways, the Environment Agency, utility companies, Essex Police, Essex County Fire & Rescue Service, the East of England Ambulance service NHS Trust and Sport England.
Minor modifications will be proposed to paras 6.90, 6.98, 6.99 and 6.100 to update the plan with the latest position and for clarity and consistency.
Reference to the cumulative impact of planning policy, standards and infrastructure requirements is in reasoned justification of Policy S10.
The reasoned justification to Site Policy 16a refers to Beaulieu Park Rail Station. The plan should be read as a whole, so it is not necessary to repeat it here.
The reasoned justification refers to new development creating demand for measures to encourage sustainable travel choices.
The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the status of infrastructure across Chelmsford and identifies what new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources.
Development growth in the Green Belt has been discounted as there is sufficient and suitable land available outside the Green Belt to meet the development needs in a sustainable way. A Green Belt Review is not required.
The reasoned justification of S10 covers the need to ensure that the cumulative impact of planning policy, standards and infrastructure requirements do not render most sites and development identified in the Local Plan unviable and therefore undeliverable.
The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This is given in Appendix 2 and includes a review of representations received from Walshingham Planning on behalf of Little Baddow, Sandon, Boreham & Danbury Parish Councils, National Highways, Vistry Group and Maldon District Council.

Essex Highways response has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform any proposed modifications to the Pre-Submission Local Plan.
Continued work with National Highways has resulted in a statement of common ground with National Highways and Essex County Council (SOCG033 refers) with all parties agreeing that the Local Plan modelling to date indicates that the development in the Local Plan would have minimal impact upon the A12 and Junctions 17,18 and 19. Further modelling assessments with regards to these junctions are not required for the purposes of the Local Plan, and no modifications are required to be proposed to the Plan. With proportionate and reasonable mitigation strategies in place to support the Local Plan growth, development will ensure that severe impacts on the strategic highway network are avoided.
The Council has co-operated with other bodies on strategic planning matters on an on-going basis as evidenced in the Duty to Co-operate Position Statements (evidence base documents DTC001, DTC002 and DTC005), and Statements of Common Ground including those with adjoining authorities.
It is not considered necessary to amend the bullet point about RAMS as it only addresses recreational impacts, Policy S4 refers to future iterations.
A specific policy identifying how air quality and noise impacts would be monitored and managed and what interventions may be required is not necessary as this is already covered by other policies in the plan.
Paragraph 7.390 of the Pre-Submission Local Plan includes reference to other complementary uses, including roadside facilities, may be appropriate on Strategic Growth Site 16b. The request for a specific allocation for lorry parking at this stage of the Local Plan is not feasible but CCC will continue to work closely with National Highways on this matter to assist them in their need to provide such facilities.
The Local Plan transport modelling includes wider background growth along the A12 corridor. Minor modifications will be proposed to the plan to cover the fact that Growth Area 3 represents opportunities to help deliver employment opportunities both within the Chelmsford area and the wider area, including London.

Strategic Policy S10 – Securing Infrastructure and Impact Mitigation

Consultation point	**Total number of responses**
Strategic Policy S10 – Securing Infrastructure and Impact Mitigation	17

Summary of Representations – main issues and requested changes:

- Support expressed for policy (Essex County Council PS25-213, NHS Property Services Ltd PSQ25-5600)
- Support requirements for developments to demonstrate sufficient capacity for wastewater treatment and disposal. Applicants have the right to connect to the public network regardless of capacity constraints, so we rely on the planning system to ensure proposed development is managed effectively (Anglian Water Services Ltd PSQ25-6398)

- Pleased with policy wording on water quality and satisfied that wastewater treatment capacity and local water environment will be protected (Environment Agency PSQ25-6268)
- Support policy but include a specific reference to the Chelmsford Flood Resilience Partnership Project (CFRPP) as the Strategic Flood Risk Assessment (SFRA) makes clear that financial contributions will be expected for this scheme from relevant strategic sites (Environment Agency PSQ25-6268)
- Acknowledges that new development will increase demands on physical and social infrastructure and advises contact is made with the Essex Police to minimise impact upon policing (Essex Police PSQ25-2663)
- Cross reference to Strategic Policy S9 and clarify what developers are expected to contribute towards, and the amounts required and/or the means of calculating them including which sites are expected to deliver which infrastructure and how contributions across all allocations/developments will be proportioned (Croudace Homes PSQ25-6046)
- Re-instate wording around ensuring that the cumulative impact of planning policy, standards and infrastructure requirements do not render the sites and development identified in the Local Plan unviable and therefore undeliverable (Dominus Chelmsford Limited PSQ25-6205)
- Regards infrastructure planning obligations, consider how much growth is directed to locations that relate to such infrastructure, and whether growth is sufficient to fund it (Triton Farming Partnership LLP PSQ25-5683)
- Amend second para to remove the requirement for future infrastructure to be provided solely from proposed development. This is unreasonable as infrastructure planned by a 3rd party could mitigate the development and Grampian conditions could prevent the development occurring until the 3rd party infrastructure was in place (Vistry Strategic Land PS25-136)
- Review the final para to ensure that the Local Plan viability assessment is not inadvertently used to fetter application stage assessment as there will always be site-specific instances where a whole plan viability exercise is not representative of true site costs. Concerns also raised to the Local Plan viability evidence base (Vistry Strategic Land PS25-136)
- ECC has assisted with the preparation of the plan evidence base which covers all main subject areas and seeks to align with the NPPF. Wish to agree the updated IDP prior to submission (Essex County Council PS25-213)
- Broadly support policy. Suggest additional wording to para 6.107 to state that the Council will have regard to the inherent scale and complexity and infrastructure needs of the Garden Communities when assessing the requirements for planning obligations and CIL and that consideration will be given to ringfencing CIL or the use of other bespoke infrastructure mechanisms to help fund infrastructure required to support their delivery. This will align with the draft Planning Obligations SPD, the Community Infrastructure Levy Governance Allocating and Spending CIL (March 2024) and PPG (Wates Developments and Hammonds Estates LLP S25-324)
- Amend para 6.104 to include fire and rescue facilities (East of England Ambulance Service NHS Trust PSQ25-5239) and to ‘Essex Police, Essex County Fire & Rescue Service and the East of England Ambulance service

NHS Trust' instead of 'emergency services' (Essex County Fire and Rescue Service PSQ25-6103, Essex Police PSQ25-6127)

- Amend para 6.105 to include 'fire and rescue, police and ambulance services' instead of 'emergency services' (Essex Police PSQ25-6128, Essex County Fire and Rescue Service PSQ25-6104)
- Notes that the IIA refers to the need to upgrade the Water Treatment Works at SWF and that a large Call for Site nearby could form part of Maldon's strategic site allocations, subject to further assessment work (Maldon District Council PSQ25-4937)
- Overall agree with the plan but seek assurance that the 25% CIL funding to the Parish Council will remain a commitment (Writtle Parish Council PSQ25-462)
- Identify the further expansion of Chelmsford Garden Community (SGS6) now or for growth beyond the current plan period to provide additional developer funding to help deliver the full CNEB (Hallam Land Management PSQ25-6384)
- Alternative strategies and new/expanded site allocations promoted by landowners/developers.

CCC response to the comments made
The reasoned justification covers the need to ensure that the cumulative impact of planning policy, standards and infrastructure requirements do not render most sites and development identified in the Local Plan unviable and therefore undeliverable.
Not considered necessary to refer to the Chelmsford Flood Resilience Partnership Project (CFRPP) in addition to S9. S10 is concerned with how payments will be made.
Minor modifications will be proposed to para 6.104 to include fire and rescue facilities and National Highways, Essex Police, Essex County Fire & Rescue Service and the East of England Ambulance service NHS Trust.
Minor modifications will be proposed to para 6.105 to include police facilities/services.
Information on site specific infrastructure requirements and the means through which they will be secured is set out in the IDP and will be updated annually. This includes administrative wide infrastructure items that are apportioned on a per unit basis across all allocated sites.
The infrastructure required by a development or its contribution towards the infrastructure required to mitigate the impact of a development will be set out in the IDP and updated annually. The IDP includes delivery mechanisms which extend beyond the developer where relevant.
Reference is made to the Local Plan Viability assessment as supported by NPPF and National Planning Practice Guidance.
Inclusion of additional information contained within other documents is not necessary to include in the reasoned justification as it would be unnecessary duplication
The plan is supported by an updated IDP which demonstrates that the plan is viable and deliverable. This is a 'living' document that will be reviewed to ensure the most up-to-date information is used to inform the planning application process.

Reference to the cumulative impact of planning policy, standards and infrastructure requirements can be found in the reasoned justification of this policy.
Engagement is carried out with Police on Local Plan development, and through consultation on planning applications.
A range of alternative development sites have been considered and rejected when developing the Spatial Strategy. More information is set out in the Pre-Submission Spatial Strategy and Strategic Sites Topic Paper and Preferred Options Local Plan.

Strategic Policy S11 – The Role of the Countryside

Consultation point	**Total number of responses**
Strategic Policy S11 – The Role of the Countryside	19

Summary of Representations – main issues and requested changes:

- Support policy (Writtle Parish Council PSQ25-452)
- Support the policy's strategic aims (Elteam PSQ25-5457)
- Broadly supports Part B, but expand the wording to acknowledge that development will be supported where land or buildings do not perform strongly against the Green Wedge, and comply with other relevant plan policies (Cliffords Group Ltd PSQ25-3010)
- Part A needs modifying to reflect the new NPPF (J & T Wardrop and the Wardrop Trust PS25-111)
- Concerns about effectiveness of Part A considering the 2024 NPPF. The plan should be positive on Green Belt development and set out criteria as to how residential development in sustainable locations can come forward to maintain the vitality and viability Chelmsford's communities (Higgins PSQ25-5626)
- Questions the need for a specific Green Wedge policy as less restrictive planning policies can protect the open countryside. Undertake a Green Wedge Review to allow growth in sustainable locations which protect Green Wedge purposes including in Broomfield (Obsidian Strategic Asset Management Ltd PSQ25-5711)
- Unclear if developments within the Green Wedge (Part B) are also assessed against the Rural Area (Part C) (Mr D Bibby and Family and Colleagues PSQ25-6359)
- Requirements for developments to have no adverse impact is too restrictive as Traveller and Travelling Showpeople developments are likely to have an adverse impact on the rural area but can be permitted under Policy DM3. Insert "unacceptable" before "adverse impact" (Mr D Bibby and Family and Colleagues PSQ25-6359)
- Policy should be more flexible and permissive to allow sustainable development to come forward outside of defined built-up areas to address housing land supply shortfalls. See example in Ashford Local Plan 2030 (Gladman Developments Ltd PSQ25-6315)
- There appear no proposals to revise the 'Green Wedges and Green Corridors: Defining Chelmsford's River Valleys 2017' study. Service

Settlements must be provided with housing provision to meet village needs (Mr Paul Hopkins PSQ25-6390)

- Amend the Green Wedge/Belt to extend Robjohns Employment Area. This site has limited value in the openness of the Green Belt, is inconsistent with the Green Wedge criteria and conflicts with Policy DM4 (Saxtons 4x4 PSQ25-6106)
- Exceptional circumstances exist to undertake a Green Belt review and to allocate sites in sustainable locations which comply with the overall Growth Strategy. Development in the Green Belt should be tested via public consultation and the IIA (Martin Grant Homes PS25-149)
- Amend the policy to align with the latest Green/Grey Belt national planning policy and guidance. This will avoid confusion for decision makers and help to meet Government ambitions to increase housing delivery. There may be Grey Belt sites including land in Galleywood (BDW Eastern Counties PSQ25-6030)
- Council should undertake a Green Belt review to help identify further for housing to help housing affordability, increase flexibility in housing supply and support rural sustainability (M Scott Properties Ltd PSQ25-6024)
- Undertake a full Green Belt review and identify development in the Green Belt to provide a more even distribution of growth and maintain the vitality of Green Belt settlements. Release Grey Belt land at Battlesbridge (W. D. Smith & Son PSQ25-6019
- It is inevitable that housing land supply will need to be increased. Amend the Great Baddow Green Belt/settlement boundary to allocate Grey Belt development opportunities (Newell Properties Development Ltd PSQ25-5049)
- Para 6.121 – for clarity and to strengthen the plan, add a new second sentence to read: 'New development will be required to have regard to the Essex Green Infrastructure Strategy (2020) and the Essex Green Infrastructure Standards' (Essex County Council PS25-214)
- Future development should consider and protect rural landscapes and character and the impact upon drainage and SuDS (Chelmsford Garden Community Council PSQ25-4960)
- The current approach to the DSB is overly reliant on arbitrary boundaries which does not feature in the NPPF. Rather than stifling growth in a Key Service Settlement, a flexible, sustainable outlook could be adopted. This would enable contribution on merit for deliverable well connected sustainable sites including in Great Leighs (Mrs Helen Sadler PS25-49, PS25-50, PS25-51)
- Alternative strategies and new/expanded site allocations promoted by landowners/developers.

CCC response to the comments made
Plan seeks to prevent the encroachment of growth into undeveloped areas and the coalescence of existing built-up areas – no further changes needed.
Development growth in the Green Belt has been discounted as there is sufficient and suitable land available outside the Green Belt to meet the development needs in a sustainable way. A Green Belt Review is not required. The Pre-Submission Local Plan will be examined under the 2023 NPPF which does not refer to Grey Belt.

The Green Wedge is a locally important designation. Changes to the Green Wedge boundaries to allow development growth has been discounted as there is sufficient and suitable land elsewhere to meet development needs in a sustainable way. No Green Wedge Review is required, and the deletion of Green Wedge policies would be inappropriate.
Other policies in the plan deal with Green Wedge and Rural Area development including DM8. The plan should be read as a whole, so further provision in S11 would be duplication.
Minor modification will be proposed to para 6.121 CCC to refer to ECC's Green Infrastructure Strategy and Standards.
At the time the Pre-Submission Consultation was carried out (using the Council's Five-Year Housing Land Supply Methodology - April 2024) the Council could demonstrate a Five-Year Housing Land Supply at the point of submission of the Plan. Following the Pre-Submission Consultation the Council's Five-Year Housing Land Supply (based on the August 2025 Housing Site Schedule) showed that at the point of submission (Years 2 – 6) it was estimated to be 8,010 dwellings. Using the August 2025 Housing Site Schedule, it was estimated that the housing requirement figure for the Five-Year Housing Land Supply calculation would be 1,622 dwellings per annum on submission. This was based on the proposed Housing Requirement figure of 1,210 dwellings per annum, the estimated shortfall in housing completions from the new base period of the emerging Local Plan (1,672 dwellings) and the required 5% buffer to ensure choice and competition in the market for land. Based on these figures this would only be 4.93 years of housing land supply (8,010/1,622) on submission. As a result of this the Council undertook an Additional Site Consultation which seeks to rectify this situation and demonstrate that the Local Plan will meet its Five-Year Housing Land Supply at the point of submission. Using the latest housing supply figure in the April 2026 Housing Site Schedule (8,962), and the updated housing requirement figure (including the actual shortfall of 1,783 dwellings that reflects 407 net new completions in 2025/26), the revised Five-Year Housing Land Supply Calculation including a 5% buffer is 5.45 years (8,962/1,645). The housing requirement in the plan meets at least 80% of the revised standard method housing need in line with the Government's latest plan-making transitional arrangements. This is consistent with the NPPF's objective of preparing and maintaining up to-date plans in order to make consistent provision for housing and other needs.
A range of development quantums, broad distributions of development and site options available within the district have been tested through the IIA. It is considered that an appropriate range of realistic options and reasonable alternatives have been tested through this iterative process. Information on reasonable alternatives that have been considered and rejected is contained within the Spatial Strategy and Strategic Sites Pre-Submission Topic Paper, Preferred Options Local Plan and the IIA. Responses to the IIA Regulation 19 representations are given in the Pre-Submission IIA Feedback Report.
The Settlement Hierarchy is just one of several considerations for the Spatial Strategy, along with the Vision and Spatial Principles, and is considered to be a robust approach.

Strategic Policy S12 – Role of City, Town and Neighbourhood Centres

Consultation point	Total number of responses
Strategic Policy S12 – Role of City, Town and Neighbourhood Centres	0

No main issues

Strategic Policy S17 – Future of Chelmsford City Centre

Consultation point	Total number of responses
Strategic Policy S17 – Future of Chelmsford City Centre	5

Summary of Representations – main issues and requested changes:

- Strong support for Section E Waterways (Chelmsford Rivers and Canal Link group PS25-279)
- Support the proposals to provide significant improvements to the environmental quality, attractiveness and recreational potential of the waterways and their associated spaces. The Meadows re-development must capitalise on the waterside location to support the Council's policies for the waterways in the City (Essex Waterways Ltd PSQ25-5209)
- It is imperative that crime has been considered a material consideration throughout the design process for town centre regeneration schemes, including the potential impact on operational policing of the night-time economy, ASB opportunities, and minimise the chances for crime and the fear of crime to occur, along with the draft Terrorism (Protection of Premises) Bill (Essex Police PSQ25-2664)
- Support the policy and the approach to use development proposals to support a sustainable and vibrant City Centre, but the effectiveness of this Policy is being compromised by the Council decision not to review its Green Belt boundaries when preparing the Local Plan Review (Vistry Group PS25-300)
- Text relating to small scale reconfiguration of units at The Meadows should be removed (Dominus Chelmsford Limited PSQ25-6486).

CCC Response
Engagement is carried out with Police on Local Plan development, and through consultation on planning applications.
Strategic Growth Site Policy 1w contains detailed guidance to capitalise on the waterside location including layout, water activity, wildlife, active travel and new bridges.
The Council can meet its development requirements without needing to undertake a Green Belt review. This approach accords with National Planning Guidance.

Options for development at The Meadows provide a broad description of potential development approaches which is considered appropriate for this Policy, with the site detail included within Strategic Site Policy 1w.

Strategic Policy S13 – Monitoring and Review

Consultation point	Total number of responses
Strategic Policy S13 – Monitoring and Review	17

- Policy should commit to submit the new plan within two years of adoption and have clear mechanisms to ensure the review will lead to meaningful policy changes (Miscoe Enterprises Ltd PSQ25-2991, Cliffords Group Ltd PSQ25-3016, Cliffords Group Ltd and Mr Mark Peters PSQ25-6503, A.G. & P.W.H. Speakman PSQ25-3043, Daniel James Developments PSQ25-5162, The Bucknell Family PS25-291)
- The submitted plan will conflict with para 231 of the 2024 NPPF for decision-making, so the review process should commence once the current plan is submitted for examination (Rosehart Properties Ltd and Bressole Ltd PSQ25-3193)
- The policy should commit the Council to an immediate update of the plan (Higgins Group PSQ25-5627, Vistry Group PS25-299) and to submit for examination within two years of this plan being adopted (Barratt David Wilson – Eastern Counties (BDW) PSQ25-6029). Policy should commit to the next plan meeting housing needs in full – see policy in the Bedford Local Plan 2030 as an example (Home Builders Federation PSQ25-5474)
- Amend policy to state that if a new plan fails to materialise in two years, that the policies relating to housing supply will be considered out of date (Miscoe Enterprises Ltd PSQ25-2991, Cliffords Group Ltd PSQ25-3016, A.G. & P.W.H. Speakman PSQ25-3043, Daniel James Developments PSQ25-516, Home Builders Federation PSQ25-5474, Barratt David Wilson – Eastern Counties (BDW) PSQ25-6029)
- The policy should commit to an immediate review and to meeting identified need in full. The review should be completed within the three years of adoption (Bloor Homes (Eastern) PSQ25-6146) and meet the full standard method need given the shortfall in the transitional Pre-Submission plan (Martin Grant Homes PS25-151)
- Support a review of the Local Plan within two years of adoption although this is at odds with an unjustified housing requirement. Provide greater certainty around timescales for a review like that in the Bedford Plan 2030 (Gladman Developments Ltd PSQ25-6316)
- Alternative strategies and new/expanded site allocations promoted by landowners/developers.

CCC Response
No changes have been made as the policy meets the necessary requirements and sets an appropriate date for a future review. There is no reason for CCC to commit to an earlier review. The Local Plan is a transitional plan being examined under the

December 2023 NPPF and is not subject to similar significant strategic infrastructure proposals to Bedford.
Other proposed development sites are dealt with in the consideration of Strategic Policy S7 and addressed by the Pre-Submission Integrated Impact Assessment.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.
The Council has co-operated with other bodies on strategic planning matters on an on-going basis as evidenced in the Duty to Co-operate Position Statements (evidence base documents DTC001, DTC002 and DTC005), and Statements of Common Ground.
There is no reason for CCC to commit to an update of the Local Plan earlier than the timeframe set out in Policy S13, which is also set out in Para 34 of the NPPF (2024). CCC Local Plan is being examined against the 2023 version of the NPPF, to meet the transitional arrangements set out in Annex 1 of the 2024 NPPF, specifically Para 234 a - and CCC is not subject to similar significant strategic infrastructure proposals to Bedford.

Where Will Development Growth be Focused?

This section of the consultation document provides the site policies for delivering the Spatial Strategy.

Section 7 – Where Will Development Growth be Focused? and Growth Area 1 – Central and Urban Chelmsford (Paragraphs 7.1 to 7.12 and Figure 16)

Consultation point	Total number of responses
Section 7 - Where Will Development Growth be Focused? and Growth Area 1 – Central and Urban Chelmsford (Paragraphs 7.1 to 7.11 and Figure 16)	9

Summary of Representations – main issues and requested changes:

- Support for Growth Area 1, and the protection of existing Anglian Water assets on relevant sites (Anglian Water Services Ltd PSQ25-6399)
- Support the significant role that central and urban Chelmsford take in the overall development strategy (Gladman Developments Ltd PS25-150)
- Suggest adding reference to fire and rescue to the list of infrastructure in para 7.1 (Essex County Fire and Rescue Service PSQ25-6107)
- This refers to unlocking access to Sandford Mill Special Policy Area, but this appears to have been omitted from Site Policy 3a (Essex Waterways Ltd PSQ25-5210)
- The current approach to defining sustainable locations for development based on settlement boundaries is overly reliant on arbitrary boundaries and a

flexible greener outlook could be adopted i.e. walking distance to key services (Mrs Helen Sadler PS25-52)
- Further sites should be allocated to meet the needs of the district, identified through a Green Belt review – including a promoted site at Galleywood Road, Great Baddow (Taylor Wimpey Strategic Land PSQ25-5448), a promoted site at Smithers Drive, Great Baddow (Martin Grant Homes PS25-150)
- Sustainable sites within the Green Belt should be safeguarded to meet future development needs, through a Green Belt review (Croudace Homes PSQ25-6048)
- Amend site infrastructure requirements related to education for all Strategic and Growth Site Policies (excluding SGS 6, 10 and 16a) to: 'Financial contributions to primary, secondary, early years education and childcare as required by the Local Education Authority.' (Essex County Council PS25-184).

CCC Response
Minor modification will be proposed to refer to fire and rescue facilities.
The intention is for most visitors to Sandford Mill to park in the country park car park south of the Navigation and access the site via a foot/cycle bridge. Details of access for commercial vehicles is part of further discussion relating to a current planning application for Site 3a.
The Council can meet its development requirements without needing to undertake a Green Belt review. This approach accords with National Planning Guidance.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process.
The site allocation policies refer to site specific education requirements as supported by the plan evidence base, rather than a generic requirement.

Strategic Growth Site Policy 1a - Chelmer Waterside

Key statistics:

Consultation point	**Total number of responses**
Strategic Growth Site Policy 1a - Chelmer Waterside	4

Summary of Representations – main issues and requested changes:

- Support the policy which will assist in realising the fuller amenity and recreational potential of the waterway, flood prevention, and habitats (Essex Waterways Ltd PSQ25-5211)
- Residential travel plans could also reference connectivity to London via rail (Transport for London PSQ25-5915)
- New residential development will need to rely on existing public open space, but some assessment should made to ensure these can meet the GI Standards, as well as information leaflets for new residents (Natural England PSQ25-6245)
- Land remediation should be a requirement rather than an expectation. The list of infrastructure needs should include specific reference to financial

contributions for flood risk management infrastructure (Environment Agency PSQ25-6277).

CCC Response
It is considered that travel and access to rail services is already covered within the Local Plan, not only for the Great Eastern Mail Line but also for the Crouch Valley Line.
Flood risk is widely covered within strategic and relevant site policies, with specific requirements also specified in the Infrastructure Delivery Plan.
The Plan should be read as a whole. Policy DM30 sets out the Council's requirements before permission can be granted for development on, or near to contaminated land.

Strategic Growth Site Policy 1w – Meadows Shopping Centre and Meadows Surface Car Park

Consultation point	Total number of responses
Strategic Growth Site Policy 1w – Meadows Shopping Centre and Meadows Surface Car Park	9

Summary of Representations – main issues and requested changes:

- The proposed bridges should provide navigational headroom to support navigation on the City's rivers (Essex Waterways Ltd PSQ25-5212, Chelmsford Rivers and Canal Link group PS25-280)
- Welcome the supporting heritage evidence to support this site allocation, and the heritage criteria, within the policy, for the mitigation measures which should be followed to protect and enhance the historic environment (Historic England PSQ25-5802)
- Support from a charity which would like to become involved with providing community and educational opportunities within the new development (Independence Project PSQ25-6035)
- Additional reference should be made to optimising development and raising the allocation figure to better reflect the current planning position (Dominus Chelmsford Limited PSQ25-6198)
- New residential development will need to reply on existing public open space, but some assessment should made to ensure these can meet the GI Standards, as well as information leaflets for new residents (Natural England PSQ25-6246)
- The list of infrastructure needs should include specific reference to financial contributions for flood risk management infrastructure (Environment Agency PSQ25-6286).

CCC Response
Bridge height is included within the reasoned justification at para 7.35.
Flood risk is widely covered within strategic and relevant site policies, with specific requirements also specified in the Infrastructure Delivery Plan.

Strategic Growth Site Policy 1b – Former St Peter's College, Fox Crescent

Consultation point	Total number of responses
Strategic Growth Site Policy 1b – Former St Peter's College, Fox Crescent	2

Summary of Representations – main issues and requested changes:

- The former playing pitches on the site have not been used for 14 years, the open space designation has been removed from the map and the text at para 7.45 should be deleted to reflect this and provide consistency (Essex Housing PSQ25-5548)
- Support the requirement to provide or make financial contributions to new or enhanced sport, leisure and recreation facilities and a commuted sum in lieu of the loss of the former school playing fields. Should refer to the Council's new Playing Pitch Strategy (2025) which confirms playing pitches should be protected or replaced even if they are disused or poor quality and identifies clear deficiencies which would support upholding the requirements of the policy (Sport England PS25-83).

CCC Response
The Playing Pitch and Outdoor Sport Strategy 2024 (evidence base document BG-003-E) confirms that there are deficiencies in the capacity of existing pitches to meet demand, particularly at peak times, meaning that replacement or local off-site pitch and facilities improvements are required both to offset the loss and provide for increased demand generated by the development. Policies Map is proposed to be amended to reinstate the open space designation as identified in BG-003-E which was incorrectly removed on the Pre-Submission Policies Map.

Strategic Growth Site Policy 1d – Riverside Ice and Leisure Land, Victoria Road

Consultation point	Total number of responses
Strategic Growth Site Policy 1d – Riverside Ice and Leisure Land, Victoria Road	4

Summary of Representations – main issues and requested changes:

- Support for the policy, particularly relating to improvement of Mallard Bridge which has inadequate pedestrian/cycle width and restricted headroom for recreational use, and to provision of new lock and weir gates for flood

protection and navigational benefits (Essex Waterways Ltd PSQ25-5214, Chelmsford Rivers and Canal Link group PS25-285)
- The list of infrastructure needs should include specific reference to financial contributions for flood risk management infrastructure (Environment Agency PSQ25-6283).
- Works to Mallard Bridge need to take consideration of existing river users, and of nearby nesting swans (Chelmsford Canoe Club PS25-250).

CCC Response
Flood risk is widely covered within strategic and relevant site policies, with specific requirements also specified in the Infrastructure Delivery Plan.

Strategic Growth Site Policy 1e – Civic Centre Land, Fairfield Road

Consultation point	**Total number of responses**
Strategic Growth Site Policy 1e – Civic Centre Land, Fairfield Road	5

Summary of Representations – main issues and requested changes:

- Support for references to safe and convenient pedestrian and cycle connections which ECC plans to improve in this area (Essex County Council PS25-216)
- Suggest adding reference to fire and rescue facilities in the list of infrastructure requirements (Essex County Fire and Rescue Service PSQ25-6108, PSQ25-6114); and to ambulance services (Essex Police PSQ25-6129, PSQ25-6130).

CCC Response
Minor modification will be proposed to include reference to fire and rescue facilities, and ambulance services, in the list of infrastructure requirements in policy and at para 7.71

Strategic Growth Site Policy 1f – Eastwood House Car Park, Glebe Road

Key statistics:

Consultation point	**Total number of responses**
Strategic Growth Site Policy 1f – Eastwood House Car Park, Glebe Road	1

Summary of Representations – main issues and requested changes:

- Recommends stronger wording to ensure development is required to deliver a remediation strategy, rather than just expected to (Environment Agency PSQ25-6279).

CCC Response
This requirement is considered to be adequately covered by Policy DM30 A) – Contamination and Pollution.

Strategic Growth Site Policy 1y – Land Between Hoffmanns Way and Brook Street (Marriages Mill)

Consultation point	Total number of responses
Strategic Growth Site Policy 1y – Land Between Hoffmanns Way and Brook Street (Marriages Mill)	3

Summary of Representations – main issues and requested changes:

- Support the inclusion of the heritage criteria (Historic England PSQ25-5805)
- The allocation is supported, but a higher density of housing would be appropriate for this sustainable town centre location, previous work indicates around 250/300 dwellings and commercial uses can be accommodated so the number should be increased (W & H Marriage & Sons Ltd PSQ25-6061)
- Recommends stronger wording to ensure developments are required to deliver a remediation strategy, rather than just expected to Environment Agency PSQ25-6287).

CCC Response
The remediation requirement is considered to be adequately covered by Policy DM30 A) – Contamination and Pollution.
The use of the ‘around’ housing figure would allow for a higher density development to be brought forward where this addresses site constraints and conforms with other policies in the plan as a whole.

Strategic Growth Site Policy 1cc – Andrews Place, Land West of Rainsford Lane

Consultation point	Total number of responses
Strategic Growth Site Policy 1cc – Andrews Place, Land West of Rainsford Lane	3

Summary of Representations – main issues and requested changes:

- There is no justification for excluding market housing, which may impact on the ability to deliver affordable housing on site – alternative wording suggested (CHP PSQ25-2974)
- The list of infrastructure needs should include specific reference to financial contributions for flood risk management infrastructure (Environment Agency PSQ25-6288)
- Do not object to principal of redevelopment – however concerns expressed as a long-standing local resident as follows: by replacing 60 dwellings with 240 properties, mainly as flats, there is the potential to exacerbate the already high levels of crime in this area including drugs and violence; parking provision is considerably less than required impacting on other local roads where there are no parking restrictions in place.

CCC Response
Redevelopment of the site is not considered an over development and will be expected to provide parking in line with Policy DM27.
Flood risk is widely covered within strategic and relevant site policies, with specific requirements also specified in the Infrastructure Delivery Plan.
It is envisaged that the site will provide a significant number of affordable homes to help meet the area's needs for affordable and specialist housing and as a minimum re-provide the current number of affordable housing for rent dwellings on the site. Minor modifications will be proposed to the Policy text to acknowledge the challenge of providing a site for 100% affordable housing but reflecting the expectation that the existing level of affordable housing for rent is re-provided.

Policy GR1 – Growth Sites in Chelmsford City Centre/Urban Area

Key statistics:

Consultation point	**Total number of responses**
Policy GR1 – Growth sites in Chelmsford City Centre/Urban Area	2

Summary of Representations – main issues and requested changes:

- The eastern part of the former Key-Metzeler premises (Brook Street/New Street) should remain as a currently designated Employment Area use but re-designation of the western part of the site in line with its former draft site allocation (previously SGS1x in the Preferred Options Consultation Document, now removed) for residential use would be desirable to enable additional residential growth in a sustainable city centre location (HEVF Self Storage UK Limited PSQ25-6336).

CCC Response
The proposed former Kay Metzeler site allocation was removed from the Pre-Submission Local Plan following a change of circumstances. However, the site is now proposed for inclusion in the Focused Consultation Additional Sites Document to support increased housing requirements.

Growth Site Policy 1g – Chelmsford Social Club, Springfield Road

Key statistics:

Consultation point	Total number of responses
Growth Site Policy 1g – Chelmsford Social Club, Springfield Road	2

Summary of Representations – main issues and requested changes:

- Support for the policy, particularly enhanced route links and the improvement of Mallard Bridge which has inadequate pedestrian/cycle width and restricted headroom for recreational use (Essex Waterways Ltd PSQ25-5215)
- Support for funding for the Mallard Bridge, which should be at navigation height, and replacement lock and weir (Chelmsford Rivers and Canal Link group PS25-284).

CCC Response

Growth Site Policy 1i – Rectory Lane Car Park West

Consultation point	Total number of responses
Growth Site Policy 1i – Rectory Lane Car Park West	1

Summary of Representations – main issues and requested changes:

- In reconfiguring the car park, consideration should be given to using existing spaces to accommodate bus laybys to help ease safety issues along Broomfield Road with regards pupils accessing Chelmsford County High School for Girls (Essex County Council PS25-217).

CCC Response
This would reduce the developable area of the site but could be considered at planning application stage.

Growth Site Policy 1z – Granary Car Park, Victoria Road

Consultation point	**Total number of responses**
Growth Site Policy 1z – Granary Car park, Victoria Road	2

Summary of Representations – main issues and requested changes:

- Support the inclusion of the heritage criteria (Historic England PSQ25-5806)
- There is an opportunity for a greater number of homes and a density of 90dph, which should be explicitly supported in the policy, and it is premature to reduce to 50 from 60 in the Preferred Options plan (Sempra Homes PSQ25-3107).

CCC Response
The use of the 'around' housing figure would allow for a higher density development to be brought forward where this addresses site constraints and conforms with other policies in the Plan as a whole.

Growth Site Policy 1k – Former Chelmsford Electrical and Car Wash, Brook Street

Consultation point	**Total number of responses**

Growth Site Policy 1bb – Glebe Road Car Park

Consultation point	Total number of responses
Growth Site Policy 1bb – Glebe Road Car Park	2

Summary of Representations – main issues and requested changes:

- Suggest additional detail for clarity relating to materials and screening to secure a well-informed approach to placemaking and the historic environment (Historic England PSQ25-5809)
- Concern at a loss of public parking, particularly overnight parking for nearby residents and visitors, also privacy and noise concerns from new properties overlooking existing gardens on Townfield Street.

CCC Response
A requirement for layout to reinstate a built frontage to Glebe Road will be proposed to be added to the policy. Definition of materials is considered to be too detailed for inclusion in the policy, and inconsistent with other allocation policies in the plan – Policy DM13 C) ii) and DM23 cover building materials and finishes that are appropriate to the local context. Bullet point five in the policy already clearly sets out the requirement for parking, amenity and refuse areas to be screened from the streetscene.
Development proposals would need to comply with Policies DM23 and DM29 relating to design and protecting living environments.

Location 2 – West Chelmsford

Strategic Growth Site Policy 2 – West Chelmsford

Consultation point	Total number of responses
Strategic Growth Site Policy 2 – West Chelmsford	6

Summary of Representations – main issues and requested changes:

- Welcome reference to the masterplanning principle to provide or make financial contributions to new or enhanced sport, leisure and recreational facilities as justified by the Council's emerging evidence base, other plan polices and NPPF (Sport England PS25-84)
- Overall agreement with the proposed proposals. Welcome the commitment to CIL funding and to the Writtle Neighbourhood Plan helping to shape the development (Writtle Parish Council PSQ25-457)
- No objection to the policy but expand site allocation to the south and north-east. Question how the SHELAA has informed the selection/rejection of sites, and it needs to reflect available information/evidence and opportunities to mitigate potential constraints identified. The IIA should assess sites in their own right and West Chelmsford as a growth location. Unclear how the proposed additional benefits of the promoted developments have been considered (Taylor Wimpey Strategic Land PS25-318, Crest Nicholson PSQ25-6082)
- Concerns about adverse of the development on Roxwell Parish including no apparent provision to create additional health services and increased traffic and road safety on the A1060. Adjust the plan to provide additional primary healthcare facilities and to extend the 40mph speed limit beyond Boyton Hall to the junction with Vicarage Road (Roxwell Parish Council PSQ25-5824)
- Expand para 7.120 to include the following: 'A safe traffic free environment around school pedestrian entrances must be provided, ensuring access for emergency vehicles only' (Essex County Council PS25-220).

CCC Response
Minor modification will be proposed to para 7.120, to provide a traffic free environment around school pedestrian entrances.
The site policy requires financial contributions to, and/or onsite provision of, other community facilities such as healthcare provision. Further details are set out in planning application 21/01545/OUT which the Council has resolved to grant planning permission, subject to conditions and the completion of a Section 106 agreement. This includes provision of a new healthcare facility.
The site policy requires appropriate improvements to the local and strategic road network as required by the Local Highways and Transportation Authority. Specific improvements will be agreed at planning application stage. Further details are set out in planning application 21/01545/OUT which the Council has resolved to grant planning permission, subject to conditions and the completion of a Section 106 agreement. This includes local highways improvements and sustainable transport measures.
A range of development quantums, broad distributions of development and site options available within the district have been tested through the IIA. It is considered that an appropriate range of realistic options and reasonable alternatives have been tested through this iterative process. Information on reasonable alternatives that have been considered and rejected is contained within the Spatial Strategy and Strategic Site Pre-Submission Topic Paper, Preferred Options Local Plan and the IIA. Responses to the IIA Regulation 19 representations are given in the Pre-Submission IIA Feedback Report.

Location 3 – East Chelmsford

Strategic Growth Site Policy 3a – East of Chelmsford, Manor Farm

Consultation point	Total number of responses
Strategic Growth Site Policy 3a – East of Chelmsford, Manor Farm	8

Summary of Representations – main issues and requested changes:

- Welcome the mitigation measures to address cumulative recreational pressure on the SSSIs but impacts on coastal sites will need to be considered. Clarification on the name of SSSIs provided (Natural England PSQ25-6247)
- Welcome the requirement for financial contributions and masterplanning principle for providing new or enhanced sport, leisure, recreation and community uses (Sport England PS25-85)
- Object to the change to this policy which now omits the requirement for a vehicular access to Sandford Mill, only requiring pedestrian/cycle access. New vehicular access from the A414 is essential to provide adequate HGV service access for its proposed use as a Visitor Centre with marina facilities in conjunction with the Chelmer & Blackwater Navigation. The existing northern access is restricted by two II listed Navigation bridges which are unsuitable for HGVs and coaches (Essex Waterways Ltd PSQ25-5217, Chelmsford Rivers and Canal Link group PS25-281)
- The policy should be reviewed to clarify that financial contributions will only be required where it can be demonstrated that they meet the requirements of the CIL Regulations (Hopkins Homes PS25-199)
- The position relating to the need for a Minerals Resource Assessment (MRA) should be reviewed against exemptions in the Minerals Local Plan (MLP) (Appendix 5) which is not addressed (Hopkins Homes PS25-199)
- The decision to include Manor Farm was only possible after part of the farm was removed from Green Wedge status
- Concerns that toxic waste from Baden Powell Close is burning its way towards the river, which regularly floods
- Questions how the Local Plan allocation is consistent with Sandon and Little Baddow Neighbourhood Plans.

CCC Response
The intention is for most visitors to Sandford Mill to park in the country park car park south of the Navigation and access the site via a foot/cycle bridge. Details of access for commercial vehicles is part of further discussion relating to a current planning application.
Ground conditions are considered to be adequately covered by Policy DM30 A) – Contamination and Pollution.
This site allocation is within the Great Baddow Parish, which does not have a made Neighbourhood Plan.

ECC as Minerals and Waste Planning Authority has assessed proposed Local Plan allocation sites through the plan preparation process to identify where a Minerals Resource Assessment (MRA) is required. If a planning application is received for this site an MRA will be required. This requirement was added in 2018 following the Preferred Options consultation for the Adopted Local Plan. In addition, the emerging Replacement Essex Minerals Local Plan clarifies the requirement for planning applications on Local Plan allocation sites to conduct a MRA (subject to the thresholds in the Minerals Local Plan Policy S8).
The site allocation is rolled over from the adopted Local Plan 2020 and following a Green Wedge review.
The Council will use various mechanisms to secure necessary infrastructure, including the Community Infrastructure Levy (CIL), Section 106 legal agreements, Section 278 legal agreements (where relevant) and planning conditions.

Strategic Growth Site Policy 3b – East of Chelmsford, Land North of Maldon Road (Employment)

Consultation point	**Total number of responses**
Strategic Growth Site Policy 3b – East of Chelmsford, Land North of Maldon Road (Employment)	4

Summary of Representations – main issues and requested changes:

- Support for the policy (Barratt Redrow PSQ25-5166)
- Support for additional wording relating to a strategy for responding to National Grid Electricity Transmission plc (NGET) overhead transmission lines (National Grid Electricity Transmission PSQ25-6235)
- Support for the policy, in particular safeguarded bus access which is demonstrated to be feasible (Wates Developments and Hammonds Estates LLP PS25-305)
- Propose that the allocation be increased to approximately 40,000 sqm with associated parking, to provide more flexibility in layout and access to take account of overhead power lines (The Speakman Family PSQ25-6328)

CCC Response
The allocation is sufficiently flexible to allow changes in quantity of floorspace to reflect site constraints.

Strategic Growth Site Policy 3c – East of Chelmsford, Land South of Maldon Road

Consultation point	**Total number of responses**
Strategic Growth Site Policy 3c – East of Chelmsford, Land South of Maldon Road	3

Summary of Representations – main issues and requested changes:

- Support for the policy (Barratt Redrow PSQ25-5167)
- Welcome the mitigation measures to address cumulative recreational pressure on the SSSIs but impacts on coastal sites will need to be considered. Clarification on SSSI names provided (Natural England PSQ25-6248)
- It has become increasingly difficult to address the ever-increasing infrastructure requirements being sought by Essex County Council Highways. It should not then have 'catch all' criteria as well, which could allow them to add further infrastructure. Suggest the first and fourth bullet points under 'Site infrastructure requirements' should be deleted (Barratt Redrow PSQ25-5167)
- Two additional requirements relating to recreational pressure on the SSSIs are unwarranted, given the Country Park at Site 3a and open space already proposed for this site, and should be deleted (Barratt Redrow PSQ25-5167)
- The site can be designed around above ground electricity lines, so the policy should be amended to allow flexibility for not moving these underground (Barratt Redrow PSQ25-5167)
- Other nearby sites (in Mayes Lane) are available and suitable for allocation and would contribute to meeting housing needs (J & T Wardrop and the Wardrop Trust PS25-111).

CCC Response
Requirements for improvements required by the Local Highways and Transportation Authority feed into planning applications and are qualified using 'appropriate' to enable them to relate to individual site circumstances.
Mitigation relating to recreational pressure on the SSSIs are included to meet Natural England's requirements.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process.
Undergrounding of electricity pylons and lines cables is an appropriate requirement given they cross the eastern part of the site.

Strategic Growth Site Policy 3d – East of Chelmsford, North of Maldon Road

Consultation point	**Total number of responses**
Strategic Growth Site Policy 3d – East of Chelmsford, North of Maldon Road	1

Summary of Representations – main issues and requested changes:

- Support for the policy (Barratt Redrow PSQ25-5167)
- Two additional requirements relating to recreational pressure on the SSSIs are unwarranted, given the Country Park at Site 3a and open space already proposed for this site, and should be deleted (Barratt Redrow PSQ25-5167)

- The site can be designed around above ground electricity lines, so the policy should be amended to allow flexibility for not moving these underground (Barratt Redrow PSQ25-5168).

CCC Response
Mitigation relating to recreational pressure on the SSSIs are included to meet Natural England's requirements.
Undergrounding of electricity pylons and lines cables is an appropriate requirement given they cross the eastern part of the site.

Location 4 – Growth Site Policy 4 – Land North of Galleywood Reservoir

Consultation point	Total number of responses
Growth Site Policy 4 – Land North of Galleywood Reservoir	1

Summary of Representations – main issues and requested changes:

- A promoted site in Galleywood should be allocated to help meet specialist residential accommodation needs (J & T Wardrop and the Wardrop Trust PS25-112).

CCC Response
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process.

Location 5 – Growth Site Policy 5 – Land Surrounding Telephone Exchange, Ongar Road, Writtle

Consultation point	Total number of responses
Growth Site Policy 5 – Land Surrounding Telephone Exchange, Ongar Road, Writtle	4

Summary of Representations – main issues and requested changes:

- Overall, the Parish Council agrees with this allocation and welcome the commitment to 25% of CIL being payable to the Parish Council through its made Neighbourhood Plan (Writtle Parish Council PSQ25-458)
- Support the allocation but would prefer the development amount to be expressed as a minimum or to be indicative (Telereal Securitised Property GP Limited PSQ25-4986)
- Any on-site infrastructure provision and/or financial contributions must be 'appropriate and proportionate' to the scale of the development. Insert such wording in each bullet requiring financial contributions. This will also align with

Growth Site policies such as 3a and 3c (Telereal Securitised Property GP Limited PSQ25-4986).

CCC Response
Policy requirements for financial contributions will be appropriate and proportionate' to the scale of the development and the wording is consistent with other site allocation policies.
The use of the 'around' housing figure allows for a lesser or greater amount of development to be brought forward where this addresses site constraints and conforms with other policies in the plan as a whole.

Growth Area 2 – North Chelmsford (paragraphs 7.207-7.212 and Figure 17)

Consultation point	Total number of responses
Growth Area 2 – North Chelmsford (paragraphs 7.207-7.212 and Figure 17)	3

Summary of Representations – main issues and requested changes:

- Welcome the ambition to increase active and public transport, however the language could be firmer. Introduce maximum parking standards in areas close to stations and explicitly reference improved access to London (Transport for London PSQ25-5919)
- Support the Council's recognition of the strategic importance of North East Chelmsford and the Chelmsford
- in accommodating significant levels of growth across the plan period (Daniel James Developments PSQ25-3060, PSQ25-6485)
- The suitability of Boreham for development has been overlooked as a reasonable alternative to Hammonds Farm and it must be noted that the strategic sites included within the adopted plan are yet to deliver (Gladman Developments Ltd PSQ25-6318).

CCC Response
The new 2024 parking standards provides the opportunity for development locations in highly sustainable locations to have a lower level of parking where an assessment can justify it. The Local Plan uses these more recent parking standards so there is no need to refer to reduced parking directly. Additional wording proposed to be added to acknowledge improved access to London.
The plan follows the 2024 Essex Parking Guidance as set out in DM27.
As a stand-alone site, the promoted land at Boreham is too small to be considered as a reasonable alternative to Hammonds Farm.

Location 6 – North East Chelmsford (Chelmsford Garden Community)

Strategic Growth Site Policy 6 – North East Chelmsford (Chelmsford Garden Community)

Key statistics:

Consultation point	Total number of responses
Strategic Growth Site Policy 6 – North East Chelmsford Garden Community	21

Summary of Representations – main issues and requested changes:

- Support policy requirements for pedestrian, cycleway and bridleways; open space, sport, leisure and recreation facilities; community space and a new Country Park (Sport England PS25-86)
- Support opportunities for dual use sports facilities as justified by the Council's new sports evidence base, Government policy and other plan policies (Sport England PS25-86)
- Welcome reference to encouraging healthy and active lifestyles in line with the Active Design guidance in para 7.223 (Sport England PS25-86)
- Note changes to S4, S9 and DM16 which will address the requirement for this development to provide suitable alternative natural greenspace to provide mitigation in part for increased recreational impacts on international coastal designated sites under Essex Coast RAMS (Natural England, PSQ25-6249)
- Support for the site/policy (Daniel James Developments PSQ25-3064, Halley Development PSQ25-5041)
- We are committed to delivering CGC, but concerns are raised in relation to the assumptions in the Regulation 19 Viability Note (Chelmsford Garden Community Consortium PSQ25-6339, PSQ25-6354, Vistry Group PSQ25-6362)
- Revise policy to state the development proposals will be informed rather than accord with the DFD as it is not subject to examination (Halley Development PSQ25-5041, Ptarmigan Chelmsford A Limited PSQ25-5574)
- Amend policy to state a 'minimum' of 681 homes beyond 2024 to ensure consistency with the NPPF (Ptarmigan Chelmsford A Limited PSQ25-5574)
- Expand policy requirement to also provide safe and convenient connections to the Park and Ride to ensure consistency with the NPPF (Ptarmigan Chelmsford A Limited PSQ25-5574)
- Amend policy requirement to provide 'up to' 56,946sqm of dedicated employment land (Chelmsford Garden Community Consortium PSQ25-6339, PSQ25-6354, Vistry Group PSQ25-6362)
- Amend policy requirement and para 7.239 to provide a minimum of 10% BNG per phase with an aspiration of 20% across the site subject to site constraints and 'viability', to ensure accordance with the approved DFD (Chelmsford Garden Community Consortium PSQ25-6339, PSQ25-6354, Vistry Group PSQ25-6362, PSQ25-6363)

- Delete requirement for a Gypsy and Traveller site as this is not properly evidenced and could result in a shortfall is another type of specialist residential accommodation elsewhere (Chelmsford Garden Community Consortium PSQ25-6339, PSQ25-6345, PSQ25-6354, Vistry Group PSQ25-6362, PSQ25-6368)
- Amend policy and para 7.223 to provide 'up to' four new stand-alone early years and childcare nurseries 'within the village centres' (Chelmsford Garden Community Consortium, PSQ25-6339, PSQ25-6346, PSQ25-6354, Vistry Group PSQ25-6362)
- Amend requirement and para 7.229 to enable a 60% modal share 'within the development' (Chelmsford Garden Community Consortium PSQ25-6339, PSQ25-6354, Vistry Group PSQ25-6362)
- Delete requirement for the new all-through school to be on 'suitable' land (Chelmsford Garden Community Consortium PSQ25-6339/6354, Vistry Group PSQ25-6362, PSQ25-6369)
- Amend requirement to state that financial contributions towards delivery of Section 1a of the Chelmsford North East Bypass will be 'in the form of HIF Recovery and Recycling payments subject to viability testing' (Chelmsford Garden Community Consortium PSQ25-6339, PSQ25-6354, Vistry Group PSQ25-6362)
- Amend para 7.221 to provide a Travelling Showpeople site for 10 pitches based on 0.2 hectares per plot with convenient access for heavy goods vehicles. Delete requirement for a 10 pitch Gypsy and Traveller site with delivery through a Registered Housing Provider (Chelmsford Garden Community Consortium PSQ25-6339, PSQ25-6354, Vistry Group PSQ25-6362)
- Add an additional bullet under 'Site infrastructure requirements' in line with the ECC Developers' Guide to read: Financial contributions to primary, secondary, early years and childcare, including SEND education as required by the Local Education Authority (Essex County Council PS25-222)
- Amend para 7.225 to delete the reference to a joint use agreement being 'secured' through the outline planning application or its s106 agreement. Replace instead with wording that alludes to the preparation of a Joint Use Agreement between the City Council and the school provider once appointed (Essex County Council PS25-223)
- Reinstate 13 Travelling Showpeople plots to this site (from the Preferred Option Plan) and delete from SGS16a. The transfer to SGS16a is unjustified and does not distribute needs appropriately across the district. It will also be challenging to accommodate at SGS16a in tandem with the proposed Gypsy and Traveller provision. Chelmsford Garden Community can adequately accommodate the plots as part of the mix of uses on the largest of the Garden Community sites (Wates Developments and Hammonds Estates LLP PS25-306)
- The trajectory for the site is unrealistic and not justified by evidence. Allocate additional housing close to Chelmsford to address a c2,000 shortfall in housing delivery over the plan period (Hill Residential Ltd PSQ25-5195)
- Land south of Pratts Farm Lane within the site is suitable new sports and leisure facilities (Cliffords Group Ltd PSQ25-3031)

- Expand site to incorporate land to the north and south of Peverel's Farm or amend policy to enable sites along Domsey Lane to come forward as stand-alone developments (Daniel James Developments PSQ25-3064)
- Expand site to incorporate land north of Wheelers Hill (or as a potential area for longer term growth beyond the Plan period) to boost housing supply, address affordability issues and unmet needs of neighbouring areas, and help deliver the full Chelmsford North East Bypass (Hallam Land Management PSQ25-6385)
- Expand site to incorporate land north of Cranham Road to boost housing land supply. Remove/reduce the number of dwellings allocated at SGS16a and redistribute the growth to North Chelmsford (Higgins Homes, PS25-365
- Essex Police have engaged with the design teams at the early design stage, for Chelmsford Community Garden (Essex Police PSQ25-2666).

CCC Response
Given the three outline planning applications relating to this site will be accompanied by a Development Framework Document, Infrastructure Delivery Plan and Planning Framework Agreement, any updates or conflict with the area wide Local Plan Viability Update will be addressed in a Statement of Common Ground with the CGC Consortium when the documents/applications are agreed/approved, prior to Examination of the Local Plan.
Minor modifications will be proposed to state a 'minimum' of 671 homes beyond 2024 and to expand policy requirement to also provide safe and convenient connections to the Park and Ride.
Minor modifications will be proposed to site policy and para 7.229 to clarify that a 60% modal share will be from trips originating within the development.
A site specific IDP has been used to inform the costings in the site wide viability assessment, this then enabled an assessment to be made as to what extent contributions towards Homes England's HIF could be recycled from the scheme and what level of affordable housing could be provided.
In line with the ECC Developers' Guide an additional bullet point will be proposed to be added to include financial contributions to primary, secondary, early years education and childcare, including SEND education as required by the Local Education Authority.
Minor modification will be proposed to confirm that four new stand-alone early years and childcare nurseries could also be provided within the village centres in line with the approved planning applications for Zones 1 and 3.
The Trajectory is updated annually, and the Pre-Submission Local Plan uses the latest available Housing Site Schedule (April 2024). Minor modifications will be proposed to the Trajectory to reflect the latest published Housing Site Schedule ahead of submission (April 2026). The majority of Strategic Growth Sites rolled forward from the adopted Local Plan including greenfield sites have planning permission, resolutions to grant planning permission including North of South Woodham Ferrers, West Chelmsford, North of Broomfield, Great Leighs and North East Chelmsford.
Retain the requirement for the new all-through school to be on 'suitable' land in line with ECC's requirements. This also accords with the site Education Strategy approved alongside the planning applications for Zones 1 and 3.

Retain requirement for the development to accord with the DFD to ensure that the is planned and delivered comprehensively.
Retain reference in para 7.225 to a joint use agreement being 'secured' through the outline planning application or its s106 agreement to ensure sufficient open space will be delivered in line with the Development Standards in Appendix B and to also reflect the approved planning applications for Zones 1 and 3.
Employment requirements are not a ceiling, therefore the use of 'around' figures remains appropriate.
Retain requirement for the development to provide 20% BNG in accordance with Policy DM16. The Local Plan is supported by the plan evidence base including an updated Viability Assessment. The 20% requirement also accords with the approved planning applications for Zones 1 and 3. It is however reasonable to include additional text in the policy to state that anything over and above 20% should be capped at what can be practically delivered on site.
The need for Gypsy and Traveller provision remains to help meet needs set out in Policy S6 and S7 justified by the GTAA.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.
Reference to a 'draft' Business Plan will be proposed to be added to the Stewardship Strategy requirement as it would not be possible to have a 'full' Business Plan at this point in time.

Location 7 – Great Leighs

Strategic Growth Site Policy 7a – Great Leighs – Land at Moulsham Hall

Consultation point	**Total number of responses**
Strategic Growth Site Policy 7a – Great Leighs – Land at Moulsham Hall	10

Summary of Representations – main issues and requested changes:

- Support requirements for developments to demonstrate sufficient capacity for wastewater treatment and disposal to serve the site. Agree with recommendations in the Stage 2 Water Cycle Study 2024 that development may require a suitable phasing plan to align with our future investment plans (Anglian Water Services Ltd PSQ25-6400)
- Welcome reference to the masterplanning principle to provide or make financial contributions to new or enhanced sport, leisure and recreational facilities as justified by the Council's emerging evidence base, other plan polices and NPPF (Sport England PS25-87)
- Note changes to Strategic Policies 4 and 9 and DM16 which will address the requirement for this development to provide suitable alternative natural greenspace to provide mitigation in part for increased recreational impacts on international coastal designated sites under Essex Coast RAMS (Natural England PSQ25-6250)

- Site falls within the Eastern 2 Wide Area Multilateration Network statutory safeguarding zone meaning any development or change of use will trigger statutory consultation with us to assess impacts on the local air traffic management system. Usually this will be by virtue of the scale or height of a development, for example, developments 50m above ground level (Defence Infrastructure Organisation (DIO) PSQ25-6408)
- Add a policy requirement to protect the ecological integrity of Phyllis Currie Nature Reserve, and to provide funds to improve the resilience of the site to increased recreational impacts (Essex Wildlife Trust PSQ25-5060)
- Amend para 7.256 to clarify that Great Leighs primary school is full in most but not every year group and the scale of development in this location will 'likely' require a new primary school (Essex County Council PS25-224)
- Expand para 7.255 to include 'A safe traffic free environment around school pedestrian entrances must be provided, ensuring access for emergency vehicles only.' This will assist in this being considered at the earliest stage of the planning process and accord with Essex County Council's Developers' Guide to Infrastructure Contributions (Essex County Council PS25-225)
- Suggests amending para 7.265 by removing the text "Although this is not a barrier to new development growth", as current capacity and future permit requirements are constraints that will require alternative solutions to be investigated and considered in terms of their feasibility and deliverability. Also add 'subject to the necessary environmental permitting processes' to the end of the paragraph (Anglian Water Services Ltd PSQ25-6403)
- Objects to the plan – combined housing growth from the Chelmsford and Braintree Local Plans is too much and will put add extra traffic on an overburdened/unsuitable local road system. A supermarket and Senior School are required at Great Leighs together with a road for all traffic across the Braintree Site BLAN114 from Bakers Lane to Notley Road, to avoid the pinch points on Bakers Lane and the problems at the War Memorial Junction at Church Road/Witham Road Black Notley (Black Notley Parish Council PSQ25-481)
- Expand SGS7a to incorporate land to at School Lane (Harris Strategic Land Limited PSQ25-6038).

CCC Response
The policy includes a requirement to ensure appropriate habitat mitigation and creation is provided and the Reasoned Justification notes that this may include financial contributions towards mitigating increased recreational impacts on the nearby Nature Reserve. This allows for such contributions to be made if required and the approach is consistent with other policies and the adopted Local Plan. No change required.
Minor modification will be proposed to clarify status of Great Leighs primary school in para 7.256.
Minor modification will be proposed to provide a traffic free environment around school pedestrian entrances in para 7.255.
Minor modifications will be proposed to para 7.265 in relation to Great Leighs' WRC. Text retained in respect to wastewater capacity not being a barrier to new development growth as this is factually correct.

The site allocation, quantum and boundary are supported by the plan evidence base including the traffic modelling, IDP and Urban Area and Defined Settlement Review Technical Notes.
The site policy requires creation of a new neighbourhood centre with convenience food shopping and for appropriate improvements to the local and strategic road network as required by the Local Highways and Transportation Authority.
The 'Chelmsford City Council Housing Scenario Test – Primary and Secondary Education December 2024' confirms that there is no need to provide a new secondary school on the site.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.
Minor modifications will be proposed to ensure the development is designed in such a way that there is no impact on the operational or capability of nearby defence assets.

Strategic Growth Site Policy 7b – Great Leighs – Land East of London Road

Consultation point	**Total number of responses**
Strategic Growth Site Policy 7b – Great Leighs – Land East of London Road	4

Summary of Representations – main issues and requested changes:

- Support requirements for developments to demonstrate sufficient capacity for wastewater treatment and disposal to serve the site. Agree with recommendations in the Stage 2 Water Cycle Study 2024 that development may require a suitable phasing plan to align with our future investment plans (Anglian Water Services Ltd PSQ25-6401)
- Suggests amending para 7.280 by removing the text "Although this is not a barrier to new development growth", as current capacity and future permit requirements are constraints that will require alternative solutions to be investigated and considered in terms of their feasibility and deliverability. Also add 'subject to o the necessary environmental permitting processes' to the end of the last paragraph (Anglian Water Services Ltd PSQ25-6404)
- Note changes to Strategic Policies 4 and 9 and DM16 which will address the requirement for this development to provide suitable alternative natural greenspace to provide mitigation in part for increased recreational impacts on international coastal designated sites under Essex Coast RAMS (Natural England PSQ25-6251)
- Objects to the plan – combined housing growth from the Chelmsford and Braintree Local Plans is too much and will put add extra traffic on an overburdened/unsuitable local road system. A supermarket and Senior School are required at Great Leighs together with a road for all traffic across the Braintree Site BLAN114 from Bakers Lane to Notley Road, to avoid the pinch points on Bakers Lane and the problems at the War Memorial Junction at

Church Road/Witham Road Black Notley (Black Notley Parish Council PSQ25-482).

CCC Response
Minor modifications will be proposed to para 7.280 in relation to Great Leighs' WRC. Text retained in respect to wastewater capacity not being a barrier to new development growth as this is factually correct.
The site allocation, quantum and boundary are supported by the plan evidence base including the traffic modelling, IDP and Urban Area and Defined Settlement Review Technical Notes.
The site policy requires creation of a new neighbourhood centre with convenience food shopping and for appropriate improvements to the local and strategic road network as required by the Local Highways and Transportation Authority.
The 'Chelmsford City Council Housing Scenario Test – Primary and Secondary Education December 2024' confirms that there is no need to provide a new secondary school on the site.

Strategic Growth Site Policy 7c – Great Leighs – Land North and South of Banters Lane

Consultation point	Total number of responses
Strategic Growth Site Policy 7c – Great Leighs – Land North and South of Banters Lane	7

Summary of Representations – main issues and requested changes:

- Support requirements for developments to demonstrate sufficient capacity for wastewater treatment and disposal to serve the site. Agree with recommendations in the Stage 2 Water Cycle Study 2024 that development may require a suitable phasing plan to align with our future investment plans (Anglian Water Services Ltd PSQ25-6400)
- Note changes to Strategic Policies 4 and 9 and DM16 which will address the requirement for this development to provide suitable alternative natural greenspace to provide mitigation in part for increased recreational impacts on international coastal designated sites under Essex Coast RAMS (Natural England PSQ25-6250)
- Amend para 7.285 to clarify that the scale of development in this location will 'likely' require a new primary school and that size has not yet been determined (Essex County Council PS25-226)
- Suggests amending para 7.294 by removing the text "Although this is not a barrier to new development growth", as current capacity and future permit requirements are constraints that will require alternative solutions to be investigated and considered in terms of their feasibility and deliverability. Also add 'subject to o the necessary environmental permitting processes' to the end of the last paragraph (Anglian Water Services Ltd PSQ25-6405)
- Add a policy requirement to protect the ecological integrity of Sandylay and Moat Woods Nature Reserve, and to provide funds to improve the resilience

of the site to increased recreational impacts (Essex Wildlife Trust PSQ25-5061)

- Objects to the plan – combined housing growth from the Chelmsford and Braintree Local Plans is too much and will put add extra traffic on an overburdened/unsuitable local road system. A supermarket and Senior School are required at Great Leighs together with a road for all traffic across the Braintree Site BLAN114 from Bakers Lane to Notley Road, to avoid the pinch points on Bakers Lane and the problems at the War Memorial Junction at Church Road/Witham Road Black Notley (Black Notley Parish Council PSQ25-483)
- The current approach to defining sustainable locations for development based on settlement boundaries is overly reliant on arbitrary boundaries and a flexible greener outlook could be adopted i.e. walking distance to key services. This would ensure contribution on merit for deliverable well connected sustainable edge of settlement sites including Great Leighs (Mrs Helen Sadler PS25-28, PS25-53).

CCC Response
The policy includes a requirement to ensure appropriate habitat mitigation and creation is provided and the Reasoned Justification notes that this may include financial contributions towards mitigating increased recreational impacts on the nearby Nature Reserve. This allows for such contributions to be made if required and the approach is consistent with other policies and the adopted Local Plan. No change required.
Minot modification will be proposed to clarify status of Great Leighs primary school in para 7.285
Minor modifications will be proposed to para 7.294 in relation to Great Leighs' WRC. Text retained in respect to wastewater capacity not being a barrier to new development growth as this is factually correct.
The site allocation, quantum and boundary are supported by the plan evidence base including the traffic modelling, IDP and Urban Area and Defined Settlement Review Technical Notes.
The site policy requires creation of a new neighbourhood centre with convenience food shopping and for appropriate improvements to the local and strategic road network as required by the Local Highways and Transportation Authority.
The 'Chelmsford City Council Housing Scenario Test – Primary and Secondary Education December 2024' confirms that there is no need to provide a new secondary school on the site.
The Settlement Hierarchy is just one of several considerations for the Spatial Strategy, along with the Vision and Spatial Principles, and is considered to be a robust approach.

<u>Location 8 – Strategic Growth Site Policy 8 – North of Broomfield</u>

Key statistics:

Consultation point	**Total number of responses**
Strategic Growth Site Policy 8 – North of Broomfield	1

Summary of Representations – main issues and requested changes:

- Welcome the requirements for new or enhanced sport, leisure and recreational facilities and masterplanning principle to provide a coherent network of public open space, formal and informal sport, recreation and community space within the site. This approach is consistent with Government policy (Sport England PS25-88).

CCC Response
The support is noted.

Location 9 – Growth Site Policy 9a – Waltham Road Employment Area

Consultation point	**Total number of responses**
Growth Site Policy 9a – Waltham Road Employment Area	17

Summary of Representations – main issues and requested changes:

- Support the allocation which is a logical extension to the existing established employment area. It is in a sustainable location and can significantly contribute to employment provision (J Group and Landvest PS25-351)
- The use of 'around' 3,500sqm is supported but considered an underestimation of the allocation's potential (J Group and Landvest PS25-351)
- The policy should include Class E(g)(iii) (light industrial use) alongside B2 and B8 to ensure a sustainable employment development (J Group and Landvest PS25-351)
- The site could be expanded to include further land to the north, expanding the allocation to 3.5ha could deliver approximately 14,000sqm of employment floorspace (J Group and Landvest PS25-351)
- Support in principle but request the plan identifies Marriage Mill, Cranham Road as a new employment area (W & H Marriage & Sons Limited PSQ25-6060)
- The site falls within the Eastern 2 Wide Area Multilateration Network statutory safeguarding zone meaning any development or change of use will trigger statutory consultation with us to assess impacts the local air traffic management system. Usually this will be by virtue of the scale or height of a development, for example, developments 50m above ground level (Defence Infrastructure Organisation (DIO) PSQ25-6409)
- Object to the site expansion. The proposal does not address the likely increase and impacts of traffic on Waltham Road from other proposals and projects around Boreham or the safety risk to other road users on narrow country lanes. National Highway's Junction Assessment Report predicts that the by 2042 the junction of Waltham Road with the B1137 will be overcapacity at peak hours regardless of the A12 widening scheme. There are already large delays when the A12 is congested and the B1137 is a Designated

Emergency Diversion Route from the A12 (Boreham Parish Council PSQ25-3149)

- Traffic, especially slow-moving commercial traffic exiting the site would delay emergency vehicle responses and the site is not well served by public transport (Boreham Parish Council PSQ25-3149)
- Concerns it would generate additional traffic movements including HGV traffic through Boreham (already approaching capacity) on top of those already proposed due to the A12 widening scheme and the closure of Junction 20a. A travel plan will not promote alternatives to the use of private cars and is not enforceable. Currently most employees and users of the industrial estate arrive by motor vehicle (Boreham Conservation Society PSQ25-5255)
- The existing employment area is a bad example of town planning, an eyesore with larger industrial type operations and in an inappropriate location for employment space. The proposed buildings are not appropriate to the site and its setting and would be a considerable and unacceptable encroachment into open countryside (Boreham Conservation Society PSQ25-5255)
- The site will not provide jobs for local people, a survey of the existing employment area found only one person living in Boreham (Boreham Conservation Society PSQ25-5255)
- Existing cycle and walkways are poorly maintained (Boreham Conservation Society PSQ25-5255)
- Concern over the loss of prime agricultural land, increased flood risk and that the site lacks mains utilities (Boreham Conservation Society PSQ25-5255)
- Concerns over road safety for users of the adjacent bowling club and adverse impacts on the peace and tranquillity of the area (Boreham Bowling Club PSQ25-5736)
- National Highway's Junction Assessment Report is likely to underestimate traffic impacts on the junction of Waltham Road and Main Road
- Concerns over adverse impact on Essex Police Traffic Division at Boreham Airfield from additional traffic
- Concerns over additional traffic impacts on unsuitable local roads and at the junction off Main Road and pedestrian safety
- The policy is silent on traffic on Main Road
- There is no information on operational hours, traffic volumes and HGV numbers
- There is no travel plan and bus provision is limited
- Poor existing cycle and pedestrian walkways provision and inadequate space across the A12 bridge for a dedicated cycle route
- The current site is poorly managed with many operations spilling onto the access road creating hazards
- Concerns over landscape impacts from the new buildings and, noise and air pollution
- Concerns over loss of countryside and agricultural land
- Lack of mains utilities
- The site lies outside Boreham's DSB
- Concerns over a lack of a precise size or site boundary
- The site appears to be larger than needed.

CCC Response
The site allocation is supported by the plan evidence base including Strategic Flood Risk Assessments, Water Cycle Studies, Heritage Impact Assessment, Landscape Sensitivity and Capacity Study, Air Quality Assessment and traffic modelling.
Waltham Road Employment Area is a well-established site, and its expansion to include site 9a will provide further rural inward investment opportunities and also reflect the aspirations of national policy to support the sustainable growth and expansion of business in rural areas.
The site is proposed for expansion in the Focused Consultation Additional Sites Document to support increased housing requirements and boost employment floorspace supply. To provide flexibility, the range of employment uses on the site is proposed to be expanded to include Use Class E(g)(iii). These include a variety of industrial processes which may be suitable in residential areas without detriment to its amenity.
The site policy requires safe and convenient pedestrian and cycle links.
The development will be expected to promote the highest standards of design to minimise its impact. There must be no large-scale buildings near the northern boundary. Trees are to be retained and there needs to be new landscaping along the northern and western boundaries.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe. Transport Assessments will provide more detail on mitigation measures at planning application stage.
The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This is given in Appendix 2 and includes a review of representations received from Boreham Conservation Society. Essex Highways response has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform any proposed modifications to the Pre-Submission Local Plan.
Infrastructure necessary to support new development must include appropriate utility infrastructure.
The development will be expected to provide suitable measures to ensure that the amenity of nearby residents is not adversely affected such as noise attenuation measures and boundary screening.
To meet our development needs it is inevitable that some agricultural land will be used for development.
The site boundary is clearly defined on the Draft Policies Map.
The use of ‘around’ employment floorspace figures in specific site allocation policies allows for an appropriate degree of flexibility in provision.
Minor modifications will be proposed to ensure the development is designed in such a way that there is no impact on the operational or capability of nearby defence assets.

Location 14 – Ford End

Growth Site Policy 14b – Land South of Ford End Primary School

Key statistics:

Consultation point	Total number of responses
Growth Site Policy 14b – Land South of Ford End Primary School	9

Summary of Representations – main issues and requested changes:

- Support the allocation and for infrastructure requirements to be 'appropriate improvements as necessary' meaning they can be proportionate to the amount of housing on the site and not affect the viability of the development proposals coming forward (Dandara PSQ25-6297)
- The wider promoted site should be allocated for up to 50 dwellings to help deliver more community benefits (Dandara PSQ25-6297)
- The site allocation is supported. Welcome the Council's Heritage Impact Assessment and the inclusion of heritage criteria within the policy (Historic England PSQ25-5813)
- Support for the policy and would consider a higher capacity where for example, the development accords with the Parish Plan and Village Design Statement and delivers local highways improvements including traffic calming, speed restrictions and an average speed camera scheme through the village (Great Waltham Parish Council PSQ25-476)
- Unclear the reason for and the impact of a later site start date (2030/31 compared with 2029/30 in the Preferred Options) (Great Waltham Parish Council PSQ25-476)
- Support the proposal and the positive change it will bring to the local area such as ensuring the primary school remains open and a speed camera on Main Road B1008
- Para 7.330 should be amended to remove the reference to dropping-off pupils by car as this practice is not supported (Essex County Council PS25-229)
- Consider 50 homes to achieve more than the speed camera and to help pay for an Asset of Community Value
- Concerns over existing traffic and no crossing point - speed reduction measures would be necessary
- Concerns over pupil safety if the new homes would access the school from the front entrance
- Ford End is not a sustainable location and car dependent
- Concerns over highway safety impacts on houses opposite the site
- Dandara's road safety measures have already been rejected by Highways
- Suggest that the site promoter is not interested in residents' safety concerns
- Lack of school capacity
- Heritage impacts given the school is a non-designated heritage asset
- Loss of agricultural land

- Impact on neighbouring residential amenity including loss of light, privacy and air pollution.

CCC Response
The site allocation is supported by the plan evidence base including Strategic Landscape Sensitivity and Capacity Study, Air Quality Assessment and traffic modelling. The Small Sites Planning Briefs/Concept Framework 2024 (appended to the Submission Spatial Strategy and Strategic Sites Topic Paper) considers that there are no overriding site constraints which mean that the site is unsuitable or undeliverable.
The site is proposed for expansion in the Focused Consultation Additional Sites Document to support increased housing requirements.
The site is forecast to be complete in Years 2030/31 – 2034/35 to reflect the updated latest Housing Site Schedule. The Trajectory is updated annually, and the Pre-Submission Local Plan uses the latest available Housing Site Schedule (April 2024). Minor modifications will be proposed to the Trajectory to reflect the latest published Housing Site Schedule ahead of submission (April 2026).
Minor modifications will be proposed to para 7.330 to remove reference to a drop-off point for pupils at the school.
The site policy sets our development principles including access arrangements and infrastructure requirements including contributions towards education.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe. The reasoned justification recognises that speeding by vehicles on Main Road (B1008) is an issue and as such traffic calming should be provided as part of the development including speed reduction measures.
The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This is given in Appendix 2 and includes a review of representations received in respect of this site relating to highway safety. Essex Highways response has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform any proposed modifications to the Pre-Submission Local Plan.
The site policy requires appropriate active and sustainable travel connections to be provided within the site with links into the wider network, including the primary school. It also includes provision for appropriate improvements, as necessary, to the local and strategic road network. In addition, the development will provide a new parking area for the school adjacent to the site.
Ford End is a Service Settlement with a primary school and bus service making it suitable for small scale development. The allocation will help to support the services and facilities in the village and help to maintain a diverse housing supply.
The Council works closely with ECC as the Local Education Authority on the plan to ensure that education requirements are met.
The site policy requires the development to be set back from Main Road (B1008) and to restrict the height of new development to two-storey. Development should also be appropriate to the character of the area.
The school building has architectural interest and community value and is therefore considered to be a non-designated heritage asset. Development should avoid harm to its setting.

To meet our development needs it is inevitable that some agricultural land will be used for development.

Location 15 – Strategic Growth Site Policy 15 – Little Boyton Hall Farm Employment Area

Consultation point	Total number of responses
Strategic Growth Site Policy 15 – Little Boyton Hall Farm Employment Area	5

Summary of Representations – main issues and requested changes:

- Broadly support the site policy. The allocation is suitable, achievable and logical and there is demand for the additional employment land which will support the local economy. Development can be delivered in a manner which does not undermine the significance or setting of the Grade II Little Boyton Hall (CJH Farming Ltd PS25-288)
- Our Summary Landscape and Visual Appraisal for the site considers views from within the Chignal Parish area. This concludes that subject to careful design, the site could be developed without any intrinsic alteration of the landscape character or harming visual amenity (CJH Farming Ltd PS25-288)
- We welcome the Council's Heritage Impact Assessment and the inclusion of heritage criteria within the site policy. Overall, we support the site and consider it sound (Historic England PSQ25-5814)
- Support for the site allocation. Little Boyton Hall is a popular employment area with tenants, and many are looking to expand (Mr Christopher Philpot PSQ25-5334)
- There should be more flexibility to include also Use Class E(g)(i-ii) to save any ambiguity for future tenants (Mr Christopher Philpot PSQ25-5334)
- Clarity is required on the economic and environmental impact of this proposal, and how it would benefit the community. New job opportunities should be advertised within the parish first (Roxwell Parish Council PSQ25-5825)
- The A1060 is an unsafe road, and the speed limit should be extended beyond its current boundary at Boyton Hall to cover the junction with Vicarage Road (Roxwell Parish Council PSQ25-5825)
- Allocate Tarmac's Roxwell Quarry Former Plant Site as a Rural Employment Area (Tarmac PSQ25-6333).

CCC Response
The type of employment floorspace to be provided will help meet future needs as identified in the Employment Land Review 2024.
The site allocation is supported by the plan evidence base including a Landscape Sensitivity and Capacity Study 2024 and traffic modelling.
The Rural Employment Area notation applies to existing established and consolidated rural employment areas which is not the case for the Former Quarry Plant Site, Roxwell.

Strategic Policy S8 expects strategic scale planning applications (including this site allocation) to enter into an Employment and Skills Plan to provide employment and skills opportunities to benefit the local community. This may include apprenticeships, work experience, volunteering, careers information and training.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe. Transport Assessments will provide more detail on mitigation measures at planning application stage.

Growth Area 3 – South and East Chelmsford (paragraphs 7.340-7.348 and Figure 18)

Consultation point	**Total number of responses**
Growth Area 3 – South and East Chelmsford (Paragraphs 7.340-7.349 and Figure 18)	3

Summary of Representations – main issues and requested changes:

- Concern about increased traffic congestion and the burden on infrastructure that will be caused by a succession of proposed developments beyond the eastern boundary of Great Baddow (Great Baddow Parish Council PSQ25-4922)
- Traffic impact assessments have been conducted in isolation for the various developments rather than a comprehensive study of the cumulative impact of all new housing, industrial sites and growth from existing development (Great Baddow Parish Council PSQ25-4922)
- At the time of the adopted plan the A12 was regarded as the eastern boundary of Chelmsford's built-up area and would not be extended beyond that. Nothing has changed to consider this location for development now (Great Baddow Parish Council PSQ25-4922).

CCC Response
The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the current status of infrastructure across Chelmsford and identifies what new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources.
All Highways modelling to support the Local Plan has been carried out at a strategic level, considering all proposed growth in the adopted Local Plan, background growth to 2041, neighbouring authorities' growth, and all newly proposed development sites.
Although not allocated last time, the site was considered as a 'reasonable alternative' in the Plan making process. There are no overring reasons why this site cannot be allocated when considered against the current evidence base.

Location 16 – East Chelmsford

Strategic Growth Site Policy 16a – East Chelmsford Garden Community (Hammonds Farm)

Key statistics:

Consultation point	**Total number of responses**
Strategic Growth Site Policy 16a – East Chelmsford Garden Community (Hammonds Farm)	2,911

Summary of Representations – main issues and requested changes:

- Support the allocation of the site, which represents a deliverable development in a sustainable location afforded by its proximity to both existing and planned infrastructure (Wates Developments and Hammonds Estates LLP PS25-242)
- Supports the decision to meet part of the new housing requirement with a new sustainable community alongside the A12, within reach of the new Beaulieu rail station. It is a significantly better option than the alternative of more piecemeal development at several less sustainable locations (Broomfield Parish Council PSQ25-6495)

Legal Compliance

- The consultation portal is unsound, creating significant barriers to public participation and undermining the legitimacy of the consultation process (Langford and Ulting Parish Council PSQ25-736, Little Baddow Society PSQ25-3249)
- The consultation process was inadequate, lacking sufficient engagement with relevant stakeholders, and failing to provide accessible information to all
- Alternative submission options, such as email or paper form, were available, however the paper form is difficult to complete and unclear. Submitting via email is difficult in other ways disadvantaging those who struggle with complex forms and submitting via email the user risks having their objections ignored
- The unclear guidance and lack of transparency suggests the system is designed for procedural compliance rather than meaningful engagement, violating principles of fair public consultation
- The Local Plan is legally unsound and does not comply with the Town and Country Planning (Local Planning) (England) Regulations 2012, rendering it potentially unlawful and open to legal challenge. Specifically, during Regulation 18 which required local planning authorities to notify and invite representations from residents and stakeholders during plan preparation

Duty to Cooperate

- The reasoned justification relating to the submitted Minerals Resource Assessment undertaken for the site is an accurate reflection of the situation (Wates Developments and Hammonds Estates LLP PS25-267)
- The site lies within a Minerals Safeguarding Area. It is not yet known whether the site contains a viable minerals resource that would require extraction prior to development. This should be established before allocating the site and not at the planning application stage (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6163, PSQ25-6177, PSQ25-6173)
- The site lies within a Minerals Safeguarding Area, and development of the site will sterilise its potential for minerals workings (Boreham Conservation Society PSQ25-5257)
- A Minerals Assessment has not been done for the site, and mineral extraction and land restoration are likely to be required before homes can be built on site. This will severely delay the site (Croudace Homes PS25-362)
- If there are minerals on site, then the same argument for not developing further within the plan period at North East Chelmsford would be the case for this site
- The consultation does not comply with the Council's Local Development Scheme (LDS) or Statement of Community Involvement (SCI) as the necessary consultation was not undertaken as Maldon Town Council and Natural England were unaware of the Pre-Submission consultation
- The Council has failed in its legal duty to conduct a genuine, inclusive, and transparent public consultation process. The consultation was inadequate, misleading, and proved inaccessible to many residents who are not regular computer users, violating key principles of democratic planning which contravenes the Planning and Compulsory Purchase Act 2004, which emphasises the importance of community involvement in the planning process
- The Pre-Submission Local Plan is inconsistent with the NPPF, for example the NPPF emphasises sustainable development and effective use of land; however, the Local Plan proposes developments that may lead to environmental degradation and unsustainable land use
- Neighbourhood Plans for Sandon and Little Baddow have recently been "made" and are supposed to carry equal weight with any other part of the Local Plan. The proposals at this site cannot be considered as consistent with either of these Neighbourhood Plans
- The Council has failed in its legal Duty to Co-operate by neglecting to properly engage with neighbouring authorities on cross-border planning issues, making the plan legally unsound. Specifically, Maldon Town Council and Natural England were completely unaware of the Site (Little Baddow Society PSQ25-3249)
- There is no evidence that that key cross-boundary strategic matters, including housing allocations, infrastructure, and environmental considerations have been effectively addressed, breaching legal obligations under the Localism Act 2011. Without clear agreements and co-operative strategies, the Plan should not be approved

Soundness

Highways

- Bullets 4, 5 and 7 under the Movement and Access section, that seek to ensure new/enhanced routes are integrated with existing active travel networks to provide suitable connections to nearby settlements, employment and recreational opportunities are supported (Wates Developments and Hammonds Estates LLP PS25-249)
- Support for the proposed highway improvements necessary to support the development in bullet point 11 and the reasoned justification. Additional highways modelling undertaken by the site promotors supports the Council's Local Plan modelling (Wates Developments and Hammonds Estates LLP PS25-252)
- Although well developed, the National Highways A12 Junction 19 Chelmsford to J25 Marks Farm improvement scheme is not guaranteed to be delivered due to the uncertain political environment. Therefore, a Local Plan traffic modelling scenario was required where the scheme is either delayed or doesn't go ahead at all. The Local Plan traffic modelling has identified a number of locations on the Strategic Road Network which would come under pressure from increased traffic flows. Namely Junctions 17,18 and 19 on the A12. National Highways previously recommended these locations need a more detailed assessment to understand the scale and nature of the impacts, ideally using a micro simulation model and if necessary suitable mitigation measures found to manage the impact on the junctions and the A12. Third party microsimulation modelling work commenced in 2024 in consultation with National Highways, Essex Highways and CCC. National Highways agreed the base model including methodology and baseline data inputs and have since received the future scenario model (including traffic associated with the Chelmsford Local Plan). We are optimistic that a lot of the issues raised will be resolved before the Examination and would like to continue working closely with CCC with the aim of resolving these issues. As part of this work we will work to develop a greater understanding of the impact of the proposed development upon the A12 and the required mitigation which should go into the IDP (National Highways PSQ25-6447)
- The allocations in the Local Plan will increase the number of residents in proximity of the Strategic Road Network (SRN), in particular site 16a. It is likely that these locations will be impacted by noise pollution from the SRN and raise the potential for exceedances of air quality standards for which extraordinary measures in the form of permeant speed restriction may need to be considered. This could help with flow and may be required as this section of the A12 reaches capacity (National Highways PSQ25-6447)
- Several polices in the proposed Local Plan set out requirements for developments to reduce the impact on or improve local air quality that does not directly relate to the Strategic Road Network and what mitigation may be required. National Highways will continue to work proactively with CCC on these matters but would recommend a specific policy which identifies how air quality and noise impacts would be monitored and managed and what interventions may be required (National Highways PSQ25-6447)

- Concerns the site could significantly impact upon traffic flows onto the A12 having an impact on businesses within Maldon and the local road network around Maldon. It is requested that consideration is given to the impacts on the local road infrastructure (Maldon District Council PSQ25-4934)
- There are significant strategic highway works required to gain access to the site. This risks the timely delivery and viability of the site (Richborough PS25-178, Gladman Developments Ltd PSQ25-6320)
- The feasibility of delivering multiple routes across, under and over the A12, via a bridge does not appear to have been fully tested (Richborough PS25-178)
- The Councils Sustainable Accessibility Mapping Appraisal concluded that the site is the worst performing of the five approaches considered in the 2022 Issues and Options Consultation (Croudace Homes PS25-362)
- Disagree that the site has the potential for a “good level” of sustainable accessibility, subject to the provision of local amenities and sustainable travel infrastructure. The Cross-Parish Working Group has commissioned Stomor to review the Council’s evidence base on highways and transport matters. This shows there are other growth options available, that are more sustainable and accessible with regards to the existing urban area and where there are already established facilities and other infrastructure and utilities upon which to build and develop. The report concludes that without suitable mitigation (which has not been demonstrated), the allocation will result in an unacceptable impact on highway safety and the residual cumulative impact on the road network will be severe (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6163, PSQ25-6177, PSQ25-6174)
- The planned DCO widening of the A12 corridor, between Junction 19 and Junction 25 may not proceed as the Department for Transport (DfT) is currently reviewing the project and deciding whether to fund it. If it does not go ahead the site is likely to cause a severe impact on this part of the A12 corridor, which already experiences significant congestion and frequent accidents at peak times (Croudace Homes PS25-362, Gladman Developments Ltd PSQ25-6320, Boreham Conservation Society PSQ25-5257)
- Any improvements to the A12 corridor and junctions will take many years. There is no evidence to support the proposed delivery rates of the site without these improvements (Gladman Developments Ltd PSQ25-6320)
- The assumed 60% Modal Shift, to walking, cycling, or public transport, is unrealistic given the location of the site adjacent to the A12 and its distance from employment areas. With no assurance of ongoing and effective public transport provision the site is unsustainable (Croudace Homes PS25-362, Dandara Eastern PSQ25-6212)
- There is no justification or evidence to support 60% of trips taking the form of active and sustainable travel. This figure is overly ambitious and not realistic and if this figure is not achieved the impact on the surrounding highway network will be ‘severe’, contrary to the NPPF (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6163, PSQ25-6177, PSQ25-6174)
- The existing footpath underpass connecting to Chancellors Park would be upgraded to a cycle route but this is within flood zone 3 and would mean that

the community would be largely cut-off during flood events to those seeking to utilise active travel (Dandara Eastern PSQ25-6212)

- Traffic impact assessments have been conducted in isolation for different aspects of the development, rather than as a holistic study of the combined effect of all new housing, commercial sites, and background growth from existing development. There are already traffic issues in the area, and this will make things worse (Langford and Ulting Parish Council PSQ25-736)
- There is congestion on the A12 between Junctions 18 and 19 and on the A414 towards Danbury and Maldon. West of Maldon there is increasing development, the prospect of mineral extraction at Woodham Walter and even construction traffic from Bradwell Nuclear Power Station will impact on the A414. Unclear if the implications of these factors outside the Council area have been taken into consideration (Little Baddow Society PSQ25-3249, Chelmer Valley Landscape Group PSQ25-5141)
- The proposed reduction in car parking provision for homes on the site is concerning and will lead to parking problems for residents of the site and neighbouring communities
- Congestion and traffic noise on the A414 will worsen due to increased vehicles, lack of proper road expansion, and the addition of a new junction near the A12. The A414 is already over capacity, with frequent delays during peak hours. There is no clear plan or funding for mitigation
- Congestion on the A12 will worsen. There is no clear strategy for how the increased traffic on the A12 will be mitigated. The planned 'improvements' lack sufficient funding, design detail, or binding commitments from key infrastructure stakeholders
- The Council's evidence base identifies that development is likely to increase traffic volumes along rural routes through villages including Boreham, Little Baddow, Danbury and Sandon. It is likely that the existing rural lanes will become 'rat runs', to avoid queuing on the A12 and A414, and this could have many adverse consequences for the local highway network within and around these villages, and could also have negative effects in terms of the character and tranquillity of these small, historic settlements, and on the setting and character of the Protected Lanes and Conservation Areas within these areas (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6163, PSQ25-6177, PSQ25-6174, Boreham Conservation Society PSQ25-5257)
- The proposal will increase commuter travel times, cause severe congestion at key pinch points, and lead to greater rat-running through rural villages in the wider area and through the Chelmer Valley itself, of which no mitigation has been put forward in the Local Plan (Little Baddow Society PSQ25-3249, Woodham Walter Parish Council PSQ25-5834, Chelmer Valley Landscape Group PSQ25-5141, Boreham Conservation Society PSQ25-5257)
- The A12 at Junction 18 will not cope with the additional burden of traffic, especially considering further housing development approvals at Maldon (Woodham Walter Parish Council PSQ25-5834)
- The Plan accepts that there will need to be improvements to Junctions 18 and 19 of the A12, but there is no detail of what this will be or funding for it

- The outline planning application for 16b states that there will be tailbacks creating congestion at Junction 18, and this is without any consideration of the additional load from 16a and Location 3, or development from Maldon District
- Mitigation at Junction 19 is unclear, and additional traffic can also be expected here from development in Maldon District. Currently traffic backs up to the Lion Inn at peak times. There is no indication of where the funding for mitigation will come from. National Highways will not have funding given the recent budget cuts they have recently sustained which resulted in cancellation of other plans for enhancement of the A12
- Junction 19 will be unable to handle the additional traffic flows (Chelmer Valley Landscape Group PSQ25-5141)

Heritage

- The Council's HIAs demonstrates that measures can be put in place to appropriately address the potential impacts identified and that the Council has taken a balanced approach to managing development while safeguarding the historic environment. On the basis mitigation and enhancement measures outlined in the Council's HIAs are implemented the site is considered suitable for allocation (Historic England PSQ25-5810)
- The provision of landscaping/conservation buffers in the policy and policies map, and the requirement for proposals to be informed by the submission of a more detailed Heritage Impact Assessment and an Archaeological Desk Based Assessment to guide the site's masterplanning is welcomed (Historic England PSQ25-5810)
- Supports the Garden Community having a landscape led setting. An updated Landscape and Visual Baseline Appraisal has been carried out to appraise the objectives relating to landscape and the natural environment defined in the site policy. A Green Infrastructure Strategy is also submitted. These support that the site is suitable for development from a landscape and visual perspective, and that a high quality development in a landscape setting, working in sympathy with local landscape and heritage assets, is achievable and deliverable (Wates Developments and Hammonds Estates LLP PS25-253)
- The requirement for a "sensitively designed new bridge to mitigate harm" in relation to the Chelmer and Blackwater Navigation Conservation Area is supported and a Bridge Option appraisal of the three proposed bridge structures demonstrates that this is achievable (Wates Developments and Hammonds Estates LLP PS25-254)
- The proposal will have substantial harm to the significance of the Chelmer and Blackwater Navigation Conservation Area and will have a moderate level of harm to the significance of a large number of listed buildings, Protected Lanes, non-designated heritage assets and Registered Parks and Gardens. The high impact has not been properly justified in the plan, and the evidence base has failed to properly consider other, less harmful, options for development (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6163, PSQ25-6177, PSQ25-6164)
- There will be substantial harm to the significance of the Chelmer and Blackwater Navigation Conservation Area. It is unclear how the proposed access road over the waterway to Junction 19 of the A12 can be achieved

while preserving and enhancing the Conservation Area. The addition of the requirement for the bridge to be sensitively designed is not sufficient to mitigate the harm (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6163, PSQ25-6177, PSQ25-6164)

- The Council's Heritage Impact Assessment acknowledges that substantial harm will occur from the proposed development, which is contrary to the NPPF (CPRE Essex PSQ25-6147)
- The area contains evidence of Roman occupation. Archaeological investigations have revealed significant Roman and Iron Age activity, including burial sites and artefacts
- Aerial photography reveals historical structures that may require preservation. Recent surveys indicate the presence of subsurface remains of historical buildings and earthworks. Development without detailed archaeological assessments risks permanent destruction of unrecorded heritage sites (Langford and Ulting Parish Council PSQ25-736)
- A full field archaeology report of the site has not been undertaken, yet the desk-based archaeology report for site 16b identifies "enhanced potential for prehistoric activity". The site has a known history of Roman importance. There are also many examples of more recent heritage assets. Para 207 of the NPPF requires a full field evaluation to be undertaken
- The extent of the archaeology on site is unknown, and until an additional evaluation is undertaken, the Council does not know how much, or which parts of the site will be unavailable for development. The Local Plan is therefore based upon an incomplete evidence base, and until further archaeological investigation is undertaken to understand the extent of the constraints, it cannot be assumed that the site can accommodate the scale of development proposed (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6163, PSQ25-6177, PSQ25-6164)
- Policy DM15 states that planning permission will only be granted for development affecting archaeological sites providing the sites and their settings are protected, enhanced and preserved. There is no archaeology field report or evidence of how such mitigation can be achieved on site

Landscape and ecology

- Support for the policy requirements and reasoned justification to provide necessary mitigation to address the cumulative recreational pressure on SSSIs in proximity to the site and to conserve and enhance biodiversity and avoid adverse effects on nearby woodlands and wildlife sites. It should be noted that this mitigation will need to be considered separately from any mitigation measures designed to reduce impacts on internationally designated sites (Natural England PSQ25-6253)
- Support the requirement to provide high quality semi-natural greenspace of at least 12ha to meet Natural England's 8ha/1000 new population metric and minimum circular dog-walking route on or off site of 2.3km which make use of existing Public Rights of Way and/or highways (para 7.377). It is noted that mitigation for impacts on designated sites will not be able to count towards biodiversity net gain but can contribute to no net loss (Natural England PSQ25-6253)

- The development will lead to significant landscape and visual impacts in the Chelmer Valley and on landscape character generally, some of which are protected by the Boreham VDS, potentially damaging to the ecology and biodiversity of the area (CPRE Essex PSQ25-6147, Croudace Homes PS25-362, Gladman Developments Ltd PSQ25-6320, Chelmer Valley Landscape Group PSQ25-5141, Boreham Conservation Society PSQ25-5257)
- The site conflicts with NPPF paras 174 and 176, which require planning decisions to protect and enhance valued landscapes and to give “great weight” to conserving scenic beauty (CPRE Essex PSQ25-6147)
- Based on both the Amec Foster Wheeler 2017 Landscape Sensitivity and Capacity Assessment and the independent Landscape Character Assessment undertaken by the Parish Councils, the site is an area of high landscape sensitivity, where development cannot be accommodated without irrevocable harm to the distinct and ancient landscape character of the area. The Council’s evidence base acknowledges that the land parcel has a ‘low to medium capacity’ to accommodate development and that development would be “intrusive and difficult to mitigate”. The development will result in significant adverse impacts on the landscape setting and the distinctive countryside in the Danbury Ridge area. The Council has failed to demonstrate how these impacts can be adequately mitigated, or how the landscape will be conserved and enhanced (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6163, PSQ25-6177, PSQ25-6153, CPRE Essex PSQ25-6147)
- There will be a substantial loss of natural habitat, as a result of the urbanisation and development of the land. This should not be under-estimated and is a major harmful impact of the proposed allocation, which is not considered in detail in the Council’s evidence base (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6163, PSQ25-6177, PSQ25-6170)
- The site involves the loss of high-grade agricultural land which should be protected for self-sufficiency and food security for the country (CPRE Essex PSQ25-6147, Boreham Conservation Society PSQ25-5257)
- The Agricultural Land Classification Report submitted with the Outline Planning Application for development of 16b shows that land as being Grade 3a, so there is every reason to believe that the whole of the 16a site is also Grade 3a. An Agricultural Land Classification Report for site 16a is needed before a decision in made on the site’s inclusion in the Plan. Alternative sites on lower grade land have not been properly considered (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6163, PSQ25-6177, PSQ25-6168, Langford and Ulting Parish Council PSQ25-736, Little Baddow Society PSQ25-3249)
- The Local Plan does not take in to account the exceptional wildlife, in the Hammonds Farm area, in addition to the farmland it is bordered by the Essex Wildlife Trust, owned and managed Water Hall Meadows and Chelmer Valley Conservation Area. Detailed local surveys of sites have not been carried out (Little Baddow Society PSQ25-3249)
- The site consists almost entirely of undeveloped land, rich with trees and other habitat, and it is unclear how strategic development of the land could achieve any uplift in biodiversity, let alone a 20% net gain, especially given the

quantum of built development proposed on the land. If the biodiversity impact needs to be mitigated off-site, or through the purchase of statutory credits, this will represent a major loss of biodiversity on site, with consequences for the multitude of species that currently use the valued landscape. Moreover, basing the proposed mitigation on a standard metric / calculation, fails to take into account the rich diversity of established, natural habitat that already exists on the site, and the number and range of species that will actually be displaced by the development proposed by the allocation (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6163, PSQ25-6177, PSQ25-6170)

- The site will result in highly damaging impacts on rare and irreplaceable habitats and vulnerable protected species at designated sites in the area, namely Blakes Wood and Lingwood Common SSSI, Woodham Walter Common SSSI, Waterhall Meadows Local Wildlife Site/Essex Wildlife Trust nature reserve, Long Spring Wood Local Wildlife Site, Hall Wood Local Wildlife Site, Old Hare Wood Local Wildlife Site (Essex Wildlife Trust PSQ25-5062)
- Essex Wildlife Trust has been working in the area to create green corridors in Danbury and Little Baddow parishes to encourage wildlife. The development will impact negatively on this effort (CPRE Essex PSQ25-6147, Boreham Conservation Society PSQ25-5257)
- The increase in disturbance (noise, lighting, littering, cat predation) and recreational impacts resulting from the development, a few metres away from the Waterhall Meadows nature reserve boundary, will destroy the ecological integrity of this site, and most of its rare and special features will be permanently lost due to disturbance, nitrogen enrichment from dog waste, trampling of the vegetation and soil compaction and erosion (Essex Wildlife Trust PSQ25-5062)
- The site would result in a significant increased visitor pressure to the Danbury Ridge woodland SSSIs, resulting in an increase in impacts such as the trampling of ground flora, soil erosion, nutrient enrichment from dog waste and increased illegal behaviours such as littering, and the general disturbance to wildlife (Essex Wildlife Trust PSQ25-5062)
- The site lies within the Impact Risk Zone (IRZ) for Blakes Wood and Lingwood Common Site of Special Scientific Interest (SSSI) and Woodham Walter Common SSSI (Essex Wildlife Trust PSQ25-5062)
- The proposed ‘new’ Country Park will essentially follow the Chelmer and Blackwater Navigation corridor and encompass part of the site that is at high risk of flooding. The river corridor already functions as a popular informal and natural ‘country park’ and is well managed by Essex Waterways. The proposal will add no benefit in this respect but has the potential to cause substantial harm to the existing parkland, through the development of the Eastern Orbital Route, which will directly bisect the area. The new route will introduce a major transportation bridge across the canal, with associated main road infrastructure, and will drive substantial traffic through the area (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-616, PSQ25-6177, PSQ25-6172)
- The establishment of a new country park on the western boundary of the site will not be sufficient to mitigate and compensate for the impacts of greatly

increased visitor pressure on the SSSIs of the Danbury Ridge (Essex Wildlife Trust PSQ25-5062)

- It will damage an important cultural landscape which is an asset to the area and of national significance as explored by J. A. Baker (Chelmer Valley Landscape Group PSQ25-5141)
- It would have an adverse impact on the landscape of the Chelmer valley in general, with a particular adverse impact on the Chelmer and Blackwater Navigation Conservation Area (Chelmer Valley Landscape Group PSQ25-5141)
- The site will negatively impact local protected sites such as Blakes Wood and Waterhall Meadows, through increased pollution, light intrusion, and footfall. These sites provide vital habitats for diverse flora and fauna, including rare species
- The site has ancient woodlands, nearby SSSIs, and the Chelmer and Blackwater Navigation Conservation Area within it. It has very extensive animal and plant wildlife within and adjacent to it. Adding 3000+ houses and all of the people living in them will put unsustainable pressure on this deeply rural area
- The proposal would devastate a rural landscape and the high levels of biodiversity currently on site
- The plan states a 20% net biodiversity net gain should be achieved on site yet provides no explanation of how this will be achieved, especially in an area already rich in biodiversity. How can a site with existing high ecological value see a genuine net gain when vast areas of farmland, mature trees, and established habitats are lost to development
- The way biodiversity net gain is calculated does not genuinely enhance biodiversity. Loopholes can be exploited by developers. For instance, if a site currently has ten mature trees of two species and all are felled, replacing them with just four trees of different species is classified as a 100% biodiversity net-gain. This is a flawed metric which allows destruction under the guise of environmental improvement. Simply planting a few new flower species that were not previously present on site is treated as a net gain, regardless of the ecological damage done
- There should be a detailed plan showing how biodiversity net-gain will be achieved in this already ecologically sensitive area at this stage
- Alternative sites, such as further development at North East Chelmsford, have better transport links and less impact on the environment and biodiversity
- The proposal would be contrary to Policy DM8 in the Plan as the proposals would harm the intrinsic character, appearance and beauty of the area. The site is a beautiful deeply rural area, with wide open fields, surrounded by waterways, a Conservation Valley, ancient woodlands and practically no buildings. Placing 3000+ houses and industrial buildings of considerable height would be contrary to Policy DM8
- The site will affect the area's attractions for residents and visitors who come to enjoy the woodlands and miles of footpaths with views over the valley and along the Navigation towpath. The pressure on these areas (and on Danbury Lakes) from new development will become significant (CPRE Essex PSQ25-6147, Chelmer Valley Landscape Group PSQ25-5141)

Flood Risk

- The site includes substantial areas of land within Flood Zones 2 & 3 and is in very close proximity to existing waterbodies (Croudace Homes PS25-362)
- The evidence base points to a significant level of flood risk on the proposed site, particularly from reservoirs, and from fluvial flooding along the access route. The implications for the new community and the surrounding areas have not been properly considered, and alternative options have not been fully explored. Flood issues have essentially been put 'on hold', for consideration when the site comes forward, and this is not a rational or justified strategic approach, and is contrary to the requirements of the NPPF (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6163, PSQ25-6177, PSQ25-6167)
- The development site abuts the Chelmer and Blackwater valley. Flood risk mapping shows that parts of the proposed site regularly flood, particularly after heavy rainfall. Without substantial flood defences, development will exacerbate runoff into vulnerable areas downstream
- Climate change is increasing the severity of flood events, yet the Plan does not account for this risk. Existing flood models used in the Plan fail to factor in increased climate-driven rainfall and surface water risks. New housing in a flood-prone area increases risks to property, infrastructure, and emergency response capabilities
- Flooding has always been a problem at Hammonds and every Winter, including 2024/2025, this is increasing, inevitably with the impact of Climate Change the situation will worsen (Little Baddow Society PSQ25-3249, Boreham Conservation Society PSQ25-5257)
- Building on the site will alter water runoff patterns, increasing the risk of flooding in surrounding areas. Paving over permeable land will increase surface water runoff, overwhelming local drainage systems. The risk of downstream flooding in Boreham, Hatfield Peverel, Langford, Ulting and Maldon will rise significantly because of this development (Langford and Ulting Parish Council PSQ25-736, Boreham Conservation Society PSQ25-5257)
- The development will exacerbate flooding in the Chelmer valley, and it is not clear how sewage and wastewater from the development will be effectively dealt with. There is clearly a danger that increased flooding and waste-water discharge from a major housing development will adversely affect water quality and biodiversity in the Chelmer and its tributaries (Chelmer Valley Landscape Group PSQ25-5141)

Infrastructure

- Support for the expanded policy wording requiring the proposed development to prepare a strategy for responding to the National Grid Electricity Transmission plc overhead transmission lines within the site (National Grid Electricity Transmission PSQ25-6237)
- Support the provision of pedestrian, cycleway and bridleways within the site, the provision of a coherent network of public open space, formal and informal sport, recreation and community space, and the provision of, or making

financial contributions to, new or enhanced sport, leisure and recreation facilities (Sport England PS25-89)

- Recognition of opportunities for dual use sports facilities within the new secondary school is welcomed and justified by the Council's new sports evidence base (Sport England PS25-89)
- The timing of infrastructure will be critical to ensure that trips are not made offsite in initial phases, and the infrastructure does not come at a cost to overall affordable housing delivery (Gladman Developments Ltd PSQ25-6320)
- At this stage there is no evidence to suggest that the required level of infrastructure, services and amenities could feasibly or viably accommodate such a large increase in the number of houses and residents (Richborough PS25-178)
- The amount of infrastructure required will be complex to design, agree, secure, fund and deliver, risking delays to the viability and delivery timeframes of the site (Bellway Homes Ltd (Essex) PSQ25-6361, PSQ25-6389, Dandara Eastern PSQ25-6211, Hill Residential Ltd PSQ25-3146)
- Local facilities, such as existing schools, doctors, hospitals, dentists, open space will be overwhelmed by the additional housing (Woodham Walter Parish Council PSQ25-5834)

Other

- At the time of the adopted plan the A12 was regarded as the eastern boundary of Chelmsford's built-up area and would not be extended beyond that. Nothing has changed to consider this location for development now (Croudace Homes PS25-362, Boreham Conservation Society PSQ25-5257)
- The developable site area has been reduced but the number of homes has not, even though the site's capacity was initially considered to be lower at the Issues and Options stage (Bellway Homes Ltd (Essex) PSQ25-6361, PSQ25-6389)
- Developing beyond the A12 boundary sets a precedent for further development in the future on areas of land which are sensitive landscapes
- Other options, such as further development at North East Chelmsford, have not been properly considered. The Issues and Options consultation saw five options, all of which saw an additional 3,000 homes in North East Chelmsford. When the Council was ahead of the housing target numbers North East Chelmsford was dropped and Location 16 taken forward instead
- North Chelmsford is an already urbanised area, with little in terms of landscape and wildlife of any interest. Meanwhile in Little Baddow and Danbury we have a mix of rural, good quality farmland and woodlands that are managed and preserved by The National Trust and Essex Wildlife Trust. The plan will destroy the attractiveness of the area and put unsustainable pressure on the wildlife in the area. It has not been properly justified why North East Chelmsford is not being included for further development instead of Location 16
- The site is in multiple ownerships and therefore constraints associated with land values and timely delivery where existing uses need to be stopped, will impact the ability to start timing construction (Richborough PS25-178)

- The site will result in a series of adverse impacts, many of which will result in a very high level of harm, and are why the land was not allocated for development in the current adopted Local Plan. Nothing has changed since then to support the site (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6163, PSQ25-6177, PSQ25-6176)
- Other land would be more suitable for such development and other reasonable alternatives have not been fully identified or assessed (J & T Wardrop and the Wardrop Trust PS25-114, Richborough PS25-178, Croudace Homes PS25-362, Dandara Eastern PSQ25-6212, Gladman Developments Ltd PSQ25-6320, Bellway Homes Ltd (Essex) PSQ25-6361, PSQ25-6389, CPRE Essex PSQ25-6147, Boreham Conservation Society PSQ25-5257)
- The site is unsustainable as it is too detached from Chelmsford to be considered as an urban extension but too close to be a new settlement (Croudace Homes PS25-362, Dandara Eastern PSQ25-6212)

Changes requested

Amount and type of development

- The amount and type of development and the delivery timeframe is supported. The tenure, type and mix of the housing provision across all site allocations will be determined by Policies DM1 and DM2. The content mix of these policies is broadly supported but consider there is an opportunity to deliver a broader mix of tenures and types on site, such as Build to Rent, intermediate rent, co-living, older persons and keyworker housing which are not reflected in the Local Plan Review's development management policies. Each of these tenures comes with its own optimal unit mix, so this could require the ability to depart from the policy mix. Propose that additional wording be added to invite consideration of a bespoke and broader housing mix on this site to the reasoned justification (Wates Developments and Hammonds Estates LLP PS25-245)
- Support the provision of two Gypsy and Traveller sites but consider the additional 13 Travelling Showpeople plots has been unjustifiably transferred from site 6 North East Chelmsford since the Regulation 18 consultation. The addition of this requirement to Site 16a does not reflect the respective scales of the two Garden Community allocations; it does not distribute needs appropriately across the district; and it will be challenging to accommodate at Site 16a in tandem with the proposed Gypsy and Traveller provision. The requirement for 13 Travelling Showpeople plots should be removed from this site policy and reinstated at site 6 (Wates Developments and Hammonds Estates LLP PS25-247)

Movement and Access

- The requirement to 'Provide Bus Based Rapid Transit Infrastructure' and the associated text in the reasoned justification should be expanded so as not to pre-judge the nature of the rapid transit measures that will be most suitable for the site, at this stage. The wording should be broadened to enable the appropriate strategy to be determined to respond to prevailing circumstances,

and through subsequent planning stages (Wates Developments and Hammonds Estates LLP PS25-251)

Historic and Natural Environment

- Bullet points 3, 4, 5, 6, 7, 8 and 9 in the Historic and Natural Environment section each include a requirement to preserve, enhance or retain the significance of particular heritage assets. This is considered a binary approach, which are not fully consistent with the NPPF, or with Council's draft Policies DM13, DM14 and DM15, which are themselves in line with the NPPF's heritage tests. These bullets could either be removed entirely, as the issue is covered by the Council's development management policies, or it should be clear that the assessment of these assets' treatment will be governed by draft Policies DM13, DM14 and DM15 (Wates Developments and Hammonds Estates LLP PS25-254)
- Bullet point 5 under Historic and Natural Environment includes a requirement to preserve and where appropriate enhance the "listed buildings, structures and setting" of a range of listed heritage assets. This part of the policy is not accurate, as only one of the quoted heritage assets (the Grade II listed Hammonds Farmhouse) physically falls within the allocation boundary. In relation to the other 14 assets quoted, the only element the allocation will have control over is the "setting" where it overlaps with the allocation. The wording should be adjusted (Wates Developments and Hammonds Estates LLP PS25-254)
- The requirement to retain the significance of Graces Walk and Hurrells Lane is supported, but there does not appear to be evidence that buffers should be either "substantial" or "extensive", and consider that this pre-judges the outcome of the masterplan process, which is acknowledged to be the appropriate stage to establish the site's detailed preservation and enhancement principles. A 'substantial buffer' into the heart of the masterplan would cause safety issues from a lack of overlooking and lighting, and unhelpfully divide the land uses such as education, employment and housing, leading to residents opting to use cars for short journeys rather than by bike or on foot. It also unduly sacrifices development land which could be contributing to meeting housing need (Wates Developments and Hammonds Estates LLP PS25-254)
- Add supporting text to clarify that proposals should adhere to the recommendations of the Council's Heritage Impact Assessment for the site (Historic England PSQ25-5810)
- Move the second heritage bullet ("Prepare a detailed Heritage Impact Assessment") to the top and reword it to emphasise that the assessment should inform both positive placemaking and the site's masterplanning (Historic England PSQ25-5810)
- Welcome the fifth heritage bullet, particularly the reference to farmsteads and landscape buffers to protect settings. However, "landscape buffers" may suggest a tree belt, whereas open space or breathing space around these assets is also important. The wording should be amended to clarify this (Historic England PSQ25-5810)
- The bullet point relating to the area to the east of Sandon Brook, which is notated as space for "Recreation/SuDS/Biodiversity", should be expanded to

allow for solar/appropriate renewable energy uses in addition to the uses listed (Wates Developments and Hammonds Estates LLP PS25-256)

- Support the allocation of space for future recreation, SuDS, and biodiversity to the east of the site, but consider that the policy should be amended to make it clear that formal sports provision, built development, or floodlighting in this area is not suitable in this area (Historic England PSQ25-5810)
- Additional landscaping should be incorporated at the northern end of the site, particularly around the Grade I listed Church of St Mary the Virgin and the Grade II listed Little Baddow Hall, to reinforce their setting and help mitigate visual impacts of new development (Historic England PSQ25-5810)
- The requirement to undertake an Archaeological Assessment and conserve existing archaeological features could be interpreted to imply that all archaeological remains found within the site would be of such a high level of significance that they would all warrant retention. The Archaeological and Heritage Appraisal submitted shows no current evidence that demonstrates any remains on site are of such a high level of significance that such mitigation is warranted. The requirement should be amended or removed and such matters dealt with by Policy DM15 (Wates Developments and Hammonds Estates LLP PS25-258)
- Support the requirement to provide necessary mitigation in relation to cumulative recreational pressure on local SSSIs. However, the reasoned justification refers to providing semi-natural greenspace to 'meet Natural England's 8ha/1000 new population metric and minimum circular dog-walking route on or off site of 2.3km'. If this scale of mitigation is to be expected in relation to the local SSSIs, the area provided must be able to double up as Suitable Alternative Natural Greenspace (SANG) if such is required for potential recreational impacts on the Blackwater Estuary SPA (Policy DM16). Additional wording should be added setting this out (Wates Developments and Hammonds Estates LLP PS25-257)
- Taken as a whole the mosaic of habitats across Danbury Ridge is an important landscape for wildlife. The site should include the requirement to undertake a SSSI Impact Assessment, and the reasoned justification text requiring developers to work closely with local stakeholders should be moved into the policy itself (National Trust PS25-176)
- The site could indirectly impact the SSSIs through cumulative recreational pressure without appropriate mitigation measures. Impacts on the SSSIs and Ancient Woodlands should be assessed at the Local Plan stage and scale, rather than for individual planning applications, so that cumulative impacts for the plan period can be adequately assessed and appropriate mitigation secured (National Trust PS25-176)
- Broadly support the application of a higher policy target of 20% for biodiversity net gain. Early calculations indicate that this target would be achievable. The reasoned justification references 'subject to site constraints'. This is interpreted as 20% specifically limited to what is practically deliverable onsite and not the expectation that offsite provision or credit top ups could be sought to reach the higher target value of 20%, as having to buy credits off site could hamper viability. The policy and reasoned justification should be amended to state this requirement should be capped at what can be practically delivered onsite (Wates Developments and Hammonds Estates LLP PS25-242)

Site infrastructure requirements

- Reference should be added to the requirements and reasoned justification relating to education provision being proportionate to pupil yield generated from the development, so that its delivery and funding at the time allows for Section 106 contributions from other developments locally to contribute as required (Wates Developments and Hammonds Estates LLP PS25-260)
- To ensure the education provision meets the identified need created by the site, and reflects the appropriate range of delivery scenarios, it is considered necessary to extend the reasoned justification to reflect the option to deliver the school directly (Wates Developments and Hammonds Estates LLP PS25-262)
- Strongly support any SEND provision within the site and request consideration is given to changing one of the schools on the site to a SEND school or making provision for an additional SEND school on the site (Maldon District Council PSQ25-4931)
- Add an additional bullet under ‘Site infrastructure requirements’ in line with the ECC Developers’ Guide to read: Financial contributions to primary, secondary, early years education and childcare, including SEND education as required by the Local Education Authority (Essex County Council PS25-233)
- Reasoned Justification should include reference to a safe traffic free environment around school pedestrian entrances being provided, ensuring access for emergency vehicles only (Essex County Council PS25-231)
- Primary healthcare provision at the site is supported, but the requirement in relation to healthcare provision should be limited to primary healthcare; there is no justification for strategic health needs to be met via planning obligations. The new requirement for facilities to support police, ambulance, fire and rescue facilities should also be removed as it is too broad and needs to be specific and evidenced (Wates Developments and Hammonds Estates LLP PS25-260)
- Support the section on stewardship but suggest a draft business plan is sufficient to be provided as part of the planning application (Wates Developments and Hammonds Estates LLP PS25-266)
- The proposed link road to A12 Junction 19 will be elevated above the flood plain and its embankments will slow down discharge of surface water increasing the risks of flooding up stream, it will split any proposed development in two, and compromise the views to and from the Listed Boreham House, and its separately listed grounds (Boreham Conservation Society PSQ25-5257)

Other

- The upper limit placed on the size of a proposed convenience store, as 500sqm should be removed as a larger food store is expected to be needed for the purpose of supporting internal trips within the garden community and minimising vehicle trips offsite (Wates Developments and Hammonds Estates LLP PS25-260)
- Reference to the planning and design of development to be required to encourage healthy and active lifestyles in line with the Active Design guidance

is particularly welcomed. However, reference to Public Health England should be removed from paragraph 7.361 to ensure that the plan is accurate as Public Health England no longer exists (Sport England PS25-89)

- For consistency across the Local Plan the site policy should be amended to state that the masterplan must be in place prior to the determination of any planning application, as is the case for other strategic sites (Wates Developments and Hammonds Estates LLP PS25-269)
- There should be a requirement to utilise the potential of the Chelmer & Blackwater Navigation for recreational use for the benefit of the development and its proposed Country Park, including consideration of Chelmsford Canoe Club (Essex Waterways Ltd PSQ25-5218, Chelmsford Canoe Club PS25-255)
- There should be a requirement to utilise, link and provide financial contributions to the proposed Visitor Centre at Sandford Mill (Essex Waterways Ltd PSQ25-5218)
- It would improve clarity if the reasoned justification were amended to include specific reference to flood risk management infrastructure to reiterate the requirement for financial contributions towards CFRPP as set out in the Council's Level 2 SFRA (Environment Agency PSQ25-6289).

CCC Response
Legal compliance and Duty to Cooperate
The consultation followed CCC's adopted Statement of Community Involvement (SCI) and Local Development Scheme (LDS).
In accordance with the Council's SCI, the consultation was fully accessible to all, with paper and electronic documentation being available to all, and in person drop in events for all to attend.
The 'Pre-Submission (Regulation 19) Statement of representation procedure and statement on availability of proposed submission documents for inspection' is fully transparent in what the consultation covered, where to view the documents, and how to make comments, as well as how to contact the Council if they required assistance. The statement covered the following to assist anyone in making their comments: • PART 1 – What is a Regulation 19 Consultation • PART 2 – Legal Compliance and Duty to Co-operate • PART 3 – Soundness • PART 4 – Where can I view the consultation documents? • PART 5 – How can I comment? • PART 6 – Appearing at Independent Examination • PART 7 – What will happen with my representation? • PART 8 – Statement on availability of proposed submission documents for inspection • PART 9 – Other consultations
The consultation portal is only one means of submitting representations. Representations made by email or post are inputting into the consultation portal by the Council and carry the same weight as those submitted via the consultation portal.
Detailed, step-by-step guidance for using the consultation portal was published specifically to guide users on how to make comments on the events for this consultation.

The two Regulation 18 consultations were fully compliant with the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended), with all relevant bodies being correctly notified of the consultations. Full details of those consulted are set out in the following documents: • Issues and Options 'You Said We Did' Feedback Report (May 2024) • Preferred Options 'You Said We Did' Feedback Report (February 2025)
The Pre-Submission Regulation 19 consultation was fully compliant with the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended), with all relevant bodies being correctly notified of the consultations. Full details of those consulted are set out in Appendix 1 to this report.
Natural England have been fully engaged throughout the Local Plan process resulting in a Statement of Common Ground being agreed with the Council in December 2024 (SOCG014 refers).
In accordance with the Duty to Co-operate (in place at the time), the Council has engaged with all neighbouring Local Authorities, including Maldon District Council, and identified any Strategic matters to be considered through the Local Plan process. An updated Duty to Co-operate Strategy was published in January 2022 (DTC003) with the most recent Duty to Co-operate Position Statement, November 2025 (DTC005) setting out the latest update on the activities undertaken by the Council in respect to the Duty to Co-operate on the Review of the adopted Local Plan. Further evidence of cooperation is contained in Statements of Common Ground (SOCG).
Neighbouring Local Authorities who have an adjoining boundary with CCC were required to be consulted under the Duty to Co-operate (in place at the time). Neighbouring Parish/Town Councils were required to be consulted at each stage of the Local Plan, but not as part of the Duty to Co-operate. Maldon Town Council is a Parish/Town level Council which is located within Maldon District and therefore does not comprise a Duty to Co-operate body. As the Town Council does not have a boundary with CCC there is no requirement to directly consult Maldon Town Council. Maldon District Council, with Maldon Town Council within its administrative area, is a Duty to Co-operate body which the Council have fully engaged with, and an updated Statement of Common Ground was agreed with the Council in 2026 (SOCG010 refers).
Collectively the Local Plan evidence supports the site allocation, and the site policy allows for appropriate mitigation and infrastructure to be secured where necessary, resulting in sustainable development, consistent with the NPPF.
A Minerals Recourse Assessment (MRA) has been carried out and considered by the Essex County Council, as the Minerals Planning Authority. They have acknowledged that working of the full mineral deposit would not be compatible with the proposed non-mineral development. However, the MRA does indicate that there is a workable mineral resource that would be sterilised by the development. Any planning application will need to demonstrate that the need for the built development is such that it outweighs the sterilisation of the mineral resource.
The minerals siltation in North East Chelmsford differs as that site has an extant planning permission for mineral extraction. The minerals must therefore be exacted before any other form of development can take place on the site. There is no minerals extraction permission for this proposed site.

Site allocations are strategic matters for the Local Plan, but where applicable the made Neighbourhood Plans include detailed design and other guidance which can influence future detailed development proposals and planning applications.
Amount and type of development
For consistency across the Local Plan the site policy has been amended to state that the masterplan must be in place prior to the determination of any planning application, as is the case for other strategic sites.
The requirement for 13 Travelling Showpeople plots is required on this site as Strategic Growth Site 6 has seen its Travelling Showpeople provision replaced with additional Gypsy and Traveller provision. The latest GTAA has additional Travelling Showpeople requirements and as one of the largest strategic site allocations in the Plan 16a is required to make this provision.
No need to expand Reasoned Justification to cover wider prescribed tenures as paragraph 7.357 covers this with standard text relation to size and type of dwellings, which is used consistently across the Plan and allows for a variety of types/tenures, where a need can be demonstrated.
Restricting the size of a main unit for convenience food shopping is considered an appropriate industry standard which would not lead to an adverse impact on the City Centre and is consistent across the Plan. Proposals over 500sqm would be required to undertake an impact assessment in accordance with Strategic Policy S12 in line with requirements of the NPPF.
Highways
The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This is given in Appendix 2 and includes a review of representations received from Walshingham Planning on behalf of Little Baddow, Sandon, Boreham & Danbury Parish Councils, Wates Developments and Hammonds Farm, Gladman Developments Ltd, Maldon District Council, and Boreham Parish Council. Essex Highways response has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform any proposed modifications to the Pre-Submission Local Plan.
There is no proposal to reduce the amount of car parking for this site. The site will need to comply with the same parking standards as any other site, as out in Policy DM27.
Reference to an ‘unimpeded’ route for rapid transit bus services needing to be shown in the masterplan amended to allow for the masterplan to demonstrate a choice of suitable route corridors as it is not yet established that such routes must be unimpeded. However, reference to the need for such routes to prioritise busses added. The masterplan will determine the routes.
All Highways modelling to support the Local Plan has been carried out at a strategic level, considering all proposed growth in the adopted Local Plan, background growth to 2041, neighbouring authorities’ growth, and all newly proposed development sites.
It is recognised that many of the operational issues affecting the A12 and its junctions are not directly attributable to proposed growth within the Chelmsford Local Plan, but an existing issue. Accordingly, developers of local plan allocations will be required to make relevant mitigation measures proportionate to the impact they have.

The strategic modelling has highlighted the broad potential impact of development, which will be used as evidence to ensure that developers of sites assess and mitigate the specific impact of development flows on local routes.
Continued work with National Highways has resulted in a statement of common ground with National Highways and Essex County Council (SOCG033 refers) with all parties agreeing that the Local Plan modelling to date indicates that the development in the Local Plan would have minimal impact upon the A12 and Junctions 17,18 and 19. Further modelling assessments with regards to these junctions are not required for the purposes of the Local Plan, and no modifications are required to be proposed to the Plan. With proportionate and reasonable mitigation strategies in place to support the Local Plan growth, development will ensure that severe impacts on the strategic highway network are avoided.
Detailed traffic modelling is being undertaken to identify the transport impacts arising from the development and to determine what mitigation may be required at Junction 19,18 and 17.
In light of the withdrawal of the A12 DCO, detailed traffic modelling is being undertaken to establish whether additional growth proposed through the Local Plan would necessitate mitigation at Junction 19 over and above that is already being progressed in association with the North East Chelmsford Graden Community.
Historic Environment
Historic England support CCC's Heritage Impact Assessment (HIA) and considers that it demonstrates measures can be put in place to appropriately address the potential impacts identified and that the Council has taken a balanced approach to managing development while safeguarding the historic environment. On the basis mitigation and enhancement measures outlined in the Council's HIA are implemented the site is considered suitable for allocation.
The Councils heritage impact assessment identifies a large number of designated and non-designated heritage assets in the vicinity of the site and finds varying levels of harm to their settings'. All harm is less than substantial and mitigation measures are proposed to minimise this harm. Given the scale of development required to meet the need and the rural character of the site there will always be impacts on the historic environment. This harm will be minimised through the masterplanning and mitigation strategies. The remaining harm will have to be weighed up against the benefits of delivering the scheme.
Minor modifications will be proposed to the policy and reasoned justification to reflect Historic England's requests to include reference to the Council's heritage impact assessment, the need for a detailed Heritage Impact Assessment to inform the masterplan, defining the landscape buffers as being open, and additional bullet point requiring landscaping to be incorporated at the northern end of the site, particularly around the Grade I listed Church of St Mary the Virgin and the Grade II listed Little Baddow Hall.
The landscape area to the east is highly sensitive so solar renewables are not considered acceptable in this area. Any such proposals would be better incorporated into buildings or less sensitive areas. No changes proposed but reference to no built form in this area added for clarity.
Minor modifications will be proposed to the Policy to ensure heritage impacts shall be avoided or minimised through the masterplan strategy, informed by the heritage assessment, remaining harms shall be mitigated where possible, with the remaining harm weighed up in accordance with policies DM13, DM14 and DM15.

As Hammonds Farm is the only designated heritage asset within the red line area. Wording has been revised to clarify this.
The landscape setting is a key feature of this allocation and therefore 'substantial and extensive buffers' are required for mitigation. The use of alternative phrases such as 'appropriate' would not give sufficient clarity. No changes proposed.
Minor modifications will be proposed to Archaeological Assessment requirements to allow an informed conservation/mitigation strategy to be developed for significant archaeological heritage assets and for any remains found to be treated appropriately according to their level of significance and in line with Policy DM15.
Paragraphs 7.371 and 7.372 will be proposed to be swapped to ensure clarity, with the heritage issues being grouped together in the Reasoned Justification.
Landscape/environment/flood risk
Reference to Lingwood Common SSSI and Woodham Walter Common SSSI will be proposed to be added as areas to avoid adverse effect on.
Natural England are in agreement with the policy requirements and Reasoned Justification relating to assessing the impact on the SSSIs and Ancient Woodlands. No further changes required.
Additional text will be proposed to be added to the reasoned justification to make it clear that the provision of greenspace on site would simultaneously provide recreational mitigation for potential impacts on the Essex Coast international designations, if required as identified in paragraph 8.139 of DM16.
There is no need to make specific reference to the need for flood risk management infrastructure to include contributions to the CFRPP as this is covered in Strategic Policy S9 – Infrastructure requirements. The Plan should be read as a whole and this would be unnecessary duplication as the site policy directly refers to Policy S9 and S10.
Whilst the site is at risk from reservoir flooding, the risk is very low. The 'high' risk rating of a reservoir indicates that in the event of an uncontrolled release the impacts could be severe, rather than that there is a high risk of a breach occurring. High risk' reservoirs are managed more stringently to minimize the chances of an uncontrolled release occurring. Measures to mitigate reservoir risk would not increase risk elsewhere.
The Site Summary Table for SGS16a in the Strategic Flood Risk Assessment Level 2 (EBCC010) sets out how flood risk can be managed safely including advice on access and egress. A Sequential and Exception Test (CC013) and update May 2026 (CC021) also recommends allocation of the site.
Developers will need to demonstrate through a site-specific Flood Risk Assessment (FRA) that users of the site will be safe from all sources of flood risk throughout its lifetime and that the development will not increase the risk of surface water flooding on the site and to neighbouring areas.
It is the role of the Council and not the SFRA to consider alternative sites. The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. This includes in relation to flood risk as set out in the Sequential and Exception Test update May 2026 (CC021).
The Strategic Flood Risk Assessment Level 2 (CC010) includes a climate change allowance.

The Detailed Water Cycle Study 2024 (CC003) shows that the site can be adequately served by Chelmsford Water Recycling Centre (WRC) in respect to wastewater collection and treatment.
Retain requirement for the development to provide 20% BNG in accordance with Policy DM16. The Local Plan is supported by the plan evidence base including an updated Viability Assessment. It is however reasonable to include additional text in the policy to state that anything over and above 20% should be capped at what can be practically delivered on site. Minor modification will be proposed to this effect.
Site infrastructure requirements
The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the current status of infrastructure across Chelmsford and identifies what new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources. The Local Plan viability report uses the information from the IDP to test viability. This demonstrates that the plan is viable and deliverable within the timeframes suggested. This is a 'living' document that will be reviewed to ensure the most up-to-date information is used to inform the planning application process.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.
Although not allocated last time, the site was considered as a 'reasonable alternative' in the Plan making process. There are no overring reasons why this site cannot be allocated when considered against the current evidence base.
The Plan should be read as a whole, no need to add reference to education or other infrastructure requirements being proportionate to the development as this is covered by policy S9 and S10 in the Plan, which deal with the provision of infrastructure and cover this issue. No change proposed.
Additional text added to Reasoned Justification to ensure a safe traffic free environment around school pedestrian entrances must be provided, ensuring access for emergency vehicles only, in line with ECC requirements.
As school providers, it is not ECC's position to accept the direct delivery of schools. No change proposed.
In line with the ECC Developers' Guide an additional bullet point added to include financial contributions to primary, secondary, early years education and childcare, including SEND education as required by the Local Education Authority.
Retain reference to the need for infrastructure to support police, ambulance and fire and rescue services as evidence has been submitted by these services to support the need for this requirement, which has been included in site policies across the Plan.
Limiting healthcare service to 'Primary' healthcare only would be too restrictive. The wider term 'Healthcare' covers all necessary infrastructure required by the development and is consistent with all other site policies in the Plan.
Adding reference to 'significant' adverse environmental impacts in relation to the appropriate development of renewable, low carbon and decentralised energy schemes on this site together with mass waste collection systems is not considered consistent with the NPPF as paragraph 160 of the 2023 NPPF does not include such reference.

Paragraph 7.375 refers to the need for the site to maximise opportunities for river use in accordance with the Council's Waterways Strategy which covers wider river uses than just referring to individual clubs or groups, whose names may change over time, or additional clubs or groups may be formed.
It would not be reasonable to require site 16a to make financial contributions to a proposed visitor centre at Sandford Mill as no other sites, other than 3a (due to it being directly adjacent to it) contribute towards Sandford Mill.
Stewardship
Reference to a 'draft' Business Plan will be proposed to be added to the Stewardship Strategy requirement as it would not be possible to have a 'full' Business Plan at this point in time.
For consistency with Strategic Growth Site 6, and to ensure unnecessary and costly services charges are not incurred by residents on site, text retained in Reasoned Justification to ensure if services charges are required these are minimised and capped.
Other
It is noted that 'Public Health England' has been replaced by 'UK Health Security Agency (UKHSA)' but the Sport England and Public Health England's Active Design guidance has not been updated to reflect this, so the Plan remains up to date.

<u>Strategic Growth Site Policy 16b – Land adjacent to A12 Junction 18 Employment Area</u>

Consultation point	**Total number of responses**
Strategic Growth Site Policy 16b – Land adjacent to A12 Junction 18 Employment Area	2,792

Summary of Representations – main issues and requested changes:

Legal Compliance

- The consultation portal is unsound, creating significant barriers to public participation and undermining the legitimacy of the consultation process (Langford and Ulting Parish Council PSQ25-734, Little Baddow Society PSQ25-3251)
- The consultation process was inadequate, lacking sufficient engagement with relevant stakeholders, and failing to provide accessible information to all
- Alternative submission options, such as email or paper form, were available, however the paper form is difficult to complete and unclear. Submitting via email is difficult in other ways disadvantaging those who struggle with complex forms and submitting via email the user risks having their objections ignored
- The unclear guidance and lack of transparency suggests the system is designed for procedural compliance rather than meaningful engagement, violating principles of fair public consultation

- The Local Plan is legally unsound and does not comply with the Town and Country Planning (Local Planning) (England) Regulations 2012, rendering it potentially unlawful and open to legal challenge. Specifically, during Regulation 18 which required local planning authorities to notify and invite representations from residents and stakeholders during plan preparation

Duty to Cooperate

- The consultation does not comply with the Council's Local Development Scheme (LDS) or Statement of Community Involvement (SCI) as the necessary consultation was not undertaken as Maldon Town Council and Natural England were unaware of the Pre-Submission consultation
- The Council has failed in its legal duty to conduct a genuine, inclusive, and transparent public consultation process. The consultation was inadequate, misleading, and proved inaccessible to many residents who are not regular computer users, violating key principles of democratic planning which contravenes the Planning and Compulsory Purchase Act 2004, which emphasises the importance of community involvement in the planning process
- The Pre-Submission Local Plan is inconsistent with the NPPF, for example the NPPF emphasises sustainable development and effective use of land; however, the Local Plan proposes developments that may lead to environmental degradation and unsustainable land use
- Neighbourhood Plans for Sandon and Little Baddow have recently been "made" and are supposed to carry equal weight with any other part of the Local Plan. The proposals at this site cannot be considered as consistent with either of these Neighbourhood Plans
- The Council has failed in its legal Duty to Co-operate by neglecting to properly engage with neighbouring authorities on cross-border planning issues, making the plan legally unsound. Specifically, Maldon Town Council and Natural England were completely unaware of the Site (Little Baddow Society PSQ25-3251)
- There is no evidence that that key cross-boundary strategic matters, including housing allocations, infrastructure, and environmental considerations have been effectively addressed, breaching legal obligations under the Localism Act 2011. Without clear agreements and co-operative strategies, the Plan should not be approved
- A Minerals Resource Assessment has been carried out which demonstrates that the ground conditions are unlikely to represent a suitable or sufficient sand and gravel resource to warrant viable use of the site for mineral extraction. It is not considered that mineral extraction of the site can feasibly be required, and minerals are not, therefore, a constraint to its timely development for employment use (Pigeon (Sandon) Ltd PS25-238)
- A Minerals Assessment has not been done for the site
- If there are minerals on site, then the same argument for not developing further within the Plan period at North East Chelmsford would be the case for this site
- The site lies within a Mineral Safeguarding Area and the minerals on the site should not be sterilised by development ()

- The site lies within a Minerals Safeguarding Area, and development of the site will sterilise its potential for minerals workings (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6179, PSQ25-6181, PSQ25-6188, PSQ25-6185, Boreham Conservation Society PSQ25-5259)

Soundness

Amount and type of development

- The proposed allocation for employment development is justified, effective, consistent with national policy, and helps ensure the new Local Plan can be considered positively prepared (Pigeon (Sandon) Ltd PS25-238)
- Concern regarding the impact this site could have on the economy of the Maldon District if businesses within the Maldon district find this site more attractive due to its proximity to the A12 for the distribution of goods, resulting in a relocation of their business to this site. If this is the case, there could be a loss of jobs within the Maldon district, resulting in fewer employment opportunities for Maldon residents and impact on the local economy (Maldon District Council PSQ25-4932)
- No specific concerns over the soundness of this policy but would like to emphasise the importance of ensuring that the delivery of this site does not place an undue burden on cross-boundary infrastructure and is adequately supported by local infrastructure improvements, including enhanced North-South public transport and active travel infrastructure to take account of the additional pressure on the county's highways network created by this quantum of employment space. Welcome opportunities for further discussions to ensure the site can come forward in a way that is environmentally, economically and socially sustainable (Brentwood Borough Council PSQ25-6160, Rochford District Council PSQ25-6195)

Highways

- In terms of vehicular movements and impact on the highway network of this site, it benefits from its proximity to the strategic road network, limiting impact on local highways. The Transport Assessment submitted within the planning application includes an appraisal of the traffic likely to be generated and considers the impact of the site's development on the capacity and safety of the highway network. It shows that development of the site is not forecast to give rise to material increases in traffic flow beyond A12 Junction 18 and the site access works. The assessments confirm that the site access and off-site junctions of interest would continue to operate satisfactorily with the development in place, subject to completion of the embedded mitigation works, even accounting for the forecast increase in vehicular movements up to 2036 (Pigeon (Sandon) Ltd PS25-238)
- The assumed 60% Modal Shift, to walking, cycling, or public transport, is unrealistic given the location of the site adjacent to the A12 and its distance from employment areas. With no assurance of ongoing and effective public transport provision the site is unsustainable

- The proposed reduction in car parking provision for homes on the site is concerning and will lead to parking problems for residents of the site and neighbouring communities
- Traffic impact assessments have been conducted in isolation for different aspects of the development, rather than as a holistic study of the combined effect of all new housing, commercial sites, and background growth from existing development. There are already traffic issues in the area, and this will make things worse (Langford and Ulting Parish Council PSQ25-734)
- The development is expected to have a severely harmful impact on the operation of the highway network (A12 and A414), which is already congested and at capacity in the peak hours, and the existing dual A12 carriageways are not due to be widened as part of the strategy. The scheme will also impact upon the local rural roads, adversely affecting small villages such as Sandon and Danbury, as drivers seek alternative routes through the countryside. This will have a harmful impact on the historic setting of these villages, and will also pose serious highways safety risks (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6186, PSQ25-6179, PSQ25-6181, PSQ25-6188)
- There is congestion on the A12 between Junctions 18 and 19 and on the A414 towards Danbury and Maldon. West of Maldon there is increasing development, the prospect of mineral extraction at Woodham Walter and even construction traffic from Bradwell Nuclear Power Station will impact on the A414. Unclear if the implications of these factors outside the Council area have been taken into consideration (Little Baddow Society PSQ25-3251, Chelmer Valley Landscape Group PSQ25-5145)
- The planned DCO widening of the A12 corridor, between Junction 19 and Junction 25 may not proceed as the Department for Transport (DfT) is currently reviewing the project and deciding whether to fund it. If it does not go ahead the site is likely to cause a severe impact on this part of the A12 corridor, which already experiences significant congestion and frequent accidents at peak times (Boreham Conservation Society PSQ25-5259)
- Congestion on the A414 will worsen due to increased vehicles, lack of proper road expansion, and the addition of a new junction near the A12. The A414 is already over capacity, with frequent delays during peak hours. There is no clear plan or funding for mitigation
- Concern the site could significantly impact upon traffic flows onto the A12 having an impact on businesses within Maldon and the local road network around Maldon. It is requested that consideration is given to the impacts on the local road infrastructure (Maldon District Council PSQ25-4936)
- Congestion on the A12 will worsen. There is no clear strategy for how the increased traffic on the A12 will be mitigated. The planned ‘improvements’ lack sufficient funding, design detail, or binding commitments from key infrastructure stakeholders
- The Council’s evidence base identifies that development is likely to increase traffic volumes along rural routes through villages including Boreham, Little Baddow, Danbury and Sandon. It is indeed entirely likely that the existing rural lanes will become ‘rat runs’, to avoid queuing on the A12 and A414, and this could have many adverse consequences for the local highway network within and around these villages, and could also have negative effects in terms of the character and tranquillity of these small, historic settlements, and on the

setting and character of the Protected Lanes and Conservation Areas within these areas (Boreham Conservation Society PSQ25-5259)

- The proposal will increase commuter travel times, cause severe congestion at key pinch points, and lead to greater rat-running through rural villages in the wider area and through the Chelmer Valley itself, of which no mitigation has been put forward in the Local Plan (Little Baddow Society PSQ25-3251, Woodham Walter Parish Council PSQ25-5835, Chelmer Valley Landscape Group PSQ25-5145, Boreham Conservation Society PSQ25-5259)
- The A12 at Junction 18 will not cope with the additional burden of traffic, especially considering further housing development approvals at Maldon (Woodham Walter Parish Council PSQ25-5835)
- The Plan accepts that there will need to be improvements to Junctions 18 and 19 of the A12, but there is no detail of what this will be or funding for it
- The outline planning application for 16b states that there will be tailbacks creating congestion at Junction 18, and this is without any consideration of the additional load from 16b and Location 3, or development from Maldon District
- Mitigation at Junction 19 is unclear, and additional traffic can also be expected here from development in Maldon District. Currently traffic backs up to the Lion Inn at peak times. There is no indication of where the funding for mitigation will come from. National Highways will not have funding given the recent budget cuts they have recently sustained which resulted in cancellation of other plans for enhancement of the A12
- Junction 19 will be unable to handle the additional traffic flows (Chelmer Valley Landscape Group PSQ25-5145)

Landscape and ecology

- The planning application for the site includes a Landscape and Visual Impact Assessment which sets out that as with any development of greenfield land, there will be localised landscape impacts. However, it demonstrates that the site is appropriate for development from a landscape and visual impact perspective; and that the landscape and visual harms of the development can be substantially mitigated through landscaping (Pigeon (Sandon) Ltd PS25-238)
- Development of the site gives rise to the potential to deliver ecological benefits. The submitted planning application is accompanied by a Biodiversity Net Gain Assessment, which confirms that the development proposed can achieve a 19.59% gain in habitat biodiversity units, a 163.89% net gain in hedgerow biodiversity units on the site, and a net gain of 20.02% in watercourse units along Sandon Brook. This comfortably exceeds the minimum requirements of the Environment Act 2021 as well as that proposed in Policy DM16 (Pigeon (Sandon) Ltd PS25-238)
- Complete erosion of a large area of locally distinctive and valued landscape. The proposal will irreversibly urbanise a tranquil, scenic rural area, where development has historically been prohibited (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6184, PSQ25-6179, PSQ25-6181, PSQ25-6188)
- The site will negatively impact local protected sites such as Blakes Wood and Waterhall Meadows, through increased pollution, light intrusion, and footfall.

These sites provide vital habitats for diverse flora and fauna, including rare species

- The site has ancient woodlands, nearby SSSIs, and the Chelmer and Blackwater navigation within it. It has very extensive animal and plant wildlife within and adjacent to it. Adding 3000+ houses and all the people living in them will put unsustainable pressure on this deeply rural area
- Essex Wildlife Trust has been working in the area to create green corridors in Danbury and Little Baddow parishes to encourage wildlife. The development will impact negatively on this effort (Boreham Conservation Society PSQ25-5259)
- The proposal would devastate a rural landscape and the high levels of biodiversity currently on site
- The development will lead to significant landscape and visual impacts in the Chelmer Valley and on landscape character generally, some of which are protected by the Boreham VDS, potentially damaging to the ecology and biodiversity of the area (Chelmer Valley Landscape Group PSQ25-5145, Boreham Conservation Society PSQ25-5259)
- It will damage an important cultural landscape which is an asset to the area and of national significance as explored by J. A. Baker (Chelmer Valley Landscape Group PSQ25-5145)
- It would have an adverse impact on the landscape of the Chelmer valley in general, with a particular adverse impact on the Chelmer and Blackwater Navigation Conservation Area (Chelmer Valley Landscape Group PSQ25-5145)
- The Plan states a 20% net biodiversity net gain should be achieved on site yet provides no explanation of how this will be achieved, especially in an area already rich in biodiversity. How can a site with existing high ecological value see a genuine net gain when vast areas of farmland, mature trees, and established habitats are lost to development
- The way biodiversity net gain is calculated does not genuinely enhance biodiversity. Loopholes can be exploited by developers. For instance, if a site currently has ten mature trees of two species and all are felled, replacing them with just four trees of different species is classified as a 100% biodiversity net-gain. This is a flawed metric which allows destruction under the guise of environmental improvement. Simply planting a few new flower species that were not previously present on site is treated as a net gain, regardless of the ecological damage done
- There should be a detailed plan showing how biodiversity net-gain will be achieved in this already ecologically sensitive area at this stage
- The site involves the loss of high-grade agricultural land which should be protected for self-sufficiency and food security (Boreham Conservation Society PSQ25-5259)
- An Agricultural Land Classification Report demonstrates that approximately two-thirds of the site comprises Grade 3a land; one third Grade 3b. No Grade 1 or Grade 2 agricultural land. Given that some loss of agricultural land is inevitable to meet development needs, that the land around Chelmsford is generally either Grade 2 or Grade 3, and the other sustainability benefits of allocation of 16b, the benefits of site's development would substantially

outweigh the harm engendered by the loss of this agricultural land (Pigeon (Sandon) Ltd PS25-238)

- Development will result in the irreversible loss of agricultural land, 17ha of which is considered to be 'the best and most versatile land' (Grade 3a), and which is currently in active use for food production (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6182, PSQ25-6179, PSQ25-6181, PSQ25-6188)
- The Local Plan does not take in to account the exceptional wildlife, in the Hammonds Farm area, in addition to the farmland it is bordered by the Essex Wildlife Trust, owned and managed Water Hall Meadows and Chelmer Valley Conservation Area. Detailed local surveys of sites have not been carried out (Little Baddow Society PSQ25-3251)
- The site will affect the area's attractions for residents and visitors who come to enjoy the woodlands and miles of footpaths with views over the valley and along the Navigation towpath. The pressure on these areas (and on Danbury Lakes) from new development will become significant (Chelmer Valley Landscape Group PSQ25-5145)
- Alternative sites, such as further development at North East Chelmsford, have better transport links and less impact on the environment and biodiversity
- The proposal would be contrary to Policy DM8 as the proposals would harm the intrinsic character, appearance and beauty of the area. The site is a beautiful deeply rural area, with wide open fields, surrounded by waterways, a Conservation Valley, ancient woodlands and practically no buildings. Placing 3000+ houses and industrial buildings of considerable height would be contrary to Policy DM8

Heritage

- The Council's HIAs has appropriately assessed the potential impacts of development on the historic environment and identified a suitable range of mitigation measures to address them effectively. On this basis, we consider the site suitable for allocation and welcome the inclusion of heritage criteria derived from the Council's HIAs and consider the policy sound (Historic England PSQ25-5811)
- The site does not contain any designated heritage assets. There are however several nearby designated heritage and non-designated heritage assets. A Built Heritage Assessment for the site demonstrates that there are no heritage issues which cannot be appropriately mitigated (Pigeon (Sandon) Ltd PS25-238)
- Considerable harm to the significance of a number of heritage assets and their settings, including the Grade II listed Sandon Lodge, Grade II listed Bridge Farmhouse, Sandon Bridge (Non Designated Heritage Asset), Danbury Park (Grade II Registered Park and Gardens) and the Grade I listed St John the Baptist Church (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6183, PSQ25-6179, PSQ25-6181, PSQ25-6188)
- Potential harm to an area of high archaeological value, which requires further investigation to ensure the conservation and preservation of assets (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6183, PSQ25-6179, PSQ25-6181, PSQ25-6188)

- The area contains evidence of Roman occupation. Archaeological investigations have revealed significant Roman and Iron Age activity, including burial sites and artefacts
- Aerial photography reveals historical structures that may require preservation. Recent surveys indicate the presence of subsurface remains of historical buildings and earthworks. Development without detailed archaeological assessments risks permanent destruction of unrecorded heritage sites (Langford and Ulting Parish Council PSQ25-734)
- A full field archaeology report of the site has not been undertaken, yet the desk-based archaeology report for site 16b identifies “enhanced potential for prehistoric activity”. The site has a known history of Roman importance. There are also many examples of more recent heritage assets. Para 207 of the NPPF requires a full field evaluation to be undertaken
- Policy DM15 states that planning permission will only be granted for development affecting archaeological sites providing the sites and their settings are protected, enhanced and preserved. There is no archaeology field report or evidence of how such mitigation can be achieved on site

Flood Risk

- Employment development is classified as ‘less vulnerable’ development in the NPPF’s flood risk vulnerability classification; and, the employment proposed by the site policy (as the FRA which accompanies the planning application demonstrates) can be accommodated within the site using only land that is Flood Zone 1, and avoiding areas most at risk of surface water flooding (i.e. the element of the site around Sandon Brook) (Pigeon (Sandon) Ltd PS25-238)
- Significant level of flood risk, in relation to river and reservoir flooding. As a result, to proceed to allocation, the site must pass the flood risk sequential and exemption tests, and little evidence has been presented to explain how the harm will be mitigated. The Sequential and Exception Test process has been completed by the Council but does not appear to address the core requirements of the NPPF. The implications for the new community and the surrounding areas do not appear to have been properly considered, and alternative options have not been fully explored. Instead, the issue has essentially been put ‘on hold’, for consideration when the major development comes forward, and this is not a rational or justified strategic approach, and is contrary to the requirements of the NPPF (see submitted Flood Risk Statement) (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6187, PSQ25-6179, PSQ25-6181, PSQ25-6188)
- The development site abuts the Chelmer and Blackwater valley. Flood risk mapping shows that parts of the proposed site regularly flood, particularly after heavy rainfall. Without substantial flood defences, development will exacerbate runoff into vulnerable areas downstream
- Climate change is increasing the severity of flood events, yet the Plan does not account for this risk. Existing flood models used in the Plan fail to factor in increased climate-driven rainfall and surface water risks. Building in a flood-prone area increases risks to property, infrastructure, and emergency response capabilities

- Flooding has always been a problem and every Winter, including 2024/2025, this is increasing, inevitably with the impact of Climate Change the situation will worsen (Little Baddow Society PSQ25-3251, Boreham Conservation Society PSQ25-5259)
- Building on the site will alter water runoff patterns, increasing the risk of flooding in surrounding areas. Paving over permeable land will increase surface water runoff, overwhelming local drainage systems. The risk of downstream flooding in Boreham, Hatfield Peverel, Langford, Ulting and Maldon will rise significantly as a result of this development (Langford and Ulting Parish Council PSQ25-734, Boreham Conservation Society PSQ25-5259)
- The development will exacerbate flooding in the Chelmer valley, and it is not clear how sewage and waste-water from the development will be effectively dealt with. There is clearly a danger that increased flooding and waste-water discharge from a major housing development will adversely affect water quality and biodiversity in the Chelmer and its tributaries (Chelmer Valley Landscape Group PSQ25-5145)

Infrastructure

- Support the provision of pedestrian, cycleway connections within the site and the wider area, the provision of a coherent network of new and accessible open space, sport, leisure and recreation facilities within the site (Sport England PS25-90)
- The proposed link road to A12 Junction 19 will be elevated above the flood plain and its embankments will slow down discharge of surface water increasing the risks of flooding up stream, it will split any proposed development in two, and compromise the views to and from the Listed Boreham House, and its separately listed grounds (Boreham Conservation Society PSQ25-5259)

Other

- At the time of the adopted Plan the A12 was regarded as the eastern boundary of the Chelmsford's built-up area and would not be extended beyond that. Nothing has changed to consider this location for development now (Boreham Conservation Society PSQ25-5259)
- The site is fundamentally unsustainable, and it is detached from the main urban area by the A12. Creating safe and welcoming linkages across the A12 from this location will be physically challenging to achieve, given the extent of existing dual carriageway and slip roads in the vicinity of the site (Little Baddow, Boreham, Danbury & Sandon Parish Council Cross Working Group PSQ25-6179, PSQ25-6181, PSQ25-6188)
- Developing beyond the A12 boundary sets a precedent for further development in the future on areas of land which are sensitive landscapes
- Other land would be more suitable for such development and other reasonable alternatives have not been fully identified or assessed (Boreham Conservation Society PSQ25-5259)

- Other options, such as further development at Noth East Chelmsford, have not been properly considered. The Issues and Options consultation saw five options, all of which saw an additional 3,000 homes in North East Chelmsford. When the Council was ahead of the housing target numbers North East Chelmsford was dropped and Location 16 taken forward instead
- North Chelmsford is an already urbanised area, with little in terms of landscape and wildlife of any interest. Meanwhile in Little Baddow and Danbury we have a mix of rural, good quality farmland and woodlands that are managed and preserved by The National Trust and Essex Wildlife Trust. The Plan will destroy the attractiveness of the area and put unsustainable pressure on the wildlife in the area. It has not been properly justified why North East Chelmsford is not being included for further development instead of Location 16

Changes requested

- The policy cites “Flood risk assessment” as an infrastructure requirement, but it is worth noting that it is not infrastructure but is a mandatory supporting evidence base to a planning application, so the wording of the policy needs to be corrected and perhaps replaced with “Flood Risk Management infrastructure” (Environment Agency PSQ25-629)
- No need for a masterplan on this site as the site is in single ownership, there are no land assembly challenges, complex constraints or infrastructure requirements that cannot be readily addressed through the usual planning application process. A masterplan for this site will add unnecessary delay and cost to delivery (Pigeon (Sandon) Ltd PS25-238)
- The policy wording relating to the use classes on site should be amended to make it clear that any mix of the listed use classes is acceptable, and that not all listed are required (Pigeon (Sandon) Ltd PS25-238).

CCC Response
Legal compliance and Duty to Cooperate
The consultation followed the Councils adopted Statement of Community Involvement (SCI) and Local Development Scheme (LDS).
In accordance with the Council’s SCI, the consultation was fully accessible to all, with paper and electronic documentation being available to all, and in person drop in events for all to attend.
The ‘Pre-Submission (Regulation 19) Statement of representation procedure and statement on availability of proposed submission documents for inspection’ is fully transparent in what the consultation covered, where to view the documents, and how to make comments, as well as how to contact the Council if they required assistance. The statement covered the following to assist anyone in making their comments: • PART 1 – What is a Regulation 19 Consultation • PART 2 – Legal Compliance and Duty to Co-operate • PART 3 – Soundness • PART 4 – Where can I view the consultation documents? • PART 5 – How can I comment? • PART 6 – Appearing at Independent Examination

• PART 7 – What will happen with my representation? • PART 8 – Statement on availability of proposed submission documents for inspection • PART 9 – Other consultations
The consultation portal is only one means of submitting representations. Representations made by email or post are inputting into the consultation portal by the Council and carry the same weight as those submitted via the consultation portal.
Detailed, step-by-step guidance for using the consultation portal was published specifically to guide users on how to make comments on the events for this consultation.
The two Regulation 18 consultations were fully compliant with the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended), with all relevant bodies being correctly notified of the consultations. Full details of those consulted are set out in the following documents: • Issues and Options 'You Said We Did' Feedback Report (May 2024) • Preferred Options 'You Said We Did' Feedback Report (February 2025)
The Regulation 19 consultation was fully compliant with the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended), with all relevant bodies being correctly notified of the consultations. Full details of those consulted are set out in Appendix 1 to this report.
Natural England have been fully engaged throughout the Local Plan process resulting in a Statement of Common Ground being agreed with the Council in December 2024 (SOCG010 refers).
In accordance with the Duty to Co-operate (in place at the time), the Council have engaged with all neighbouring Local Authorities, including Maldon District Council, and identified any Strategic matters to be considered through the Local Plan process. An updated Duty to Co-operate Strategy was published in January 2022 (DTC003) with the most recent Duty to Co-operate Position Statement, November 2025 (DTC005) setting out the latest update on the activities undertaken by the Council in respect to the Duty to Co-operate on the Review of the adopted Local Plan. Statements of Common Ground have also been agreed with the neighbouring authorities of Castle Point, Epping Forest, Uttlesford, Brentwood, Tendring, Thurrock, Maldon, Rochford, Braintree District Council's, Basildon Borough Council, Southend on Sea and Colchester City Council.
Neighbouring Local Authorities who have an adjoining boundary with CCC were required to be consulted under the Duty to Co-operate (in place at the time). Neighbouring Parish/Town Councils were required to be consulted at each stage of the Local Plan, but not as part of the Duty to Co-operate. Maldon Town Council is a Parish/Town level Council which is located within Maldon District and therefore does not comprise a Duty to Co-operate body. As the Town Council does not have a boundary with CCC there is no requirement to directly consult Maldon Town Council. Maldon District Council, with Maldon Town Council within its administrative area, is a Duty to Co-operate body which the Council have fully engaged with, and an updated Statement of Common Ground has been agreed with the Council in 2026 (SOCG010 refers).

Collectively the Local Plan evidence supports the site allocation, and the site policy allows for appropriate mitigation and infrastructure to be secured where necessary, resulting in sustainable development, consistent with the NPPF.
A Minerals Recourse Assessment (MRA) has been carried out and considered by the Essex County Council, as the Minerals Planning Authority. They have acknowledged that the minerals within the site are not of volume, quality or spatial distribution which would make extraction commercially viable. However, a condition is attached to the planning permission to ensure the incidental extraction of minerals during the development of the site, to ensure that those minerals that can be, are recovered and put to beneficial use.
The minerals siltation in North East Chelmsford differs as that site has an extant planning permission for mineral extraction. The minerals must therefore be exacted before any other form of development can take place on the site. There is no minerals extraction permission for this proposed site.
Site allocations are strategic matters for the Local Plan, but where applicable the made Neighbourhood Plans include detailed design and other guidance which can influence future detailed development proposals and planning applications.
Reference to the Parish Council receiving a % off the CIL receipt removed as the uses on site are zero rated for CIL so there will be no CIL receipt for this site.
Amount and type of development
Description of Use Classes amended to reflect approved planning application and to clarify that the site can have any of the uses and is not required to have all of them on site.
Amount of floorspace updated to reflect additional floorspace in approved planning application.
Highways
There is no proposal to reduce the amount of car parking for this site. The site will need to comply with the same parking standards as any other site, as out in Policy DM27.
All Highways modelling to support the Local Plan has been carried out at a strategic level, considering all proposed growth in the adopted Local Plan, background growth to 2041, neighbouring authorities' growth, and all newly proposed development sites.
The Inspector who granted planning permission for this site, via an appeal, concluded that the evidence before them (which covered a wide range of information, including, but not limited to existing highway conditions, the detail of the proposals, the detail of required changes to the wider networks, the suitability, accuracy and reliability of modelling, including the appropriateness of the data, assumptions and forecasting within it, as well as agreement on the future effects of, and acceptability of the appeal scheme), together with the other written evidence, sets out the existing highway context, the proposal, the likely effects of the proposal including traffic volumes, the proposed access and highway works and their effects, as well as an overall agreed conclusion that the proposal is acceptable in all of these regards and the development will accord with local and national transport policies. In reaching their conclusion the Inspector noted that the proposal, the mitigation and the modelling which supports it properly takes into account future growth in network demand and usage, the adjacent Hammonds Farm development proposals and other relevant future planned growth.

Subject to the conditions imposed by the planning permission granted for this site, the Inspector concluded that the proposal is not considered to have a negative, unacceptable or otherwise harmful effect on the operation, capacity and safety of the A12 and the local road network.
Historic Environment
The Inspector who granted planning permission for this site, via an appeal, concluded that the overall worst-case scenario is that the proposal would give rise to a low to very-low level of less than substantial harm to the significance of these heritage assets through development within their setting, but the harm identified should be weighed against the public benefits of the proposal. A similar level of harm has been found to the significance of a non-designated heritage asset, and a balanced judgment is required having regard to the scale of that harm. Taking into account the substantial public benefits of the proposal set out above, the Inspector found that the public benefits of the proposal do clearly outweigh the level of less than substantial harm found. As such, policies in the NPPF that protect heritage assets did not provide a strong reason for refusing the development proposed on this site.
Landscape/environment/flood risk
Site infrastructure requirements and reasoned justification amended to include reference to the need for appropriate flood risk management measures and SuDS.
There is no need to make specific reference to the need for flood risk management infrastructure to include contributions to the CFRPP as this is covered in Strategic Policy S9 – Infrastructure requirements. The Plan should be read as a whole and this would be unnecessary duplication as the site policy directly refers to Policy S9 and S10.
The Inspector who granted planning permission for this site, via an appeal, concluded that the Flood Risk Assessment (FRA) for the site, its conclusions and the recommendations within it, subject to those recommendations, mitigations and compensatory arrangements being secured by condition were acceptable and would not lead to an increased flood risk elsewhere.
It is the role of the Council and not the SFRA to consider alternative sites. The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. This includes in relation to flood risk as set out in the Sequential and Exception Test update May 2026 (CC021).
The Strategic Flood Risk Assessment Level 2 (CC010) includes a climate change allowance.
The Detailed Water Cycle Study 2024 (CC003) shows that the site can be adequately served by Chelmsford Water Recycling Centre (WRC) in respect to wastewater collection and treatment.

Location 10 – South Woodham Ferrers

Strategic Growth Site Policy 10 – North of South Woodham Ferrers

Consultation point	Total number of responses
Strategic Growth Site Policy 10 – North of South Woodham Ferrers	12

Summary of Representations – main issues and requested changes:

- Support for additional wording relating to a strategy for responding to National Grid Electricity Transmission plc (NGET) overhead transmission lines (National Grid Electricity Transmission PSQ25-6236)
- Welcome reference to the masterplanning principle to provide or make financial contributions to new or enhanced sport, leisure and recreational facilities as justified by the Council's emerging evidence base, other plan polices and NPPF (Sport England PS25-91)
- Para 7.412 - welcome reference to the development being required to encourage healthy and active lifestyles in line with the Active Design guidance. Update the text to reflect that Public Health England no longer exists (Sport England PS25-91)
- Pleased to see that the requirement for a Habitats Regulations Assessment (HRA) but note that the requirement for HRA will be required for all residential applications within the Essex Coast RAMS and other proposed developments which may have a likely significant effect on international sites (Natural England PSQ25-6254)
- Support requirements for developments to demonstrate sufficient capacity for wastewater treatment and disposal to serve the site. As outlined in the Water Cycle Study Stage 2, the dry weather flow will be exceeded at the South Woodham Ferrers water recycling centre (WRC) based on the proposed growth and current headroom is very limited. However, the Anglian Water PR24 Business Plan identified a growth scheme at South Woodham Ferrers WRC for AMP8 to enable growth to come forward (Anglian Water Services Ltd PSQ25-6406)
- Para 7.405 – concerned that if 21/01961/OUT is not implemented and a new proposal comes forward, the site capacity will be considered on its individual merit making the housing target meaningless (South Woodham Ferrers Town Council PSQ25-923)
- Para 7.411 – there is no reasoning for removing the size requirement for the new school or information on the implications of this for the site (South Woodham Ferrers Town Council PSQ25-923)
- Para 7.421 – question how it can be ensured that the Essex RAMS contributions from the site are directly used to mitigate impacts on our local habitat sites (South Woodham Ferrers Town Council PSQ25-923)
- Delete the site. It has not delivered any homes in line with the trajectory in the adopted Local Plan (May 2020) and is demonstrably undeliverable. The site still does not have a signed s106 agreement or a formal decision notice,

around two years after the resolution to grant permission. Plan should allocate additional sites and/or 'reserve' sites to ensure the plan can handle changing circumstances (Croudace Homes PS25-359)

- Add an additional bullet under 'Site infrastructure requirements' in line with the ECC Developers' Guide to read: Financial contributions to primary, secondary, early years education and childcare, including SEND education as required by the Local Education Authority (Essex County Council PS25-227)
- Support for the allocation and policy objectives overall but the policy should have generic requirements, rather than being 'tied in' to the development covered by the recent application with a resolution to grant planning permission (Ref: 21/01961/OUT) (Vistry Group PS25-132)
- It would be expedient to acknowledge that the assessment of infrastructure delivery will consider viability considerations (Vistry Group PSQ25-6499)
- Amendments proposed to individual site criteria to remove superlative language and ensure CIL compliant requirements:
    - Opening para of policy - amend to "promote" or "encourage" opportunities for active and sustainable travel as "maximise" means that this must take precedence over every other material consideration
    - Opening para of policy - amend to state that "Development proposals should generally accord with the Masterplan Framework approved by the Council in 2021, or any subsequently approved revised Masterplan"
    - Amount and type of development - amend to require "around" 1,220 new homes and "around 1,000 sqm of business floorspace" (in line with the resolution to grant permission)
    - Amount and type of development - show the housing quantum as a range of 1,200 to 1500 homes to maximise the site potential
    - Site masterplanning principles 9th bullet and Site infrastructure requirement 10th bullet point - an on-site car club facility is unreasonable and fails to meet the CIL Regulations
    - Site masterplanning principles 10th bullet and Site infrastructure requirement 2nd bullet – delete references to "as required by the Local Highways and Transportation Authority" as this is not the correct basis for determining CIL compliant mitigation
    - Site infrastructure requirement 8th bullet – it is unreasonable to place the onus for demonstrating sufficient capacity in the foul drainage network on individual developers at the application stage
    - Site infrastructure requirements 11th bullet - current wording does not provide any clarity or measure as to what is required for sport and leisure
    - Site infrastructure requirements 12th bullet - financial contributions to secondary education would only be required sufficient to mitigate any adverse impact on school places, and not "as required by the Education Authority"
    - Site infrastructure requirements 13th bullet - amend requirement for community facilities to refer to an on-site community building (or equivalent), as required under the recent application. Amend reference to refer to a proportionate healthcare commuted payment and delete "as required by". The recent application shows no evidence of the need for such matters (Vistry Group PS25-132).

CCC Response
Minor modification will be proposed to education policy requirements including the addition of primary, early years and childcare, and SEND provision to reflect ECC's updated requirements.
It is noted that 'Public Health England' has been replaced by 'UK Health Security Agency (UKHSA)' but the Sport England and Public Health England's Active Design guidance has not been updated to reflect this, so plan remains up to date.
Site policy reflects the planning applications with resolutions to grant planning permission. If these are not implemented and a new proposal comes forward, the site capacity will be considered on its individual merit. This will allow for an appropriate degree of flexibility in provision and may allow a higher density development to be brought forward where it conforms with other policies in the plan as a whole.
The site policy retains reference to the size of a potential new primary school under Site infrastructure requirements. This is consistent with the adopted Local Plan.
In line the approved Essex Coast RAMS, endorsed by Natural England, developer contributions are pooled and spent on mitigation measures across the project area. This will include mitigation measures for the Crouch and Roach Estuaries Special Protection Area, Ramsar site and Site of Special Scientific Interest which lie to the south of SWF.
The policy appropriately reflects the latest planning application status of the site and requirements of the resolutions to grant planning permissions. This includes the housing quantum.
Policy does not refer to the masterplan approved in 2021 and would enable a revised approved masterplan to be considered.
The policy appropriately requires opportunities for active and sustainable travel to be maximised in line with national policy and other policies and objectives of the plan including Strategic Policy S16. The plan seeks to reduce reliance and not to replace private vehicles.
The policy appropriately requires developments to demonstrate sufficient capacity for wastewater treatment and disposal to serve the site as supported by the plan evidence base and Anglian Water Services Ltd.
Specific requirements with regards to sport and leisure are addressed through the masterplan/planning application stages.
Policy requirements for community facilities are retained to inform any new proposals that may come forward for development.
Policy requirements for education and highways accord with the requirements of the Education Authority.
It is the Council's view that requiring a car club on this site is justified. Providing car clubs on strategic housing sites such as this will help the council achieve its Strategic Priority 2 – Promoting smart, active travel and sustainable transport. It can provide a viable alternative to car ownership and can also reduce the amount of land required to be provided for car parking. Note also that the provision of a car club did form part of the committee report for the planning application for this site.

Location 11 – Bicknacre

Growth Site Policy 11b – Land at Kingsgate, Bicknacre

Consultation point	Total number of responses
Growth Site Policy 11b – Land at Kingsgate, Bicknacre	49

Summary of Representations – main issues and requested changes:

- We welcome the policy requirement to assess, and where appropriate mitigate, the potential cumulative effect on the designated features of Thrift Wood SSSI (Natural England PSQ25-6255)
- We welcome the inclusion of heritage criteria in the policy. The site is near Bicknacre Priory Scheduled Monument. Having reviewed the HIA, we are satisfied that the Council has appropriately assessed the potential impacts of development on the historic environment and identified a suitable range of mitigation measures to address them effectively (Historic England PSQ25-5812)
- Site falls within the Eastern 2 Wide Area Multilateration Network statutory safeguarding zone meaning any development of, or exceeding, 91.4m in height above ground level will trigger a statutory consultation requirement (Defence Infrastructure Organisation (DIO) PSQ25-6410)
- Support allocation but capacity studies suggest 25-35 dwellings is achievable on the 1 Ha site – site policy should be amended accordingly (Kingsbury PS25-180)
- For clarity, amend para 7.433 to state: 'Land to the west of the site is allocated for future 'recreation use' SUDs/biodiversity to serve the site, as shown on the Policies Map.' (Kingsbury PS25-180)
- Object to the allocation. Bicknacre has already satisfied its requirement for further housing since the adoption of the existing Local Plan (2020) and we are discussions to find an affordable housing site. Any further housing need could be accommodated at Hammonds Farm or elsewhere. Concerns about flooding, drainage capacity and loss of Grade 3 agricultural land. Additional homes built on Growth Site 11 in the Adopted Local Plan should be deducted from the overall requirement in Bicknacre (Woodham Ferrers and Bicknacre Parish Council PSQ25-1439)
- To meet the increased housing requirement, additional growth should be considered in Bicknacre (Gladman Developments Ltd PSQ25-6322)
- Insufficient infrastructure to support the development, including lack of public transport, police and fire services, the condition of roads and capacity at doctors' surgery and the school
- Will place further strain on existing facilities and utilities
- Increase in traffic, congestion and on street parking and the degradation of the condition of existing roads – concerns on pedestrian and road safety and quality of life
- Bicknacre has already had too much housing and there is sufficient housing to meet local need
- Impact on settlement character, loss of village status, environment, settlement boundary and the community

- Concerns on flooding, including Sandon Brook overflowing
- Drainage issues/lack of capacity and sewerage concerns
- Loss of agricultural land, heritage and culture
- Adverse impact on community spirit
- Impact on wildlife and their habitats/corridors and lack of environmental surveys e.g. bats and newts
- Noise and air pollution impacts – Chelmsford's Air Quality Strategy June 2022 is out of date and air pollution is likely to increase
- Concerns on pedestrian safety, including children and the vulnerable and the lack of/suitable existing footways within the village
- The IIA says 21SHELAA94 would result in back land development and performs less well to the preferred sites when compared to the Spatial Strategy
- Impact on adjacent bridleway
- Concerns on antisocial behaviour
- Traffic, congestion, noise, light and road safety concerns during the construction phase of the development
- Mental wellbeing impacts
- Contravenes the European Convention of Human Rights Article 8 - right to respect for your family and private life
- Past planning proposals state that the land will be retained for agricultural or grazing
- Site is within the Danbury Ridge Conservation Zone which is an area of special scientific interest the Council is committed to protect
- Focus development instead in under-used urban areas
- Loss of privacy and amenity
- Will be overdevelopment
- The Protection of Garden Land (Development Council) Bill is intended to 'protect private gardens from development which is out of character with the surrounding area'
- MP and Parish Council both oppose the development.

CCC response
Minor modification will be proposed to para 7.433 to confirm that land to the west of the site is allocated for future 'recreation use' and/or SuDS and/or biodiversity to accord with the Policies Map.
The site allocation is supported by the plan evidence base including a Strategic Flood Risk Assessment, Landscape Sensitivity and Capacity Study 2024 and traffic modelling. The Small Sites Planning Briefs/Concept Framework 2024 (appended to the Submission Spatial Strategy and Strategic Site Topic Paper) considers that there are no overriding site constraints which mean that the site is unsuitable or undeliverable.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
To meet our development needs it is inevitable that some agricultural land will be used for development.
Site policy includes new requirements to undertake an archaeological assessment and to assess, and where appropriate mitigate, the potential cumulative effect on the designated features of Thrift Wood SSSI.

The ‘small sites’ (under 1ha) are an important part of the Plan to ensure delivery of a variety of sites in a timely manner, and to meet NPPF requirements to provide 10% of small sites.
The Heritage Impact Assessment for the site was published alongside the Preferred Options Local Plan. Site policies consider significance of designated and non-designated heritage assets.
The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
The Local Plan is informed by an Air Quality Assessment 2024 which overall concludes that the impact of the Local Plan in 2041 can be considered negligible for all pollutants.
Potential impacts on residential amenity. Including issues of overlooking and building noise would be addressed through the planning application process.
Objections relating to the breach of Article 8 protections are not supported with evidence to demonstrate a disproportionate or exceptional interference with private or family life that would warrant overriding the public interest in a site allocation for housing. Concerns raised relate to planning matters, which can and should be addressed through the planning application process.
The Danbury Ridge Conservation Zone is no longer a planning designation/policy.
The Protection of Garden Land (Development Council) Bill had a First Reading in Parliament in February 2009 but was then dropped by its sponsor.
Minor modifications will be proposed to ensure the development is designed in such a way that there is no impact on the operational or capability of nearby defence assets.

Growth Site Policy 11c – Land West of Barbrook Way, Bicknacre

Consultation point	**Total number of responses**
Growth Site Policy 11c – Land West of Barbrook Way, Bicknacre	126

Summary of Representations – main issues and requested changes:

- We welcome the policy requirement to assess, and where appropriate mitigate, the potential cumulative effect on the designated features of Thrift Wood SSSI (Natural England PSQ25-6256)
- Support allocation and policy, but the wider SHELAA submission site can accommodate a higher amount of growth which has not been assessed as a reasonable alternative in the IIA or wider plan evidence base. This would support the vitality of existing services and facilities (Welbeck Strategic Land V Limited PSQ25-3091)
- Object to the allocation. Additional homes built on Growth Site 11 in the Adopted Local Plan should be deducted from the overall requirement in Bicknacre. Further housing in Bicknacre has already been satisfied since the adoption of the existing Local Plan (2020) and we are in discussions to find an affordable housing site. Any further housing need could be accommodated at Hammonds Farm or

elsewhere. Concern on flooding, drainage capacity and loss of Grade 3 agricultural land. There is a ransom strip between Barbrook Way and the site making it undeliverable. The site will have an amber designation in the updated SHELAA meaning it is undeliverable and undevelopable so should be deleted (Woodham Ferrers and Bicknacre Parish Council PSQ25-1441)

- Insufficient infrastructure to support the development, including lack of public transport, police and fire services, the condition of roads and capacity at doctors' surgery and the school
- Will place further strain on existing facilities and utilities
- Will seriously devalue nearby houses
- Site has restrictive covenants on two strips of land – one restriction lasting until 8 June 2041 that no disposition of the registered estate can occur without signed certificates by the three previous owners
- Bicknacre has met its housing requirement with circa. 77 new homes being built/under construction and further affordable housing may be delivered – the village does not need more housing to meet local needs
- Increase in traffic, congestion and on street parking and the degradation of the condition of existing roads – concerns on pedestrian and road safety and quality of life
- Barbrook Way is an unsuitable entrance for any future developments
- Impact on settlement character, loss of village status, environment, settlement boundary and the community
- Concerns on flooding, including Sandon Brook overflowing
- Drainage issues/lack of capacity and sewerage concerns
- Loss of Grade 3 agricultural land – the site has always been used for animal grazing
- Loss of heritage and culture
- Adverse impact on landscape
- Impact on wildlife and their habitats/corridors and lack of environmental surveys e.g. bats and newts
- Disagree with the site's rating (CFS158) in the Strategic Housing and SHELAA – it has been incorrectly scored and should be lower
- The IIA says CFS158 would result in back land development and performs less well to the preferred sites when compared to the Spatial Strategy
- Adverse impact on community spirit
- Impact on neighbour amenity, privacy and loss of views from properties
- Impact on adjacent bridleway
- Contrary to Policy DM8
- Insufficient demand for homes – recently built new homes remain unsold
- Developers are promoting the site for potentially 250 dwellings contrary to the plan
- Concerns about antisocial behaviour and increased crime
- Traffic, congestion, noise, light and road safety concerns during the construction phase of the development
- Junction/road safety concerns, including the location of the drop off point of Sandon School bus at Barbrook Way/Priory Road
- Noise and air pollution impacts – Chelmsford's Air Quality Strategy June 2022 is out of date and air pollution is likely to increase

- Concerns on pedestrian safety, including children and the vulnerable and the lack of/suitable existing footways within the village
- There is a ransom strip at the entrance at the site – the site is not deliverable
- Land contributes to community wellbeing
- There is a water main running through the site – homes cannot be built on this or within its easements
- There is cable running under the access in contract with UK Power
- Concerns for protected trees within and near the site
- Concerns over heritage impacts
- Traffic, congestion, noise, light and road safety concerns during the construction phase of the development
- The alternative sites access would require a long road from the north across two fields, which would not be viable
- Appropriate and sustainable travel connections as stated in para 7.437 would not be achievable due to poor access
- Land has always been a major part of the local drainage system
- Contravenes the European Convention of Human Rights Article 8 - right to respect for your family and private life
- Would be overdevelopment
- Concerns over subsidence impacts on existing dwellings
- Archaeological assessments have not been done
- Select alternative sites available with less impact e.g. in North Chelmsford
- Would affect mental wellbeing and quality of life of existing residents
- Past planning proposals state that the land will be retained for agricultural or grazing
- The site is within the Danbury Ridge Conservation Zone which is an area of special scientific interest the Council is committed to protect
- The Protection of Garden Land (Development Council) Bill is intended to 'protect private gardens from development which is out of character with the surrounding area'
- MP, City Councillor and the Parish Council all oppose the development
- Should consider the developers' alternative entrances or field forming CFS158
- Unclear why less growth is promoted at North Chelmsford compared with the Issues and Options consultation document
- Concerns over car parking on nearby roads
- Concerns over consultation process and lack of awareness locally - portal is not user friendly and creates significant barriers to public participation
- No response received to the SHELAA rating question to Chelmsford Policy Board on 16 January 2025.

CCC response
The site allocation is supported by the plan evidence base including a Strategic Flood Risk Assessment, Landscape Sensitivity, Archaeology Assessment and Capacity Study 2024 and traffic modelling. The Small Sites Planning Briefs/Concept Framework 2024 (appended to the Submission Spatial Strategy and Strategic Sites Topic Paper) considers that there are no overriding site constraints which mean that the site is unsuitable or undeliverable.

The Local Plan is informed by an Air Quality Assessment 2024 which overall concludes that the impact of the Local Plan in 2041 can be considered negligible for all pollutants.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
The site is proposed for expansion in the Focused Consultation Additional Sites Document to support increased housing requirements.
The Council is confident that the site can be accessed from Barbrook Way and that the site is deliverable – see Appendix 3 for a letter from the site promoters' Welbeck Land.
To meet our development needs it is inevitable that some agricultural land will be used for development.
Site policy includes new requirements to undertake an archaeological assessment and to assess, and where appropriate mitigate, the potential cumulative effect on the designated features of Thrift Wood SSSI.
Heritage Impact Assessments have been undertaken and were published alongside the Preferred Options Local Plan. Site policies consider significance of designated and non-designated heritage assets.
The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
The site policy requires the retention of existing natural landscaping and trees on the boundary of the site.
Objections relating to the breach of Article 8 protections are not supported with evidence to demonstrate a disproportionate or exceptional interference with private or family life that would warrant overriding the public interest in a site allocation for housing. Concerns raised relate to planning matters, which can and should be addressed through the planning application process.
The Danbury Ridge Conservation Zone is no longer a planning designation/policy.
The Protection of Garden Land (Development Council) Bill had a First Reading in Parliament in February 2009 but was then dropped by its sponsor.
The site (CFS158) scores and rating in the Strategic Housing and Employment Land Availability Assessment (SHELAA) will be re-considered in the next assessment due to be considered prior to submission of the Regulation 19 Local Plan. The SHELAA does not allocate land for development – it is one evidence document that helps the Council make informed decisions on where to allocate future development.
The IIA Report assessed the option across a range of criteria, including accessibility and connectivity to services.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process. Further expansion of North East Chelmsford (Chelmsford Garden Community - Location 6) was discounted following the Issues and Options consultation as promoted development sites were found to not be deliverable within the plan period given permitted mineral extraction and land remediation works.
The consultation exceeded requirements set out in legislation and the Council's Statement of Community Involvement.

Location 12 – St Giles, Bicknacre

Growth Site Policy 12 – St Giles, Moor Hall Lane, Bicknacre

Consultation point	Total number of responses
Growth Site Policy 12 – St Giles, Moor Hall Lane, Bicknacre	2

Summary of Representations – main issues and requested changes:

- Support the allocation (Woodham Ferrers & Bicknacre Parish Council PSQ25-6491)
- We welcome the policy requirement to assess, and where appropriate mitigate, the potential cumulative effect on the designated features of Thrift Wood SSSI (Natural England PSQ25-6257).

CCC Response
No comments.

Location 13 – Danbury

Strategic Growth Site Policy 13 – Danbury

Consultation point	Total number of responses
Strategic Growth Site Policy 13 – Danbury	6

Summary of Representations – main issues and requested changes:

- Welcome the policy requirements to conserve and enhance SSSIs and the expected partnership working with managers of the SSSIs and other key stakeholders (Natural England PSQ25-6258)
- Ministry of Defence (MOD) Safeguarding criteria would apply in relation to renewables development such as power lines or wind generation at specified heights on sites within this policy (Defence Infrastructure Organisation PSQ25-6411)
- Impacts on the SSSIs and Ancient Woodlands should be assessed at the Local Plan stage and scale, rather than for individual planning applications, so that cumulative impacts and mitigation can be adequately assessed (National Trust PS25-172)
- Suggest policy text amendment relating to site infrastructure requirements to include financial contributions towards other community facilities including healthcare provision as required by the NHS Mid and South Essex Integrated Care Board and police, ambulance and fire and rescue facilities (East of England Ambulance Service NHS Trust PSQ25-5247)

- An additional housing allocation could be made within Danbury to supplement the allocations made within the neighbourhood plan without significantly conflicting with the proposals of that plan (Gladman Developments Ltd PSQ25-6321)
- The policy should be amended to include the allocation of land to the south of Maldon Road, Danbury for a further 185 dwellings to ensure an adequate housing land supply is available (Richborough PS25-314).

CCC Response
MOD safeguarding criteria are noted.
Impacts on SSSIs and Ancient woodlands are addressed by the Integrated Impact Assessment through Objective 1, and Section 7 in particular; and within the Danbury Neighbourhood Plan at Policy DNP9 - Recreational Pressure on Sites of Special Scientific Interest.
The site allocation policies within the Danbury Neighbourhood Plan include financial contributions towards other community facilities, with remaining requirements covered by Strategic Policy S9 and S10 relating to infrastructure.
The Parish Council has selected the sites through a community-led approach, which is considered to be reasonable in relation to significant local constraints, and which resulted in the selection of the five chosen sites.

Location 17 – East Hanningfield

Growth Site Policy 17a – Land North of Abbey Fields, East Hanningfield

Consultation point	**Total number of responses**
Growth Site Policy 17a – Land North of Abbey Fields, East Hanningfield	8

Summary of Representations – main issues and requested changes:

- Support the allocation and policy requirements, but a higher quantum of development than 11 dwellings may be possible. The delivery of site could be within two years of the plan adoption (Chelmsford Diocese Board of Finance PSQ25-716)
- The developments are not wholly within the defined settlement
- Impact on local roads and surrounding areas – the village is already an extremely busy ‘rat run’
- Despite what is set out in the plan, recent local developments have resulted in very few truly affordable homes
- Impact on landscape
- Loss of good quality agricultural land
- Loss of biodiversity and habitat
- Surface waterflood risks as experienced by existing residents and as set out in the SFRA Level 2 Detailed Site Summary Table (CC010-A) which also rates the site as ‘Amber’ for flood risk
- Provision for the maintenance of the proposed SuDS must be provided

- Site capacity will be 0.8ha as part is at risk of deep surface water flooding – 11 dwelling will be too high and out of keeping with the existing development
- Inadequate sewerage capacity – this was why previous development was refused
- There is inadequate drainage in the village
- Site is unsuitable for development as it is identified as a Flood Priority Catchment in Anglian Water's Drainage Plan and Wastewater Management Plan (DWMP)
- Lack of integral garages/substantial driveways/ limited parking to comply with Essex Guidelines for Developers will increase roadside parking and be out of keeping with the local area
- Access to the site from Abbey Fields is too narrow to allow a full width road with pavements to provide a safe and adequate access for vehicles, pedestrians and cyclists, and additional land to widen the site entrance is not available
- Housing density will be 80% greater than the current homes contrary to the site policy design and layout requirements
- Impact on/lack of local services including inadequate school capacity and public transport
- Increase/exacerbation of traffic, congestion and on street parking in Abbey Fields and junction/road safety concerns
- Loss of wildlife habitat/impact on biodiversity, trees (including preserved trees) and landscaping
- Noise and pollution impacts
- The consultation process was inadequate, lacking sufficient community engagement and accessibility
- There was no community consultation on this proposal prior to its publication.

CCC response to the comments made
The site allocation is supported by the plan evidence base including Strategic Flood Risk Assessments, Sequential and Exception Test, Water Cycle Studies, Landscape Sensitivity and Capacity Study, Air Quality Assessment and traffic modelling. The Small Sites Planning Briefs/Concept Framework 2024 (appended to the Submission Spatial Strategy and Strategic Sites Topic Paper) considers that there are no overriding site constraints which mean that the site is unsuitable or undeliverable. The site allocation is considered sustainable and consistent with the plan priorities and other policies including the Spatial Strategy
The risk from surface water is identified in the Level 2 Strategic Flood Risk Assessment together with recommendations for making the site safe.
No objection has been received from Anglian Water for the development.
The entirety of Chelmsford city is within the 'Flood Priority Catchment', which goes as far as East Hanningfield. Developers should consult Anglian Water as part of any development proposal to ensure development does not exacerbate existing issues and maximise opportunities for development to deliver benefits in line with the long-term strategic aims set out in Anglian Water's DWMP.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.

The ‘small sites’ (under 1ha) are an important part of the Plan to ensure delivery of a variety of sites in a timely manner, and to meet NPPF requirements to provide 10% of small sites.
The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
The site policy requires the character, scale and layout of the development to have regard and respond to the site’s surrounding context.
The site policy requires the retention of existing natural landscaping and trees in and on the boundary of the site.
The consultation exceeded requirements set out in legislation and the Council’s Statement of Community Involvement.

Growth Site Policy 17b – Land East of Highfields Mead, East Hanningfield

Consultation point	**Total number of responses**
Growth Site Policy 17b – Land East of Highfields Mead, East Hanningfield	5

Summary of Representations – main issues and requested changes:

- Support commitment to the allocation not exceeding 1 hectare in size
- Support the proposed area for biodiversity
- The developments are not wholly within the defined settlement
- Despite what is set out in the plan, recent local developments have resulted in very few truly affordable homes
- Development would be contrary to the plan’s Strategic Priorities and many Strategic Policies
- East Hanningfield is an inappropriate site for further development which would put additional strain on village facilities
- Loss of good quality agricultural land
- Impact on landscape
- Limited existing infrastructure to support the development, including public transport and capacity at doctors’ surgery and school
- Development should be required to improvement facilities for children/young people and public transport/bus services and cycle links to other settlements
- Loss of wildlife habitat/impact on biodiversity, landscaping and trees (including protected trees and great crested newts
- Proposal contradicts the council's duty to conserve biodiversity under the NPPF) and the local Biodiversity Action Plan
- Increase in traffic, congestion and on street parking
- Development must include a new pavement along Bicknacre Road and crossing point improvements, traffic calming measures and extensions of the 30mph speed limit
- Concerns on safety of pedestrians and cyclists
- Concerns on flooding
- Inadequate drainage infrastructure and sewerage

- Impact on settlement character
- Impact on neighbour amenity including a loss of privacy
- The consultation process was inadequate, lacking sufficient community engagement and accessibility
- There was no community consultation on this proposal prior to its publication.

CCC response to the comments made
The site allocation is supported by the plan evidence base including Strategic Flood Risk Assessments, Sequential and Exception Test, Water Cycle Studies, Landscape Sensitivity and Capacity Study, Air Quality Assessment and traffic modelling. The Small Sites Planning Briefs/Concept Framework 2024 (appended to the Submission Spatial Strategy and Strategic Sites Topic Paper) considers that there are no overriding site constraints which mean that the site is unsuitable or undeliverable. The site allocation is considered a sustainable and deliverable locations for development and consistent with the plan priorities and other policies including the Spatial Strategy.
No objection has been received from Anglian Water for the development.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
The 'small sites' (under 1ha) are an important part of the Plan to ensure delivery of a variety of sites in a timely manner, and to meet NPPF requirements to provide 10% of small sites.
The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
The site policy requires the character, scale and layout of the development to have regard and respond to the site's surrounding context.
The site policy requires the retention of existing natural landscaping and trees in and on the boundary of the site. Other plan policies seek to conserve and enhance priority habitats and species and that new developments provide a minimum 10% biodiversity net gain above the existing ecological baseline value of the site.
The consultation exceeded requirements set out in legislation and the Council's Statement of Community Involvement.

Special Policy Areas (SPA)

Consultation point	Total number of responses
Special Policy Areas (paragraphs 7.464-7.465)	4
Policy SPA1 – Broomfield Hospital Special Policy Area	0
Policy SPA2 – Chelmsford City Racecourse Special Policy Area	0
Policy SPA3 – Hanningfield Reservoir Special Policy Area	2

Policy SPA4 – RHS Hyde Hall Gardens Special Policy Area	0
Policy SPA5 – Sandford Mill Special Policy Area	4
Policy SPA6 – ARU Writtle Special Policy Area	3

Summary of Representations – main issues and requested changes:

- Several SPAs are identified for expansion or alterations to road infrastructure. There should be engagement with the Road Policing Team to ensure access for emergency vehicles during the construction and final build stages (Essex Police PSQ25-2667)
- Support SPA rationale. Designate the former BAE Systems site as a SPA to guide its future redevelopment given its unique and historical context and potential need to provide future specialist electronic technology floorspace related to defence. It meets similar criteria to other SPAs within the Green Belt and satisfies the NPPF definition of 'Grey Belt' (Rosehart Properties Ltd PSQ25-3199)
- Propose that the Cranham Road site be allocated as a rural employment area, an extension to Drakes Lane Employment Policy or a Special Policy Area. The site has extant planning permission for employment development and will contribute towards the local economy. The site meets the SPA objectives in para 7.463 and a SPA allocation would provide a clear basis for determining future applications (W & H Marriage & Sons Limited PSQ25-6062)
- SPA3 - support policy approach but expand to include proposals for renewable energy which would reduce reliance on the grid and contribute towards achieving climate change goals (Essex & Suffolk Water PSQ25-5837)
- Remove requirement to show a demonstrable need for a renewable energy scheme as the treatment works is a regulated industry (Essex & Suffolk Water PSQ25-5837)
- SPA3 - delete requirement for very special circumstances for water infrastructure and ancillary development to demonstrable need and be directly associated with the role, function and operation of the operation of the site. The policy should recognise that the treatment works is only a part of the water infrastructure at the site and there is other infrastructure which may need to be upgraded or replaced (Essex & Suffolk Water PSQ25-5837)
- SPA3 - include new text to support, in principle, appropriate proposals including additional infrastructure requirements linking the site to the wider water infrastructure network, renewable energy and leisure activities to enable proposals benefiting ecological and health considerations to come forward (Essex & Suffolk Water PSQ25-5837)
- SPA3 - we would be pleased to comment early in the application process on the details of avoidance and mitigation measures deemed necessary for proposed developments that may impact on Hanningfield Reservoir SSSI, particularly through recreational disturbance and effects on water quality (Natural England PSQ25-6259)

- SPA5 - support but point out that the new vehicular access to Maldon Road which is considered essential for servicing is no longer supported by SGS3a (Essex Waterways Ltd PSQ25-5219)
- SPA5 - amend policy to be consistent with SGS3a which requires a new vehicular access road to the Country Park with a new pedestrian and cycle bridge connecting the Country Park to Sandford Mill (Hopkins Homes Ltd PS25-261)
- SPA5 para 7.476 - supports the aims for an appropriate mixed use development linked to the Chelmer and Blackwater Navigation. More emphasis should be placed on the re-use and restoration of existing buildings (Chelmsford Rivers and Canal Link group PS25-282)
- Support. The facility is located within Writtle Key Service Settlement and is a leading institution and key driver for the local economy. As such, the plan should provide new housing allocations near the ARU campus (Vistry Group PS25-303)
- SPA6 - support sympathetic improvements to the ARU Writtle site in line with Green Belt policy. The Norwich to Tilbury powerline proposals will have a significant impact on ARU Writtle (Writtle Parish Council PSQ25-460)
- SPA6 - support principle of the SPA but object to any future expansion of ARU Writtle being dependent on the agreement (the meaning of which is not clear) of a masterplan for the campus. Amend wording to require any future planning applications to maintain National Cycle Route 1 which runs through the 'campus' rather than the 'site' as this places an unnecessary burden on ARU (Anglia Ruskin University PSQ25-6214)
- SPA6 - amend policy to require the replacement of existing buildings or structures to 'accord with national Green Belt policy' rather than 'not have a greater impact on the openness and purposes of the Green Belt' to avoid duplication of national policy (Anglia Ruskin University PSQ25-6214).

CCC response to the comments made
SPAs are defined within and around existing facilities and institutions to enable their operational and functional requirements to be planned in a strategic and phased manner. BAE Systems is already designated as an Employment Area in the Green Belt and most of the designated Employment Area is promoted for residential redevelopment. A SPA designation for this site would not be appropriate.
Land at Cranham Road is being developed for new headquarters for W & H Marriage & Sons Ltd. Other policies in the plan will enable any future proposals to be considered. A SPA designation for this site would not be appropriate.
The plan allocates a range of employment sites to meet the employment floorspace requirements in Policy S6 and to allow for a range of different employment uses to come forward, where appropriate – no further modifications required.
A range of alternative development sites have been considered and rejected when developing the Spatial Strategy. More information is set out in the Spatial Strategy and Strategic Sites Pre-Submission Topic Paper and Preferred Options Local Plan.
SPA3 - A SPA policy designation operated by a regulated industry does not override the requirement to show a demonstrable need for proposals in the Green

Belt. Other plan policies allow appropriate renewable energy proposals and infrastructure proposals for the site to be considered including DM19.
SPA5 – Minor modification will be proposed to update the text to reflect SGS3a and proposals for a new vehicular access road to the Country Park with a new pedestrian and cycle bridge connecting the Country Park to Sandford Mill.
SPA5 - The intention is for most visitors to Sandford Mill to park in the country park car park south of the Navigation and access the site via a foot/cycle bridge. Details of access for commercial vehicles is part of further discussion relating to a current planning application.
SPA6 – Minor modification will be proposed to require any future planning applications to maintain National Cycle Route 1 which runs through the Special Policy Area allocation.
SPA6 – references to proposals not having a greater impact on the openness and purposes of the Green Belt ensure that the policy is clear and precise for decision makers.

Protecting and Securing Important Assets

This section of the consultation document provides other non-strategic policies of the Local Plan that will shape Chelmsford's development opportunities whilst protecting its important physical attributes.

Securing the right types of homes

Consultation point	Total number of responses
Para 8.1	1
Policy DM1 – Size and Type of Housing	17
Policy DM2 – Affordable Housing and Exception Sites	9
Policy DM3 – Policy DM3 – Gypsy, Traveller and Travelling Showpeople Sites	4

Para 8.1

Summary of Representations – main issues and requested changes:

- An additional Development Management policy should be included to address farm diversification and rural business development to align with the NPPF (Elteam Ltd PSQ25-5465)

CCC response
The suite of Development Management Policies adequately cover rural businesses. Any further is not required as it would be unnecessary duplication of the NPPF.

Policy DM1 – Size and Type of Housing

Summary of Representations – main issues and requested changes:

- Support 35% affordable housing but provision should be made to enable residents to have priority for such accommodation, for disabled living homes and bungalows, and an appropriate housing mix for the entire community (Chelmsford Garden Community Council PSQ25-4957)
- Expand Part B (i) to require Passivhaus or BREEAM Excellent (East of England Ambulance Service NHS Trust PSQ25-5249)
- If the demand for self-build has been met through windfall delivery, the 5% requirement should be reduced or removed (Home Builders Federation PSQ25-5476). Policy should set out when self-build plots required through the policy would return to the developer for market housing if not sold (Home Builders Federation PSQ25-5476, Gladman Developments Ltd PSQ25-6324)
- Each type of accommodation will have changing requirements over the plan period and at the decision-making stage of development proposals it is essential that these can be achieved and do not impact the overall viability of the development (Higgins Group PSQ25-5628)
- Delete reference to a required number of dwellings and substitute the words ‘encourage’ and ‘engage’ to align with the PPG. Focusing solely on the local housing need requirement when determining how much self-build is appropriate is not consistent with other factors that affect delivery of self-build including viability. There is no evidence for the 30 and 100 dwelling thresholds. The reasoned justification does not explain why 100 dwellings is an appropriate policy threshold (Croudace Homes PSQ25-6049)
- Part D - although the residential strategic growth sites will need to provide specialist housing this will unlikely meet needs in full so additional allocations are needed (Mrs Mary Rance PSQ25-6497)
- Support requirement for 50% of new dwellings to be constructed to M4(2) standards. Part C requirement for self-build homes and specialist residential accommodation should apply to developments over 100 homes on strategic greenfield sites and is unachievable in high density urban locations and apartment typologies (Dominus Chelmsford Limited PSQ25-6206)
- Support expressed for policy and table 4 but it must remain flexible to change over the plan period e.g. in response to Building Regulations. Include table 4 in the policy if it will be used to determine the housing mix of new developments and amend to percentiles to allow for a mix which is reflective of the specific settlements. The text should refer to the latest SHNA (Dandara PSQ25-6298)
- A dedicated policy for older persons housing is required to meet evidenced significant demand – a suggested policy is proposed. Concerns over the robustness of the 2023 viability assessment which should be re-run using recommended assumptions for sheltered and extra-care housing. Disagree with the PGG in that the viability of specialist older people's housing is considered at the development management stage (Churchill Living and McCarthy Stone PSQ25-6330
- Support appropriate accommodation for older people justified by local housing need. Further clarification is required on the definition/scope of 'Older Persons accommodation’ and its application through the Planning Obligations Supplementary Planning Document. Amend Part D to require ‘up’ to 10% of

market housing to be provided for Older Persons, ‘taking account of local housing needs.’ (Chelmsford Garden Community Consortium PSQ25-6352, Vistry Group PSQ25-6379)

- Part C - amend "taking account of local need" to "taking into account evidence of local need provided either by the applicant or by the City Council and relevant partners" to ensure identifying need is not the sole prerogative of CCC (Vistry Group PS25-141)
- Part D – policy fails to define "Older Persons" and explain the overlap between the requirements for 5% M4(3) properties, for a proportion of affordable housing, and for an element of Specialist Residential Accommodation, and the 10% for "older persons". The policy ignores that 'older persons' may seek a house identical to a younger person’s house limiting the ability of housebuilders to provide market housing that meets demand. Remove Part D in the absence of any justification/explanation (Vistry Group PS25-141)
- Para 8.16 states the Council will refer to the latest assessments of housing need. This will also be informed by the Supported and Specialist Housing and Accommodation Needs Assessment’ commissioned by ECC Adult Social Care expected to be completed in Spring 2025. ECC will work with CCC to determine how the findings of the assessment can inform other documents, such as the Planning Obligations SPD and future planning application responses (Essex County Council PS25-234)
- Support policy but give stronger support to Build to Rent, to fully comply with national guidance on properly assessing the needs of those who want to rent and reflect the demand for rented homes and the benefits of delivery of this tenure. Expand para 8.6 to refer to the SHNA and where viable, the inclusion of Build to Rent as part of a wider housing mix (Wates Developments and Hammonds Estates LLP PS25-327)
- Support Part D in principle but this should be an aim rather than a fixed target and subject to local housing demand assessed at the time of the planning application. Expand Part D) (i) to require 10% "subject to an assessment of local housing demand" (Wates Developments and Hammonds Estates LLP PS25-327)
- Housing policies should reference the Co-Living Housing Advice Note or include allowances and flexibilities for co-living accommodation to come forward where it otherwise complies with the Advice Note. The Housing Topic Paper should also reference the Advice Note (Highgate Capital Limited PSQ25-5331)
- Allocate a co-living site in Chelmsford City Centre (Highgate Capital Limited PSQ25-5331)
- Unclear which viability assessment has considered the cumulative impact of the plan polices as there are differences in the inputs and outputs of each e.g. for DM31 and DM25. A list of differences and the reasons is required to show that the plan is deliverable. Some of the costs are too high e.g. the sales values of affordable rented housing and the value of S106 affordable homes. Other costs are too low e.g. delivering BNG and meeting policy DM31. Further viability work should be undertaken (Home Builders Federation PSQ25-5477).

CCC Response
The housing mix in Policy DM1 is informed by latest Strategic Housing Needs Assessment. The Council seeks nomination right to 100% of initial lets on new build dwellings to be offered to people on the Council's Housing Register. To join the Housing Register an application must have a location connection to Chelmsford.
BREEAM does not apply to newly built dwellings. The net zero evidence base established for Essex includes a Net Zero Carbon Viability Study by Three Dragons consultant which provided an assessment of building to higher energy efficiency standards similar to Passivhaus.
The demand for self and custom build has not been met in the latest monitoring period. For Base Period 6 the Council has recorded a deficit of 37 planning permissions.
If self-build plots required through Policy DM1 are not sold within a specific marketing period they can return to market housing. This is specified in the Planning Obligations Supplementary Documents, which is appropriate as it supplements the implementation of appropriate planning policies.
The latest Strategic Housing Needs Assessment considers the need for different types and sizes of accommodation over the plan period. The Local Plan is also subject to review at least every five years. Text relating to particular circumstances that justify the need for a viability assessment in Policy DM2 will be proposed to be moved to Strategic Policy S10 so it is clear this applies equally to all planning obligations.
The Self-build and Custom Housebuilding Act 2015 (as amended by the Housing and Planning Act 2016) mandates that relevant local authorities keep a register of individuals and community groups who express interest in acquiring serviced plots of land for self-build and custom household projects. National Planning Practice Guidance states that local authorities must have regard to their Self and Custom Build Register when carrying out their planning, housing and disposal and regeneration functions. Relevant authorities must give suitable development permission to enough suitable serviced plots of land to meet the demand for self-build and custom housebuilding in their area. The level of demand is established by reference to the number of entries added to an authority's register during a base period. At the end of each base period, relevant authorities have 3 years in which to permission an equivalent number of plots of land, which are suitable for self-build and custom housebuilding, as there are entries for that base period. The Council has not been able to meet this demand in the last published Base Period (6). Self-build and custom housebuilding can be provided as market housing, and the 5% requirement was considered in the viability update of the emerging Local Plan which concluded that a requirement for self-build plots is unlikely to adversely impact on viability. The Reasoned Justification to Policy DM1 explains that the 5% requirement for self and custom build dwellings on larger housing schemes provides a supply from allocated sites that addresses the average rate of new applications to the register across the plan period. The Council cannot rely on windfall to meet the legal requirement to grant the required number of planning permissions in each base period. The requirement for wheelchair accessible housing was justified in the Examination of the adopted Local Plan (see EB056) and no changes are proposed. The thresholds for both Wheelchair Accessible Housing and Specialist Residential Accommodation are determined by the ability to secure one dwelling with the application of the respective requirements. Further

explanation on both is provided in the adopted and consultation draft Planning Obligations SPD and has been considered in the latest Local Plan Viability Update.
Table 4 is based on demographic analysis and the plan is reviewed every 5 years so does not need to be more flexible than a percentage range.
Policy DM1 already recognises the importance of a choice of attractive housing options for older households with the introduction of 10% of market housing to meet their needs on sites of more than 500 dwellings. This does not preclude windfall provision which has and will continue to come forward. This could include wheelchair user dwellings in the market sector if required / evidenced. The Council expects Building Regulations to mandate all new homes to be built to accessible and adaptable standards and has allowed for this in the Local Plan Viability update but does not need to introduce this as a policy change.
The 10% is related to different types of supported housing for older people in the latest Strategic Housing Needs Assessment but this also notes a need for 637 wheelchair user homes in the 2022-41 period (around 34 per annum). 'Up to' would not be at the appropriate level and could result in a zero contribution. This does not provide sufficient clarify. The requirement is flexibly worded to enable delivery that includes specialist market housing as well as wheelchair user housing.
Para 8.16 refers also to Essex County Council and other evidence base assessments referred to/recommended by National Planning Practice Guidance e.g. Gypsy and Traveller Accommodation Assessment, Strategic Housing Needs Assessment, so it is not currently drafted to be the sole prerogative of Chelmsford City Council.
The wheelchair accessible requirement of Policy DM1 is required to meet the needs on the Housing Register from wheelchair dependent applicants and was justified at the examination of the adopted Local Plan. Specialist Residential Accommodation is broadly defined but it does relate to households in housing need as set out in Policy DM1. It is therefore justifiable that the Specialist Residential Accommodation requirement relates to evidence on households in housing need requiring supported housing that are identified in the normal way i.e. through the Strategic Housing Needs Assessment, Housing Strategy and Essex County Council assessment of housing support needs. The Specialist Residential Accommodation requirement doesn't relate to demand for supported market housing for people that have a support need but not a housing need. These are largely older people that might benefit for market housing for older people that offers support and / or more accessible housing. The evidence is taken from the Strategic Housing Needs Assessment i.e. the 10% for supported housing in the market sector for older people. These households will be able to financially acquire supported housing in a way which households in housing need cannot.
The Co-living Planning Advice Note is referenced in the consultation draft Planning Obligations Supplementary Planning Document, which is considered the appropriate place as this deals with implementation of policies.
The Regulation 19 Viability Note summarises the changes that were appraised compared to the Regulation 18 assessment and concludes that the Council can continue to rely on the 2023 (Regulation 18) Viability Report.
There are a range of Specialist Residential Accommodation needs identified which can be met on a brownfield or greenfield typology alternatively the Specialist Residential Accommodation Planning Advice Note and/or Planning Obligations

Supplementary Planning Document provide an option for a commuted sum in lieu of on-site provision. The Planning Obligations Supplementary Planning Document also provides advice on flatted development and notes that where there is evidence of local demand for serviced plots but they are not possible e.g. flatted schemes, the Council will require the provision of 'complete shell' or 'self-finish' units where the purchaser can then define internal layouts, finished and fixings as well as any exterior landscaping for flats with private gardens.

Policy DM2 - Affordable Housing and Exception Sites

Summary of Representations – main issues and requested changes:

- Support expressed for policy (Croudace Homes PSQ25-6050, Dandara PSQ25-6299)
- To better align with the NPPF and enhance flexibility, amend parts B and D to allow a higher proportion of market housing where justified by a viability assessment (specific wording proposed) (Elteam Ltd PSQ25-5460)
- The viability profile of developments will change over the plan period and will need to be balanced alongside other policy requirements and costs such as biodiversity net gain (Higgins Group PSQ25-5629)
- A "one-sized fits all" policy discourages a brownfield first approach. Policy should include a reference to the Vacant Building Credit (Dominus Chelmsford Limited PSQ25-6207)
- Flawed assumptions underpin the Council's viability assessment and the evidence base for the conclusions on Build to Rent in para 8.3 are unsound (Dominus Chelmsford Limited PSQ25-6207)
- No guidance is provided on "comprehensive review mechanism" in part A which can be a disincentive to developers including bank finance (Dominus Chelmsford Limited PSQ25-6207)
- There are barriers to securing delivery of rural small-scale affordable housing schemes (see Braintree Issues and Options Consultation Document, 2025), so larger site allocations could be more favourable (Dandara PSQ25-6299)
- The housing requirement is unjustified as drafted, so the Viability Assessment must consider whether the plan is viable against the requirements of the NPPF 2024 (Gladman Developments Ltd PSQ25-6325)
- There is a clear need to increase the supply of accessible and adaptable dwellings and wheelchair user dwellings as well as providing specific provision of older persons housing. Higher M4(2) and M4(3) requirements are proposed whilst maintaining flexibility in the policy. Requiring 35% affordable housing from older persons housing development is not justified. Concerns over the robustness of the 2023 viability assessment which should be re-run using recommended assumptions for sheltered and extra-care housing (Churchill Living and McCarthy Stone PSQ25-6329)
- Amend policy to require 35% affordable housing 'subject to viability' so the policy would not undermine the delivery of the plan (Vistry Group PSQ25-6386)
- The increasing affordability ratio and gross historic under delivery of affordable housing justifies provision of a 20% supply buffer above the minimum housing figure. Plan should allocate more small-medium site

allocations which could deliver affordable homes quicker than bigger sites. (Richborough PS25-174)

CCC Response
Part B of Policy DM2 as drafted has enabled the delivery of several rural exception sites in Chelmsford. If market housing were allowed to exceed 50% the policy would conflict with paragraph 82 of the NPPF (2024) which says 'some'. The purpose is to deliver affordable housing to meet identified local needs and to have the majority as market housing would not achieve this national policy aim. Paragraph 76 of the NPPF (2024) grants local planning authorities' discretion to enable market homes on Community-led exception sites. To align the proportion with the policy wording for First Homes Exception Sites provides parity between the different options and doesn't indirectly promote one option over the other.
The First Homes Planning Practice Guidance (Paragraph: 027 Reference ID: 70-027-20210524) expressly states that they can deliver a small proportion of market housing, if it can be demonstrated that this is necessary in order to ensure the overall viability of the site. 20% is considered an appropriate interpretation of small. The overall site size reference isn't arbitrary it follows the same advice provided in the NPPF (2024) for Community-led development (footnote 36 / footnote 37 in the 2023 NPPF). Once again this provides parity between the two different types of exception site. The First Homes Planning Practice Guidance (Paragraph: 026 Reference ID: 70-026-20210524) encourages local authorities to set policies which specify their approach to determining the proportionality of First Homes exception site proposals and the sorts of evidence that they might need in order to properly assess this.
The policy requirements of the Local Plan have been assessed in the Local Plan viability update and a balance reached in terms of different priorities. They will be kept under review through the Infrastructure Delivery Plan and Policy DM2 recognises that there may be particular circumstances justify the need for a viability assessment at planning application stage. The Local Plan must also be reviewed every 5 years.
A one sized fits all policy doesn't discourage a brownfield first approach when the plan recognises that there may be particular circumstances justify the need for a viability assessment at planning application stage. The Vacant Build Credit and a calculation for it has long be referenced/included in the adopted Planning Obligations Supplementary Planning Document.
The Council does not expect to allocate sites specifically for Build to Rent development however a flatted scheme and a housing scheme were modelled. The results showed that that Build to Rent housing is likely to be viable and deliverable – and to have capacity to bear more than 20% affordable housing, but flatted development is unlikely to be. Planning Practice Guidance specifically anticipates that the viability of Build to Rent schemes will be considered at the development management stage. It is therefore not considered proportionate to develop a specific set of policies in this regard. As set out above, the Council does not expect to allocate sites specifically for Build to Rent development. In any event, such flatted development is unlikely to be viable, even without affordable housing. Consequently, the Council should be cautious about relying on Build to Rent schemes to deliver development, unless there is clear evidence that such development would be forthcoming.

Guidance on the review mechanism is provided in paragraphs 8.35 and 8.36 and the consultation draft Planning Obligations Supplementary Planning Document.
The Council is proposing to adopt the national threshold of 10 dwellings for affordable housing contributions to maximise delivery. The Local Plan viability update does not evidence a difficulty of securing affordable housing on these threshold sites especially in greenfield locations.
The removal of the requirement to provide First Homes improves viability as developers would be required to revert to shared ownership with the same 30% proportionate discount but a lower profit margin. The Council is still requiring 10.5% shared ownership so complies with the requirements of the 2023 NPPF. The Council considered whether to include a social rent target but decided to maintain a higher proportion of affordable housing overall. The 'new' Golden rules are subject to national policy guidance.
The delivery of specialist housing schemes was considered at the end of Chapter 10 of the 2023 Viability Update (from paragraph 10.66). The delivery of Sheltered Housing, Extracare Housing and Integrated Retirement schemes are all shown as being viable and generating a residual land value well in excess of the Benchmark Land Value.
The Council has tested viability of all the policies in the plan and across the majority of typologies this level of affordable housing in combination with other requirements is viable. Policy DM2 acknowledges that there might be circumstances where a viability assessment is required at planning application stage.
The Council is proposing to adopt the national threshold of 10 dwellings for affordable housing contributions to maximise delivery.

Policy DM3 – Gypsy, Traveller and Travelling Showpeople Sites

Summary of Representations – main issues and requested changes:

- Welcome reference to protecting the Green Belt (Writtle Parish Council PSQ25-461)
- In line with planning policy, any future provision should be outside this Parish as there is already existing substantial provision within this Parish (Chelmsford Garden Community Council PSQ25-4952)
- Requirement to meet all 10 criteria is unworkable. Some of the language needs to be tempered and/or clarified including for proposals to 'have no adverse impact'. Add "significantly" before "adverse impact" in criterion (ii) and (vi). Add "normally" before "considered appropriate within the Green Belt or Green Wedge" in para 8.50 to be consistent with national policy guidance (Mr D Bibby and Family and Colleagues PSQ25-6357, PSQ25-6358).

CCC Response
Gypsy and Traveller and Travelling Showpeople sites are allocated as small sites so that they do not dominate the nearest settled community, even if counted collectively across a community council area.
As drafted, Policy DM3 is reasonable. It creates a hierarchy of scope for windfall sites of very special circumstance in the Green Belt, no adverse impact in the Green Wedge, and no significant adverse impact in the Rural Area. It is

considered correct to distinguish between an adverse impact and an impact. An adverse impact can be mitigated by an appropriate layout and landscaping. It is considered reasonable to safeguard important heritage and natural environmental assets/environs. The addition of “normally” to paragraph 8.50 will be supported as a proposed minor modification and adds clarity.

Securing Economic Growth

Consultation point	Total number of responses
Policy DM4 – Employment Areas and Rural Employment Areas	2
Policy DM5 – Designated Centres	0

Policy DM4 – Employment Areas and Rural Employment Areas

Summary of Representations – main issues and requested changes:

- The employment and sustainability policies are potentially incongruous. A small-scale alteration to the Green Wedge/Green Belt boundary should be considered and an extension to the Employment Area allowed at Robjohns Road, Rodney Way in line with national policy (Saxtons 4x4 PSQ25-6109)
- Remove the Employment Area designation from the western part of the former Kay-Metzeler site (SGS1x in the Preferred Options Consultation Document) and allocate it for residential and commercial development. This could form part of ‘New Street to Anglia Ruskin University’ Opportunity Corridor (HEVF Self Storage UK Limited PSQ25-6338).

CCC response
The Green Wedge is a locally important designation. Changes to the Green Wedge boundaries to allow development growth has been discounted as there is sufficient and suitable land elsewhere to meet development needs in a sustainable way. No Green Wedge Review is required.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process; and can meet its development requirements without needing to undertake a Green Belt review. This approach accords with National Planning Guidance.
The Council will review its Five Year Housing Land Supply prior to Submission of the Local Plan and should further housing allocations / changes to the forecast delivery be required, these changes will be included as proposed minor modifications to the Plan.

Policy DM5 – Designated Centres

No main issues

Protecting the Countryside

Consultation point	Total number of responses
Policy DM6 – New Development in the Green Belt	8
Policy DM7 – New Buildings and Structures in the Green Wedge	7
Policy DM8 – New Buildings and Structures in the Rural Area	4
Policy DM9 – Infilling in the Green Belt, Green Wedge and Rural Area	2
Policy DM10 – Change of Use (Land and Buildings) and Engineering Operations	0
Policy DM11 – Extensions to Existing Buildings within the Green Belt, Green Wedge and Rural Area	0
Policy DM12 – Rural and Agricultural/Forestry Workers' Dwellings	0

Policy DM6 – New Development in the Green Belt

Summary of Representations – main issues and requested changes:

- Policy needs to follow the 2024 NPPF (J & T Wardrop and the Wardrop Trust) including in relation to previously developed land and affordable housing need (Hill Residential Ltd PS25-381)
- The policy replicates the 2023 NPPF. Update to reflect the 2024 NPPF to avoid uncertainty and ambiguity for decision makers - see the emerging West Suffolk Local Plan as an example (Chelmsford City Football Club PS25-215)
- Policy provides no detail on the level or scale of development acceptable within the Green Belt and limits infill opportunities (Higgins Group PSQ25-5630)
- Amend the Green Wedge/Belt to extend the western boundary of Robjohns/Widford Employment Area. This site has limited value in the openness of the Green Belt, is inconsistent with the Green Wedge criteria and conflicts with Policy DM4. The employment extension could support growth in this sustainable location, with existing transport and pedestrian links (Saxtons 4x4 PSQ25-6110).

CCC response
Development growth in the Green Belt has been discounted as there is sufficient and suitable land is available outside the Green Belt to meet the development needs in a sustainable way. A Green Belt Review is not required.
The Pre-Submission Local Plan will be examined under the 2023 NPPF so the plan policies have been written to accord with this national policy document. The 2023 NPPF does not refer to Grey Belt.
The Green Wedge is a locally important designation. Changes to the Green Wedge boundaries to allow development growth has been discounted as there is sufficient and suitable land elsewhere to meet development needs in a sustainable way. No Green Wedge Review is required, and the deletion of Green Wedge policies would be inappropriate.
The policy includes details on the type and size of new development that may be acceptable in the Green Belt and directs to other relevant policies in the plan. Para 5.1 of the plan says that its policies should be read a whole.

Policy DM7 – New Buildings and Structures in the Green Wedge

Summary of Representations – main issues and requested changes:

- Support the policy which clarifies that utility infrastructure including water recycling and treatment sites is appropriate within the Green Wedge (Anglian Water Services Ltd PSQ25-6393)
- Support in principle but it is too restrictive on development in the Green Wedge. Amend Para 8.87 to allow consideration of harm to the openness, role and / or function of landscapes on a case-by-case basis (Chelmsford City Football Club PS25-218)
- Para 8.92 – it is unclear what is meant by ‘regional centre’ type facilities and restricting development to ‘local’ community facilities in unjustified (Chelmsford City Football Club PS25-218)
- Policy is overly restrictive without a detailed assessment to ensure land within the Green Wedge performs its intended purposes. A more positive approach to sustainable development is needed to realise the Green Wedge objectives (Mr J Bolingbroke PSQ25-5521)
- Unclear why a residential development must meet Part A in addition to demonstrating that it would not conflict with the purposes of the Green Wedge (Mr J Bolingbroke PSQ25-5521)
- Questions the need for the policy as less restrictive planning policies can protect the open countryside. Undertake a Green Wedge Review to allow growth in sustainable locations which protect Green Wedge purposes including in Broomfield (Obsidian Strategic Asset Management Ltd PSQ25-5713)
- The Green Wedge seems to be afforded the same level of protection as Green Belt although it is a local spatial designation more steered towards landscape, environmental attributes and public accessibility rather than openness. Allocate sites/amend the designation for land which does not perform strongly against Green Wedge functions (The Bucknell Family PS25-293)

- Amend policy to support higher employment and housing growth, including addressing unmet housing needs of neighbouring authorities. The IIA has failed to properly assess all sites within the Green Wedge (The Bucknell Family PS25-293)
- The current approach to the DSB is overly reliant on arbitrary boundaries which does not feature in the NPPF. Rather than stifling growth in a Key Service Settlement, a flexible, sustainable outlook could be adopted. This would enable contribution on merit for deliverable well connected sustainable sites including in Great Leighs (Mrs Helen Sadler PS25-58, PS25-59)
- Alternative strategies and new/expanded site allocations promoted by landowners/developers.

CCC response
Minor modification will be proposed to clarify 'regional centre' type facilities.
The Green Wedge is a locally important designation, and the policy and designation are supported by the plan evidence base. Changes to the Green Wedge boundaries to allow development growth has been discounted as there is sufficient and suitable land elsewhere to meet development needs in a sustainable way. No Green Wedge Review is required.
The Settlement Hierarchy is just one of several considerations for the Spatial Strategy, along with the Vision and Spatial Principles, and is considered to be a robust approach.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process and can meet its development requirements without needing to allocate land in the Green Wedge. More information is set out in the Spatial Strategy and Strategic Sites Topic Paper and Preferred Options Local Plan.

Policy DM8 – New Buildings and Structures in the Rural Area

Summary of Representations – main issues and requested changes:

- Policy should allow development of regional scale community facilities (Chelmsford City Football Club PS25-219)
- The current approach to the DSB is overly reliant on arbitrary boundaries which does not feature in the NPPF. Rather than stifling growth in a Key Service Settlement, a flexible, sustainable outlook could be adopted. This would enable contribution on merit for deliverable well connected sustainable sites including in Great Leighs (Mrs Helen Sadler PS25-56).

CCC response
Para 8.103 sets out that community facilities with a wider than local catchment area will be assessed on a site-by-site basis.

The Settlement Hierarchy is just one of several considerations for the Spatial Strategy, along with the Vision and Spatial Principles, and is considered to be a robust approach.
Minor modification will be proposed to para 8.100 to reference to fire & rescue, police and ambulance services instead of emergency services.

Policy DM9 – Infilling in the Green Belt, Green Wedge and Rural Area

Summary of Representations – main issues and requested changes:

- Policy is overly restrictive and contrary to the 2024 NPPF making it unclear for decision-makers. Also unclear how a decision-maker will determine if a gap is 'small' (Mr J Bolingbroke PSQ25-5522)
- Amend the Green Wedge/Belt to extend the western boundary of Robjohns/Widford Employment Area. This site has limited value in the openness of the Green Belt, is inconsistent with the Green Wedge criteria and conflicts with Policy DM4. The employment extension could support growth in this sustainable location, with existing transport and pedestrian links (Saxtons 4x4 PSQ25-6111)
- Alternative strategies and new/expanded site allocations promoted by landowners/developers.

CCC response
The reasoned justification already sets out how to determine a 'small' gap.
The Pre-Submission Local Plan will be examined under the 2023 NPPF so the plan policies have been written to accord with this national policy document.
The Green Wedge is a locally important designation. Changes to the Green Wedge boundaries to allow development growth has been discounted as there is sufficient and suitable land elsewhere to meet development needs in a sustainable way. No Green Wedge Review is required, and the deletion of Green Wedge policies would be inappropriate.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.

Policy DM10 – Change of Use (Land and Buildings) and Engineering Operations

No main issues

Policy DM11 – Extensions to Existing Buildings within the Green Belt, Green Wedge and Rural Area

No main issues

Policy DM12 – Rural and Agricultural/Forestry Workers' Dwellings

No main issues

Protecting the Historic Environment

Consultation point	Total number of responses
Policy DM13 – Designated Heritage Assets	2
Policy DM14 – Non-Designated Heritage Assets	3
Policy DM15 - Archaeology	1

Policy DM13 – Designated Heritage Assets

Summary of Representations – main issues and requested changes:

- Supports policy (Historic England PSQ25-5816)
- Acknowledges the importance of Chelmsford heritage assets. Heritage indirectly features within designing out crime in many respects (Essex Police PSQ25-2668).

CCC response
No comments.

Policy DM14 – Non-Designated Heritage Assets

Summary of Representations – main issues and requested changes:

- Supports policy (Historic England PSQ25-5817)
- Overall agree with the plan proposals. We welcome SP3 and the placing of great weight on the preservation or enhancement of designated heritage assets and their setting and note that Policy DM14 sets out the approach to non-designated heritage assets (Writtle Parish Council PSQ25-454)
- Acknowledge the importance of Chelmsford's heritage assets. Heritage indirectly features within designing out crime in many respects (Essex Police PSQ25-2668).

CCC response
No comments.

Policy DM15 – Archaeology

Summary of Representations – main issues and requested changes:

- Supports policy (Historic England PSQ25-5818).

CCC response
No comments.

Protecting the Natural Environment

Key statistics:

Consultation point	Total number of responses
Policy DM16 – Protection and Promotion of Ecology, Nature and Biodiversity	10
Policy DM17 – Trees, Woodland and Landscape Features	6
Policy DM18 – Flooding/SUDS	6
Policy DM19 – Renewable and Low Carbon Energy	6

Policy DM16 – Protection and Promotion of Ecology, Nature and Biodiversity

Summary of Representations – main issues and requested changes:

- Support policy and welcome the mitigation measures for impacts on internationally designated sites (Paras 8.139 – 8.140). The Chelmsford Green Infrastructure Strategic Plan, Essex LNRS and Essex Green Infrastructure Strategy should be considered for development affecting locally designated sites as well (Natural England PSQ25-6260)
- Support in principle the targets for the Garden Community Developments to deliver 20% Biodiversity Net Gain, though this should not invite offsite top-up requirements (Wates Developments and Hammonds Estates LLP PS22-331)
- Expand Part C(ii) to also include ‘boundary fencing’ to increase biodiversity (East of England Ambulance Service NHS Trust PSQ25-5243)
- Part D(iv) and para 8.145 – to make the policy deliverable and consistent with national policy statements, amend so that the 20% target for the Garden Communities is capped at what is practically deliverable onsite and that offsite top-ups will not be sought (Wates Developments and Hammonds Estates LLP PS22-331)
- Para 8.141 - expand sentence 1 to also refer to the Essex Green Infrastructure Strategy Standards. These standards will facilitate securing multifunctional green infrastructure and are endorsed by Natural England (Essex County Council PS25-235)
- Para 8.143 – welcome but re-order to reference ‘swift, bat and bee bricks' first as these unlike ‘boxes’ are specifically supported by national policy (Swifts Local Network: Swifts & Planning Group PSQ25-3055)
- Para 8.143 – add that existing nest sites for building-dependent species such as swifts should be protected, as these endangered species are declining in Chelmsford. Mitigation should be provided if these nest sites cannot be protected (Swifts Local Network: Swifts & Planning Group PSQ25-3055)
- Clarify that swift bricks are a universal nest brick for small bird species, making them suitable for any development. Add references to best practice

guidance, extensions, and to highlight the protection of existing annual nest sites in buildings (Swifts Local Network: Swifts & Planning Group PSQ25-3055)

- Para 8.144 - expand sentence 3 to also refer to the Essex Green Infrastructure Strategy Standards. These standards will facilitate securing multifunctional green infrastructure and are endorsed by Natural England (Essex County Council PS25-236)
- Para 8.147 – for consistency with latest government guidance (DEFRA March 2024) and Natural England's (2021) Guidelines for Creation of SANG, amend last sentence to read 'Mitigation measures for protected sites (including SANG) can count towards BNG requirements as long as at least 10% of the biodiversity units come from additional activities other than mitigation and compensation.' (Wates Developments and Hammonds Estates LLP PS22-331)
- Policy should not refer to BNG requirements as this repeats national policy (Barratt Redrow PSQ25-5169) and Strategic Policy S4 (Dandara PSQ25-6300)
- The requirement for 20% BNG has not been justified in the Council's evidence base as being financially viable or practically deliverable/viable. It should be expressed as a target rather than an absolute requirement (Croudace Homes PSQ25-6054)
- Oppose the 20% BNG requirement on Chelmsford Garden Community which is not justified. Amend to reflect the approved Development Framework Document i.e. a minimum of 10% BNG per phase with an aspiration of 20% across the site (Chelmsford Garden Community Consortium PSQ25-6341, Vistry Group PSQ25-6364).

CCC response
10% BNG is a national requirement. 20% BNG for the Garden Community allocations has been subject to viability testing and is deliverable. The 20% requirement also accords with the approved planning applications for Zones 1 and 3 for Strategic Growth Site 6.
Minor modification will be proposed to para 8.147 to confirm when mitigation measures for protected sites (including SANG) can count towards BNG requirements
Minor modification will be proposed to para D(iv) and para 8.145 to clarify that the 20% BNG target for the Garden Communities is capped at what is practically deliverable onsite and that offsite top-ups will not be sought.
Minor modification will be proposed to para 8.143 to re-order references to boxes and bricks. Other changes related to nest sites for building-dependent species, nest cups, swift bricks and red-list species are too detailed of the Local Plan but will be considered in the update to the Making Places SPD.
Minor modification will be proposed to paras 8.141 and 8.144 to refer to ECC's Essex Green Infrastructure Strategy and Standards.
A range of biodiversity features that can be considered is included in the reasoned justification and Making Places SPD. Inclusion of a specific policy requirement to increase biodiversity measures and features into boundary fencing is considered too detailed for policy and may not always be appropriate.
The policy includes the BNG targets of 10% and 20% for clarity and completeness.

Policy DM17 – Trees, Woodland and Landscape Features

Summary of Representations – main issues and requested changes:

- Natural England maintains the Ancient Woodland Inventory which can help identify ancient woodland (Natural England PSQ25-6261)
- The Environmental Principles must be treated as a foundational component of the plan which must support the protection of sensitive natural assets, such as ancient woodland; be an exemplar of emerging BNG practice; and set high standards for the retention and provision of trees within developments including preserving a 50 metre buffer between new development and ancient woodland, recording Ancient and Veteran Trees on the Ancient Tree Inventory, and assessing the nitrogen impact of ammonia-emitting developments on ancient woodland within 5km of new development (The Woodland Trust PSQ25-1998)
- The Local Plan should require all developments to deliver 20% BNG and all units to be maintained for at least 50 years to support/enable new woodland creation (The Woodland Trust PSQ25-1998)
- The plan should give strong weight to LNRSs for development site allocations to avoid impacts to existing sensitive natural assets and to inform priority locations for the provision of green infrastructure, and habitat creation/enhancement through BNG (The Woodland Trust PSQ25-1998)
- Plan should set standards for high-quality green infrastructure for development including five UKISG-compliant trees per dwelling or per 1,000m2 of non-residential floorspace on major developments. Everyone should be able to see three trees from their home and be no more than 300 metres from the nearest natural green space, with safe and accessible routes (The Woodland Trust PSQ25-1998)
- Consider our ‘Access to Woodland Standard’ which aspires that everyone should have a small wood of at least two hectares within 500 metres of their home and a larger wood of at least 20 hectares within four kilometres of where they live (The Woodland Trust PSQ25-1998)
- Quality of trees, specimen type and location best dictate tree coverage in a development rather than a stringent quantum. For the Meadows, this would lead to over 2,400 trees which cannot be realistically accommodated. It is unclear why the requirement does not apply to non-residential development (Dominus Chelmsford Ltd PSQ25-6208)
- Generally supportive of policy but question three new trees per dwelling in Part C which could lead to development layouts that do not adhere to best practice urban design principles. The priority should instead be to ensure that developments are appropriately landscaped, with suitable planting, to allow for the creation of beautiful places (Dandara PSQ25-6301)
- Welcome increasing tree cover in principle but amend Part C policy to support/encourage rather than ‘require’ three trees per new house as this is not CIL compliant. Although an aspiration of the Council to achieve higher tree cover, there is no causal link between new housing and climate change which can be mitigated by the planting of three new trees aspiration (Vistry PSQ25-142)

- Practical, financial and land take implications that arise from Part C have not been properly considered and the requirements will be difficult for all sites to achieve (Vistry PSQ25-142)
- Part C is not clear or effective. For example, “a significant number of new trees” is not defined, it is unclear if the additional trees form part of or are in addition to the 10% BNG requirement and whether they need to be on site, or if they could be offsite (Barratt Redrow PSQ25-5170).

CCC response
Reasoned justification states that trees for on-site planting will be determined by the size, position, and type of location available.
Minor modification will be proposed to Part A to clarify when financial contributions may be utilised to fund off-site tree planting.
Reasoned justification states that a judgement will be made on a case-by-case basis over what will be considered ‘significant’ in relation to new trees for strategic infrastructure and employment developments taking into account the nature, scale and size of the development, the site and immediate locality with more guidance to be set out in the Making Places SPD.
The Council will use various mechanisms to secure necessary infrastructure, including the Community Infrastructure Levy (CIL), Section 106 legal agreements, Section 278 legal agreements (where relevant) and planning conditions.
Policies S4 and DM17 protects sites of international, national, regional and local nature conservation importance including Ancient Woodlands.
10% BNG is a national requirement. 20% BNG for the Garden Community allocations has been subject to viability testing and is deliverable. Although there is no maximum to the standard, the Council has no plans to go beyond the 10% BNG on all sites as this has not been viability tested.
The plan will ensure that new development maximises opportunities for the preservation, restoration, enhancement, and connection of natural habitats in accordance with the Local Nature Recovery Strategy or future replacements.
The plan sets standards for high-quality green infrastructure in line with the Open Space Assessment 2024.
The requirement for three new trees can count towards BNG.
The policy requirements have been tested through the Local Plan Viability assessments.

Policy DM18 – Flooding/SUDS

Summary of Representations – main issues and requested changes:

- Support for SuDS throughout the plan (Environment Agency PSQ25-6272)
- General support for the policy (Anglian Water PSQ25-6394, Dandara PSQ25-6302)
- The SuDS guidance in Policy S2 may be best placed under DM18 for improved visibility within the Plan (Environment Agency PSQ25-6272)
- Amend policy to take on board recommendation of the SFRA Level 1, reiterated in the Water Cycle Study Stage 2, to ensure SuDS are incorporated in all new development proposals and not just for major development (Anglian Water PSQ25-6394)

- Amend para 8.167 to clarify the preference for above ground SuDS to enhance amenity, biodiversity, habitats and green areas (Essex County Council PS25-237)
- Add a sentence to the end para 8.167 to refer to rainwater harvesting and the need for development to discharge surface water at the greenfield 1 in 1 rate (Essex County Council PS25-239)
- Requests clarification regards Part B(ii) and (iv), as the requirements are not justified based on the supporting text and evidence base. There is no definition of what is meant by flood risk and hence the circumstances when Part B is triggered (Vistry Group PS25-143)
- Comment from landowners/developer suggesting that their proposed development complies with the policy (Dandara PSQ25-6302).

CCC Response
Some high level text to cover our strategic approach to flood risk is necessary in Policy S2 with Policy DM18 providing more detailed requirements. Reference to additional guidance added to DM18 for clarity.
The Council agrees with the sentiment about incorporating SuDS in all new development proposals proposed by Anglian Water, but this may not always be practical. Major developments will have a spatial element and thus it is feasible to provide SuDS. The remaining categories of development cover an enormous range, many of which have no or minimal land, for example a change of use, structures such as fences or telecoms, hence the policy is worded to capture development where there is most opportunity to secure flood risk measures.
The Council agrees with the sentiment of above ground SuDS to enhance amenity, biodiversity, habitats and green areas. However, above ground may not be the best solution. Minor modifications will be proposed to the reasoned justification in response to these comments, referring to a principle in the National Standards for Sustainable Drainage issued by DEFRA in June 2025.
The use of rainwater harvesting is already covered by Policy DM25, likewise Policy DM18 already refers to surface water not exceeding the 1 in 1 greenfield rate in areas of flood risk which includes CDAs so it does not need to be repeated in the reasoned justification.
No changes required to Part B (ii) of the policy, it covers flood risk from surface water run-off. Minor modifications will be proposed to Part B (iv) to make it clearer what sustainability measures are required. In addition, minor modifications will be proposed to the reasoned justification to help define ‘flood risk’.

Policy DM19 – Renewable and Low Carbon Energy

Summary of Representations – main issues and requested changes:

- Supports policy but expand penultimate paragraph to have regard to the relevant tests for planning obligations in the NPPF in relation to community benefits (Infrabee PSQ25-5740, PSQ25-43)
- Amend (iii) to demonstrate no unacceptable ‘significant’ adverse effect in line with NPPF Para 193 (Infrabee PSQ25-5740, PSQ25-43)
- The Environment Agency regulates ground source heating and cooling systems. The system may require an abstraction licence and an

environmental permit, or exemptions may apply. Add a reference to our 'Closed loop ground source heating and cooling systems' and 'Open loop heat pump systems' guidance on gov.uk (Environment Agency PSQ25-6273)

- Consider identifying suitable areas for renewable and low carbon energy sources, and supporting infrastructure in future iterations of the Local Plan including around SWF (Infrabee PSQ25-5740, PSQ25-43)
- No objection in principle to any renewable energy development, though some infrastructure by virtue of their physical dimensions and properties, may impact upon military aviation. Planning Practice Guidance provides specific guidance on when to consult the MOD in relation to MOD safeguarding requirements (Defence Infrastructure Organisation PSQ25-6407)
- Nationally, solar farms and battery storage facilities are vulnerable to organised crime groups. It is important that facilities are designed to be safe and secure and that security proposals are risk assessed (Essex Police PSQ25-2674).

CCC response
Minor modification will be proposed to para 8.173 to reference guidance.
Minor modifications will be proposed to policy for proposals to have no significant harm on the natural environment.
The policy scope is considered appropriate and compliant with national policy.

Delivering and protecting Community Facilities

Consultation point	**Total number of responses**
Policy DM20 – Delivering Community Facilities	4
Policy DM21- Protecting Community Facilities	3
Policy DM22 – Education Establishments	2

Policy DM20 – Delivering Community Facilities

Summary of Representations – main issues and requested changes:

- Support policy (Dandara PSQ25-6303)
- Welcome policy but amend criterion (i) to allow sustainable transport connections to be delivered as part of the proposed new development (Chelmsford City Football Club PS25-221)
- Support expressed for policy but move criterion (vi) to a separate item and rephrase to encourage flexibly designed spaces where practical, as community facilities may be designed for a specific purpose, making flexibility for other uses impractical or financially unviable (Vistry Group PS25-342)
- Welcome policy which takes a positive approach towards new or extended community facilities which include indoor and outdoor sports facilities as supported by the Council's evidence base and the NPPF (Sport England PS25-92)

- Alternative strategies and new/expanded site allocations promoted by landowners/developers.

CCC response
Minor modification will be proposed to policy to refer to existing and proposed sustainable connections.
Minor modification will be proposed to policy to refer to clarify requirements around flexibility and shared use of a facility.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.

Policy DM21 – Protecting Community Facilities

Summary of Representations – main issues and requested changes:

- Welcome policy which will seek to protect sports facilities as supported by the Council's evidence base which identifies deficiencies in the provision of facilities such as playing fields (Sport England PS25-93)
- Support policy in principle but it should be more flexible. Where it can be demonstrated that health facilities are surplus to requirements or will be changed as part of wider NHS estate reorganisation and service transformation programmes, it should be accepted that a facility is neither needed nor viable for its current use, and policies within the Local Plan should support the principle of alternative uses with no requirement for retention of a community facility use on the land (NHS Property Services Ltd PSQ25-5601)
- Support expressed for policy but expand Part A to recognise that a facility could be made viable under an alternative operating/ownership model such as community ownership (Theatres Trust PSQ25-357)
- It is imperative that the ongoing use of the allotment site at Princes Road, Chelmsford should be maintained, and any future change of use (due to potential sale of land) should be resisted. Any change of use would increase the area's allotments deficit. It is a green space and wildlife corridor, allotment gardening promotes healthy living, and the allotment association has strong community links (Princes Road Allotment Association PS25-46).

CCC response
It is not reasonable to exclude healthcare sites/properties from Part B - proposals would still need to demonstrate these tests.
It is not necessary to add additional wording in relation to an alternative operating model.
There are no proposals to change the Princes Road allotment site in the plan which is designated on the Draft Policies Map.

Policy DM22 – Education Establishments

Summary of Representations – main issues and requested changes:

- There is no need for an 'agreed masterplan' with ARU in addition to the Special Policy Areas for ARU Writtle. Amend the policy to support the expansion of ARU in the context of the adopted Local Plan and ARUs own Development Framework to which the Council can contribute. The Council's masterplan procedure does not cover ARU and would be costly, inflexible and fail the need for Plans 'to serve a clear purpose' as set out in para 16 of the NPPF (Anglia Ruskin University PSQ25-6220)
- Para 1.890 – amend reference to the 10 Year Plan to reflect it is regularly updated and provide additional clarification around the redevelopment of independent schools to read: 'The redevelopment of school sites should not be precluded in the event that provision could be enhanced or the area better served by consolidating assets and reinvesting capital receipts.' (Essex County Council PS25-240).

CCC response
Proposals for expansions would still be required to be considered against a masterplan particularly for ARU as it is located within a SPA where development would otherwise be constrained.
Minor modification will be proposed to amend the reference to the 10 Year Plan and additional clarification around the redevelopment of independent schools.

Making High Quality Places

Section 9 - Making Places

Consultation point	**Total number of responses**
Policy DM23 – High Quality and Inclusive Design	3
Policy DM24 – Design and Place Shaping Principles in Major Developments	5
Policy DM25 – Sustainable Buildings	20
Policy DM31 – Net Zero Carbon Development (In Operation)	15
Policy DM26 – Design Specification for Dwellings	1
Policy DM27 – Parking Standards	3
Policy DM28 – Tall Buildings	4

Policy DM23 – High Quality and Inclusive Design

Summary of Representations – main issues and requested changes:

- Recommends that crime is a material consideration for good design, to ensure new developments are safe and inclusive for all, mitigating the opportunities for crime through building strong, healthy, cohesive, accessible, vibrant, and participatory communities (Essex Police PSQ25-2675)
- Support the aspirations for development that is respectful of the character and appearance of the area; however it is not appropriate to cross-reference Policy DM25 as part of this policy and it is proposed part (b)(vii) is removed (Vistry Group PSQ25-6377)
- The use of words maximise and minimise does not provide clarity of the requirements for new development (Vistry Group PS25-144).

CCC Response
The Police are consulted on planning applications, and design considerations are covered in detailed design guidance published in the Making Places SPD.
Minor modification will be proposed to clarify that Policy DM25 applies to development proposals.

Policy DM24 – Design and Place Shaping Principles in Major Developments:

Summary of Representations – main issues and requested changes:

- Support the policy, and in particular the reference to Sport England's Active Design Guidance (Sport England PS25-94)
- Suggest that the inclusion of 'safe, secure and sustainability' concepts are embedded within the Design and Place Shaping Principles (Essex Police PSQ25-2676)
- Modification suggested to include a reference to development types including boundary fencing in relation to biodiversity (East of England Ambulance Service NHS Trust PSQ25-5244)
- It is important to ensure that there is sufficient distinction on sites between spaces intended for public recreation and those prioritised for wildlife conservation. Additional text suggested for a requirement for native species for all planting and habitat restoration (Environment Agency PSQ25-6275)
- The policy could be improved by providing additional information about when public art will be required to be delivered in major developments, or at least the kind of art that is expected in smaller development (Dandara PSQ25-6304).

CCC Response
Minor modification will be proposed to add reference to 'safe and secure' to 9th bullet; and reflect additional guidance on safety for women and girls at Para 9.17.
The Tree Planting Advice Note referenced at para 9.14 sets out the Council's approach to native species and lists appropriate species.
Measures to promote biodiversity are covered by Policy DM16.

Public art is considered on a site-by-site basis as it should be site specific and relate to local context; advice for developers is published on the Council's website.

Policy DM25 – Sustainable Buildings

Summary of Representations – main issues and requested changes:

- General support for the objectives of the policy (Vistry Group PS25-146)
- As Chelmsford resides wholly in an area of serious water stress the requirement for all new dwellings to achieve a water efficiency standard of 90 litres/person/day or greater is welcome. It is essential that this requirement remains evidence based (Environment Agency PSQ25-6276)
- Support for a water efficiency standard of 90 litres/person/day (Anglian Water Services Ltd PSQ25-6395)
- Given Essex is a seriously water stressed area, reduce the water efficiency standard to 80 litre/person/day. The Water Strategy for Essex (WSfE) recommends Local Plans should set ambitious policies on water efficiency (Essex County Council PS25-241)
- Welcome requirement for non-residential development to achieve full credits for category Wat 01 of BREEAM standards (Essex County Council PS25-241)
- Cross reference to Policy DM18, to require strategic growth areas to incorporate integrated water management measures at a community scale (rainwater/stormwater harvesting and reuse) that to facilitate water reuse in homes for flushing toilets and garden irrigation. This would enable developments to be more water efficient and go beyond a fittings-only based approach to further minimise potable water use (Anglian Water Services Ltd PSQ25-6395)
- Support the need to provide integrated water management techniques to optimise rainwater harvesting on site to minimise overall water consumption and maximise its reuse (Essex County Council PS25-243)
- Challenge the requirement for 90 litres/person/day which is not supported by evidence (Home Builders Federation (PSQ25-5479, Barratt Redrow PSQ25-5171, Croudace Homes PSQ25-6051, Dandara PSQ25-6305, Gladman Developments Ltd PSQ25-6326, CHP PSQ25-2983, Sempra Homes PSQ25-3112)
- The most effective approach to securing long term water efficiency reductions is through nationally agreed regulations not ad hoc requirements in local plans (Home Builders Federation PSQ25-5479)
- A 2023 Ministerial Statement stated that where water scarcity is inhibiting the adoption of Local Plans, local planning authorities should work with the Environment Agency and delivery partners to agree standards tighter than the 110 litres/person/day, this does not appear to be the case in Chelmsford (Home Builders Federation PSQ25-5479, Gladman Developments Ltd PSQ25-6326)
- Retain 110 litre/person/day in line with Building Regulations and the approved Development Framework Document for Chelmsford Garden Community (Chelmsford Garden Community Consortium, PSQ25-6342, Vistry Group PSQ25-6365)

- We normally encourage BREEAM “Excellent” for developments over 1000sqm, but the policy meets our minimum requirements (Environment Agency PSQ25-6276).
- Applying BREEAM to developments under 1,000sqm is unlikely to lead to enhanced sustainability design as the assessment and certification costs for new construction becomes increasingly significant for smaller development. This can affect the provision of measures which would otherwise enhance the design of the development (Chelmsford Garden Community Consortium PSQ25-6349, Vistry Group PSQ25-6371).
- Remove the 3 water efficiency credits requirement. Smaller development will struggle to meet this which goes beyond requirements for a Very Good BREEAM rating and has not been considered in the updated viability assessment (Chelmsford Garden Community Consortium PSQ25-6349, Vistry Group PSQ25-6371).
- Policy should accord with Building Regulations to allow the most appropriate technologies and techniques to be implemented in all developments (Dandara PSQ25-6305)
- Supports the provision of EV charging points but requirements should accord with Building Regulations. Provision over and above this has not been accounted for within the viability assessment (Chelmsford Garden Community Consortium PSQ25-6343, Vistry Group PSQ25-6366).
- Given the provision of EV charging points in Building Regulations, the policy should be removed or align with Building Regulations (Chelmsford Garden Community Consortium PSQ25-6348)
- Question the need to request EV charging points for residential development given that the relevant standards are set out in Building Regulations (Home Builders Federation PSQ25-5479, Croudace Homes PSQ25-6051, Gladman Developments Ltd PSQ25-6326, Vistry Group PS25-146, CHP PSQ25-2983, Sempra Homes PSQ25-3112)
- Additional guidance may be required for on street/public charging points that is not addressed in Part S of Building Regulations (Home Builders Federation PSQ25-5479)
- The Essex Car Parking Standards (2024) do not justify why more onerous EV standards should apply over Building Regulations requirements and just link back to national policy (Vistry Group PS25-146).

CCC Response
The Council has no evidence to support increasing the water efficiency requirements to 80 litres/person/day.
The stricter water efficiency requirement in the plan is supported by the plan evidence base notably the Detailed Water Cycle Study. 90 litres/person/day has also been viability tested.
Minor modification will be proposed to cross reference to Policy DM18 in relation to integrated water management measures.
EV charging point infrastructure requirements have been updated to reflect ECC’s Parking Standards update; therefore, the reference to the EV parking standards set out in the Policy is considered appropriate.
Further guidance for on street/public charging points is contained within the Essex Parking Guidance Part 1: Parking Standards Design and Good Practice (2024).

BREEAM is a widely recognised tool for assessing and improving sustainability of buildings. It can be used on schemes of any size at the discretion of the Local Planning Authority. The Council realises that there are other factors that are important as well such as the complexity of a building, however the threshold of 500sqm has been set to allow for economy of scale and avoids imposing the requirement on modest structures.

Policy DM31 – Net Zero Carbon Development (In Operation)

Summary of Representations – main issues and requested changes:

- Support the policy. Essex Open Legal Advice Part B – Energy policy prior to local plan adoption advice reconfirms, that nothing in recent government policy or recent case law prevents LPAs from including policies requiring fabric standards and local energy efficiency greater than Building Regulations in either their Development Plan Documents or in SPDs, so long as there is a robust evidence base for such policies (Essex County Council PS25-246)
- The Environment Agency regulates ground source heating and cooling systems. The system may require an abstraction licence and an environmental permit, or exemptions may apply (Environment Agency PSQ25-6274)
- There is no justification to go beyond the December 13th 2023 Written Ministerial Statement, national policy requirements and applying the policy will impact house building timeframes and viability (Vistry Group PS25-145, Newell Properties Development Ltd PSQ25-5052, Barratt Redrow PSQ25-5172, Home Builders Federation PSQ25-5481, Croudace Homes PSQ25-6052, Anglia Ruskin University PSQ25-6216, Chelmsford Garden Community Consortium PSQ25-6052, Hopkins Homes Ltd PS25-265, Richborough PS25-179, Dandara PSQ25-6306)
- Development should not be required to exceed Building Regulations Part F and L. The Future Homes Standard should be the national approach (Gladman Developments Ltd PSQ25-6327, Hopkins Homes Ltd PS25-265, Richborough PS25-179)
- The policy goes beyond national policy and guidance without evidence to justify the approach towards net zero operational and the use of on-site renewables to provide all (regulated and unregulated) operational energy. In line with the PPG locally set energy performance standards for new housing should not exceed the equivalent of Level 4 of the Code for Sustainable Homes (Croudace Homes PSQ25-6052)
- The policies should not be a requirement but advisory and applied flexibly in a stepped approach (Croudace Homes PSQ25-6052, Chelmsford Garden Community Consortium PSQ25-6350, Richborough PS25-179, Wates Developments and Hammonds Estates LLP PS25-333)
- BREEAM should only be applied to development over 1,000sqm (Vistry Group PSQ25-6372)
- For the Council to require standards above those set out in Building Regulations they must be expressed as a percentage of the target emission rate and not as an energy use target (Home Builders Federation PSQ25-5481)

- The Council's Viability Update Note 2024 suggests the costs of achieving the policy to be 8% above current regulations, this seems low, and is lower than the cost of delivering net zero homes in the Council's earlier evidence which cited it would be 12.5% of the cost of construction (Home Builders Federation PSQ25-5481)
- Requirement 4 provides no flexibility in the delivery of renewable energy and essentially mandates roof top solar PV energy regardless of whether this remains the most effective form of renewable energy generation over the plan period. Alternative forms of sustainable energy generation that could result in equivalent benefit or carbon saving should be considered (Barratt Redrow PSQ25-5172, Anglia Ruskin University PSQ25-6216)
- Designs to suit solar orientation could lead to conflict between design and energy policies (Barratt Redrow PSQ25-5172)
- Requirement 5 is not clear whether this information would need to be signed off under a formal discharge of condition and it is unclear what is meant by "as built performance information". There is also a practical conflict in how this proposed policy would operate. To comply with this policy, as drafted, a home would need to remain empty after the issue of a Final Certificate until the required as built performance information has been submitted and approved by the Local Planning Authority (Barratt Redrow PSQ25-5172)
- Design policies and design codes will need to ensure that development is not refused for seeking to meet energy efficiency standards but, for example, not potentially being designed in the character of the local area (Home Builders Federation PSQ25-5481)
- Policy should require a development to be net zero rather than for individual homes as some, such as terrace houses and flats, are more intrinsically energy efficient and emit less carbon compared to detached homes and bungalows (Home Builders Federation PSQ25-5481)
- The size threshold for requirements 1-5 to apply is too low. Reference to 100sqm should be replaced with 1,000sqm. This larger size threshold not only facilitates greater flexibility to enable modest developments to progress without the time and cost restrictions associated with the targets but also reflects the definition of 'major development' in planning terms (Anglia Ruskin University PSQ25-6216)
- The need for a financial contribution in lieu of sufficient on-site renewable sources to offset annual demand of the building(s) in question is not considered to meet the tests of soundness. Whilst it is accepted that certain profitable projects may well be able to fund the off-site PV contribution, it is suggested that certain developments and/or uses should be excluded from the need to pay off site contributions (Anglia Ruskin University PSQ25-6216)
- Modifications to requirements 1 and 3 are required to align with the UK Net Zero Carbon Building Standard Pilot (NZCBS) 2024 as this is the industry's current leading Net Zero Carbon definition (Wates Developments and Hammonds Estates LLP PS25-333).

CCC Response
Reference to the fact the Environment Agency regulates ground source heating and cooling systems, and that these may require an abstraction licence has been

added to the reasoned justification for Policy DM19, as well as web links to relevant guidance.
Building Regulations (including the Future Homes Standard) set minimum standards that must be achieved for energy performance in new homes and buildings - but these are a 'floor' and not a 'ceiling'. Local authorities are allowed to set higher standards. Planning policy is necessary to address the shortcomings within the Building Regulations 2021 and the proposed Future Homes Standard 2025. These do not adequately address operational carbon emissions from new development as they only cover a proportion of energy use of a building, namely regulated energy use and they rely on grid decarbonisation to achieve 'net zero'.
The approach of using energy metrics to deliver net zero homes aligns with the recommendations of the Government's own advisors, the Climate Change Committee. They recommended a space heating target of 15-20 kwh/m2/year for all new homes by 2025. Policy DM31 sets a space heating requirement that reflects the Climate Change Committee's advice, and which is based on a robust and sound technical evidence base, which includes assessment of potential impact on viability.
The legal justification for Policy DM31 is clearly set out in the Essex Open Legal Advice - Energy Policy and Building Regulations (2025 update) ((Pre-Submission Local Plan Evidence Base reference CC004) which includes an examination of climate science, legislation, national policy (including the Written Ministerial Statement) and relevant case law. The technical evidence base for Greater Essex that supports the justification for the approach taken in the policy.
The 'net zero' evidence base developed for Greater Essex demonstrates that the policy is technically feasible to deliver and at reasonable cost. There are no significant barriers to delivery in terms of skills and supply chains in Essex. In other areas (e.g. Cornwall, Bath and North East Somerset) where the equivalent policy has been in place has also shown that there has been no slowdown in the submission of planning applications or delivery of housing. The Council's Viability Update Note 2024 adjusts the cost assumptions associated with achieving net zero in accordance with the latest information reported in the Essex Net Zero Policy – Technical Evidence Base produced by Introba Consulting Ltd with Currie & Brown and Etude for Essex Couty Council. Research referred to in the Essex Open Legal Advice – Energy Policy and Building Regulations (2025 update) (Para 54 – 55) ((Pre-Submission Local Plan Evidence Base reference CC004) provides evidence of an uplift in values too which is also positive for viability.
When a Planning application is submitted for a site (regardless of whether it is allocated or not) planning law requires that it must be determined in accordance with the Development Plan (in place at the time) unless material considerations indicate otherwise. However, increasing weight should also be given to policies contained in the emerging Local Plan as it progresses through the Local Plan preparation process. It will be a matter for the Development Management process to determine the weight given to emerging policies in the planning balance when coming to a decision on an application.
For older persons housing that is in the form of self contained residential units then the policy requirements all apply. However, for 'non residential buildings' (which the reasoned justification notes includes older persons housing that is in the form of a residential institution) then the limit set in requirement 3 of the policy does not

apply, and instead the Energy Use Intensity just needs to be reported – no specific target is required to be met. The technical evidence includes cost analysis of the typologies modelled and this has been used to inform the viability assessment for the Local Plan. An allowance has been made for the policy costs in the viability assessment and is shown to be viable.
Policy DM31 sits alongside the Building Regulations, including the Future Homes Standard. The policy works with the Future Homes Standard not against it. The policy uses an accurate, predictable metric (the total energy use of a building) and this is needed to make up for the inadequacies of the Future Homes Standard (which uses a changeable % carbon metric based on only around half the energy used in a building) and ensure truly net zero carbon and energy (in operation) new homes and buildings are delivered in Chelmsford, and the associated benefits are realised for residents, climate and the grid. There is a wide consensus around the approach set out in the policy based on energy metrics to deliver truly net zero carbon and net zero energy homes and buildings. Furthermore, the Essex-wide Evidence Base (that has already been found as robust and sound by the Planning Inspector for the Tendring Colchester Borders Garden Community DPD), together with the Chelmsford Local Plan viability evidence, provides clear justification for the Policy to go beyond current and proposed Building Regulations.
It would inhibit the effectiveness of the policy if it was advisory only. Applying the policy 'flexibly in a stepped approach' would create uncertainty among developers regarding what is required and what is only advised, increasing the workload of local authority planning officers who will have to communicate these stepped changes to developers. This outcome can be avoided if all the standards in the policy are implemented as requirements from the point of plan adoption. It should also be noted that the policy itself has elements of flexibility within it. An offsetting mechanism is available as part of Requirement 4 to allow developments to achieve compliance where it is not technically possible to match on-site renewable energy generation with annual average energy demand. The energy performance standards are requirements but how they should be met is not specified which gives developers freedom and flexibility in the design choices adopted to achieve the standard. In addition, alternative routes to compliance are set out for minor development proposals and also for buildings that are certified Passivhaus.
The policy does not have to be expressed as a percentage of the Target Emission Rate. This is an inferior method to the one that DM31 uses is referred to in the Written Ministerial Statement 13 Dec 2023. However, the Essex Open Legal Advice – Energy Policy and Building Regulations (2025 update) (Pre-Submission Local Plan Evidence Base reference CC004) clearly sets out the legal justification for using a different approach to the one referred to in the Written Ministerial Statement, such as the energy metrics approach set out in DM31. Policy DM31 sets standards which use energy metrics – expressed as kilowatt hours per square metre of floor area per year ($kWh/m^2/yr$). This approach aligns with best practices recommended by leading industry bodies and experts. The Essex Open Legal Advice – Energy Policy and Building Regulations (2025 update) also provides the legal justification for setting policies such as DM31 that use energy metrics.

The Inspector's Report on the Tendring Colchester Borders Garden Community Development Plan Document (TCB GC DPD) provides further endorsement to the quality and robustness of the Essex Evidence Base. The Inspector's interpretation of how the Written Ministerial Statement 2023 should be treated in that case was consistent with the Essex advice.
The technical evidence (CC005 and CC006) that underpins Policy DM31 demonstrates that roof top solar PV is by far the most cost effective, and mature, and readily available, renewable energy generation technology that also delivers direct benefits (such as reduced energy costs) to residents and occupiers. It is therefore pragmatic to include it in the policy requirement for renewable energy generation as it demonstrates that the policy requirement is deliverable at reasonable cost. At this moment, there is no evidence to suggest that there is a more productive and cost effective method than solar rooftop PV, which can also deliver direct benefits to residents and occupiers. However, in future if a technology becomes more suitable then this can be addressed through the 5 year review of the Local Plan.
CC006 Essex net Zero Policy – Summary of Policy Evidence and Validation Requirements 2023 sets out the necessary information to be provided at relevant stages of development in order to comply with the policy. The Essex Net Zero Implementation section of the Essex Design Guide. provides support the transition of small / medium developers who may have not yet invested in predictive energy modelling software, the Essex Energy Tool (SAP Conversion) has been developed for use on housing proposals of under 100 dwellings. This tool can take the outputs of the Building Regulations compliance software (known as SAP – Standard Assessment Procedure) and indicate whether compliance with the policy requirements for space heating demand, total energy use (energy use intensity) and Solar PV generation has been achieved. A *Net Zero Implementation and Monitoring Guide* is also under preparation and will provide further instruction on how as-built performance information can be gathered.
Additional clause added to requirement 3 to allow flexibility, in exceptional circumstances, on larger sites to meet the energy use intensity target under requirement 4 on each individual phase via a site-wide average rather than each individual property.
The energy offsetting mechanism enables flexibility in the policy to accommodate those developments where it is not technically feasible to achieve an on-site energy balance and provide a way for them to still achieve 'net zero'. This is a well-established, accepted principle and approach and has been found sound by the Planning Inspectorate on numerous occasions, including in Essex (through the Tendring Colchester Borders Garden Community DPD).
Clarification to what 'maximised' means in relation to requirement 4 is proposed to be added to the supporting text. The renewable energy requirement clause is also proposed to be simplified so that it just relates to achieving energy balance on-site (including offsetting where this is justifiably triggered) and does not go beyond this (unless a developer wishes to).
The policy applies to 1 dwelling and above, and this is supported by the evidence base. All new homes and buildings need to be delivered to truly net zero carbon in operation standards and achieve operational energy balance in order to align with climate targets and deliver the wider co-benefits relating to energy, health, and costs / savings for residents and society as a whole.

Policy DM31 is underpinned by its own technical evidence developed specifically for Greater Essex (particularly the Essex Net Zero Policy Study 2023, CC005 and CC006). Policy DM31 only addresses operational energy and carbon emissions, and it does not address embodied carbon emissions. The UK NZCBS takes a whole life carbon approach and seeks to recommend standards to reduce both operational and embodied carbon emissions.

Policy DM26 – Design Specification for Dwellings

Summary of Representations – main issues and requested changes:

- Suggest that the inclusion of 'safe, secure and sustainability' concepts are embedded within the Design and Place Shaping Principles (Essex Police PSQ25-2677).

CCC Response
The Police are consulted on planning applications, and design considerations are covered in detailed design guidance published in the Making Places SPD.

Policy DM27 – Parking Standards

Summary of Representations – main issues and requested changes:

- Any new proposed public car parks should seek to achieve Park Mark accreditation (Essex Police PSQ25-2678)
- Support for the policy, including reference to bespoke parking standards for Chelmsford Garden Community (Chelmsford Garden Community Consortium PSQ25-6344, Vistry PSQ25-6367).

CCC Response
Specific consideration of crime and personal safety are required by the 2024 Essex Parking Guidance, adopted by the Council.

Policy DM28 – Tall Buildings

Summary of Representations – main issues and requested changes:

- Support for the policy, and references to heritage assets (Historic England PSQ25-5819)
- Recommends the use of Secured by Design (SBD) Police Preferred Security Products (Essex Police PSQ25-2680)
- Design should ensure sufficient corridor space for safe evacuation and access by emergency services; would welcome financial contributions as required by fire and rescue facilities for equipment to support rescue (East of England Ambulance Service NHS Trust PSQ-5246)
- Suggest the policy should also apply to other locations that are well served by public transport (Vistry Group PSQ25-6387).

CCC Response
Reference to Secured by Design is considered too detailed for this policy, but it is covered in detailed design guidance published in the Making Places SPD.
Proposals outside the City Centre will be considered on their merits, where a view on the suitability of other locations can be taken.

Policy DM29 – Protecting Living and Working Environments

Consultation point	Total number of responses
Policy DM29 – Protecting Living and Working Environments	0
Policy DM30 – Contamination and Pollution	1

No comments.

Policy DM30 – Contamination and Pollution

Summary of Representations – main issues and requested changes:

- Pleased with the water quality wording in all policies and satisfied that wastewater treatment capacity and local water environment will be protected by the plan policies (Environment Agency PSQ25-6269)
- Welcome the policy. Appreciate reference to the relevant Land Contamination Remediation Methods guidance in para 9.97 but move to para 9.95 or a separate paragraph as the process is relevant to any sites managing the risks from land contamination, which may include non-hazardous pollutants and not only those where hazardous substances are present (Environment Agency PSQ25-6269).

CCC Response
Minor modification will be proposed to para 9.97 to move reference to the Land Contamination Remediation Methods guidance to a separate paragraph.

Draft Policies Map

This section of the consultation document sets out the Draft Policies Map which illustrate sites for development or protection within the Local Plan.

Consultation point	Total number of responses
Draft Policies Map (Paragraphs 11.1-11.3)	0
Map 1 – Chelmsford North	1
Map 3 – Chelmsford Urban Area	5
Map 4 – Chelmsford City Centre	1
Map 8 - Bicknacre	2
Map 9 – Boreham	1
Map 11 – Chatham Green	0
Map 13 – East Hanningfield	1
Map 16 - Galleywood	1
Map 18 – Great Leighs	1
Map 23 – Little Waltham	1
Map 37 – Writtle	1
Rural Employment Areas	0
Other Maps	0
Legend	0

Chelmsford Urban Area (Map 3) Summary of Representations – main issues and suggested changes:

- Support in general but identify the Marriage Mill Cranham Road as a new employment area which has permission for 3,400sqm of B2/B8 floorspace (W & H Marriage & Sons Limited PSQ25-6057)
- Either delete ‘Area for Conservation/Strategic Enhancement’ notification for Site 16a, say it is illustrative or amend to ‘Land Allocated for Future Recreation Use and/or SuDS and/or Biodiversity and/or Solar/Appropriate Renewable Energy Generation’ (Wates Developments and Hammonds Estates LLP PS25-301)
- Extend the New Garden Community for Major Housing and Employment Development annotation at Site 16a to include Land Adjacent to Sandford Mill Lane and Land at Rumbolds Farm (as shown on submitted Appendices 1A and 1B of our Written Representations) so that the map is justified by appropriate evidence; and to contribute to housing, employment and energy delivery to support other policies in the plan (Wates Developments and Hammonds Estates LLP PS25-301)
- The settlement boundary should be reviewed to include the promoted site south of Church Road in Great Baddow given the introduction of Grey Belt in the NPPF 2024. The site does not contribute strongly to Green Belt purposes and is sustainably located (Newell Properties Development Ltd PSQ25-5050)
- A small-scale alteration to the Green Wedge/Green Belt boundary should be considered and an extension to the Employment Area allowed at Robjohns Road, Rodney Way in line with national policy. This would enhance the local rural economy and provide additional local infrastructure (Saxtons 4x4 PSQ25-6112)
- The employment areas designation on the corner of Brook Street and New Street (the former Kay-Metzeler premises) should be amended to identify an

employment area designation for the eastern part of the site and a mixed use residential and commercial allocation for the western part of the site (HEVF Self Storage UK Limited PSQ25-6337)

- The Urban Area Boundary and Green Belt boundary should be amended to incorporate land south of Galleywood Road which has no other constraints other than the Green Belt designation (Taylor Wimpey Strategic Land PSQ25-5448)
- Allocate land at Bulls Lodge Farm for residential development or include it in Chelmsford Urban Area, given its proximity to Beaulieu Park station (Sean Culleton PSQ25-1587)
- Amend the boundary of SGS3c to include the SuDS area to the east (Barratt Redrow PSQ25-5167).

Boreham (Map 9) Summary of Representations – main issues and suggested changes:

- Land to the north of Orchard Way should be included in the settlement boundary together with the Council acquired site to the north to reflect the development potential of the sites. This can facilitate development with minimal impact (Urban Provincial PSQ25-4979).

Chatham Green (Map 11) Summary of Representations – main issues and suggested changes:

- Change the settlement boundary for Chatham Green to include all the built form of the village i.e. Baileys Cottage, the Windmill Pub, the two dwellings next to the village green and the industrial site, Pondside Nursery and Yard (Mr and Mrs Andrew Parker PS25-99).

East Hanningfield (Map 13) Summary of Representations – main issues and suggested changes:

- Support expressed including the identification of Growth Site 17a (Chelmsford Diocese Board of Finance PSQ25-718).

Galleywood (Map 16) Summary of Representations – main issues and suggested changes:

- Undertake a Green Belt Review and reflect its conclusions on the Policies Map. This would require changes to Map 16 to include a promoted site at Beehive Lane (BDW Eastern Counties PSQ25-6031).

Great Leighs (Map 18) Summary of Representations – main issues and suggested changes:

- The current approach to the DSB is overly reliant on arbitrary boundaries which does not feature in the NPPF. Rather than stifling growth in a Key Service Settlement, a flexible, sustainable outlook could be adopted. This would enable contribution on merit for deliverable well connected sustainable sites including in Great Leighs (Helen Sadler PS25-31)

- It is essential that the boundaries are logical, easily identifiable and follow property boundaries, permanent features and encompass suitable undeveloped sites and that historical use is acknowledged (Mrs Helen Sadler PS25-60 & 63).

Little Waltham (Map 23) Summary of Representations – main issues and suggested changes:

- Remove the Green Wedge from the promoted site adjacent to 148 The Street. This is a sustainable location in a Service Settlement outside the Green Belt, lacking any development constraints (Paul Hopkins PSQ25-6391).

Writtle (Map 37) Summary of Representations – main issues and suggested changes:

- Support the SPA for ARU Writtle (Anglia Ruskin University PSQ25-6217)
- Remove the 'Open Space' designation on ARU Writtle at Sturgeons Farm as there are no specific land uses that warrant this (Anglia Ruskin University PSQ25-6217).

CCC Response
The boundaries and notations are supported by the plan evidence base including the Employment Land Review 2023 and Focused Update 2024, Chelmsford Strategic Housing Needs Assessment 2023 & Addendum 2024, Chelmsford Strategic Flood Risk Assessments Level 1 (February 2024) and Level 2 (May 2024), Urban Area and Defined Settlement Technical Note 2024 and Short Note 2025.
SPAs are defined within and around existing facilities and institutions to enable their operational and functional requirements to be planned in a strategic and phased manner. BAE Systems is already designated as an Employment Area in the Green Belt and most of the designated Employment Area is promoted for residential redevelopment. A SPA designation for this site would not be appropriate.
Land at Cranham Road is being developed for new headquarters for W & H Marriage & Sons Ltd. Other policies in the plan will enable any future proposals to be considered. A SPA designation for this site would not be appropriate.
The plan allocates a range of employment sites to meet the employment floorspace requirements in Policy S6 and to allow for a range of different employment uses to come forward, where appropriate – no further modifications required.
A range of alternative development sites and strategies have been considered and rejected when developing the Spatial Strategy. More information is set out in the Spatial Strategy and Strategic Site Pre-Submission Topic Paper and Preferred Options Local Plan.
The proposed former Kay Metzeler site allocation was removed from the Pre-Submission Local Plan following a change of circumstances. However, the site is now proposed for inclusion in the Focused Consultation Additional Sites Document to support increased housing requirements.
There are no proposed changes to the Green Belt. Proposed site allocations are focused on settlements outside the Green Belt, informed by a Settlement

Hierarchy to help select sustainable locations. The Council can meet its development requirements without needing to undertake a Green Belt review. The Pre-Submission Local Plan will be examined under the 2023 NPPF which does not refer to Grey Belt.
The DSB Settlement Boundary Review Criteria states that boundaries should normally follow clearly defined physical features such as walls, tree lines, mature hedgerows, field boundaries, roads and footpaths. The Urban Area Boundary/DSB will generally be drawn approximately 25m from the rear and side elevations of houses with large gardens. This is to allow for extensions but to prevent backland development which could harm the character of the open countryside.
The DSB has been drawn tightly around Chatham Green because other areas within the village are characterised by large houses with spacious grounds. Including these areas within the DSB could leave the village vulnerable to significant new development, inappropriate to a village of this size with very limited services and facilities.
The Green Wedge is a locally important designation. Changes to the Green Wedge boundaries to allow development growth has been discounted as sufficient and suitable land is available elsewhere to meet development needs in a sustainable way.
The 'Open Space' designation at Sturgeons Farm, ARU Writtle (SPA6) is classified as semi-natural open space which is inaccessible to the public. This is consistent with the land use and should be retained in accordance with the 2024 Open Space Assessment.
The site boundary of SGS3c includes the land allocated for future recreation use/or SuDS and/or biodiversity within the wider site boundary.

Appendices

This section of the consultation document contains four appendices.

Consultation point	Total number of responses
Appendix A – Schedule of Superseded Documents and Policies	0
Appendix B – Development Standards	2
Appendix C – Development Trajectories	7
Appendix D – Glossary	1

Summary of Representations – main issues and requested changes:

Appendix B

- Table 16 - the total provision of open space for developments of 30 dwellings or more is 94sqm per dwelling. This compares with 59sqm in the adopted plan with the introduction of ‘natural and semi-natural greenspace’. Further justification for this increase is required, and its impact on the deliverability of

strategic sites considered (Chelmsford Garden Community Consortium PSQ25-63653, Vistry Group PSQ25-6381).

Appendix C

- Object to the trajectory as there are aspects of the proposed housing supply which are unjustified or inconsistent with National Policy. The plan should be meeting local housing needs in full and have a higher supply buffer. Need to undertake a Green Belt Review and identify additional sites to meet the proposed housing requirement under Policy S6 (Barratt David Wilson – Eastern Counties (BDW) PSQ25-6027)
- The delivery of Growth Site 17a is expected to be achieved during 2028/29 (Year 5 of the Housing Site trajectory) or more conservatively during 2029/30 (Year 6) rather than during 2030-2034 (Chelmsford Diocese Board of Finance PSQ25-717)
- Support the Development Trajectory including the growth assumptions for SGS16a which addresses NPPF para 69 (Wates Developments and Hammonds Estates LLP PS25-317, PS25-343)
- The Council has maintained strong results against the housing delivery test and a five-year housing land supply (Wates Developments and Hammonds Estates LLP PS25-317, PS25-343)
- Delivery of SGS16a from year 6 of the plan onwards and 3,000 dwellings by 2041 is supported by the evidence in the submitted Infrastructure Delivery Plan and could begin delivering residential within the first five years of the plan by incorporating an additional development parcel at Sandford Mill Lane. The site masterplan is programmed immediately after reviewed Local Plan adoption in 2026 but could be earlier. The Master Developer model will support multiple concurrent delivery outlets and different housing tenures will allow a wider range of partners to fund and deliver development which could enable the average timeframe within the Lichfields Start to Finish Report (Third Edition dated March 2024) to be improved (Wates Developments and Hammonds Estates LLP PS25-343)
- The plan is not unduly reliant on large scale garden community developments (SGS6 and 16a will deliver less than half of Chelmsford's total housing supply) and is supported by a wide range of sites at other scales (Wates Developments and Hammonds Estates LLP, PS25-313, PS25-343)
- Unclear how the trajectories identified have been defined, whether these are realistic and if the 5-year supply of sites are deliverable. There is a risk of over-reliance on sites which are not deliverable during the next 5-years. There are various instances where allocations forecast to deliver in the first 5 years carried-forward from the adopted plan have not done so including North East Chelmsford and South Woodham Ferrers. More smaller to medium sites will be needed in the short-term (Martin Grant Homes PSQ25-2613)
- Various allocations in the trajectory of the adopted Local Plan have already slipped against the expectations of that plan and not started to deliver housing, including North East Chelmsford and Great Leighs. The Housing Trajectory (April 2024) confirms that an average of only 883 dwellings per year were completed during the period 2013/14 to 2023/24, approximately 8% below expectations. Allocate an additional site (Dandara Eastern PSQ25-6210)

- Para C.2 - The Five-Year Housing Land Supply position will deteriorate during the late-2020's and into the early-2030's. This is due to the over-reliance upon the optimistic delivery rate of new homes at the Hammonds Farm given the site preparation works and new or substantial infrastructure provision that will be necessary before any built development can commence. An immediate Green Belt Review is required to identify additional sites (W. D. Smith & Son PSQ25-6021, PSQ25-6022)
- Question the allocation of Hammonds Farm – it will only deliver housing during the middle of the plan period potentially creating a gap in housing delivery to 2041 and has unrealistic delivery rates as supported by 'Start to Finish' research from Lichfields (Dandara Eastern PSQ25-6210).

CCC Response
The standards for open space requirements are supported and justified by the Open Space Assessment 2024. They have also been subject to viability testing and are deliverable.
The Housing Trajectory in the Pre-Submission Local Plan and timings within it are established through the Council's Five-Year Housing Land Supply Methodology (April 2024). The Trajectory is updated annually, and the Pre-Submission Local Plan uses the latest available Housing Site Schedule (April 2024). Minor modifications will be proposed to the Trajectory to reflect the latest published Housing Site Schedule ahead of submission (April 2026). A number of Strategic Growth Sites rolled forward from the adopted Local Plan including greenfield sites have planning permission or resolutions to grant planning permission including North of South Woodham Ferrers, North of Broomfield and North East Chelmsford.
The windfall allowance is supported by the Housing Windfall Assessment April 2024 and 2025. Para 75 of the NPPF (December 2024) allows local planning authorities to make an allowance for windfall sites. Windfall development comprises sites that have unexpectedly become available over time, and which were not anticipated by the council as part of a Local Plan. These sites are granted planning permission in accordance with adopted local and national policies and contribute towards housing figures.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process; and can meet its development requirements without needing to undertake a Green Belt review. This approach accords with National Planning Guidance.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.

REVIEW OF THE LOCAL PLAN
PRE-SUBMISSION (REGULATION 19) STATEMENT OF REPRESENTATION PROCEDURE AND STATEMENT ON AVAILABILITY OF PROPOSED SUBMISSION DOCUMENTS FOR INSPECTION

Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended) - Regulations 7, 19, 20 and 35

Chelmsford City Council is inviting your comments on the following documents:

- Chelmsford Local Plan – Pre-Submission (Regulation 19) Document
- Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment
- Co-Living Housing Planning Advice Note
- Consultation Draft Planning Obligations Supplementary Planning Document.

The City Council is publishing the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document for consultation from 4 February to 18 March 2025. It is accompanied by the Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment. This is in accordance with Regulations 19 and 20 of the Town and Country Planning (Local Planning) (England) Regulations 2012.

The Local Plan shapes future growth and development across the whole of Chelmsford City Council's area. It sets out a positive vision, identifies where and how new development should take place in the future as well as areas for protection. It includes strategic policies, site allocation policies, development management policies and a Policies Map for determining all forms of planning applications. We adopted our current Local Plan in May 2020. We need to review the plan at least every five years to make sure it remains up to date and meets the changing needs for development growth to 2041.

The Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment comprises a Sustainability Appraisal (SA) and Strategic Environmental Assessment (SEA), Habitats Regulations Assessment (HRA), Health Impact Assessment (HIA) and Equality Impact Assessment (EqIA).

In addition, the Council is also consulting on a Co-Living Housing Planning Advice Note. The Planning Advice Note seeks to provide practical guidance to potential promoters or developers of co-living housing in Chelmsford, to ensure they meet the Council's expectation in this regard.

The Consultation Draft Planning Obligations Supplementary Planning Document (SPD) is also being consulted on. This sets out how the Council will seek planning obligations when considering planning applications. The adopted SPD was published in January 2021 and has been updated to reflect proposed changes in the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document, as well as changes in national planning policy. It refers to the latest published Infrastructure Delivery Plan and integrates and updates some published Planning Advice Notes.

This note has nine parts:

- PART 1 – What is a Regulation 19 Consultation
- PART 2 – Legal Compliance and Duty to Co-operate
- PART 3 – Soundness
- PART 4 – Where can I view the consultation documents?
- PART 5 – How can I comment?
- PART 6 – Appearing at Independent Examination
- PART 7 – What will happen with my representation?
- PART 8 – Statement on availability of proposed submission documents for inspection
- PART 9 – Other consultations

The consultation period runs from 10am on 4 February 2025 until 4pm on 18 March 2025 Comments received before or after this time cannot be accepted.

PART 1 – What is a Regulation 19 Consultation

As a Local Planning Authority, the Council must publish the version of the Local Plan that it intends to submit to the Planning Inspectorate for Independent Examination. This allows for representations to be made which can be considered at Independent Examination. This is known as the publication stage, in accordance with Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended www.legislation.gov.uk/uksi/2012/767/contents. For Chelmsford, this is the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document (the 'Plan').

The Planning Inspector undertaking the Independent Examination will assess whether the Local Plan has been prepared in line with the relevant legal requirements (including the duty to co-operate) and whether it is 'sound'.

PART 2 – Legal Compliance and Duty to Co-operate

You should consider the following before making a representation on legal compliance:

- The Plan should be included in the Council's current Local Development Scheme (LDS) and the key stages set out in the LDS should have been followed. The LDS is effectively a programme of work prepared by the Council, setting out the plans it proposes to produce. It will set out the key stages in the production of any Plans which the LPA proposes to bring forward for Independent Examination. If the Plan is not in the current LDS it should not have been published for representations. The Council's LDS is available to view on its website at:www.chelmsford.gov.uk/media/ew4mbrsr/chelmsford-local-development-scheme-2023-2028.pdf
- The process of community involvement for the Plan in question should be in general accordance with the Council's Statement of Community Involvement (SCI). The SCI sets out the Council's strategy for involving the community in the preparation and revision of plans and the consideration of planning applications. The Council's SCI is available to view on its website at: www.chelmsford.gov.uk/sci
- The Council is required to provide a Sustainability Appraisal (SA) report when it publishes a Plan. This should identify the process by which the SA has been carried out, and the baseline information used to inform the process and the outcomes of that process. The SA

is a tool for assessing the extent to which the Plan, when judged against reasonable alternatives, will help to achieve relevant environmental, economic and social objectives. The SA for this Plan is included within the published Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment.

- The Plan should comply with all other relevant requirements of the Planning and Compulsory Purchase Act (PCPA) and the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended.

You should consider the following before making a representation on compliance with the duty to co-operate:

- Section 33A of the PCPA requires the Council to engage constructively, actively and on an ongoing basis with neighbouring authorities and certain other bodies over strategic matters during the preparation of the Plan. The Council's Duty to Co-operate Position Statement (December 2024) provides an update on the activities undertaken by Chelmsford City Council (CCC) in respect to the Duty to Co-operate on the Review of the adopted Chelmsford Local Plan, and is available to view on the Council's website at: https://www.chelmsford.gov.uk/media/g2pn5tmg/dtc002-duty-to-cooperate-position-statement-december-2024.pdf
- Non-compliance with the duty to co-operate cannot be rectified after the submission of the plan. Therefore, the Inspector has no power to recommend modifications in this regard. Where the duty has not been complied with, the Inspector cannot recommend adoption of the Plan.

PART 3 – Soundness

A Local Planning Authority should submit a Plan for Independent Examination which it considers to be "sound". The tests of soundness are set out in the National Planning Policy Framework (NPPF). Plans are sound if they are:

Positively prepared – providing a strategy which, as a minimum seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring authorities is accommodated where it is practical to do so and is consistent with achieving sustainable development

Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence

Effective – deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and

Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in the NPPF. Please note that in accordance with paragraph 234 of the 2024 NPPF, for the purpose of preparing local plans this Plan will be examined under the 2023 NPPF.

Representations made by you at this stage should focus on whether the plan meets the tests listed above. This is because these are the broad areas that the Inspector will focus on in examining the Local Plan.

If you think the content of the Local Plan is not sound because it does not include a policy on a particular issue, you should go through the following steps before making representations:

- Is the issue with which you are concerned already covered specifically by national planning policy?
- Is the issue with which you are concerned already covered by another policy in the Local Plan?
- If the policy is not covered elsewhere, in what way is the Local Plan unsound without the policy?
- If the Local Plan is unsound without the policy, what should the policy say?

PART 4 - Where can I view the consultation documents?

You can read the consultation documents in the following ways:

- On the Council's Consultation Portal at www.chelmsford.gov.uk/planningpolicyconsult. This system also allows you to submit comments to the consultations
- On the Council's website alongside the Local Plan evidence base documents at www.chelmsford.gov.uk/lp-review
- At the Chelmsford City Council Customer Service Centre, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford CM1 1JE (10am to 4pm Monday to Friday).

At the following drop-in public exhibitions. These will provide an opportunity to meet an officer face-to-face unless otherwise stated.

Location	Date	Time
Council Chamber, Civic Centre, Duke Street, Chelmsford, CM1 1JE	Thursday 27 February Friday 28 February Saturday 1 March	6pm - 8pm 2pm - 4pm 10am - 12noon
High Chelmer Shopping Centre, Exchange Way, Chelmsford, CM1 1XB	Monday 24 February to Sunday 2 March	Unstaffed exhibition panels displayed all-day during shopping centre opening hours
South Woodham Town Council, Champions Manor Hall, Hullbridge Road, South Woodham Ferrers, CM3 5LJ	Thursday 13 February to Tuesday 25 February	Unstaffed exhibition panels displayed 9am - 4pm (except weekends)

Please check our website www.chelmsford.gov.uk/lp-review for any updates before making your journey.

If you are unable to access the documents on a computer, you can request paper copies by emailing planning.policy@chelmsford.gov.uk, telephoning (01245) 606330 or by writing to Spatial Planning Services, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, CM1 1JE. A charge will be made to cover printing and postage costs.

PART 5 - How can I comment?

You can comment on the consultation documents in the following ways:

Online Consultation Portal:
Go to: www.chelmsford.gov.uk/planningpolicyconsult where you can:

- Read the consultation documents
- Make your comments via the specially designed representation form
- Sign up for alerts to feedback reports and future consultations

This is our preferred means of receiving comments as it ensures that your comments are recorded accurately and are processed quickly.

It also allows you to edit comments before submitting them, save a draft and return to your form later, and to upload any supporting material. Please **save** your comments as you complete the form using the 'Save as Draft' button at the bottom of the form as the system will timeout after 30 minutes.

You can view, download, and comment on all the consultations via the online Consultation Portal: www.chelmsford.gov.uk/planningpolicyconsult

If you have not already registered, registration is simple using the easy to follow steps in our User Guide: www.chelmsford.gov.uk/lp-portal-guide. These guidance notes include more information on the Consultation Portal, including what to do if you have forgotten your password, and how to make your comments. If you have followed the user guide and have any further questions or are having difficulties using the Consultation Portal please contact us at planning.policy@chelmsford.gov.uk or call 01245 606330 during normal office hours and one of the team can assist you.

Please note you will need to add your comments through the representation form for each paragraph, policy, map, table, figure or appendix etc. you wish to comment on. Full guidance on how to make your comments are included within our User Guide: www.chelmsford.gov.uk/lp-portal-guide

The events on the Consultation Portal are as follows:

1. Local Plan Regulation 19 Pre-Submission Consultation 2025 – Use this event if you want to make comments on multiple policies/paragraphs/maps etc of the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document. You can read and make your comments on each part of the document as you go through it using the representation form.

2. Local Plan Regulation 19 Pre-Submission Consultation Questionnaire 2025 – Here you can read the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document as a pdf and then make comments on individual policies/paragraphs/maps etc. You will need to complete this representation form multiple times if you wish to make comments on multiple parts of the document. Each time you complete it you must state which policy/paragraph/map etc of the document your comments relate to.

3. Local Plan Regulation 19 Pre-Submission Integrated Impact Assessment 2025 – Here you can read the Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment (IIA) as a pdf and then make comments on individual paragraphs/figures/tables of the document. You will need to complete this representation form multiple times if you wish to make comments on multiple parts of the IIA. Each time you complete it you must state which paragraph/figure/tables etc of the IIA your comments relate to.

4. Co-Living Housing Planning Advice Note Consultation – Here you can read the document as a pdf and then make comments on individual paragraphs/figures/tables of the Advice Note. You will need to complete this representation form multiple times if you wish to make comments on multiple parts of the Advice Note. Each time you complete it you must state which paragraph/figure/tables etc of the Advice Note your comments relate to.

5. Consultation Draft Planning Obligations Supplementary Planning Document – Here you can read the document as a pdf and then make comments on individual paragraphs/figures/tables of the Planning Obligations Supplementary Planning Document (SPD). You will need to complete this representation form multiple times if you wish to make comments on multiple parts of the SPD. Each time you complete it you must state which paragraph/figure/tables etc of the SPD your comments relate to.

Representations are invited for a period of six weeks, up to 4pm on 18 March 2025. Comments received outside of this period will not be accepted. The Council is unable to make exceptions or allowances for postal delays or external problems with electronic communications. So please try to reply well ahead of the final deadline.

For all the above events please remember to save your comments as you go.

In writing:
If you prefer to send comments in writing, please fill in the relevant specially designed representation forms for each consultation event.

We will then record your comments on the Consultation Portal, to make sure they are dealt with alongside the online comments.

Local Plan representation forms cover the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document and the Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment consultations.

The Local Plan representation forms can be downloaded at www.chelmsford.gov.uk/lp-review. Paper copies of these representation forms for are also available from Chelmsford City Council's Customer Service Centre, Civic Centre, Duke Street, Chelmsford, CM1 1JE (10am to 4pm Monday to Friday). Paper copies can also be made available on request by telephoning (01245) 606330 or emailing planning.policy@chelmsford.gov.uk

Forms can be returned:

- By e-mail to planning.policy@chelmsford.gov.uk
- By post to Planning Policy, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, CM1 1JE
- By hand to Chelmsford City Council Customer Service Centre (details above).

The use of the Local Plan representation forms is strongly recommended as this will ensure that comments are related to the matters relevant to the subsequent Independent Examination by a Planning Inspector.

If you wish to submit a representation on more than one issue in the Local Plan, please complete a Local Plan representation form continuation sheet as provided for each issue.

If you have difficulties making representations by e-mail or post due to a disability, please call 01245 606330. Documents can be made available in alternative format including large print, audio and other languages. Please call (01245) 606330, or email planning.policy@chelmsford.gov.uk

Please do not submit multiple copies of the same response (e.g. online and email, or online and hardcopy).

General advice on making representations on the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document:

If you wish to make a representation seeking a modification to the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document (the 'Plan') or part of the Plan you should set out clearly in what way you consider the Plan or part of the Plan is legally non-compliant or unsound, having regard to the soundness criteria set out above in Part 3. Your representation should be supported by evidence wherever possible. It will be helpful if you also say succinctly and precisely how you think the plan should be modified.

You should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification. If you are submitting a representation of significant length, please provide a summary of not more than 200 words. We will request a summary in appropriate circumstances if it is not originally provided. You should not assume that you will have a further opportunity to make submissions. Any further submissions after the Plan has been submitted for Independent Examination may only be made if invited by the Inspector, based on the matters and issues they identify.

The Planning Inspectorate advise that where groups or individuals share a common view on the plan, it would be very helpful if they would make a single representation which represents that view, rather than a large number of separate representations repeating the same points. In such cases the group should indicate how many people it is representing and how the representation has been authorised.

If you are organising a petition or intend to, or have signed one, it must be submitted by 4pm on 18 March 2025 and be accompanied by the name and contact details for the petition organiser. The Council will register the petition organiser on the Consultation Portal. Acknowledgement of the petition and any future Local Plan notifications will only be sent to the petition organiser. Petitions should include the names and addresses of all who support the petition. The number of signatories will be recorded and attributed to relevant representations, but names, addresses and signatures themselves will not be published.

Please consider carefully how you would like your representation to be dealt with in the Independent Examination: whether you are content to rely on your written representation, or whether you wish to take part in hearing session(s). Please remember only representors who are seeking a change to the Plan can be heard at the hearing session(s), and it is the Planning Inspector's decision on who will participate and be heard at the Independent Examination. In considering this, please note that written and oral representations carry the same weight and will be given equal consideration in the Independent Examination process.

Representations about the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document (the 'Plan') may be accompanied by a request to be notified at a specified address of any of the following:

i. The submission of the Plan to the Secretary of State Secretary of State for Levelling Up, Housing and Communities for Independent Examination
ii. Publication of the Planning Inspector's Report on the Plan
iii. Adoption of the Local Plan 2022- 2041

These requests can be made by completing the relevant section of the Local Plan representation form.

General advice on making representations to all consultation events:

If you are uploading additional supporting documents, please ensure they contain no signatures, e-mail addresses or personal postal addresses.

Please note we are unable to accept anonymous representations. It is a requirement of the Local Plan process that comments can only be deemed legitimate ("duly made") if they are received in a written format with a name and address supplied. Comments made verbally, anonymously, or outside of the consultation period cannot be accepted.

Section 149 of the Equality Act 2010 requires that the Council should avoid any form of discrimination and foster good relations between different ethnic groups. Comments which are deemed to be discriminatory, racist, inflammatory or derogatory, or include information which

comprises personal or sensitive information e.g. health information, details about a criminal record, or religious beliefs, will not be accepted. We would ask that you avoid the use of such comments when making your representations.

PART 6 - Appearing at Independent Examination

The Local Plan representation form asks whether you consider it necessary to take part and speak at the Independent Examination hearing if your representation is seeking a modification to the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document (the 'Plan'). Please remember it is the Planning Inspector's decision on who will participate and be heard at the Independent Examination. It is acceptable to submit just a written submission if you feel this adequately covers all your points as all the representations will be submitted to the Planning Inspector and considered as part of the Independent Examination.

There will be no examination of the Consultation Draft Planning Obligations Supplementary Planning Document, or the Co-Living Planning Advice Note.

PART 7 - What will happen with my representation?

For all consultation events the Council will acknowledge receipt of all duly received representations, although the Council will not enter into individual correspondence. All representations will be recorded and published on the Consultation Portal at www.chelmsford.gov.uk/planningpolicyconsult

Comments will be published with the respondent's name, organisation and agent (where applicable). No other personal details will be made public. Data will be held in accordance with the Data Protection Act 1998 and the General Data Protection Regulations. For more information please visit the Council's Privacy Policy web page: www.chelmsford.gov.uk/your-council/about-our-website/privacy-policy-and-notices/privacy-policy/

A copy of all duly made representation(s) to the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document and Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment will be made available to the Planning Inspectorate and to the person appointed by the Secretary of State to conduct the examination (i.e. the Inspector). These representations will be 'made available' in line with the Regulations (The Town and Country Planning (Local Planning) (England) Regulations 2012 – Regulations 20, 22 and 35). This includes publication on the Council's Consultation Portal.

Following the consultation, feedback reports will be produced setting out the main issues raised to the documents.

PART 8 – Statement on availability of proposed submission documents for inspection

The following documents are defined in Regulation 17 of the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended) as the "proposed submission documents":

i. Chelmsford Local Plan – Pre-Submission (Regulation 19) Document and its Policies Map
ii. Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment
iii. Issues and Options You Said We Did Feedback Report
iv. Preferred Options You Said We Did Feedback Report

These documents are available for inspection in line with Part 4.

In addition to these proposed submission documents, a number of supporting evidence based documents are published to view on our website at www.chelmsford.gov.uk/lp-review

PART 9 – Other consultations

We are also consulting on two additional planning consultations as outlined below:

Co-Living Housing Planning Advice Note Consultation

Co-living housing proposals have the potential to meet a specific demand and need for housing. However, by doing so the Council needs to ensure that this does not result in sub-standard accommodation creating unacceptable living conditions for future residents. The Planning Advice Note seeks to provide practical guidance to potential promoters or developers of co-living housing in Chelmsford, to ensure they meet the Council's expectation in this regard.

Consultation Draft Planning Obligations Supplementary Planning Document

The Consultation Draft Planning Obligations Supplementary Planning Document (SPD) sets out how the Council will seek planning obligations when considering planning applications. The adopted SPD was published in January 2021 and has been updated to reflect proposed changes in the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document as well as changes in national planning policy. It refers to the latest published Infrastructure Delivery Plan and integrates and updates some published Planning Advice Notes.

How to make your comments

Both the draft Planning Advice Note and SPD will be subject to the same six-week public consultation period alongside the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document and the Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment consultations. See Part 5 above for full details about how to make your comments.

Next steps

Following the consideration of the consultation responses, the Co-Living Housing Planning Advice Note will be finalised for consideration by the Council's Cabinet in the Spring of 2025. If approved, it will then be used by the Council as a material consideration in the determination of planning applications.

Following the consultation on the Draft Planning Obligations Supplementary Planning Document, a summary of the consultation feedback and how the feedback will be addressed in the document will be reported to Chelmsford Policy Board before the document is submitted as an evidence base document supporting the Independent Examination of the Plan. The final version of the SPD is not expected to be published until the Local Plan is adopted. This will allow for any modifications made by the Inspector to be incorporated into the SPD.

Dear Consultee,

New Consultation Events –

- **Chelmsford Local Plan – Pre-Submission (Regulation 19) Document**
- **Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment Consultation**
- **Consultation Draft Planning Obligations Supplementary Planning Document, and**
- **Co-Living Housing Planning Advice Note**

I am writing to you as you as a registered consultee on Chelmsford City Council's Local Plan consultation database.

Please be advised that the City Council is publishing the above documents for consultation for six weeks from: 10am on Tuesday 4 February 2025 to 4pm on Tuesday 18 March 2025**.**

Local Plan

The next stage in the Review of the Chelmsford Local Plan is to consult on the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document.

What is the adopted Local Plan and why are we reviewing it?
The Local Plan shapes future growth and development across Chelmsford City Council's area. It sets out a positive vision, identifies where and how new development should take place in the future as well as areas for protection. We adopted our current Local Plan in May 2020. We need to review the plan at least every five years to make sure it remains up to date and meets the changing needs for development growth to 2041. The Government revised the National Planning Policy Framework (NPPF) in December 2024 but our Local Plan is able to continue under transitional arrangements meaning it will be examined against the previous December 2023 NPPF.

What is the Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment?
The Review of the Adopted Chelmsford Local Plan: Integrated Impact Assessment assesses the sustainability, health, and equality performance of the Plan.

What are we consulting on?
Following on from previous consultations in 2022 and 2024, we are consulting on the final draft Local Plan before it is submitted for examination by a government-appointed independent Planning Inspector.

We are consulting on the:

- Chelmsford Local Plan – Pre-Submission (Regulation 19) Document
- Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment (IIA)

How do I get involved?
To ensure that comments are submitted in a format required by the Planning Inspector, it is important that you identify whether you support or object to the Pre-Submission (Regulation 19) Local Plan, whether the Council has met the legal requirements, including the Duty to Co-operate and whether it meets the tests of soundness set out in the national policy (National Planning Policy Framework). Plans are sound if they are:

- **Positively prepared** – provide a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development
- **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence
- **Effective** – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common grounds; and
- **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in the National Planning Policy Framework.

We prefer receiving comments online, using our specially designed Consultation Portal. Using the Consultation Portal helps us to record your comments accurately and process them quickly. Go to www.chelmsford.gov.uk/planningpolicyconsult to:

- Read the consultation documents
- Make your comments
- Sign up for alerts to future consultations.

Otherwise, representations should be made on a specially designed response form available online at www.chelmsford.gov.uk/lp-review or a paper copy can be provided by phoning (01245) 606330. **The use of the standard representation form is strongly recommended as this will ensure that comments are related to the matters relevant to the subsequent examination by a Planning Inspector.**

Responses can also be made by email and in writing.

See the enclosed Statement of Representation Procedure and Statement on Availability of Proposed Submission Documents for full details about what the documents cover and how to make your comments.

More information

- Read our newsletter which summaries the consultation (enclosed)

- Meet with planning staff face-to-face at a public drop-in exhibition (see the Statement of Representation Procedure and Statement on Availability of Proposed Submission Documents for details)
- Visit our website for further information such as the frequently asked questions www.chelmsford.gov.uk/lp-review
- Email us at planning.policy@chelmsford.gov.uk or call 01245 606330.

Next Steps
All responses will be submitted to the Planning Inspector, alongside the Pre-Submission (Regulation 19) Local Plan and evidence base. The Council will produce a summary of the main issues raised in the consultation responses for the Planning Inspector and publish this online.

All duly-made comments will be published on the Council's Consultation Portal in accordance with the Data Protection Act and General Data Protection Regulations. To be duly made, you need to provide your name and address with your comment. Anonymous comments will not be accepted.

Your name, your comments and any information provided, including supporting documents, will be available for public inspection and published online. We will not publish any personal details.

Section 149 of the Equality Act 2010 requires that the Council should avoid any form of discrimination and also foster good relations between different ethnic groups. We will not display, share or consider any comments that are inappropriate, including those that are racist, inflammatory or derogatory. Any such comments will be considered as inadmissible and will not be accepted.

Further general information on the Local Plan can be found on the Council's website at https://www.chelmsford.gov.uk/planning-and-building-control/planning-policy-and-local-plan/

Additional Consultations
We are also consulting on two additional planning consultations as outlined below.

Consultation Draft Planning Obligations Supplementary Planning Document

The Consultation Draft Planning Obligations Supplementary Planning Document (SPD) sets out how the Council will seek planning obligations (such as financial contributions towards site improvements) when considering planning applications. The adopted SPD was published in January 2021 and has been updated to reflect proposed changes in the Pre-Submission (Regulation 19) Local Plan as well as changes in national planning policy. It refers to the latest published Infrastructure Delivery Plan and integrates and updates some published Planning Advice Notes.

The SPD will be subject to the same six-week public consultation period alongside the Pre-Submission (Regulation 19) Local Plan. See the enclosed Statement of Representation Procedure and Statement on Availability of Proposed Submission Documents for full details about how to make your comments.

Following the consideration of the consultation responses, the final version of the SPD will be finalised for consideration by the Council's Cabinet. If approved, it can then be used by the Council as a material consideration in the determination of planning applications.

Co-Living Housing Planning Advice Note Consultation

Co-living housing is a form of communal living. It has the potential to meet a specific demand and need for housing. However, by doing so the Council needs to ensure that this does not result in sub-standard accommodation creating unacceptable living conditions for future residents. The Planning Advice Note seeks to provide practical guidance to potential promoters or developers of co-living housing in Chelmsford, to ensure they meet the Council's expectation in this regard.

The draft Planning Advice Note will be subject to the same six-week public consultation period alongside the Pre-Submission (Regulation 19) Local Plan. See the enclosed Statement of Representations Procedure and Statement on Availability of Proposed Submission Documents for full details about how to make your comments.

Following the consideration of the consultation responses, the final version of the Co-Living Housing Planning Advice Note will be finalised for consideration by the Council's Cabinet. If approved, it can then be used by the Council as a material consideration in the determination of planning applications.

Please note:

- **We are unable to accept anonymous representations**
- **Any late comments received after 4pm on Tuesday 18 March 2025 cannot be accepted**
- **Individual acknowledgement of receipt will not be possible**.

Updating your details

If you no longer wish to remain on our consultation database or if your contact details have changed, please contact us on 01245 606330.

You may prefer to submit/manage/view your comments online through the planning policy Consultation Portal. We will then keep you informed of progress of the Local Plan by email, and you can easily view and comment on consultations. It's simple to transfer to the online system - please call us on 01245 606330.

Yours faithfully,

Jeremy Potter

Local Plan: Pre-Submission Consultation

We are reviewing our adopted Local Plan, and so are consulting on the Pre-Submission stage now. The consultation closes at 4pm on Tuesday 18 March 2025.

Local Plan Review

We are reviewing our adopted Local Plan. We are currently consulting on the Chelmsford Local Plan: Pre-Submission (Regulation 19) Document. The consultation period closes on Tuesday 18 March 2025.

This is our third and final stage of public consultation on the final draft Local Plan before we submit it for Independent Examination by a government-appointed Planning Inspector.

As part of the consultation, we are also asking for views on the Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment. We are also consulting separately on two further planning documents.

This is a separate process to making comments on planning applications. You can view and comment on any current planning applications.

Pre-submission consultation stage

How to have your say

You can view the Local Plan review consultation documents on our specially designed Planning Policy consultation portal.

Also in this section

- Adopted Local Plan
- Request housing and planning policy advice
- Brownfield register
- Self-build, custom build and community-led housing

We prefer receiving comments through the consultation portal. This ensures that your comments are recorded accurately and are processed quickly. You can also download the consultation documents and sign up for consultation alerts.

You can find out more about how to use the Planning Policy consultation portal.

You can also read detailed ↓ guidance on how to make your comments on these Local Plan consultation events.

Commenting on individual planning applications

This Local Plan consultation is a separate process to making comments on a planning application. You can find out how to comment on a planning application.

Documents we are consulting on

- Call for sites, SHELAA and parish maps
- Consultations on planning policy
- Essex Coast RAMS
- Involving communities and organisations
- Livewell Development Accreditation Scheme
- Monitoring development
- Neighbourhood Plans and Village Design Statements
- Supplementary Planning Documents and planning advice notes

Chelmsford Local Plan: Pre-Submission (Regulation 19) Document

This is the main consultation document, where we include sites where new homes, jobs and other facilities will be located as well as areas for protection.

We also include updated and new policies that we will use to decide planning applications. The document also includes a Policies Map which shows where the planning policies apply.

You can click on event 1 in the consultation portal to read and make comments on the document as you go. We need you to consider whether the Pre-Submission Document is legally compliant and consistent with national policy, and answer specific consultation questions on this.

Contact Planning Policy

Contact the team online

01245 606330

Chelmsford Local Plan: Pre-Submission (Regulation 19)

Questionnaire

This is a simple questionnaire on the main consultation document. You can click on event 2 in the consultation portal if you have read the consultation document and just want to make your comments in one place.

We need you to consider whether the Pre-Submission Document is legally compliant and consistent with national policy, and answer specific consultation questions on this.

Pre-Submission Integrated Impact Assessment (IIA)

This includes environmental, habitats, quality and health assessments of the impacts of the Pre-Submission Local Plan.

You can click on event 3 in the consultation portal to view and comment on the IIA.

Co-Living Housing Planning Advice Note Consultation

This provides practical guidance to potential promoters or developers of co-living housing in Chelmsford.

You can click on event 4 in the consultation portal to view and comment on the Planning Advice Note.

Consultation Draft Planning Obligations Supplementary Planning Document (SPD)

This sets out how we will seek planning obligations such as financial contributions towards important site improvements when considering planning applications.

You can click on event 5 in the consultation portal to view and comment on the SPD.

Download the documents

You can view the Local Plan review consultation documents on our specially designed Planning Policy consultation portal.

Otherwise you can download them. These documents are large in size. You may find it easier to download and view these documents on a desktop computer, rather than on a smartphone or tablet.

- Pre Submission (Regulation 19) Local Plan Consultation Document
- Pre Submission Integrated Impact Assessment (IIA)
- Co Living Housing Planning Advice Note
- Consultation Draft Planning Obligations Supplementary Planning Document (SPD)
- Co Living Housing Planning Advice Note Equality Impact Assessment

Supporting documents

Before making your comments, we recommend you read the guidance contained in the Pre-Submission (Regulation 19) Statement of Representation Procedure and Statement on Availability of Proposed Submission Documents for Inspection

This includes the 'Tests of Soundness' that your comments should address, including legal compliance and consistency with national policy. These are the broad areas that the Planning Inspector will focus on in examining the Local Plan.

We have published feedback reports from the earlier consultation stages:

↓ Issues and Options 'You Said We Did' Feedback Report (May 2024)

↓ Preferred Options 'You Said We Did' Feedback Report (February 2025)

You can see a list of all the adopted and allocated sites (↓ Sites at a Glance), with a note of which Policies Map section they are shown on. The Policies Maps are included at Section 11 of the ↓ Local Plan Pre-Submission Options Consultation Document.

Topic papers

We have produced several Topic Papers to set out how the review of the Local Plan has been developed. We will refresh and update them at each stage of the review process to ensure the latest information/position is available.

Topic Papers provide background information, but they do not contain any policies, proposals or site allocations. They will form part of the Local Plan evidence base which we will submit alongside the Local Plan for independent examination.

Pre Submission Topic Paper Climate Change (February 2025) ↓

Pre Submission Topic Paper Employment (February 2025) ↓

Pre Submission Topic Paper Health and Wellbeing (February 2025)

Pre Submission Topic Paper Historic Environment (February 2025)

Pre Submission Topic Paper Housing (February 2025)

Pre Submission Topic Paper Infrastructure (February 2025)

Pre Submission Topic Paper Spatial Strategy and Strategic Sites (February 2025)

Pre Submission Topic Paper Transport (February 2025)

Other ways to comment

We prefer receiving comments through the consultation portal. This ensures that your comments are recorded accurately and are processed quickly. You can also download the consultation documents and sign up for consultation alerts.

You can find out more about how to use the Planning Policy consultation portal.

If you prefer to send comments in writing, you can print and fill in the relevant specially-designed representation forms for each consultation event.

The representation forms are for the:

- ↓ Pre-Submission (Regulation 19) Document
- ↓ Continuation form for the Pre-Submission (Regulation 19) Document
- ↓ Integrated Impact Assessment
- ↓ Continuation form for the Integrated Impact Assessment
- ↓ Co-Living Planning Advice Note
- ↓ Draft Planning Obligations Supplementary Planning Document

We will then record your comments on the Consultation Portal, to make sure they are dealt with alongside the online comments.

You can collect a paper copy of these representation forms from our Customer Service Centre, or you can request one by phone on 01245 606330 or by email.

You can also make comments:

- by e-mail to planning.policy@chelmsford.gov.uk
- by post to Planning Policy, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, CM1 1JE
- by hand at our Customer Service Centre

If you have difficulties commenting due to a disability, you can call 01245 606330. We can make documents available in alternative formats, including large print, audio and other languages, on request by phone on (01245) 606330 or by email.

How to find out more

You can:

- view our What is a Local Plan? video

- download a copy of the ↓ FAQs
- read our ↓ Pre-Submission Local Plan Newsletter
- read our ↓ Integrated Impact Assessment Newsletter
- view our ↓ exhibition panels

You can also visit one of our exhibitions in person.

We will be holding a staffed exhibition in our Council Chamber at the Civic Centre on:

- Thursday 27 February, from 6pm to 8pm
- Friday 28 February, from 2pm to 4pm
- Saturday 1 March, from 10am to 12 noon

You can also view an unstaffed exhibition at:

- the High Chelmer Shopping Centre from Monday 24 February to Sunday 2 March, between 7am and 6.30pm
- South Woodham Ferrers Town Council, Champions Manor Hall, Hullbridge Road, SWF from Thursday 13 February to

Tuesday 25 February, between 9am and 4pm (excluding weekends)

After the consultation closes

We will acknowledge receipt of all 'duly made' representations to all the consultation events, but we will not enter into individual correspondence. We will record and publish all comments on the Consultation Portal .

We will send all comments about the Chelmsford Local Plan: Pre-Submission (Regulation 19) Document, and Pre-Submission Integrated Impact Assessment (IIA), to the Planning Inspectorate for Independent Examination. We will also publish feedback reports.

Once we have considered the consultation responses, we will finalise the Co-Living Housing Planning Advice Note in spring 2025.

We will prepare a feedback report on the Consultation Draft Planning Obligations Supplementary Planning Document (SPD), and submit the document as evidence for the Independent

Examination. We expect to publish a final version when we adopt the Local Plan.

Evidence Base: Pre-Submission

We are developing a range of new and updated evidence to support the Local Plan review. We will publish the evidence base here as we develop it. You can search by name and/or category.

If you search by name or reference number, you can do this with or without choosing the category.

Alternatively, you can list all the documents in a category by choosing the category from the drop-down list and clicking on search.

We used several evidence base documents to support the adopted Local Plan. Many of these are still relevant or we will be updating them during the Local Plan review. Although they do not form part of this consultation, you can still view the evidence base for the Adopted Local Plan.

Other useful information

Local Plan review stages

We adopted our current Local Plan in May 2020. It guides growth and development across Chelmsford City Council's area to 2036. We need to review the plan at least every five years, to see if we need to update it. The review means that the Local Plan will now run until 2041.

Issues and Options (previous stage)

This was the first stage of consultation, which took place in 2022. Many people and organisations commented, and we have carefully considered all the responses, alongside updated evidence, national planning policy, new local priorities, and monitoring data.

You can read an ↓ Issues and Options feedback report which sets out the consultation feedback we received on the Issues and Options consultation and how we have taken the comments into account when preparing the Preferred Options Local Plan.

Preferred Options (previous stage)

This consultation was the second formal stage in the preparation of the review plan, and involved residents, businesses, developers, and other interested parties.

We have published a ↓ Preferred Options feedback report setting out a review of the consultation activity, a summary of the representations we received, and how these comments have been used to develop the Pre-Submission Local Plan document.

Pre-Submission (current stage)

This consultation is the third formal stage in the preparation of the review plan. This consultation focuses on legal compliance and consistency with national planning policy.

The consultation runs for a period of six weeks from 10am on Tuesday 4 February 2025 to 4pm on Tuesday 18 March 2025.

Submission (future stage)

This is the formal Submission of the Local Plan. We will submit all plan documents, evidence, and comments to the Planning Inspector for an Independent Examination.

Neighbourhood Plan consultations

We recently consulted on two Neighbourhood Plans. These have been developed by Broomfield and Danbury Parish Councils and cover a wide range of issues such as landscape, transport, recreation, heritage, building design, and business.

Both the Danbury Neighbourhood Plan and the Broomfield Neighbourhood Plan have been made (adopted).

You can view the:

- Broomfield Neighbourhood Plan
- Danbury Neighbourhood Plan

Integrated Impact Assessment

We will continue to assess the Local Plan as we review it, to make sure it contributes towards sustainability. We will assess the following aspects of sustainable development:

- Sustainability Appraisal
- Strategic Environmental Assessment
- Habitats Regulations Assessment
- Health Impact Assessment
- Equality Impact Assessment

The IIA assesses the issues and options against a range of social, environmental and economic indicators and helps to identify all the likely significant effects. The IIA advises on ways in which any adverse effects could be avoided, reduced or mitigated or how any positive effects could be maximised. This helps to ensure that the emerging policies, plans and allocations in the Local Plan are promoting sustainable development.

Call for Sites and SHELAA

We use the Strategic Housing and Employment Land Availability Assessment (SHELAA) to assess sites nominated by landowners, promoters and developers. This helps us when researching and developing future Local Plans.

The SHELAA 2023/2024 is our latest published assessment. This assesses the sites put forward to us for consideration as part of the Local Plan Review. You can view the outcomes of that assessment.

The SHELAA is open all year round, meaning you can submit a new site or amend an existing site on a rolling basis. We aim to assess submissions yearly. We anticipate that the next cut-off point for submissions will be spring 2025.

You can submit a site for future assessment, or amend an already submitted site, through the current SHELAA facility.

You can find out more about
how to submit or amend a site, and see the latest assessment outcomes
.

Using the consultation portal

We have a specially designed consultation portal for Local Plan and other planning policy consultations.

If you register, you can:

- read and save consultation documents
- make your comments online
- receive alerts on future consultations

You can find out more about how to use the consultation portal.

Local Development Scheme

We use the Local Development Scheme (LDS) to manage the plan-making process. It sets out our timetable for preparing the documents and for consulting on the Local Plan review.

We first adopted an LDS in 2006 and we have reviewed it regularly as we have made progress on producing our Local Plan.

This LDS is the ninth review. You can download the ↓ Chelmsford Local Development Scheme 2023-2028.

You can also download the ↓ eighth review of the LDS, which we published in November 2021. You can view the changes we have made since November 2021 in Appendix 1 of the 2023-2028 LDS document.

Duty to Co-operate

We are committed to working with other councils and key organisations on planning issues that cross council boundaries.

The organisations we regularly work with include Essex County Council, National Highways, environmental organisations and education providers.

We have to ensure that we properly co-ordinate strategic issues such as:

- land for new homes and jobs
- infrastructure
- providing schools
- mitigating climate change

We have adopted a Duty to Co-operate Strategy, which sets out who we will co-operate with and when, plus how we will do it.

You can download the Duty to Co-operate Strategy.

Consultations

We hold consultations on important issues in the Chelmsford area, so that local people can shape where they live and the services they receive.

Our ↓ Consultation and Engagement Strategy outlines our long-term approach to:

- involving residents in a consistent and coordinated way
- using corporate standards
- adopting innovative approaches

Also in this section

- Feedback about our services
- Petitions

- following best practice

Our strategy ensures that our consultations are inclusive, accessible and a worthwhile experience for everyone involved.

Current consultations

Local Plan Review

We need to review our Local Plan every five years. We are currently consulting on the Chelmsford Local Plan: Pre-Submission (Regulation 19) Document until 18 March 2025. Find out more about the Local Plan Review.

Public Spaces Protection Orders (PSPO) for Chelmsford City Centre

Whistleblowing (report wrongdoing by council staff)

Contact Democratic Services

Contact the team online

01245 606480

We are currently asking for your view on extending the Chelmsford City Centre PSPO.

We are proposing to extend the PSPO for a further three years, from 11 April 2025. this will allow us to can continue to control the prohibited activities outlined in the PSPO, to ensure the quality of life of those who live, visit, and work in the city centre.

You can ↓ view the proposed order, and comment on the PSPO online.

You need to submit any comments on the proposed PSPO by 5pm on Monday 24 March 2025.

CONSULTATION PORTAL GUIDANCE NOTES

Online Consultation Portal:

Go to: www.chelmsford.gov.uk/planningpolicyconsult where you can:

- Read the consultation documents
- Make your comments
- Sign up for alerts to feedback reports and future consultations

This is our preferred means of receiving comments as it ensures that your comments are recorded accurately and are processed quickly.

You can view, download, and comment on all current consultations on the online Consultation Portal. It also allows you to edit comments before submitting them, save a draft and return to your form later, and to upload any supporting material.

Before making your comments, you may find it useful to refer to the **Pre-Submission (Regulation 19) Statement of Representation Procedure and Statement on Availability of Proposed Submission Documents for Inspection** www.chelmsford.gov.uk/lp-sor

If you require assistance please call 01245 606330 during normal office hours (08.45am to 4.45pm Monday to Thursday; 08.45am to 4.00pm Friday) or email planning.policy@chelmsford.gov.uk

For further information about the Local Plan please visit www.chelmsford.gov.uk/lp-review

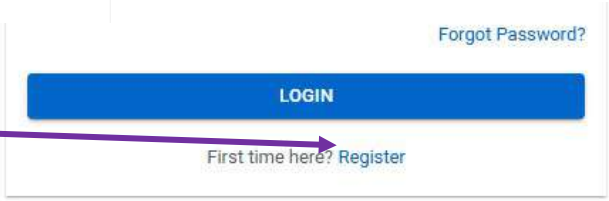
The consultation period runs from 10am on 4 February 2025 until 4pm on 18 March 2025.
Comments received before or after this time cannot be accepted.

How to register

If you have not already registered, registration is simple using the easy to follow steps. Find the Consultation Portal at:
www.chelmsford.gov.uk/planningpolicyconsult

- go to the Consultation Portal
- click on Login/Register button

- click on Register



A registration screen will open.
You then need to read the terms and conditions, and the privacy policy, and tick the boxes.
Then you can:

- create a username
- choose a password (this should be as secure as possible, and include a mix of numbers and letters)

You should only register as an agent if you are representing someone else in a professional capacity, such as a developer or a client.

When you have added your information, click REGISTER. We will send you an email with a link, inviting you to activate your account. After clicking the link, click on your name (top right of screen) and My Details to complete your information.

It is important that you fill in your postal address, so that we have an alternative means of contacting you.

Forgotten login details?

If you have already signed up but forgotten your login details, you should not register again, as this will create a duplicate record.

- go to the Consultation Portal
- click on Sign in button
- click the 'Forgot Password?' link to reset your password

If you are still experiencing problems, you can contact the Planning Policy Helpline on 01245 606330.

How to read the consultation documents and make a comment

Open the Consultation Portal at: www.chelmsford.gov.uk/planningpolicyconsult

Choose the consultation that you are interested in.

We are consulting on the following.

1. Chelmsford Local Plan – Pre-Submission (Regulation 19) Document – this is the main consultation document where we include sites where new homes, jobs and other facilities will be located as well as areas for protection. We need you to consider whether the Pre-Submission Document is legally compliant and consistent with national policy, and answer specific consultation questions on this.

2. Chelmsford Local Plan – Pre-Submission (Regulation 19) Questionnaire – this is a simple questionnaire you can use if you have read the consultation document and just want to make your comments in one place. We need you to consider whether the Pre-Submission Document is legally compliant and consistent with national policy, and answer specific consultation questions on this.

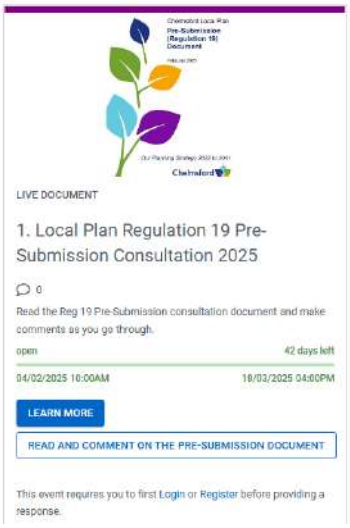
3. Pre-Submission Integrated Impact Assessment (IIA) – this includes environmental, habitats, quality and health assessments of the impacts of the Pre-Submission Local Plan.

4. Co-Living Housing Planning Advice Note Consultation – this provides practical guidance to potential promoters or developers of co-living housing in Chelmsford.

5. Consultation Draft Planning Obligations Supplementary Planning Document (SPD) – this sets out how we will seek planning obligations such as financial contributions towards important site improvements when considering planning applications.

1. Pre-Submission (Regulation 19) Document - How to make a comment

Go to the consultation



Select ‘Learn More’

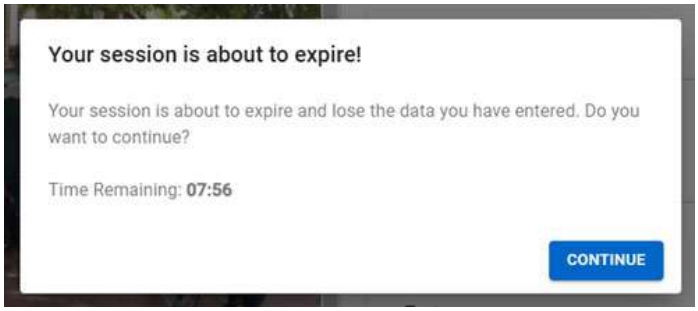
You can read the whole document from the beginning, and move through by scrolling with your mouse or scroll bar. Otherwise, you can use the contents page to navigate the document and select which part of the document you wish to view.

Once you have chosen which part of the plan you wish to comment on, select ‘ADD COMMENT’. This will open a comment form where you can use the specifically designed questions to respond. You will need to log in to make a comment.

Please note you will need to add your comments through a new comment form for each paragraph, policy, map, table, figure or appendix you wish to comment on.

Please **save** your comments as you complete the form using the ‘Save Draft’ button at the bottom of the form as the system will timeout after 30 minutes.

You will get a reminder 10 minutes before the system times out. You will need to select ‘Continue’, and then make sure that you ‘Save Draft’.

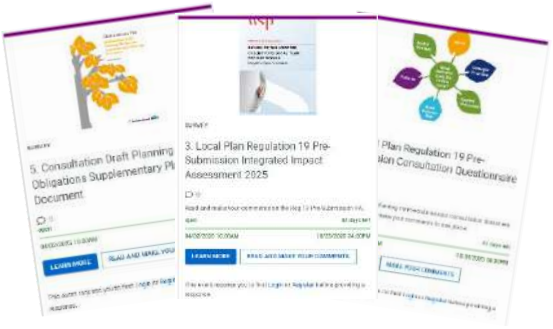


When you have completed the comments form, do not forget to select ‘Submit’.

How to make a comment – other consultations

2. Chelmsford Local Plan – Pre-Submission (Regulation 19) Questionnaire
3. Pre-Submission Integrated Impact Assessment (IIA)
4. Co-Living Housing Planning Advice Note Consultation
5. Consultation Draft Planning Obligations Supplementary Planning Document (SPD) –

Go to the consultation you are interested in and select the ‘Learn More’ button:

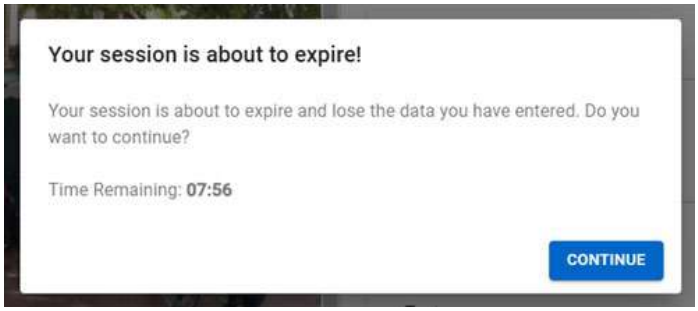


The consultation document and the supporting documents are listed on the left side.
Please read the documents before making your comments.

When you are ready to make your comments, click on the ‘Read and make your comments’ button.

Please **save** your comments as you complete the form using the ‘Save Draft’ button at the bottom of the form as the system will timeout after 30 minutes.

You will get a reminder 10 minutes before the system times out. You will need to select ‘Continue’, and then make sure that you ‘Save Draft’.



When you have completed the comments form, do not forget to select ‘Submit’.

Important notes:

If you are submitting a representation of significant length, please provide a summary of not more than 200 words. We will request a summary in appropriate circumstances if it is not originally provided.

When uploading supporting documents, please ensure they contain no signatures, e-mail addresses or personal postal addresses.

To be duly made, you need to provide your name and address with your comment. Anonymous comments will not be accepted.

Comments will be published with the respondent's name, organisation and agent (where applicable). No other personal details will be made public. This includes publication on the Council's Consultation Portal. Data will be held in accordance with the Data Protection Act 1998 and the General Data Protection Regulations. For more information please visit the Council's Privacy Policy web page: www.chelmsford.gov.uk/your-council/about-ourwebsite/privacy-policy-and-notices/privacy-policy/

Section 149 of the Equality Act 2010 requires the Council to avoid any form of discrimination and also foster good relations between different ethnic groups. We will not display, share or consider any comments that are inappropriate, including those that are racist, inflammatory or derogatory. Comments which contain personal or sensitive information e.g. health information, details about a criminal record, or religious beliefs, will not be accepted.

Petitions:

If you are organising a petition or intend to, or have signed one, it must be submitted by 4.00pm on 18 March 2025 and be accompanied by the name and contact details for the petition organiser. The Council will register the petition organiser on the Consultation Portal and the number of signatories will be assigned to that comment/s, but names and addresses of all signatories will not be published. Acknowledgement of the petition and any future Local Plan notifications will only be sent to the petition organiser.

Helpline:

If you require assistance please call 01245 606330 during normal office hours (08.45am to 4.45pm Monday to Thursday; 08.45am to 4.00pm Friday) or email planning.policy@chelmsford.gov.uk

Consultation on Chelmsford Local Plan - Pre-Submission (Regulation 19) Document

PAPER COMMENTS FORM

This form has three Parts:

- Part A - Consultation Details
- Part B - Contact Details
- Part C - Your Comments on the Chelmsford Local Plan - Pre-Submission (Regulation 19) Document

Part A - Consultation Details

Chelmsford City Council has published the Chelmsford Local Plan - Pre-Submission (Regulation 19) Document and accompanying Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment for consultation in accordance with the Town and Country Planning (Local Planning) (England) Regulations 2012.

How to comment

This form is for your comments on the Chelmsford Local Plan - Pre-Submission (Regulation 19) Document. There is a separate form for the Pre-Submission Integrated Impact Assessment.

The Council strongly encourages comments to be made via its online Consultation Portal www.chelmsford.gov.uk/planningpolicyconsult as this enables the quick and efficient handling of comments. This system allows you to edit comments before submitting them and to upload any supporting material.

For further information about how the Consultation Portal works, read our User Guide at: www.chelmsford.gov.uk/lp-portal-guide Alternatively, comments can be made using this representation form and returned to:

- By email - planning.policy@chelmsford.gov.uk
- By post - Planning and Housing Policy, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, CM1 1JE
- By hand - Chelmsford City Council Customer Service Centre, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, Monday to Friday 10am-4pm.

How comments will be used

To be duly made, you need to provide your name and address with your comment. Anonymous comments will not be accepted. At this stage of Local Plan preparation, comments should focus on legal compliance and the soundness of the Local Plan. This is the information required by the Planning Inspectorate who will independently examine the Local Plan and consider any unresolved objections.

Comments will be published with the respondent's name, organisation and agent (where applicable). No other personal details will be made public. Data will be held in accordance with the Data Protection Act 1998 and the General Data Protection Regulations. For more information please visit the Council's Privacy Policy web page: www.chelmsford.gov.uk/your-council/about-our-website/privacy-policy-and-notices/privacy-policy/

A copy of all duly made representations to the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document and Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment will be made available to the Planning Inspectorate and to the person appointed by the Secretary of State to conduct the examination (i.e. the Inspector). These representations will be 'made available' in line with the Regulations (The Town and Country Planning (Local Planning) (England) Regulations 2012 – Regulations 20, 22 and 35). This includes publication on the Council's Consultation Portal.

Section 149 of the Equality Act 2010 requires the Council to avoid any form of discrimination and also foster good relations between different ethnic groups. We will not display, share or consider any comments that are inappropriate, including those that are racist, inflammatory or derogatory. Comments which contain personal or sensitive information e.g. health information, details about a criminal record, or religious beliefs, will not be accepted and/or will be redacted.

Part C - Your Comments on the Chelmsford Local Plan - Pre-Submission (Regulation 19) Document

ESSENTIAL INFORMATION

Which part of the Chelmsford Local Plan - Pre-Submission (Regulation 19) Document does the representation relate to:

Paragraph Number:	
Policy Number:	
Policies Map Number or Name:	
Table Number:	
Figure Number:	
Appendix:	

Important Note:
If you wish to submit a representation on more than one part of the Local Plan, please complete a continuation sheet as provided for each one e.g. on more than one proposed site allocation, or policy.

To assist you in completing this form you may find it useful to refer to the Pre-Submission (Regulation 19) Statement of Representation Procedure and Statement on Availability of Proposed Submission Documents for Inspection (www.chelmsford.gov.uk/lp-sor).

Question 1:
Do you consider the Local Plan legally compliant in accordance with the Town and Country Planning (Local Planning) (England) Regulations 2012?
For the definition of 'legally compliant', please refer to the **Statement of Representation.**

Yes ☐ No ☐

Please provide an explanation below. Please provide precisely and succinctly all the evidence and supporting information necessary to support your representation:

If you need more room, please continue on a separate sheet and attach it to this form.

Comments must be received by 4.00pm on 18 March 2025

Question 1a:
Please set out below the modifications you consider necessary to make the Local Plan legally compliant including revised wording of any policy or text. Please provide precisely and succinctly all the evidence and supporting information necessary to support your representation:

If you need more room, please continue on a separate sheet and attach it to this form.

Question 2:
Does the Local Plan comply with the Duty to Co-operate?

For information on the term 'Duty to Co-operate', please refer to the **Statement of Representation.**

Yes ☐ No ☐

Please provide an explanation below:

If you need more room, please continue on a separate sheet and attach it to this form.

Question 2a:
Please set out below any changes to the approach taken which you consider necessary to ensure the Duty to Co-operate is met. Please include revised wording of any policy or text to the Local Plan. Please be as precise and succinct as possible:

If you need more room, please continue on a separate sheet and attach it to this form.

Comments must be received by 4.00pm on 18 March 2025

Question 3:
Do you consider the Local Plan to be 'sound'? To be found 'Sound' a Local Plan should be positively prepared, justified, effective and consistent with National Policy.
For more information on the term 'Soundness', please refer to the **Statement of Representation.**

Yes ☐ No ☐

If No, because you consider the Local Plan is NOT:

☐ Positively prepared
☐ Justified
☐ Effective
☐ Consistent with national policy

Question 3a:
Please provide an explanation below and identify the main issues:

If you need more room, please continue on a separate sheet and attach it to this form.

Question 3b:
Please set out below the changes you consider necessary to make the Local Plan 'sound' including revised wording of any policy or text. Please be as precise and succinct as possible:

If you need more room, please continue on a separate sheet and attach it to this form.

Comments must be received by 4.00pm on 18 March 2025

Question 4:
If your representation is seeking a change, do you consider it necessary to take part and speak at the Independent Examination hearing?
It is the Planning Inspector's decision who will participate and be heard at the Independent Examination.
In considering this, please note that written and oral representations carry the same weight and will be given equal consideration in the examination process.

Yes ☐ No ☐

Please note that while this will provide an initial indication of your wish to participate in hearing session(s), you may be asked at a later point to confirm your request to participate.

Question 4a:
If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:
Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you need more room, please continue on a separate sheet and attach it to this form.

Question 5: Executive Summary
If you are submitting a representation of significant length, please provide a summary of the main issues in your representation in no more than 200 words. We will request a summary in appropriate circumstances if it is not originally provided.

Please provide an executive summary of the main issues below:

If you need more room, please continue on a separate sheet and attach it to this form.

Comments must be received by 4.00pm on 18 March 2025

Question 6:
Do you wish to be notified of the following:
Please note if you **do not** select any boxes, you will not be notified at the following stages of Local Plan preparation.

- ☐ Submission of the Local Plan for Examination
- ☐ Publication of the Inspector's Report
- ☐ Adoption of the Local Plan

If you wish to submit any supporting information, please ensure it contains no signatures, e-mail addresses or personal postal addresses.

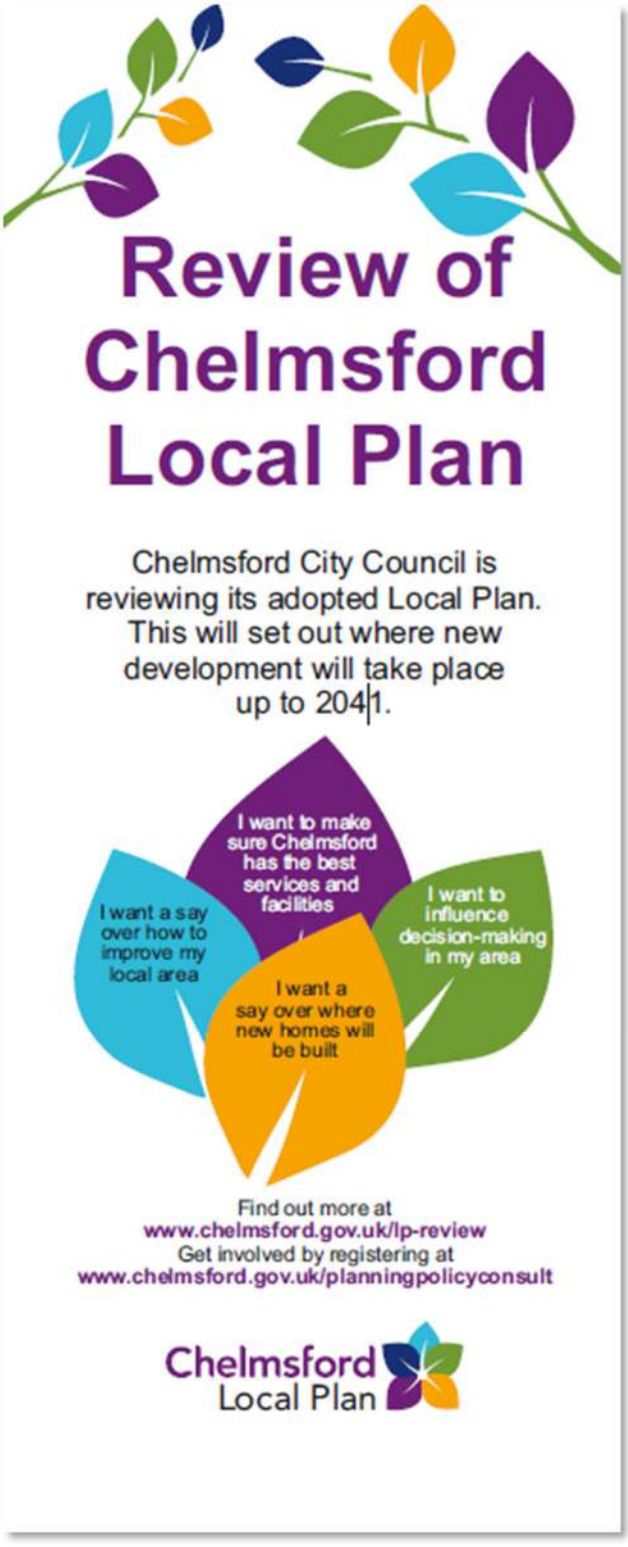
This paper comments form can be made available in alternative formats including large print, audio and other languages.

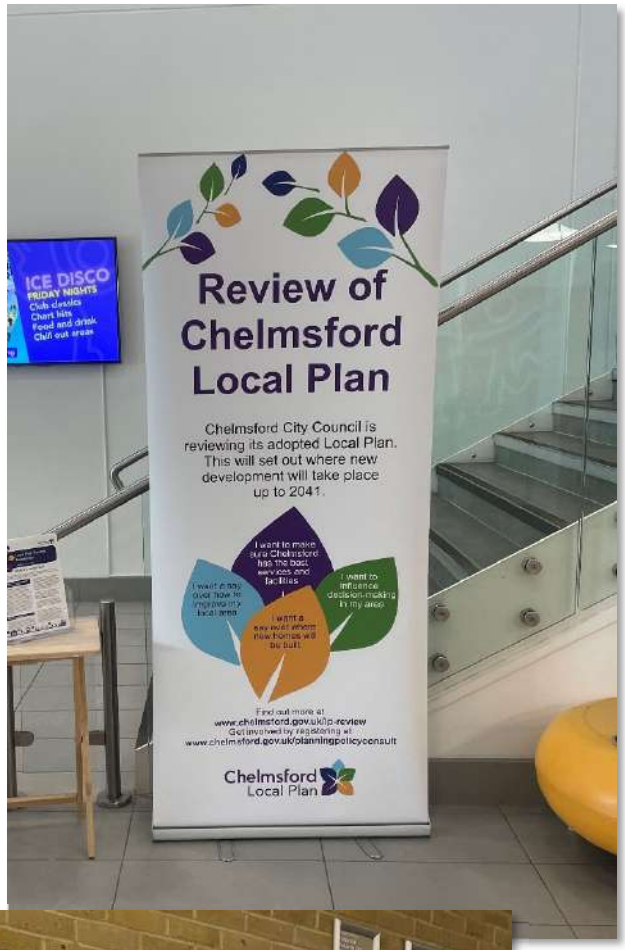
If you require assistance please call 01245 606330 during normal office hours (08.45am to 4.45pm Monday to Thursday; 08.45am to 4.00pm Friday) or email planning.policy@chelmsford.gov.uk

Thank you for being part of the consultation.

Pop-Up stands were located at four venues:

Chelmsford Museum
South Woodham Ferrers Leisure Centre
Riverside Ice & Leisure
Chelmsford Sport and Athletics Centre





Welcome

Thank you for visiting today

What is the Local Plan

Our Local Plan shapes future growth and development of Chelmsford City Council's area. It sets out a positive vision, identifies where and how new development should take place in the future as well as areas and land uses that will be protected.

Why are we reviewing the adopted Chelmsford Local Plan?

We adopted our current Local Plan in May 2020, and good progress is being made with implementing it.

We need to review the plan at least every five years to make sure it remains up to date and meets the changing needs for development growth to 2041.

This consultation is called the Pre-Submission (Regulation 19) Local Plan. It is the third and final stage of consultation towards updating the adopted Local Plan and has been prepared following public consultation in 2022 and 2024. It is your opportunity to feed into the review process and help to shape the plan and the future of your area.

Government requirements mean that we must provide more homes but our aim is to get the right type of development in the right places to meet the growing needs of local people and businesses, while protecting our environment.

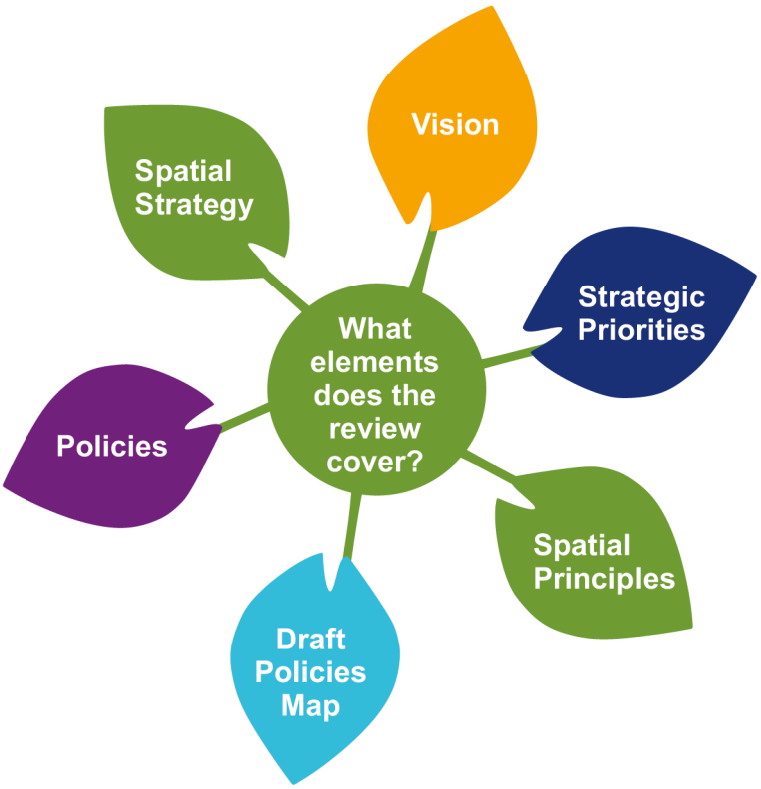
If the Local Plan becomes out of date, the Council could have very little influence over the location of new development and supporting infrastructure. Sites could be promoted for development in locations that the Council and its communities want to protect, and which are not considered sustainable.

What is included in the consultation?

We want to make sure we cover the right issues and that all the suitable options for accommodating change are considered. The Pre-Submission document is a full draft local plan, and includes the following key changes to the adopted Local Plan:

- Updated Strategic Priorities
- New Vision
- The amount of future development needed, including for homes and jobs
- Spatial Strategy, including new site allocations, for accommodating this future development to 2041 and beyond
- Reviewed planning policies.

Many parts of the adopted Local Plan and its policies are still up to date and generally performing well, so they require partial changes. Some changes and new policies are needed to reflect national planning policy requirements, the Council's ambitions and aspirations, and new development growth to 2041 and beyond.



Chelmsford Local Plan

Pre-Submission Local Plan – Background and Challenges

Chelmsford is already an attractive place, comprising the City of Chelmsford, the town of South Woodham Ferrers, numerous villages within attractive countryside and a rich and diverse natural and historic environment. The growth that has taken place, over past 25 years, has helped shape Chelmsford into the successful place it is now.

Vital new infrastructure has been delivered alongside new homes, jobs, shops and leisure opportunities. Chelmsford's economy shows strengths across many sectors, but especially finance, health and education.

Taking into account the projected population increase, we are determined to ensure that future growth continues to take place in a sustainable way. This will bring further improvements to the quality of life for residents and much needed new community and transport infrastructure whilst at the same time protecting and enhancing the natural and historic environment.

The Local Plan is forward looking, shaping the sustainable planning of Chelmsford's development and infrastructure needs not just in the foreseeable future but also providing a longer-term framework.

Previous consultation

We consulted on the first stage of reviewing the Local Plan, called the Issues and Options, from August to October 2022. A total of 1,178 responses were received from 711 people or organsiations, along with a petition. For the Preferred Options consultation from May to June 2024 a total of 10,418 responses were received from 3,678 people or organisations.

We have published feedback documents setting out a review of the consultation activity, a summary of the representations we received, and how these comments have been used to develop the Pre-Submission Local Plan document that we are consulting on now.

You can read the 'You said, We Did' feedback reports on our website at **www.chelmsford.gov.uk/lp-review.**

All the comments received can also be viewed on the Council's planning policy consultation portal at **www.chelmsford.gov.uk/planningpolicyconsult.**

Challenges

Population – is predicted to increase by 11.5% to 202,300 by 2041. Demographic changes will shape the type and size of accommodation necessary over the Local Plan period.

Economy – 12.5% growth in jobs is anticipated by 2041. Due to its location and high education standards, Chelmsford is expected to accommodate a major share of the forecast new employment growth. Significant additional land for employment is proposed through the Local Plan.

Transport – Chelmsford occupies a key place on the regional road and rail network. New development can generate additional service provision and transport investment, through direct provision of facilities and/or financial contributions from developers.

Environment – Chelmsford enjoys a high quality environment including recreational space, parks, gardens, nature reserves and the designated Green Wedge – and over 1,000 Listed Buildings. Development proposals need to balance the needs of development with the preservation and enhancement of natural and historic assets.

Housing – The Council has declared a housing crisis, with many individuals and families in temporary or unsuitable accommodation, an often expensive private rented sector, and an overall limited supply of affordable housing. The Local Plan can help to address this through housing allocations, setting an appropriate mix of homes, and working with housing partners.

Climate change – A climate and ecological emergency was declared in 2019 to tackle the consequences of climate change and reduce our impact on the planet. Closer to home, the Local Plan can set requirements for zero carbon development, boost active and sustainable travel, require expansion of natural habitats, and improve water efficiency and flood risk management.

Communities – health inequalities and wellbeing opportunities can be tackled through the Local Plan by providing the conditions for stronger and more-connected communities.

What has been considered

The Spatial Strategy, setting out where new development should be located, takes the following as a starting point:

Strategic Priorities + Vision + Spatial Principles + Settlement Hierarchy

Our Strategic Priorities

Our Strategic Priorities are the key priorities which set the overall policy direction for the Local Plan.

Priorities for climate	Priorities for growth	Priorities for place
1. Addressing the Climate and Ecological Emergency	4. Ensuring sustainable patterns of development and protecting the Green Belt	7. Creating well designed and attractive places, and promoting the health and social wellbeing of communities
2. Promoting smart, active travel and sustainable transport	5. Meeting the needs for new homes	8. Delivering new and improved strategic and local infrastructure
3. Protecting and enhancing the natural and historic environment, and support an increase in biodiversity and ecological networks	6. Fostering growth and investment and providing new jobs	9. Encouraging resilience in retail, leisure, commercial and cultural development

The updated Vision

Guiding Chelmsford's growth towards a greener, fairer and more connected community

The Local Plan Vision is a high-level guiding statement that sets out what is important for a place and how change will be managed in the future. It is a core part of a Local Plan and all the policies in the Plan will together deliver the Vision. We have reviewed the Local Plan Vision to reflect the new local priorities within the Council's Corporate Plan - Our Chelmsford, Our Plan. We have also considered other national and local priorities and Chelmsford's challenges and opportunities. It has also been simplified, shortened and purposefully aligned to the Corporate Plan, to make it easier to use.

Spatial Principles

The Spatial Principles will ensure that the Pre-Submission Local Plan focuses growth in the most sustainable locations.

a) Locate development at well-connected and sustainable locations
b) Protect the Green Belt from inappropriate development
c) Promote the use of suitable previously developed land for development
d) Continue the renewal and enhance the vitality of Chelmsford City Centre and its Urban Area
e) Focus development at the higher order settlements outside the Green Belt and respect the development pattern and hierarchy of other settlements
f) Respect the character and appearance of landscapes and the built environment, and preserve or enhance the historic and natural environment and biodiversity
g) Locate development to avoid or manage flood risk and reduce carbon emissions
h) Ensure development is served by necessary infrastructure and encourage innovation
i) Locate development to utilise existing and planned infrastructure effectively
j) Ensure development is deliverable.

Settlement Hierarchy

Another factor for developing the Pre-Submission Spatial Strategy and choosing areas for growth is the Settlement Hierarchy, which ranks towns and villages according to their size, function, characteristics and sustainability.

How much growth are we planning for?

Sites allocated in the adopted Local Plan are now coming forward through Masterplans and planning applications.

The next housing target to 2041 is set by a Government formula, called the standard method. The advanced stage of the Pre-Submission Local Plan means we only need to meet 80% of this target.

Housing requirement for Plan period	22,990 homes
Completions 2022-23	1,837
Adopted Local Plan allocations	11,867
Sites with planning permission	3,016
Windfall allowance (2026-2041)	2,373
New allocations needed	**4,233**

The Local Plan also plans to meet future employment needs by providing additional employment allocations.

Employment requirement for Plan period	162,646 sqm
Adopted Local Plan allocations	55,000 sqm

New housing development, in particular, will be required to provide supporting infrastructure, services and facilities including for:

- Transport improvements including the New Beaulieu Park Rail Station, Chelmsford North East Bypass, Army and Navy junction improvements, and sustainable travel routes
- Community buildings, schools, healthcare, wellbeing measures, sports and cultural facilities
- Green infrastructure including new Country Parks, open space, green/blue networks, biodiversity and public realm improvements
- Preservation and enhancement of historic assets
- Flood risk management and utility infrastructure

New development allocations will be focused on three growth areas of Central and Urban Chelmsford, North Chelmsford and South and East Chelmsford. This distribution of growth is shown on the Key Diagram.

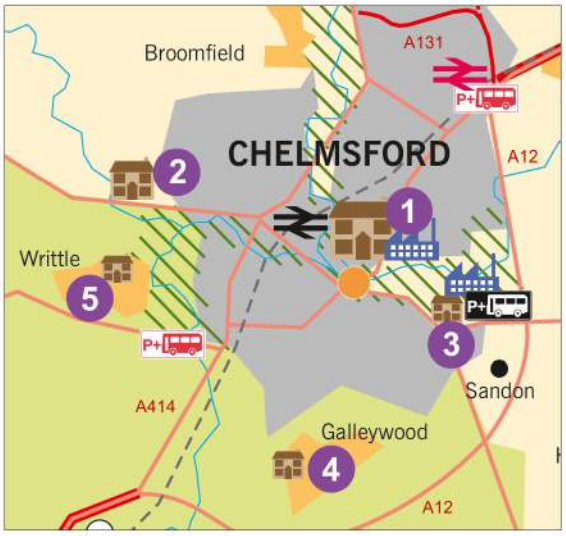
Discounted locations for development

Areas have been discounted as follows:

- The Green Belt, a national designation to prevent encroachment of urban growth into undeveloped areas. This covers almost 34% of the land in the south and west of Chelmsford, shaded in green on the Key Diagram
- The Green Wedge, a key local landscape designation of a green network which prevents urban sprawl and provides for wildlife and nature conservation, flood storage and active travel routes. This covers the river valleys where they pass into Chelmsford's urban area, shaded in hatched green on the Key Diagram
- Areas with known severe constraints/capacities including highways and education
- Areas where no land was being promoted through the Call for Sites exercise

Growth Area 1 – Central and Urban Chelmsford

Development in this area will deliver a number of benefits including green infrastructure and city greening, enhanced bus services, and opportunities to maximise walking and cycling into the City Centre. Previously developed land in the City Centre will be used to strengthen and expand the City as a major residential and employment centre.



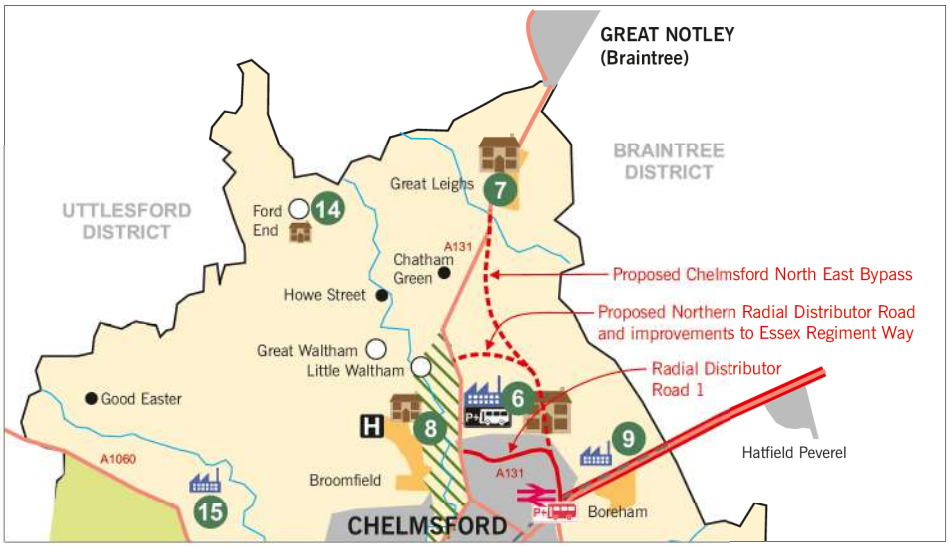
STRATEGIC EMPLOYMENT LOCATION
HOUSING: CENTRAL & URBAN CHELMSFORD
GREEN BELT
GREEN WEDGE
RURAL AREA
CITY/TOWN
KEY SERVICE SETTLEMENT
SMALL SETTLEMENT
BEAULIEU PARK RAIL STATION
RAIL STATION
RAILWAY LINE
AREA CONSIDERED FOR ADDITIONAL PARK AND RIDE FACILITIES
PARK AND RIDE
MAJOR ROADS
A12 IMPROVEMENTS
ARMY AND NAVY JUNCTION IMPROVEMENTS
RIVER

Growth Area 1 – Central and Urban Chelmsford			
Development Allocations		Total Homes	Employment Floorspace
1	Previously developed sites in Chelmsford Urban Area	3,013	4,000sqm Use Class E(g)(i-ii)
2	West Chelmsford	880 plus 5 Travelling Showpeople Plots	
3a	East of Chelmsford - Manor Farm	360	
3b	East of Chelmsford - Land North of Maldon Road		5,000sqm Office/Business Park
3c	East of Chelmsford - Land South of Maldon Road	109	
3d	East of Chelmsford - Land North of Maldon Road	65	
4	Land North of Galleywood Reservoir	24	
5	Land surrounding Telephone Exchange, Ongar Road, Writtle	25	
Area Total		**4,476**	**9,000sqm**

New supporting infrastructure in Growth Area 1
Primary school
Four early years and childcare nurseries
Two new special schools
Country park
Access to Sandford Mill and a visitor centre
Financial contributions to provision of education, community facilities, healthcare, sports and recreation facilities, sustainable transport, local mobility hub and road network enhancements

Growth Area 2 – North Chelmsford

Development in this area will deliver a substantial number of new homes and employment over the Local Plan period, underpinned by a comprehensive package of new infrastructure including new schools, early years and childcare provision, green infrastructure and neighbourhood centres. Significant growth is proposed to Chelmsford Garden Community, along with extensions to two employment sites, and small village allocations.



- STRATEGIC EMPLOYMENT LOCATION
- HOUSING: NORTH CHELMSFORD
- GREEN BELT
- GREEN WEDGE
- RURAL AREA
- CITY/TOWN
- KEY SERVICE SETTLEMENT
- SERVICE SETTLEMENT
- BEAULIEU PARK RAIL STATION
- SMALL SETTLEMENT
- AREA CONSIDERED FOR ADDITIONAL PARK AND RIDE FACILITIES
- PARK AND RIDE
- PROPOSED STRATEGIC NEW ROAD
- MAJOR ROADS

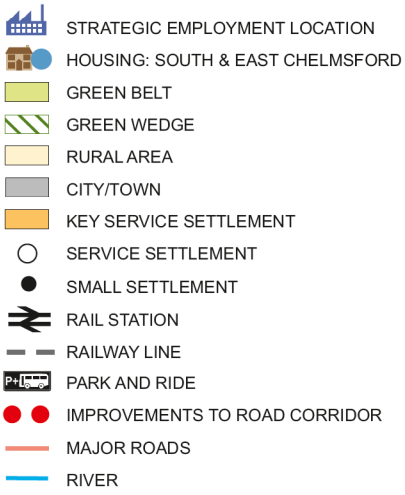
- BROOMFIELD HOSPITAL
- RIVER

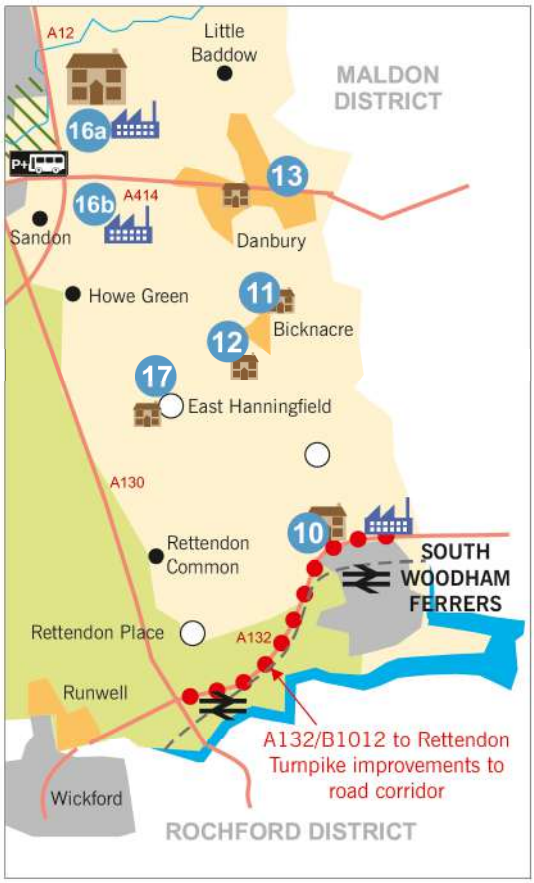
Growth Area 2 – North Chelmsford			
Development Allocations		Total Homes	New Employment Floorspace
6	North East Chelmsford (Chelmsford Garden Community)	5,569 (plus 681 homes post 2041), plus10 Traveller Pitches	56,946sqm Office/Business Park
7a	Great Leighs - Land at Moulsham Hall	750, plus 5 Travelling Showpeople Plots	
7b	Great Leighs - Land East of London Road	250	
7c	Great Leighs - Land North and South of Banters Lane	100	
8	North of Broomfield	512	
9a	Waltham Road Employment Area		3,500sqm B2/B8
14b	Land south of Ford End Primary School, Ford End	20	
15	Little Boyton Hall Farm Rural Employment Area		6,000sqm B2/B8
Area Total		**7,201**	**66,446sqm**

New supporting infrastructure in Growth Area 2
Transport including Phase 1 of Chelmsford North East Bypass, Northern Radial Distributor Road, bus infrastructure
Six village/neighbourhood centres
Secondary school
Five primary schools
Ten early years and childcare nurseries
Country park
Financial contributions to Beaulieu Park Railway Station, provision of education and community facilities, healthcare, sports and recreation facilities, sustainable transport and road network enhancements

Growth Area 3 – South and East Chelmsford

Proposals include a high quality and comprehensively planned new Garden Community to the East of Chelmsford at Hammonds Farm, with a wide range of supporting uses. Also proposed is a strategic employment site, along with four smaller village allocations to contribute towards supporting existing village facilities and services.





Growth Area 3 – South and East Chelmsford		
Development Allocations	Total Homes	New Employment Floorspace
16a East Chelmsford Garden Community (Hammonds Farm)	3,000 (plus 1,500 homes post 2041), plus 20 Traveller Pitches and 13 Travelling Showpeople Plots	43,000sqm Business Space
16b Land adjacent to A12 Junction 18		43,000sqm Business Space
10 North of South Woodham Ferrers	1,220, plus 5 Travelling Showpeople Plots	1,200sqm Business Space
11b Land at Kingsgate, Bicknacre	20	
11c Land west of Barbrook Way, Bicknacre	20	
12 St Giles, Bicknacre	32	
13 Danbury	100	
17a Land north of Abbey Fields, East Hanningfield	11	
17b Land east of Highfields Mead, East Hanningfield	20	
Area Total	**4,423**	**87,200sqm**

New supporting infrastructure in Growth Area 3
Secondary school, up to four primary schools and eight early years and childcare nurseries
Neighbourhood centres
Transport including Bus Based Rapid Transit infrastructure, safe multi-user access routes, and capacity improvements to A132
Country park
Financial contributions to provision of education and community facilities, healthcare, sports and recreation facilities, sustainable transport and road network enhancements

New Sites in Chelmsford City Centre and Urban Area

We are allocating some additional sites in Chelmsford City Centre.

Using previously developed – or brownfield – land will help to strengthen the City as a major residential centre to build on its past success and continue its regeneration. It will also reduce the amount of greenfield land we need to allocate.

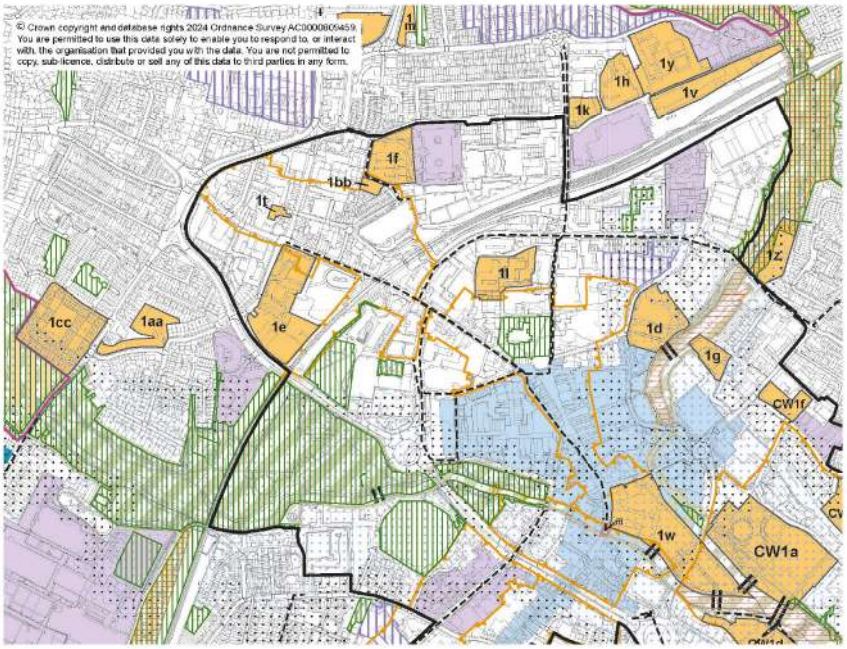
New proposed site allocations will contribute to providing around 3,013 new homes including affordable homes.

Site	Proposal	Supporting Infrastructure
1w Meadows Shopping Centre and Meadows Surface Car Park	Around 757 homes	Enhanced pedestrian and cycle routes Local mobility hub Improved access to waterways On-site open space
1y Land between Hoffmans Way and Brook Street	Around 100 homes	Play area with equipment Pedestrian and cycle connections Preserve nearby listed buildings Public realm improvements
1z Granary Car Park, Victoria Road	Around 50 homes	Links to pedestrian/cycle network Preserve nearby listed buildings Retain natural landscaping and setting Make good use of the waterside location
1aa Coval Lane Car Park	Around 40 homes	Retain natural landscaping Provide sustainable drainage and flood risk management
1bb Glebe Road Car Park	12 homes	Conserve the setting of nearby listed buildings
1cc Andrews Place	183 net new homes	Conserve and enhance biodiversity at Admirals Park Provide connectivity to surrounding travel networks Maintain access to the nearby allotments

There are 20 allocated sites in the City Centre being brought forward from the adopted Local Plan, including some where numbers have been slightly increased.

Sites in the Urban Area will also be brought forward, as they have already been allocated in the adopted Local Plan. These are at:

- West Chelmsford
- East of Chelmsford
- Galleywood
- Writtle



New Proposed Garden Community

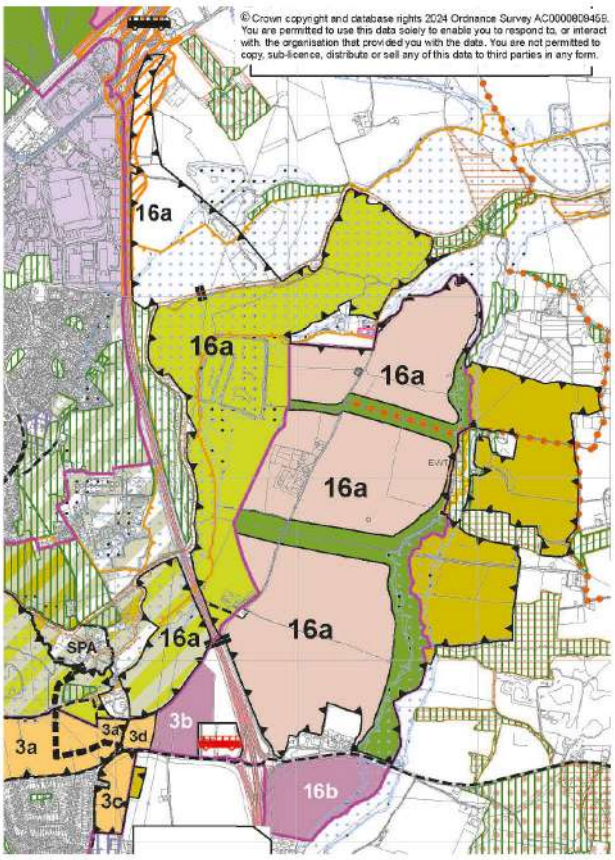
16a – East Chelmsford Garden Community (Hammonds Farm)

We are allocating land for a new East Chelmsford Garden Community. This is centred on Hammonds Farm, to the east of the A12 and north of the A414 Maldon Road.

New homes including affordable	3,000 (plus 1,500 homes post 2041), 20 Traveller Pitches and 13 Travelling Showpeople plots
New employment floorspace	43,000sqm
Supporting infrastructure	Country Park and significant new multi-functional green infrastructure and landscape
	Mixed use centres for food and other shopping, community uses, healthcare provision
	All through school, potential sixth form centre, three primary schools, six early years and childcare nurseries
	New access junction from A414 (shared with 16b); pedestrian and cycle connections; mobility hubs and bus transport; safe pedestrian/cycle access routes under and over the A12, including to Park and Ride site and Beaulieu Park Rail Station
Historic and natural environment	Preserve the Conservation Areas and listed buildings Protect and retain the protected lanes and reinstate historic landscape features
	Conserve Local Wildlife Sites, Nature Reserves, ancient woodlands and SSSI
	Provide sustainable drainage and flood risk management
	Provide a minimum of 20% biodiversity net gain

High quality garden community development will be provided through Garden City Principles. These include:

- community and stakeholder involvement in design and delivery with long-term governance and stewardship arrangements
- meeting the housing needs of all local people
- providing integrated and sustainable transport systems



16b – Land adjacent to A12 Junction 18 – Employment Area

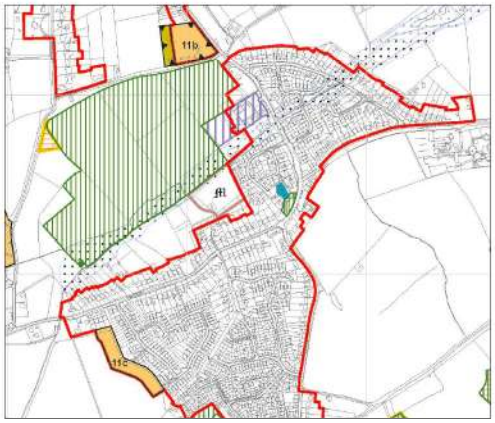
We are allocating a separate area of land for new employment uses adjacent to Junction 8 of the A12, south of the A414.

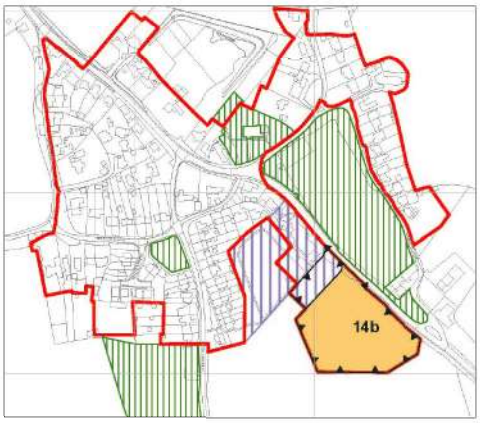
New employment floorspace	43,000sqm for mixed employment types
Supporting infrastructure	New access junction from A414 (shared with 16a) plus multi-user crossings
	Safe pedestrian/cycle access connections including to Park and Ride site, Hammonds Farm, bus stops and Danbury
Historic and natural environment	Preserve Danbury Conservation Area
	Retain boundary trees, plant new trees and extensive landscape buffers

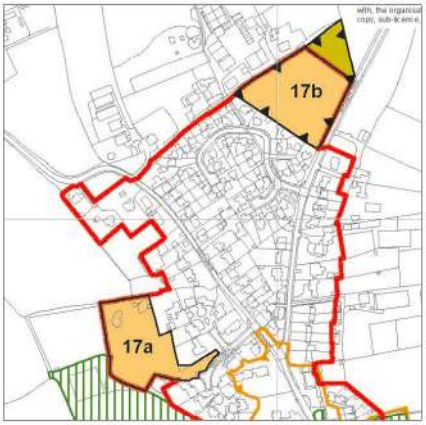
Proposals for Villages

Limited development is proposed in some villages including Bicknacre, Ford End, East Hanningfield, Boreham and Boyton Cross.

We aim to address the Government's requirement to allocate some smaller sites which can be built earlier in the Local Plan period and give smaller development companies the opportunity to build locally. Bicknacre, Ford End and East Hanningfield have primary schools and community facilities, making them suitable for small scale development, which will include affordable homes.

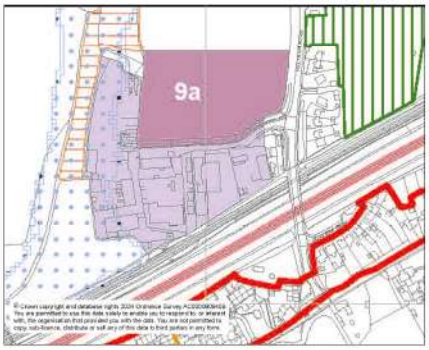


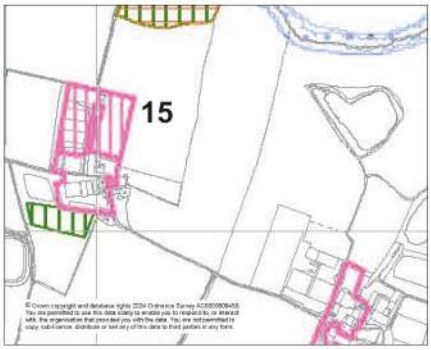




Village	Site	Proposal
Bicknacre	11b Land at Kingsgate, Bicknacre Road	Around 20 homes
	11c Land West of Barbrook Way	Around 20 homes
Ford End	14b Land South of Ford End Primary School	Around 20 homes
East Hanningfield	17a Land North of Abbey Fields	Around 11 homes
	17b Land East of Highfields Mead	Around 20 homes

We also propose to expand two employment sites at Little Boyton Hall Farm, Boyton Cross and Waltham Road, Boreham. Expansion of these well-established employment sites will provide rural employment opportunities and support the sustainable growth and expansion of business in rural areas.





Site	Proposal
9a Waltham Road Employment Area, Boreham	3,500sqm B2/B8 use (general industrial, and storage and distribution)
15 Little Boyton Hall Farm Rural Employment Area, Boyton Cross	6,000sqm B2/B8 use (general industrial, and storage and distribution)

Changes and other consultations

The Pre-Submission Local Plan includes changes made following the Preferred Options consultation in 2024, as summarised below:

- Minor changes to the supporting text for Strategic Priorities, Vision and Spatial Principles
- Changes to strategic policies S4, S9, S6 and S7
- Deletion of Kay Metzeler site, Brook Street (Site 1x) which is longer available for housing development; and Land west of 20 Back Lane, Ford End (Site 14a) as it is no longer considered suitable
- Allocation of a new housing site at Andrews Place, West of Rainsford Lane (Site 1cc)
- Increased capacity of the Meadows Shopping Centre allocation (Site 1w)
- Limited changes to development management policies, the Draft Policies Map and glossary.

The Pre-Submission Local Plan has also been updated to:

- Provide greater clarification and consistency
- Respond to discussions with Duty to Co-operate bodies and infrastructure providers
- Reflect new evidence studies including an updated Infrastructure Delivery Plan, Strategic Housing Needs Assessment, Archaeology Assessment, Open Space Study and Local Wildlife Sites Review, along with housing data and planning permissions
- Reference the housing numbers and transitional arrangements for the progression of Local Plans at an advanced stage of preparation.

Other consultations: Integrated Impact Assessment (IIA)

The Local Plan is subject to an ongoing process of assessing its proposals against a sustainability framework. This covers the potential environmental, social, economic and health performance of the Pre-Submission Local Plan and any reasonable alternative approaches.

Other consultations: Co-Living Housing Planning Advice Note

This provides new practical guidance to potential promoters or developers of co-living housing in Chelmsford, to ensure they meet the Council's expectations.

Other consultations: Consultation Draft Planning Obligations Supplementary Planning Document

This sets out how the Council will seek planning obligations when considering planning applications, including updates to the 2021 published version.

Thursday 27 February	Council Chamber, Civic Centre	6pm – 8pm
Friday 28 February	Council Chamber, Civic Centre	2pm – 4pm
Saturday 1 March	Council Chamber, Civic Centre	10am – 12noon
Monday 24 February to Sunday 2 March	High Chelmer Shopping Centre (unstaffed)	7am – 6.30pm
Thursday 13 February to Tuesday 25 February	South Woodham Town Council, Champions Manor Hall, Hullbridge Road, SWF (unstaffed)	9am – 4pm

How to comment

This consultation is a bit different to the previous stages. The Government asks you to consider whether the Pre-Submission Local Plan is legally compliant and consistent with national policy, known as the 'Tests of Soundness'. There are specific consultation questions based on a suggested model representation form by the Planning Inspector.

The consultation on the Pre-Submission documents runs for 6 weeks from 10am on Tuesday 4 February 2025 to 4pm on Tuesday 18 March 2025. Comments made before or after these dates cannot be considered.

You can respond:

- Via the Council's consultation portal at **www.chelmsford.gov.uk/planningpolicyconsult.** This is our preferred way to receive comments
- By email or post using a Pre-Submission Representation Form submitted to **planning.policy@chelmsford.gov.uk.** or by post to Spatial Planning Services, Chelmsford City Council, Duke Street, Chelmsford, CM1 1JE

Representation forms are available online at **www.chelmsford.gov.uk/lp-review** or on request.

Next Steps
All responses will be submitted to the Planning Inspector, alongside the Pre-Submission Local Plan and evidence base. The Council will produce a summary of the main issues raised in the consultation responses for the Inspector and publish this online.

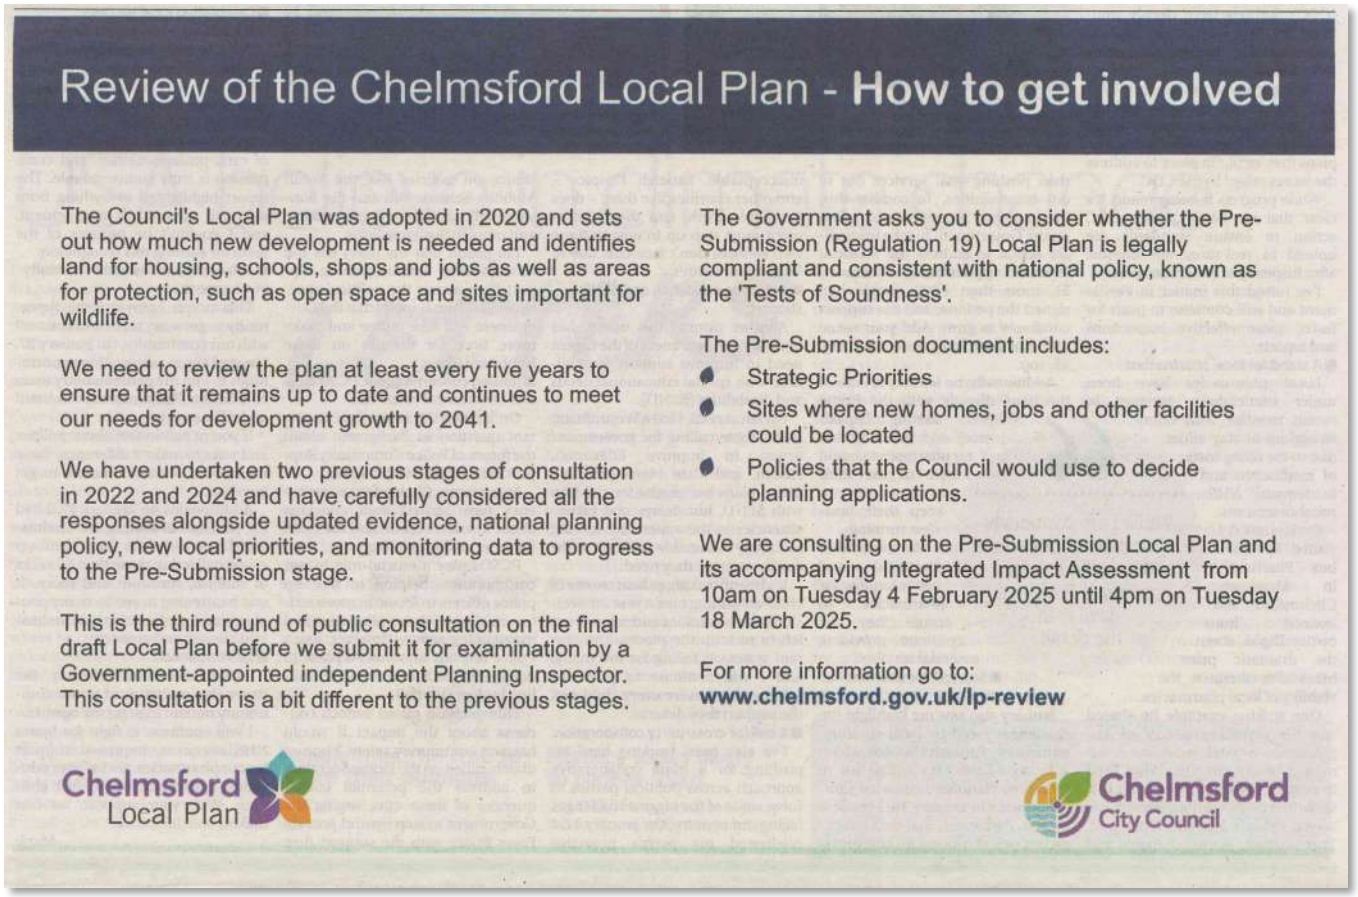
Essex Chronicle Advert 06/02/2025



Review of the Chelmsford Local Plan - **How to get involved**

The Council's Local Plan was adopted in 2020 and sets out how much new development is needed and identifies land for housing, schools, shops and jobs as well as areas for protection, such as open space and sites important for wildlife.

We need to review the plan at least every five years to ensure that it remains up to date and continues to meet our needs for development growth to 2041.

We have undertaken two previous stages of consultation in 2022 and 2024 and have carefully considered all the responses alongside updated evidence, national planning policy, new local priorities, and monitoring data to progress to the Pre-Submission stage.

This is the third round of public consultation on the final draft Local Plan before we submit it for examination by a Government-appointed independent Planning Inspector. This consultation is a bit different to the previous stages.

The Government asks you to consider whether the Pre-Submission (Regulation 19) Local Plan is legally compliant and consistent with national policy, known as the 'Tests of Soundness'.

The Pre-Submission document includes:

- Strategic Priorities
- Sites where new homes, jobs and other facilities could be located
- Policies that the Council would use to decide planning applications.

We are consulting on the Pre-Submission Local Plan and its accompanying Integrated Impact Assessment from 10am on Tuesday 4 February 2025 until 4pm on Tuesday 18 March 2025.

Chelmsford Local Plan

Chelmsford City Council

Posters were sent to nearly 140 locations in including libraries, local shops, medical centres, and churches

Civic Centre Duke Street
Chelmsford Essex CM1 1JE

Telephone: 01245 606330
Date: 4 February 2025

Dear Sir/Madam,

Poster to promote public consultation on the review of the Chelmsford Local Plan

Chelmsford City Council is reviewing its adopted Local Plan. The Local Plan shapes future growth and development across Chelmsford City Council's area. It sets out a positive vision, identifies where and how new development should take place in the future as well as areas for protection. We adopted our current Local Plan in May 2020. We need to review the plan at least every five years to make sure it remains up to date and meets the changing needs for development growth to 2041.

The next stage in the Review of the Chelmsford Local Plan is to consult on the Pre-Submission (Regulation 19) Local Plan. The consultation is open for your comments from **10am on Tuesday 4 February 2025 to 4pm on Tuesday 18 March 2025.**

An A3 poster which promotes the consultation is enclosed. We would be grateful if this could be displayed in a public place until 18 March 2025.

If you have any queries or would like more information on the review of the Local Plan, please visit www.chelmsford.gov.uk/lp-review, email planning.policy@chelmsford.gov.uk or telephone (01245) 606330.

Yours faithfully,

Jeremy Potter

Spatial Planning Services Manager

Review of Chelmsford Local Plan – **How to get involved**

The Council's Local Plan was adopted in 2020 and sets out how much new development is needed and identifies land for housing, schools, shops and jobs as well as areas for protection, such as open space and sites important for wildlife.

We need to review the plan at least every five years to ensure that it remains up to date and continues to meet our needs for development growth to 2041.

We have undertaken two previous stages of consultation in 2022 and 2024 and have carefully considered all the responses alongside updated evidence, national planning policy, new local priorities, and monitoring data to progress to the Pre-Submission stage.

This is the third round of public consultation on the final draft Local Plan before we submit it for examination by a Government-appointed independent Planning Inspector. This consultation is a bit different to the previous stages. The Government asks you to consider whether the Pre-Submission (Regulation 19) Local Plan is legally compliant and consistent with national policy, known as the 'Tests of Soundness'.

The Pre-Submission document includes:

- Strategic Priorities
- Sites where new homes, jobs and other facilities could be located
- Policies that the council would use to decide planning applications.

We are consulting on the Pre-Submission Local Plan and its accompanying Integrated Impact Assessment from 10am on Tuesday 4 February 2025 until 4pm on Tuesday 18 March 2025.

Read and comment on the documents at **www.chelmsford.gov.uk/planningpolicyconsult.**

They will also be available to read during normal opening hours at the Council's Customer Service Centre in Chelmsford.

We will also be holding in-person exhibitions at the Civic Centre. These exhibitions will provide an opportunity for you to find out more and discuss the consultation with a Planning Officer.

Chelmsford Local Plan

Local Plan Review Newsletter

NUMBER 3 February 2025

What is a Local Plan?

Chelmsford's Local Plan shapes future growth and development in the City Council's area. It sets out a positive vision, identifies where and how new development should take place in the future as well as areas and land uses that will be protected.

Why are we reviewing the adopted Chelmsford Local Plan?

We adopted our current Local Plan in May 2020 and good progress is being made with implementing it. Government requirements mean we must provide more homes, so we need to review the plan at least every five years to ensure that it remains up to date and continues to meet our needs for development growth to 2041. If the Local Plan becomes out of date, the Council could have very little influence over the location of new development and supporting infrastructure such as employment opportunities, new schools, healthcare provision and upgraded transport infrastructure. Our aim is to get the right type of development in the right places to meet the growing needs of local people and businesses while protecting our environment.

What stage is the review at?

This is the third, and final round of public consultation on the final draft Local Plan before we submit it for examination by a Government-appointed independent Planning Inspector. This is called the Pre-Submission stage. Many people and organisations commented on the Issues and Options consultation in 2022 and the Preferred Options consultation in 2024. All the comments to the previous consultations have been carefully considered and used to progress the Local Plan alongside updated evidence base, national planning policy, new local priorities, and monitoring data.

In response to the consultation we have made a number of changes. 'You Said We Did' feedback reports and the evidence base of technical studies can be read on our website: **www.chelmsford.gov.uk/lp-review**

The Pre-Submission document sets out the Council's final policies including site specific land allocations for new housing, employment and other uses, as well as areas and places for protection.

This consultation is a bit different to the previous stages. The Government asks you to consider whether the Pre-Submission document is legally compliant and consistent with national policy, known as the 'Tests of Soundness'. There are specific consultation questions based on a suggested model representation form by the Planning Inspector.

New Development: Where and how much?

The Pre-Submission Local Plan follows the approach in the adopted Local Plan and previous Preferred Options Consultation Document by continuing to focus new housing and employment growth to the most sustainable locations in three Growth Areas. Site allocations in the adopted plan which are not yet built are carried forward in the Pre-Submission plan.

Many of these sites are now coming forward, with masterplans being approved and planning applications decided or in progress and some sites have started building.

To meet additional growth needs to 2041 it is estimated that we need to allocate new sites for around 4,233 new homes, and around 162,646 sqm of new employment floorspace. This is in addition to the new homes in the adopted Local Plan. To accommodate this, we have reviewed the Spatial Strategy and are allocating new development sites and expanding some existing allocations. The Spatial Strategy (Policy S7) shown in the Pre-Submission Local Plan has been informed by the outcomes of the previous consultations and further evidence. **We are not considering growth in the Green Belt.**

Central and Urban Chelmsford

Continued focus on strengthening the city as a centre for housing, employment and retail. Two existing allocations carried forward to the West and East of Chelmsford maximise cycling and walking opportunities into the City Centre.

1 Previously developed sites in Chelmsford Urban Area
- 3,013 homes (of which around 1,140 are on new allocations such as Meadows Shopping Centre and Car Park, Chelmer Waterside and Andrews Place)
- 4,000sqm employment/business space

2 West Chelmsford
- 880 homes
- 5 Travelling Showpeople Plots
- Primary school and nursery
- Neighbourhood Centre

3a-3d East of Chelmsford
- 3a Manor Farm: 360 homes
- 3b Land North of Maldon Road: 5,000sqm Office/Business Park
- 3c Land South of Maldon Road: 109 homes
- 3d Land North of Maldon Road: 65 homes
- Country Park
- New pedestrian and cycle bridge to Sandford Mill

4 Land North of Galleywood Reservoir
- 24 homes

5 Land surrounding Telephone Exchange, Ongar Road, Writtle
- 25 homes

North Chelmsford

North Chelmsford (Chelmsford Garden Community) will continue as a key area for new neighbourhoods and employment opportunities. New smaller allocation at Ford End and extension to two existing employment areas. Existing allocations carried forward at Great Leighs and Broomfield.

6 North East Chelmsford (Chelmsford Garden Community)
- 5,569 homes (plus 680 homes post 2041)
- 10 Gypsy and Traveller Pitches
- 56,946sqm Office/Business Park
- Country Park
- Chelmsford North East Bypass
- 4 Neighbourhood Centres
- 1 all-through school
- 3 primary schools with 4 nurseries

7a-7c Great Leighs
- 7a Land at Moulsham Hall: 750 homes and 5 Travelling Showpeople Plots
- 7b Land East of London Road: 250 homes
- 7c Land North and South of Banters Lane: 100 homes
- Neighbourhood Centre
- Primary school with nursery

8 North of Broomfield
- 512 homes
- Neighbourhood Centre
- Nursery

9a Waltham Road Employment Area
- 3,500sqm B2/B8 Use

14b Ford End
- 14b Land South of Ford End Primary School: 20 homes

15 Little Boyton Hall Farm Rural Employment Area
- 6,000sqm employment/business space

South and East Chelmsford

Proposals include a new garden community at East Chelmsford (Hammonds Farm), and a strategic employment site. New smaller allocations in Bicknacre and East Hanningfield. Existing allocations carried forward at South Woodham Ferrers, Bicknacre and Danbury.

10 North of South Woodham Ferrers
- 1,220 homes
- 5 Travelling Showpeople Plots
- 1,200sqm Business Space
- Neighbourhood Centre
- 2 nurseries and potential primary school

11b & 11c Bicknacre
- 11b Land at Kingsgate: 20 homes
- 11c Land West of Barbrook Way: 20 homes

12 St Giles, Bicknacre
- 32 homes

13 Danbury
- 100 homes

16a East Chelmsford Garden Community (Hammonds Farm)
- 3,000 homes to 2041 (plus 1,500 homes post 2041)
- 20 Gypsy and Traveller Pitches
- 13 Travelling Showpeople Plots
- 43,000sqm Business Space
- Country Park
- Neighbourhood Centres
- 1 co-located primary and secondary school
- 2 primary schools and nursery
- 3 nurseries

16b Land adjacent to A12 Junction 18
- 43,000sqm Business Space

17a & 17b East Hanningfield
- 17a Land North of Abbey Fields: 11 homes

17b Land East of Highfield Mead: 20 homes

Highlighted text: New development allocations in the Pre-Submission Local Plan.

Local Plan policies

We have included new and updated policies in the Pre-Submission Local Plan. Topics include housing, economy, environment, health and wellbeing, travel and transport, heritage, and design. We have not fundamentally changed the general approach in the adopted Local Plan, but have used updated information, previous consultation responses and addressed some of our major challenges including acting on the climate emergency, responding to the housing crisis and strengthening community ties.

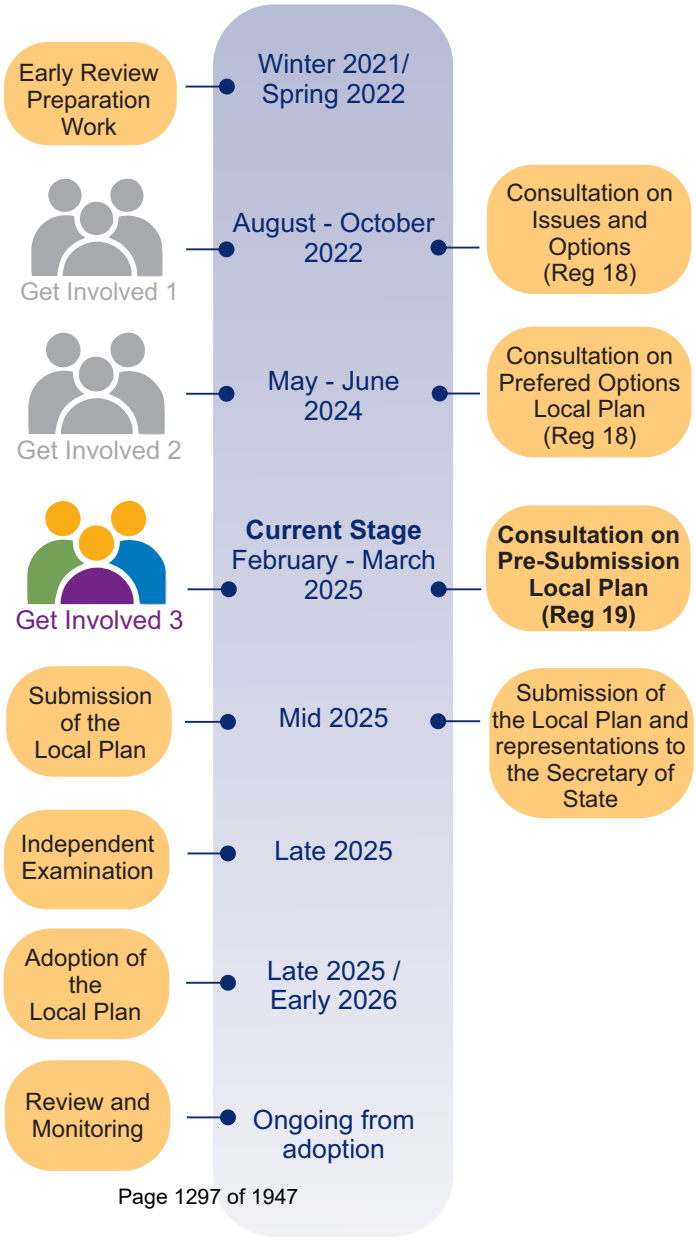
What is the Integrated Impact Assessment (IIA)?

The IIA identifies the key sustainability issues for the Review of the Local Plan. These feed into a framework against which the proposals have been assessed. It covers the potential environmental, social, economic and health performance of the Local Plan and any reasonable alternatives. The IIA includes:

- Sustainability Appraisal (SA)
- Strategic Environmental Assessment (SEA)
- Habitats Regulations Assessment (HRA)
- Health Impact Assessment (HIA)
- Equality Impact Assessment (EqIA)

We will be consulting on the IIA as part of the Pre-Submission consultation.

What is the Local Plan timetable?



Where can I view the consultation documents?

The consultation documents will be available to view and comment on the Council's planning policy consultation portal **www.chelmsford.gov.uk/planningpolicyconsult.**

We will also be holding in-person exhibitions in the Council Chamber at the Civic Centre, Duke Street. These exhibitions will provide an opportunity for you to find out more and discuss the consultation with a Planning Officer. The exhibitions will be on:

- Thursday 27th February 6pm- 8pm
- Friday 28th February 2pm - 4pm
- Saturday 1st March 10am-12noon

Consultation dates and how do I respond?

The consultation on the Pre-Submission documents runs for 6 weeks from 10am on Tuesday 4 February 2025 to 4pm on Tuesday 18 March 2025. Comments made before or after these dates cannot be considered.

You can respond:

- Via the Council's consultation portal at **www.chelmsford.gov.uk/planningpolicyconsult.** This is our preferred way to receive comments
- By email or post using a Pre-Submission Representation Form submitted to **planning.policy@chelmsford.gov.uk.** or by post to Spatial Planning Services, Chelmsford City Council, Duke Street, Chelmsford, CM1 1JE

Representation forms are available online at **www.chelmsford.gov.uk/lp-review** or on request.

Full details on how to make your comments are available online at **www.chelmsford.gov.uk/lp-review.**

Comments to the 2022 and 2024 consultations are not sent to the Planning Inspector so you will need to make a new representation if you still have relevant comments to make.

Next Steps
All responses will be submitted to the Planning Inspector, alongside the Pre-Submission Local Plan and evidence base. The Council will produce a summary of the main issues raised in the consultation responses for the Inspector and publish this online.

Chelmsford City Council

Chelmsford Local Plan Pre-Submission (Regulation 19) Document Parish/Town Council Information Pack
Planning Policy, February 2025

Part A - General information that is relevant to all Parish / Town Councils

Review of Chelmsford's Local Plan

The Council's Local Plan was adopted in 2020 and it guides growth and development across Chelmsford City Council's area to 2036.

We need to review the plan at least every five years to ensure that it remains up to date and continues to meet our needs for development growth to 2041. This includes new homes, employment opportunities and facilities for local people such as new schools, healthcare provision and upgraded transport infrastructure.

We are currently at the Pre-Submission stage in the plan review process. Many people and organisations commented on the first Issues and Options stage consultation in 2022 and the second Preferred Options consultation in 2024. All the responses have been carefully considered and used to progress to the Pre-Submission (Regulation 19) Local Plan stage alongside an updated plan evidence base, national planning policy, local City Council priorities and monitoring data.

The consultation on the Pre-Submission documents runs for a period of six weeks from 10am on Tuesday 4 February 2025 to 4pm on Tuesday 18 March 2025. Communities can find out more at www.chelmsford.gov.uk/lp-review. This consultation is the last of three formal stages in the preparation of the review of the adopted Chelmsford Local Plan. We are consulting on the:

- Chelmsford Local Plan – Pre-Submission (Regulation 19) Document, and
- Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment.

In addition, the Council is also consulting on the:

- Co-Living Housing Planning Advice Note, and
- Consultation Draft Planning Obligations Supplementary Planning Document (SPD).

Chelmsford Local Plan – Pre-Submission (Regulation 19) Document

The Chelmsford Local Plan – Pre-Submission (Regulation 19) Document is a full draft local plan. It includes updated and new Strategic Priorities, updated and new site allocations for new homes and employment, and policies that will be used to decide planning applications. The aim is to get the right type of development in the right places to meet the growing needs of local people and businesses, whilst protecting our environment.

The Chelmsford Local Plan – Pre-Submission (Regulation 19) Document follows the approach in the adopted Local Plan by continuing to focus new housing and employment growth to the most sustainable locations in three Growth Areas. The existing site allocations in the adopted plan which are not yet built are carried forward. Many of these sites are now coming forward, with masterplans being approved and planning applications decided or in progress. Some sites are being developed now.

This consultation is a different to the previous stages. The Government asks you to consider whether the Pre-Submission Local Plan is legally compliant and consistent with national policy, known as the 'Tests of Soundness'. There are specific consultation questions based on a suggested model representation form by the Planning Inspector.

Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment

The adopted Local Plan was developed alongside a comprehensive Sustainability Appraisal (SA) and Habitats Regulations Appraisal (HRA) process. For this review process other aspects of sustainable development are being considered in an Integrated Impact Assessment (IIA).

The Review of the Adopted Chelmsford Local Plan: Pre-Submission IIA assesses the Pre-Submission (Regulation 19) Local Plan against a range of social, environmental, health and economic indicators and helps to identify all the likely significant effects. It advises on ways in which any adverse effects could be avoided, reduced or mitigated or how any positive effects could be maximised. This helps to ensure that the policies in the Pre-Submission (Regulation 19) Local Plan are promoting sustainable development.

Other consultations: Co-Living Housing Planning Advice Note

This provides new practical guidance to potential promoters or developers of co-living housing in Chelmsford, to ensure they meet the Council's expectations.

Other consultations: Consultation Draft Planning Obligations Supplementary Planning Document (SPD)

This sets out how the Council will seek planning obligations when considering planning applications, including updates to the 2021 published version.

Where to view the consultation documents

You can read the consultation documents in the following ways:

- On the Council's Consultation Portal at www.chelmsford.gov.uk/planningpolicyconsult. This system also allows you to submit comments to the consultations
- On the Council's website alongside the Local Plan evidence base documents at www.chelmsford.gov.uk/lp-review
- At the Chelmsford City Council Customer Service Centre, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford CM1 1JE (10am to 4pm Monday to Friday).
- At the following drop-in public exhibitions. These will provide an opportunity to meet an officer face-to-face unless otherwise stated.

Location	Date	Time
Council Chamber, Civic Centre, Duke Street, Chelmsford, CM1 1JE	Thursday 27 February Friday 28 February Saturday 1 March	6pm - 8pm 2pm - 4pm 10am - 12noon
High Chelmer Shopping Centre, Exchange Way, Chelmsford, CM1 1XB	Monday 24 February to Sunday 2 March	Unstaffed exhibition panels displayed all-day during shopping centre opening hours
South Woodham Town Council, Champions Manor Hall, Hullbridge Road, South Woodham Ferrers, CM3 5LJ	Thursday 13 February to Tuesday 25 February	Unstaffed exhibition panels displayed 9am - 4pm (except weekends)

Please check our website www.chelmsford.gov.uk/lp-review for any updates before making your journey.

How to comment

You can comment on the consultation documents in the following ways:

Online Consultation Portal:
Go to: www.chelmsford.gov.uk/planningpolicyconsult where you can:

- Read the consultation documents
- Make your comments via the specially designed representation form
- Sign up for alerts to feedback reports and future consultations

This is our preferred means of receiving comments as it ensures that your comments are recorded accurately and are processed quickly.

If you have not used this system before or have any difficulties logging in, please see our guidance notes at:www.chelmsford.gov.uk/lp-portal-guide or call us on (01245) 606330.

In writing:
If you prefer to send comments in writing, please fill in the relevant specially designed representation forms for each consultation event.

Local Plan representation forms cover the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document and the Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment consultations.

The Local Plan representation forms can be downloaded at www.chelmsford.gov.uk/lp-review. Paper copies of these representation forms for are also available from Chelmsford City Council's Customer Service Centre (details above) or on request by telephoning (01245) 606330 or emailing planning.policy@chelmsford.gov.uk

Forms can be returned:

- By e-mail to planning.policy@chelmsford.gov.uk
- By post to Planning Policy, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, CM1 1JE
- By hand to Chelmsford City Council Customer Service Centre (details above).

The use of the Local Plan representation forms is strongly recommended as this will ensure that comments are related to the matters relevant to the subsequent Independent Examination by a Planning Inspector.

If you do not have access to a computer, you can request paper copies. A charge will be made to cover printing and postage costs.

If you have difficulties making representations by e-mail or post due to a disability, please call us (01245) 606330.

Please note that any representations must be received by the Council no later than 4pm on Tuesday 18 March 2025. We are unable to accept anonymous representations, and any comments received after the closing date cannot be accepted.

Part B – Optional information by Parish/Town Council area

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in the Unparished Area of Chelmsford?

The plan identifies site allocations in Chelmsford's Urban Area including the City Centre for new employment and around 3,013 new homes. This comprises 20 sites carried forward from the adopted Local Plan some of which have increased numbers

of homes as justified by the plan evidence base (Sites 1a – 1b, 1d – 1i and 1k – 1v). There are also six new site allocations:

- Site 1w Meadows/Meadows Surface Car Park for around 757 new homes
- Site 1y Land between Hoffmans Way and Brook Street (Marriage's Mill) for around 100 new homes
- Site 1z Granary Car Park, Victoria Road for around 50 new homes
- Site 1aa Coval Lane Car Park for around 40 new homes
- Site 1bb Glebe Road Car Park for around 12 new homes
- Site 1cc Andrews Place for 250 new affordable homes (183 net new affordable homes)

See part C for more details of site allocations.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Boreham Parish?

The plan allocates two new sites:

- Site 9a Waltham Road Employment Area. This is identified for around 3,500sqm of new employment land as an expansion of the existing industrial area
- Site 16a East Chelmsford Garden Community (Hammonds Farm) lies adjacent to Boreham Parish to the south but proposals for a new connection to Junction 19 of the A12 and a small portion of the country park lie within Boreham Parish. Most of the wider site is beyond Boreham Parish. The whole site is identified for around 3,000 new homes, 43,000 sqm of employment floorspace and two Gypsy and Traveller sites, each for 10 pitches in the period up to 2041 and 13 Travelling Showpeople plots alongside supporting infrastructure including transport, new schools and early years and childcare provision, health care, utility services and green infrastructure together with retail, community, employment, leisure uses and a country park. The site is also considered able to provide a further 1,500 new homes in the period beyond 2041.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Broomfield Parish?

The plan carries forward the existing allocation of Land North of Broomfield (Site 8) in the adopted Local Plan but with an increased number of homes as justified by the planning application process. It is identified for 512 new homes alongside supporting infrastructure including a new neighbourhood centre. This site partially lies within Broomfield Parish.

No additional housing or employment sites are identified in Broomfield Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Chelmer Village Parish?

The plan allocates a new East Chelmsford Garden Community (Hammonds Farm) (Site 16a) which lies adjacent to Chelmer Village Parish to the east of the A12 but proposals for a new connection to Junction 19 of the A12 within Chelmer Village Parish. Most of the wider site is beyond Chelmer Village Parish. The whole site is identified for around 3,000 new homes, 43,000 sqm of employment floorspace and two Gypsy and Traveller sites, each for 10 pitches in the period up to 2041 and 13 Travelling Showpeople plots alongside supporting infrastructure including transport, new schools and early years and childcare provision, health care, utility services and green infrastructure together with retail, community, employment, leisure uses and a country park. The site is also considered able to provide a further 1,500 new homes in the period beyond 2041.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Chelmsford Garden Community Parish?

The plan carries forward the existing allocation of North East Chelmsford (Chelmsford Garden Community) (Site 6). It identifies 6,569 new homes in the period to 2041. It also allocates around 56,946sqm of employment land and a Gypsy and Traveller site for 10 pitches. The amount and type of proposed development is greater than that allocated in the adopted Local Plan as justified by an approved masterplan (Development Framework Document). The development will be supported by new infrastructure including transport, new schools and early years and childcare provision, health care, utility services and green infrastructure schools, a country park/destination parks and mixed use village centres. The site is also considered able to provide a further 681 new homes beyond 2041.

No additional housing or employment sites are identified in Chelmsford Garden Community Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Chignal Parish?

No housing or employment sites are identified in Chignal Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Danbury Parish?

The plan allocates a new East Chelmsford Garden Community (Hammonds Farm) (Site 16a) which lies to the west of Danbury Parish except for land identified for conservation and strategic landscape enhancement. Most of the wider site is beyond Danbury Parish. The whole site is identified for around 3,000 new homes, 43,000 sqm of employment floorspace and two Gypsy and Traveller sites, each for 10

pitches in the period up to 2041 and 13 Travelling Showpeople plots alongside supporting infrastructure including transport, new schools and early years and childcare provision, health care, utility services and green infrastructure together with retail, community, employment, leisure uses and a country park. The site is also considered able to provide a further 1,500 new homes in the period beyond 2041.

The plans also carries forward the existing allocation of 100 new homes from the adopted Local Plan (Site 13). The location of these have been determined through the 'made' Danbury Neighbourhood Plan and include five sites which are shown on the Draft Policies Map.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in East Hanningfield Parish?

The plan identifies two new smaller site allocations in East Hanningfield – Site 17a Land North of Abbey Fields for around 11 homes and Site 17b Land East of Highfields Mead for around 20 homes. These sites are no larger than 1 hectare in size and the site boundaries are defined on the Draft Policies Map.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Galleywood Parish?

The plan carries forward the existing allocation of land north of Galleywood Reservoir for 24 new affordable homes (Site 4) but with an increased number of homes as justified by the planning application process.

No additional housing or employment sites are identified in Galleywood Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Good Easter Parish?

No housing or employment sites are identified in Good Easter Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Great & Little Leighs Parish?

The plan carries forward three existing site allocations:

- Site 7a Land at Moulsham Hall for around 750 new homes and a Travelling Showpeople site for 5 plots alongside supporting infrastructure including a new primary school and neighbourhood centre. The site is also allocated for an increased number of homes as justified by the planning application process. The Travelling Showpeople site is also shown in a new location to the north of Great Leighs village between the A131 and London Road

- Site 7b Land East of London Road for around 250 new specialist residential homes for older persons to include affordable housing. The site is also allocated for an increased number of homes as justified by the planning application process.
- Site 7c Land North and South of Banters Lane for around 100 new homes.

No additional housing or employment sites are identified in Great & Little Leighs Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Great Baddow Parish?

The plan carries forward the existing allocation of East of Chelmsford – Manor Farm (Site 3a) but with an increased number of homes as justified by the planning application process. This site is identified for 360 new homes alongside supporting infrastructure including a new country park.

No additional housing or employment sites are identified in Great Baddow Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Great Waltham Parish?

The plan identifies one small site allocation in Ford End Site 14b Land South of Ford End Primary School for around 20 homes. A new off-road parking area is to be provided for use by Ford End Primary School. The site is no larger than 1 hectare in size and the site boundary is defined on the Draft Policies Map.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Highwood Parish?

No housing or employment sites are identified in Highwood Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Little Baddow Parish?

The plan proposes a new East Chelmsford Garden Community (Hammonds Farm) (Site 16a) which predominately lies within Little Baddow and Sandon Parishes. The wider site is identified for around 3,000 new homes, 43,000 sqm of employment floorspace and two Gypsy and Traveller sites, each for 10 pitches in the period up to 2041 and 13 Travelling Showpeople plots alongside supporting infrastructure including transport, new schools and early years and childcare provision, health care, utility services and green infrastructure together with retail, community, employment, leisure uses and a country park. The site is also considered able to provide a further 1,500 new homes in the period beyond 2041.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Little Waltham Parish?

The plan carries forward the existing allocation of land North of Broomfield (Site 8) in the adopted Local Plan but with an increased number of homes as justified by the planning application process. It is identified for 512 new homes alongside supporting infrastructure including a new neighbourhood centre. This site is partially within Little Waltham Parish.

No additional housing or employment sites are identified in Little Waltham Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Margaretting Parish?

No housing or employment sites are identified in Margaretting Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Mashbury Parish?

No housing or employment sites are identified in Mashbury Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Pleshey Parish?

No housing or employment sites are identified in Pleshey Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Rettendon Parish?

No housing or employment sites are identified in Rettendon Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Roxwell Parish?

The plan allocates around 6,000sqm of new employment land as an expansion of the existing Little Boyton Hall Farm Rural Employment Area (Site 15).

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Runwell Parish?

No housing or employment site allocations are identified in Runwell Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Sandon Parish?

The plan carries forward three existing site allocations:

- Site 3b East of Chelmsford – Land North of Maldon Road (Employment) for around 5,000sqm of new employment floorspace alongside supporting infrastructure including an early years and childcare nursery
- Site 3c East of Chelmsford – Land South of Maldon Road for 109 new homes. This is an increased number of homes and a new area for SuDS (sustainable drainage system) as justified by the Masterplan process
- Site 3d East of Chelmsford – Land North of Maldon Road (Residential) for 65 new homes. This is an increased number of homes, as justified by the masterplan process.

The plan allocates two new sites:

- A new East Chelmsford Garden Community (Hammonds Farm) (Site 16a) which predominately lies within Sandon and Little Baddow Parishes. The wider site is identified for around 3,000 new homes, 43,000 sqm of employment floorspace and two Gypsy and Traveller sites, each for 10 pitches in the period up to 2041 and 13 Travelling Showpeople plots alongside supporting infrastructure including transport, new schools and early years and childcare provision, health care, utility services and green infrastructure together with retail, community, employment, leisure uses and a country park. The site is also considered able to provide a further 1,500 new homes in the period beyond 2041
- Site 16b Land adjacent to A12 Junction 18 Employment Area. This is identified for around 43,000sqm of new employment land.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in South Hanningfield Parish?

No housing or employment sites are identified in South Hanningfield Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in South Woodham Ferrers?

The consultation document carries forward the existing allocation of North of South Woodham Ferrers (Site 10) but with an increased number of homes and employment as justified by the masterplan process. It is identified for 1,220 new homes, around 1,200sqm of business floorspace and a Travelling Showpeople site for 5 plots alongside supporting infrastructure including new early years and childcare nurseries.

No housing or employment sites are identified in South Woodham Ferrers Parish within the Pre-Submission Local Plan.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Springfield Parish?

No housing or employment sites are identified in Springfield Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Stock Parish?

No housing or employment sites are identified in Stock Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in West Hanningfield Parish?

No housing or employment sites are identified in West Hanningfield Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Woodham Ferrers and Bicknacre Parish?

The plan carries forward one existing allocation in Bicknacre - Site 12 St Giles, Moor Hall Lane for around 32 new units for specialist residential accommodation (SRA). The plan also identifies two new smaller site allocations in Bicknacre – Site 11b Land at Kingsgate, Bicknacre Road and Site 11c Land West of Barbrook Way both for around 20 new homes. The sites are no larger than 1 hectare in size and the site boundaries are defined on the Draft Policies Map.

Does the Chelmsford Local Plan Pre-Submission (Regulation 19) Document identify new development in Writtle Parish?

The plan carries forward two existing allocations:

- Site 2 West Chelmsford but with an increased number of homes as justified by the planning application process. It is identified for 880 new homes and a Travelling Showpeople site for 5 plots alongside supporting infrastructure including a new primary school and neighbourhood centre
- Site 5 Land Surrounding Telephone Exchange, Ongar Road for around 25 new homes. A smaller site boundary is shown on the Draft Policies Map to reflect the land promoted for development.

No additional housing or employment sites are identified in Writtle Parish within the Chelmsford Local Plan Pre-Submission (Regulation 19) Document.

Part C – Chelmsford Local Plan Pre-Submission (Regulation 19) Document - SITE ALLOCATIONS AT A GLANCE

Site No.	Site name	Location	Proposed development	Site Status	Policies Map No.
1a	Chelmer Waterside allocations (CW1a and CW1c-f)	Chelmsford Urban Area	880 homes	In Adopted Local Plan	4

planning.policy@chelmsford.gov.uk

Review of the Chelmsford Local Plan - **How to get involved**

The Council's Local Plan was adopted in 2020 and sets out how much new development is needed and identifies land for housing, schools, shops and jobs as well as areas for protection, such as open space and sites important for wildlife.

We need to review the plan at least every five years to ensure that it remains up to date and continues to meet our needs for development growth to 2041.

We have undertaken two previous stages of consultation in 2022 and 2024 and have carefully considered all the responses alongside updated evidence, national planning policy, new local priorities, and monitoring data to progress to the Pre-Submission stage.

This is the third round of public consultation on the final draft Local Plan before we submit it for examination by a Government-appointed independent Planning Inspector. This consultation is a bit different to the previous stages.

The Government asks you to consider whether the Pre-Submission (Regulation 19) Local Plan is legally compliant and consistent with national policy, known as the 'Tests of Soundness'.

The Pre-Submission document includes:

- Strategic Priorities
- Sites where new homes, jobs and other facilities could be located
- Policies that the Council would use to decide planning applications.

We are consulting on the Pre-Submission Local Plan and its accompanying Integrated Impact Assessment from 10am on Tuesday 4 February 2025 until 4pm on Tuesday 18 March 2025.

For more information go to:
www.chelmsford.gov.uk/lp-review

What is the pre-submission (Regulation 19) consultation?

We are reviewing our adopted Local Plan.

We adopted our current plan in May 2020. This is available at www.chelmsford.gov.uk/adopted-plan and it guides growth and development across Chelmsford City Council's area to 2036. We need to review the plan at least every five years, to see if we need to update it. We need to consider new national policy and changing local circumstances, and make sure we meet the needs of our current and future residents. The review will mean that the Local Plan will now run until 2041.

Why do we have to review the adopted Local Plan?

We adopted our current Local Plan in May 2020 and good progress is being made with implementing it. Government requirements mean we must provide more homes, so we need to review the plan at least every five years to ensure that it remains up to date and continues to meet our needs for development growth to 2041.

The Government is clear that housing growth is fundamental to revitalising the economy and the thrust of national planning guidance (NPPF) is to 'boost significantly the supply of housing'. The need for housing is not just a national issue, but a local one too.

Without an up-to-date Local Plan, the Council could have very little influence over the location of new development and the provision of infrastructure. Sites could be promoted for development in locations that the Council and its communities want to protect, and which are not considered sustainable. Not having an up-to-date Local Plan would create uncertainty and make it harder to secure appropriate sites for new infrastructure such as schools and health facilities.

What Stage is the Local Plan at?

- **Issues and Options – Previous stage**
  This was the first stage of consultation which took place in August to October 2022.

- **Preferred Options – Previous stage**
  This was the second stage of consultation which took place in May to June 2024.

  Many people and organisations commented on the Issues and Options and Preferred Options consultations. All representations have been carefully considered alongside updated evidence, national planning policy, new local priorities, and monitoring data. We have published all the comments on our consultation portal.

- **Pre-Submission (Regulation 19) – Current stage**
  This is the third round of public consultation on the final draft Local Plan before we submit it for examination by a government-appointed independent Planning Inspector. The consultation focuses on legal compliance and consistency with national planning policy and runs for a period of six weeks from 10am on Tuesday 4 February 2024 to 4pm on Tuesday 18 March 2025.

- **Submission – Future stage**
  This is the formal Submission of the Local Plan. All Plan documents, evidence, and all comments received at Pre-Submission stage are submitted to the Planning Inspector for an Independent Examination.

What does the Pre-Submission (Regulation 19) Local Plan cover?

The Pre-Submission (Regulation 19) Local Plan includes:

- Updated and new Strategic Priorities and Policies
- Updated plan Vision
- Numbers for future development requirements, including homes and jobs
- A strategy for locating additional future growth to 2041 including new and updated site allocations
- Updated Draft Policies Map.

How has the plan changed since the Preferred Options Local Plan consultation?

Numerous changes have been made from the Preferred Options Local Plan to the Pre-Submission (Regulation 19) Local Plan. Some of the plan changes relate to suggestions arising in the preferred options consultation responses. Others address recent evidence base work, respond to new information or have been made for clarification and consistency. Most changes made are considered relatively minor in nature and as such the Pre-Submission (Regulation 19) Local Plan essentially remains substantially the same in principle to the Preferred Options Consultation Document.

Policies are shown in the order they appear logically in the plan and will be renumbered in the final version**.**

How much development is proposed and where in the Pre-Submission (Regulation 19) Local Plan?

The Pre-Submission (Regulation 19) Local Plan follows the approach in the Preferred Options Local Plan by continuing to focus new housing and employment growth to the most sustainable locations in three Growth Areas - 1 Central and Urban Chelmsford, 2 North Chelmsford and 3 South and East Chelmsford.

The existing site allocations in the adopted plan (May 2020) which are not yet built are carried forward in the Pre-Submission (Regulation 19) Local Plan. Many of these sites are now coming forward, with masterplans being approved and planning applications decided or in progress. Some sites have also started building.

We have calculated that our annual housing requirement is 1,210 homes per year from 2022, when we started reviewing the Local Plan, until 2041. This equates to 22,990 homes.

To meet additional housing growth needs to 2041 we have allocated new sites for around 4,233 new homes. Provision is also made for a further 2,181 new homes beyond 2041. The Pre-Submission (Regulation 19) Local Plan also plans to meet future employment needs by providing additional employment allocations for around 107,500sqm. These figures have been informed by updated evidence base and data, including the Strategic Housing Needs Assessment Addendum (2024) and Employment Land Review – Focused Update (2024).

We are not considering growth in the Green Belt or Green Wedge.

How have we used the previous Preferred Options consultation comments?

The Council undertook a second round of public consultation on a Preferred Options document in May to June 2024. All the responses have been carefully considered and used to progress the Pre-Submission (Regulation 19) Local Plan alongside an updated plan evidence base, national planning policy, new local priorities, and monitoring data.

The ‘You Said We Did’ feedback report provides a summary of how the Pre-Submission (Regulation 19) Local Plan has been informed by the Preferred Options consultation responses. It also summarises the representation received, the main issues raised and provides a summary of how the Preferred Options Local Plan has been informed by the representations and the evidence base. The ‘You Said We Did’ is available at www.chelmsford.gov.uk/lp-review.

Is Hammonds Farm still a site allocation in the Pre-Submission (Regulation 19) Local Plan?

Yes, Hammonds Farm (SGS16a) and Junction 18 A12 Employment Area (SGS16b) remain site allocations in the plan. However, the site allocation policies have been refined and strengthened, where appropriate, to help address community and stakeholder concerns raised and any suggestions made for their improvement. This includes changes

to the Draft Policy Map to allocate land within the site to ensure important landscape and heritage features are protected.

The Council acknowledges that significant levels of opposition were received to these sites during the Preferred Options Local Plan consultation. However, it is important to note that the Council makes decisions on evidence and sound planning judgments, rather than solely basing them on the number of objections made.

What is the Integrated Impact Assessment?

The Integrated Impact Assessment (or IIA for short) assesses the Pre-Submission (Regulation 19) Local Plan against a range of social, environmental and economic indicators and helps to identify all the likely significant effects. The IIA advises on ways in which any adverse effects could be avoided, reduced or mitigated or how any positive effects could be maximised. This helps to ensure that the policies, plans and allocations in the Local Plan are promoting sustainable development. We are consulting on this at the same time as the Pre-Submission (Regulation 19) Local Plan.

When is the pre-submission (Regulation 19) consultation?

The Pre-Submission (Regulation 19) Local Plan and accompanying Integrated Impact Assessment (IIA for short) are published for six weeks consultation from 10am on 4th February 2025 before the plan is submitted for examination by a government-appointed independent Planning Inspector.

Who can take part in the pre-submission (Regulation 19) consultation?

Anyone with an interest in Chelmsford can take part in the consultation.

How can I take part in the pre-submission (Regulation 19) consultation?

The consultation is a different to the previous stages. The Government asks you to consider whether the Pre-Submission Local Plan is legally compliant and consistent with national policy, known as the 'Tests of Soundness'. There are specific consultation questions based on a suggested model representation form by the Planning Inspector.

Where can I view the pre-submission (Regulation 19) consultation documents?

You can read the consultation documents in the following ways:

- On the Council's Consultation Portal at www.chelmsford.gov.uk/planningpolicyconsult. This system also allows you to submit comments to the consultations
- On the Council's website alongside the Local Plan evidence base documents at www.chelmsford.gov.uk/lp-review
- At the Chelmsford City Council Customer Service Centre, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford CM1 1JE (10am to 4pm Monday to Friday).

At some staffed drop-in public exhibitions – see later FAQs for details.

How can I comment on the pre-submission (Regulation 19) consultation documents?

You can comment on the consultation documents in the following ways:

Online Consultation Portal:
Go to: www.chelmsford.gov.uk/planningpolicyconsult where you can:

- Read the consultation documents
- Make your comments via the specially designed representation form
- Sign up for alerts to feedback reports and future consultations

This is our preferred means of receiving comments as it ensures that your comments are recorded accurately and are processed quickly. If you have not used this system before or have any difficulties logging in, please see our guidance notes at:www.chelmsford.gov.uk/lp-portal-guide or call us on (01245) 606330.

In writing:
If you prefer to send comments in writing, please fill in the relevant specially designed representation forms for each consultation event.

Local Plan representation forms cover the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document and the Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment consultations.

The Local Plan representation forms can be downloaded at www.chelmsford.gov.uk/lp-review. Paper copies of these representation forms for are also available from Chelmsford City Council's Customer Service Centre (details above) or on request by telephoning (01245) 606330 or emailing planning.policy@chelmsford.gov.uk

Forms can be returned:

- By e-mail to planning.policy@chelmsford.gov.uk
- By post to Planning Policy, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, CM1 1JE
- By hand to Chelmsford City Council Customer Service Centre (details above).

The use of the Local Plan representation forms is strongly recommended as this will ensure that comments are related to the matters relevant to the subsequent Independent Examination by a Planning Inspector. If you do not have access to a computer, you can request paper copies. A charge will be made to cover printing and postage costs. If you have difficulties making representations by e-mail or post due to a disability, please call us (01245) 606330.

Any late comments received after 4pm on 18 March 2025 cannot be accepted and individual acknowledgement of receipt will not be possible.

What is 'legal compliance'?

Local Plans are legally compliant if they are:

- prepared in accordance with the Council's latest Local Development Scheme
- accompanied by a Sustainability Appraisal and Habitats Regulations Assessment

- subject to consultation carried out in accordance with the Council's Statement of Community Involvement
- compliant with all relevant laws including the Planning and Compulsory Purchase Act (PCPA) and the Town and Country Planning (Local Planning) (England) Regulations 2012; and
- prepared in line with the Duty to Co-operate.

Please read the Statement of Representation Procedure and Statement on Availability for full details about how to make your comments available at www.chelmsford.gov.uk/lp-review.

What is 'soundness'?

Local Plans are considered sound if they are:

- **Positively prepared** – provide a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development
- **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence
- **Effective** – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common grounds; and
- **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in the National Planning Policy Framework.

Please read the Statement of Representation Procedure and Statement on Availability for full details about how to make your comments available at www.chelmsford.gov.uk/lp-review.

What is the 'duty to cooperate'?

The Council has a legal duty to cooperate with other national and local bodies, such as neighbouring planning authorities, Essex County Council and Historic England. The purpose of the duty is to discuss and address strategic cross-boundary issues such as housing, employment and infrastructure needs.

These discussions have helped to formulate the Pre-Submission Local Plan. The Pre-Submission Duty to Co-operate Position Statement provides evidence of this ongoing engagement and where agreement has been reached. This Statement is also supported by Statements of Common Ground which are being agreed with organisations. These will be available on the Council's website as they are agreed at www.chelmsford.gov.uk/lp-review.

Will previous consultation responses be carried forward?

No, all comments made on previous consultations in 2022 and 2024 have already been considered. A new representation must be submitted if individuals and organisations still have relevant comments to make. The Local Plan examination will also be based around

matters raised by representations made on the Pre-Submission (Regulation 19) Local Plan rather than previous versions.

Where and when are the Local Plan exhibitions?

The Civic Centre drop-in public exhibitions will be staffed and provide an opportunity to meet a planning officer face-to-face. The other exhibitions in High Chelmer and South Woodham Ferrers will not be staffed – see details below. Please check our website www.chelmsford.gov.uk/lp-review for any updates before making your journey.

Location	Date	Time
Council Chamber, Civic Centre, Duke Street, Chelmsford, CM1 1JE	Thursday 27 February Friday 28 February Saturday 1 March	6pm - 8pm 2pm - 4pm 10am - 12noon
High Chelmer Shopping Centre, Exchange Way, Chelmsford, CM1 1XB	Monday 24 February to Sunday 2 March	Unstaffed exhibition panels displayed all-day during shopping centre opening hours
South Woodham Town Council, Champions Manor Hall, Hullbridge Road, South Woodham Ferrers, CM3 5LJ	Thursday 13 February to Tuesday 25 February	Unstaffed exhibition panels displayed 9am - 4pm (except weekends)

You can also view the exhibition online at www.chelmsford.gov.uk/lp-review.

What is the evidence base?

National policy requires the Council to ensure that its Local Plan is based on appropriate up-to-date evidence about economic, social and environmental characteristics and prospects of Chelmsford. The evidence base comprises studies and working with key stakeholders and groups across the City area. More recently completed evidence base used to inform the Pre-Submission Local Plan include:

- Updated Viability Assessment
- Updated Infrastructure Delivery Plan
- Updated Heritage Impact Assessment
- New Strategic Housing and Employment Land Availability Assessment (SHELAA)
- Strategic Housing Needs Assessment Addendum Report
- Employment Land Availability Assessment Focused Review
- New Open Space Assessment
- New Archaeology Assessment
- New Air Quality Assessment
- Level 2 Strategic Flood Risk Assessment – updated and new site summary tables and maps
- Sequential and Exception Testing Focused Update, and
- Local Neighbourhood Centre Technical Note.

These evidence base documents are available online via www.chelmsford.gov.uk/lp-review. There are also evidence base documents which were used to support the adopted Local Plan which are still relevant. These evidence base documents are available to view at: https://www.chelmsford.gov.uk/planning-and-building-control/planning-policy-and-local-plan/adopted-local-plan/evidence-base/

Information on how the Pre-Submission (Regulation 19) Local Plan has been informed by the updated plan evidence is set out in a Preferred Options 'You Said We Did' Feedback Report also available at www.chelmsford.gov.uk/lp-review.

What weight does the Pre-Submission (Regulation 19) Local Plan have in decision making?

The Pre-Submission (Regulation 19) Local Plan indicates the Council's intent to address future growth requirements in Chelmsford in the period to 2041 and beyond in a planned and sustainable way. However, at this stage it will be of limited weight in decision making on planning applications,

It will not have full Development Plan status until it has been adopted by the Council. At this point the new Plan would also replace the current adopted plan.

What happens after the Pre-submission (Regulation 19) Local Plan consultation?

All duly-made responses will be submitted to the Planning Inspector, alongside the Pre-Submission (Regulation 19) Local Plan and evidence base. The Council will produce a summary of the main issues raised in the consultation responses for the Planning Inspector and publish this online.

All duly-made comments will be published on the Council's Consultation Portal in accordance with the General Data Protection Regulations. To be duly made, you need to provide your name and address with your comment. Anonymous comments will not be accepted. Your name, your comments and any information provided, including supporting documents, will be available for public inspection and published online. We will not publish any personal details.

Section 149 of the Equality Act 2010 requires that the Council should avoid any form of discrimination and also foster good relations between different ethnic groups. We will not display, share or consider any comments that are inappropriate, including those that are racist, inflammatory or derogatory. Any such comments will be considered as inadmissible and will not be accepted.

The Council will acknowledge receipt of all duly-made comments although it will not enter into individual correspondence.

How can I be kept up to date on progress?

We have a specially designed consultation portal for Local Plan and other planning policy consultations. If you register, you can:

- read and save consultation documents
- make your comments online
- receive alerts on future consultations

You can find out more about how to use the consultation portal online at www.chelmsford.gov.uk/lp-portal-guide

You can also sign up to the Chelmsford City Life mailing list, to receive news updates.

What are the Planning Advice Note and Supplementary Planning Document consultations?

We are also consulting on a Co-Living Housing Planning Advice Note and Draft Planning Obligations Supplementary Planning Document (SPD) from 10am on 4 February to 4pm on 18 March 2025.

The Planning Advice Note seeks to provide practical guidance to potential promoters or developers of co-living housing in Chelmsford, to ensure they meet the Council's expectation in this regard.

The Consultation Draft Planning Obligations Supplementary Planning Document (SPD) is also being consulted on. This sets out how the Council will seek planning obligations when considering planning applications. The adopted SPD was published in January 2021 and has been updated to reflect proposed changes in the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document, as well as changes in national planning policy. It refers to the latest published Infrastructure Delivery Plan and integrates and updates some published Planning Advice Notes.

You can view and comment on the Planning Advice Note and SPD on the consultation portal at www.chelmsford.gov.uk/planningpolicyconsult:

4. Co-Living Housing Planning Advice Note Consultation - click on this event to view and comment

5. Consultation Draft Planning Obligations Supplementary Planning Document - click on this event to view and comment

Clear Channel Digital Screens

Clear Channel digital screens in Chelmsford (FOC)

These cover a range of bus stops in the city centre

Ads ran from 27/02/2025 until 18/03/2025

- The ads were shown on rotation for the duration of the hours scheduled
- There were 25,613 plays of this ad across 7 screens, including: Parkway (B&M), Parkway Flyover, Waterhouse Lane, Springfield Road, Rainsford Lane, Moulsham Street (Junction with London Road)

Buses cater to people of all ages, professions, and backgrounds, making bus shelters an ideal medium to reach a broad captive target audience. The ads are also visible to passing audience/traffic.

Research suggests that people are more likely to remember ads they've seen on a digital screen compared to static posters or banners.

Chelmsford City Council

Pre-submission Local Plan consultation

Digital screens in CCC venues

30 x screens on the Brightsign network (FOC)

- 25 screens across 4 leisure centres: over 1.7m attendances p.a.
- 2 screens in Theatre: over 156.5k attendances p.a.
- 1 screen at Museum: 106.4K footfall p.a.
- 2 screens (Sandon & Chelmer Valley) at Park & Ride

Local Plan consultation ads were shown on the following CCC venue screens between 17 Feb – 18 March:

- Riverside Leisure Centre
- South Woodham Ferrers Leisure Centre
- Chelmsford Sport and Athletics Centre
- Dovedale Sports Centre
- Chelmsford Theatre
- Museum of Chelmsford
- Park & Ride screens

The following table summarises comments raised in representations to the Pre-Submission (Regulation 19) Local Plan (or Local Plan for short) relating to the transport modelling evidence base. It also provides a focused response to these main issues. ECC/CCC contributions are also included to present a combined response.

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
Comment by: Wates Developments and Hammonds Estates – Comment ID: PS25-242			
1.	Query regarding need to determine preferred Rapid Transit corridor through Hammonds Farm development.	Bullet 10 under 'Movement and Access' of the site policy (Strategic Growth Site 16a) of the Pre-Submission Local Plan) and Paragraph 7.367 of the Local Plan refers to the need to 'Provide Bus Based Rapid Transit Infrastructure'. Concern is raised at the principle within paragraph 7.367 that the masterplan should provide a "choice of unimpeded route corridors within the developed area, able to carry rapid transit services", with the need to determine "a preferred route corridor through the development". It is not appropriate to pre-judge the nature of the rapid transit measures that will be most suitable for the East Chelmsford Garden Community development at this stage, we consider it essential that Paragraph 7.367 be updated. The current wording overstates the need for an unimpeded corridor, which at this stage is not justified by evidence.	*It is accepted that the nature of rapid transit measures within the site will be confirmed at a later stage of the planning process. Therefore, wording in bullet 10 of the site policy and paragraph 7.367 of the Local Plan has been altered to reflect this.* *Nevertheless, it is seen as critical that dedicated and attractive sustainable transport options are provided within, and between the development and to key destinations (such as the city centre) to ensure the 60% modal shift is achieved.*
Comment by: Walshingham Planning, on behalf of Little Baddow, Sandon, Boreham & Danbury Parish Councils – Comment ID: PSQ25-6174			
2.	Assessing the potential level of sustainable accessibility is not appropriate.	The evidence base (T003) explains that Hammonds Farm has potentially a "good level" of sustainable accessibility, subject to the provision of local amenities and sustainable travel infrastructure by developers. We fundamentally disagree with this change in analysis. When reviewing the potential development options, the sites should be reviewed on a level playing field and considered in relation to their current context to provide a fair assessment of the alternative strategies. Otherwise,	*Whilst the potential for improved sustainable accessibility was considered for the Hammonds Farm site as part of the Sustainable Accessibility Mapping and Appraisal 2022 (T003), metrics presented in the report covered existing levels of accessibility and were therefore consistent and comparable with the other spatial approaches considered.*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
		any site - situated in the most remote location - could in theory become 'sustainable' and 'accessible', if the facilities and transport infrastructure are provided, and there is no meaningful comparison.	*It was nevertheless felt reasonable to acknowledge the potential for improved sustainable accessibility at the Hammonds Farm site. Given its location, the site provides opportunities for improved walking, cycling and public transport connections to existing transport hubs in the vicinity such as Sandon Park and Ride and Beaulieu Park Rail Station. The site is also located within cycling distance of the city centre and benefits from an existing bus priority corridor along the A1114 Essex Yeomanry Way.* *Larger development sites offer a greater opportunity for investment in the delivery of focused and well-connected public transport and walking/cycling infrastructure and services. Their size can also help with the successful implementation of Travel Plans to encourage sustainable travel uptake.*
3.	Sites in the existing urban area of Chelmsford are more sustainably accessible.	Currently – there are other growth options available, that are more sustainable and accessible with regards to the existing urban area, and where there are already established facilities and other infrastructure and utilities upon which to build and develop.	*The approach the City Council has undertaken to identify its spatial strategy and development locations is set out in Topic Paper 2 - Spatial Strategy and Strategic Sites. This has been undertaken by considering several factors:* - *How much new development is needed? (Development Requirement)* - *Where are the potential development sites? (SHELAA)* - *What is important as part of Chelmsford's growth? (Vision and Strategic Objectives)*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			- *Where is most accessible and have the most existing services and facilities? (Settlement Hierarchy)* - *What impact does new development have and how can it be supported and/or mitigated? (Integrated Impact Assessment and Evidence Base)* *Whilst development on brownfield sites within the Chelmsford urban area is an important consideration, placing heavy focus on development in this area can pose challenges when considering the availability of space for the necessary expansion of infrastructure and public transport services (such as the provision of cycle routes or bus priority measures), and limits on the size and type of dwellings that can be built.* *It is recognised that a sizeable allocation of development in the Plan Review is situated to the east of Chelmsford at Hammonds Farm. This location provides opportunities for walking, cycling and public transport links to both Sandon Park and Ride and Beaulieu Park Rail Station. The site is located within cycling distance of the city centre and benefits from an existing bus priority corridor along the A1114 Essex Yeomanry Way.* *Larger development sites offer a greater opportunity for investment in the delivery of focused and well-connected public transport and walking/cycling infrastructure and services. Their size can also help with the successful*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			implementation of Travel Plans to encourage sustainable travel uptake.
4.	Modelling based on a 60% active and sustainable mode share assumption is overly ambitious and unrealistic.	Strategic Growth Site Policy 16a suggests that measures to enable travel by active and sustainable modes should ensure a 60% share for active and sustainable transport modes. This assumption is built into the Council's Transport Impact Appraisal (TIA) (T006), which consequently sets out very low assumptions for trip generation rates in relation to Hammonds Farm and the new employment allocation to the south (Strategic Growth Site 16b). We question, however, how justifiable it is to base the entire assessment on an assumption that 60% of trips will take the form of active and sustainable travel, which would appear to be overly ambitious and thus not realistic.	*The trip rates used in the Transport Impact Appraisal (TIA) of the Local Plan Review Pre-Submission (T006) are consistent with those accepted for use in the business case assessments of major schemes in Chelmsford – including the Army & Navy Roundabout and Chelmsford North-East Bypass. Whilst the trip rates are low compared with those that might be calculated using a 'business as usual' approach (i.e. using existing travel behaviour as a basis for determining future travel behaviour), they nevertheless represent a reasonable uptake in sustainable travel mode alternatives (an approach that is compatible with National Planning Policy Framework (NPPF) guidance). However, they are not as low as trip rates based directly on a 60% active and sustainable mode share.* *Additional information on the use of trip rates in the Transport Impact Appraisal (TIA) is provided in response to Item ID 16.*
5.	Hammonds Farm development will perform no differently to existing neighbourhoods with low levels of active and sustainable travel use.	It is unclear why the new community at Hammonds Farm – which will be located some distance from the main urban area - will perform differently to the existing neighbourhoods, and will achieve such extremely high levels of active travel and sustainable travel usage.	*It should be noted that Strategic Growth Site (SGS) Policy 6 – North East Chelmsford (Chelmsford Garden Community), as well as SGS Policy 16a East Chelmsford Garden Community (Hammonds Farm) requires the developer to implement measures to enable travel by active and sustainable modes and that offer travel choice for people by non-car modes including a network of*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			mobility hubs to enable a 60% share for active and sustainable transport modes. *SGS Policy 16a requires the Garden Community to be comprehensively planned with a range of on-site land uses and facilities designed through its masterplanning to maximise opportunities for active and sustainable travel, following Town and Country Planning Association (TCPA) Garden City Principles, in particular the principle requiring `Integrated and accessible transport systems, with walking, cycling and public transport designed to be the most attractive forms of local transport'. Requirements are included the policy site masterplanning principles.* *Any Transport Assessment (TA) will be required to have regard to the ECC 'Transport Assessment Guide for Large-Scale Developments and Garden Communities: A Guide for Developers'. The TA must demonstrate how the development will identify and provide active and sustainable transport measures that achieve mode share targets and will be required to ensure that the site is accessible by a choice of modes other than the private car, including cycling, walking and public transport. This will be implemented at the planning application stage.* *The Travel Plan Guide for Large-Scale Developments and Garden Communities provides more detailed guidance regarding the implementation/monitoring stages than previous*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:

			guidance. Every large scale or garden community residential site has a mandatory target of 60% of trips to and from and within the site to be made by non-car means within five years of build out, unless otherwise agreed. This target is in line with the recommended TCPA modal share target. Interim targets, starting at not less than 50%, may be considered as part of the Travel Plan. This will be implemented at the planning application stage.
			
			The monitoring of Travel Plans will be more rigorous than previously, including the establishment of a quarterly Transport Review Group. There will be;
			- *regular bi-monthly meetings with the on-site Residential Travel Plan Co-ordinator (RTPC) to track progress including,*
			  ○ *monitor and review mode share targets, including trigger points for phases of development, as identified in the Transport Assessment and Travel Plan informed by annual traffic surveys;*
			  ○ *review of the S106 to ensure annual targets have been met or to amend requirements*
			  ○ *co-ordinate other activities including promotional event days to encourage the take up of active and sustainable travel modes; undertake residents surveys; monitor uptake of Residential Travel Information Packs and season tickets.*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			NPPF guidance for Plan appraisal encourages use of a 'vision and validate' approach to calculating development trips and the subsequent appraisal of mitigation. However, for planning applications, developers will be expected to make provision for a 'business as usual' approach towards assessing development impact and identifying necessary mitigation, and then adopt a 'monitor and manage' approach for the subsequent implementation.
6.	Lack of detail on proposed sustainable mitigation.	There are currently no details regarding the nature of the cycle and footpath links proposed, how connection will be made across the A12, how many bus services will be provided, their frequency and routes.	*The detail of these routes will be expanded on at the masterplan and planning application stages.* *Strategic Growth Site Policy 16a – East Chelmsford Garden Community (Hammonds Farm), Site masterplanning principles - Movement and Access sets out the following requirements in the Pre-Submission Local Plan) which will need to be demonstrated to the satisfaction of the City Council in consultation with the highway authority to ensure connectivity across and under the A12, including:* - *Bullet 2 - new multi-modal vehicular bridge over the River Chelmer with measures to deter use as a through-route* - *Bullet 3 - well-connected internal road layouts allowing good accessibility for bus services and bus priority measures* - *Bullet 4 - an effective movement strategy for all users within the site and beyond* - *Bullet 5 - pedestrian, cycle and where appropriate bridleway connections within*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			the site including links to the River Chelmer Navigation and to the wider area including the Chelmer East Green Wedge, existing education locations, Chelmsford City Centre, Danbury, Little Baddow, Great Baddow and Sandon, Beaulieu Park Rail Station, and existing and proposed employment locations including SGS16b - *Bullet 7 - safe multi-user access routes under and over the A12 to connect to existing routes* - *Bullet 8 - a new active and sustainable route and bridge over the A12 to connect close to Sandon Park and Ride* - *Bullet 9 – Measures to enable travel by active and sustainable modes that offer travel choice for people by non-car modes including a network of mobility hubs, to enable a 60% share for active and sustainable transport modes.* *Alongside this, Strategic Policy S9 – Infrastructure Requirements, paragraph 6.91 states that more detailed analysis of traffic impacts and mitigation options testing will be required through the preparation of Transport Assessments/Statements as part of future planning applications. This will include the requirements listed above in addition to details regarding the level of passenger transport provision including their frequency and routes.* *In addition, Strategic Policy S16 – Connectivity and Travel requires new development to be designed to*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			provide for attractive, safe, convenient, inclusive, high quality and well-designed walking and cycling networks with supporting facilities. Paragraph 6.71 requires these to be consistent with LTN 1/20 – Cycling infrastructure design (2020) namely coherent; direct; safe, comfortable and attractive. *Specific measures will be agreed through the masterplanning and planning application stage, both of which are required to be approved by the City Council, with sufficient commitment towards mitigation being sought from developers as part of the Plan process.*
7.	Accessibility between Hammonds Farm and Sandon Park and Ride.	The proposed routes and linkages between the Hammonds Farm site and Sandon Park and Ride will clearly not be direct or seamless. Only the very south-western corner of the site would be within a 20-minute walk of the Sandon Park and Ride facility.	*Strategic Growth Site Policy 16a – East Chelmsford Garden Community (Hammonds Farm) requires the developer through future masterplanning and the relevant planning applications to provide wider connectivity to the Sandon Park and Ride via safe multi-user access routes under and over the A12 to connect to existing routes (bullet 7 of the Pre-Submission Local Plan) and a new active and sustainable route and bridge over the A12 to connect close to Sandon Park and Ride (bullet 8 of the Pre-Submission Local Plan).* *Some residents will live within walking distance of Sandon Park and Ride, however for others there will be alternative provision such as cycling and bus routes.* *Further connectivity for residents in the new community will also be required via a new multi-*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			modal vehicular bridge over the River Chelmer with measures to deter use as a through-route (bullet 2 of the Pre-Submission Local Plan); well-connected internal road layouts allowing good accessibility for bus services and bus priority measures (bullet 3 of the Pre-Submission Local Plan); an effective movement strategy for all users within the site and beyond (bullet 4 of the Pre-Submission Local Plan); and pedestrian, cycle and where appropriate bridleway connections within the site including links to the River Chelmer Navigation and to the wider area including the Chelmer East Green Wedge, existing education locations, Chelmsford City Centre, Danbury, Little Baddow, Great Baddow and Sandon, Beaulieu Park Rail Station, and existing and proposed employment locations including SGS16b (bullet 5 of the Pre-Submission Local Plan).
8.	Access concerns to Beaulieu Rail Station.	With concern raised in the TIA (T006) around the potential capacity of the road / junction access to Beaulieu Rail Station, there is no evidence that the new community will be served by exemplary public / active travel connections, which would be essential in order to achieve anything like a 60% modal share.	*Potential access concerns are raised in the TIA (T006) to ensure that sufficient financial commitments are sought from developers to contribute towards improvements to public transport access to/from Chelmsford rail station as an alternative.* *Strategic Growth Site Policy 16a – East Chelmsford Garden Community (Hammonds Farm) requires the developer through future masterplanning and the relevant planning applications to provide an effective movement strategy for all users within the site and beyond (bullet 4 of the Pre-Submission Local Plan), wider connectivity to the Sandon Park*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			and Ride via safe multi-user access routes under and over the A12 to connect to existing routes (bullet 7 of the Pre-Submission Local Plan), a new active and sustainable route and bridge over the A12 to connect close to Sandon Park and Ride (bullet 8 of the Pre-Submission Local Plan), measures to enable travel by active and sustainable modes that offer travel choice for people by non-car modes including a network of mobility hubs, to enable a 60% share for active and sustainable transport modes (bullet 9 of the Pre-Submission Local Plan), and Bus Based Rapid Transit infrastructure (bullet 10 of the Pre-Submission Local Plan). *These will provide onward connections into the city centre and Chelmsford rail station (as indicated in bullet 5 of the Pre-Submission Local Plan).* *Paragraph 7.367 within the Reasoned Justification also states that the development will be required to provide an appropriate Bus Based Rapid Transit, which is a direct, frequent bus service connecting with the City Centre and Chelmsford and Beaulieu Park Rail Stations.*
9.	Bus Rapid Transit access from Hammonds Farm to city centre.	The TIA (T006) reveals that: "All the principal roads and many local roads through Chelmsford are at, or near to, capacity during peak periods". It is therefore highly unlikely that a continuous Bus Rapid Transit service to the city centre and neighbouring destinations would be achievable, or that it would attract a material modal share.	*The limited capacity of the city centre road network is raised in the TIA (T006) to ensure that sufficient financial commitments are sought from developers to contribute towards improvements to public transport access to/from Chelmsford city centre.*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			Paragraph 7.367 within the Reasoned Justification for Strategic Site Policy 16a states that the development will be required to provide an appropriate Bus Based Rapid Transit, which is a direct, frequent bus service connecting with the City Centre and Chelmsford and Beaulieu Park Rail Stations. *A bus priority corridor already exists from the Sandon Park and Ride via the Army and Navy to the city centre via the rail and bus stations.* *The Army and Navy Sustainable Transport Package is increasing capacity at Sandon Park and Ride by 350 spaces, providing a new northbound bus lane on Princes Road, and improved bus priority in both directions on Parkway. ECC will work with the developers through the masterplan and planning application processes to determine any further enhancements, such as an extension of the bus lane along Essex Yeomanry Way, that could be provided to serve residents and key locations.*
10.	Robustness of Chelmsford VISUM Forecast Model build.	The transport model relied upon by the Council is a traffic impact appraisal using the latest version of the Chelmsford VISUM Forecast Model and has been revalidated to 2019 traffic flows, but no recent traffic surveys have been undertaken in support of the model inputs. Significantly, the model is not validated to turning movements at junctions.	*At the time of the Local Plan Review modelling, a decision was made to work with the 2019 VISUM base model in order to maintain consistency with other studies undertaken in Chelmsford – including the Army & Navy Roundabout and Chelmsford North-East Bypass business case appraisals. A separate assessment was undertaken to demonstrate the continued robustness of the 2019 base model and growth forecasts, accounting for the traffic impact of COVID in Chelmsford over the*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			period 2020/21. This assessment is documented in the Appendix A2 of the TIA (T006). *For a strategic model covering the extent of the Chelmsford administrative area (and beyond) Department for Transport (DfT) Transport Appraisal Guidance (TAG) does not include a requirement for validation to turning movements at junctions. Base model approach flows at junctions along key strategic corridors through and around Chelmsford are shown to be comparable with observed data, and effort has been made to caveat findings and analysis, as appropriate, where modelled turning flow proportions are understood to differ noticeably from observed.*
11.	Timeframe of modelling	The Council's modelling only extends to 2041, as such there is a significant unknown regarding the long-term impact of the strategic allocation options, especially as further growth is proposed in the Hammonds Farm area post-2041.	*The scope of the modelling extends to the end of the Local Plan Review period in 2041 – as is required for an Evidence Base aligned to NPPF guidance. For strategic modelling, there are challenges associated with predicting longer-term traffic growth, whilst uncertainty remains around National Highways' Road Investment Strategy and the sources of funding for larger infrastructure projects. This limits the ability to model robust assumptions around the long-term delivery of potential infrastructure that could impact traffic patterns on the strategic road network across Essex and beyond.*
12.	Access proposals / consideration of bus priority infrastructure	The access proposals for the sites, as presented in the TIA (T006), give no consideration to bus priority, bus lanes, or a bus gate, which will be necessary in order to deliver Bus	*The TIA (T006) is purposely strategic in nature and is intended to assess the impact of proposed development on the wider network only. Specific*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
		Rapid Transit infrastructure. Indeed, there are significant limitations along the A414, which limit options for road widening to accommodate bus priority measures. This further highlights the lack of deliverable sustainable access strategies to serve the proposed allocation(s).	*access arrangements to sites, and mitigation proposals, will be assessed in more detail as part of the masterplan and planning application stages.* *Given that Hammonds Farm is a Large Strategic local plan site, ECC / CCC will be prioritising the assessment and feasibility of options along the A414 corridor for the masterplan and planning application stages, to ensure that the right measures are identified and agreed with developers.*
13.	Congestion at A12 J18	The modelling shows significant queue lengths on the approach to the eastern roundabout of the A12 Junction 18, and this requires further analysis. Indeed, during the PM peak hour, the A12 Junction 18 southbound off-slip is shown to operate over capacity with a queue of approximately 180m. It cannot be assumed that the congestion and queuing will be alleviated by the implementation of active travel and sustainable travel routes, for the reasons detailed above.	*Hammonds Farm developers will be required to monitor the impact of their development on on/off-slips at A12 Junction 18. ECC and CCC are also committed to working with National Highways to promote the need for long-term capacity improvements along the A12 corridor.* *Specific access arrangements to the proposed Hammonds Farm site, and mitigation proposals for Junction 18 itself, will be assessed in more detail as part of the masterplan and planning application stages.*
14.	Congestion at A12 J17	The A12 Junction 17 will operate over capacity on almost all arms of the junction during the AM and PM peak periods up to 2041, with and without the addition of the Local Plan Pre-Submission draft allocated site trips. The TIA acknowledges that there are currently no feasible plans in place to update the layout of this junction. Clearly, any proposals for site allocation on the eastern	*While it is recognised that there are challenges associated with locating development to the east of Chelmsford, alternative locations face arguably greater challenges:* - *The north of Chelmsford is already well-built out with significant development allocated in the adopted Local Plan. The local transport network, despite*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
		edge of Chelmsford will have a serious impact on the operation of this junction, which is already under stress.	*infrastructure improvements, is expected to have limited capacity to accommodate further development. Expansion further north away from the main urban area of Chelmsford will also reduce the potential for travel by sustainable modes.* - *The south of Chelmsford is impacted by Green Belt and is therefore not suitable for development.* - *The west of Chelmsford already has development allocated in the adopted Local Plan – with limitations on the space available to provide improved public transport infrastructure into the city centre.* *While there are no current approved plans for J17, ECC and CCC are committed to working with National Highways to promote the need for long-term capacity improvements along the A12 corridor.*
15.	Modelling of additional access at J19 for Hammonds Farm	The current modelling results presented in the evidence base cannot be relied upon, as they do not demonstrate at this stage that an additional access from Junction 19 to serve the Hammonds Farm scheme can be accommodated.	*The impact of an additional access to the Hammonds Farm site from A12 Junction 19 has been assessed separately by consultants SLR on behalf of Hammonds Farm developers.* *This work is currently being reviewed by CCC, ECC and National Highways. Specific mitigation proposals will be assessed in more detail as part of the masterplan and planning application stages.*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
16.	Use of low trip rates	The modelling is based on very low trip rates, which represents a 30% reduction in typical residential vehicle trip rates. When using the TRICS database to determine trip rates for large residential developments, sites of a similar nature and scale are selected to ensure comparative trip rates are calculated. This means that for large scale developments, the TRICS data already takes account of the internalisation of trips and access to sustainable modes of travel. As such, further reducing the rates by 30% is 'double-counting' and a major error in the analysis, which significantly under-estimates the likely highways impact of the new developments.	*It is acknowledged that the trip rates used within the TIA (T006) modelling are relatively 'low' compared with a 'business as usual' approach to determining trip rates and represent a higher level of trip-internalisation and sustainable and active travel mode-share.* *The trip rates used in the main assessment of the Local Plan Review were selected and are considered appropriate for two main reasons:* 1. *To remain consistent with previous Chelmsford forecast modelling, including the Army & Navy and Chelmsford Northeast Bypass assessments. The Army & Navy model has been accepted by DfT, as being appropriate for the assessment of the Army & Navy Sustainable Transport Package.* 2. *NPPF guidance specifically outlines the need for an aspirational approach to development planning, and therefore use of lower trip rates as part of the Local Plan Review TIA was considered appropriate in line with this guidance, to represent the levels of trip generation that could be achieved with the successful implementation and uptake of sustainable and active mode infrastructure.* *As part of the additional sensitivity test, a reduction in trip rates for both residential and employment sites was applied – at a rate of 13% reduction of*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			residential trips and 6% reduction in employment trips. This was an additional assessment undertaken to show the potential impact of a future scenario with an even higher mode shift. It is recognised, and stated within the TIA (T006), that the reduction in trips under this scenario are very aspirational, and to achieve this would require the provision and use of additional passenger transport services to be significantly higher than typically expected. However, the purpose of undertaking this sensitivity assessment was to provide an indication of what the network impact could look like, if a more aspirational rate of mode shift was achieved - given the policy requirement for the Hammonds Farm site to achieve a 60% mode share target.
17.	Impact of rat-running through local villages.	As identified in the TIA, there will be serious adverse consequences for the rural routes on the local road network, which will have direct adverse impacts on small, historic villages, such as Little Baddow, Danbury, Boreham and Sandon.	*The sustainable and active mode measures proposed for implementation by developers of Hammonds Farm should reduce the volume of car trips to/from the site, which (modelling suggests), should reduce the volume of traffic rat-running through local villages. The developer will be expected to monitor the levels of traffic through villages, such as Boreham and Sandon, before, during and after the site build-out. This will be used as criteria to determine development impact, which will trigger requirements for the developer to provide additional infrastructure. More detail can be found in "The Essex County Council Developers' Guide to Infrastructure Contributions Revised 2024".*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			Detail on this 'monitor and manage' approach should be covered in the development Transport Assessment at the masterplan and planning application stages. *NPPF guidance for Plan appraisal encourages use of a 'vision and validate' approach to calculating development trips and the subsequent appraisal of mitigation. However, for planning applications, developers will be expected to make provision for a 'business as usual' approach towards assessing development impact and identifying necessary mitigation, and then adopt a 'monitor and manage' approach for the subsequent implementation.* *Rat-running is strongly linked to the levels of network congestion on the A12, and ECC / CCC continue to have regular dialogue with National Highways to emphasise the need for improvements on the A12. If these improvements came forward, this would further alleviate rat-running on the local road network through Boreham.*
18.	Realism of 60% mode share targets.	A 60% mode share for active and sustainable travel will be challenging to achieve in practice on a strategic employment site (south of A414), with a high volume of HGV movements and over 700 employees. The current outline application (for Land at Junction 18 – planning application reference number 24/01768/OUT) makes no provision for direct bus services to the site, and no provisions are made for the delivery of dedicated bus lanes along the A414. This will severely limit opportunities for employees to utilise sustainable transport.	*ECC / CCC will continue to work closely with the developers for both sites, to ensure an integrated and coordinated approach, and joint commitment to delivery of necessary sustainable and active mode infrastructure.* *Strategic Growth Site Policy 16b does not require the development to provide a 60% mode share for active and sustainable travel. The policy does require the developer to:*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			- *Develop a movement Strategy outlining the necessary transport interventions* - *Provide well-connected and integrated internal road layouts which allow good accessibility for bus services and bus priority measures* - *Provide safe and convenient pedestrian and cycle connections within the site and to the wider area including to local bus stops, Sandon Park and Ride, Woodhill Road, routes associated with the East of Chelmsford allocations including East Chelmsford Garden Community (Hammonds Farm) and Danbury and the east of the site* - *Maximise the use of public transport within the site and to key destinations* - *Provide safe multi-user crossings of the A414.* *ECC is presently drafting its response to the outline planning application. Initial comments are generally supportive in that the application is seeking to demonstrate it meets the policy requirements as set out above.* *With regards to passenger transport the application seeks to provide active travel links to the Sandon Park and Ride given its proximity. There could be provision for a more bespoke and flexible Demand Responsive Transport service for the site, which can be progressed through the Travel Plan.*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			Consequently, ECC does not consider there is a need for bus lanes in association with this site. *While the current outline application for the employment site doesn't make specific provision for a direct bus service to the site, or for delivery of a dedicated bus lane, given its close proximity to the residential site to the north, there is an opportunity to ensure the delivery of high quality infrastructure through a coordinated approach with the Hammonds Farm residential site to the north.* *Given that both sites are in the Local Plan, this provides an opportunity for a joint approach to obtaining funding and delivering the required infrastructure that will service the needs of both sites.*
19.	Severance of employment site on land east of A12.	It is evident that the land to the east of the A12 is severed from the main urban area of Chelmsford, and despite the aspiration to achieve linkages, this will be challenging to deliver in practical terms, to ensure safe, convenient and welcoming active travel connections.	*There are recognised opportunities with development to the eastern edges of Chelmsford, including the following:* 1. *Multiple sites included within the Local Plan – this means that there is an opportunity for an integrated approach to the delivery of active and sustainable transport measures for both sites. ECC and CCC will work to ensure that the planning applications are looking at this opportunity cohesively* 2. *Close proximity to existing Park & Ride site and opportunities for expansion*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			3. *Existing priority bus lanes along Essex Yeomanry Way and within the city centre* 4. *Opportunities to enhance the planned sustainable links being provided by the Army and Navy Sustainable Transport Package improvements and outcomes from the Chelmsford Local Cycling and Walking Infrastructure Plans (LCWIPs).* *In addition, ECC / CCC will be working closely with the developers to ensure the successful delivery of proposed additional key infrastructure, such as the provision of a bus, walking and cycle-only bridge link over the A12 connecting the developments to the western side of the A12, and provision of an Eastern Orbital Route serving as a bus corridor enabling access for proposed new bus services to Beaulieu Park Rail Station.* *As stated in Strategic Policy S9 – Infrastructure Requirements, paragraph 6.91 – more detailed analysis of traffic impacts and mitigation options testing will be required through the preparation of Transport Assessments/Statements as part of the future masterplan process and planning applications. This will include safe, convenient and welcoming active travel connections, with cycling routes being required to be consistent with LTN 1/20 standards.*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
Comment by: Gladman Developments Ltd – Comment ID: PSQ25-6320			
20.	Para 4.3.12 to 4.3.18: Questions around the robustness of modelling & highways impact of the development of up to 4,500 dwellings, 3,000 in the plan period.	The robustness of the modelling assumptions used to justify approximately 75% of new housing allocations in this location is questionable given the long-term nature of this site and the reliance on infrastructure improvements that are yet to exist.	*The modelling approach and associated assumptions used in the TIA (T006), are understood to be commensurate with the strategic nature of the Local Plan appraisal.* *More detailed, local modelling will, however, be expected from developers as part of the planning application process, with a requirement to demonstrate that effective infrastructure is identified and delivered to mitigate the impact of the development.*
21.	Lack of detailed modelling at the Boreham Interchange	Gladman have significant concerns that a decision has been made to not model the capacity performance of the Boreham Interchange for the Local Plan sensitivity test scenarios without capacity improvements associated with the widening of the A12. The National Highways AECOM (A12 widening DCO) study did not account for the impact of Local Plan Review development trips from the proposed Hammonds Farm site accessing the Boreham Interchange directly via a new access arm on Generals Farm Roundabout.	*Conclusions from the Local Plan Pre-Submission modelling reported in the TIA (T006) determined that the A12 widening Development Consent Order (DCO) capacity improvements at the Boreham Interchange were required as a minimum. It was therefore considered unnecessary to model the impact of Local Plan Review development without these improvements as the existing layout would have been modelled as significantly over-capacity.* *A desktop assessment was undertaken to look at the potential impact of the additional Local Plan Review development on the A12 J19 Boreham Interchange, using the local junction modelling work carried out for the A12 widening DCO and accommodating the change in flow at the junction associated with Local Plan development from the Pre-Submission strategic modelling.*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			The impact of Local Plan development at Junction 19 has been assessed in more detail by consultants SLR on behalf of Hammonds Farm developers. This work is currently being reviewed by CCC, ECC and National Highways. Specific mitigation proposals will be assessed in more detail as part of the masterplan and planning application stages.
Comment by: Maldon District Council (MDC). Comment ID: PSQ25-4934			
22.	Impact of additional traffic on the A12, from sites 16a and 16b, and knock-on impact of re-routing traffic through Maldon	The Transport Impact Appraisal of Preferred Spatial Approach, March 2024 (T006) notes that: Of the Local Plan development allocated in the preferred spatial approach on greenfield sites outside of the city centre, only Hammonds Farm and the employment site adjacent to the A12 J18 are shown in the modelling to generate vehicle flows of sufficient volume to impact traffic conditions significantly on the surrounding road network'. This site allocation could therefore impact on businesses within Maldon and the local road network around Maldon, as currently any issues on the A12 result in traffic travelling through Maldon instead. The higher volume of traffic could negatively impact on the local road network. The roads that could be impacted are the A414 leading from this site towards Maldon, the Duke of Wellington mini roundabout at Hatfield Peverel including the accesses on and off the A12 at this location and an increase in traffic on the A130, which provides access to Chelmsford for the south and east of the Maldon district. These roads already hold high levels of traffic and consideration should be given to the impacts	*The strategic modelling presented in the TIA (T006) includes a high-level assessment of cross-border impact, considering the increase in traffic flows on main routes between Chelmsford and Maldon District, and the impact of proposed development traffic on routes into/out of Maldon District – including those using local and rural rat-run routes. The strategic modelling has highlighted the broad potential impact of Plan development, which will be used as evidence to ensure that developers of sites along the A12 corridor assess and mitigate the specific impact of development flows on local routes.* *Strategic Growth Site (SGS) Policy 6 – North East Chelmsford (Chelmsford Garden Community), as well as SGS Policy 16a East Chelmsford Garden Community (Hammonds Farm) requires the developer to implement measures to enable travel by active and sustainable modes and that offer travel choice for people by non-car modes including a network of mobility hubs to enable a*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
		on these roads if the A12 widening scheme is not granted funding. There is also concern regarding the impact on roads within the Maldon district, such as Broad Street Green and Goldhanger Road, which links the north of Maldon with the A414 and the strategic road network. These roads are already significantly impacted by the increasing number of vehicles that use them. It is therefore requested consideration is given to the impacts on the local road infrastructure.	*60% share for active and sustainable transport modes.* *SGS Policy 16a requires the Garden Community to be comprehensively planned with a range of on-site land uses and facilities designed through its masterplanning to maximise opportunities for active and sustainable travel, following Town and Country Planning Association (TCPA) Garden City Principles, in particular the principle requiring `Integrated and accessible transport systems, with walking, cycling and public transport designed to be the most attractive forms of local transport'. Requirements are included the policy site masterplanning principles.* *Any Transport Assessment (TA) will be required to have regard to the ECC 'Transport Assessment Guide for Large-Scale Developments and Garden Communities: A Guide for Developers'. The TA must demonstrate how the development will identify and provide active and sustainable transport measures that achieve mode share targets and will be required to ensure that the site is accessible by a choice of modes other than the private car, including cycling, walking and public transport. This will be implemented at the planning application stage.* *The Travel Plan Guide for Large-Scale Developments and Garden Communities provides more detailed guidance regarding the implementation/monitoring stages than previous*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			guidance. Every large scale or garden community residential site has a mandatory target of 60% of trips to and from and within the site to be made by non-car means within five years of build out, unless otherwise agreed. This target is in line with the recommended TCPA modal share target. Interim targets, starting at not less than 50%, may be considered as part of the Travel Plan. This will be implemented at the planning application stage. *The monitoring of Travel Plans will be more rigorous than previously, including the establishment of a quarterly Transport Review Group.* *There will be;* ○ *regular bi-monthly meetings with the onsite Residential Travel Plan Co-ordinator (RTPC) to track progress including,* ○ *monitor and review mode share targets, including trigger points for phases of development, as identified in the Transport Assessment and Travel Plan informed by annual traffic surveys;* ○ *review of the S106 to ensure annual targets have been met or to amend requirements* ○ *co-ordinate other activities including promotional event days to encourage the take up of active and sustainable travel modes; undertake residents surveys; monitor uptake of Residential Travel Information Packs and season tickets.*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
Comment by: Boreham Parish Council. Commend ID: PSQ25-3149			
23.	60% modal shift policy and parking provision	The Local Plan's assumption of a 60% modal shift and reduced car parking provisions for a 3,000-house development (Strategic Growth Site 16a) is concerning, as similar strategies have led to significant issues elsewhere. For instance, in the UK, the 'Space to Park' report highlights that inadequate residential parking can result in parking overspill into neighbouring areas, increased illegal or unsafe parking blocking pavements and emergency access routes, and knock-on effects for existing communities. These examples underscore the potential pitfalls of underestimating parking needs in new developments, leading to unintended consequences for both residents and neighbouring communities.	*There is no reduction in car parking provision proposed for Strategic Growth Site 16a.* *The Travel Plan Guide for Large-Scale Developments and Garden Communities provides more detailed guidance regarding the implementation/monitoring stages than previous guidance. Every large scale or garden community residential site has a mandatory target of 60% of trips to and from and within the site to be made by non-car means within five years of build out, unless otherwise agreed. This target is in line with the recommended TCPA modal share target. Interim targets, starting at not less than 50%, may be considered as part of the Travel Plan. This will be implemented at the planning application stage.* *The monitoring of Travel Plans will be more rigorous than previously, including the establishment of a quarterly Transport Review Group.*

24.	Growth Site Policy 9a – Waltham Road Employment Area.	Concerns around the inclusion of this site as an employment area. Response states it should be removed from the Pre-Submission document for a number of reasons outlined in the detailed comment. Reasons related to highway / traffic impact include the following: • It would generate additional traffic movements on top of those already proposed due to the A12 widening scheme and the closure of junction 20a. The A12 widening scheme is already planned to increase traffic through	*It is acknowledged, and evidenced by the TIA (T006), that development close to the A12 corridor could cause an increase in re-routing of traffic through villages, including Boreham, Sandon and Little Baddow.* *Reducing the impact of future development on the local road network is a priority for ECC / CCC, with close working with developers to ensure*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
		Boreham by up to 50%, to propose even further traffic movements and particularly Heavy Goods Vehicles would be a mistake. • Because of recent local development and the A12 widening scheme National Highways predict the junction of Waltham Road and Main Road to be beyond capacity within the life of this proposed Local Plan. • A travel plan will not promote alternatives to the use of private cars and is not enforceable. Currently the majority of employees and users of the existing industrial estate arrive by motor vehicle, which are parked, either on site or on Main Road opposite the old Cock public house due to congestion when arriving or leaving the site. • Existing cycle and pedestrian walkways are poorly maintained this will not change. • Any additional highway works would adversely infringe on the rural setting of this country road	*commitment to the delivery of adequate sustainable and active travel infrastructure to limit the impact of these developments on the local road network in Boreham.* *Strategic Policy S9 – Infrastructure Requirements, paragraph 6.91 states that more detailed analysis of traffic impacts and mitigation options testing will be required through the preparation of Transport Assessments/Statements as part of future planning applications.* *In addition, Strategic Policy S16 – Connectivity and Travel requires new development to be designed to provide for attractive, safe, convenient, inclusive, high quality and well-designed walking and cycling networks with supporting facilities. Paragraph 6.71 requires these to be consistent with LTN 1/20 – Cycling infrastructure design (2020) namely coherent; direct; safe, comfortable and attractive.* *Specific measures will be agreed through the masterplanning and planning application stage, both of which are required to be approved by the City Council, with sufficient commitment towards mitigation being sought from developers as part of the Plan process.* *Findings from the TIA demonstrate the need for investment in the strategic road network around Chelmsford to protect local areas and enable the delivery of longer-term growth. ECC / CCC will*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			continue conversations with National Highways to ensure this is a priority. *The form and extent of highway works, active travel measures and/or Travel Plan initiatives will be considered in the context of their setting and their need.*
Comment by: Mrs Helen Taylor. Comment ID: PSQ25-6479			
25.	Safety concerns along B1008 in Ford End show that further development is not appropriate	Comment in response to development along a stretch of the B1008 in Ford End which suffers from accidents. Over last 18 years we have seen crashes, speeds and dangerous overtaking as cars enter the village and with established poor visibility by highways. There are no options which are viable which would make it a safe enough road to house people on. Modifications of the road are not permitted due to its PR1 status.	*ECC has to be data driven and provide resource and solutions in areas where there are high numbers of collisions together with people being seriously and fatally injured. Whilst it is acknowledged that there have been several collisions at this location over the past decade (as provided by the residents), unfortunately this is also the case for thousands of other locations across Essex when looking at 10-15 years of collision data.* *Due to limited budgets and current safety engineering funding arrangements, the Highways Authority has to look at the most recent 3 years collision data and undertake analysis and draw conclusions from that data set.* *By way of explanation for the disparity between the information from residents and the information Essex County Council has on record, the police and ambulance service may have attended certain collisions, but these may have not been physically recorded as injury collisions and are deemed as 'damage only' collisions.*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			Any access arrangements would need to be compliant with design regulations and go through appropriate Road Safety Audits. This would be undertaken via the planning application stage.
Comment by: Vistry. Comment ID: PSQ25-6378			
26.	Infrastructure requirements for Strategic Growth Site 10	Infrastructure Requirements (Strategic Policy S9) – Strategic Policy S9 - the 9th bullet point relates to capacity improvements on the A132 'including' junction improvements. The evidence submitted with the recent planning application, however, demonstrates that it is the junction improvements that provide the necessary increase in capacity on the highway network, and that there is no need for any other form of capacity improvement on the A132 corridor. The reference should therefore be amended to refer to 'Improvements to A132 junctions between South Woodham Ferrers and Rettendon Turnpike to increase capacity'.	*The response by Vistry relates to the wording in the Regulation 18 Preferred Option Local Plan for Policy SGS 10 - North of South Woodham Ferrers, Site infrastructure requirements, bullet 5.* - *Capacity improvements to the A132 between Rettendon Turnpike and South Woodham Ferrers, including necessary junction improvements* *A modification was made to Policy SGS 10, Site infrastructure requirements, bullet 5 in the Pre-Submission Local Plan which is consistent with the suggested amendment to read:* - *Improvements to the A132 junctions between South Woodham Ferrers and Rettendon Turnpike to increase capacity*
Comment by: National Highways. Comment ID: PSQ25-6446			
27.	Requirement for Lorry Parking allocation – close to Strategic Road Network	Lorry parking is a national problem and particularly in the East of England. National Highways would welcome the investigation and allocation of a dedicated lorry parking facility within local plans Ideally close to the SRN. If this was not possible, a policy of requiring adequate lorry parking and lay over facilities at proposed employment sites and roadside service facilities would be welcomed.	*Paragraph 7.390 of the Pre-Submission Local Plan includes reference to other complementary uses, including roadside facilities, may be appropriate on Strategic Growth Site 16b.* *The request for a specific allocation for lorry parking at this stage of the Local Plan is not feasible*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			but CCC will continue to work closely with National Highways on this matter to assist them in their need to provide such facilities.
28	Use of microsimulation modelling to assess Local Plan impact along A12 corridor (as set out in AECOM note: TN02RevA and TN06 attachments)	Although not critical to the acceptability of the Local Plan at this stage, the following are recommended: - Microsimulation modelling should be used to assess the impacts of Local Plan development at A12 Junctions 17-19. - The impact of the increase in queue length on the overbridge should be considered in the junction modelling of A12 Junction 18 (unless the modelling is superseded by the microsimulation modelling currently being undertaken by a third party). - It should be clarified whether any post-opening traffic data has been collected at A12 Junction 19 for consideration within any future modelling (unless the modelling is superseded by the microsimulation modelling currently being undertaken by a third party).	*A forecast-year microsimulation modelling assessment of the A12 corridor including Junctions 17-19 has been undertaken by consultants SLR on behalf of Hammonds Farm developers. This work is currently being reviewed by CCC, ECC and National Highways.* *The developer-led microsimulation modelling is intended to expand upon rather than supersede the strategic and local junction modelling presented in the TIA (T006), due in part, to the differences in the modelling assumptions used.*
29	How junction modelling traffic flows have been derived (as set out in AECOM note: TN02RevA)	Although not critical to the acceptability of the Local Plan at this stage, it is recommended that more information should be provided with regards to the method of deriving the junction modelling traffic flows from the traffic count data at A12 Junction 18 so that this can be checked, (unless the modelling is superseded by the microsimulation modelling currently being undertaken by a third party).	*Traffic flows used in the base junction model validation were obtained from count data collected at the junction in September 2024. 2041 forecast matrices were derived from cordoned flows taken from the Chelmsford VISUM model.* *The developer-led microsimulation modelling is not intended to supersede the junction modelling found in the TIA (T006). Despite any difference in*

Table Item ID:	Summary Point:	Summary of detailed representation made:	Response:
			modelling approach and assumptions used, the expectation is for overall findings/conclusions at A12 Junction 18 to be broadly consistent. However, if the detail of forecast traffic volumes and patterns at the junction require further investigation, ARCADY junction model output files and demand inputs can be provided from the TIA appraisal for further checking.
30	Reference to DfT Circular 01/2022 (as set out in AECOM note: TN02RevA)	Although not critical to the acceptability of the Local Plan at this stage, it is recommended that reference should be made to DfT Circular 01/2022 'The Strategic Road Network and the Delivery of Sustainable Development', alongside Highways England's (now National Highways) 'The Strategic Road Network: Planning for the Future (A guide to working with Highways England on planning matters)' within the modelling.	*An updated version of the TIA (T006) will be published with appropriate references made within the modelling to the DfT Circular 01/2022 alongside Highways England's (now National Highways) 'The Strategic Road Network: Planning for the Future'.*
31	Updating of the IDP (as set out in AECOM note: TN02RevA)	The Infrastructure Delivery Plan (IDP) should be updated to reflect the preferred option strategy and any mitigation measures identified on the National Highways network should be included.	*The IDP has been updated to reflect the latest Local Plan and the currently identified mitigation measures.*

Appendix 3: Letter from Promotors of Growth Site Policy 11c – Land west of Barbrook Way, Bicknacre (October 2024)

WELBECK STATEGIC LAND V LIMITED

6TH FLOOR, ONE LONDON WALL, LONDON, EC2Y 5EB TEL: 020 7529 3800

By email only:
Jeremy.Potter@chelmsford.gov.uk

28th October 2024

Dear Jeremy,

Re: Land West of Barbrook Way, Bicknace (Draft Allocation 11c)

Further to our discussions, I write in relation to the above draft allocation, and in response to some third party comments received as part of the Preferred Options Consultation on the Local Plan Review that closed in June 2024. It is understood that concerns have been raised in relation to access being deliverable from Barbrook Way. This Statement seeks to provide comfort that the site is deliverable.

For context prior to entering the Promotion Agreement for the land Welbeck Land undertook significant due diligence into potential access points for the development. This included a detailed topographical survey and significant investigation into any legal issues related to land ownership.

The results of our highways search would indicate the extent of the adopted highway does not include this sliver of land albeit due diligence is ongoing to see if the underlying s38 agreement for Barbrook Way can be secured in order to check that the highways search result is correct and the sliver of land is not, indeed, adopted.

We have also undertaken detailed investigations into any potential third parties (persons or entities) that may be able to successfully claim ownership of the land. Our research has not identified any such party that could realistically make such a claim. With this information we have been able to secure an indemnity insurance policy which benefits the development site, successors in title, service providers and alike to protect against the risk, however slim, of any third party either seeking to claim ownership of the third party strip and being successful in doing so.

These indemnity insurance policies exist precisely for such scenarios which are not unusual, particularly given errors in the mapping on Land Registry UK, often owing to many of the boundaries being drawn historically. Therefore, we strongly believe that the Council should consider this sufficient to demonstrate that the site is deliverable, and there is no reason to discount it or remove its allocation for housing in the forthcoming Plan.

Furthermore, and as provided to the Council we have to date produced several indicative masterplans of varying scale from 160 to 250 dwellings. Given our confidence in our ability to rely on Barbrook Way we have indicated this as our primary access.

However, our detailed investigations have demonstrated that alternative access points are available from Priory Road. Although it is acknowledged that this is not the Council's preferred option, it does

assist in demonstrating that the site is not ransomed. Enclosed are the alternative options for information.

Yours sincerely

Alice Lack MRTPI
Director
Welbeck Strategic Land V Limited

Executive Summary

This report sets out:

- Summary of the Focused Consultation Additional Sites (Regulation 19) Document (Additional Sites Document for short) (Section 1)
- Summary of representations received (Section 2)
- Summary of the main issues raised in the responses received on the Additional Sites Document and a high-level summary of CCC's response to the comments made, and where relevant, how they have informed any minor modifications proposed by CCC to be submitted to the Inspector examining the Plan (Section 3).

It supersedes the Focused Consultation Additional Sites (Regulation 19) Document Feedback Report published in March 2026.

The Additional Sites Document was the fourth formal stage in the preparation of the Review of the adopted Chelmsford Local Plan. It outlined additional site allocations for inclusion within the review of the Local Plan to ensure that sufficient land is identified. The additional sites comprised 11 new housing sites, three expanded housing sites and one expanded employment site. An additional sites development trajectory and key consequential plan changes arising from the additional sites allocation policies were also included in the consultation.

About the Consultation

A comprehensive seven-week programme of consultation took place during the formal consultation period from 10am on 20 November 2025 to 4pm on 8 January 2026. The consultation was promoted through a range of activities including email/letter notifications to more than 10,100 contacts registered on the Council's Consultation Portal, on the Council's website, adverts in local publications, site notices and social media. Consultation activities included placing consultation documents on deposit at the Council's Customer Service Centre, targeted presentations, stakeholder co-operation meetings and public exhibitions.

Summary of responses to the Additional Sites Document

A total of 1,082 duly made comments were received to the consultation from 780 respondents, including a petition signed by 178 individuals. The respondents are from a wide variety of groups and individuals including residents, developers, landowners and their agents, businesses and statutory bodies such as other local authorities and Parish/Town Councils. All the comments received can be viewed on the Council's Consultation Portal. An overview of the main issues raised to the plan is provided below:

- A good level of feedback was received, ranging from general comments to observations on detailed policy wording
- Most Government agencies or national bodies support the plan outright or offer qualified support subject to some minor proposed amendments to some sites

- Parish Councils mainly oppose, with many suggesting changes including the deletion of site allocations
- Most public comments were objecting to one or more of the additional sites, though there was limited support
- Mix of support and opposition to the proposed changes to the development requirements (Policy S6) and the Spatial Strategy (Policy S7)
- Concerns that the Spatial Strategy (Policy S7) is too reliant on larger strategic sites particularly the Garden Communities, has an insufficient supply buffer, doesn't meet the housing needs in the Standard Method, and is too reliant on windfall sites
- Concern there is not enough employment sites to align with the housing growth proposed
- Concerns there are not enough small site housing allocations which does not accord with national policy requirements
- Calls from developers for Green Belt, Grey Belt and Green Wedge reviews to identify sustainable development opportunities in these areas
- Concern over the build out rate and delivery periods for sites from the development industry
- Some in the development industry call for an immediate/earlier review of the plan to meet housing needs in full as soon as possible
- Some detailed wording changes requested to site policies from minor changes to the deletion of policy requirements
- Broad support from the promoters of allocated sites with some requests for higher capacities, larger site areas, and policy requirement changes
- Some further alternative site allocations promoted by landowners/developers at a range of site sizes and locations
- High level of objections to some site locations in particular Land west of Patching Hall Lane (SGS19) which received a petition against it, Land west of Barbrook Way in Bicknacre (SGS11c) and the three sites in East Hanningfield (SGS17c, SGS17d, GS17e), for multiple reasons including traffic, infrastructure, landscape and flood risk impacts and calls for their removal
- Concerns from Broomfield and Boreham Parish Councils and the public that some site allocations do not reflect 'made' or progressing Neighbourhood Plans
- Criticism from some Parish Councils and the public regarding the consultation including a lack of adequate engagement, inaccessible information and that the process for making comments was too complicated.

Commentary on main issues raised and CCC response

The 'CCC response' tables provide a high-level response to the main issues raised within the comments throughout this report. A high-level commentary on the main issues raised in the representations to the Additional Sites Document is set out below:

Site allocations

- The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan

preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process. With the inclusion of the additional sites identified in this Additional Site Document the development requirements can be met within the Local Plan without needing to undertake a Green Belt review. This approach accords with National Planning Guidance, the adopted Local Plan, and the evidence base

- Impacts on the historic environment and landscape will be minimised through the masterplanning and mitigation strategies. The flood risk assessment shows that development would be directed to the areas at lowest risk of flooding. A wide range of site infrastructure is proposed through the requirements of the policy.

- Sites are supported by the plan evidence base including a Strategic Flood Risk Assessment, Landscape Sensitivity, Archaeology Assessment and Capacity Study, Heritage Impact Assessment, and traffic modelling. The Additional Sites Housing Site Studies (October 2025) considers that there are no overriding site constraints which mean that the sites are unsuitable or undeliverable.

- Site allocations are strategic matters for the Local Plan, but where applicable the made Neighbourhood Plans include detailed design and other guidance which can influence future detailed development proposals and planning applications.

- Where relevant minor modifications will be proposed to sites which are set out in the Schedule of Proposed Modifications (May 2026) which will accompany the Plan when submitted for Examination.

Consequential Changes - Housing and Employment requirement and delivery

- At the time the Pre-Submission Consultation was carried out (using the Council's Five-Year Housing Land Supply Methodology - April 2024) the Council could demonstrate a Five-Year Housing Land Supply at the point of submission of the Plan. Following the Pre-Submission Consultation the Council's Five-Year Housing Land Supply (based on the August 2025 Housing Site Schedule) showed that at the point of submission (Years 2 – 6) it was estimated to be 8,010 dwellings. Using the August 2025 Housing Site Schedule, it was estimated that the housing requirement figure for the Five-Year Housing Land Supply calculation would be 1,622 dwellings per annum on submission. This was based on the proposed Housing Requirement figure of 1,210 dwellings per annum, the estimated shortfall in housing completions from the new base period of the emerging Local Plan (1,672 dwellings) and the required 5% buffer to ensure choice and competition in the market for land. Based on these figures this would only be 4.93 years of housing land supply (8,010/1,622) on submission. As a result of this the Council undertook an Additional Site Consultation which seeks to rectify this situation and demonstrate that the Local Plan will meet its Five-Year Housing Land Supply

at the point of submission. Using the latest housing supply figure in the April 2026 Housing Site Schedule (8,962), and the updated housing requirement figure (including the actual shortfall of 1,783 dwellings that reflects 407 net new completions in 2025/26), the revised Five-Year Housing Land Supply Calculation including a 5% buffer is 5.45 years (8,962/1,645). The housing requirement in the plan meets at least 80% of the revised standard method housing need in line with the Government's latest plan-making transitional arrangements. This is consistent with the NPPF's objective of preparing and maintaining up to-date plans in order to make consistent provision for housing and other needs.

- There is no longer a national requirement for a supply buffer to be allocated with the risks to supply instead managed through the need to maintain a 5-year land supply and the Housing Delivery Test. A range of development quantums, broad distributions of development and site options available have been tested through the IIA. It is considered that an appropriate range of realistic options and reasonable alternatives have been tested through this iterative process. The NPPF directs Local Planning Authorities to consider historic windfall delivery rates. The Submission Housing Topic Paper shows trends over a considerable length of time and that assumed average rates are below the actual average allowing a higher figure to be predicted. The 'small sites' (under 1ha) are an important part of the Plan to ensure delivery of a variety of sites in a timely manner. This is not only to be met through allocations, but also a combination of windfall sites and custom build housing.

- Delivery rates are set out in the Local Plan Housing Trajectory and are established through the Council's Five-Year Housing Land Supply Methodology. The Trajectory is updated annually, and the Additional Sites Document used the latest available Housing Site Schedule (August 2025). Minor modifications will be proposed to the Trajectory to reflect the latest published Housing Site Schedule ahead of submission (April 2026). A number of Strategic Growth Sites rolled forward from the adopted Local Plan including greenfield sites have planning permission or resolutions to grant planning permission including North of South Woodham Ferrers, North of Broomfield and North East Chelmsford.

- The plan exceeds the minimum employment requirements in the Chelmsford Employment Land Review (including the 2023 Report and Focused Update 2024) over the plan period through flexible site allocations across a range of different locations and sizes alongside existing commitments.

Duty to Co-operate and Consultation

- Key bodies were consulted on strategic matters, including Essex County Council, adjoining local authorities, Historic England, Natural England, and the Environment Agency. A total of 7 of these bodies responded to the consultation. Although the formal Duty to Co-operate has now been removed, the Council has co-operated with a range of bodies on strategic planning

matters on an on-going basis as evidenced in the Duty to Co-operate Position Statements (evidence base documents DTC001, DTC002 and DTC005), and Statements of Common Ground including those with adjoining authorities who had previously asked for their unmet needs to be considered. A Statement of Co-operation will be published to accompany the Local Plan Submission.

- The consultation exceeded requirements set out in legislation and the Council's Statement of Community Involvement. A full schedule of engagement activity is included in Section 1 of this report, and included direct notification, events, and publications which are included in Appendix 1. In addition, detailed step-by-step guidance for using the consultation portal was published specifically to guide users on how to make comments on the consultation events.

Next Steps

This report, and the previous Pre-Submission Regulation 19 Document 'You Said We Did' Feedback Report, will be presented in the Regulation 22 Consultation Statement which will accompany the plan when submitted for Examination.

Introduction

The Focused Consultation Additional Sites (Regulation 19) Document (Additional Sites Document for short) was the fourth formal stage in the preparation of the Review of the adopted Chelmsford Local Plan. It outlined additional site allocations for inclusion within the review of the Local Plan to ensure that sufficient land is identified. The additional sites comprised 11 new housing sites, three expanded housing sites and one expanded employment site. An additional sites development trajectory and key consequential plan changes arising from the additional sites allocation policies were also included in the consultation.

The consultation was undertaken in accordance with Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012 and was preceded by a Pre-Submission Local Plan, which was also undertaken in accordance with Regulation 19 earlier in 2025, and an Issues and Options consultation in 2022 and Preferred Options consultation in 2024 both undertaken in accordance with Regulation 18 of the Town and Country Planning (Local Planning) (England) Regulations 2012.

Purpose of this 'You Said We Did' Feedback Report

This report sets out the consultation feedback received on the Focused Consultation Additional Sites document from a wide variety of groups and individuals including:

- Residents
- Developers/landowners and their agents
- Businesses
- Statutory bodies such as local authorities, Parish/Town Councils and utilities.

This report is constructed in four parts:

- An Executive Summary includes an overview of the main issues and a commentary on them
- Section 1 provides a summary of the consultation undertaken
- Section 2 gives a summary of the representations received
- Section 3 provides a summary of the main issues raised in the responses received on the Additional Sites Document and a high-level summary of CCC's response to the comments made, and where relevant, how they have informed any minor modifications proposed by CCC to be submitted to the Inspector examining the Plan. The report is set out in Additional Sites Document order and therefore the policy numbers may not be in sequence.

This report supersedes the Focused Consultation Additional Sites (Regulation 19) Document Feedback Report published in March 2026.

Section 1: Summary of Consultation Undertaken

A comprehensive seven-week programme of consultation took place during the formal consultation period from 10am on 20th November 2025 to 4pm on 8th January 2026.

This programme of consultation followed (and exceeded) the requirements set out in legislation, and the commitments in the Council's adopted Statement of Community Involvement (November 2025).

The documents published for consultation on 20th November were:

- Focused Consultation Additional Sites (Regulation 19) Document; and
- Integrated Impact Assessment Focused Additional Sites (Regulation 19) Addendum (subject of a separate Feedback Report).

These documents were placed on deposit at CCC Customer Service Centre, with electronic versions available to view at most Parish/Town Council offices and local libraries across Chelmsford.

The Council notified more than 10,100 contacts registered on its Consultation Portal. These included the public, statutory agencies such as Essex County Council and Town/Parish Councils, utility companies, businesses, interest groups, and voluntary and community bodies. Council Members and staff were also notified.

A number of consultation events were arranged:

- Three staffed exhibitions, visited by 30 attendees
- 15 days of unstaffed exhibitions
- Four pop-up displays for the whole consultation period
- Targeted presentations including a Parish/Town Council Forum, Agent/Developers Forum and Local Authority Duty to Co-operate meeting
- A bespoke Local Plan video, attracting 1,200 views since its launch in 2024.

Printed/online materials and advertisements were produced as follows:

- Web page with the consultation documents and links to supporting information including the exhibition panels, attracting 5,270 visits
- Advertisement in a local newspaper (Essex Chronicle), and the South Woodham Focus (independent community magazine)
- Information packs for all of Chelmsford's 29 Parish/Town Councils
- Three e-shot digital campaigns sent to around 15,000 subscribers
- Three City Life articles with 710 views
- Five social media posts/stories/feeds/adverts gaining over 109,000 views
- 138 posters distributed to Parish/Town Councils, CCC offices and leisure facilities, post offices, doctors' surgeries, churches and local shops
- Summary newsletters available at public exhibitions and on request
- 80 site notices placed across 11 new and four expanded proposed site allocations
- 27 digital screens at CCC venues
- Seven digital screens at bus stops
- Staff e-mail banner and website banner.

A list of organisations consulted, and copies of key consultation materials are given in Appendix 1.

Integrated Impact Assessment Focused Additional Sites Addendum

The Integrated Impact Assessment Focused Consultation Additional Sites Addendum (IIA) was also subject to consultation at the same time. The IIA brings various strands of assessment together, consisting of the Sustainability Appraisal, Strategic Environmental Assessment, Habitats Regulations Assessment, Health Impact Assessment, and Equalities Impact Assessment. Feedback on this document is summarised in a separate report prepared by the Council's IIA Consultants.

Call for Sites and Strategy Housing and Employment Land Availability Assessment (SHELAA)

In addition to the Local Plan and IIA consultations, the Council undertook a Call for Sites to identify available land for consideration for future development. Six new submissions and six amendments to existing sites were submitted through this process. These have been assessed in an updated Strategic Housing and Employment Land Availability Assessment (SHELAA).

Section 2: Summary of Representations Received

For this report, people and organisations who made a comment to the consultation are called ‘respondents’.

Methodology

Respondents had a choice of ways to make their comments, by:

- Answering questions using a stand-alone online questionnaire published on the consultation portal
- Sending written comments in an e-mail
- Sending written comments by post.

The consultation questions focused on whether the Council had met the legal requirements (including the duty to co-operate) and whether the plan meets the tests of soundness set out in the National Policy Planning Framework – that it is positively prepared, justified, effective and consistent with national policy.

Whichever method respondents used, all comments have been entered into the Council’s Consultation Portal.

Where respondents did not state which section/policy or site they were commenting on, officers have assigned responses to the most relevant part of the Additional Sites Document.

If questions were not answered by a consultee selecting a box, the Council has not sought to tick any boxes to avoid any misrepresentation.

To ensure proper consideration of issues, respondents have been divided into types depending on their interface with the Council. Some fall into more than one category, so totals may exceed the overall number of respondents. Similarly, some respondents made their comments via more than one method so the totals for how comments were made is greater than the total number of comments received.

The assessment of responses is high level and focuses on the main issues raised, rather than the number of representations to any individual question. Where many people have made a similar main issue, these have been summarised as one main issue.

Overview of responses

A total of 1,082 duly made comments were received to the consultation from 780 respondents, including a petition signed by 178 individuals. The comments were received across a number of the new sites with the sites attracting the most comments being SGS11c (Barbrook Way), three sites in East Hanningfield, SGS10 (Rettendon Place), SGS18a (North West of Chelmsford), and SGS19 (West of Patching Hall Lane). The petition expresses opposition to proposed development at SGS19 (West of Patching Hall Lane).

Comments by respondent type:

Type of Respondent	Explanation	Number of Respondents
Duty to Co-operate (DTC) bodies	Key bodies consulted on strategic matters, including Essex County Council, adjoining local authorities, Historic England, Natural England, Environment Agency	7
Specific bodies/groups	Parish/Town Councils, utility bodies, health and transport consultees etc	27
General and Other bodies/groups	Voluntary groups, religious groups, housing providers, businesses etc	15
Developers/landowners	Landowners, promoters of land and their agents	46
Public	Individual members of the public	695

How people made their comments:

Method of making comments	Number of Comments	Percentage (rounded)
Online Consultation Portal	445	41%
E-mail	461	43%
Letter	176	16%

The number of representations made to each question are shown in the tables below. These record where people selected an option, and/or where they made a written comment. The figure in brackets represents the percentage of total representations. It should be noted that the number of responses received to each question will not amount to the totals set out above as people did not have to answer every question.

Question 1: Do you consider the Local Plan legally compliant in accordance with the Town and Country Planning (Local Planning) (England) Regulations 2012?	
	Reps received
Yes	322 (30%)
No	103 (10%)
No Response	657 (60%)
Question 1a: Please provide an explanation below	
Response	164 (15%)
No Response	918 (85%)
Question 1b: Please set out the modifications you consider necessary to make the Local Plan legally compliant including revised wording of any policy or text.	
Response	123 (11%)
No Response	959 (89%)

Question 2: Does the Local Plan comply with the Duty to Co-operate?	
	Reps received
Yes	295 (27%)
No	123 (11%)
No Response	664 (62%)
Question 2a: Please provide an explanation below	
Response	171 (16%)
No Response	911 (84%)
Question 2b: Please outline any changes to the approach taken which you consider necessary to ensure the Duty to Co-operate is met.	
Response	131 (12%)
No Response	951 (88%)

Question 3: Do you consider the Local Plan 'sound'?	
	Reps received
Yes	70 (6%)
No	696 (64%)
No Response	320 (30%)
Question 3a: If no this is because you consider the Local Plan is NOT:	
Positively Prepared	238 (12%)
Justified	505 (25%)
Effective	540 (26%)
Consistent with National Policy	358 (17%)
No Response	412 (20%)
Question 3b: Please provide an explanation below and identify the main issues.	
Response	1,037 (96%)
No Response	45 (4%)
Question 3c: Please set out the changes you consider necessary to make the Local Plan 'sound' including revised wording of any policy or text.	
Response	584 (54%)
No Response	498 (46%)

Question 4: If your representation is seeking a change, do you consider it necessary to take part and speak at the Examination?	
	Reps received
Yes	139 (13%)
No	307 (28%)
No Response	636 (59%)

Question 6: Do you wish to be notified of the following:	
	Reps received
Submission of the Local Plan for Examination	429 (22%)
Publication of the Inspector's Report	444 (23%)
Adoption of the Local Plan	424 (22%)
No Response	633 (33%)

*Note that these percentages will not all total 100% as respondents were able to tick as many options as they felt applicable.

A small number of representations were received after the closing date. Those that were received by email by 11.59pm on 8 January 2026 were deemed ‘duly made’ to allow for any potential delays in emails reaching the Council’s mailbox. These have been analysed and included in the figures in this report. Others received after 8 January were deemed not ‘duly made’.

29 of the representations were partly ‘inadmissible’ due to their content, so the comments have been included but with the inadmissible part redacted. An additional 14 representations had no address details and were not accepted.

All the comments received can be viewed in full on the Council’s planning policy consultation portal.

When viewing the portal, you will see the list of recent consultation events. Events which are open for consultation show a green timeline and the word ‘open’. Those which are closed show a red timeline and the word ‘closed’.

To view comments, you need to:

- Choose the event you would like to view comments for
- Select 'learn more' to open the event page
- Click on the ‘what people say’ tab to display a list of all the comments.

You can read all comments, or sort by name or date we received them. Where additional information such as reports or maps were submitted with a comment, these are listed at the end of the comment in PDF format and can be viewed or downloaded.

You can find out more about using the consultation portal in our guidance notes.

Section 3: Summary of the main issues raised

This section contains a high-level summary of the main issues and changes requested in the Additional Sites Document order.

It specifies who has made comments from public sector bodies, infrastructure or service providers and developers/landowners in brackets at the end of relevant bullet points in the 'Summary of Representations' text. This is because it is useful to understand the nature of respondents, particularly where a stakeholder has a legal duty or responsibility over a matter that they are making comments about. It does not specify who has made comments from members of the public as to do so would result in a very long report, so bullet points from the public do not have names in brackets.

It should be noted that in some cases, members of the public raised similar points to stakeholders. To avoid duplication, these comments have not been repeated in the public comments. However, this does not affect the consultation process as this report focuses on the main issues received rather than the number of representations to any individual section of the plan.

It is important to note that this report does not summarise every representation or identify every individual detailed issue, as the purpose is to identify main issues and requested changes. In some cases a summary is included to a question where a comment was not made directly to enable issues to be fully considered, so the number of summary points may exceed the actual number of recorded responses.

Following the summary of main issues and changes requested for each Consultation Point a 'CCC Response' table provides a high-level summary of CCC's response to the comments made, and where relevant, how they have informed any minor modifications proposed by CCC to be submitted to the Inspector examining the Plan. This includes details of the key changes proposed to be made and suggestions not taken forward and why. Similarly, the 'CCC response' tables do not provide a response to each individual comment.

The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This report entitled Essex Highways Local Plan Additional Sites – Response to Representations (March 2026) is given in Appendix 2 and includes a review and focused response to representations received relating to the transport modelling evidence base and key transportation issues raised. This has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform any proposed modifications to the Additional Sites Document.

Summary of main issues raised to the Additional Site Document

All the comments received can be viewed in full on the Council's Consultation Portal. A high-level commentary on the main issues raised in the representations to the Additional Sites Document is set out below:

- A good level of feedback was received, ranging from general comments to observations on detailed policy wording
- Most Government agencies or national bodies support the plan outright or offer qualified support subject to some minor proposed amendments to some sites
- Parish Councils mainly oppose, with many suggesting changes including the deletion of site allocations
- Most public comments were objecting to one or more of the additional sites, though there was limited support
- Mix of support and opposition to the proposed changes to the development requirements (Policy S6) and the Spatial Strategy (Policy S7)
- Concerns that the Spatial Strategy (Policy S7) is too reliant on larger strategic sites particularly the Garden Communities, has an insufficient supply buffer, doesn't meet the housing needs in the Standard Method, and is too reliant on windfall sites
- Concern there is not enough employment sites to align with the housing growth proposed
- Concerns there are not enough small site housing allocations which does not accord with national policy requirements
- Calls from developers for Green Belt, Grey Belt and Green Wedge reviews to identify sustainable development opportunities in these areas
- Concern over the build out rate and delivery periods for sites from the development industry
- Some in the development industry call for an immediate/earlier review of the plan to meet housing needs in full as soon as possible
- Some detailed wording changes requested to site policies from minor changes to the deletion of policy requirements
- Broad support from the promoters of allocated sites with some requests for higher capacities, larger site areas, and policy requirement changes
- Some further alternative site allocations promoted by landowners/developers at a range of site sizes and locations
- High level of objections to some site locations in particular Land west of Patching Hall Lane (SGS19) which received a petition against it, Land west of Barbrook Way in Bicknacre (SGS11c) and the three sites in East Hanningfield (SGS17c, SGS17d, GS17e), for multiple reasons including traffic, infrastructure, landscape and flood risk impacts and calls for their removal
- Concerns from Broomfield and Boreham Parish Councils and the public that some site allocations do not reflect 'made' or progressing Neighbourhood Plans
- Criticism from some Parish Councils and the public regarding the consultation including a lack of adequate engagement, inaccessible information and that the process for making comments was too complicated.

Summary of CCC response to main issues raised to the Additional Sites Document

The 'CCC response' tables in this section provide a high-level response to the main issues raised within the comments throughout this report. A high-level CCC response to the main issues raised in the representations to the Pre-Submission plan is set out below:

Site allocations

- The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process. With the inclusion of the additional sites identified in this Additional Site Document the development requirements can be met within the Local Plan without needing to undertake a Green Belt review. This approach accords with National Planning Guidance, the adopted Local Plan, and the evidence base

- Impacts on the historic environment and landscape will be minimised through the masterplanning and mitigation strategies. The flood risk assessment shows that development would be directed to the areas at lowest risk of flooding. A wide range of site infrastructure is proposed through the requirements of the policy.

- Sites are supported by the plan evidence base including a Strategic Flood Risk Assessment, Landscape Sensitivity, Archaeology Assessment and Capacity Study, Heritage Impact Assessment, and traffic modelling. The Additional Sites Housing Site Studies (October 2025) considers that there are no overriding site constraints which mean that the sites are unsuitable or undeliverable.

- Site allocations are strategic matters for the Local Plan, but where applicable the made Neighbourhood Plans include detailed design and other guidance which can influence future detailed development proposals and planning applications.

- Where relevant minor modifications will be proposed to sites which are set out in the Schedule of Proposed Modifications (May 2026) which will accompany the Plan when submitted for Examination.

Consequential Changes - Housing and Employment requirement and delivery

- At the time the Pre-Submission Consultation was carried out (using the Council's Five-Year Housing Land Supply Methodology - April 2024) the Council could demonstrate a Five-Year Housing Land Supply at the point of submission of the Plan. Following the Pre-Submission Consultation the Council's Five-Year Housing Land Supply (based on the August 2025 Housing Site Schedule) showed that at the point of submission (Years 2 – 6) it was

estimated to be 8,010 dwellings. Using the August 2025 Housing Site Schedule, it was estimated that the housing requirement figure for the Five-Year Housing Land Supply calculation would be 1,622 dwellings per annum on submission. This was based on the proposed Housing Requirement figure of 1,210 dwellings per annum, the estimated shortfall in housing completions from the new base period of the emerging Local Plan (1,672 dwellings) and the required 5% buffer to ensure choice and competition in the market for land. Based on these figures this would only be 4.93 years of housing land supply (8,010/1,622) on submission. As a result of this the Council undertook an Additional Site Consultation which seeks to rectify this situation and demonstrate that the Local Plan will meet its Five-Year Housing Land Supply at the point of submission. Using the latest housing supply figure in the April 2026 Housing Site Schedule (8,962), and the updated housing requirement figure (including the actual shortfall of 1,783 dwellings that reflects 407 net new completions in 2025/26), the revised Five-Year Housing Land Supply Calculation including a 5% buffer is 5.45 years (8,962/1,645). The housing requirement in the plan meets at least 80% of the revised standard method housing need in line with the Government's latest plan-making transitional arrangements. This is consistent with the NPPF's objective of preparing and maintaining up to-date plans in order to make consistent provision for housing and other needs.

- There is no longer a national requirement for a supply buffer to be allocated with the risks to supply instead managed through the need to maintain a 5-year land supply and the Housing Delivery Test. A range of development quantums, broad distributions of development and site options available have been tested through the IIA. It is considered that an appropriate range of realistic options and reasonable alternatives have been tested through this iterative process. The NPPF directs Local Planning Authorities to consider historic windfall delivery rates. The Submission Housing Topic Paper shows trends over a considerable length of time and that assumed average rates are below the actual average allowing a higher figure to be predicted. The 'small sites' (under 1ha) are an important part of the Plan to ensure delivery of a variety of sites in a timely manner. This is not only to be met through allocations, but also a combination of windfall sites and custom build housing.
- Delivery rates are set out in the Local Plan Housing Trajectory and are established through the Council's Five-Year Housing Land Supply Methodology. The Trajectory is updated annually, and the Additional Sites Document used the latest available Housing Site Schedule (August 2025). Minor modifications will be proposed to the Trajectory to reflect the latest published Housing Site Schedule ahead of submission (April 2026). A number of Strategic Growth Sites rolled forward from the adopted Local Plan including greenfield sites have planning permission or resolutions to grant planning permission including North of South Woodham Ferrers, North of Broomfield and North East Chelmsford.

- The plan exceeds the minimum employment requirements in the Chelmsford Employment Land Review (including the 2023 Report and Focused Update 2024) over the plan period through flexible site allocations across a range of different locations and sizes alongside existing commitments.

Duty to Co-operate and Consultation

- Key bodies were consulted on strategic matters, including Essex County Council, adjoining local authorities, Historic England, Natural England, and the Environment Agency. A total of 7 of these bodies responded to the consultation. Although the formal Duty to Co-operate has now been removed, the Council has co-operated with a range of bodies on strategic planning matters on an on-going basis as evidenced in the Duty to Co-operate Position Statements (evidence base documents DTC001, DTC002 and DTC005), and Statements of Common Ground including those with adjoining authorities who had previously asked for their unmet needs to be considered. A Statement of Co-operation will be published to accompany the Local Plan Submission.

- The consultation exceeded requirements set out in legislation and the Council's Statement of Community Involvement. A full schedule of engagement activity is included in Section 1 of this report, and included direct notification, events, and publications which are included in Appendix 1. In addition, detailed step-by-step guidance for using the consultation portal was published specifically to guide users on how to make comments on the consultation events.

Introduction

Consultation point	Total number of responses
Introduction	109

Summary of Representations – main issues and suggested modifications:

How can I have my say?

- Materials difficult for a layperson to understand
- Online system difficult to navigate, with some facing challenges logging in and submitting comments
- Consultation could have been more widely promoted
- Longer consultation period would have been helpful and running over the festive season limited ability of some to engage (Little Baddow Parish Council AS-332)
- Request for greater access to physical copies and in-person viewing opportunities and additional direct engagement would have been helpful.

Purpose of this document

- Support the Plan (Writtle Parish Council AS-60, Croudace Homes AS-408)
- Statutory bodies including ECC, the Integrated Care Board and National Grid Electricity support that CCC has maintained effective co-operation and

engagement and met its legal plan-making duty and Regulations (Essex County Council, AS-1119, Mid and South Essex Integrated Care Board AS-639, National Grid Electricity AS-900)

- Supports policy requirements to protect and mitigate impacts on the natural environment including designated sites, retention of natural landscaping and habitats, creating a network of multifunctional green infrastructure and SuDS. Greenspaces should be integral to initial design and delivered at first occupation to help mitigate recreational pressure on sensitive sites. Welcomes requirements for developers to assess impacts and to engage with Natural England on mitigation, 20% BNG target for Garden Communities and ensuring sufficient capacity for wastewater treatment and disposal. Habitat mitigation and creation requirements welcomed but should be expanded to encourage delivery of opportunities within the Essex LNRS (Natural England AS-1107)
- Additional housing could support current homelessness. Welcomes engagement regarding all future housing proposals (Essex Police DOCO AS-984)
- Inadequate evidence to demonstrate that Duty to Cooperate requirements have been met.

What evidence have we used?

- Requests that 'Education assessments for early years and childcare, primary and Secondary education' are added to the list of evidence used to inform the additional site allocation policies (Essex County Council AS-1120)
- Requests modifications to the IDP and Infrastructure Delivery Schedule to incorporate the requirement for developer funded police infrastructure and facilities associated with the proposed additional development (Essex Police AS-1032)
- Notes that the WCS Addendum correctly identifies that there are currently permitted Dry Weather Flow capacity limitations at the SWF WWTW. Great Leighs WWTW has limited headroom capacity and Chelmsford WWTW currently has available capacity. Disagrees with the WCS addendum methodology, including that a Q80 baseline should be used for Local Plan assessment and recommends a 5-year average is considered for reviewing DWF data, although does not consider that this would change the overall conclusions in the WCS (Environment Agency AS-733)
- National Highways is undertaking a worst-case sensitivity test to assess the maximum potential impact of traffic growth arising from the Local Plan growth on the A12 and its junctions, and further detailed traffic modelling on Junction 19, and is committed to ongoing work (National Highways AS-1099)
- The cancellation of the A12 DCO widening scheme will result in continued delays and queueing between junctions 17 and 19. No indication as to how effective interim measures to improve junction 19 will be. Plan should not be submitted for examination until sufficient funding secured for A12 improvements (Danbury Parish Council AS-420)
- Insufficient evidence in respect of the highway impacts of the Local Plan allocations, including the additional sites, having regard to the cancellation of the A12 widening (Richborough AS-388)

- Criticisms in relation to SHELAA e.g. scoring, incorrect boundary (Graham Weal AS-1072, Strutt and Parker (Farms) Limited AS-1124, Richborough AS-469, AS-970, Wates Developments Ltd AS-998, AS-1057, Crest Nicholson AS-1063, Higgins Homes AS-389)
- SHELAA scoring does not reflect site specific matters which can be appropriately addressed through careful design and mitigation (Cliffords Group Ltd AS-870).

CCC Response
The consultation exceeded requirements set out in legislation and the Council's Statement of Community Involvement
The Council has worked with statutory bodies to produce/update Statements of Common Ground for submission alongside the Local Plan.
The Council has co-operated with other bodies, including infrastructure providers on strategic planning matters on an on-going basis as evidenced in the Statement of Cooperation and Statements of Common Ground.
ECC Education Assessments are referenced as INF007 & INF008 in the evidence base.
The CCC Stage 3 Infrastructure Deliver Plan (IDP) has been updated (INF012).
The EA's comments on Q80 are noted however as part of the WCS, Anglian Water Services (AWS) advised that D90 DWF values should be used alongside the Q80 DWF values to provide a realistic overview of the situation within CCC administrative area in the short to medium term for the management of wastewater treatment and capacity.
Continued work with National Highways and Essex County Council has informed agreement that the Local Plan modelling to date indicates that the development in the Local Plan would have minimal impact upon the A12 and Junctions 17,18 and 19. Further modelling assessments with regards to these junctions are not required for the purposes of the Local Plan, and no modifications are required to be proposed to the Plan. With proportionate and reasonable mitigation strategies in place to support the Local Plan growth, development will ensure that severe impacts on the strategic highway network are avoided.
Consultations received regarding issues with site specific SHEAA assessments have been reviewed and where appropriate the SHELAA assessments have been updated.

Additional Site Allocation Policies

This section of the consultation document provides the additional site policies required to deliver the revised Spatial Strategy.

Location 1 – Chelmsford Urban Area

Strategic Growth Site Policy 1dd – Land at former Kay-Metzeler premises, Brook Street

Key statistics:

Consultation point	Total number of responses
Strategic Growth Site Policy 1dd – Land at former Kay-Metzeler premises, Brook Street	6

Summary of Representations – main issues and requested changes:

- Supports requirement to undertake a Mineral Infrastructure Impact Assessment given site's proximity within the Mineral Consultation Area for Chelmsford Railway Sidings (Essex County Council AS-1066)
- Supports the HIA and identified suitable mitigation measures, including limiting building height on western side of the site. Supports the inclusion of these as criteria within the policy and supporting text (Historic England AS-1000)
- Supports policy requirement for suitable flood risk management and SuDS, and contribution towards wider green infrastructure and would welcome reference to Anglian Water's Surface Water Risk Management Guidance in the reasoned justification (Anglian Water Services Ltd AS-1033)
- Existing surface water sewers within the site. Requirement to protect existing sewers and their easements should be included (Anglian Water Services Ltd AS-1033)
- Whilst sufficient dry weather flow capacity exists at Chelmsford WRC, developers to engage early with Anglian Water to assess a sustainable connection into the network (Anglian Water Services Ltd AS-1033)
- Site lies within the zone of influence of the Essex Coast RAMS and should include policy requirements to secure RAMS tariff payments (Natural England AS-1108)
- Early engagement encouraged with Essex Police DOCO for access, recreational space, car club and travel route matters (Essex Police DOCO AS-986)
- Objection to city centre housing which risks undermining the economy, overloading infrastructure, harming the environment, heritage, and urban character. The city centre should be used for retail, leisure, and employment uses, including redevelopment of the ex-gas site for such uses.

CCC Response
The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the current status of infrastructure across Chelmsford and identifies what new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources.
Reference to RAMS was removed from each qualifying allocation in the Plan Review to avoid repetition. Explanatory text is set out in policies S4 and DM16. Natural England agreed this in a signed SOCG dated December 2024, and have reaffirmed this position.

The Council notes the comments from Essex Police and encourages early engagement with the Design Out Crime Officer to address access, recreational space, car club provision and travel route matters.
The site is proposed for allocation to support increased housing requirements. The regeneration of brownfield land within the city centre is suitable for development and sustainably located for residential use.
In order to safeguard the existing easements on site, a modification to both the site policy and reasoned justification restricting layout near easements is proposed.

Location 18 – North West Chelmsford

Strategic Growth Site Policy 18a – Land North West of Chelmsford (North of Hollow Lane)

Key statistics:

Consultation point	**Total number of responses**
Strategic Growth Site Policy 18a – Land North West of Chelmsford (North of Hollow Lane)	58

Summary of Representations – main issues and requested changes:

- Supports proposed allocation and confirms that it is available, suitable and deliverable (Dandara AS-1133)
- Policy should be amended to approximately 160 homes to reflect the true development capacity of site (Dandara AS-1133)
- No designated heritage assets within the site, although it is within the wider setting of a number of listed buildings. Supports the HIA and identified suitable mitigation measures included within the policy and supporting text (Historic England AS-1001)
- Supports policy requirement for suitable flood risk management and SuDS, and network of multifunctional green infrastructure and would welcome reference to Anglian Water's Surface Water Risk Management Guidance in the reasoned justification (Anglian Water Services Ltd AS-1090)
- Whilst sufficient dry weather flow capacity exists at Chelmsford WRC, developers to engage early with Anglian Water to assess a sustainable connection into the network (Anglian Water Services Ltd AS-1090)
- Supports the requirement for development to accord with a masterplan approved by CCC. Masterplan will need to provide more clarity on the elements of landscape character in need of conservation (Essex County Council AS-1069)
- Supports requirement for strong buffers/heritage and PRoW enhancements. Policy should be amended to reference the opportunities for connectivity beyond the site, which could be achieved by having regard to the LNRS (Essex County Council AS-1067)
- A green buffer alongside woodland to the north should be required to conserve its setting (Essex County Council AS-1069)
- Supports requirement for a MRA (Essex County Council AS-1069)

- Site lies within the zone of influence of the Essex Coast RAMS and should include policy requirements to secure RAMS tariff payments (Natural England AS-1109)
- The special features and characteristics of the buildings and rural setting of the Chignal Villages should be respected in accordance with the Chignal VDS as Supplementary Planning Guidance supporting the Local Plan (Chignal Parish Council AS-964)
- Objects to the proposed change to include site in Chelmsford's urban area boundary. Any development north of Hollow Lane would encroach on open countryside and there are no natural or artificial boundaries to contain further urban expansion (Chignal Parish Council AS-964)
- Development would degrade the rural landscape and settings of Broomwood Lodge, registered as a Building of Local Value, listed buildings to the south west, and the non-designated heritage assets of Kilnfield Barns, the cluster of former agricultural buildings to the north west of the site (Chignal Parish Council AS-964)
- Loss of an established green buffer. Development will have urban/rural boundaries on three sides, visible from the extensive footpath network to the North, East and West. Proposed buffers are not sufficiently wide to mitigate harm (Brumfelda - Broomfield's Local History Group AS-710)
- The section of Hollow Lane is historic and displays many characteristics of a Protected Lane and proximity of a modern housing estate would have a huge impact on its historic character. Concerns over retaining the setting of Priors (Brumfelda - Broomfield's Local History Group AS-710)
- Development would add to the localised landscape damage resulting from the proposed nearby Norwich to Tilbury overhead line and pylons. These would also likely reduce property prices within the allocation and could impact viability (Brumfelda - Broomfield's Local History Group AS-710)
- Development would result in loss of Grade 2 agricultural land (Chignal Parish Council AS-964, Brumfelda - Broomfield's Local History Group AS-710)
- Concerns that existing infrastructure, including transport, education, healthcare, flood prevention, employment opportunities, telecommunication, utilities, and other facilities cannot support the proposed scale of this development, individually or cumulatively alongside other proposed developments (Chignal Parish Council AS-964, Brumfelda - Broomfield's Local History Group AS-710)
- Concerns over increase in traffic, capacity and safety of road network (including for pedestrians and cyclists), including in relation to Chignal Road, Hollow Lane, Woodhall Hill, Woodhall Hill/Hollow Lane junction, Roxwell Road/Chignal Road junction, Patching Hall Lane, School Lane, Copperfield Road and Oliver Way (Chignal Parish Council AS-964, Brumfelda - Broomfield's Local History Group AS-710)
- Junction modelling appraisal (T007) does not address wider highway network inadequacies, including reduced two-way link capacity in Patching Hall between Broomfield Road and Sunrise Avenue due to on-street parking
- Concerns that traffic modelling during peak hours and school times has not been carried out
- Insufficient parking provision risks overspill onto neighbouring streets
- Insufficient public transport provision will lead to car-dependency

- Development would lead to loss of valuable open views
- Failure to demonstrate landscape enhancement or effective mitigation and landscape buffers not achievable
- Scale, design and density are not in keeping with surrounding development
- Area close to the site is identified as having Romano-British archaeological remains
- Concerns that development would lead to loss of hedgerows, mature trees (including TPO), countryside, green space, habitats, wildlife and biodiversity
- Rural landscapes and habitats around Chelmsford that fall outside Green Belt and other statutory protections have been consistently under valued
- Concerns over dense housing with little or no options to create an inclusive natural environment and high quality green infrastructure, including lack of evidence in respect of BNG
- Increased pollution including air, light, noise and waste management
- Loss of public footpaths crossing the site used by local residents
- Increased density will lead to loss of privacy
- No nearby employment opportunities, so residents will need to rely on private cars, which is unsustainable
- Hollow Lane already experiences surface water flooding and development would exacerbate issues. Given clay soils, below-ground soakaways are unlikely to work and surface water would need to be managed through ponds, underground storage tanks or swales and ditches, either on or off site
- The expansion of Newlands Spring Primary School would impact the open space for the school
- Concerns regarding the disruption of construction, including dust, power cuts, and damage caused by and safety issues arising from HGVs
- Concerns over site selection process - lack of site-specific justification in the Council's consultation material on how the site has been assessed against other alternatives and the combined impact of sites in the area
- Impose height, scale and frontage requirements on new development and specify a minimum landscaped buffer width along the Hollow Lane boundary
- Further assessments required including in respect of mineral resources, archaeological findings, flood risk measures and protection of PRoW
- Need for substantial landscape buffers to Chobbing’s Farm, Broom Wood and Hollow Lane in order to create a softer edge that reflects the area’s historic character
- Land North West of Chelmsford urban area should be designated as Green Wedge to prevent further development and urban sprawl into the Broomfield parish
- Allocation should be reconsidered or removed from the Local Plan and sustainable brownfield alternatives and/or other more sustainable sites should be considered first.

CCC Response
The use of the ‘around’ housing figure would allow for a higher density development to be brought forward where this addresses site constraints and conforms with other policies in the plan as a whole.

To avoid duplication in the Plan, rather than modifying all site policies, a minor modification will be proposed to the reasoned justification of Policy DM18 to include reference to Anglian Water's Surface Water Risk Management Guidance.
Reference to opportunities set out in the LNRS to connect and contribute to wider Green Infrastructure network is covered by Strategic Policy S4, Strategic Policy S9, and Policy DM16 of the Pre-Submission Plan in relation to the LNRS; and also DM16 in relation to the Essex Green Infrastructure Strategy. There is no need to propose a modification to the Plan.
Reference to RAMS was removed from each qualifying allocation in the Plan Review to avoid repetition. Explanatory text is set out in policies S4 and DM16. Natural England agreed this in a signed SOCG dated December 2024, and have reaffirmed this position.
The reasoned justification includes the need to retain a buffer to the north of the site, south of Broom Wood.
The Additional Sites - Landscape Sensitivity and Capacity Study (PL013), Additional Sites - Heritage Assessments Technical Note October 2025 (PL014), and Additional Sites - Archaeological Impact Assessment October 2025 (PL015) have informed the site requirements for landscape, heritage and archaeology. The full details of these will be considered as part of the future masterplan and planning application for the site in accordance with wider Local Plan policies DM13, DM14 and DM15.
To meet our development needs it is inevitable that some agricultural land will be used for development.
The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the current status of infrastructure across Chelmsford and identifies what new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources.
The height, scale and design of the development will be considered in detail as part of the future masterplan and planning application for the site.
The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This is given in Appendix 2 and includes a review of representations received from members of the public. Essex Highways response has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform any proposed minor modifications to the Local Plan.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
The site will be required to comply with wider Local Plan policy requirements, including the need to protect existing trees, improve biodiversity and green infrastructure as set out in policies DM16 and DM17.
The suite of policies in the Plan seek to protect the character of landscapes and ensure suitable drainage and SuDS support development.
The site allocation is supported by the plan evidence base including Strategic Flood Risk Assessments, Sequential and Exception Test, Water Cycle Studies.
Other proposed development sites are dealt with in the consideration of Strategic Policy S7 and addressed by the Pre-Submission Integrated Impact Assessment and the Integrated Impact Assessment Focused Additional Sites Addendum.
The policy requires existing PRoW to be protected.

The Green Wedge designation follows the valleys of the River Wid, River Can and River Chelmer. The purpose of the Green Wedge is to maintain and protect the open character of the landscape of the river valleys, to provide physical links between the urban area of Chelmsford and the countryside beyond, to provide an important network of natural habitats and various formal and informal leisure and recreation uses. It relates to land within the river valleys and does not extend to other parcels of land so it would not be appropriate to consider extending the designation to this location.
Any expansion of Schools will need to comply with relevant open space/sports pitch requirements for Schools.
Any impact on amenities from construction activity is a relative short term impact which can be managed by appropriate planning conditions as part of any future planning application.

Location 19 – Land West of Patching Hall Lane

Strategic Growth Site Policy 19 – Land West of Patching Hall Lane

Key statistics:

Consultation point	**Total number of responses**
Strategic Growth Site Policy 19 – Land West of Patching Hall Lane	229

Summary of Representations – main issues and requested changes:

- Supports proposed allocation, which is available and deliverable, and supports housing trajectory for the site. Site should be expanded to include land to the north and west which may assist in bringing forward an improved scheme (Bellway Homes Ltd AS-259)
- Requests amendment to clarify that the site should require either on-site sports provision or financial contributions to off-site facilities (not both), and remove the requirement for on-site formal sports provision given the site's size and proximity to existing facilities (Bellway Homes Ltd AS-259)
- Supports policy requirements for strong green buffers, PRoW enhancements and appropriate habitat mitigation. Policy should be amended to reference the opportunities for connectivity beyond the site, which could be achieved by having regard to the LNRS (Essex County Council AS-1070)
- Supports the requirement for development to accord with a masterplan approved by CCC. Masterplan needs to provide clarity on which elements of landscape character needs conservation and suggest that any PRoW running through the site should be incorporated into naturalistic green corridor to conserve their character (Essex County Council AS-1071)
- Consideration should be given to limiting building heights to two storeys close to open countryside rather than two and a half (Essex County Council AS-1071)

- Policy requirement for a MRA should be removed (Essex County Council AS-1071)
- Welcomes reference to promoting and enhancing active and sustainable modes of transport. Seeks consideration in the masterplan for the opportunity to enhance bus access to the city centre and Broomfield Hospital (Essex County Council AS-1071)
- No designated heritage assets within the site, although it is within the immediate setting of listed buildings. Supports the HIA and identified suitable mitigation measures included within the policy and supporting text (Historic England AS-1002)
- Supports policy requirement for suitable flood risk management and SuDS, and network of multifunctional green infrastructure and would welcome reference to Anglian Water's Surface Water Risk Management Guidance in the reasoned justification (Anglian Water Services Ltd AS-1091)
- Whilst sufficient dry weather flow capacity exists at Chelmsford WRC, developers to engage early with Anglian Water to assess a sustainable connection into the network (Anglian Water Services Ltd AS-1091)
- Site lies within the zone of influence of the Essex Coast RAMS and should include policy requirements to secure RAMS tariff payments (Natural England AS-1110)
- CCC has not taken into account the adopted Broomfield NP and has not consulted appropriately with Broomfield Parish Council when considering Site 19 (Broomfield Parish Council AS-71, Brumfelda - Broomfield's Local History Group AS-712)
- Objects to the site as it is unsuitable and lacks infrastructure capacity. The site must be removed from the Local Plan (Broomfield Parish Council AS-71)
- Objects to the inclusion of the site as it is a part of the buffer zone locally known as the Felsted Field Gap, which is important to prevent coalescence with Chelmsford (Broomfield Parish Council AS-71)
- Despite previously being identified as inappropriate by CCC has now been included in the Local Plan with no consideration to the existing issues with traffic, access, and lack of schools (Broomfield Parish Council AS-71)
- Concerns on local traffic issues both before, during and after construction. This should be considered alongside with the proposed Norwich to Tilbury pylon work that will also affect this area during construction (Broomfield Parish Council AS-71)
- The development would result in loss of Grade 2 agricultural land (Brumfelda - Broomfield's Local History Group AS-712)
- Site could be made sound by addressing key landscape, traffic, and heritage concerns. Broomfield NP sustainable transport proposals could help mitigate impacts (Brumfelda - Broomfield's Local History Group AS-712)
- Existing infrastructure, including transport, education, healthcare, sewerage, water supply, flood prevention, shops, employment opportunities, and other facilities, cannot support the proposed scale of this development, individually or cumulatively alongside other proposed developments
- Concern that previous development has not been supported by appropriate infrastructure and uncertainty about future funding and delivery
- Engage with Essex County Council, NHS Mid & South Essex, and Anglian Water to secure infrastructure commitments before allocating this site

- Concerns over road safety on Patching Hall Lane and School Lane, requesting mitigation including traffic calming, a 20mph speed limit, pedestrian crossings, footpaths and cycle lanes, and consideration of a new western access into Hollow Lane with access onto Chignal Road
- Concerns over accuracy of traffic modelling. The trip rates used are more appropriate for sites with very good public transport and active travel links, which invalidates the traffic modelling used
- The junction modelling appraisal (T007) does not address wider highway network inadequacies, including reduced two-way link capacity in Patching Hall between Broomfield Road and Sunrise Avenue due to on-street parking
- The transport modelling forecasts overcapacity in the key junctions including Patching Hall Lane/B1008 and School Lane/B1008 by 2041. Given current road layouts and funding uncertainties there is limited scope for effective mitigation particularly in relation to congestion and safety risks
- Concerns that appropriate traffic modelling during peak hours and school times have not been carried out sufficiently
- Site is unsustainable with limited public transport so it will encourage car dependency
- Rural landscapes and habitats that fall outside Green Belt and other designations have been consistently undervalued
- Site currently helps prevent urban sprawl and coalescence, including between Broomfield and neighbouring settlements. It should be protected by designating as Green Wedge
- Concern that development would result in the irreversible loss of trees and habitats, and reduction of biodiversity. A full ecological survey to identify the species at risk and mitigate loss should be carried out
- Concern that the required BNG cannot be achieved
- Development would significantly diminish the amenity value and character the area, vital for leisure, wellbeing, and social interaction
- Plan fails sequential test for flood risk as parts of the site lie within Flood Zones 2 and 3
- Given the clay soils in the area, below-ground soakaways are unlikely to work and surface water would need to be managed through ponds, underground storage tanks or swales and ditches, either on or off site
- Concerns that the development will exacerbate existing water, sewage, flooding, and drainage issues
- Development would result in increased air, light, and noise pollution, especially during construction
- Scale, design and density of the proposal is disproportionate to the character and capacity of the surrounding area, resulting in harm to the character of the local streetscape, loss of open views and the significance and setting of nearby heritage assets
- The proposed buffers and landscaping are insufficient to preserve the area's historic and visual qualities
- The two closest schools, Newlands Spring and Broomfield Primary schools, have no capacity and lack the land required for expansion

- Substantial consideration should be given to protecting the privacy and amenity of existing residents, including avoiding overlooking, maintaining adequate boundary separation/ open space buffer and minimising disturbance
- Housing growth could be more appropriately directed to better-served areas around Chelmsford, including Baddow, Galleywood and Sandon
- Focus instead on building out existing planning permissions and lobby government to re-instate the A12 widening project
- Consider new strategic sites that can accommodate communities, housing, employment and new infrastructure
- Requests to reduce the site area, reduce the number of homes to less than 100 and to remove site from the Plan
- Access the site via Chignal Road and Little Hollows rather than Patching Hall Lane
- Objects to the proposal as it breaches Article 8 protections afforded to residents.

CCC Response
The Council has tested the site through its Additional Sites – Housing Site Studies October 2025 (PL018) and the wider Local Plan policy requirements for landscaping, environmental improvements and heritage protection can be met within the proposed site boundary.
The policy is flexible to address sport, leisure and recreation needs which may be provided on-site, and/or off-site via financial contributions, depending on scale and need. Strategic Policy S10 of the Pre-Submission Local Plan and the latest Planning Obligations SPD set this out in more detail and the precise needs can be considered through the masterplan and planning application process.
Reference to opportunities set out in the LNRS to connect and contribute to wider Green Infrastructure network is covered by Strategic Policy S4, Strategic Policy S9, and Policy DM16 of the Pre-Submission Plan in relation to the LNRS; and also DM16 in relation to the Essex Green Infrastructure Strategy. There is no need to propose modifications to the Plan.
Minor modification will be proposed to remove the need for a MRA to be undertaken.
The height, scale and design of the development will be considered in detail as part of the future masterplan and planning application for the site.
Relevant sustainable and active travel enhancements will be considered as part of the masterplan and planning application for the site, informed by further supporting information such a full detailed Traffic Assessment of the site and the Broomfield Neighbourhood Plan.
To avoid duplication in the Plan, rather than modifying all site policies, a minor modification will be proposed to the reasoned justification of Policy DM18 to include reference to Anglian Water's Surface Water Risk Management Guidance.
Reference to RAMS was removed from each qualifying allocation in the Plan Review to avoid repetition. Explanatory text is set out in policies S4 and DM16. Natural England agreed this in a signed SOCG dated December 2024, and have reaffirmed this position.
Broomfield Parish Council have been consulted at each and every Local Plan consultation stage.

The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the current status of infrastructure across Chelmsford and identifies what new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources.
Site allocations are strategic matters for the Local Plan, but where applicable the made Neighbourhood Plans include detailed design and other guidance which can influence future detailed development proposals and planning applications.
The evidence base including traffic modelling, heritage assessment, and landscape capacity and sensitivity assessment show that there are no overriding constraints that would hinder the delivery of the site, which will contribute to housing supply in the first five years of the plan adoption.
The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This is given in Appendix 2 and includes a review of representations received from members of the public. Essex Highways response has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform any proposed minor modifications to the Local Plan.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
Any impact on amenities from construction activity is a relative short term impact which can be managed by appropriate planning conditions as part of any future planning application.
To meet our development needs it is inevitable that some agricultural land will be used for development.
The Green Wedge designation follows the valleys of the River Wid, River Can and River Chelmer. The purpose of the Green Wedge is to maintain and protect the open character of the landscape of the river valleys, to provide physical links between the urban area of Chelmsford and the countryside beyond, to provide an important network of natural habitats and various formal and informal leisure and recreation uses. It relates to land within the river valleys and does not extend to other parcels of land so it would not be appropriate to consider extending the designation to this location.
The site will be required to comply with wider Local Plan policy requirements, including the need to protect existing trees, improve biodiversity and green infrastructure as set out in policies DM16 and DM17.
The site allocation is supported by the plan evidence base including Sequential and Exception Test, Water Cycle Studies.
The suite of policies in the Plan seek to protect the character of landscapes and ensure suitable drainage and SuDS support development.
The Additional Sites - Landscape Sensitivity and Capacity Study October 2025 (PL013), Additional Sites - Heritage Assessments Technical Note October 2025 (PL014), and Additional Sites - Archaeological Impact Assessment October 2025 (PL015) have informed the site requirements for landscape, heritage and archaeology. The full details of these will be considered as part of the future masterplan and planning application for the site in accordance with wider Local Plan policies DM13, DM14 and DM15.
Based on the Additional Sites - Chelmsford City Council Housing Scenario Test - Primary and Secondary Education (INF008) ECC, as education provider, are content that sufficient capacity can be made to accommodate the site.

Other proposed development sites are dealt with in the consideration of Strategic Policy S7 and addressed by the Pre-Submission Integrated Impact Assessment and the Integrated Impact Assessment Focused Additional Sites Addendum.
Objections relating to the breach of Article 8 protections are not supported with evidence to demonstrate a disproportionate or exceptional interference with private or family life that would warrant overriding the public interest in a site allocation for housing. Concerns raised relate to planning matters, which can and should be addressed through the planning application process.

Location 7 – Great Leighs

Strategic Growth Site Policy 7b – Great Leighs – Land East of London Road

Key statistics:

Consultation point	**Total number of responses**
Strategic Growth Site Policy 7b – Great Leighs – Land East of London Road	11

Summary of Representations – main issues and requested changes:

- Supports allocation, including that development should accord with a masterplan approved by CCC. This should consider connectivity to Chelmer Valley Park and Ride (Essex County Council AS-1074, AS-1075)
- Supports inclusion of affordable housing for older people and reasoned justification should reference the ECC Extra Care Design Guide and dementia-inclusive design principles (Essex County Council AS-1074)
- Supports requirement to make a financial contribution to the delivery of the Chelmsford North East Bypass (Essex County Council AS-1073)
- Supports requirement to undertake a MRA (Essex County Council AS-1073)
- Council's previous HIA found no notable heritage impacts, and the proposed change to the nature of the allocation would not result in additional heritage impacts (Historic England AS-1003)
- Site lies within the zone of influence of the Essex Coast RAMS and should include policy requirements to secure RAMS tariff payments (Natural England AS-1111)
- Supports the policy requirement to protect and enhance the River Ter SSSI to the south ensuring new development provides any required mitigation measures (Natural England AS-1111)
- Supports the site specific policy wording regarding WWTW capacity (Environment Agency AS-729)
- Supports policy requirement for suitable flood risk management and SuDS, and network of multifunctional green infrastructure and would welcome reference to Anglian Water's Surface Water Risk Management Guidance in the reasoned justification (Anglian Water Services Ltd AS-1092)
- Supports the requirements to demonstrate sufficient wastewater treatment and disposal, and the recommendations that development must not be

delivered until there is sufficient capacity available at the WRC and this may require a suitable phasing plan to align with future investment plans (Anglian Water Services Ltd AS-1092)
- Protect Bridleway 13 by upgrading Footpaths 14 and 16 to multi-user routes (Essex Bridleways Association AS-61)
- Reference to maximising connectivity with the wider GI network should be included in the policy requirements (Essex County Council AS-1074)
- Commitment to collaborate with Braintree District Council and ECC regarding the impact of Plan growth on secondary education should be included in the reasoned justification (Essex County Council AS-1073)
- Infrastructure will require improvement, including public transport, education, healthcare and sewerage alongside or prior to development (Great and Little Leighs Parish Council AS-439)
- Further evidence is required to demonstrate that site can deliver the additional 140 dwellings (Bloor Homes AS-473)
- Concerns about increased housing density and impacts on the rural character and neighbouring properties. Mitigation including a substantial green buffer and single-storey development adjacent to existing dwellings should be required.

CCC Response
The Local Plan should be read as a whole, and other policies will ensure there will be sufficient waste water capacity to serve the development. For example, Policy S4 requires developers to demonstrate that sufficient waste water treatment capacity is available ahead of occupation to ensure no deterioration in the quality of receiving waters. Policy S10 also states that permission will only be granted if it can be demonstrated that there is sufficient appropriate infrastructure capacity to support the development or that such capacity can be delivered by the proposal.
Reference to RAMS was removed from each qualifying allocation in the Plan Review to avoid repetition. Explanatory text is set out in policies S4 and DM16. Natural England agreed this in a signed SOCG dated December 2024, and have reaffirmed this position.
Strategic Policy S14 includes reference to dementia friendly, inclusive and accessible development. Design requirements for older people and age-friendly places are also addressed in the Planning Obligations SPD (INF011, January 2026). The Plan should be read as a whole so no need to duplicate in site policy.
A minor amendment is proposed detailing the collaboration with Braintree Council to facilitate educational requirements that may arise from this development.
The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the current status of infrastructure across Chelmsford and identifies what new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources.
The site allocation is considered a sustainable and deliverable locations for development and consistent with the plan priorities and other policies including the Spatial Strategy.

The use of the ‘around’ housing figure would allow for a higher density development to be brought forward where this addresses site constraints and conforms with other policies in the plan as a whole.
A modification is proposed to ensure that future capacity of wastewater treatment facilities in Great Leighs is subject to the necessary environmental permits.
Reference to opportunities set out in the LNRS is covered by Strategic Policy S4, Strategic Policy S9, and Policy DM16 of the Pre-Submission Plan; and also DM16 in relation to the Essex Green Infrastructure Strategy. The amendments requested are considered too detailed for this plan.

Location 9 – Boreham

Strategic Growth Site Policy 9a – Waltham Road Employment Area, Boreham

Key statistics:

Consultation point	**Total number of responses**
Strategic Growth Site Policy 9a – Waltham Road Employment Area, Boreham	30

Summary of Representations – main issues and requested changes:

- Supports the requirement for development to accord with a masterplan approved by CCC (Essex County Council AS-1076)
- Supports requirement to undertake a Mineral Infrastructure Impact Assessment and Waste Infrastructure Impact Assessment, given location within the Mineral and Waste Consultation Areas for Bulls Lodge Quarry (Essex County Council AS-1076)
- Supports increased size of allocation, expanded use classes and seeks greater policy flexibility on access arrangements (LVJ Maldon Ltd AS-486)
- Whilst sufficient dry weather flow capacity exists at Chelmsford WRC, developers to engage early with Anglian Water to assess a sustainable connection into the network (Anglian Water Services Ltd AS-1093)
- Engagement required with the Essex Roads Policing Team at the pre-planning stage (Essex Police AS-990)
- Site lies within the East 2 WAM Network statutory safeguarding zone where any development or change of use will trigger a Ministry of Defence statutory consultation requirement. Policy wording is required to ensure that development does not impact defence operations or assets (Defence Infrastructure Organisation AS-1047)
- Lack of robust evidence on the need for the scale of employment land proposed in Boreham (Boreham Parish Council AS-977)
- Proposed mitigation (e.g. landscape buffers) fails to properly address adverse impacts on neighbouring residential amenity
- Policy requirements should include extensive landscaping and tree planting, limits on building height, size, footprint and siting, controls on materials,

lighting, hours of operation and vehicle movements, and delivery of a footpath/cycleway link prior to development (Mrs Mary Rance AS-665)
- There should be restrictions on types of use, size, height and scale and limit hours of operation, to reduce heavy goods vehicle movements
- Existing infrastructure, including transport, education, healthcare, sewerage, water supply, shops, employment opportunities, telecommunication, utilities, and other facilities cannot support the proposed scale of development, individually or cumulatively alongside other proposed development in the area
- Concerns regarding traffic, transport connectivity and potential strain on the local highway network (Little Baddow Parish Council AS-332, Boreham Parish Council AS-977, Boreham Conservation Society AS-1022)
- Development would lead to landscape, heritage, environmental (including light, noise and smoke) and biodiversity harm and encroachment into the countryside (Boreham Parish Council AS-977, Boreham Conservation Society AS-1022)
- Concerns over the size, nature and layout (Boreham Conservation Society AS-1022)
- Boreham NP in late stages of development and contains no allocations consistent with current adopted Chelmsford Local Plan (Boreham Parish Council AS-977).

CCC Response
Minor modifications will be proposed to ensure the development is designed in such a way that there is no impact on the operational or capability of nearby defence assets.
The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This is given in Appendix 2 and includes a review of representations received from members of the public and Boreham Conservation Society. Essex Highways response has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform any proposed minor modifications to the Local Plan.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
The site policy requires safe and convenient pedestrian and cycle links.
The need for the scale of employment is covered in response to Strategic Policy S6.
The development will be expected to promote the highest standards of design to minimise its impact on the landscape and amenity of nearby residential properties. There must be no large-scale buildings near the northern boundary. Trees are to be retained and there needs to be new landscaping along the northern and western boundaries.
The development will be expected to provide suitable measures to ensure that the amenity of nearby residents is not adversely affected such as noise attenuation measures and boundary screening.
The type of uses is restricted to those listed in the policy. The size, height and scale of buildings, and hours of operation will be considered as part of any future planning application and can be managed by appropriate planning conditions if necessary.

The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the current status of infrastructure across Chelmsford and identifies what new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources.
The site allocation is supported by the plan evidence base including Water Cycle Studies, Heritage Impact Assessment, Landscape Sensitivity and Capacity Study, Air Quality Assessment and traffic modelling.
Site allocations are strategic matters for the Local Plan, but where applicable the made Neighbourhood Plans include detailed design and other guidance which can influence future detailed development proposals and planning applications.

Growth Site Policy 9b – Land to the East of 118 to 124 Plantation Road, Boreham

Key statistics:

Consultation point	**Total number of responses**
Growth Site Policy 9b – Land to the East of 118 to 124 Plantation Road, Boreham	22

Summary of Representations – main issues and requested changes:

- Supports allocation. Reasoned justification to clarify housing is for older persons consistent with policy and should reference the ECC Extra Care Design Guide and dementia-inclusive design principles (Essex County Council AS-1077)
- Supports the HIA and identified suitable mitigation measures. Supports the inclusion of these as criteria within the policy and supporting text (Historic England AS-1005)
- Supports policy requirement for suitable flood risk management and SuDS, and network of multifunctional green infrastructure and would welcome reference to Anglian Water's Surface Water Risk Management Guidance in the reasoned justification (Anglian Water Services Ltd AS-1094)
- Rising main (pressurised sewer) within the site. Requirement to protect existing sewers and their easements should be included (Anglian Water Services Ltd AS-1094)
- Whilst sufficient dry weather flow capacity exists at Chelmsford WRC, developers to engage early with Anglian Water to assess a sustainable connection into the network (Anglian Water Services Ltd AS-1094)
- Site lies within the zone of influence of the Essex Coast RAMS and should include policy requirements to secure RAMS tariff payments (Natural England AS-1112)
- Design and ongoing management of site should aim to protect and enhance habitat features for invertebrates reflecting its position adjacent to an Important Invertebrate Area. Reference should be made to BugLife guidance in policy or supporting text and/or within Policy EN3 (Natural England AS-1112)
- Supportive of the principle of the site allocation, although requests a number of specific changes to the policy. These include clarifying the precise type of

development, requiring cooperation between adjacent allocations, referencing the foul sewer as a constraint, refining infrastructure contribution wording and amendment to the site boundary to include land needed for pedestrian/cycle connectivity (Urban Provincial AS-11)

- Clarification required given that site map refers to land east of 102a to 124 Plantation Road and the site description as land to east of 118 to 124 Plantation Road (Boreham Parish Council AS-978)
- Unsustainable location with distance to amenities likely to encourage more car use and bus service very limited. Improved footpaths required (Boreham Parish Council AS-978, Boreham Conservation Society AS-1023)
- Concerns that the existing highway network will not be able to accommodate additional traffic, and this will negatively impact local residents (Little Baddow Parish Council AS-334, Boreham Parish Council AS-978, Boreham Conservation Society AS-1023)
- Concerns over the safety and feasibility of site access. Consider the potential to unify access to sites 9b and 9c (Boreham Parish Council AS-978, Boreham Conservation Society AS-1023)
- Existing infrastructure, including transport, education, healthcare, sewerage, water supply, shops, employment opportunities, telecommunication, utilities, and other facilities cannot support the proposed scale of this development, individually or cumulatively alongside other proposed developments in the local area (Boreham Parish Council AS-978, Boreham Conservation Society AS-1023)
- Unclear how dwellings can be reserved for older people in the long term (Boreham Parish Council AS-978)
- Development should include open space and respect rural nature of historic footpath at eastern edge of site (Boreham Conservation Society AS-1023)
- Concern over the size, nature and layout of development and damage to local heritage assets
- Boreham NP in late stages of development and contains no allocations consistent with current adopted Chelmsford Local Plan (Boreham Parish Council AS-978).

CCC Response
Strategic Policy S14 includes reference to dementia friendly, inclusive and accessible development. Design requirements for older people and age-friendly places are also addressed in the Planning Obligations SPD (INF011, January 2026). The Plan should be read as a whole so no need to duplicate in site policy.
To avoid duplication in the Plan, rather than modifying all site policies, a modification is proposed to the reasoned justification of Policy DM18 to include reference to Anglian Water's Surface Water Risk Management Guidance.
Minor modification will be proposed to ensure the layout safeguards suitable access for the maintenance of sewerage infrastructure.
Reference to RAMS was removed from each qualifying allocation in the Plan Review to avoid repetition. Explanatory text is set out in policies S4 and DM16. Natural England agreed this in a signed SOCG dated December 2024, and have reaffirmed this position.
Strategic Policy S9 and S10 of the Pre-Submission Local Plan and the latest Planning Obligations SPD set this out infrastructure requirements in more detail

and how they will be secured. The precise needs can be considered through the masterplan and planning application process.
There is no need to include additional land within the site boundary for pedestrian/cycle connectivity as this land is within the revised DSB for Boreham so could be included as part of any planning application if required.
Policy S4 and DM16 already provide adequate protection and enhancement for ecology, species, habitat, nature and biodiversity designated sites from development proposals (both statutory and non-statutory, including priority habitats and species) of international, national and local importance, to incorporate measures and features into the design of new buildings, extensions or renovations to increase biodiversity, and to avoid negative impacts on biodiversity and geodiversity, adequately mitigate unavoidable impacts and as a last resort compensate for residual impacts. This will allow specific site considerations to be addressed at masterplan and planning application stage. It is not considered necessary to specifically refer to BugLife in the plan and the profiles are still being 'developed'.
The boundary of the site is as set out in the Additional Sites Map.
The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This is given in Appendix 2 and includes a review of representations received from members of the public and Boreham Conservation Society. Essex Highways response has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform any proposed minor modifications to the Local Plan.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
Relevant sustainable and active travel enhancements will be considered as part of the masterplan and planning application for the site, informed by further supporting information such a full detailed Traffic Assessment of the site.
The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the current status of infrastructure across Chelmsford and identifies what new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources.
The site is below the thresholds to provide open space on site as set out in Appendix B of the Pre-Submission Local Plan.
The Section 106 agreement at the planning application stage can secure the housing tenure for perpetuity.
The Additional Sites heritage assessment sets out that there are no overriding constraints that would prevent the site from coming forward. The policy includes necessary requirements to ensure relevant heritage assets are appropriately protected.
Site allocations are strategic matters for the Local Plan, but where applicable the made Neighbourhood Plans include detailed design and other guidance which can influence future detailed development proposals and planning applications.

Growth Site Policy 9c – South of Main Road and Dukes Wood Close, Boreham

Key statistics:

Consultation point	Total number of responses
Growth Site Policy 9c – South of Main Road and Dukes Wood Close, Boreham	22

Summary of Representations – main issues and requested changes:

- Supports allocation. Reasoned justification to clarify that any proposed extra care schemes should reference the ECC Extra Care Design Guide and dementia-inclusive design principles at masterplanning and application stage (Essex County Council AS-1078)
- Supports requirement to undertake a Mineral Infrastructure Impact Assessment and Waste Infrastructure Impact Assessment, given location within the Mineral and Waste Consultation Areas for Boreham Metal Recycling/ Bulls Lodge Quarry (Essex County Council AS-1078, AS-1080)
- Supports policy requirement for suitable flood risk management and SuDS, and network of multifunctional green infrastructure and would welcome reference to Anglian Water's Surface Water Risk Management Guidance in the reasoned justification (Anglian Water Services Ltd AS-1095)
- Rising main (pressurised sewer) within the site. Requirement to protect existing sewers and their easements should be included (Anglian Water Services Ltd AS-1095)
- Whilst sufficient dry weather flow capacity exists at Chelmsford WRC, developers to engage early with Anglian Water to assess a sustainable connection into the network (Anglian Water Services Ltd AS-1095)
- Site lies within the zone of influence of the Essex Coast RAMS and should include policy requirements to secure RAMS tariff payments (Natural England AS-1113)
- Design and ongoing management of site should aim to protect and enhance habitat features for invertebrates reflecting its position adjacent to an Important Invertebrate Area. Reference should be made to BugLife guidance in policy or supporting text and/or within Policy EN3 (Natural England AS-1113)
- Supports allocation and flexibility afforded to number of units. Important that Plan retains flexibility should market or viability conditions change (CHP AS-947)
- Requirements for Mineral Infrastructure Impact Assessment and Archaeological Assessment unjustified and should be removed (CHP AS-947)
- Supports the HIA and identified suitable mitigation measures. Supports the inclusion of these as criteria within the policy and supporting text (Historic England AS-1006)
- Unsustainable location with distance to amenities likely to encourage more car use and bus service very limited. Improved footpaths required (Boreham Parish Council AS-980, Boreham Conservation Society AS-1024)

- Concerns that the existing highway network will not be able to accommodate additional traffic, and this will negatively impact local residents (Little Baddow Parish Council AS-335)
- Concerns over the safety and feasibility of site access. Consider the potential to unify access to sites 9b and 9c (Boreham Parish Council AS-980, Boreham Conservation Society AS-1024)
- Existing infrastructure, including transport, education, healthcare, sewerage, water supply, shops, employment opportunities, telecommunication, utilities, and other facilities, cannot support the proposed scale of this development, individually or cumulatively alongside other proposed developments (Boreham Parish Council AS-980, Boreham Conservation Society AS-1024)
- Unclear how dwellings can be reserved for older people in the long term (Boreham Parish Council AS-980, Boreham Conservation Society AS-1024)
- Development should include open space (Boreham Conservation Society AS-1024)
- Concerns over detrimental impact on adjacent footpath and Conservation Area (Boreham Parish Council AS-980, Boreham Conservation Society AS-1024)
- Boreham NP in late stages of development and contains no allocations consistent with current adopted Chelmsford Local Plan (Boreham Parish Council AS-980).

CCC Response
Strategic Policy S14 includes reference to dementia friendly, inclusive and accessible development. Design requirements for older people and age-friendly places are also addressed in the Planning Obligations SPD (INF011, January 2026). The Plan should be read as a whole so no need to duplicate in site policy.
To avoid duplication in the Plan, rather than modifying all site policies, a modification is proposed to the reasoned justification of Policy DM18 to include reference to Anglian Water's Surface Water Risk Management Guidance.
Minor modification will be proposed to ensure the layout safeguards suitable access for the maintenance of sewerage infrastructure.
Reference to RAMS was removed from each qualifying allocation in the Plan Review to avoid repetition. Explanatory text is set out in policies S4 and DM16. Natural England agreed this in a signed SOCG dated December 2024, and have reaffirmed this position.
Policy S4 and DM16 already provide adequate protection and enhancement for ecology, species, habitat, nature and biodiversity designated sites from development proposals (both statutory and non-statutory, including priority habitats and species) of international, national and local importance, to incorporate measures and features into the design of new buildings, extensions or renovations to increase biodiversity, and to avoid negative impacts on biodiversity and geodiversity, adequately mitigate unavoidable impacts and as a last resort compensate for residual impacts. This will allow specific site considerations to be addressed at masterplan and planning application stage. It is not considered necessary to specifically refer to BugLife in the plan and the profiles are still being 'developed'.
Mineral Infrastructure Impact Assessment is required given the sites location within the Mineral Consultation Areas for Bulls Lodge Quarry.

Given the sites location it may contain archaeological deposits which will need to be considered by future development proposals, an archaeological assessment is therefore required.
The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This is given in Appendix 2 and includes a review of representations received from members of the public and Boreham Conservation Society. Essex Highways response has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform any proposed minor modifications to the Local Plan.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
Relevant sustainable and active travel enhancements, including providing safe and convenient pedestrian and cycle connections, will be considered as part of the masterplan and planning application for the site, informed by further supporting information such a full detailed Traffic Assessment of the site.
The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the current status of infrastructure across Chelmsford and identifies what new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources.
The site is below the thresholds to provide open space on site as set out in Appendix B of the Pre-Submission Local Plan.
The Section 106 agreement at the planning application stage can secure the housing tenure for perpetuity.
The Additional Sites heritage assessment sets out that there are no overriding constraints that would prevent the site from coming forward. The policy includes necessary requirements to ensure relevant heritage assets are appropriately protected.
Site allocations are strategic matters for the Local Plan, but where applicable the made Neighbourhood Plans include detailed design and other guidance which can influence future detailed development proposals and planning applications.

Location 14 – Ford End

Growth Site Policy 14b – Land South of Ford End Primary School

Key statistics:

Consultation point	**Total number of responses**
Growth Site Policy 14b – Land South of Ford End Primary School	15

Summary of Representations – main issues and requested changes:

- Supports policy (including increased dwelling capacity), confirms the site is available, suitable, deliverable within five years (Dandara AS-1139)

- Supports the HIA and identified suitable mitigation measures. Supports the inclusion of these as criteria within the policy and supporting text (Historic England AS-1007)
- Supports the requirement for development to accord with a masterplan approved by CCC. This should include more detail of the character of the required defensible landscape buffer (Essex County Council AS-1081)
- Reasoned justification should refer to 'The EPOA Parking Guidance for Schools…' and the School Design Guidance (Essex County Council AS-1081)
- Supports provision of an off-road parking area for use by staff of Ford End Primary School and the creation of car-free public spaces around schools (Essex County Council AS-1081)
- Supports the site specific policy wording regarding WWTW capacity (Environment Agency AS-730)
- Supports policy requirement for suitable flood risk management and SuDS, and network of multifunctional green infrastructure and reference to Anglian Water's Surface Water Risk Management Guidance in the reasoned justification (Anglian Water Services Ltd AS-1096)
- Supports the requirements to demonstrate sufficient wastewater treatment and disposal, and the recommendations that development must not be delivered until there is sufficient capacity available at the WRC and this may require a suitable phasing plan to align with our future investment plans (Anglian Water Services Ltd AS-1096)
- Site lies within the zone of influence of the Essex Coast RAMS and should include policy requirements to secure RAMS tariff payments (Natural England AS-1114)
- New off-road parking area for staff of Ford End Primary School should be well managed to prevent crime and anti-social behaviour (Essex Police DOCO AS-987)
- Supports the site and an increase above the original 20 dwellings but considers 75 excessive. Seeks clearer commitment on affordable housing levels, raises concerns about increased hydrological and drainage impacts, and expects any development to deliver community benefits, including a speed camera scheme and wider traffic management measures (Great Waltham Parish Council AS-79)
- Requests clarification and flexibility in the policy wording on the proposed village hall - amending the requirement to provide it "if/as required" to align with supporting text (Dandara AS-1139)
- A new village hall has been proposed as part of the development. Reflecting that the existing village hall is a community asset, trustees are seeking views from the community before any position is taken (Ford End Village Hall AS-498)
- Key factors must be addressed in relation to Ford End Primary School prior to commencement of any development, including safeguarding and site security, traffic and construction logistics, access and parking arrangements and noise management. Any increase in intake of pupils would require the provision of in-housing kitchen facilities and expanded dining space (Ford End Primary School AS-475)
- The proposed number of houses is considered too high (Ford End Village Hall AS-498)

- Concern over loss of both high grade agricultural land and biodiversity
- Concern over lack of amenities in the village and capacity at the school
- Improvements to infrastructure required, including effective traffic calming and safe pedestrian crossings across the B1008
- Significant amount of development within a limited radius of Ford End with lack of investment in infrastructure.

CCC Response
Reasoned Justification proposed to be modified to include reference to Essex Part 1 Parking Guidance.
The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This is given in Appendix 2 and includes a review of representations received from members of the public. Essex Highways response has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform any proposed minor modifications to the Local Plan.
The need for development to be delivered in line with available WRC capacity is noted, there is no need to propose any modifications to the Local Plan in relation to this.
Reference to RAMS was removed from each qualifying allocation in the Plan Review to avoid repetition. Explanatory text is set out in policies S4 and DM16. Natural England agreed this in a signed SOCG dated December 2024, and have reaffirmed this position.
The need for the new off-road parking area for staff of Ford End Primary School to be well managed to prevent crime and anti-social behaviour is noted and will be considered as part of the masterplanning considerations for the site. There is no need to propose any modifications to the Local Plan in relation to this.
The evidence base for the Local Plan supports the expansion of the site.
The detail of community benefits, including traffic calming measures, will be considered as part of the planning brief and planning application for the site, informed by further supporting information such a full detailed Traffic Assessment of the site.
Affordable housing requirements for the site is set out Policy DM1 which will be required to be met as part of any future planning application for the site.
The difference between the policy and text included in the reasoned justification is recognised. The reasoned justification is intended to explain that a new village hall can be provided on-site, in the form of a new hall, or off-site by renovation and improvement of the existing hall in the Village. This will be considered as part of the design brief and planning application for the site.
The Additional Sites - Chelmsford City Council Housing Scenario Test - Primary and Secondary Education (INF008) identifies sufficient place capacity at the Primary School. It is noted that to facilitate those places upgrades to the School's facilities may be required. This will be considered in consultation with the School as part of the Planning Brief and planning application for the site.
To meet our development needs it is inevitable that some agricultural land will be used for development.
The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the current status of infrastructure across Chelmsford and identifies what

new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources.

Location 11 – Bicknacre

Strategic Growth Site Policy 11c – Land West of Barbrook Way, Bicknacre

Key statistics:

Consultation point	Total number of responses
Strategic Growth Site Policy 11c – Land West of Barbrook Way, Bicknacre	243

Summary of Representations – main issues and requested changes:

- Supportive of the enlargement of the allocation. Broadly supportive of policy wording although requested changes include, removal of requirement for a separate masterplan outside the Development Management process (reflecting site is already subject to a planning application) and clarification of policy approach to securing contributions towards mitigating recreational pressure on Thrift Wood SSSI (Welbeck Strategic Land V Limited AS-491)
- No impact on the settings of nearby historic assets (Historic England AS-1008)
- Site includes a small portion of Flood Zone 3 within the northern boundary adjacent to Priory Road. Recommends that Barbrook Way is used as the main vehicular access and Priory Road is a secondary access and this should be reflected in the policy (Environment Agency AS-732)
- Supports policy requirement for suitable flood risk management and SuDS, and network of multifunctional green infrastructure and would welcome reference to Anglian Water's Surface Water Risk Management Guidance in the reasoned justification (Anglian Water Services Ltd AS-1097)
- Existing surface water sewer within the site and possible discharge point. Requirement to protect existing sewer and discharge point and their easements should be included (Anglian Water Services Ltd AS-1097)
- Whilst sufficient dry weather flow capacity exists at Chelmsford WRC, developers to engage early with Anglian Water to assess a sustainable connection into the network (Anglian Water Services Ltd AS-1097)
- Site lies within the zone of influence of the Essex Coast RAMS and should include policy requirements to secure RAMS tariff payments (Natural England AS-1115)
- Welcomes the policy requirement to assess, and where appropriate mitigate, the potential cumulative effect on the designated features of Thrift Wood SSSI. However, the cumulative effects of recreational pressure on other nearby SSSIs and local wildlife sites must be addressed in liaison with the relevant site managers. Policy should be strengthened to require appropriate mitigation strategies to be developed in liaison with site managers to ensure

the protection and enhancement of these designated sites and supporting habitats (Natural England AS-1115)

- Site could indirectly impact the SSSIs across Danbury Ridge through cumulative recreational pressure without appropriate mitigation measures. Recommend adding Policy requirements relating to the Danbury SSSIs and for consistency with Strategic Growth Site Policy 13 - Danbury (National Trust AS-31)
- Plan does not adequately justify the allocation of this greenfield site when CCC maintains a Brownfield Land Register. The Additional Sites document includes only one brownfield site and does not explain why available sustainable brownfield opportunities have not been prioritised (Woodham Ferrers & Bicknacre Parish Council AS-193)
- Objects to the substantial increase from approximately 20 dwellings in the previous pre-submission plan to 250 dwellings, without any clear or proportionate explanation (Woodham Ferrers & Bicknacre Parish Council AS-193)
- Site is undeliverable within the Plan period due to unresolved access constraints. Until ownership and access rights are resolved, development cannot be considered deliverable (Woodham Ferrers & Bicknacre Parish Council AS-193)
- Retain Bridleway 2 and improve connectivity between Bridleways 28 and 3 (Essex Bridleways Association AS-62)
- Site is not suitable for housing development as there is limited public transport and lack of local employment opportunities
- Shifting housing supply to small rural village is neither strategic nor sustainable
- Object to the site due to the adverse impact on wildlife and habitat, greenspace, trees (including TPO Root Protection Areas) and hedgerows, wastewater capacity and the loss of high grade agricultural land
- Concern about the speed, scale and cumulative impact of development, including reflecting housing growth already delivered in Bicknacre
- Doubts about the level of demand for housing and concerns that development would potentially increase house prices
- Concerns about road safety, including pedestrian routes limited by narrow pavements and numbers of HGVs during construction
- Concerns about traffic, congestion and road capacity (including Barbrook Way, Priory Road, A12 section between J18 and J19, B1418, East Hanningfield Road), lack of parking and lack of appropriate maintenance currently by the Council
- Concerns as to whether safe and suitable access to the site can be achieved, including for service vehicles
- Access should only be provided from Priory Road
- Increased risk of flooding and surface water due to insufficient drainage capacity with Anglian Water visiting Barbrook Way frequently due to drainage issues and confirming there is no drainage capacity
- Concern that UK Power cannot supply the required power infrastructure within the required timeframe
- The development would exacerbate air and noise pollution particularly impacting on children and the elderly

- Concerns about the privacy and impact on residential amenity of properties in Barbrook Way and Meadow View
- Concern that schools and GP surgery are already at capacity and there are limited shops in the area
- Development outside the village boundary would merge the rural village with neighbouring areas
- The site holds a status equivalent to Green Belt and is included in the Danbury Ridge Conservation zone
- Concerns about the loss of peaceful landscape, views, visual amenity and ambiance of the area
- The development will impact the aesthetic of PRoW and ancient footpath
- Concerns about loss of potential archaeological finds
- Over 700 objections submitted to planning application 25/001158/OUT.

CCC Response
The Council's Masterplan Procedure (October 2025) has been updated to cover three Masterplan routes, including planning/site briefs for smaller, less constrained sites. Site policies will be updated to reflect the relevant route for each site but the continued requirement for Masterplans for strategic sites and Special Policy Areas will ensure that they satisfy the requirements of their respective plan policies. This can include delivery of all necessary infrastructure and ensuring that new development is delivered as part of a cohesive approach.
The Council consulted on an updated draft Planning Obligations Supplementary Planning Document alongside the Pre-Submission (Regulation 19) Local Plan Document. The draft SPD sets out details for securing contributions.
The site allocation is supported by the plan evidence base including a Strategic Flood Risk Assessment, Landscape Sensitivity, Archaeology Assessment and Capacity Study 2024 and traffic modelling. The Additional Sites Housing Site Studies (October 2025) considers that there are no overriding site constraints which mean that the site is unsuitable or undeliverable.
Heritage Impact Assessments have been undertaken site policies consider significance of designated and non-designated heritage assets.
In line with Anglian Water's Surface Water Risk Management Guidance and due to existing easements present on the site, a modification to restrict layout around sewage infrastructure is being proposed.
Site policy includes new requirements to undertake an archaeological assessment and to assess, and where appropriate mitigate, the potential cumulative effect on the designated features of Thrift Wood SSSI. A proposed modification to the policy is proposed to ensure developers will work closely with relevant local stakeholders, such as Natural England and the SSSI site managers (National Trust and Essex Wildlife Trust) to assess recreational pressure and provide the necessary mitigation measures for SSSIs.
The site is proposed for allocation to support increased housing requirements.
To meet our development needs it is inevitable that some agricultural land will be used for development
The Council is confident that the site can be accessed from Barbrook Way and that the site is deliverable.
Site policy includes requirements to provide new and enhanced cycle routes, footpaths, Public Rights of Way and, where appropriate, bridleways

The IIA Report assessed the option across a range of criteria, including accessibility and connectivity to services.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.
Site policy includes requirements to retain existing natural landscaping and trees, provide SuDS and ensure appropriate habitat mitigation and creation is provided.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
UK Power Networks are a Local Plan consultee and they have been consulted on the Local plan. They have not raised any concerns regarding constraints with the power supply network.
The Local Plan is informed by an Air Quality Assessment 2024 which overall concludes that the impact of the Local Plan in 2041 can be considered negligible for all pollutants.
Policy includes requirements to ensure the character, scale and layout haver regard to the site's surrounding context and to ensure a defensible landscape buffer on the site boundary.
The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
Reference to RAMS was removed from each qualifying allocation in the Plan Review to avoid repetition. Explanatory text is set out in policies S4 and DM16. Natural England agreed this in a signed SOCG dated December 2024, and have reaffirmed this position.
It is not possible to meet all needs for new homes on brownfield sites so inevitable some land needs found on greenfield sites.

Location 17 – East Hanningfield

Strategic Growth Site Policy 17c – Land South of Rough Hill Complex, The Tye, East Hanningfield

Key statistics:

Consultation point	**Total number of responses**
Strategic Growth Site Policy 17c – Land South of Rough Hill Complex, The Tye, East Hanningfield	94

Summary of Representations – main issues and requested changes:

- Supportive of the allocation, the trajectory and the policy requirements (Gladman Developments Ltd AS-993)
- Supports the requirement for development to accord with a masterplan approved by CCC. The building height limit of two storeys should also be

applied to the eastern edge of the development to reduce adverse landscape impacts (Essex County Council AS-1086)

- Supports the provision of a new 56 place stand-alone nursery on SGS 11c to serve the proposed developments at East Hanningfield and Bicknacre (Essex County Council AS-1085)
- Supports policy requirement for suitable flood risk management and SuDS, and network of multifunctional green infrastructure and would welcome reference to Anglian Water's Surface Water Risk Management Guidance in the reasoned justification (Anglian Water Services Ltd AS-1098)
- Supports requirements to demonstrate sufficient wastewater treatment and disposal. There is currently no headroom at SWF WRC, and dry weather flow would exceed permit by the end of the Plan period. Anglian Water would only support a planning application with a pre-occupancy condition until the growth scheme is delivered. Recommends phasing smaller sites to complete in 2029/30 to align with the scheme (Anglian Water Services Ltd AS-1098, AS-1144)
- Site is within the SWF WWTW area which is operating in exceedance of its environmental permit for discharge volume. Anglian Water has identified a growth scheme, although additional allocated sites may present challenges in the short to medium term. May be necessary to consider phasing to align with the scheme. Supports the site specific policy requirement to demonstrate that there is sufficient WWTW capacity (Environment Agency AS-645)
- The policy requirement relating to demonstrating and providing for sufficient wastewater treatment capacity is not necessary. It is not for the planning system to replicate requirements that are addressed by other legislative regimes, nor is it for developers to have to demonstrate there will be capacity (Gladman Developments Ltd, AS-993)
- Site lies within the zone of influence of the Essex Coast RAMS and should include policy requirements to secure RAMS tariff payments (Natural England AS-1116)
- Recommends alternative designs and layouts to reduce the impact on Willis Farmhouse, and the East Hanningfield and The Tye Conservation Area. If harm cannot be substantially reduced the site should be removed from the Plan (Historic England AS-128)
- Development would lie outside the defined settlement boundary, on greenfield land that currently provides for footpaths, beautiful landscape views, and wildlife. The Conservation Area is an integral and sensitive feature of the village (Little Baddow History Centre AS-668)
- Traffic concerns for Old Church Road, Back Lane, and junctions with Main Street and Old Church Road, and transport links are limited (Little Baddow History Centre AS-668)
- The school could not accommodate children from the proposed development. There are no healthcare facilities in the village (Little Baddow History Centre AS-668)
- The proposed developments in East Hanningfield are of a disproportionate scale to the village and are not supported by sufficient infrastructure capacity. Unless the proposed developments in East Hanningfield are removed, significantly reduced, or shifted to sustainable locations with adequate infrastructure, the Parish Council consider the Local Plan unsound (East

Hanningfield Parish Council AS-165, West Hanningfield Parish Council AS-246)

- Object to the development due to inadequate infrastructure, with rail, road, education, doctors, dentists, and veterinary infrastructure and facilities operating at full capacity (Stow Maries Parish Council AS-1028)
- The scale of development would be disproportionate to the size of the village and available services and facilities in East Hanningfield (Richborough AS-469)
- Existing infrastructure, including transport, education, healthcare, sewerage, water supply, flood prevention, shops, employment opportunities, telecommunication, utilities, and other facilities, and the current scale of East Hanningfield cannot support the proposed scale of this development, individually or cumulatively alongside other proposed developments
- Concern that required infrastructure improvements would not be delivered sufficiently in advance of development
- Sustainable brownfield alternatives and/or other more sustainable sites should be considered first
- Development would not meet local housing needs, so it must include generous provision of affordable housing
- Vehicles speeding through the village is a common occurrence
- The lack of public transport opportunities in East Hanningfield would render the development unsustainable
- Development would lead to increased traffic congestion, reduced safety particularly for vulnerable users, increased pollution, and further deterioration of road conditions
- Impacts arising from the development, including in relation to biodiversity, air quality, and water management, have not been adequately addressed or mitigated
- Development would harm the local historic and natural environment, countryside, and rural character and identity of the area
- Development would exacerbate flood risk, particularly in relation to the Old Church Road pumping station
- Development would lead to the loss of agricultural land
- Development would lead to increased noise and other pollution
- Development would lead to increased risk of fires and crime
- Development of this scale adjacent to a rural village amounts to sprawl
- A gas pipeline runs under the site
- Development would reduce the value of existing homes
- The DtC has not been complied with as there is no clear evidence of constructive, active and ongoing engagement with key infrastructure bodies relating to infrastructure capacity issues in East Hanningfield
- Reduce or remove this development from the Plan.

CCC Response
The Additional Sites - Landscape Sensitivity and Capacity Study has informed the site requirements for landscape. The full details of these will be considered as part of the future masterplan and planning application for the site in accordance with wider Local Plan policies.

A minor amendment to the site policy and reasoned justification to provide an open landscape buffer and restrictions on density is proposed to reduce the impact on Willis Farmhouse, and the East Hanningfield and The Tye Conservation Area.
The Local Plan should be read as a whole, and other policies will ensure there will be sufficient waste water capacity to serve the development. For example, Policy S4 requires developers to demonstrate that sufficient waste water treatment capacity is available ahead of occupation to ensure no deterioration in the quality of receiving waters. Policy S10 also states that permission will only be granted if it can be demonstrated that there is sufficient appropriate infrastructure capacity to support the development or that such capacity can be delivered by the proposal.
To avoid duplication in the Plan, rather than modifying all site policies, a modification is proposed to the reasoned justification of Policy DM18 to include reference to Anglian Water's Surface Water Risk Management Guidance.
It would not be prudent to change the phasing of sites served by South Woodham Ferrers WRC as it is anticipated that these sites will be coming forward very soon, perhaps before the plan is adopted. In addition, the housing trajectory is updated annually providing reliable data to increase capacity accordingly.
Reference to RAMS was removed from each qualifying allocation in the Plan Review to avoid repetition. Explanatory text is set out in policies S4 and DM16. Natural England agreed this in a signed SOCG dated December 2024, and have reaffirmed this position.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the current status of infrastructure across Chelmsford and identifies what new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources.
Affordable housing is required within the site policy.
Not all development plan allocations can be accommodated on previously developed land, and some greenfield sites will be necessary to deliver sustainable and logical extensions to defined settlement boundaries.
The site allocation is supported by the plan evidence base including Sequential and Exception Test, Water Cycle Study, Landscape Sensitivity and Capacity Study and traffic modelling. The Additional Sites Housing Sites Studies October 2025 (PL018) demonstrates how the site can be developed to achieve the proposed number of homes and supporting land uses such as open space and sustainable urban drainage systems (SuDS). The site allocation is considered a sustainable and deliverable locations for development and consistent with the plan priorities and other policies including the Spatial Strategy.
The proposed housing growth is considered appropriate and proportionate to the size of the village and is underpinned by an up-to-date evidence base.

Strategic Growth Site Policy 17d – Land South and South East of East Hanningfield Village

Key statistics:

Consultation point	Total number of responses
Strategic Growth Site Policy 17d – Land South and South East of East Hanningfield Village	96

Summary of Representations – main issues and requested changes:

- Supportive of the allocation, the trajectory and the policy requirements (Gladman Developments Ltd AS-993)
- Supports the requirement for development to accord with a masterplan approved by CCC. The building height limit of two storeys should also be applied to the eastern and southern edges of the development setback from substantial planted buffers to reduce adverse landscape impacts (Essex County Council AS-1087)
- Support the provision of a new 56 place stand-alone nursery on SGS 11c to serve the proposed developments at East Hanningfield and Bicknacre (Essex County Council AS-1087)
- Supports the HIA and identified suitable mitigation measures, including additional screening and increased planting belts along the eastern boundary, and careful consideration of layout, scale, and design (including limitation to two storeys). Supports the inclusion of these as criteria within the policy and supporting text (Historic England AS-1009)
- Supports policy requirement for suitable flood risk management and SuDS, and network of multifunctional green infrastructure and would welcome reference to Anglian Water's Surface Water Risk Management Guidance (Anglian Water Services Ltd AS-1100)
- Supports requirements to demonstrate sufficient wastewater treatment and disposal. There is currently no headroom at SWF WRC, and dry weather flow would exceed permit by the end of the Plan period. Anglian Water would only support a planning application with a pre-occupancy condition until the growth scheme is delivered. Recommends phasing smaller sites to complete in 2029/30 to align with the scheme (Anglian Water Services Ltd AS-1100, AS-1145)
- Site is within the SWF WWTW area which is operating in exceedance of its environmental permit for discharge volume. Anglian Water has identified a growth scheme, although additional allocated sites may present challenges in the short to medium term. May be necessary to consider phasing to align with the scheme. Supports the site specific policy requirement to demonstrate that there is sufficient WWTW capacity (Environment Agency AS-724)
- Rising main (pressurised sewer) within the site. Requirement to protect existing sewers and their easements should be included (Anglian Water Services Ltd AS-1100)

- Site lies within the zone of influence of the Essex Coast RAMS and should include policy requirements to secure RAMS tariff payments (Natural England AS-1117)
- The proposed developments in East Hanningfield are of a disproportionate scale to the village and are not supported by sufficient infrastructure capacity. Unless the proposed developments in East Hanningfield are removed, significantly reduced, or shifted to sustainable locations with adequate infrastructure, the Parish Council consider the Local Plan unsound (East Hanningfield Parish Council AS-390, West Hanningfield Parish Council AS-371)
- Object to the development due to inadequate infrastructure, with rail, road, education, doctors, dentists, and veterinary infrastructure and facilities operating at full capacity (Stow Maries Parish Council AS-1029)
- Development would lie outside the defined settlement boundary, on greenfield land that currently provides for footpaths, beautiful landscape views, and wildlife. The Conservation Area is an integral and sensitive feature of the village (Little Baddow History Centre AS-669)
- Traffic concerns for Old Church Road, Back Lane, and junctions with Main Street and Old Church Road, and transport links are limited (Little Baddow History Centre AS-669)
- The school could not accommodate children from the proposed development. There are no healthcare facilities in the village (Little Baddow History Centre AS-669)
- The scale of development would be disproportionate to the size of the village and available services and facilities in East Hanningfield (Richborough AS-971)
- Existing infrastructure, including transport, education, healthcare, sewerage, water supply, flood prevention, shops, employment opportunities, telecommunication, utilities, and other facilities, and the current scale of East Hanningfield cannot support the proposed scale of this development, individually or cumulatively alongside other proposed developments
- Concern that required infrastructure improvements would not be delivered sufficiently in advance of development
- Sustainable brownfield alternatives and/or other more sustainable sites should be considered first
- Development would not meet local housing needs, so it must include generous provision of affordable housing
- Vehicles speeding through the village is a common occurrence
- Development would lead to increased traffic congestion, reduced safety particularly for vulnerable users, increased pollution, and further deterioration of road conditions
- The lack of public transport opportunities in East Hanningfield would render the development unsustainable
- Impacts arising from the development, including in relation to biodiversity, air quality, and water management, have not been adequately addressed or mitigated
- Development would harm the local historic and natural environment, countryside, and rural character and identity of the area

- Concern that development would exacerbate flood risk, particularly in relation to the Old Church Road pumping station
- Development would lead to the loss of agricultural land
- Development would lead to increased noise and other pollution
- Development of this scale adjacent to a rural village amounts to sprawl
- A gas pipeline runs under the site
- Development would reduce the value of existing homes
- The DtC has not been complied with as there is no clear evidence of constructive, active and ongoing engagement with key infrastructure bodies relating to infrastructure capacity issues in East Hanningfield
- Reduce or remove this development from the Plan.

CCC Response
The Additional Sites - Landscape Sensitivity and Capacity Study has informed the site requirements for landscape. The full details of these will be considered as part of the future masterplan and planning application for the site in accordance with wider Local Plan policies.
In line with Anglian Water's Surface Water Risk Management Guidance and due to existing easements present on the site, a modification to restrict layout around sewage infrastructure is being proposed.
The Local Plan should be read as a whole, and other policies will ensure there will be sufficient waste water capacity to serve the development. For example, Policy S4 requires developers to demonstrate that sufficient waste water treatment capacity is available ahead of occupation to ensure no deterioration in the quality of receiving waters. The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the current status of infrastructure across Chelmsford and identifies what new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources.

The site allocation is supported by the plan evidence base including Strategic Flood Risk Assessment, Sequential and Exception Test, Water Cycle Study, Landscape Sensitivity and Capacity Study and traffic modelling. The Additional Sites Housing Sites Studies October 2025 (PL018) demonstrates how the site can be developed to achieve the proposed number of homes and supporting land uses such as open space and sustainable urban drainage systems (SuDS). The site allocation is considered a sustainable and deliverable locations for development and consistent with the plan priorities and other policies including the Spatial Strategy.
The proposed housing growth is considered appropriate and proportionate to the size of the village and is underpinned by an up-to-date evidence base.

Growth Site Policy 17e – Land South of Windmill Farm, Back Lane, East Hanningfield

Key statistics:

Consultation point	**Total number of responses**
Growth Site Policy 17e – Land South of Windmill Farm, Back Lane, East Hanningfield	96

Summary of Representations – main issues and requested changes:

- Supportive of the allocation and the policy requirements, although potential yield could be higher (Eugene Kinsella AS-346)
- Support the provision of a new 56 place stand-alone nursery on SGS 11c to serve the proposed developments at East Hanningfield and Bicknacre (Essex County Council AS-1088)
- Supports the HIA and identified mitigation measures, including a carefully considered layout, scale, and design, including a limitation of two storeys in height, setbacks on the west and north sides, and a low-density rural character. Supports the inclusion of these as criteria within the policy and supporting text (Historic England AS-1010)
- Supports policy requirement for suitable flood risk management and SuDS, and network of multifunctional green infrastructure and would welcome reference to Anglian Water's Surface Water Risk Management Guidance in the reasoned justification (Anglian Water Services Ltd AS-1101)
- Supports requirements to demonstrate sufficient wastewater treatment and disposal. There is currently no headroom at SWF WRC, and dry weather flow would exceed permit by the end of the Plan period. Anglian Water would only support a planning application with a pre-occupancy condition until the growth scheme is delivered. Recommends phasing smaller sites to complete in 2029/30 to align with the scheme (Anglian Water Services Ltd AS-1101, AS-1146)
- Site is within the SWF WWTW area which is operating in exceedance of its environmental permit for discharge volume. Anglian Water has identified a growth scheme, although additional allocated sites may present challenges in

the short to medium term. May be necessary to consider phasing to align with the scheme. Supports the site specific policy requirement to demonstrate that there is sufficient WWTW capacity (Environment Agency AS-725)

- Site lies within the zone of influence of the Essex Coast RAMS and should include policy requirements to secure RAMS tariff payments (Natural England AS-1118)
- The proposed developments in East Hanningfield are of a disproportionate scale to the village and are not supported by sufficient infrastructure capacity. Unless the proposed developments in East Hanningfield are removed, significantly reduced, or shifted to sustainable locations with adequate infrastructure, the Parish Council consider the Local Plan unsound (East Hanningfield Parish Council AS-391, West Hanningfield Parish Council AS-372)
- Development helps maintain the vitality of settlements and generates investment in infrastructure
- Object to the development due to inadequate infrastructure, with rail, road, education, doctors, dentists, and veterinary infrastructure and facilities operating at full capacity (Stow Maries Parish Council AS-1030)
- Development would lie outside the defined settlement boundary, on greenfield land that currently provides for footpaths, beautiful landscape views, and wildlife. The Conservation Area is an integral and sensitive feature of the village (Little Baddow History Centre AS-670)
- Traffic concerns for Old Church Road, Back Lane, and junctions with Main Street and Old Church Road and transport links are limited (Little Baddow History Centre AS-670)
- The school could not accommodate children from the proposed development. There are no healthcare facilities in the village (Little Baddow History Centre AS-670)
- The scale of development would be disproportionate to the size of the village and available services and facilities in East Hanningfield (Richborough AS-972)
- Existing infrastructure, including transport, education, healthcare, sewerage, water supply, flood prevention, shops, employment opportunities, telecommunication, utilities, and other facilities, and the current scale of East Hanningfield cannot support the proposed scale of this development, individually or cumulatively alongside other proposed developments
- Vehicles speeding through the village is a common occurrence
- Development would lead to increased traffic congestion, reduced safety particularly for vulnerable users, increased pollution, and further deterioration of road conditions
- The lack of public transport opportunities in East Hanningfield would render the development unsustainable
- Concern that required infrastructure improvements would not be delivered sufficiently in advance of development
- Sustainable brownfield alternatives and/or other more sustainable sites should be considered first
- Development would not meet local housing needs, so it must include generous provision of affordable housing

- Impacts arising from the development, including in relation to biodiversity, air quality, and water management, have not been adequately addressed or mitigated
- Development would harm the local historic and natural environment, countryside, and rural character and identity of the area
- Concern that development would exacerbate flood risk, particularly in relation to the Old Church Road pumping station
- Development would lead to the loss of agricultural land
- Development would lead to increased noise and other pollution
- Development of this scale adjacent to a rural village amounts to sprawl
- A gas pipeline runs under the site
- Development would reduce the value of existing homes
- The DtC has not been complied with as there is no clear evidence of constructive, active and ongoing engagement with key infrastructure bodies relating to infrastructure capacity issues in East Hanningfield
- Statements of common ground should be agreed to ensure infrastructure delivery
- Reduce or remove this development from the Plan.

CCC Response
The Additional Sites - Landscape Sensitivity and Capacity Study has informed the site requirements for landscape. The full details of these will be considered as part of the future masterplan and planning application for the site in accordance with wider Local Plan policies.
The Local Plan should be read as a whole, and other policies will ensure there will be sufficient waste water capacity to serve the development. For example, Policy S4 requires developers to demonstrate that sufficient waste water treatment capacity is available ahead of occupation to ensure no deterioration in the quality of receiving waters. Policy S10 also states that permission will only be granted if it can be demonstrated that there is sufficient appropriate infrastructure capacity to support the development or that such capacity can be delivered by the proposal.
It would not be prudent to change the phasing of sites served by South Woodham Ferrers WRC as it is anticipated that these sites will be coming forward very soon, perhaps before the plan is adopted. In addition, the housing trajectory is updated annually providing data to increase capacity accordingly.
Reference to RAMS was removed from each qualifying allocation in the Plan Review to avoid repetition. Explanatory text is set out in policies S4 and DM16. Natural England agreed this in a signed SOCG dated December 2024, and have reaffirmed this position.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the current status of infrastructure across Chelmsford and identifies what new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources.

The site allocation is supported by the plan evidence base including Sequential and Exception Test, Water Cycle Study, Landscape Sensitivity and Capacity Study and traffic modelling. The Additional Sites Housing Sites Studies October 2025 (PL018) demonstrates how the site can be developed to achieve the proposed number of homes and supporting land uses such as open space and sustainable urban drainage systems (SuDS). The site allocation is considered a sustainable and deliverable locations for development and consistent with the plan priorities and other policies including the Spatial Strategy.
The proposed housing growth is considered appropriate and proportionate to the size of the village and is underpinned by an up-to-date evidence base.

Location 20 – Rettendon Place

Strategic Growth Site Policy 20 – Land to East and North of Rettendon Place

Key statistics:

Consultation point	**Total number of responses**
Strategic Growth Site Policy 20 – Land to East and North of Rettendon Place	95

Summary of Representations – main issues and requested changes:

- Supports the proposed allocation and is keen to work with CCC and other stakeholders to refine the proposals (Croudace Homes AS-410)
- Supports policy requirement for suitable flood risk management and SuDS, and network of multifunctional green infrastructure and would welcome reference to Anglian Water's Surface Water Risk Management Guidance in the reasoned justification (Anglian Water Services Ltd AS-1102)
- Supports requirements to demonstrate sufficient wastewater treatment and disposal. There is currently no headroom at SWF WRC, and dry weather flow would exceed permit by the end of the Plan period. Anglian Water would only support a planning application with a pre-occupancy condition until the growth scheme is delivered. Recommends phasing smaller sites to complete in 2029/30 to align with the scheme (Anglian Water Services Ltd AS-1102, AS-1147)
- Site is within the SWF WWTW area which is operating in exceedance of its environmental permit for discharge volume. Anglian Water has identified a growth scheme, although additional allocated sites may present challenges in the short to medium term. May be necessary to consider phasing to align with the scheme. Supports the site specific policy requirement to demonstrate that there is sufficient WWTW capacity (Environment Agency AS-726)
- Gravity sewers and a surface water sewer and discharge point within the site. Requirement to protect existing sewers and their easements should be included (Anglian Water Services Ltd AS-1102)
- Supports the HIA and identified suitable mitigation measures, including detailed design needing to pay particular attention to landscape screening, building heights, and silhouettes to protect these key views from the south.

Supports the inclusion of these as criteria within the policy and supporting text, and the policy requirement for a further, detailed HIA/LVIA to accompany and inform any planning application to consider the impact of development and set out appropriate mitigation measures (Historic England AS-157)

- Acknowledges the expansion of the existing primary school and early years provision and would welcome early engagement to ensure that security requirements do not conflict with Department for Education requirements (Essex Police AS-989)
- Supports the primary education and early years policy requirements. ECC expects the land to be provided by the developer and a proportionate developer contribution to enable either the expansion of the existing nursery or the provision of a new nursery (Essex County Council AS-1082)
- Objects as the development would cause substantial and irreversible loss of Green Belt and harm to the natural environment and visual character of the area (Runwell Parish Council AS-39)
- Object to the development due to inadequate infrastructure and appropriate mitigation, individually or cumulatively alongside other proposed developments and existing infrastructure needs, including issues with rail, road, water supply, education and healthcare facilities, telecommunications, utilities, sewage network, flood mitigation, and veterinary infrastructure and facilities operating at full capacity (Stow Maries Parish Council AS-1031, Runwell Parish Council AS-39, Rettendon Parish Council AS-1052)
- Development has poor accessibility and is of a scale that is disproportionate to the existing settlement (Rettendon Parish Council AS-1052)
- Object to the development due to the adverse impact on the environment and wildlife
- New development should not be built on agricultural land
- The size of Rettendon will increase dramatically. It would be better to spread the growth across a wider geography
- The development would not be consistent with Rettendon's role in the settlement hierarchy
- Development would harm the significance of heritage assets
- The development poses a threat to the rural and idyllic nature of the local area
- Development will affect local vistas and cause light pollution at night
- Concern over the disruption caused during construction
- Concern over the legitimacy of the Local Planning Authority. If the new unitary authority comes into force, it could supersede the existing local authority in the next year or so. It should therefore be the responsibility of the new authority to make these plans rather than the existing local authority which may not exist for much longer
- The Local Plan fails to address the impact of the development proposals on the existing commercial fishing lake. The addition of 350 homes near the lake would negatively affect the rural business and the local amenity. A buffer zone would be needed to protect the commercial interests of the fishing lake business.

CCC Response
Anglian Water's responses have been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform proposed modifications including in relation to utility easements and sewers.
CCC welcomes ongoing engagement to ensure that security requirements do not conflict with Department for Education requirements
To meet our development needs it is inevitable that some agricultural land will be used for development.
The site allocation is supported by the plan evidence base including an Infrastructure Delivery Plan and traffic modelling. The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.
The Council commissioned Essex Highways to review and consider the key issues raised in the highway and transportation responses received to the consultation. This is given in Appendix 2 and includes a review of representations received from members of the public. Essex Highways response has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform any proposed minor modifications to the Local Plan.
The IIA Report assessed the option across a range of criteria, including accessibility and connectivity to services.
Local Plan Strategic Policy S4 sets requirements to conserve and enhance the natural environment and paragraph 5.46 sets out that New development should minimise pollution of the natural environment including potential light pollution from glare and spillage on intrinsically dark landscapes and nature conservation.
Any impact on amenities from construction activity is a relative short term impact which can be managed by appropriate planning conditions as part of any future planning application.
The Plan is being prepared under the governance of Chelmsford City Council.
The site allocation is supported by the plan evidence base including landscape sensitivity and capacity assessments, heritage assessments, IIA and wildlife reviews. Site specific potential impacts on the nearby commercial fishing lake would be considered as part of the planning application process.
The proposed housing growth is considered appropriate and proportionate to the size of the village and is underpinned by an up-to-date evidence base.

Location 21 – Woodham Ferrers

Growth Site Policy 21a – Land North of Old Rectory Lodge, Main Road, Woodham Ferrers

Key statistics:

Consultation point	Total number of responses
Growth Site Policy 21a – Land North of Old Rectory Lodge, Main Road, Woodham Ferrers	8

Summary of Representations – main issues and requested changes:

- Support for the allocation, policy requirements and housing trajectory (Birkett Hall Homes Ltd AS-563)
- Supports policy requirement for suitable flood risk management and SuDS, and network of multifunctional green infrastructure and would welcome reference to Anglian Water's Surface Water Risk Management Guidance in the reasoned justification (Anglian Water Services Ltd AS-1103)
- Supports requirements to demonstrate sufficient wastewater treatment and disposal. There is currently no headroom at SWF WRC, and dry weather flow would exceed permit by the end of the Plan period. Anglian Water would only support a planning application with a pre-occupancy condition until the growth scheme is delivered. Recommends phasing smaller sites to complete in 2029/30 to align with the scheme (Anglian Water Services Ltd AS-1103, AS-1148)
- Site is within the SWF WWTW area which is operating in exceedance of its environmental permit for discharge volume. Anglian Water has identified a growth scheme, although additional allocated sites may present challenges in the short to medium term. May be necessary to consider phasing to align with the scheme. Supports the site specific policy requirement to demonstrate that there is sufficient WWTW capacity (Environment Agency AS-727)
- Rising main (pressurised sewer) within the site. Requirement to protect existing sewers and their easements should be included (Anglian Water Services Ltd AS-1103)
- Concern that current infrastructure cannot cope and new development will not be accompanied by improved infrastructure e.g. schools, doctors, dentists, local transport.

CCC Response
The Local Plan should be read as a whole, and other policies will ensure there will be sufficient waste water capacity to serve the development. For example, Policy S4 requires developers to demonstrate that sufficient waste water treatment capacity is available ahead of occupation to ensure no deterioration in the quality of receiving waters. Policy S10 also states that permission will only be granted if it can be demonstrated that there is sufficient appropriate infrastructure capacity to support the development or that such capacity can be delivered by the proposal.
It would not be prudent to change the phasing of the small sites served by South Woodham Ferrers WRC as it is anticipated that these sites will be coming forward very soon, perhaps before the plan is adopted. The number of houses coming forward on these sites are only a small proportion of all sites coming forward that are being served by this WRC. In addition, the housing trajectory is updated annually.
Minor modification will be proposed to ensure the layout safeguards suitable access for the maintenance of sewerage infrastructure.
The site allocation is supported by the plan evidence base including Strategic Flood Risk Assessments, Sequential and Exception Test, Water Cycle Studies, Landscape Sensitivity and Capacity Study, Air Quality Assessment and traffic modelling. The Additional Sites Housing Sites Studies October 2025 (PL018) demonstrates how the site can be developed to suitable achieve the proposed number of homes and supporting land uses such as open space and sustainable

urban drainage systems (SuDS). The site allocation is considered a sustainable and deliverable locations for development and consistent with the plan priorities and other policies including the Spatial Strategy.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.

Growth Site Policy 21b – Land North of Congregational Church, Main Road, Woodham Ferrers

Key statistics:

Consultation point	**Total number of responses**
Growth Site Policy 21b – Land North of Congregational Church, Main Road, Woodham Ferrers	9

Summary of Representations – main issues and requested changes:

- Support for the allocation, policy requirements and housing trajectory (Birkett Hall Homes Ltd AS-563)
- Supports policy requirement for suitable flood risk management and SuDS, and network of multifunctional green infrastructure and would welcome reference to Anglian Water's Surface Water Risk Management Guidance in the reasoned justification (Anglian Water Services Ltd AS-1104)
- Supports requirements to demonstrate sufficient wastewater treatment and disposal. There is currently no headroom at SWF WRC, and dry weather flow would exceed permit by the end of the Plan period. Anglian Water would only support a planning application with a pre-occupancy condition until the growth scheme is delivered. Recommends phasing smaller sites to complete in 2029/30 to align with the scheme (Anglian Water Services Ltd AS-1104, AS-1149)
- Site is within the SWF WWTW area which is operating in exceedance of its environmental permit for discharge volume. Anglian Water has identified a growth scheme, although additional allocated sites may present challenges in the short to medium term. May be necessary to consider phasing to align with the scheme. Supports the site specific policy requirement to demonstrate that there is sufficient WWTW capacity (Environment Agency AS-728)
- Extend site to the north to include the former builders yard. Existing rights of way may hamper the future development of the northern part of the site
- Concern that current infrastructure cannot cope and new development will not be accompanied by improved infrastructure e.g. schools, doctors, dentists, local transport.

CCC Response
The Local Plan should be read as a whole and other policies will ensure there will be sufficient waste water capacity to serve the development. For example, Policy S4 requires developers to demonstrate that sufficient waste water treatment capacity is available ahead of occupation to ensure no deterioration in the quality of receiving waters. Policy S10 also states that permission will only be granted if it can be demonstrated that there is sufficient appropriate infrastructure capacity to support the development or that such capacity can be delivered by the proposal.
It would not be prudent to change the phasing of the small sites served by South Woodham Ferrers WRC as it is anticipated that these sites will be coming forward very soon, perhaps before the plan is adopted. The number of houses coming forward on these sites are only a small proportion of all sites coming forward that are being served by this WRC. In addition, the housing trajectory is updated annually.
Minor modification will be proposed to ensure the layout safeguards suitable access for the maintenance of sewerage infrastructure.
There is no public right of way (PROW) in the northern part of the GS21b but a PROW runs along the northern boundary of GS21a. Sufficient land has been allocated in the Local Plan to meet the Council's housing needs for the period of the plan.
The site allocation is supported by the plan evidence base including Sequential and Exception Test, Water Cycle Studies, Landscape Sensitivity and Capacity Study, Air Quality Assessment and traffic modelling. The Additional Sites Housing Sites Studies October 2025 (PL018) demonstrates how the site can be developed to achieve the proposed number of homes and supporting land uses such as open space and sustainable urban drainage systems (SuDS). The site allocation is considered a sustainable and deliverable location for development and consistent with the plan priorities and other policies including the Spatial Strategy.
The latest highway modelling does not consider the overall impact on the local or strategic highway network will be severe.
The site policy requires financial contributions to services and facilities including education and healthcare provision, and to provide appropriate improvements, as necessary to the local and strategic road network.

Key Consequential Changes

This section of the consultation document provides focused changes to specific parts of the Pre-Submission Local Plan to reflect the proposed additional site allocation policies. These are called key consequential changes and are shown as tracked changes in this part of the Additional Sites Document.

Strategic Policy S6 – Housing and Employment Requirements

Key statistics:

Consultation point	Total number of responses
Strategic Policy S6 – Housing and Employment Requirements	36

Summary of Representations – main issues and requested changes:

- An increase in the housing requirement will increase demand for employment space. Essex and Suffolk Water can only support employment developments that are necessary and appropriate and designed to achieve the highest standards of water efficiency (Essex and Suffolk Water AS-155)
- Supports the policy, including the Housing Supply Table (Croudace Homes AS-412)
- Plan makes provision for only 84% of the Council's local housing need as defined in the Standard Method (Bloor Homes AS-474, Croudace Homes AS-910, Gay Bowers Limited AS-169, Oliver Ricketts AS-319, Hallam Land Management AS-948, Martin Grant Homes, AS-1062, Dandara AS-1134, Obsidian Strategic AS-1142, The Bucknell Family AS-1127, Iceni AS-1152, Higgins Homes AS-389, Greystoke CB AS-1079)
- Insufficient buffer (8.3%) between housing need and supply (Bloor Homes AS-474, Martin Grant Homes AS-129, Dandara AS-1134, AS-1137, AS-1140, Obsidian Strategic AS-1142)
- Over-reliance on windfall delivery (10% of supply) (Bloor Homes AS-474)
- Plan does not appreciate the urgency of providing 'special needs housing' (J&T Wardrop and the Wardrop Trust AS-1053)
- Plan does not take account of slower than anticipated build-out rates and risks associated with the delivery of new settlements including delivery of significant infrastructure projects (Dandara AS-1134, AS-1137, AS-1140)
- Notes current slippage in the delivery of housing from sites allocated in the adopted Local Plan (Dandara AS-1134, AS-1137, Obsidian Strategic AS-1142, Higgins Homes AS-389)
- Uncertainty around delivery of the sites means that the Plan is making provision for less than 80% of local housing need and therefore does not comply with the transitional arrangements in the NPPF (Obsidian Strategic Asset Management Ltd AS-654)
- Question whether the Council can still rely on the transitional provisions given that the Additional Sites consultation amends the Regulation 19 Plan, and it was not available prior to the 12th March 2025 cut off required by paragraph 234 and footnote 82 of the December 2024 Framework (Dandara AS-1134, AS-1137, Greystoke CB AS-1079)
- Given timescales for likely adoption, the Plan period should be revised to 2028 - 2043 and the Plan should allocate sites to meet that plan-period (Iceni AS-1152, Greystoke CB AS-1079)
- Issue of no longer being able to demonstrate five year housing land supply within six months of publication of Regulation 19 Plan. This emphasises necessity for the Plan to retain considerable flexibility, allowing the Council to adapt to evolving circumstances and maximise the contribution of deliverable sites to avoid ongoing housing land supply failure (CHP AS-955, 956, M Scott Properties Ltd AS-1121, Rosehart Properties Ltd AS-238)
- Inconsistency in housing land supply position - the IIA (para 2.3.1) says 3.88 years and Focused Consultation document (para 1.4) says 4.93 years on submission of Plan without additional sites (Croudace Homes AS-908)

- On submission/ adoption, the Council will be unable to demonstrate a five year housing land supply, and the new Plan will require immediate review (Bloor Homes (Eastern) AS-453, Croudace Homes AS-910, The Bucknell Family AS-1127, Higgins Homes AS-389)
- Plan should include a policy which commits the Council to undertaking an immediate/early update of the Plan to ensure housing needs are met in full (Iceni AS-1152, Higgins Homes AS-389, John Hart AS-471, Rosehart Properties Ltd AS-238, Simon Knight AS-418)
- Plan does not address issues of unaffordability or homelessness (Hallam Land Management AS-948, Higgins Homes AS-389)
- Plan should allocate less than 162,646 sqm of employment floorspace. Reference is made to Lichfield's December 2024 evidence which recommends the Council use Scenario 1 as a starting point (Boreham Conservation Society AS-1019)
- The calculation of employment requirement is flawed because it justifies the increase from 162,646sqm to 173,146sqm based on meeting an increased labour supply arising from higher housing numbers under the 2024 NPPF, but the Council is not meeting the minimum housing numbers under 2024 NPPF (Greystoke CB AS-1083)
- Plan makes insufficient provision for employment land to meet labour supply needs. The ELR method under-estimates the need because it makes no allowance for losses, assumes low job densities and provides no buffer (Greystoke CB AS-1083)
- No assessment has been undertaken to consider strategic logistics need, as required in the NPPF and PPG (Greystoke CB AS-1083)
- Policy S6 should define job number targets in place of floorspace requirements (Greystoke CB AS-1083)
- Windfall allowance calculation is incorrect because the new sites that have been identified should be deducted from the total windfall figure
- Include measures in the Plan to reduce the need for additional housing.

CCC Response
The housing requirement in the plan meets at least 80% of the revised standard method housing need in line with the Government's latest plan-making transitional arrangements. This is consistent with the NPPF's objective of preparing and maintaining up to-date plans in order to make consistent provision for housing and other needs.
Reallocating the supply buffer and undertaking an Additional Site Consultation to be able to demonstrate that we can achieve a revised Housing Requirement that meets the NPPF transition arrangements is pragmatic and appropriate as the Council had already prepared and consulted on an evidence base to support a spatial strategy of this quantum and has updated its housing evidence to support the revised housing requirement.
There is no national requirement for a buffer to be allocated in the supply trajectory as the NPPF manages risks to supply through the need to maintain a 5 year land supply and the Housing Delivery Test. Also Para 78c of the NPPF 2024 states that for decision-making a 20% buffer is applied to the 5 year supply of specific deliverable sites where a local planning authority has a housing requirement adopted in the last five years examined against a previous version of the

Framework and whose annual average housing requirement is 80% or less of the most up to date local housing need figure calculated using the standard method.
Windfall development comprises sites that have unexpectedly become available over time, and which were not anticipated by the council as part of a Local Plan. These sites are granted planning permission in accordance with adopted local and national policies and contribute towards housing figures.
Para 75 of the NPPF directs Local Planning Authorities to consider historic windfall delivery rates. The Submission Housing Topic Paper shows trends over a considerable length of time. Average rates assumed at Pre-Submission stage (175) were below the actual average (196) so have been increased to 195 per annum in the Additional Sites Consultation as justified by historic windfall completions.
Policy DM1 and individual site allocation policies set out requirements for new Specialist Residential Accommodation in line with the Strategic Housing Needs Assessment (November 2024).
The timing of new supply which include a mix of site typologies utilises information from developers and is explained further in the Submission Housing Topic Paper to reflect the latest Housing Site Schedule and the Additional Sites Consultation Document.
The Local Plan is anticipated to be adopted in late 2026 or early 2027 giving the plan a 14-15 year time period. Although this could be below the preferred 15 year time period set out in the NPPF, this is not a set requirement and would remain an appropriate time scale given that it is a 'transitional' plan and proposing strategic locations that will deliver beyond the plan period.
The initial Regulation 19 consultation was undertaken on the full draft or Pre-Submission Local Plan. The subsequent Regulation 19 consultation was focused on adding some new/expanded sites and consequential plan changes. It did not significantly change the content of the Pre-Submission Local Plan such as the Spatial Strategy. As such, the Regulation 19 Local Plan was available prior to the 12th March 2025 as required for transitional plans in Annex 1 of the NPPF 2024.
When the Additional Sites Document was published for consultation, the Council could demonstrate a 5YHLS of 3.88 years. This was forecast to be 4.93 years at Local Plan submission without the additional sites and 5.75 years with the additional sites.
As set out in Policy S13 a full or focused formal review of the Local Plan will commence two years after its adoption in line with national planning policy.
The Local Plan makes provision for new affordable housing over the plan period to help address affordability and homelessness including in Policy DM1 and individual site allocation policies. This is informed by the Strategic Housing Needs Assessment (November 2024). The national standard method also uses a formula that incorporates a baseline of local housing stock which is then adjusted upwards to reflect local affordability to identify the minimum number of homes expected to be planned for.
The policy is informed by the Chelmsford Employment Land Review (including the 2023 Report and Focused Update 2024) which considers the most up-to-date assumptions, guidance and data. The ELR considers the indigenous employment needs arising in Chelmsford and – where relevant – any needs identified from across the relevant Functional Economic Market Area. The approach to the ELR aligns with the PPG and represents an appropriate and proportionate basis for planning for longer-term employment needs including in relation to B8 workforce

jobs density. The plan exceeds the minimum employment requirements in the ELR over the plan period through flexible site allocations across a range of different locations and sizes alongside existing commitments. The use of 'around' employment floorspace figures in specific site allocation policies allows for an appropriate degree of flexibility in provision.

Strategic Policy S7 – The Spatial Strategy

Key statistics:

Consultation point	**Total number of responses**
Strategic Policy S7 – The Spatial Strategy	62

Summary of Representations – main issues and requested changes:

- Largely supports the Plan and recommends continued engagement with the Council to ensure that the increased housing requirements can be supported by upgrades to water supply beyond 2030 (Essex and Suffolk Water AS-155)
- Essex Police DOCO seeks early involvement in masterplanning and design coding to support the Spatial Strategy (Essex Police DOCO AS-985)
- Support inclusion of the additional sites in the focused consultation (Halley Developments AS-406, Mr & Mrs Thomasin - Foster & Wilkinson AS-907, AS-914, AS-943, AS-945, Welbeck Strategic Land V Limited AS-494, Mrs Mary Rance AS-914, CHP AS-956)
- Supportive of Spatial Strategy (Iceni AS-493, Welbeck Strategic Land V Limited AS-495)
- Supports inclusion of a broader mix of large, medium and small housing allocations within the policy (Croudace Homes AS-413)
- Plan should allocate additional small/ medium scale sites to ensure consistency with the NPPF (Bloor Homes (Eastern) AS-477, Landvest AS-481, AS-982, Essex Alms Housing AS399, AS-400, AS-401, Mr and Mrs B Hearn AS-407, J&T Wardrop and the Wardrop Trust AS-1053)
- Over-reliance on one large allocation to deliver a substantial proportion of the housing requirement (Dandara AS-1134, AS-1137, AS-1140, Obsidian Strategic AS-1142)
- Assess impacts on the SSSIs and Ancient Woodland at the Local Plan stage to consider cumulative impacts (National Trust AS-30)
- Local Plan should factor phased delivery where necessary due to infrastructure constraints and lead-in times for capital investment (Anglian Water Services Ltd AS-1151)
- Requirement to identify and safeguard land for new built healthcare infrastructure to support planned growth as well as financial contributions to mitigate development impact. It is likely that a new facility will be required during the Plan period to support development southeast of Chelmsford (Mid and South Essex Integrated Care Board AS-644)

- Concern that additional allocations prioritise less sustainable locations further down the settlement hierarchy over available sites in/around Chelmsford (Taylor Wimpey Strategic Land AS-387, Taylor Wimpey Strategic Land AS-12, Crest Nicholson AS-480, Vistry Strategic Land AS-1130, AS-1132, Marriage Family AS-457) including failing to optimise existing strategic growth areas (Barratt David Wilson AS-1068)
- The spatial strategy should be amended to identify suitable Grey Belt sites and a Green Belt Review should be undertaken to enable Green Belt release where exceptional circumstances exist (Essex Alms Housing AS-615, Obsidian Strategic AS-1143, Croudace Homes AS-910, AS-912, Rosehart Properties Ltd AS-239, John Hart AS-471, Martin Grant Homes AS-166, Essex Alms Housing AS-400, Vistry Strategic Land AS-1130, AS-1132, Taylor Wimpey Strategic Land AS-12, J&T Wardrop and the Wardrop Trust AS-1053, M Scott Properties Ltd AS-1123)
- Requests additional text for the Settlement Hierarchy to guide decisions on growth beyond allocated sites, including positive consideration of potential sites beyond settlement boundaries to support windfall delivery and housing supply (Gay Bowers Limited AS-106)
- Policy is unjustified as it prioritises short-term deliverability over the most sustainable spatial option (Strutt and Parker (Farms) Limited AS-1122)
- Further evidence required to demonstrate that proposed housing allocation numbers are realistic (Bloor Homes (Eastern) AS-477)
- Green Wedges should have been reviewed. Instead, site selection process has discounted sites within the Green Wedge as a matter of principle, rather than assessing whether individual sites could contribute positively to the Plan's objectives. (The Bucknell Family AS-1129, Cliffords Group Ltd AS-863) Van Diemans Property Company AS-816, The Bucknell Family AS-1129, Obsidian Strategic Asset Management Ltd AS-672)
- Boreham, as a Key Service Settlement, is ranked as a suitable and sustainable location for strategic employment growth but has been excluded from further new strategic housing growth. Likely to be a misalignment between local housing and employment provision (Wates Developments Limited AS-998)
- SGS18a is contrary to the Spatial Strategy. The Chignal villages are not included in the Local Plan's Settlement Hierarchy reflecting the absence of services and infrastructure required to support growth (Chignal Parish Council AS-965)
- Higher housing growth should be identified in Danbury as a sustainable location for growth (Martin Grant Homes AS-1065)
- Policy is unsound due to reliance on a new settlement east of Chelmsford and uncertain A12 Junction 19 infrastructure, taking into account of reasonable alternatives (Dandara AS-1135, AS-1138, AS-1141, Obsidian Strategic AS-1143)
- Potential benefits of further allocations north of SWF, or smaller sites adjacent to existing higher order settlements have not been considered (Dandara AS-1138, AS-1141)
- Growth should be concentrated in North-East Chelmsford, leveraging planned infrastructure (e.g. new bypass, Beaulieu Park railway station, park-and-ride,

rather than dispersing development to smaller, less sustainable villages (Higgins Homes AS-613)

- The additional sites strategy does not identify employment opportunities to be delivered early and in parallel with housing growth (Van Diemans Property Company AS-811, The Bucknell Family AS-1129)
- Plan is too reliant on larger employment sites which may be delayed due to the current economic climate. It should recognise local employment needs including small and medium sized businesses and allocate a mix of employment sites (The Bucknell Family AS-1127)
- The proposed scale of development is unsustainable
- Vital that planned growth includes adequate road infrastructure (Chelmsford Garden Community Council AS-92)
- Reps promoting alternative/ additional sites include: Gay Bowers Limited AS-106, Kingsbury Land Promotion Limited AS-174, Taylor Wimpey Strategic Land AS-12, AS-387, Iceni AS-493, Bloor Homes (Eastern) AS-477, Essex Alms Housing AS-400, AS-401, AS-614, Higgins Homes AS-613, Obsidian Strategic Asset Management Ltd AS-672, AS-1143, Van Diemans Property Company AS-816, J & T Wardrop and the Wardrop Trust AS-1054, Mr & Mrs Thomasin - Foster & Wilkinson AS-907, AS-914, AS-943, AS-945, AS-943, Mr and Mrs B Hearn AS-617, John Hart AS-471, Gladman Developments Ltd AS-994, AS-995, AS-996, AS-997, Landvest AS-982, Wates Developments Limited AS-998, Hallam Land Management AS-992, Harris Strategic Land Limited AS-1106, Strutt and Parker (Farms) Limited AS-1122, Tritax Chelmsford Propco Ltd AS-1126, Dandara AS-1135, AS-1136, AS-1138 Barratt David Wilson AS-1068, Martin Grant Homes AS-166, AS-1062, AS-1065, The Bucknell Family AS-1129, Rosehart Properties Ltd AS-239, Vistry Group AS-405, Simon Knight AS-418, Crest Nicholson AS-480, A.G. & P.W.H Speakman AS-880, Cliffords Group Ltd AS-863, AS-870, Cliffords Group Ltd Mr Mark Peters AS-857, Mr Graham Weal AS-107, Vistry Strategic Land AS-1130, AS-1132, Richborough AS-970, Bloor Homes (Eastern) AS-973, Marriage Family AS-457, Mrs Mary Rance AS-914.

CCC Response
The Settlement Hierarchy ranks settlements according to their size, function, characteristics and sustainability. It is one of many factors used to inform where development is most sustainable and informs planning decisions so is retained. The Plan allocates a range of sites of different sizes across the settlement hierarchy.
The plan is informed by a wide range of appraisals, including the IIA and habitats assessment, and evidence base reports including an updated Infrastructure Delivery Plan, Viability Assessment, Transport Modelling, Housing Capacity in Chelmsford City Centre and Urban Area and Open Space Assessment
The Council's Infrastructure Delivery Plan (IDP) sits alongside the Local Plan. This assesses the current status of infrastructure, including healthcare, transport and water supply and treatment infrastructure, across Chelmsford and identifies what new infrastructure investment is required to support the Local Plan growth, when it is needed, and funding sources
The Council can meet its development requirements without needing to undertake a Green Belt or Green Wedge review. This approach accords with National Planning Guidance.

The site allocations along with the addition of existing permissions and windfall sites creates a good range of site sizes to assist in delivery of sites to meet housing needs over the Plan period.
The deliverability of all sites proposed for allocation have been assessed and all sites have detailed policies to address site specific considerations.
The Plan meets the level of housing and employment development as required through national policy.
The employment allocations alongside existing commitments are expected to meet the identified employment needs. The use of 'around' employment floorspace figures in specific site allocation policies allows for an appropriate degree of flexibility in provision. DM4 protects, and allows for expansion of, existing employment uses – the Plan should be read a whole, so it is not necessary to repeat in Policy S7. Policies DM8 and DM11 provide support for the growth and expansion of rural businesses – no need to add further details to Strategic Policies.
The Council has considered the suitability of alternative development strategies and sites to accommodate development as part of the plan preparation process. Some areas/sites proposed for development by developers/landowners have been rejected as part of this process.

Monitoring Framework

Key statistics:

Consultation point	**Total number of responses**
Monitoring Framework	0

Summary of Representations – main issues and requested changes:

- No main issues.

Draft Policies Map

Key statistics:

Consultation point	**Total number of responses**
Legend	0
Map: SGS1dd	0
Map: SGS18a	2
Map: SGS19	2
Map: SGS7b	0
Map: SGS9a	1
Map: GS9b and GS9c	1
Map: GS14b	1
Map: SGS11c	1
Map: SGS17c, SGS17d and GS17e	0
Map: SGS20	5
Map: GS21a and GS21b	0

Summary of Representations – main issues and suggested changes:

- Map SGS9a – policy text and mapping are confusing because they do not differentiate between the original extent of the proposed allocation and the proposed enlarged area in the Additional Sites consultation (Boreham Conservation Society AS-1048)
- Map SGS17e – query on the alignment of the northern boundary of the site (Eugene Kinsella AS-346)
- The images in the maps section are blurry, meaning it was difficult to review all the information.

CCC Response
The new allocation of 14,000 m² is an expansion of the original allocation of 3,500m² and the entire allocation is therefore shown. This is the same for the expanded housing allocations at Bicknacre (SGC11c) and Ford End (GS14b).
The discrepancy between the SHELAA submission and the boundary of the site allocation is noted. Thee parcel of land excluded from the site allocation is included within a revised Defined Settlement Boundary notation, covering the complete site area as submitted to the SHELAA. The allocation policy therefore will not preclude this portion of the site being included in any future planning proposal.
Concerns about blurry maps are noted. Paper versions of the Policies Map were available to purchase and view at the Council Offices and public exhibitions during the consultation period.

Development Trajectory

Key statistics:

Consultation point	**Total number of responses**
Development Trajectory	3

Summary of Representations – main issues and suggested changes:

- Trajectory indicates delivery of some sites in the SWF WRC catchment (East Hanningfield, Rettendon Place and Woodham Ferrers) before 2030 Recommends these sites phased to complete in 2029/30 to align with the WRC growth scheme (Anglian Water Services Ltd AS-1150)
- Trajectory forecasts 1,347 dwellings from 14 sites by 2029/30, although there is insufficient clarity on delivery assumptions and timescales may be unrealistic (Martin Grant Homes AS-1064)
- Trajectory lacks robust evidence of deliverability, relies heavily on long-standing and undetermined strategic allocations, and has not been updated to reflect reduced supply (from 3,016 to 2,510 dwellings), creating a risk of short- to medium-term undersupply. Council should apply a 10% non-implementation allowance to permissions, update phasing, provide clear evidence of deliverability (particularly for strategic sites), introduce

contingency measures, and utilise all suitable sites (Obsidian Strategic Asset Management Ltd AS-673)
- Lack of consolidated development trajectory is a material omission (Taylor Wimpey Strategic Land AS-12).

CCC Response
Anglian Water's response has been used by CCC to understand and respond to matters of concern raised in this You Said We Did report and to inform any proposed minor modifications to the Local Plan.
The Housing Trajectory in the Pre-Submission Local Plan and timings within it are established through the Council's Five-Year Housing Land Supply Methodology. The Trajectory is updated annually, and the latest available Housing Site Schedule (2026) will be updated online . A number of Strategic Growth Sites rolled forward from the adopted Local Plan including greenfield sites have planning permission or resolutions to grant planning permission including North of South Woodham Ferrers, North of Broomfield and North East Chelmsford.

Appendices

This section of the consultation document contains two appendices.

Consultation point	Total number of responses
Appendix A – Glossary	1
Appendix B – Table of previous Pre-Submission (Regulation 19) Local Plan paragraph numbers	0

Summary of Representations – main issues and requested changes:

- No main issues

CCC Response
No changes

REVIEW OF THE LOCAL PLAN
FOCUSED CONSULTATION ADDITIONAL SITES (REGULATION 19) STATEMENT OF REPRESENTATION PROCEDURE AND STATEMENT ON AVAILABILITY OF PROPOSED SUBMISSION DOCUMENTS FOR INSPECTION

Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended) - Regulations 7, 19, 20 and 35

Chelmsford City Council is inviting your comments on the following documents:

- Chelmsford Local Plan – Focused Consultation Additional Sites (Regulation 19) Document
- Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum.

The City Council is publishing the Chelmsford Local Plan – Focused Consultation Additional Sites (Regulation 19) Document for consultation from 20 November 2025 to 8 January 2026. It is accompanied by the Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum. This is in accordance with Regulations 19 and 20 of the Town and Country Planning (Local Planning) (England) Regulations 2012.

The Local Plan shapes future growth and development across the whole of Chelmsford City Council's area. It sets out a positive vision, identifies where and how new development should take place in the future as well as areas for protection. It includes strategic policies, site allocation policies, development management policies and a Policies Map for determining all forms of planning applications. We adopted our current Local Plan in May 2020. We need to review the plan at least every five years to make sure it remains up to date and meets the changing needs for development growth to 2041.

The Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum comprises a Sustainability Appraisal (SA) and Strategic Environmental Assessment (SEA), Habitats Regulations Assessment (HRA), Health Impact Assessment (HIA) and Equality Impact Assessment (EqIA).

This note has nine parts:

- PART 1 – Background
- PART 2 – What is a Regulation 19 Consultation
- PART 3 – Legal Compliance and Duty to Co-operate
- PART 4 – Soundness
- PART 5 – Where can I view the consultation documents?
- PART 6 – How can I comment?
- PART 7 – Appearing at Independent Examination
- PART 8 – What will happen with my representation?
- PART 9 – Statement on availability of proposed submission documents for inspection

The consultation period runs from 10am on 20 November 2025 until 4pm on 8 January 2026
Comments received before or after this time cannot be accepted.

PART 1 – Background

The Council carried out a consultation on the full Pre-Submission Local Plan in February to March 2025. This was also a Regulation 19 consultation. Following the conclusion of this consultation, several significant events have taken place:

- Three strategic sites in the Pre-Submission Local Plan, which were expected to contribute to housing delivery in the next five years, have either stalled or have been significantly delayed
- The reassessment and re-profiling of the Council's housing land supply (August 2025) shows that other development sites will not be built as quickly as originally envisaged in the next five years
- As the adopted Local Plan became more than five years old on 27 May 2025 the housing need figure is out of date which means for decision making on current planning applications the Council does not have 5 years of deliverable housing supply
- The Government announced the cancellation of the A12 Development Consent Order (DCO) widening scheme.

In response to the significant events above, the Council has identified additional site allocations for inclusion within the review of the Local Plan to improve the 5 Year Housing Land Supply (5YHLS) position to ensure that it can be found "sound" at examination. It will also allow time to assess the implications of the cancellation of the A12 DCO widening scheme and to continue discussions with National Highways and Homes England regarding a funding solution.

This is a focused consultation which seeks representations on additional site allocations for inclusion within the review of the Local Plan to ensure that sufficient land is identified. The additional sites comprise 11 new housing sites, three expanded housing sites and one expanded employment site. The additional sites development trajectories and key consequential plan changes arising from the additional sites allocation policies are also subject to consultation alongside an Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum which assesses the changes.

The consultation will be undertaken in accordance with Regulation 19 of the Local Plan Regulations and the Council's Statement of Community Involvement.

PART 2 – What is a Regulation 19 Consultation

As a Local Planning Authority, the Council must publish the version of the Local Plan that it intends to submit to the Planning Inspectorate for Independent Examination. This allows for representations to be made which can be considered at Independent Examination. This is known as the publication stage, in accordance with Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended www.legislation.gov.uk/uksi/2012/767/contents.

For Chelmsford, this is the Chelmsford Local Plan – Pre-Submission (Regulation 19) Document (the 'Plan') and aspects of the plan contained within the Focused Consultation Additional Sites (Regulation 19) Document.

Following this consultation the Council will submit both the Pre-Submission version of the Local Plan published for consultation in February to March 2025 and this focused consultation document for examination by an independent Planning Inspector. Representations submitted to both consultations will also be submitted in full. **There is no need to resubmit representations submitted as part of the previous Pre-Submission (Regulation 19) Local Plan consultation.**

If the Pre-Submission Local Plan and the Additional Sites (including the key consequential plan changes) contained within this focused consultation are accepted by the Planning Inspector, they will be incorporated together in a single new Local Plan before being finalised for adoption.

The Planning Inspector undertaking the Independent Examination will assess whether the Local Plan has been prepared in line with the relevant legal requirements (including the duty to co-operate) and whether it is 'sound'.

PART 3 – Legal Compliance and Duty to Co-operate

You should consider the following before making a representation on legal compliance:

- The Plan should be included in the Council's current Local Development Scheme (LDS) and the key stages set out in the LDS should have been followed. The LDS is effectively a programme of work prepared by the Council, setting out the plans it proposes to produce. It will set out the key stages in the production of any Plans which the Local Planning Authority proposes to bring forward for Independent Examination. If the Plan is not in the current LDS it should not have been published for representations. The Council's LDS is available to view on its website at: https://www.chelmsford.gov.uk/media/ehzd1alh/chelmsford-local-development-scheme-2025-2028.pdf
- The process of community involvement for the Plan in question should be in general accordance with the Council's Statement of Community Involvement (SCI). The SCI sets out the Council's strategy for involving the community in the preparation and revision of plans and the consideration of planning applications. The Council's SCI is available to view on the Council's website at: www.chelmsford.gov.uk/sci
- The Council is required to provide a Sustainability Appraisal (SA) report when it publishes a Plan. This should identify the process by which the SA has been carried out, and the baseline information used to inform the process and the outcomes of that process. The SA is a tool for assessing the extent to which the Plan, when judged against reasonable alternatives, will help to achieve relevant environmental, economic and social objectives. The SA for this Plan is included within the published Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum.
- The Plan should comply with all other relevant requirements of the Planning and Compulsory Purchase Act (PCPA) and the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended.

You should consider the following before making a representation on compliance with the duty to co-operate:

- Section 33A of the PCPA requires the Council to engage constructively, actively and on an ongoing basis with neighbouring authorities and certain other bodies over strategic matters during the preparation of the Plan. The Council's Additional Site - Duty to Co-operate Position Statement (November 2025) provides an update on the activities undertaken by Chelmsford City Council (CCC) in respect to the Duty to Co-operate on the Review of the adopted Chelmsford Local Plan, and is available to view on the Council's website at: https://www.chelmsford.gov.uk/media/etkjneup/dtc005-additional-sites-duty-to-cooperate-position-statement-november-2025.pdf
- Non-compliance with the duty to co-operate cannot be rectified after the submission of the plan. Therefore, the Inspector has no power to recommend modifications in this regard. Where the duty has not been complied with, the Inspector cannot recommend adoption of the Plan.

There is no need to resubmit representations submitted as part of the previous Pre-Submission (Regulation 19) Local Plan consultation.

PART 4 – Soundness

A Local Planning Authority should submit a Plan for Independent Examination which it considers to be "sound". The tests of soundness are set out in the National Planning Policy Framework (NPPF). Plans are sound if they are:

Positively prepared – providing a strategy which, as a minimum seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring authorities is accommodated where it is practical to do so and is consistent with achieving sustainable development

Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence

Effective – deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and

Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in the NPPF. Please note that in accordance with paragraph 234 of the 2024 NPPF, for the purpose of preparing local plans this Plan will be examined under the 2023 NPPF.

Representations at this stage should focus on whether the aspects of the plan contained within the Additional Sites Focused Consultation meet the tests listed above. This is because these are the broad areas that the Inspector will focus on in examining the Local Plan.

If you think the content of the Focused Consultation Additional Sites (Regulation 19) Document is not sound because it does not include a policy on a particular issue, you should go through the following steps before making representations:

- Is the issue with which you are concerned already covered specifically by national planning policy?
- Is the issue with which you are concerned already covered by another policy in the Local Plan?
- If the policy is not covered elsewhere, in what way is the Local Plan unsound without the policy?
- If the Local Plan is unsound without the policy, what should the policy say?

There is no need to resubmit representations submitted as part of the previous Pre-Submission (Regulation 19) Local Plan consultation.

PART 5 - Where can I view the consultation documents?

You can read the consultation documents in the following ways:

- On the Council's Planning Policy Consultation Portal at www.chelmsford.gov.uk/planningpolicyconsult. This system also allows you to submit comments to the consultations
- On the Council's website alongside the Local Plan evidence base documents at www.chelmsford.gov.uk/lp-review
- At the Chelmsford City Council Customer Service Centre, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford CM1 1JE (10am to 4pm Monday to Friday).

At the following drop-in public exhibitions. These will provide an opportunity to meet an officer face-to-face unless otherwise stated.

Council Chamber, Civic Centre, Duke Street, Chelmsford, CM1 1JE	Thursday 11 December Friday 12 December Saturday 13 December	6pm - 8pm 1pm - 3pm 10am - 12noon
High Chelmer Shopping Centre, Exchange Way, Chelmsford, CM1 1XB	Monday 1 December to Monday 8 December	Unstaffed exhibition panels displayed all-day during shopping centre opening hours
South Woodham Ferrers Town Council, Champions Manor Hall, Hullbridge Road, South Woodham Ferrers, CM3 5LJ	Thursday 4 December to Tuesday 9 December	Unstaffed exhibition panels displayed 9am - 4pm weekdays, Saturday 9am – 3:30pm, Sunday closed

Please check our website www.chelmsford.gov.uk/lp-review for any updates before making your journey.

If you are unable to access the documents on a computer, you can request paper copies by emailing planning.policy@chelmsford.gov.uk, telephoning (01245) 606330 or by writing to Spatial Planning Services, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, CM1 1JE. A charge will be made to cover printing and postage costs.

PART 6 - How can I comment?

You can comment on the consultation documents in the following ways:

Online Planning Policy Consultation Portal:
Go to: www.chelmsford.gov.uk/planningpolicyconsult where you can:

- Read the consultation documents
- Make your comments via the specially designed representation form
- Sign up for alerts to feedback reports and future consultations

This is our preferred means of receiving comments as it ensures that your comments are recorded accurately and are processed quickly.

It also allows you to edit comments before submitting them, save a draft and return to your form later, and to upload any supporting material. Please **save** your comments as you complete the form using the 'Save as Draft' button at the bottom of the form as the system will timeout after 30 minutes.

You can view, download, and comment on all the consultations via the online Planning Policy Consultation Portal: www.chelmsford.gov.uk/planningpolicyconsult

If you have not already registered, registration is simple using the easy to follow steps in our User Guide: www.chelmsford.gov.uk/lp-portal-guide. These guidance notes include more information on the Planning Policy Consultation Portal, including what to do if you have forgotten your password, and how to make your comments. If you have followed the user guide and have any further questions or are having difficulties using the Planning Policy Consultation Portal please contact us at planning.policy@chelmsford.gov.uk or call 01245 606330 during normal office hours and one of the team can assist you.

Please note you will need to add your comments through the representation form for each section, policy, site, map, or appendix you wish to comment on. Full guidance on how to make your comments are included within our User Guide: www.chelmsford.gov.uk/lp-portal-guide

The events on the Planning Policy Consultation Portal are as follows:
1. Local Plan Focused Consultation Additional Sites (Regulation 19) Questionnaire 2025 – Here you can read the Chelmsford Local Plan – Focused Consultation Additional Sites (Regulation 19) Document as a pdf and then make comments on individual sections/policies/sites/maps/appendices by selecting from the drop down list. You will need to complete this representation form multiple times if you wish to make comments on multiple parts of the document. Each time you complete it you must select from the drop down list which section/policy/site/map/appendix of the document your comments relate to.
2. Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum 2025 – Here you can read the Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum (IIA) as a pdf and then make comments on individual paragraphs/figures/tables of the document. You will need to complete this representation form multiple times if you wish to make comments on multiple parts of the IIA. Each time you complete it you must state which paragraph/figure/tables etc of the IIA Addendum your comments relate to.

Representations are invited for a period of seven weeks, up to 4pm on 8 January 2026. Comments received outside of this period will not be accepted. The Council is unable to make exceptions or allowances for postal delays or external problems with electronic communications. So please try to reply well ahead of the final deadline.

There is no need to resubmit representations submitted as part of the previous Pre-Submission (Regulation 19) Local Plan consultation.

For all the above events please remember to save your comments as you go.

In writing:
If you prefer to send comments in writing, please fill in the relevant specially designed representation form.

We will then record your comments on the Planning Policy Consultation Portal, to make sure they are dealt with alongside the online comments.

The Local Plan representation form covers the Chelmsford Local Plan – Focused Consultation Additional Sites (Regulation 19) Document and the Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum consultations.

The Local Plan representation form can be downloaded at www.chelmsford.gov.uk/lp-review. Paper copies of the representation form are also available from Chelmsford City Council's Customer Service Centre, Civic Centre, Duke Street, Chelmsford, CM1 1JE (10am to 4pm Monday to Friday). Paper copies can also be made available on request by telephoning (01245) 606330 or emailing planning.policy@chelmsford.gov.uk

Forms can be returned:
- By e-mail to planning.policy@chelmsford.gov.uk
- By post to Planning Policy, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, CM1 1JE
- By hand to Chelmsford City Council Customer Service Centre (details above).

The use of the Local Plan representation form is strongly recommended as this will ensure that comments are related to the matters relevant to the subsequent Independent Examination by a Planning Inspector.

If you wish to submit a representation on more than one issue in the Local Plan, please complete a Local Plan representation form continuation sheet as provided for each issue.

If you have difficulties making representations by e-mail or post due to a disability, please call 01245 606330. Documents can be made available in alternative format including large print, audio and other languages. Please call (01245) 606330, or email planning.policy@chelmsford.gov.uk

Please do not submit multiple copies of the same response (e.g. online and email, or online and hardcopy).
There is no need to resubmit representations submitted as part of the previous Pre-Submission (Regulation 19) Local Plan consultation.

General advice on making representations on the Chelmsford Local Plan – Focused Consultation Additional Sites (Regulation 19) Document:

If you wish to make a representation seeking a modification to the Chelmsford Local Plan – Focused Consultation Additional Sites (Regulation 19) Document (the 'Plan') or part of the Plan you should set out clearly in what way you consider the Plan or part of the Plan is legally non-compliant or unsound, having regard to the soundness criteria set out above in Part 4. Your representation should be supported by evidence wherever possible. It will be helpful if you also say succinctly and precisely how you think the plan should be modified.

You should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification. If you are submitting a representation of significant length, please provide a summary of not more than 200 words. We will request a summary in appropriate circumstances if it is not originally provided. You should not assume that you will have a further opportunity to make submissions. Any further submissions after the Plan has been submitted for Independent Examination may only be made if invited by the Inspector, based on the matters and issues they identify.

There is no need to resubmit representations submitted as part of the previous Pre-Submission (Regulation 19) Local Plan consultation.

The Planning Inspectorate advise that where groups or individuals share a common view on the plan, it would be very helpful if they would make a single representation which represents that view, rather than a large number of separate representations repeating the same points. In such cases the group should indicate how many people it is representing and how the representation has been authorised.

If you are organising a petition or intend to, or have signed one, it must be submitted by 4pm on 8 January 2026 and be accompanied by the name and contact details for the petition organiser. The Council will register the petition organiser on the Planning Policy Consultation Portal. Acknowledgement of the petition and any future Local Plan notifications will only be sent to the petition organiser. Petitions should include the names and addresses of all who support the petition. The number of signatories will be recorded and attributed to relevant representations, but names, addresses and signatures themselves will not be published.

Please consider carefully how you would like your representation to be dealt with in the Independent Examination: whether you are content to rely on your written representation, or whether you wish to take part in hearing session(s). Please remember only representors who are seeking a change to the Plan can be heard at the hearing session(s), and it is the Planning Inspector's decision on who will participate and be heard at the Independent Examination. In considering this, please note that written and oral representations carry the same weight and will be given equal consideration in the Independent Examination process.

Representations about the Chelmsford Local Plan – Focused Consultation Additional Sites (Regulation 19) Document (the 'Plan') may be accompanied by a request to be notified at a specified address of any of the following:

i. The submission of the Plan to the Secretary of State Secretary of State for Levelling Up, Housing and Communities for Independent Examination
ii. Publication of the Planning Inspector's Report on the Plan
iii. Adoption of the Local Plan 2022- 2041.

These requests can be made by completing the relevant section of the Local Plan representation form.

If you are uploading additional supporting documents, please ensure they contain no signatures, e-mail addresses or personal postal addresses.

Please note we are unable to accept anonymous representations. It is a requirement of the Local Plan process that comments can only be deemed legitimate ("duly made") if they are received in a written format with a name and address supplied. Comments made verbally, anonymously, or outside of the consultation period cannot be accepted.

Section 149 of the Equality Act 2010 requires that the Council should avoid any form of discrimination and foster good relations between different ethnic groups. Comments which are deemed to be discriminatory, racist, inflammatory or derogatory, or include information which comprises personal or sensitive information e.g. health information, details about a criminal record, or religious beliefs, will not be accepted. We would ask that you avoid the use of such comments when making your representations.

PART 7 - Appearing at Independent Examination

The Local Plan representation form asks whether you consider it necessary to take part and speak at the Independent Examination hearing if your representation is seeking a modification to the Chelmsford Local Plan – Focused Consultation Additional Sites (Regulation 19) Document (the 'Plan'). Please remember it is the Planning Inspector's decision on who will participate and be heard at the Independent Examination. It is acceptable to submit just a written submission if you feel this adequately covers all your points as all the representations will be submitted to the Planning Inspector and considered as part of the Independent Examination.

If you made a request to take part and speak at the Independent Examination hearing as part of your previous Pre-Submission (Regulation 19) Local Plan consultation response this request will be submitted to the Planning Inspector. There is no need to resubmit representations submitted as part of the previous Pre-Submission (Regulation 19) Local Plan consultation.

PART 8 - What will happen with my representation?

For all consultation events the Council will acknowledge receipt of all duly received representations, although the Council will not enter into individual correspondence. All representations will be recorded and published on the Planning Policy Consultation Portal at www.chelmsford.gov.uk/planningpolicyconsult

Comments will be published with the respondent's name, organisation and agent (where applicable). No other personal details will be made public. Data will be held in accordance with the Data Protection Act 1998 and the General Data Protection Regulations. For more information please visit the Council's Privacy Policy web page: www.chelmsford.gov.uk/your-council/about-our-website/privacy-policy-and-notices/privacy-policy/

A copy of all duly made representation(s) to the Chelmsford Local Plan – Focused Consultation Additional Sites (Regulation 19) Document and Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum will be made available to the Planning Inspectorate and to the person appointed by the Secretary of State to conduct the examination (i.e. the Inspector). These representations will be 'made available' in line with the Regulations (The Town and Country Planning (Local Planning) (England) Regulations 2012 – Regulations 20, 22 and 35). This includes publication on the Council's Planning Policy Consultation Portal.

Feedback reports to the previous Pre-Submission (Regulation 19) Local Plan consultation and the accompanying Integrated Impact Assessment have been published. Following this consultation, further feedback reports will be produced setting out the main issues raised to the Focused Consultation Additional Sites documents.

PART 9 – Statement on availability of proposed submission documents for inspection

The following documents are defined in Regulation 17 of the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended) as the "proposed submission documents":

i. Chelmsford Local Plan – Focused Consultation Additional Sites (Regulation 19) Document and its Policies and Map
ii. Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum
iii. Chelmsford Local Plan – Pre-Submission (Regulation 19) Document and its Policies Map
iv. Review of the Adopted Chelmsford Local Plan: Pre-Submission Integrated Impact Assessment
v. Issues and Options You Said We Did Feedback Report
vi. Preferred Options You Said We Did Feedback Report
vii. Pre-Submission (Regulation 19) Feedback Report.

These documents are available for inspection in line with Part 5.

In addition to these proposed submission documents, a number of supporting evidence base documents are published to view on our website at www.chelmsford.gov.uk/lp-review

Dear Consultee

New Consultation Events –

- **Chelmsford Local Plan - Focused Consultation Additional Sites (Regulation 19) Document**
- **Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum**

I am writing to you as you as a registered consultee on Chelmsford City Council's Planning Policy consultation database. Your PID number and username are at the top right-hand side of this letter.

Please be advised that the City Council is publishing the above documents for consultation for seven weeks from: 10am on Thursday 20 November 2025 to 4pm on Thursday 8 January 2026**.**

Local Plan

What is the adopted Local Plan and why are we reviewing it?
The Local Plan shapes future growth and development across Chelmsford City Council's area. It sets out a positive vision, identifies where and how new development should take place in the future as well as areas for protection. We adopted our current Local Plan in May 2020. We need to review the plan at least every five years to make sure it remains up to date and meets the changing needs for development growth to 2041. The Government revised the National Planning Policy Framework (NPPF) in December 2024 but our Local Plan is able to continue under transitional arrangements meaning it will be examined against the previous December 2023 NPPF.

What are we consulting on?
Following on from previous consultations in 2022 and 2024 the Council carried out consultation on the full Pre-Submission Local Plan in Spring 2025. Following the conclusion of this consultation, it has emerged that more land for homes and employment uses need to be added into the plan to ensure that sufficient development land is identified.

In response, the Council will carry out a focused consultation on additional housing and employment sites and related plan changes.

We are consulting on the:

- Chelmsford Local Plan – Focused Consultation Additional Sites (Regulation 19) Document
- Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum.

Following this consultation the Council will submit both the Pre-Submission version of the Local Plan published for consultation in February to March 2025 and this focused consultation document for examination by an independent Planning Inspector. Representations submitted to both consultations will also be submitted in full. **There is no need to resubmit representations submitted as part of the previous Pre-Submission (Regulation 19) Local Plan consultation.**

What is the Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum?

The Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum assesses the sustainability, health, and equality performance of the Plan.

How do I get involved?

To ensure that comments are submitted in a format required by the Planning Inspector, it is important that you identify whether you support or object to the Focused Consultation Additional Sites (Regulation 19) Document, whether the Council has met the legal requirements, including the Duty to Co-operate and whether it meets the tests of soundness set out in the national policy (National Planning Policy Framework). Plans are sound if they are:

- **Positively prepared** – provide a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development
- **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence
- **Effective** – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common grounds; and
- **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in the National Planning Policy Framework.

There is no need to resubmit representations submitted as part of the previous Pre-Submission (Regulation 19) Local Plan consultation.

We prefer receiving comments online, using our specially designed Local Plan Consultation Portal. Using the Local Plan Consultation Portal helps us to record your comments accurately and process them quickly. Go to www.chelmsford.gov.uk/planningpolicyconsult to:

- Read the consultation documents
- Make your comments
- Sign up for alerts to future consultations.

Otherwise, representations should be made on a specially designed response form available online at www.chelmsford.gov.uk/lp-review or a paper copy can be provided by phoning (01245) 606330. **The use of the standard representation form is strongly recommended as this will ensure that comments are related to the matters relevant to the subsequent examination by a Planning Inspector.**

Responses can also be made by email and in writing.

See the enclosed Statement of Representation Procedure and Statement on Availability of Proposed Submission Document for full details about what the documents cover and how to make your comments.

More information

- Read our enclosed newsletter, which summaries the consultation
- Meet with planning staff face-to-face at a public drop-in exhibition (see the enclosed Statement of Representation Procedure and Statement on Availability of Proposed Submission Documents)
- Visit our website for further information such as the frequently asked questions www.chelmsford.gov.uk/lp-review
- Email us at planning.policy@chelmsford.gov.uk or call 01245 606330.

Next Steps

Following this consultation the Council will submit both the Pre-Submission version of the Local Plan published for consultation in February to March 2025 and this focused consultation document, alongside the evidence supporting the Local Plan, for examination by an independent Planning Inspector. Representations submitted to both consultations will also be submitted in full. **There is no need to resubmit representations submitted as part of the previous Pre-Submission (Regulation 19) Local Plan consultation.**

The Council will produce a summary of the main issues raised in the consultation responses for the Planning Inspector and publish this online.

All duly-made comments will be published on the Council's Consultation Portal in accordance with the Data Protection Act and General Data Protection Regulations. To be duly made, you need to provide your name and address with your comment. Anonymous comments will not be accepted.

Your name, your comments and any information provided, including supporting documents, will be available for public inspection and published online. We will not publish any personal details.

Section 149 of the Equality Act 2010 requires that the Council should avoid any form of discrimination and foster good relations between different ethnic groups. Comments which are deemed to be discriminatory, racist, inflammatory or derogatory, or include information which comprises personal or sensitive information e.g. health information, details about a criminal record, or religious beliefs, will be considered as inadmissible and will not be accepted. We would ask that you avoid the use of such comments when making your representations.

Further general information on the Local Plan can be found on the Council's website at https://www.chelmsford.gov.uk/planning-and-building-control/planning-policy-and-local-plan/

Please note:

- **Comments should only be made to the Focused Consultation Additional Sites (Regulation 19) Document and its accompanying IIA. There is no need to resubmit representations submitted as part of the previous Pre-Submission (Regulation 19) Local Plan consultation**
- **We are unable to accept anonymous representations**
- **Any late comments received after 4pm on Thursday 8 January 2026 cannot be accepted**
- **Individual acknowledgement of receipt will not be possible**.

Updating your details

If you no longer wish to remain on our Planning Policy consultation database or if your contact details have changed, please contact us on 01245 606330.

You may prefer to submit/manage/view your comments online through the Planning Policy consultation database. We will then keep you informed of progress of the Local Plan by email, and you can easily view and comment on consultations. It's simple to transfer to the online system - please call us on 01245 606330.

Yours faithfully

Jeremy Potter

Local Plan Review

We are reviewing our adopted Local Plan. We are running a focused consultation on proposals to add more sites to our draft Local Plan.

We are inviting comments on these proposed additional sites which we have set out in our Focused Consultation Additional Sites (Regulation 19) Document.

The consultation period closes at 4pm on Thursday 8 January 2026.

If you made comments to the third stage of consultation, called the Pre-Submission Local Plan, in February/ March 2025 you do not need to submit them again.

About the consultation

We consulted on a full Pre-Submission Local Plan in February/March 2025, to meet our needs for development growth until 2041. Since then, it has emerged that we need

to add more land for homes and employment use into the plan to meet future needs. This is because some sites in the adopted Local Plan have not come forward and some sites will not be built as quickly as expected.

Added to this, the government has greatly increased its calculation of housing need in Chelmsford.

These two factors combined mean that we do not have enough allocated housing sites to meet these needs, especially for the first five years of the plan.

We are consulting on 11 additional housing sites and expanded allocations for three housing sites and one employment site. We also propose some focused changes to the relevant policies.

These additional sites would be located in settlements that:

- are accessible to the local highway network
- are near to services and facilities such as schools and local shops
- accord with the Plan's Spatial Strategy

We have updated our Integrated Impact Assessment (IIA) to consider the new sites and related policy changes. We are also inviting comments on the IIA as part of the consultation.

Consultation documents

You can read the consultation documents. These documents are large in size. You may find it easier to download and view these documents on a desktop computer, rather than on a smartphone or tablet.

Online Consultation Portal:

Go to: www.chelmsford.gov.uk/planningpolicyconsult where you can:

- Read the consultation documents
- Make your comments
- Sign up for alerts to feedback reports and future consultations

This is our preferred means of receiving comments as it ensures that your comments are recorded accurately and are processed quickly.

You can view, download, and comment on all current consultations on the online Consultation Portal. It also allows you to edit comments before submitting them, save a draft and return to your form later, and to upload any supporting material.

Before making your comments, you may find it useful to refer to the **Review of the Local Plan Focused Consultation Additional Sites (Regulation 19) Statement of Representation Procedure and Statement on Availability of Proposed Submission Documents for Inspection** www.chelmsford.gov.uk/as-sor

If you require assistance, please contact us:
Telephone – 01245 606330 during normal office hours (08.45am to 4.45pm Monday to Thursday; 08.45am to 4.00pm Friday)
Email – planning.policy@chelmsford.gov.uk

For further information about the Local Plan please visit
www.chelmsford.gov.uk/lp-review

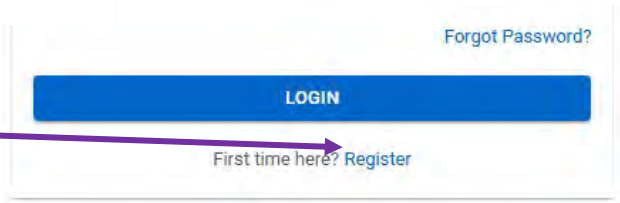
The consultation period runs from 10am on 20 November 2025 until 4pm on 8 January 2026.
Comments received before or after this time cannot be accepted.

How to register

If you have not already registered, registration is simple using the easy-to-follow steps. Find the Consultation Portal at:
www.chelmsford.gov.uk/planningppolicyconsult

- open the Consultation Portal
- click on Login/Register button

- click on Register



A registration screen will open.
You then need to read the terms and conditions, and the privacy policy, and tick the boxes. Then you can:

- create a username
- choose a password (this should be as secure as possible, and include a mix of numbers and letters)

You should only register as an 'Agent' if you are representing someone else in a professional capacity, such as a developer or a client.

When you have added your information, click REGISTER. We will send you an email with a link, inviting you to activate your account.

- click the link in the e-mail
- click on your name (top right of the Consultation Home screen)
- click on My Details to complete your information.

It is important that you fill in your postal address, so that we have an alternative means of contacting you.

Forgotten login details?

If you have already signed up but forgotten your login details, you should not register again, as this will create a duplicate record. Instead:

- go to the Consultation Portal
- click on Sign in button
- click the 'Forgot Password?' link to reset your password

If you are still experiencing problems, you can contact the Planning Policy Helpline on 01245 606330.

How to read the consultation documents and make a comment

Open the Consultation Portal at: www.chelmsford.gov.uk/planningpolicyconsult

Choose the consultation that you are interested in.

We are consulting on the following.

1. Focused Consultation Additional Sites (Regulation 19) Document – this is the main consultation document. We are proposing to include 11 new housing sites, three expanded housing sites and one expanded employment site within the review of the Local Plan. The revised development trajectory and key consequential plan changes arising from the additional sites allocation policies are also subject to consultation. We need you to consider whether the Focused Consultation Additional Sites Document is legally compliant and consistent with national policy, and answer specific consultation questions on this.

2. Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum – We have updated our Integrated Impact Assessment (IIA) to consider the additional sites and other policy changes. This IIA Addendum assesses sustainability and strategic environmental impacts, Habitats Regulations, and health and equality impacts of the proposals and is published for consultation alongside the Additional Sites Document.

1. Focused Consultation Additional Sites (Regulation 19) Document - How to make a comment

Go to the consultation you are interested in and select the ‘Learn More’ button:

The consultation document and the supporting documents are listed on the left side.
Please read the documents before making your comments.

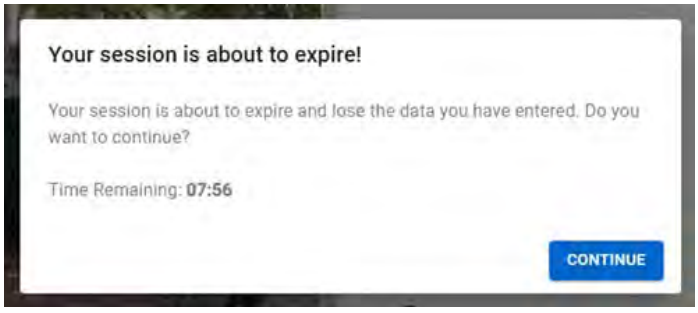
When you are ready to make your comments,
click on the ‘Make your comments’ button.

You may also find it useful to refer to the Review of the Local Plan Focused Consultation Additional Sites (Regulation 19) Statement of Representation Procedure and Statement on Availability of Proposed Submission Documents for Inspection www.chelmsford.gov.uk/as-sor.

Please note you will need to add your comments through a new comment form for each section, policy, site, or map you wish to comment on.

Please **save** your comments as you complete the form using the ‘Save as Draft’ button at the bottom of the form as the system will timeout after 30 minutes.

You will get a reminder 10 minutes before the system times out. You will need to select ‘Continue’, and then make sure that you ‘Save as Draft’.



When you have completed the comments form, do not forget to select ‘Submit’.

2. Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum - How to make a comment

Go to the consultation you are interested in and select the ‘Learn More’ button:

The consultation document and the supporting documents are listed on the left side.
Please read the documents before making your comments.

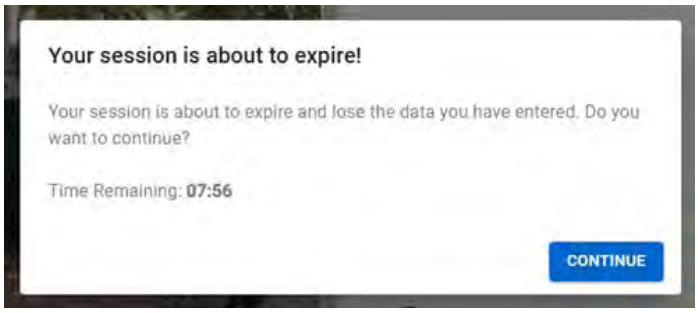
When you are ready to make your comments, click on the ‘Make your comments’ button.

Please read the document before making your responses. You may also find it useful to refer to the Review of the Local Plan Focused Consultation Additional Sites (Regulation 19) Statement of Representation Procedure and Statement on Availability of Proposed Submission Documents for Inspection www.chelmsford.gov.uk/as-sor.

Please note you will need to add your comments through a new comment form for each paragraph, table, figure, or appendix you wish to comment on.

Please **save** your comments as you complete the form using the ‘Save as Draft’ button at the bottom of the form as the system will timeout after 30 minutes.

You will get a reminder 10 minutes before the system times out. You will need to select ‘Continue’, and then make sure that you ‘Save as Draft’.



When you have completed the comments form, do not forget to select ‘Submit’.

Important notes:

If you made comments to the third stage of consultation, called the Pre-Submission Local Plan, in February/ March 2025 you do not need to submit them again.

If you are submitting a representation of significant length, please provide a summary of not more than 200 words. We will request a summary in appropriate circumstances if it is not originally provided.

When uploading supporting documents, please ensure they contain no signatures, e-mail addresses or personal postal addresses.

To be duly made, you need to provide your name and address with your comment. **Anonymous comments will not be accepted.**

Comments will be published with the respondent's name, organisation and agent (where applicable). No other personal details will be made public. This includes publication on the Council's Consultation Portal. Data will be held in accordance with the Data Protection Act 1998 and the General Data Protection Regulations. For more information please visit the Council's Privacy Policy web page: www.chelmsford.gov.uk/your-council/about-ourwebsite/privacy-policy-and-notices/privacy-policy/

Section 149 of the Equality Act 2010 requires the Council to avoid any form of discrimination and also foster good relations between different ethnic groups. We will not display, share or consider any comments that are inappropriate, including those that are racist, inflammatory or derogatory. Comments which contain personal or sensitive information e.g. health information, details about a criminal record, or religious beliefs, will not be accepted.

Petitions:

If you are organising a petition or intend to, or have signed one, it must be submitted by 4.00pm on 8 January 2025 and be accompanied by the name and contact details for the petition organiser. The Council will register the petition organiser on the Consultation Portal and the number of signatories will be assigned to that comment/s, but names and addresses of all signatories will not be published. Acknowledgement of the petition and any future Local Plan notifications will be sent to the petition organiser.

Helpline:

If you require assistance please call 01245 606330 during normal office hours (08.45am to 4.45pm Monday to Thursday; 08.45am to 4.00pm Friday) or email planning.policy@chelmsford.gov.uk

Focused Consultation on:

Additional Sites (Regulation 19) Document

PAPER COMMENTS FORM

This form has Four Parts:

- Part A - Consultation Details
- Part B - Your Contact Details
- Part C - Your Comments on the Focused Consultation Additional Sites (Regulation 19) Document
- Part D - Your Comments on the Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum

Part A - Consultation Details

Chelmsford City Council has published the Focused Consultation Additional Sites (Regulation 19) Document and accompanying Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum for consultation in accordance with the Town and Country Planning (Local Planning) (England) Regulations 2012.

How to comment

The Council strongly encourages comments to be made via its online Consultation Portal www.chelmsford.gov.uk/planningpolicyconsult as this enables the quick and efficient handling of comments. This system allows you to edit comments before submitting them and to upload any supporting material.

For further information about how the Consultation Portal works, read our User Guide at: www.chelmsford.gov.uk/lp-portal-guide
Alternatively, comments can be made using this representation form and returned by:

- Email - planning.policy@chelmsford.gov.uk
- Post - Spatial Planning Services, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, CM1 1JE
- Hand - Chelmsford City Council Customer Service Centre, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, Monday to Friday 10am-4pm.

You can answer as few or as many questions as you like.

Please note we are unable to accept anonymous representations. Any comments received after 4.00pm on Thursday 8 January 2026 cannot be accepted.

How your comments will be used

To be duly made, you need to provide your name and address with your comment. Anonymous comments will not be accepted. At this stage of Local Plan preparation, comments should focus on legal compliance and the soundness of the Local Plan. This is the information required by the Planning Inspectorate who will independently examine the Local Plan and consider any unresolved objections.

Comments will be published with the respondent's name, organisation and agent (where applicable). No other personal details will be made public. Data will be held in accordance with the Data Protection Act 1998 and the General Data Protection Regulations. For more information please visit the Council's Privacy Policy web page: www.chelmsford.gov.uk/your-council/about-our-website/privacy-policy-and-notices/privacy-policy/

A copy of all duly made representation(s) to the Focused Consultation Additional Sites (Regulation 19) Document and accompanying Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum will be made available to the Planning Inspectorate and to the person appointed by the Secretary of State to conduct the examination (i.e. the Inspector). These representations will be 'made available' in line with the Regulations (The Town and Country Planning (Local Planning) (England) Regulations 2012 – Regulations 20, 22 and 35). This includes publication on the Council's Consultation Portal.

Section 149 of the Equality Act 2010 requires the Council to avoid any form of discrimination and also foster good relations between different ethnic groups. We will not display, share or consider any comments that are inappropriate, including those that are racist, inflammatory or derogatory. Comments which contain personal or sensitive information e.g. health information, details about a criminal record, or religious beliefs, will not be accepted.

Part C - Your Comments on the Focused Consultation Additional Sites (Regulation 19) Document

Please read the document before making your responses. This is available via the Consultation Portal www.chelmsford.gov.uk/planningpolicyconsult or on our website at www.chelmsford.gov.uk/lp-review.

To assist you in completing this form you may find it useful to refer to the Focused Consultation Additional Sites (Regulation 19) Statement of Representation Procedure and Statement on Availability of Proposed Submission Documents available at www.chelmsford.gov.uk/as-sor (referred to in this form as the Statement of Representation).

ESSENTIAL INFORMATION

Please select the section of the consultation document your comment relates to. If you wish to make comments to multiple sections/policies/sites/maps of the document please complete one form per section/policy/site/map:

Section 1

Please choose the sub-section from the list below:	Please tick
Purpose of this document	☐
Why are we undertaking a Focused Consultation on Additional Sites?	☐
What are the implications of having a Local Plan more than five years old and a lack of Five-Year Housing Land Supply?	☐
What are the implications of the cancellation of the A12 DCO widening scheme?	☐
What is the 5YHLS position with the Additional Sites?	☐
What has happened to the previous Pre-Submission Local Plan consultation responses?	☐
What is the scope of the Focused Consultation Additional Sites (Regulation 19) Document?	☐
How have the Additional Sites been selected?	☐
Where are the Additional Sites located?	☐
How can I have my say?	☐
What else are we consulting on?	☐
Why are we not consulting on other changes to the Pre-Submission Local Plan?	☐
What happens next?	☐
What evidence have we used?	☐
What is the timetable for the Local Plan review?	☐

Section 2 - Additional Site Allocation Policies

Please choose the site from the list below:

Site 1dd – Land at Former Kay Metzeler Premises, Brook Street	☐
Site 18a – Land North West of Chelmsford (North of Hollow Lane)	☐
Site 19 – Land West of Patching Hall Lane	☐

	Please tick
Site 7b – Great Leighs – Land East of London Road	☐
Site 9a – Waltham Road Employment Area, Boreham	☐
Site 9b – Land to the East of 118 to 124 Plantation Road, Boreham	☐
Site 9c – South of Main Road and Dukes Wood Close, Boreham	☐
Site 14b – Land South of Ford End Primary School	☐
Site 11c – Land West of Barbrook Way, Bicknacre	☐
Site 17c – Land South of Rough Hill Complex, The Tye, East Hanningfield	☐
Site 17d – Land South and South East of East Hanningfield Village	☐
Site 17e – Land South of Windmill Farm, Back Lane, East Hanningfield	☐
Site 20 – Land to East and North of Rettendon Place	☐
Site 21a – Land North of Old Rectory Lodge, Main Road, Woodham Ferrers	☐
Site 21b – Land North of Congregational Church, Main Road, Woodham Ferrers	☐

Section 3 - Key consequential changes

Please choose the sub-section from the list below:

Strategic Policy S6 – Housing and Employment Requirements	☐
Strategic Policy S7 – The Spatial Strategy	☐
Monitoring Framework	☐
Draft Policies Map SGS1dd	☐
Draft Policies Map SGS18a	☐
Draft Policies Map SGS19	☐
Draft Policies Map SGS7b	☐
Draft Policies Map SGS9a	☐
Draft Policies Map GS9b and GS9c	☐
Draft Policies Map GS14b	☐
Draft Policies Map SGS11c	☐
Draft Policies Map SGS17c, SGS17d and GS17e	☐
Draft Policies Map SGS20	☐
Draft Policies Map GS21a and GS21b	☐

Section 4 - Development Trajectory (Additional Sites Housing Site Schedule) ☐

Appendices

Please choose the appendix from the list below:

A – Glossary	☐
B – Table of previous Pre-Submission (Regulation 19) Local Plan paragraph numbers	☐

Question 1:

Do you consider the Local Plan legally compliant in accordance with the Town and Country Planning (Local Planning) (England) Regulations 2012?

For the definition of 'legally compliant', please refer to the **Statement of Representation.**

Yes ☐ No ☐

Question 1a:

Please provide an explanation below. Please provide precisely and succinctly all the evidence and supporting information necessary to support your representation:

Question 1b:

Please set out below the modifications you consider necessary to make the Local Plan legally compliant including revised wording of any policy or text. Please provide precisely and succinctly all the evidence and supporting information necessary to support your representation:

Question 2:

Does the Local Plan comply with the Duty to Co-operate?

For information on the term 'Duty to Co-operate', please refer to the **Statement of Representation.**

Yes ☐ No ☐

Question 2a:

Please provide an explanation below:

Question 2b:
Please set out below any changes to the approach taken which you consider necessary to ensure the Duty to Co-operate is met. Please include revised wording of any policy or text to the Local Plan. Please be as precise and succinct as possible:

Question 3:
Do you consider the Local Plan to be 'sound'? To be found 'Sound' a Local Plan should be positively prepared, justified, effective and consistent with National Policy.

For more information on the term 'Soundness', please refer to the **Statement of Representation.**

Yes ☐ No ☐

Question 3a:
If No, because you consider the Local Plan is NOT:

☐ Positively prepared ☐ Justified

☐ Effective ☐ Consistent with national policy

Question 3b:
Please provide an explanation below and identify the main issues:

Question 3c:
Please set out below the changes you consider necessary to make the Local Plan 'sound' including revised wording of any policy or text. Please be as precise and succinct as possible:

Question 4:

It is the Planning Inspector's decision who will participate and be heard at the Independent Examination. In considering this question, please note that written and oral representations carry the same weight and will be given equal consideration in the examination process.

Please note that while this will provide an initial indication of your wish to participate in hearing session(s), you may be asked at a later point to confirm your request to participate.

If your representation is seeking a change, do you consider it necessary to take part and speak at the Independent Examination hearing?

Yes ☐ No ☐

Question 4a:

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Question 5: Executive Summary

If you are submitting a representation of significant length, please provide a summary of the main issues in your representation in no more than 200 words. We will request a summary in appropriate circumstances if it is not originally provided.

Please provide an executive summary of the main issues below:

Question 6:

Do you wish to be notified of the following:

Please note if you do not select any boxes, you will not be notified at the following stages of Local Plan preparation.

☐ Submission of the Local Plan for Examination ☐ Publication of the Inspector's Report

☐ Adoption of the Local Plan

Attachments:

If you wish to submit any supporting information, please ensure it contains no signatures, e-mail addresses or personal postal addresses. If you need additional space, please continue on a separate sheet.

Part D - Your comments on the Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum

Please read the document before making your responses. This is available via the Consultation Portal www.chelmsford.gov.uk/planningpolicyconsult or on our website at www.chelmsford.gov.uk/lp-review.

We would welcome your views on any aspect of the IIA Addendum. In particular, we would like to hear your views as to whether the effects which are predicted are likely and whether there are any significant effects which have not been considered.

ESSENTIAL INFORMATION:

Please state clearly which paragraph/table/figure/appendix of the IIA your comment relates to. Without this your comment cannot be considered.

Question 1:

Do you agree with this paragraph/table/figure/appendix?

Yes ☐ No ☐

Question 2:

Please provide an explanation below:

Question 3:

Have we missed anything? Where possible please support your answer with reference to any evidence.

Question 4: Executive Summary

If you are submitting a representation of significant length, please provide a summary of the main issues in your representation in no more than 200 words. We will request a summary in appropriate circumstances if it is not originally provided.

Please provide an executive summary of the main issues below:

Attachments:

If you wish to submit any supporting information, please ensure it contains no signatures, e-mail addresses or personal postal addresses. If you need additional space, please continue on a separate sheet.

Further Information:

This paper comments form can be made available in alternative formats including large print, audio and other languages.

If you require assistance please call 01245 606330 during normal office hours (08.45am to 4.45pm Monday to Thursday; 08.45am to 4.00pm Friday) or email planning.policy@chelmsford.gov.uk.

The Council will acknowledge receipt of your comments, although we will not enter into individual correspondence.

Thank you for being part of the consultation.

Comments must be received by 4.00pm on 8 January 2026

Welcome

Thank you for visiting today

What is the Local Plan

Chelmsford City Council's Local Plan sets out a positive vision, addressing how much new development is needed and identifies land for housing, schools, shops and jobs, as well as land uses that will be protected. The current plan was adopted in 2020, and we need to review it at least every five years to ensure it keeps up to date.

What has changed?

In February/March 2025, we consulted on a full Pre-Submission Local Plan to meet our needs for development growth until 2041.

Changes to that plan are needed in light of several factors outside the City Council's control that have affected future housebuilding. These include:

- The Government cancelling the A12 widening scheme
- Three key sites having stalled or been significantly delayed
- Other developers slowing down their build rates
- The Government's increased housing target having to be met through the plan (a change since May 2025).

That means we do not have enough allocated housing sites to meet our needs, particularly for the first five years of the plan.

What we are proposing

We are proposing to:

- Add 11 new housing sites
- Expand the proposed allocations for three housing sites
- Add a further 10,500sqm of employment space to a proposed employment site.

This will provide a total of 1,592 additional homes over the plan period to 2041, and help meet the latest housing needs figure of 1,210 new homes a year.

We have selected the additional sites following detailed testing of site constraints and opportunities in relation to matters like flood risk, heritage, traffic and archaeology. They are located in settlements which are accessible to the local highway network and services and facilities and accord with the plan's Spatial Strategy. The schools in these areas can accommodate the additional growth or are proposed for extension.

Chelmsford Local Plan

Focused Consultation

Focused Consultation Document

This exhibition is a summary of the Focused Consultation Additional Sites (Regulation 19) Document. Before making any comments, you are advised to read the full document at **www.chelmsford.gov.uk/lp-review**

We are continuing our approach in the adopted Local Plan and the Pre-Submission Local Plan that we consulted on in February/March 2025 by focusing additional housing and employment growth to the most sustainable locations in three Growth Areas.

You can comment on any of the additional site allocations. **We will not be able to accept any comments on parts of the Pre-Submission Local Plan that have not changed.**

In addition, we will also be consulting on some key consequential changes to Strategic Policy S6 – Housing and Employment Requirements, and Strategic Policy S7 – The Spatial Strategy, along with minor changes to the monitoring framework, trajectories for the delivery of the additional sites, and a small number of changes to the Policies Map to show the additional sites.

Previous consultation

First stage: Issues and Options – August to October 2022

Second stage: Preferred Options – May to June 2024

Third stage: Pre-Submission – February to March 2025

If you made comments to the third stage of consultation in February / March 2025, you do not need to submit them again

We have published feedback reports setting out a review of the consultation activity, and a summary of the representations we received. The Issues and Options and Preferred Options feedback reports also include information on how we used these comments when preparing the later stages of the document for consultation.

You can read the feedback reports at **www.chelmsford.gov.uk/lp-review**

All the comments received can also be viewed on the Council's planning policy consultation portal at **www.chelmsford.gov.uk/planningpolicyconsult**

Chelmsford Local Plan

How have we selected the additional sites?

Our Evidence Base

We have undertaken a significant amount of research to help inform the selection of the additional sites. This research forms part of our Evidence Base, and includes specially commissioned studies on particular topics where more information was helpful. The following list sets out some of the new or updated Evidence Base documents:

- Review of the Air Quality Impact Assessment
- Landscape Sensitivity and Capacity Study
- Detailed Water Cycle Study Addendum
- Highways Impact Junction Modelling
- New/updated Heritage Impact Assessments
- Updated Strategic Housing and Employment Land Availability Assessment (SHELAA)
- Archaeological Impact Assessment
- Level 2 Strategic Flood Risk Assessment Addendum and site summary tables and mapping
- Sequential and Exception Testing Update
- Defined Settlement Boundary/Urban Area Boundary Technical Note
- Housing Scenario Tests for Early Years, Childcare, Primary and Secondary Education
- Additional Sites housing site studies.

This evidence, alongside all the key documents/studies used to the inform the Local Plan review to date, can be viewed on our website at: **www.chelmsford.gov.uk/lp-review**

Selecting the additional sites has involved a number of stages including:

- Assessing sites promoted for development
- Identifying sites in the most sustainable settlements
- Considering the additional sites Integrated Impact Assessment
- Housing site studies looking at access, topography, neighbouring land uses and other physical constraints
- Technical testing including for education, wastewater, archaeology, heritage, and landscape sensitivity and capacity (see above).

Rejected sites have been excluded or rejected for reasons including:

- Land not promoted by a developer or landowner, as it cannot be considered available within the plan period
- Land not considered capable of being delivered over the next 5 years
- Land with clear barriers to development such as heritage or landscape designation, or lack of services such as primary school capacity
- Sites located in the Green Belt and Green Wedge.

Chelmsford Local Plan

Key Diagram

The sites are distributed in accordance with the current Spatial Strategy including within and on the edge of existing built-up areas taking advantage of existing services and facilities and good levels of accessibility.

The Spatial Strategy identifies three broad geographic areas where new development growth will be accommodated. This comprises:

- **Growth Area 1 - Central and Urban Chelmsford**
- **Growth Area 2 - North Chelmsford**
- **Growth Area 3 - South and East Chelmsford**

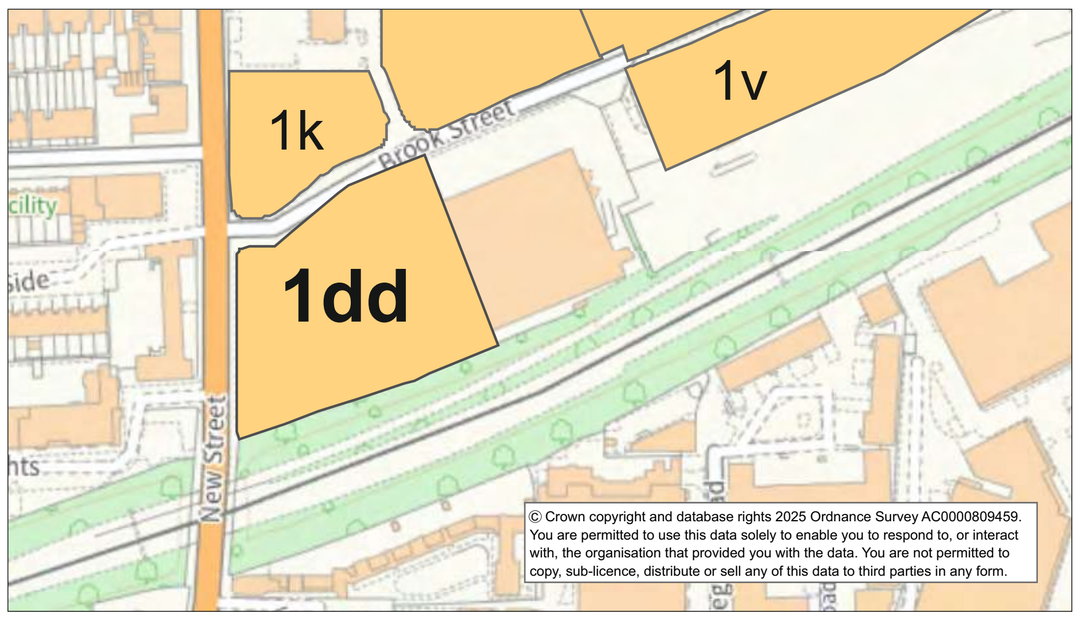
The areas for new housing and employment development are illustrated on the Key Diagram.

Chelmsford Local Plan

Growth Area 1 – Central and Urban Chelmsford

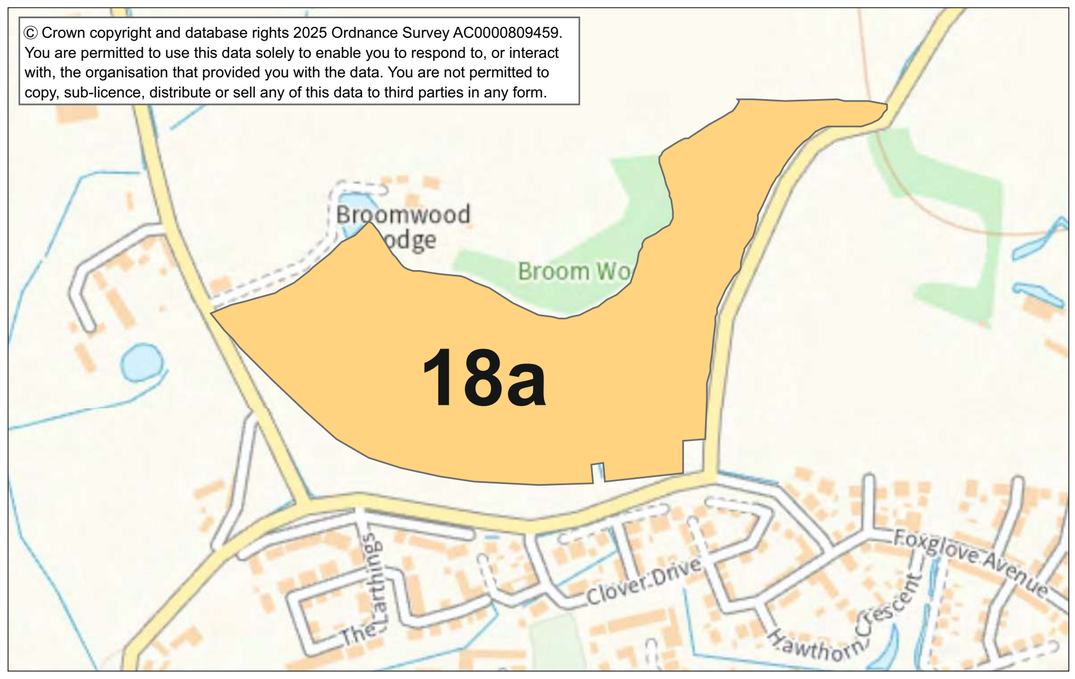
1dd Land at former Kay Metzeler Premises Brook Street, Chelmsford

- 100 homes (new site)



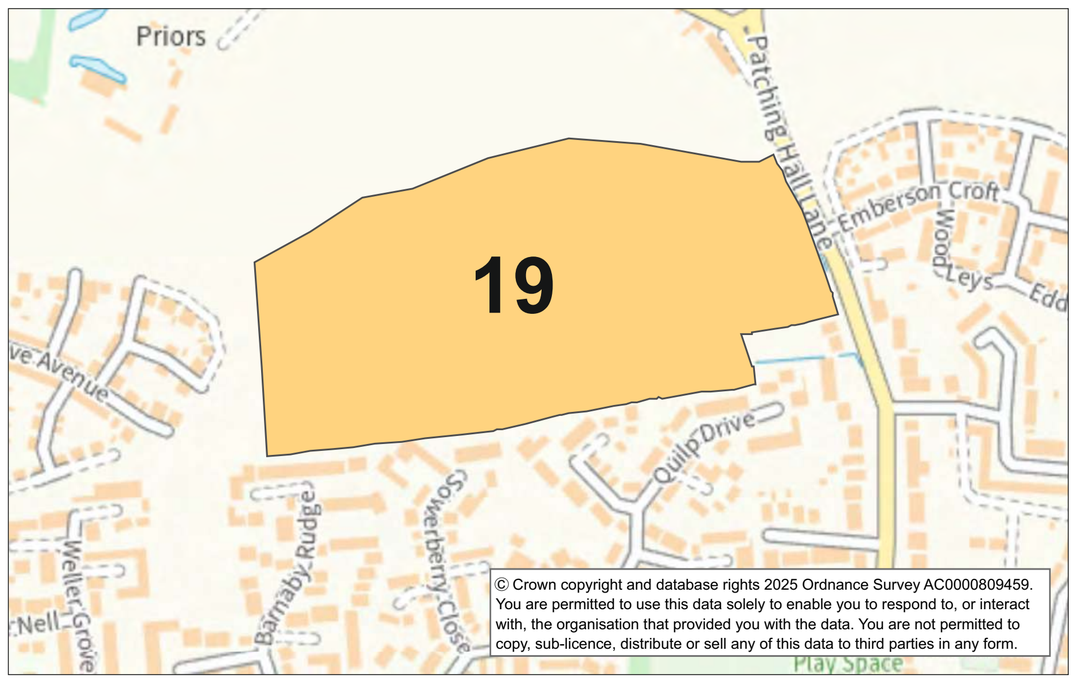
18a Land North West of Chelmsford (North of Hollow Lane)

- 100 homes (new site)



19 Land West of Patching Hall Lane, Chelmsford

- 200 homes (new site)



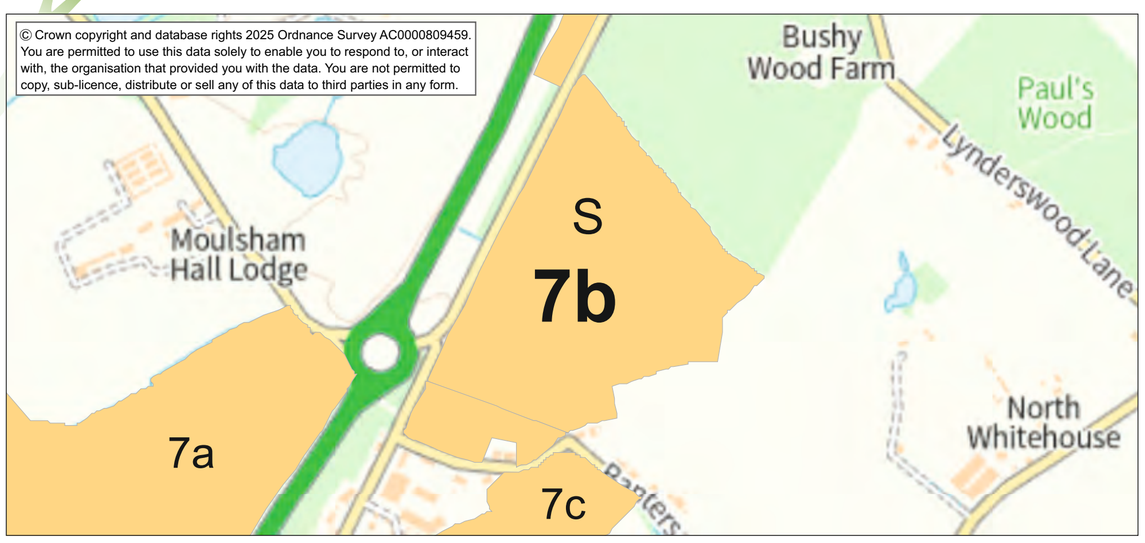
Supporting infrastructure for Growth Area 1

Financial contributions towards:

- Road network enhancements
- Active and sustainable transport
- Cycle routes, footpaths and bridleways where appropriate
- Sport, leisure and recreation facilities
- Secondary, primary, and early years childcare
- Community facilities such as healthcare and emergency service facilities

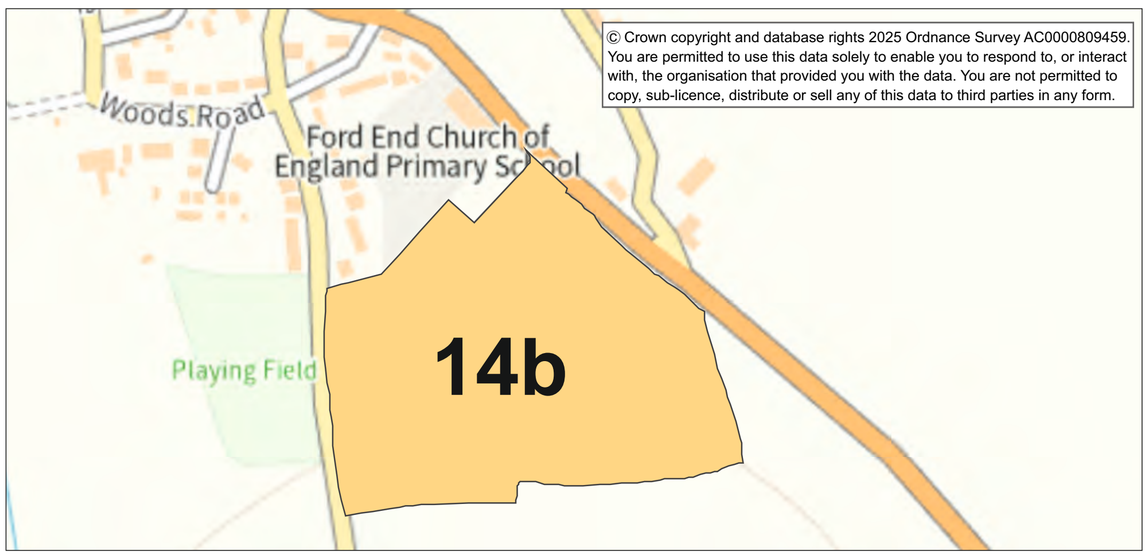
Chelmsford Local Plan

Growth Area 2 – North Chelmsford



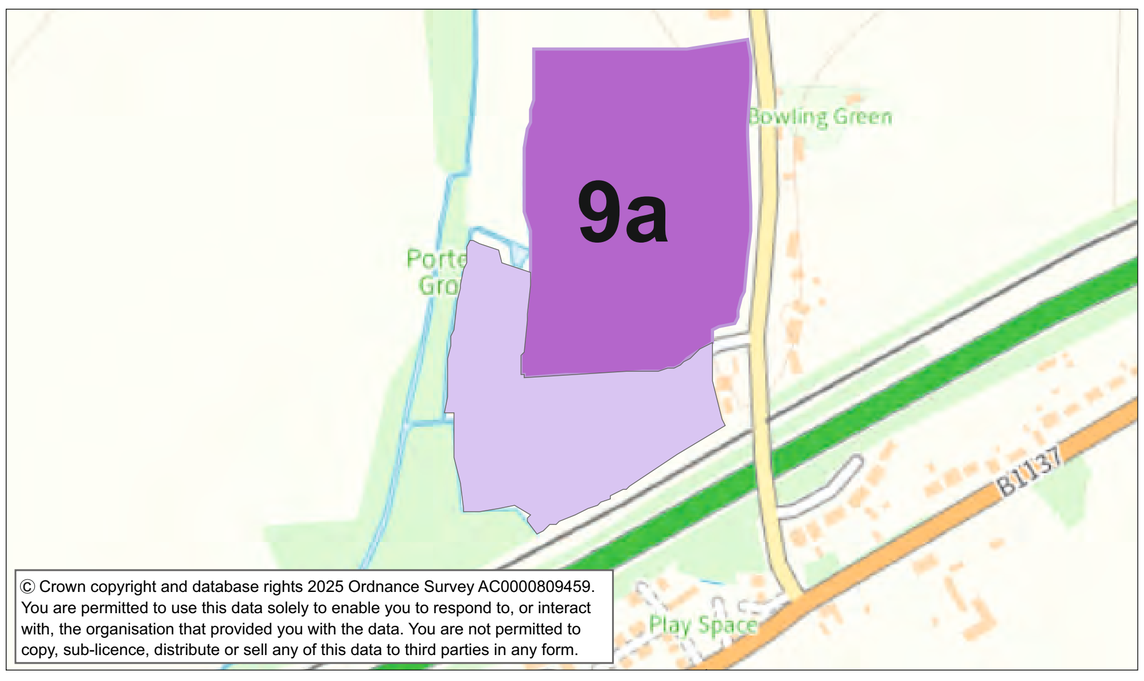
7b Land East of London Road , Great Leighs

- 390 homes, of which 190 for older people (increase from 250 homes)



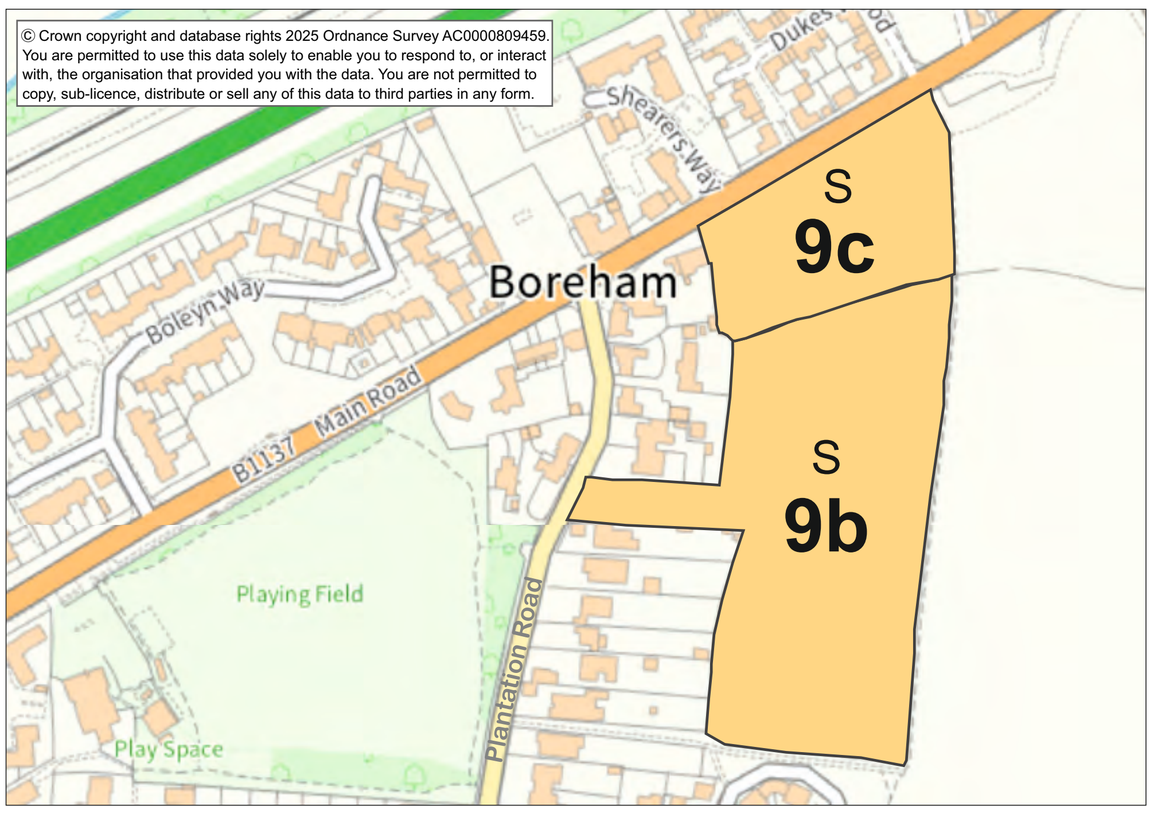
14b Land South of Ford End Primary School

- 75 homes (increase from 20 homes)
- A new community/village hall
- Parking area for Ford End Primary School staff



9a Waltham Road Employment Area, Boreham

- 14,000sqm employment for E(g)(iii)/B2/B8 use (increase from 3,500sqm)



9c South of Main Road and Dukes Wood Close, Boreham

- 22 homes for older people (new site)

9b Land to the East of 118 to 114 Plantation Road, Boreham

- 60 homes for older people (new site)

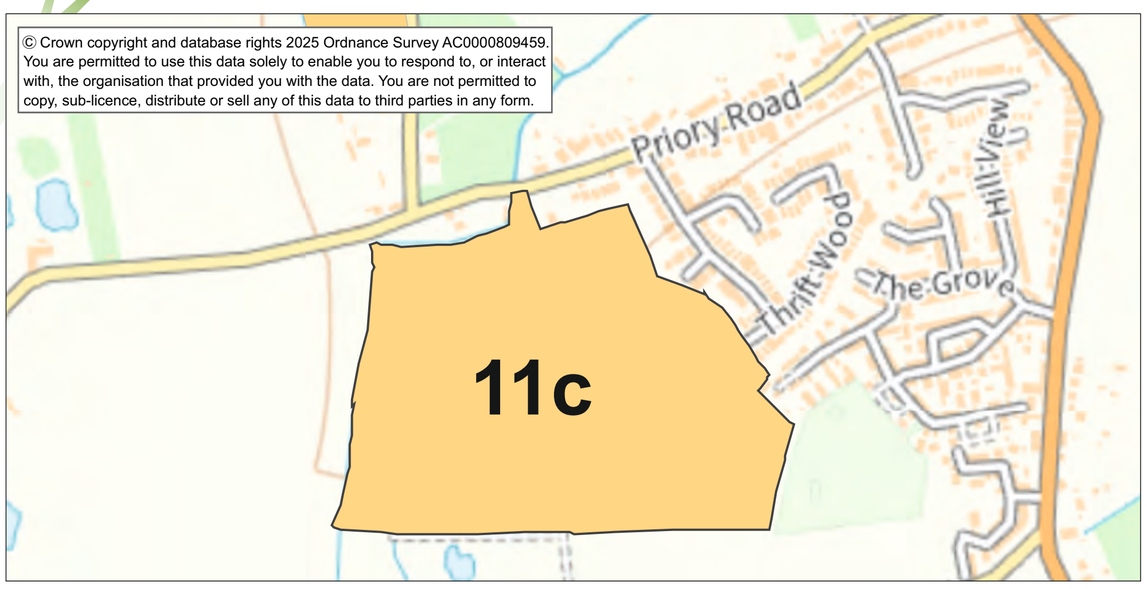
Supporting infrastructure for Growth Area 2

Financial contributions towards:

- Road network enhancements
- Active and sustainable transport
- Cycle routes, footpaths and bridleways where appropriate
- Sport, leisure and recreation facilities
- Secondary, primary, and early years childcare
- Community facilities such as healthcare and emergency service facilities

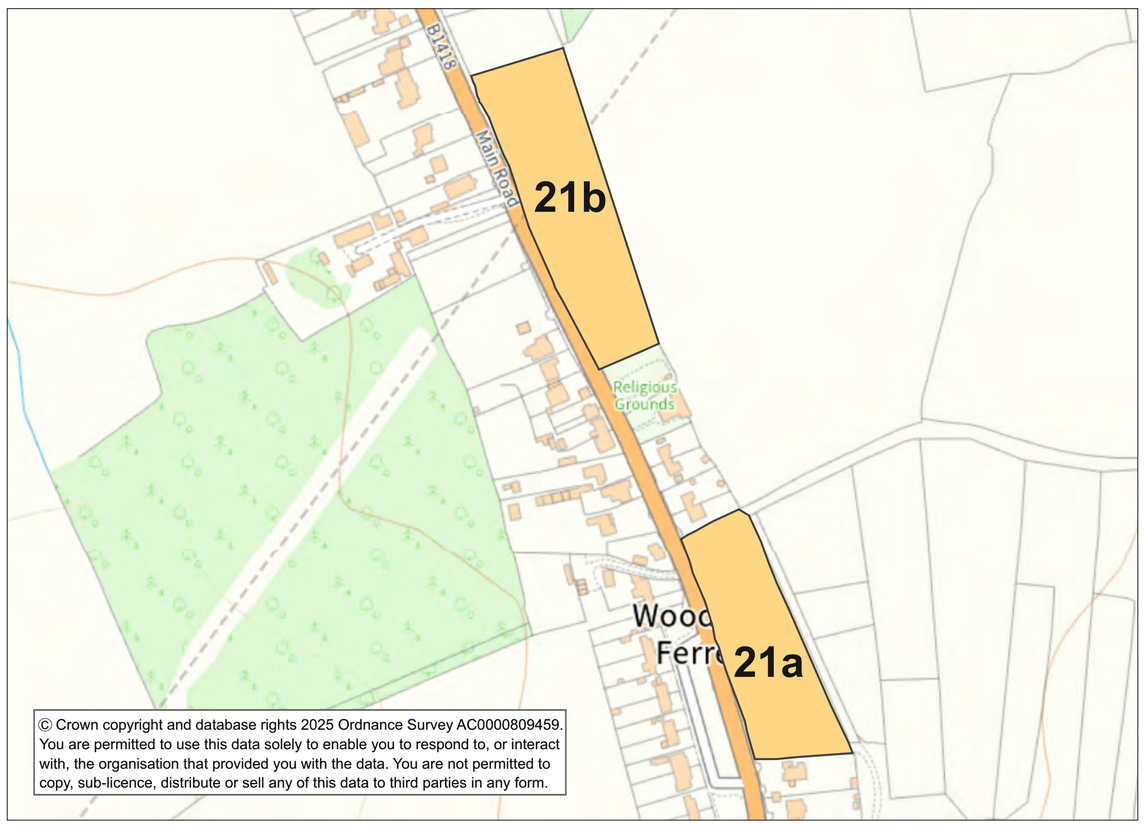
Chelmsford Local Plan

Growth Area 3 – South and East Chelmsford



11c Land West of Barbrook Way, Bicknacre

- 250 homes (increase from 20 homes)
- Community facility
- Early years/childcare nursery

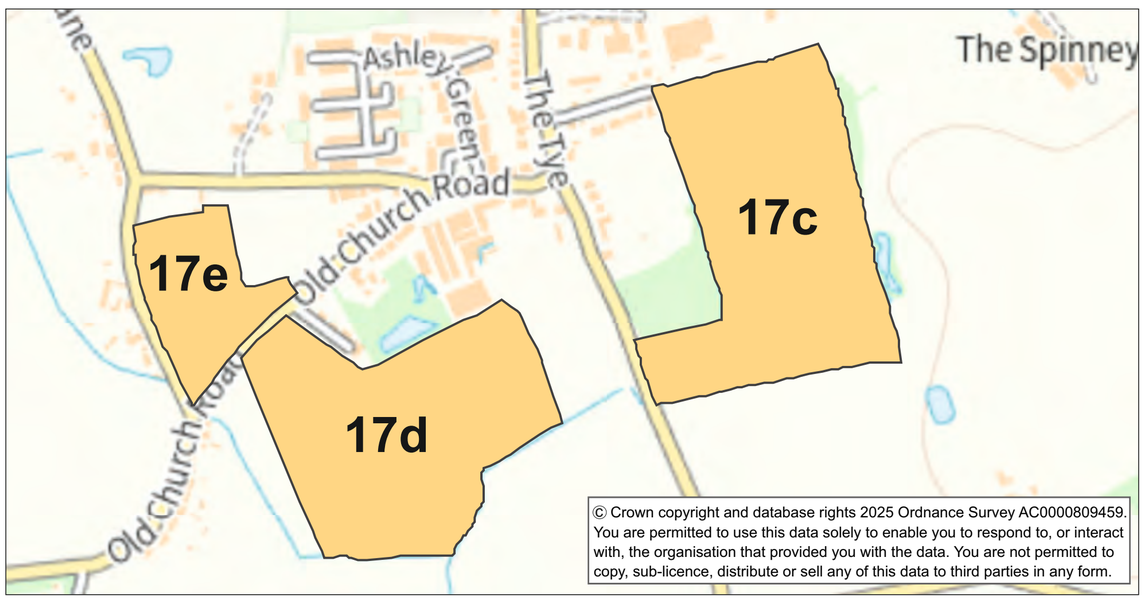


21a Land North of Old Rectory Lodge, Main Road, Woodham Ferrers

- 15 homes

21b Land North of Congregational Church, Main Road, Woodham Ferrers

- 15 homes



17c Land South of Rough Hill Complex, The Tye, East Hanningfield

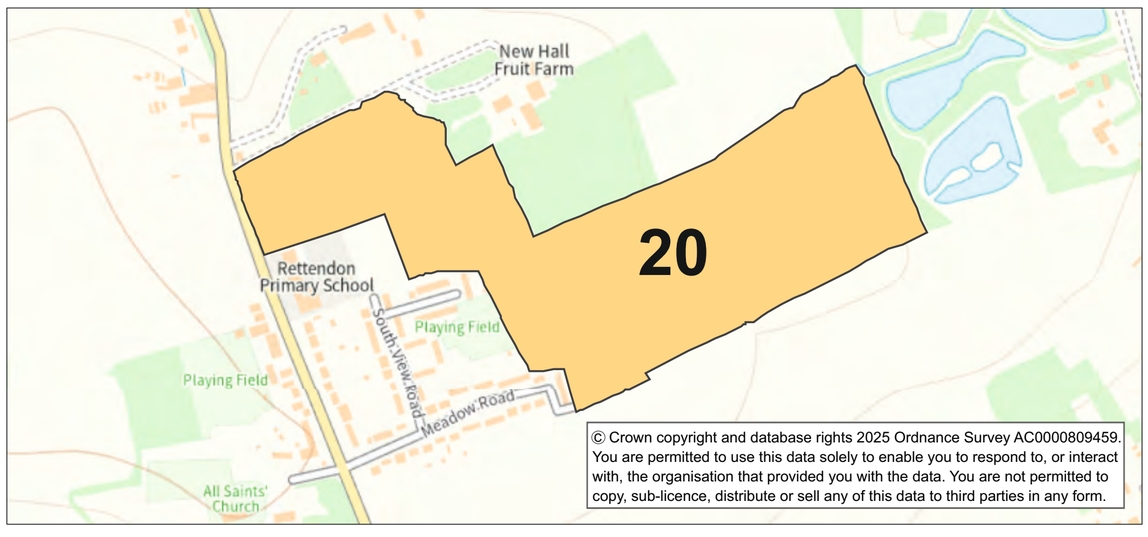
- 115 homes (new site)

17d Land South and South East of East Hanningfield Village

- 150 homes (new site)

17e Land South of Windmill Farm, Back Lane, East Hanningfield

- 40 homes (new site)



20 Land to East and North of Rettendon Place

- 350 homes (new site)
- New/expanded early years/childcare nursery
- Land for expansion of primary school

Supporting infrastructure for Growth Area 3

Financial contributions towards:

- Road network enhancements
- Active and sustainable transport
- Cycle routes, footpaths and bridleways where appropriate
- Sport, leisure and recreation facilities
- Secondary, primary, and early years childcare
- Community facilities such as healthcare and emergency service facilities

Chelmsford Local Plan

What else are we consulting on?

Other policy changes

Including the additional sites means that some other policies in the plan need to be updated as a consequence. These include:

Strategic Policy S6 – Housing and Employment Requirements

Changes include:

- Updated housing supply figures to reflect the latest housing needs and monitoring data figures
- An increased amount of allocated employment floorspace
- An increased windfall allowance from 175 to 195 new homes a year.

Strategic Policy S7 – The Spatial Strategy

Changes include updates to include the additional site allocations and to reflect the latest monitoring data. The Key Diagram has also been updated to show the broad location of the additional sites in the City Council's area.

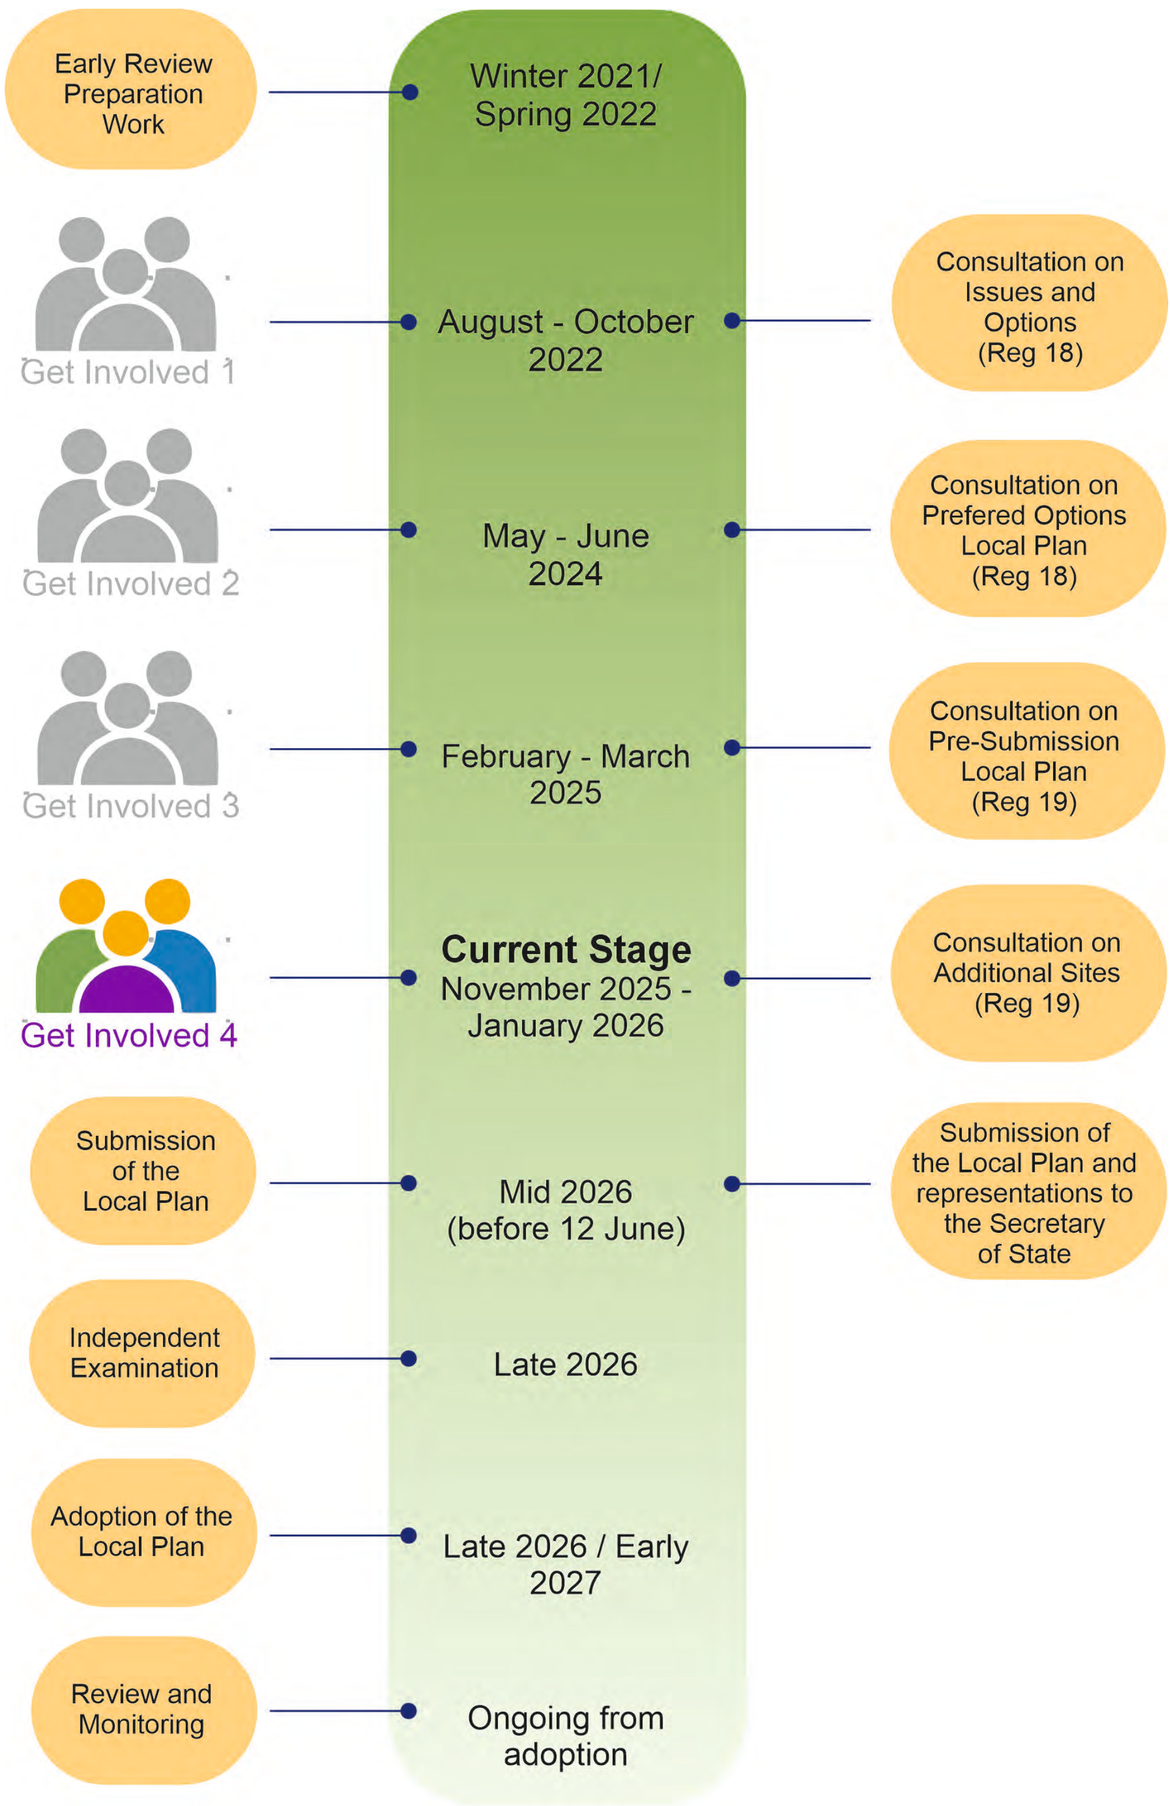
Integrated Impact Assessment

The Integrated Impact Assessment (IIA) combines five different strands of assessment into a single framework:

- Sustainability Appraisal
- Strategic Environmental Assessment
- Habitats Regulations Assessment
- Health Impact Assessment
- Equalities Impact Assessment

The assessment reviews the socio-economic and environmental effects of the Local Plan. Where negative effects are identified, measures will be proposed to avoid, minimise or mitigate (compensate for) such effects. Where any positive effects are identified, measures will be considered that could enhance these effects.

We have updated our Integrated Impact Assessment (IIA) to consider the additional sites and other policy changes. This is published for consultation alongside the Focused Consultation Additional Sites (Regulation 19) Document.



Chelmsford Local Plan

Have your say

How can I make my comments?

If you made comments to the last consultation in February/ March 2025, you do not need to submit them again.

We are consulting for seven weeks.

- Consultation opens at 10.00am on Thursday 20 November and closes at 4.00pm on Thursday 8 January. We cannot consider comments made before or after these dates.

You can read and make new comments on the consultation documents on the Council's Planning Policy Consultation Portal. You can also sign up for alerts to consultation updates. Visit **www.chelmsford.gov.uk/planningpolicyconsult**

You can also download a comments form and e-mail it to **planning.policy@chelmsford.gov.uk,** or post it to Spatial Planning Services, Chelmsford City Council, Duke Street, Chelmsford, CM1 1JE.

We are asking specific questions on whether the Additional Sites (Regulation 19) Document is legally compliant and consistent with national planning policy, which is what the Government requires at this stage. These are called the 'Tests of Soundness'. Detailed guidance on how to make comments is set out in the Statement of Representations at **www.chelmsford.gov.uk/as-sor**

- The comments form, the consultation documents, exhibition materials, and further guidance can also be found at **www.chelmsford.gov.uk/lp-review**

Exhibition dates

Location	Date	Time
Council Chamber, Civic Centre, Duke Street, Chelmsford, CM1 1JE	Thursday 11 December Friday 12 December Saturday 13 December	Staffed drop-in exhibition 6pm - 8pm 1pm - 3pm 10am - 12noon
High Chelmer Shopping Centre, Exchange Way, Chelmsford, CM1 1XB	Monday 1 December to Monday 8 December	Unstaffed exhibition panels during shopping centre opening hours
South Woodham Ferrers Town Council, Champions Manor Hall, Hullbridge Road, South Woodham Ferrers, CM3 5LJ	Thursday 4 December to Tuesday 9 December	Unstaffed exhibition panels displayed 9am - 4pm weekdays, Saturday 9am - 3.30pm, Sunday closed

Next steps

We will send all the comments made to this focused consultation, along with all the comments made to the last consultation in February/March 2025, to the Planning Inspector. We will also send the Inspector a summary of the main issues raised and publish it online.

Review of the Chelmsford Local Plan - Focused Consultation 'Additional Sites'

Chelmsford City Council's Local Plan was adopted in 2020. It sets out how much new development is needed and identifies land for housing, schools, shops and jobs as well as areas for protection.

In Spring 2025, we consulted on a Pre-Submission Local Plan. We are now undertaking a focused consultation on additional site allocations to add into the new plan to ensure that sufficient land for new housing and employment development is identified.

The consultation will run for **seven weeks from 10am on 20 November 2025 until 4pm on 8 January 2025** and focus on the soundness of:

- 11 additional housing sites
- Four expanded housing and employment sites
- Focused policy changes

Following the consultation, the Council will submit both the Pre-Submission version of the Local Plan and the focused 'Additional Sites' document for examination by an independent Planning Inspector. Representations submitted to both consultations will also be submitted in full. There is no need to resubmit representations submitted as part of the previous Pre-Submission Local Plan consultation.

Date: 21 November 2025

Dear Sir/Madam,

Poster to promote public consultation on the review of the Chelmsford Local Plan

Chelmsford City Council is reviewing its adopted Local Plan. The Local Plan shapes future growth and development across Chelmsford City Council's area. It sets out a positive vision, identifies where and how new development should take place in the future as well as areas for protection. We adopted our current Local Plan in May 2020. We need to review the plan at least every five years to make sure it remains up to date and meets the changing needs for development growth to 2041.

The next stage in the Review of the Chelmsford Local Plan is to consult on the Focused Consultation Additional Sites (Regulation 19) Document. The consultation is open for your comments from **10am on Thursday 20 November 2025 to 4pm on Thursday 8 January 2026.**

An A3 poster which promotes the consultation is enclosed. We would be grateful if this could be displayed in a public place until 8 January 2026.

If you have any queries or would like more information on the review of the Local Plan, please visit www.chelmsford.gov.uk/lp-review, email planning.policy@chelmsford.gov.uk or telephone (01245) 606330.

Yours faithfully,

Jeremy Potter

Spatial Planning Services Manager

Review of the Chelmsford Local Plan - Focused Consultation 'Additional Sites'

The Council's Local Plan was adopted in 2020. It sets out how much new development is needed and identifies land for housing, schools, shops and jobs as well as areas for protection, such as open space and sites important for wildlife.

We need to review the plan at least every five years to ensure that it remains up to date and continues to meet our needs for development growth to 2041.

In Spring 2025, we consulted on a Pre-Submission Local Plan. This was the third consultation on the Local Plan and is referred to as a Regulation 19 consultation.

We are undertaking a second Regulation 19 consultation to ensure that sufficient land for new housing and employment development is identified in the new Local Plan. This consultation will be focused on the soundness of:

- 11 additional housing sites
- Four expanded housing and employment sites
- Focused policy changes

This 'Additional Sites' focused consultation will run for seven weeks from 10am on 20 November 2025 until 4pm on 8 January 2026.

Read and comment on the consultation documents at:
www.chelmsford.gov.uk/planningpolicyconsult.

They will also be available to read during normal opening hours at the Council's Customer Service Centre in Chelmsford.

We will also be holding in-person exhibitions at the Civic Centre, Duke Street, Chelmsford, CM1 1JE. These exhibitions will provide an opportunity for you to find out more and discuss the consultation with a Planning Officer.

Visit an exhibition:

Thursday 11 December 2025	Civic Centre	6pm - 8pm
Friday 12 December 2025	Civic Centre	1pm - 3pm
Saturday 13 December 2025	Civic Centre	10am - 12pm

Find out more at **www.chelmsford.gov.uk/lp-review,** telephone 01245 606330 or email **planning.policy@chelmsford.gov.uk.**

Chelmsford Local Plan

Local Plan Review Newsletter

NUMBER 4 November 2025

What is a Local Plan?

Chelmsford City Council's Local Plan sets out a positive vision, addressing how much new development is needed and identifies land for housing, schools, shops and jobs, as well as land uses that will be protected. The current plan was adopted in 2020, and we need to review it at least every five years to ensure it keeps up to date.

What has changed?

In February/March 2025, we consulted on a full Pre-Submission Local Plan to meet our needs for development growth until 2041.

Changes to that plan are needed in light of several factors outside the City Council's control that have affected future housebuilding. These include:

- The Government cancelling the A12 widening scheme
- Three key sites having stalled or been significantly delayed
- Other developers slowing down their build rates
- The Government's increased housing target having to be met through the plan (a change since May 2025)

This means we do not have enough allocated housing sites to meet our housing needs, particularly for the first five years of the plan.

What we are proposing

We have selected the additional sites following detailed testing of site constraints and opportunities in relation to matters like flood risk, heritage, traffic and archaeology. They are located in settlements which are accessible to the local highway network and services and accord with the plan's Spatial Strategy. The schools in these areas can accommodate the additional growth.

Inside this newsletter are a list and a map of the additional site allocations. You can comment on any of the additional site allocations, and also on specific changes we would need to make to other proposed policies to reflect the updated position.

If you made comments to the last consultation in February/ March 2025, you do not need to submit them again. We will not be able to accept any comments on parts of the Pre-Submission Local Plan that have not changed.

Additional and expanded sites

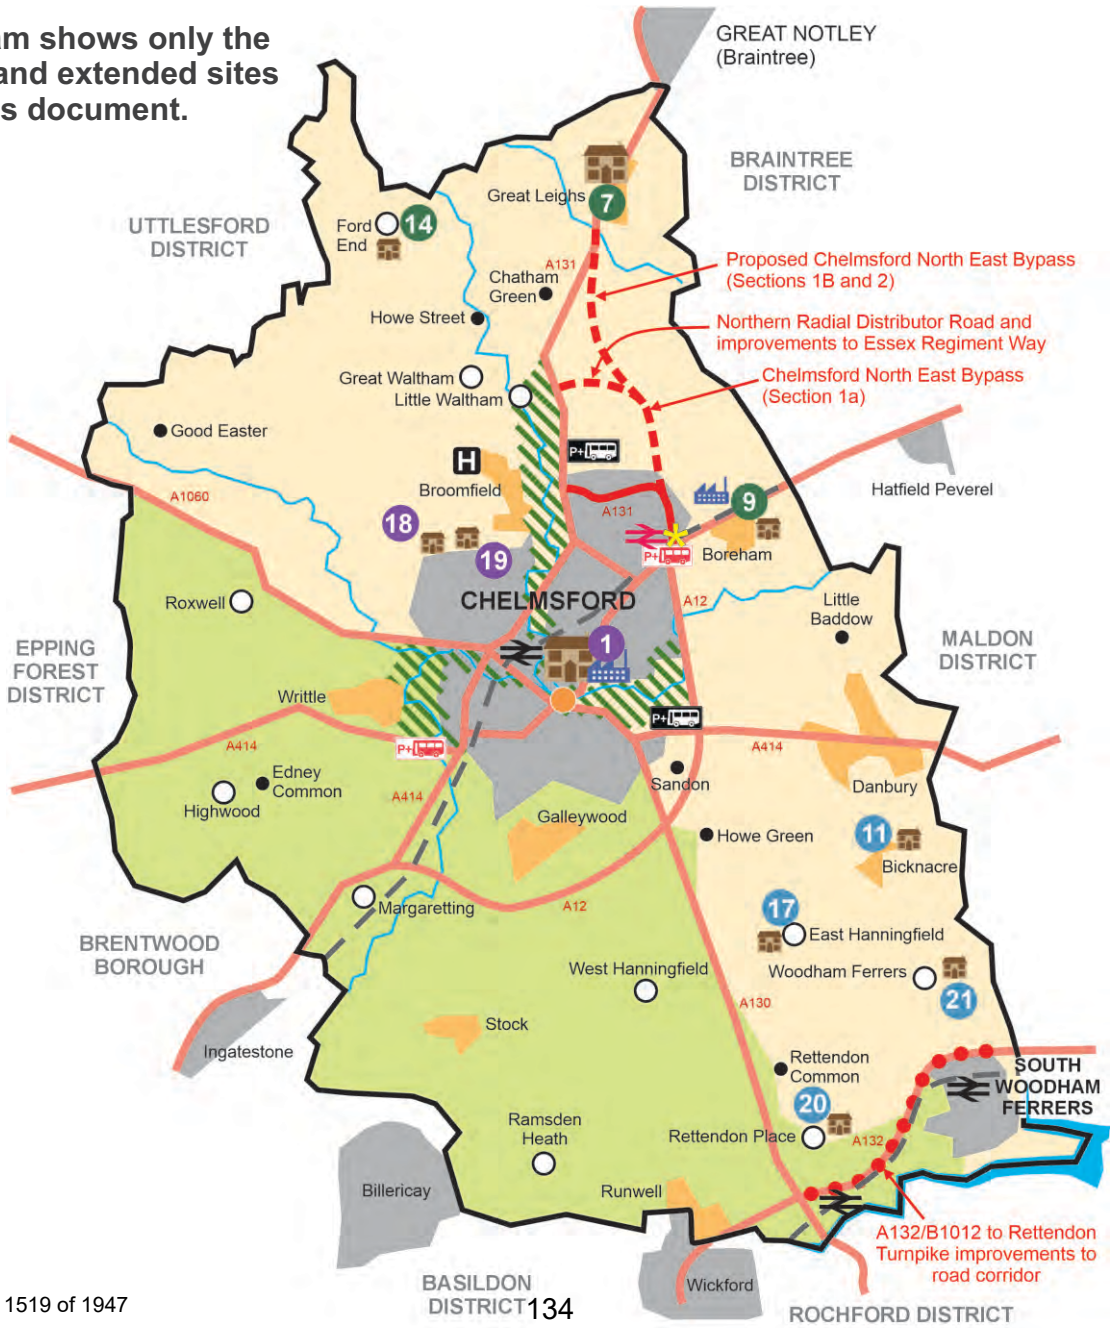
This newsletter is a summary of the Focused Consultation Additional Sites (Regulation 19) Document. Before making your comments, you are advised to read the full document at www.chelmsford.gov.uk/lp-review

We are continuing our approach in the adopted Local Plan and the Pre-Submission Local Plan that we consulted on in February/March 2025 by focusing housing and employment growth to the most sustainable locations in three Growth Areas.

We are proposing to add 11 new housing sites and expand the proposed allocations for three housing sites. This will provide a total of 1,592 additional homes over the plan period to 2041, and help meet the latest housing needs figure of 1,210 new homes a year. We are also proposing to add a further 10,500sqm of employment space to a proposed employment site.

In addition, we will also be consulting on some key consequential changes to Strategic Policy S6 – Housing and Employment Requirements, and Strategic Policy S7 – The Spatial Strategy, along with minor changes to the monitoring framework, trajectories for the delivery of the additional sites, and a small number of Policies Map changes which show the additional sites.

This diagram shows only the additional and extended sites listed in this document.



Central and Urban Chelmsford	North Chelmsford	South and East Chelmsford
1 Chelmsford Urban Area 1dd Land at former Kay Metzeler Premises, Brook Street - 100 homes	**7 Great Leighs** 7b Land East of London Road - 390 homes (of which 190 for older people) *Increase from 250 homes*	**11 Bicknacre** 11c Land West of Barbrook Way - 250 homes - Community facility - Early years/childcare nursery *Increase from 20 homes*
18 North West Chelmsford 18a Land North West of Chelmsford (North of Hollow Lane) - 100 homes	**9 Boreham** 9a Waltham Road Employment Area - 14,000sqm employment for E(g)(iii)/B2/B8 use *Increase from 3,500sqm* 9b Land to the East of 118 to 114 Plantation Road - 60 homes for older people 9c South of Main Road and Dukes Wood Close - 22 homes for older people	**17 East Hanningfield** 17c Land South of Rough Hill Complex, The Tye - 115 homes 17d Land South and South East of East Hanningfield Village - 150 homes 17e Land South of Windmill Farm, Back Lane - 40 homes
19 Land West of Patching Hall Lane 19 Land West of Patching Hall Lane - 200 homes	**14 Ford End** 14b Land South of Ford End Primary School - 75 homes - A new community/village hall - Parking area for Ford End Primary School staff *Increase from 20 homes*	**20 Rettendon Place** 20 Land to East and North of Rettendon Place - 350 homes - New early years/childcare nursery - Land for expansion of primary school
		21 Woodham Ferrers 21a Land North of Old Rectory Lodge, Main Road - 15 homes 21b Land North of Congregational Church, Main Road - 15 homes

In addition to the above, additional and expanded sites will also be required to provide or make financial contributions towards the following:

- Improvements to the local and strategic road network as required by the Local Highways and Transportation Authority
- Measures to promote and enhance active and sustainable modes of transport
- New or enhanced sport, leisure and recreation facilities
- Primary, secondary, early years education and childcare, as required by the Local Education Authority (apart from sites 9a, 9b and 9c)
- Other community facilities including healthcare provision as required by the NHS Mid and South Essex Integrated Care Board, and police, ambulance and fire and rescue facilities.

How can I make my comments?

If you made comments to the last consultation in February/March 2025, you do not need to submit them again.

We are consulting for seven weeks. Consultation opens at 10.00am on Thursday 20 November and closes at 4.00pm on Thursday 8 January. We cannot consider comments made before or after these dates.

You can read and make new comments on the consultation documents on the Council's Planning Policy Consultation Portal. You can also sign up for alerts to consultation updates. Visit www.chelmsford.gov.uk/planningpolicyconsult

You can also download a comments form and e-mail it to planning.policy@chelmsford.gov.uk, or post it to Spatial Planning Services, Chelmsford City Council, Duke Street, Chelmsford, CM1 1JE.

We are asking specific questions on whether the Focused Consultation Additional Sites (Regulation 19) Document is legally compliant and consistent with national planning policy, which is what the Government requires at this stage. These are called the 'Tests of Soundness'. Detailed guidance on how to make comments is set out in the Statement of Representations at www.chelmsford.gov.uk/as-sor

The comments form, the consultation documents, exhibition materials, and further guidance can also be found at www.chelmsford.gov.uk/lp-review

We are also holding exhibitions at the Civic Centre where you can find out more from a Planning Officer:

- Thursday 11 December, 6pm - 8pm
- Friday 12 December, 1pm - 3pm
- Saturday 13 December, 10am - 12 noon

Next Steps

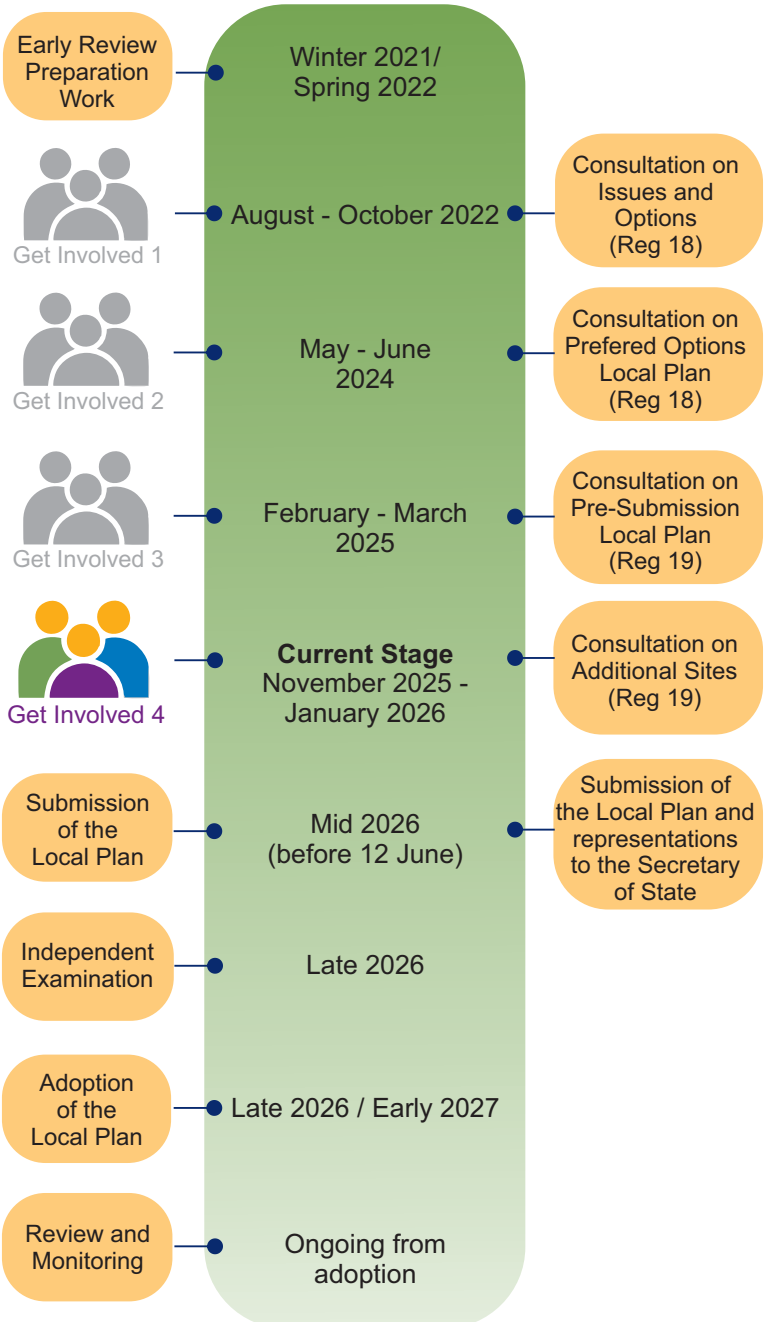
We will send all the comments made to this focused consultation, along with all the comments made to the last consultation in February/March 2025, to the Planning Inspector. We will also send the Inspector a summary of the main issues raised and publish it online.

What else are you consulting on?

We have updated our Integrated Impact Assessment (IIA) to consider the additional sites and other policy changes. The IIA assesses sustainability and strategic environmental impacts, Habitats Regulations, and health and equality impacts of our proposals.

We will publish an IIA Addendum covering the updates for consultation, alongside the Focused Consultation Additional Sites (Regulation 19) Document.

What is the Local Plan timetable?



Chelmsford City Council

Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19)
Parish/Town Council Information Pack

Planning Policy, November 2025

Part A - General information that is relevant to all Parish / Town Councils

Review of Chelmsford's Local Plan

The Council's Local Plan was adopted in 2020 and it guides growth and development across Chelmsford City Council's area to 2036.

We need to review the plan at least every five years to ensure that it remains up to date and continues to meet our needs for development growth to 2041. This includes new homes, employment opportunities and facilities for local people such as new schools, healthcare provision and upgraded transport infrastructure.

The review of the adopted Chelmsford Local Plan commenced in Winter 2021 and following consultations in 2022 and 2024, the Pre-Submission (Regulation 19) version was published for consultation in Spring 2025. A further focused stage of consultation is being undertaken on additional sites to add to the Pre-Submission (Regulation 19) Local Plan to ensure that sufficient land for new housing and employment development is identified.

Consultation on the Focused Consultation Additional Sites (Regulation 19) Document (Additional Sites Document for short) runs for a period of seven weeks **from 10am on Thursday 20 November 2025 to 4pm on Thursday 8 January 2026**. Communities can find out more at www.chelmsford.gov.uk/lp-review.

The Chelmsford Local Plan - Focused Consultation Additional Sites (Regulation 19) Document

This document is a focused consultation on additional site allocations for housing and employment development. The development trajectories for the delivery of the additional sites and key consequential plan changes arising from the additional sites allocation policies are also subject to consultation alongside an Integrated Impact Assessment (IIA) Addendum which assesses the changes.

The additional sites comprise 11 new housing sites, three expanded housing sites and one expanded employment site.

The consultation will be undertaken in accordance with Regulation 19 of the Local Plan Regulations and the Council's Statement of Community Involvement (2025).

Following this stage, the Council will submit both the Pre-Submission Local Plan published for consultation in Spring 2025 and this Additional Sites Document for examination by an independent Planning Inspector. Representations submitted to both consultations will also be submitted in full. **There is no need to resubmit representations submitted as part of the previous Pre-Submission Local Plan consultation.** The Pre-Submission Local Plan and the Additional Sites (including the key consequential plan changes) contained within the consultation will be incorporated together in a single new Local Plan before being finalised for adoption.

Why are we undertaking a Focused Consultation on Additional Sites?

During the plan's preparation, it has emerged that we need to add more land for homes and employment use into the plan to meet future needs. This is because some sites in the adopted Local Plan have not come forward and some sites will not be built as quickly as expected. That means our housing need figure has become out of date because we do not have enough allocated housing sites to meet our needs for the first five years of the plan.

In response to this, the Council has identified additional housing site allocations for inclusion within the Pre-Submission (Regulation 19) Local Plan to help enable it to be found "sound" at examination. It also identifies the expansion of an existing allocated employment site to support the increased housing requirement and boost employment floorspace supply.

Where to view the consultation documents

You can read the consultation documents in the following ways:

- On the Council's Consultation Portal at www.chelmsford.gov.uk/planningpolicyconsult. This system also allows you to submit comments to the consultations
- On the Council's website alongside the Local Plan evidence base documents at www.chelmsford.gov.uk/lp-review
- At the Chelmsford City Council Customer Service Centre, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford CM1 1JE (10am to 4pm Monday to Friday).
- At the following drop-in public exhibitions. These will provide an opportunity to meet an officer face-to-face unless otherwise stated.

Location	Date	Time
Council Chamber, Civic Centre, Duke Street, Chelmsford, CM1 1JE	Thursday 11 December	6pm - 8pm
	Friday 12 December	1pm - 3pm
	Saturday 13 December	10am - 12noon

Location	Date	Time
High Chelmer Shopping Centre, Exchange Way, Chelmsford, CM1 1XB	Monday 1 December to Monday 8 December	Unstaffed exhibition panels displayed all-day during shopping centre opening hours
South Woodham Ferrers Town Council, Champions Manor Hall, Hullbridge Road, South Woodham Ferrers, CM3 5LJ	Wednesday 3 December to Wednesday 10 December	Unstaffed exhibition panels displayed 9am - 4pm weekdays, Saturday 9am – 3:30pm, Sunday closed

Please check our website www.chelmsford.gov.uk/lp-review for any updates before making your journey.

How to comment

In line with national planning legislation, the consultation will focus solely on whether the Additional Sites Document complies with all relevant legislation, complies with the Duty to Co-operate and meets the tests of soundness set out in national planning policy.

You can comment on the consultation documents in the following ways:

Online Consultation Portal:
Go to: www.chelmsford.gov.uk/planningpolicyconsult where you can:

- Read the consultation documents
- Make your comments via the specially designed representation form
- Sign up for alerts to feedback reports and future consultations

This is our preferred means of receiving comments as it ensures that your comments are recorded accurately and are processed quickly.

If you have not used this system before or have any difficulties logging in, please see our guidance notes at:www.chelmsford.gov.uk/lp-portal-guide or call us on (01245) 606330.

In writing:
If you prefer to send comments in writing, please fill in the relevant specially designed representation forms for each consultation event.

Local Plan representation forms cover the Chelmsford Local Plan – Focused Additional Sites (Regulation 19) Document and the Integrated Impact Assessment: Focused Consultation Additional Sites (Regulation 19) Addendum.

The Local Plan representation forms can be downloaded at www.chelmsford.gov.uk/lp-review. Paper copies of these representation forms for are also available from Chelmsford City Council's Customer Service Centre (details above) or on request by telephoning (01245) 606330 or emailing planning.policy@chelmsford.gov.uk

Forms can be returned:

- By e-mail to planning.policy@chelmsford.gov.uk
- By post to Planning Policy, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, CM1 1JE
- By hand to Chelmsford City Council Customer Service Centre (details above).

The use of the Local Plan representation forms is strongly recommended as this will ensure that comments are related to the matters relevant to the subsequent Independent Examination by a Planning Inspector.

If you do not have access to a computer, you can request paper copies. A charge will be made to cover printing and postage costs.

If you have difficulties making representations by e-mail or post due to a disability, please call us (01245) 606330.

Please note that any representations must be received by the Council no later than 4pm on Thursday 8 January 2026. We are unable to accept anonymous representations, and any comments received after the closing date cannot be accepted.

Part B – Optional information by Parish/Town Council area

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in the Unparished Area of Chelmsford?

The Additional Sites Document identifies one new site allocation in Chelmsford's Urban Area. This is Strategic Growth Site 1dd (SGS1dd) – Land at Former Kay-Metzeler Premises, Brook Street. This is a vacant brownfield site adjacent to the City Centre for around 100 new homes. The site allocation policy includes requirements for highway infrastructure improvements and financial contributions to community and recreational facilities.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Boreham Parish?

The Additional Sites Document identifies three site allocations in Boreham. This includes one expanded employment area and two new sites for specialist residential accommodation.

Strategic Growth Site 9a (SGS9a) – Waltham Road Employment Area, Boreham is allocated for 14,000sqm of floorspace for light industrial processes, general industrial processes and storage and distribution. This is an increase of 10,500sqm from the previous consultation and on a larger area.

Growth Site 9b (GS9b) – Land to the East of 118 to 124 Plantation Road, Boreham is allocated for around 60 homes of age restricted housing for older people.

Growth Site 9c (GS9c) – South of Main Road and Dukes Wood Close, Boreham is directly adjacent to GS9b and is allocated for around 22 homes of age restricted housing for older people.

All three site allocation policies include requirements for highway infrastructure improvements and green infrastructure.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Broomfield Parish?

The Additional Sites Document identifies one new housing site allocation wholly within the Broomfield Parish and one new housing site partially within Broomfield Parish.

Strategic Growth Site 19 (SGS19) – Land West of Patching Hall Lane lies wholly within Broomfield Parish. It is allocated for around 200 homes of mixed type and size including affordable housing.

Strategic Growth Site Policy 18a (SGS18a) – Land North West of Chelmsford (North of Hollow Lane) is partially within Broomfield Parish Council and partially within Chignal Parish Council. It is allocated for around 100 new homes of mixed size and type including affordable housing.

Both site allocation policies include requirements for highway infrastructure improvements and financial contributions to community and recreational facilities.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Chelmer Village Parish?

No additional housing or employment sites are identified in Chelmer Village Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Chelmsford Garden Community Parish?

No additional housing or employment sites are identified in Chelmsford Garden Community Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Chignal Parish?

The Additional Sites Document identifies one new housing site partially within the Chignal Parish boundary.

Strategic Growth Site Policy 18a (SGS18a) – Land North West of Chelmsford (North of Hollow Lane) is partially within Broomfield Parish Council and partially within Chignal Parish Council. It is allocated for around 100 new homes of mixed size and type including affordable housing. The site allocation policy includes highway infrastructure improvements and financial contributions to community and recreational facilities.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Danbury Parish?

No additional housing or employment sites are identified in Danbury Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in East Hanningfield Parish?

Three new housing sites have been identified within the Additional Sites Document in the East Hanningfield Parish.

Strategic Growth Site 17c (SGS17c) – Land South of Rough Hill Complex, The Tye, East Hanningfield is allocated for around 115 homes of mixed type and size with affordable housing.

Strategic Growth Site 17d (SGS17d) – Land South East of East Hanningfield Village is an allocation for around 150 homes of mixed type and size with affordable housing.

Growth Site 17e (GS17e) – Land South of Windmill Farm, Back Lane, East Hanningfield is an allocation for around 40 homes of mixed type and size including affordable housing.

All three site allocation policies include requirements for highway infrastructure improvements and financial contributions to community, educational and recreational facilities.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Galleywood Parish?

No additional housing or employment sites are identified in Galleywood Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Good Easter Parish?

No additional housing or employment sites are identified in Good Easter Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Great & Little Leighs Parish?

The Additional Sites Document identifies an expanded housing site in Great and Little Leighs Parish.

Strategic Growth Site 7b (SGS7b) – Land East of London Road, Great Leighs has increased from 250 units to around 390 units. Around 190 units of this allocation will be specialist residential homes for older persons of mixed type and size including affordable housing. Financial contributions to the Chelmsford North East Bypass, educational and community facilities, and recreational facilities are requirements of the site allocation policy.

The boundary of this site (7b) has been expanded to include land north of Banters Lane which was previously part of Local Plan allocation SGS7c. As a result, the boundary of SGS7c has been reduced.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Great Baddow Parish?

No additional housing or employment sites are identified in Great Baddow Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Great Waltham Parish?

One expanded housing site has been identified within the Additional Sites Document in the Great Waltham Parish.

Growth Site 14b (GS14b) – Land South of Ford End Primary School is allocated for 75 homes. This is an increase of 55 homes from the previous consultation and on a larger area.

The site will include affordable housing, provision of off-road parking for primary school staff and a new community/village hall. The site allocation policy includes requirements for highway infrastructure improvements and financial contributions towards education and recreational facilities. The area for new housing and area for expansion of the existing school are shown on the Draft Policy Map inset.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Highwood Parish?

No additional housing or employment sites are identified in Highwood Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Little Baddow Parish?

No additional housing or employment sites are identified in Little Baddow Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Little Waltham Parish?

No additional housing or employment sites are identified in Little Waltham Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Margaretting Parish?

No additional housing or employment sites are identified in Margaretting Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Mashbury Parish?

No additional housing or employment sites are identified in Mashbury Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Pleshey Parish?

No additional housing or employment sites are identified in Pleshey Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Rettendon Parish?

One site is identified within the Additional Sites Document in the Rettendon Parish.

Strategic Growth Site 20 (SGS20) – Land to East and North of Rettendon Place is allocated for around 350 homes of mixed size and type including affordable housing. The site would include expanding the existing primary school and additional early years and childcare nursery provision. The site allocation policy includes requirements for highway infrastructure improvements and financial contributions to community and recreational facilities.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Roxwell Parish?

No additional housing or employment sites are identified in Roxwell Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Runwell Parish?

No additional housing or employment sites are identified in Runwell Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Sandon Parish?

No additional housing or employment sites are identified in Sandon Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in South Hanningfield Parish?

No housing or employment sites are identified in South Hanningfield Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in South Woodham Ferrers?

No additional housing or employment sites are identified in South Woodham Ferrers Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Springfield Parish?

No additional housing or employment sites are identified in Springfield Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Stock Parish?

No additional housing or employment sites are identified in Stock Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in West Hanningfield Parish?

No additional housing or employment sites are identified in West Hanningfield Parish within the Additional Sites Document.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Woodham Ferrers and Bicknacre Parish?

One expanded housing site and two new housing sites have been identified within the Additional Sites Document in the Woodham Ferrers and Bicknacre Parish.

Strategic Growth Site 11c (SGS11c) – Land West of Barbrook Way, Bicknacre is allocated for 250 homes. This is an increase of 230 homes from the previous consultation and on a larger area. The homes would be mixed size and type and include affordable housing. The development would provide a community facility, a stand-alone early years and childcare nursery and a multi-user crossing at Priory Road. The site allocation policy includes requirements for highway infrastructure improvements and financial contributions to community and recreational facilities.

Growth Site 21a (GS21a) – Land North of Old Rectory Lodge, Main Road, Woodham Ferrers is allocated for 15 homes including affordable housing.

Growth Site 21b (GS21b) – Land North of Congregational Church, Main Road, Woodham Ferrers is located to the North of GS21a and is allocated for around 15 new homes including affordable housing.

Both GS21a and GS21b site allocation policies include requirements for highway infrastructure improvements and financial contributions to community and recreational facilities.

Does the Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document identify new development in Writtle Parish?

No additional housing or employment sites are identified in Writtle Parish within the Additional Sites Document.

Part C – Chelmsford Local Plan Focused Consultation Additional Sites (Regulation 19) Document – ADDITIONAL SITE ALLOCATIONS AT A GLANCE

Site Ref.	Additional Site Name	Location	Total Proposed Development	Site Status
1dd	Land at Former Kay-Metzeler Premises, Brook Street	Chelmsford Urban Area	100 homes	New allocation
18a	Land North West of Chelmsford (North of Hollow Lane)	Partially within Broomfield and Chignal Parish's	100 homes	New allocation
19	Land West of Patching Hall Lane	Broomfield Parish	200 homes	New allocation
7b	Land East of London Road, Great Leighs	Great and Little Leighs Parish	390 homes, 190 of which are for specialist residential accommodation	Expanded site
9a	Waltham Road Employment Area, Boreham	Boreham Parish	14,000sqm of Use Class E(g)(iii), B2 and B8 floorspace	Expanded site
9b	Land to the East of 118 to 124 Plantation Road, Boreham	Boreham Parish	60 homes for specialist residential accommodation	New allocation
9c	South of Main Road and Dukes Wood Close, Boreham	Boreham Parish	22 homes for specialist residential accommodation	New allocation
14b	Land South of Ford End Primary School	Great Waltham Parish	75 homes	Expanded site
11c	Land West of Barbrook Way, Bicknacre	Woodham Ferrers and Bicknacre Parish	250 homes	Expanded Site
17c	Land South of Rough Hill Complex, The Tye, East Hanningfield	East Hanningfield Parish	115 homes	New allocation
17d	Land South and South East of East Hanningfield Village	East Hanningfield Parish	150 homes	New allocation
17e	Land South of Windmill Farm, Back Lane, East Hanningfield	East Hanningfield Parish	40 homes	New allocation
20	Land to East and North of Rettendon Place	Rettendon Parish	350 homes	New allocation

Site Ref.	Additional Site Name	Location	Total Proposed Development	Site Status
21a	Land North of Old Rectory Lodge, Main Road, Woodham Ferrers	Woodham Ferrers and Bicknacre Parish	15 homes	New allocation
21b	Land North of Congregational Church, Main Road, Woodham Ferrers	Woodham Ferrers and Bicknacre Parish	15 homes	New allocation

Review of the Local Plan - Focused Consultation on Additional Sites

FAQs, November 2025

What is happening now?

The Council is undertaking a focused consultation until 8 January 2026 seeking comments on additional site allocations for inclusion within the review of the Local Plan. The additional sites comprise 11 new housing sites, three expanded housing sites and one expanded employment site. The additional sites development trajectory and key consequential plan changes arising from the additional sites allocation policies are also subject to consultation alongside an Integrated Impact Assessment (IIA) Addendum which assesses the changes.

What is a Local Plan?

The Council's Local Plan adopted in 2020 guides growth and development across Chelmsford City Council's area to 2036. This includes locations for new homes, employment opportunities and facilities for local people such as new schools, healthcare provision and upgraded transport infrastructure. It also identifies areas for protection including open space.

Why do we need an up-to-date Local Plan?

We need to review the plan at least every five years to ensure that it remains up to date and continues to meet our needs for development growth to 2041. Without an up-to-date Local Plan, the Council could have very little influence over the location of new development and the provision of infrastructure. Sites could be promoted for development in locations that the Council and its communities want to protect, and which are not considered sustainable. Not having an up-to-date Local Plan would create uncertainty and make it harder to secure appropriate sites for new infrastructure such as schools and health facilities.

Why are we consulting on Additional Sites now?

During the plan's preparation, it has emerged that we need to add more land for homes and employment use into the plan to meet future needs. This is because some sites in the adopted Local Plan have not come forward and some sites will not be built as quickly as expected. These events, outside the City Council's control, mean we do not have enough allocated housing sites to meet our needs for the first five years of the plan when measured against our housing target.

The additional sites will provide around 1,592 additional homes over the plan period to 2041 and help meet the latest housing needs figure of 1,210 new homes a year. We are also proposing to expand the floorspace of a proposed employment site by 10,500sqm.

Where are the Additional Sites?

The additional sites are located in areas accessible to the local highway network and services and facilities such as schools and local shops. They are:

- On previously developed/brownfield land in Chelmsford City Centre
- On the edge of Chelmsford Urban Area to the north (Newlands Spring area) and north-west (Patching Hall Lane/Scot's Green area)
- Around the villages of Boreham, Great Leighs, Bicknacre, Ford End, East Hanningfield, Rettendon Place and Woodham Ferrers.

How were the Additional Sites chosen?

We have selected the additional sites following detailed testing of site constraints and opportunities in relation to matters like flood risk, heritage, traffic and archaeology. They are also on land being promoted for development and in areas considered sustainable and suitable for the development proposed.

What does the consultation say about the A12 Widening Scheme?

The Government cancelled the A12 widening scheme in July 2025 resulting in uncertainty over the delivery of highways improvements to Junction 19 or Boreham Interchange which is specifically needed to support the growth in the plan.

The consultation document outlines how in the absence of the A12 widening scheme, a phased approach to deliver the Junction 19 improvements is being pursued. The design of the first phase of works to support future growth at Chelmsford Garden Community is agreed with National Highways and Essex County Council and discussions are on-going with Homes England regarding funding and delivery. Discussions are also continuing with key stakeholders to fund and deliver the remaining elements of the Junction 19 works.

What is the Additional Sites Integrated Impact Assessment (IIA) Addendum?

We have updated our Integrated Impact Assessment (IIA) to consider the additional sites and other policy changes. This IIA Addendum assesses sustainability and strategic environmental impacts, Habitats Regulations, and health and equality impacts of the proposals and is also published for consultation alongside the Additional Sites Document.

What has happened to the previous Pre-Submission Local Plan consultation responses from February-March 2025?

The review of the adopted Chelmsford Local Plan commenced in Winter 2021 and following consultations in 2022 and 2024, the Pre-Submission (Regulation 19) version was published for consultation in Spring 2025. We have published a Feedback Report setting out the main issues and changed sought in the comments to the Pre-Submission plan. We will also publish a statement responding to the main issues and changes sought after the Additional Sites consultation.

Do I need to re-submit my comments to the Pre-Submission Local Plan consultation in February-March 2025?

No, comments made to the previous Pre-Submission Local Plan consultation in Spring 2025 will be sent in full to the Inspector, together with a high level Council response, for independent examination. The Council will only be accepting representations that are related solely to the content of the Additional Sites Consultation Document and supporting Integrated Impact Assessment (IIA) Addendum.

Where can I view Additional Sites consultation documents?

You can read the consultation documents in the following ways:

- On the Council's Consultation Portal at www.chelmsford.gov.uk/planningpolicyconsult. This system also allows you to submit comments to the consultations
- On the Council's website alongside the Local Plan evidence base documents at www.chelmsford.gov.uk/lp-review
- At the Chelmsford City Council Customer Service Centre, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford CM1 1JE (10am to 4pm Monday to Friday).

At some staffed drop-in public exhibitions – see later in FAQs for details.

If you do not have access to a computer, you can request paper copies by telephoning (01245) 606330. A charge will be made to cover printing and postage costs.

How can I comment on the Additional Sites consultation documents?

You can comment on the consultation documents in the following ways:

Online Consultation Portal:
Go to: www.chelmsford.gov.uk/planningpolicyconsult where you can:

- Read the consultation documents
- Make your comments via the specially designed representation form
- Sign up for alerts to feedback reports and future consultations

This is our preferred means of receiving comments as it ensures that your comments are recorded accurately and are processed quickly. If you have not used this system before or have any difficulties logging in, please see our guidance notes at:www.chelmsford.gov.uk/lp-portal-guide or call us on (01245) 606330.

In writing:
If you prefer to send comments in writing, please fill in the relevant specially designed representation form.

The Local Plan representation form can be downloaded at www.chelmsford.gov.uk/lp-review. Paper copies of the representation form are also available from Chelmsford City Council's Customer Service Centre (details above) or on request by telephoning (01245) 606330 or emailing planning.policy@chelmsford.gov.uk

Forms can be returned:

- By e-mail to planning.policy@chelmsford.gov.uk

- By post to Planning Policy, Chelmsford City Council, Civic Centre, Duke Street, Chelmsford, CM1 1JE
- By hand to Chelmsford City Council Customer Service Centre (details above).

If you have difficulties making representations by e-mail or post due to a disability, please call us (01245) 606330.

The use of the Local Plan representation form is strongly recommended as this will ensure that comments are related to the matters relevant to the subsequent independent examination by a Planning Inspector.

Any anonymous comments and late comments received after 4pm on 8 January 2026 cannot be accepted. Individual acknowledgement of receipt will not be possible.

What is 'legal compliance'?

Local Plans are legally compliant if they are:

- Prepared in accordance with the Council's latest Local Development Scheme
- Accompanied by a Sustainability Appraisal and Habitats Regulations Assessment
- Subject to consultation carried out in accordance with the Council's Statement of Community Involvement
- Compliant with all relevant laws including the Planning and Compulsory Purchase Act (PCPA) and the Town and Country Planning (Local Planning) (England) Regulations 2012; and
- Prepared in line with the Duty to Co-operate.

Please read the Statement of Representation Procedure and Statement on Availability for full details about how to make your comments available at www.chelmsford.gov.uk/lp-review.

What is 'soundness'?

Local Plans are considered sound if they are:

- **Positively prepared** – provide a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development
- **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence
- **Effective** – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common grounds; and
- **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in the National Planning Policy Framework.

Please read the Statement of Representation Procedure and Statement on Availability for full details about how to make your comments available at www.chelmsford.gov.uk/lp-review.

What is the 'duty to cooperate'?

The Council has a legal duty to cooperate with other national and local bodies, such as neighbouring planning authorities, Essex County Council and National Highways. The purpose of the duty is to discuss and address strategic cross-boundary issues such as housing, employment and infrastructure needs.

The Additional Sites Duty to Co-operate Position Statement provides evidence of ongoing engagement and where agreement has been reached. This Statement is also supported by Statements of Common Ground which are being agreed with organisations. These will be available on the Council's website as they are agreed at www.chelmsford.gov.uk/lp-review.

Where and when are the Local Plan exhibitions?

The Civic Centre drop-in public exhibitions will be staffed and provide an opportunity to meet a planning officer face-to-face. The other exhibitions in High Chelmer Shopping Centre and South Woodham Ferrers Town Council offices will not be staffed – see details below. Please check our website www.chelmsford.gov.uk/lp-review for any updates before making your journey.

Location	Date	Time
Council Chamber, Civic Centre, Duke Street, Chelmsford, CM1 1JE	Thursday 11 December	6pm - 8pm
	Friday 12 December	1pm - 3pm
	Saturday 13 December	10am - 12noon
High Chelmer Shopping Centre, Exchange Way, Chelmsford, CM1 1XB	Monday 1 December to Monday 8 December	Unstaffed exhibition panels displayed all-day during shopping centre opening hours
South Woodham Ferrers Town Council, Champions Manor Hall, Hullbridge Road, South Woodham Ferrers, CM3 5LJ	Wednesday 3 December to Wednesday 10 December	Unstaffed exhibition panels displayed 9am - 4pm weekdays, Saturday 9am – 3:30pm, Sunday closed

You can also view the exhibition online at www.chelmsford.gov.uk/lp-review.

What is the evidence base?

National policy requires the Council to ensure that its Local Plan is based on appropriate up-to-date evidence about economic, social and environmental characteristics and prospects of Chelmsford. The evidence base comprises studies and working with key stakeholders and groups across the City area.
More recently completed evidence base used to inform the Additional Sites Document includes:

- Review of the Air Quality Impact Assessment

- Landscape Sensitivity and Capacity Study
- Detailed Water Cycle Study Addendum
- Highways Impact Junction Modelling
- Heritage Impact Assessment
- Updated Strategic Housing and Employment Land Availability Assessment (SHELAA)
- Archaeological Impact Assessment
- Additional Housing Site Studies
- Level 2 Strategic Flood Risk Assessment Addendum and site summary tables and maps, and
- Sequential and Exception Testing Update.

These evidence base documents are available online via www.chelmsford.gov.uk/lp-review.

What weight does the Additional Sites Document have in decision making?

The Additional Sites Document indicates the Council's intent to address future growth requirements in Chelmsford in the period to 2041 and beyond in a planned and sustainable way. At this stage it will be of 'moderate' weight in decision making on planning applications. It will not have full Development Plan status until it has been adopted by the Council. At this point the new Plan would also replace the current adopted plan.

What happens after the Additional Sites Local Plan consultation?

We will acknowledge all 'duly made' comments received, although we cannot write to you about your individual comments. Comments will be published on the Council's planning policy consultation portal in accordance with the Data Protection Act.

The Council will produce a Feedback Report summarising the main issues raised in the consultation responses. We will then submit both the Pre-Submission version of the Local Plan published for consultation in Spring 2025 and the Additional Sites Document for examination by an independent Planning Inspector. Comments submitted to both consultations will also be submitted in full alongside a statement with a high level council response to the main issues raised in both consultations.

There is no need to resubmit representations submitted as part of the previous Pre-Submission consultation. The Pre-Submission Local Plan and the Additional Sites Document will be incorporated together in a single new Local Plan before being finalised for adoption.

How can I be kept up to date on progress?

We have a specially designed consultation portal for Local Plan and other planning policy consultations. If you register, you can:

- Read and save consultation documents
- Make your comments online
- Receive alerts on future consultations

You can find out more about how to use the consultation portal online at www.chelmsford.gov.uk/lp-portal-guide

You can also sign up to the Chelmsford City Life mailing list, to receive news updates.

What are the key stages for the Local Plan review?

Issues and Options – Previous stage
This was the first stage of consultation which took place in August to October 2022.

Preferred Options – Previous stage
This was the second stage of consultation which took place in May to June 2024.

Pre-Submission – Previous stage
This was the third stage of consultation which took place in February to March 2025.

Focused Additional Sites - *Current stage*
This is a focused public consultation on additional housing and employment site allocations before we submit the plan for examination by a government-appointed independent Planning Inspector. The consultation will gather views on legal compliance and soundness.

Submission – Future stage (Mid-2026)
This is the formal submission of the Local Plan. All Plan documents, evidence, and comments received to the Pre-Submission and Additional Sites consultation stages will be submitted to the appointed Planning Inspector for the examination.

Examination – Future stage (Late 2026)
Public hearings will be held. The Inspector will use the comments received to the Pre-Submission and Additional Sites consultation stages to decide what matters to discuss.

Adoption – Future stage (Late 2026/Early 2027)
The new Local Plan is formally adopted by the Council, replacing the existing plan adopted in 2020.

Focused consultation on Chelmsford's Local Plan to begin

By **Corporate Communications**

20 November 2025 local plan consultation

A focused consultation on the addition of several new and expanded housing and employment sites to the Local Plan is being launched by Chelmsford City Council.

The consultation will run from Thursday 20 November until Thursday 8 January. It gives residents the opportunity to review and comment on revisions to the Local Plan that have had to be made in response to several significant events which affect future housebuilding in Chelmsford. These include:

- The Government cancelling the A12 widening scheme.
- Three key development sites having either stalled or been significantly delayed.
- Other developers slowing down their build rates.

1

News

Exhibitions to open as part of Chelmsford's Local Plan review

By **Corporate Communications**

26 November 2025 local plan consultation planning

Residents will be able to visit one of three public exhibitions in Chelmsford and South Woodham Ferrers next month to learn more about proposed changes to the draft Local Plan.

The exhibitions will give people the opportunity to consider proposals by Chelmsford City Council to add several new and expanded development sites to the draft Local Plan and find out how they can take part in the consultation.

2

Final opportunity to take part in Chelmsford's Local Plan consultation

By **Corporate Communications**

2 January 2026 local plan

There's still time to have your say before the focused consultation closes at 4pm on Thursday 8 January.

Help shape development in Chelmsford

The Local Plan is a long-term strategy guiding Chelmsford's growth. It sets out policies on where homes and businesses will be located, what infrastructure is needed and how to protect and enhance green spaces. A clear, up-to-date plan helps Chelmsford to remain a vibrant place to live.

Clear Channel Digital Screens

Clear Channel digital screens in Chelmsford (FOC)

These cover a range of bus stops in the city centre

Ads ran from 04/12/2025 until 7/01/2026

- The ads were shown on rotation for the duration of the hours scheduled
- There were approximately 34,500 plays of this ad across 7 screens, including: Parkway (B&M), Parkway Flyover, Waterhouse Lane, Springfield Road, Rainsford Lane, Moulsham Street (Junction with London Road)

Buses cater to people of all ages, professions, and backgrounds, making bus shelters an ideal medium to reach a broad captive target audience. The ads are also visible to passing audience/traffic.

Research suggests that people are more likely to remember ads they've seen on a digital screen compared to static posters or banners.

Limitation: This report has been prepared on behalf of, and for the exclusive use of ECC, and is subject to, and issued in accordance with, the provisions of the contract between Ringway Jacobs and the Client. Ringway Jacobs accepts no liability or responsibility whatsoever for, or in respect of, any use of, or reliance upon, this report by any third party.

The following table summarises transport comments raised in representations to the Chelmsford Local Plan Focused Consultation on Additional Sites (Regulation 19) which closed in January 2026. The table also provides a focused response to each representation with input from Chelmsford City Council (CCC) and Essex County Council (ECC) to address matters related to Local Plan and wider development planning policy.

Comment by: Alan and Jennifer Swash (C1360942) – Reference: AS-1061			
1.	**No traffic modelling of the Waltham Road/Main Road (B1137) junction** Comments in relation to Strategic Growth Site 9a (Waltham Road Employment Area, Boreham – 14,000 m^2)	No detailed traffic modelling of the Waltham Road/Main Road (B1137) junction has taken place. The VISUM model assigns 33 (AM) and 23 (PM) traffic movements from an additional 10,500m^2 Waltham Road Industrial Estate, despite the Plan's proposal for 14,000m^2 (underestimated by up to 40%). The junction is also likely to see increases of traffic from the significant developments in Great Leighs and southern Braintree.	For the 'Additional Sites (Regulation 19) Highways Impact Junction Modelling Appraisal technical note, October 2025' (T007), 10,500m^2 of employment was modelled in addition to the 3,500m^2 already present in the Pre-Submission allocation and associated modelling (T006-A refers). Therefore 14,000m^2 was modelled in totality. As documented in the Essex Highways' 'Additional Sites (Regulation 19) Highways Impact Junction Modelling Appraisal technical note, October 2025' (T007), junctions along the B1137 Main Road potentially impacted by Local Plan development in Boreham (Growth Area 2), were not prioritised within the scope of junction modelling, owing to the small volume of development trips calculated to/from the proposed sites (relative to other sites under consideration in the Pre-Submission Local Plan) and their anticipated collective impact on the strategic road network. Strategic Policy S9 – Infrastructure Requirements, paragraph 6.91 in the Pre-Submission Local Plan states that more detailed analysis of traffic impacts and mitigation options testing will be required

Table Item ID	Summary of Representation	Detailed representation made	Response
			through the preparation of Transport Assessments/Statements as part of future planning applications. This will be applicable to developments in Boreham and their impact on local junctions along B1137 Main Road in particular. The Highways Authority will then have a further opportunity to review and assess the impact of development traffic to ensure that sufficient mitigation is provided. There is an expectation that phase 1a of the Chelmsford North-East Bypass, once constructed, will improve network resilience in the future to help manage vehicle trips from Great Leighs and Braintree routing via Waltham Road. CCC have considered cross boundary impacts and continue to work with neighbouring authorities, including Braintree District Council in relation to their Local Plans and the impact on the Chelmsford administrative area.
Comment by: Ben Heaysman (1392881) – Reference: AS-2			
2.	**Congestion, Safety and Accessibility along Main Road, Boreham** Comments in relation to Growth Site 9c (South of Main Road and Dukes Wood	No assessment has been published to demonstrate that a new access onto Main Road can be delivered safely in line with NPPF paragraphs 110 and 112 or Local Plan Policy DM27. Various factors, such as the single carriageway, high traffic flows and speeds, access points with blind exits, and a bus route, indicate otherwise. Large vehicles, including emergency services, face difficulty navigating this part of Main Road. Their access,	Strategic Policy S9 – Infrastructure Requirements, paragraph 6.91 of the Pre-Submission Local Plan states that more detailed analysis of traffic impacts and mitigation options testing will be required through the preparation of Transport Assessments/Statements as part of future planning applications. The Highways Authority will then have a further opportunity to review and

Table Item ID	Summary of Representation	Detailed representation made	Response
	Close, Boreham – 22 dwellings)	despite this being a specialist residential scheme, has not been evidenced with no Transport Assessment, Road Safety Audit, speed survey, junction modelling or swept path analysis provided.	assess the impact of development traffic to ensure that sufficient mitigation is provided. Where necessary, this would include a Road Safety Audit, speed survey, junction modelling and swept path analysis for larger vehicles such as HGV's. Site policy SGS9c requires development proposals to accord with a Planning Brief produced by CCC. Site policy requirements include the need for appropriate measures to promote and enhance active and sustainable modes, which includes public transport. These will be identified as part of a Transport Assessment, which is required by the City Council to inform any future planning application as set out in the Local Validation Checklist and referenced in paragraph 1.44 of the Pre-Submission Plan. Further details are also provided in the ECC Developers' Guide to Infrastructure Contributions (2024). Any future requirements for the site must comply with statutory tests of being necessary to make the development acceptable in planning terms; directly related to the development; and fairly and reasonably related in scale and kind to the development. Any development access arrangements would need to be compliant with highway design regulations and go through appropriate Road Safety Audits, as required by ECC Development Management Policies (2011) DM14 – Safety Audits.

Table Item ID	Summary of Representation	Detailed representation made	Response
			This would be undertaken at the planning application stage by an independent safety auditor and reviewed by ECC, as the highway authority, as part of any planning application.
Comment by: Boreham Conservation Society (963966) – Reference: AS-1022, AS-1032 and AS-1024			
3.	Comments in relation to Strategic Growth Site 9a (Waltham Road Employment Area, Boreham – 14,000m^2 of employment space), Growth Site 9b (Land to the East of 118 to 124 Plantation Road, Boreham) – 60 dwellings, and Growth Site 9c (South of Main Road and Dukes Wood Close, Boreham –22 dwellings)	**Site 9a** • Findings from National Highways' appraisal of A12 Widening proposals, detailing the traffic impact on junctions in Boreham, should be acknowledged in the Local Plan appraisal, as they are based on the most up to date modelling • Safety implications of rat-running along Waltham Road will be amplified with an increase in traffic from surrounding developments • Poor visibility from Site 9a • Safety hazards increased with Essex police vehicles being dispatched from Holts Lane • No footways to Waltham Rd site and lack of sustainable transport provision encourages vehicle trips. **Site 9b and 9c** • Access to Site 9b is in the vicinity of a blind bend on Plantation Road • Traffic would be unable to leave Site 9b in peak periods due to tailback of traffic queuing to access Main Road • Request two sites share one access off Main Road but that if the two sites were to be unified, vehicle	**Sites 9a, 9b, 9c** Strategic Policy S9 – Infrastructure Requirements, paragraph 6.91 of the Pre-Submission Local Plan states that more detailed analysis of traffic impacts, visibility splays and other safety implications and mitigation options testing will be required through the preparation of Transport Assessments/Statements as part of future planning applications, but there are no overriding safety concerns identified at this stage. This will be applicable to developments in Boreham and their impact on local junctions along B1137 Main Road in particular. The Highways Authority will then have a further opportunity to review and assess the impact of development traffic to ensure that sufficient mitigation is provided. The Boreham Neighbourhood Plan has been subject to a Regulation 16 consultation. Policy 10 Main Road and other roads in Boreham states that development proposals should endeavour to improve connectivity across Main Rd through reducing/minimising through traffic on Main Road, providing on-site measures, or providing financial

Table Item ID	Summary of Representation	Detailed representation made	Response
		access onto Plantation Road must not be permitted in any circumstances, as Plantation Road traffic would be tempted to cut through the sites 9b and 9c to access Main Road • Reduction in speed limit and traffic calming still sought in the village • Improvements to footways are needed to aid sustainable access to the sites.	contributions, towards reducing the physical scale of Main Road. Potential measures include reducing the width of the carriageway and removing the central islands; creating a dedicated cycle way to the south-east side to link up with the existing cycleway from the A12 Junction 19 (Boreham Interchange); and installing traffic calming measures along the route such as mini roundabouts, pedestrian crossing facilities and lowering the speed limit to 30mph. Site policies 9a to c require more detailed development proposals to accord with a Planning Brief produced by CCC. Once the Neighbourhood Plan is 'made' and forms part of the Development Plan for Chelmsford any Transport Assessment/Statement, will be required to have regard to the measures set out in Policy 10 where they are consistent with the statutory tests of being necessary to make the development acceptable in planning and highways terms; directly related to the development; and fairly and reasonably related in scale and kind to the development. Any proposals will also need to be compliant with highway design regulations and go through appropriate Road Safety Audits, as required by ECC Development Management Policies (2011) DM14 – Safety Audits. This would be undertaken at the planning application stage by an independent safety auditor and reviewed by ECC, as the highway authority, as part of any planning application.

Table Item ID	Summary of Representation	Detailed representation made	Response
			Site 9a (specific) The junction of Waltham Road and Main Road in Boreham was modelled as part of the Local Plan Pre-Submission appraisal, with findings documented in the following evidence base document: 'Transport Impact Appraisal of Local Plan Review Pre-Submission, July 2025 Update', Essex Highways (T006-A). Modelling suggests that the junction will operate close to capacity at peak times – albeit with limited spare capacity assuming a flatter profile of trips across the peak hours. The junction was not prioritised within the scope of modelling for the Local Plan Regulation 19 assessment of Additional Sites, owing to the small volume of development trips calculated to/from the proposed sites in Boreham (relative to other sites under consideration in the Local Plan Pre-Submission) and their anticipated cumulative impact on the strategic road network. It was therefore determined that overall conclusions around the forecast capacity of the Waltham Road/Main Road junction would change little from the previous assessment. Strategic modelling indicates that 'rat-running' along Waltham Road would likely lessen with the provision of phase 1a of the Chelmsford NE Bypass and capacity improvements at the A12 Junction 19 - Boreham Interchange and adjacent junctions.

Table Item ID	Summary of Representation	Detailed representation made	Response
			This will help offset the growth in local development trips from sites in Boreham. Any planning application would be required to consider and make appropriate improvements to footway and/or cycleway provision along Waltham Road from the site to bus stops on Main Road, including appropriate crossing points, in addition to the vicinity of the site. The detail and design of any improvements would be assessed at the planning application stage, and would need to be consistent with the statutory tests of being necessary to make the development acceptable in planning and highway terms; directly related to the development; and fairly and reasonably related in scale and kind to the development. **Site 9b and 9c (specific)** The Additional Sites consultation allocated an additional 82 homes (Sites GS9b and GS9c) for specialist accommodation for older persons, which are expected to generate minimal additional trip movements in the busiest peak hours. Access arrangements to/from Sites 9b and 9c, and any other necessary footway improvements, will be assessed and agreed with developers at the planning application stage, with due consideration paid to local traffic conditions.
Comment by: Kannan Rajesparan (1392958) – Reference: AS-366			
4.	**Traffic modelling is inconsistent with**	The traffic modelling is not concordant with what is experienced by residents and does not consider the lack	Whilst traffic impact modelling is undertaken at a largely strategic scale for the Local Plan appraisal,

Table Item ID	Summary of Representation	Detailed representation made	Response
	that seen on the ground and does not account for the inadequate public transport or pedestrians and cyclists Comments in relation to Strategic Growth Site 19 (Land West of Patching Hall Lane – 200 dwellings)	of public transport in the area, or the use of the road by pedestrians and cyclists. The safety implications on the latter are of particular concern given the large number of students that use Patching Hall Lane. Developments should consider the use of Chignal Road and Hollow Lane for access/egress as Patching Hall Lane and School Lane experience queuing in peak hours. Irrespective of development, further traffic calming measures are required on Patching Hall Lane, to prevent through traffic in a residential area.	as stated in Strategic Policy S9 – Infrastructure Requirements, paragraph 6.91 in the Pre-Submission Local Plan, more detailed analysis of traffic impacts and mitigation options testing will be required through the preparation of Transport Assessments/Statements as part of future planning applications. The Highways Authority will then have a further opportunity to review and assess the impact of development traffic to ensure that sufficient mitigation is provided. The requirement for safe and convenient pedestrian and cycle connections is a policy requirement for this site and paragraph 2.32 requires opportunities for active and sustainable modes to be maximised by providing safe and convenient pedestrian and cycle connections within the sites, with links into the wider network. These will be considered as part of the future masterplan and planning application for this site. Cycling routes will be required to be consistent with LTN 1/20, which requires cycle infrastructure to be safe, and perceived to be safe, to encourage the uptake of cycling (LTN 1/20 paragraph 4.2.9).
Comment by: Helen Fitch (1097387) – Reference: AS-451 and AS-452			
5.	**Inadequate transport infrastructure to support development** Comments in relation to Strategic Growth	New active travel connections near the development may be achievable, however, public transport in the area is infrequent and unreliable and did not improve with the Hollow Lane development (~280 homes), with services worsening over the past five years. Therefore, it is unlikely public transport services would improve. This, coupled	Capacity modelling undertaken for the Local Plan Review appraisal acknowledges that the Roxwell Road/Chignal Road junction will likely approach, but not exceed, capacity by 2041.

Table Item ID	Summary of Representation	Detailed representation made	Response
	Site 18a (Land Northwest of Chelmsford [North of Hollow Lane] – 100 dwellings) and Strategic Growth Site 19 (Land West of Patching Hall Lane – 200 dwellings)	with the lack of employment centres in the area means most journeys are likely to be taken by car. The Roxwell Road/Chignal Road junction will be impacted by the 800 homes to the north of Roxwell Road in the Adopted Local Plan and would therefore be insufficient to cope with traffic from additional developments. Focus on local junctions does not address the wider impacts of the developments and despite references to improvements being made to the road network, there is little or no scope to 'improve' key routes near the sites.	Strategic modelling was not undertaken to appraise the traffic impact of the additional sites proposed in north-west Chelmsford, as it was determined that peak hour trips to/from these developments would be insufficient to impact key corridor routes in Chelmsford in the strategic model, with traffic reassignment shown to dissipate the impact of development trips across the wider network. Focus was therefore placed on assessing local junction impact at key locations along the A1060 Roxwell Road and B1008 Main Road, Broomfield. While traffic impact modelling is undertaken at a largely strategic scale for the Local Plan appraisal, as stated in Strategic Policy S9 – Infrastructure Requirements, paragraph 6.91 in the Pre-Submission Local Plan, more detailed analysis of traffic impacts and mitigation options testing will be required through the preparation of Transport Assessments/Statements as part of future planning applications. The Highways Authority will then have a further opportunity to review and assess the impact of development traffic to ensure that sufficient mitigation is provided. Site policies SGS18a and SGS19 require development proposals to accord with a masterplan to be approved by CCC. Both sites include the policy requirement for appropriate measures to promote and enhance active and sustainable modes, which includes public transport, as part of the sites infrastructure improvements. These will be identified as part of

Table Item ID	Summary of Representation	Detailed representation made	Response
			the individual Transport Assessments for these sites, which are required by the City Council and the Highways Authority to inform any future planning application as set out in the Local Validation Checklist and referenced in paragraph 1.44 of the Pre-Submission Plan. Further details are also provided in the ECC Developers' Guide to Infrastructure Contributions (2024). Any future requirements for the site have to comply with statutory tests of being necessary to make the development acceptable in planning terms; directly related to the development; and fairly and reasonably related in scale and kind to the development.
Comment by: Anna Barrett (1397010) – Reference: AS-113			
6.	**B1008 Congestion and Safety** Comments in relation to Strategic Growth Site 19 (Land West of Patching Hall Lane – 200 dwellings)	Severe congestion has been highlighted on the B1008 corridor, with safety concerns at several locations, such as Patching Hall Lane near the start and end of the school day. Increased traffic will heighten accident risk and worsen congestion. No adequate traffic safety assessment has been carried out during school term time, which is essential for legal compliance.	Strategic Policy S9 – Infrastructure Requirements, paragraph 6.91 of the Pre-Submission Local Plan states that more detailed analysis of traffic impacts and mitigation options testing will be required through the preparation of Transport Assessments/Statements as part of future planning applications. The Highways Authority will then have a further opportunity to review and assess the impact of development traffic to ensure that sufficient mitigation is provided. Where necessary, this would include a Road Safety Audit, speed survey, junction modelling and swept path analysis for larger vehicles such as HGV's.

Table Item ID	Summary of Representation	Detailed representation made	Response
			Site policy SGS19 requires development proposals to accord with a masterplan to be approved by CCC. A Transport Assessment, which is required by the City Council and the Highways Authority to inform any future planning application as set out in the Local Validation Checklist and referenced in paragraph 1.44 of the Pre-Submission Plan. Further details are also provided in the ECC Developers' Guide to Infrastructure Contributions (2024). Any development access arrangements would need to be compliant with highway design regulations and go through appropriate Road Safety Audits, as required by ECC Development Management Policies (2011) DM14 – Safety Audits. This would be undertaken at the masterplan/planning application stage by an independent safety auditor and reviewed by ECC, as the highway authority, as part of any planning application.
Comment by: Dan Steadman (C1397912) – Reference: AS-676 and AS-677			
7.	**Patching Hall Lane/B1008 and School Lane/B1008 Junction Congestion** Comments in relation to Strategic Growth Site 18a (Land	Key junctions, including Patching Hall Lane/B1008 and School Lane/B1008, are forecast to operate at or over capacity by 2041, even with signal optimisation and proposed mitigation. The additional traffic from developments will exacerbate congestion, increase journey times, and raise safety concerns for pedestrians and cyclists. The proposed mitigation schemes remain unfunded and with no guarantee of delivery.	Strategic Policy S9 – Infrastructure Requirements, paragraph 6.91 of the Pre-Submission Local Plan states that more detailed analysis of traffic impacts and mitigation options testing will be required through the preparation of Transport Assessments/Statements as part of future planning applications. The Highways Authority will then have a further opportunity to review and

Table Item ID	Summary of Representation	Detailed representation made	Response
	Northwest of Chelmsford [North of Hollow Lane] – 100 dwellings) and Strategic Growth Site 19 (Land West of Patching Hall Lane – 200 dwellings)		assess the impact of development traffic to ensure that sufficient mitigation is provided. Site policies SGS18a and SGS19 require development proposals to accord with a masterplan to be approved by CCC. Both sites include the policy requirement for appropriate measures to promote and enhance active and sustainable modes, which includes public transport. These will be identified as part of a Transport Assessment, which is required by the City Council and the Highways Authority to inform any future planning application as set out in the Local Validation Checklist and referenced in paragraph 1.44 of the Pre-Submission Plan. Further details are also provided in the ECC Developers' Guide to Infrastructure Contributions (2024). Any future requirements for the site must comply with statutory tests as being necessary to make the development acceptable in planning and highways terms; directly related to the development; and fairly and reasonably related in scale and kind to the development. Any development access arrangements would need to be compliant with highway design regulations and go through appropriate Road Safety Audits, as required by ECC Development Management Policies (2011) DM14 – Safety Audits. Table Item ID	Summary of Representation	Detailed representation made	Response
			Highways Authority, as part of any planning application.
Comment by: Graham Poulteney (1095979) – Reference: AS-758			
8.	**Safety and traffic level concerns on the B1008 in Ford End** Comments in relation to Growth Site 14b (Land South of Ford End Primary School – 75 dwellings)	A new roundabout is proposed as the only access point to the new development despite the B1008 being a 'priority route' for emergency services. Is this roundabout going to just be a white circle on the road? Is an out-of-date traffic measurement system still being used? Conservatively, 75 new dwellings are going to produce 150 new vehicles to the village, most moving at least twice on an average day. Have 'traffic calming measures' and the additional emissions, next to a primary school, been considered.	Full details of the access arrangements will be determined at the planning application stage. Any development access arrangements would need to be compliant with highway design regulations and go through appropriate Road Safety Audits, as required by ECC Development Management Policies (2011) DM14 – Safety Audits. This would be undertaken at the planning application stage by an independent safety auditor and reviewed by ECC, as the Highway Authority, as part of any planning application. As part of the emerging Essex Local Transport Plan a Place and Movement Strategy sets out the type of road and associated treatment measures that can be used. Currently the B1008 is a PR1 route. Associated with this, ECC is currently out to consultation on it's Safer Speeds Strategy. Any changes that are made to the B1008 through Ford End as a result of the Safer Speeds Strategy and Place and Movement Strategy will be taken into account on what type of measures can be delivered along the corridor. Any necessary mitigation, including access arrangements, capacity and safety enhancements will be identified as part of a Transport Assessment, which is required by the City Council

Table Item ID	Summary of Representation	Detailed representation made	Response
			and the Highways Authority to inform any future planning application as set out in the Local Validation Checklist and referenced in paragraph 1.44 of the Pre-Submission Local Plan. Further details are also provided in the ECC Developers' Guide to Infrastructure Contributions. Any future requirements for the site must comply with statutory tests of being necessary to make the development acceptable in planning terms; directly related to the development; and fairly and reasonably related in scale and kind to the development. The ECC Schools Design Guidance (May 2025), Principle 4 will need to be given due consideration as part of any Transport Assessment, which requires school sites to be free from air and noise pollution to enable pupils to have an appropriate learning environment. Development trip rates were determined using the TRICS database, which aggregates survey data from hundreds of recent development sites across the country and is updated on a regular basis. Local Plan traffic impact modelling was undertaken specifically for the weekday AM and PM peak hours. Trip rates used per dwelling were 0.216 for AM peak departures and 0.215 for PM peak arrivals. Whilst these are acknowledged to be low compared with rates that might be calculated using a 'business as usual' approach (i.e. using existing

Table Item ID	Summary of Representation	Detailed representation made	Response
			travel behaviour as a basis for determining future travel behaviour), they nevertheless represent a reasonable uptake in sustainable travel mode alternatives (an approach that is compatible with National Planning Policy Framework (NPPF) guidance). However, they are not as low as trip rates based directly on a 60% active and sustainable mode share.
Comment by: Stefan Gorecki (1393877) – Reference: AS-203			
9.	**Lack of consideration of existing congestion and poor active travel connections** Comments in relation to Strategic Growth Site 20 (Land to East and North of Rettendon Place – 350 dwellings)	There is no consideration of the existing traffic congestion, with a lack of recent modelling on Howe Green and Rettendon Turnpike to explain how the transport network will cope the extra traffic generated from the developments. The site will likely include active travel links, however, beyond that there is a lack of a safe and coherent active travel network.	Local junction modelling was undertaken for the Rettendon Turnpike junction using traffic data collected in September 2025 and latest Department for Transport journey time data from 2024 to validate the model to existing traffic conditions. Analysis confirms that the junction already exceeds capacity in the PM peak and that measures to mitigate development impact will be sought from developers of sites planned in the vicinity. The need for capacity improvements at the Rettendon Turnpike was previously identified through the A132 Route Based Strategy and South Woodham Ferrers Integrated Transport Package and documented in the evidence base for the Adopted Local Plan. The A12 Howe Green junction (J17) was modelled as part of the transport evidence base provided for the Pre-Submission Regulation 19 consultation and documented in the following report: Transport Impact Appraisal of Local Plan Review Pre-

Table Item ID	Summary of Representation	Detailed representation made	Response
			Submission, July 2025 Update, Essex Highways (T006). Strategic Policy S9 – Infrastructure Requirements, paragraph 6.91 of the Pre-Submission Local Plan states that more detailed analysis of traffic impacts and mitigation options testing will be required through the preparation of Transport Assessments/Statements as part of future planning applications. The Highways Authority will then have a further opportunity to review and assess the impact of development traffic to ensure that sufficient mitigation is provided. Site policy SGS20 requires development proposals to accord with a masterplan to be approved by CCC. The site includes a policy requirement to promote and enhance active and sustainable modes, which includes public transport, as part of the site infrastructure improvements. There is also a policy requirement to provide safe and convenient pedestrian and cycle connections within the site, and paragraph 2.170 requires opportunities for active and sustainable modes to be maximised by providing safe and convenient pedestrian and cycle connections within the site, with links into the wider network, for example linking to the existing footways along Main Road, Rettendon. Beyond the site, active travel links will need to tie into the existing network to enable residents to access local facilities within the village. However,

Table Item ID	Summary of Representation	Detailed representation made	Response
			beyond this, the location of the site lends itself more towards sustainable transport options, such as bus connections into key local destinations (Wickford, South Woodham Ferrers), rather than an extensive active travel network. Any future requirements for the site must comply with statutory tests as being necessary to make the development acceptable in planning terms; directly related to the development; and fairly and reasonably related in scale and kind to the development.

Schedule of Proposed Modifications

May 2026

For Chelmsford Policy Board
18 May 2026

NOT FINAL VERSION

Our Planning Strategy 2025 to 2041

Chelmsford Local Plan

Key to changes: Proposed new text with underline ~~Proposed deleted text with strikethrough~~ *Explanation change in italics*

Schedule of Proposed Modifications to the Local Plan

The following Schedule sets out Chelmsford City Council's (CCC) proposed modifications to the Local Plan following consideration of the Regulation 19 representations and has been prepared to support the Examination in Public. Any reference to paragraph and page numbers relate to the Pre-Submission (Regulation 19) Local Plan (February 2025) or Focused Consultation Additional Sites (Regulation 19) Document (November 2025). It is likely that further minor corrections will be made to the final version of the plan, including typographical corrections. This document has not been subject to public consultation.

4	19		Paragraph 1.42	*Amend paragraph:* The Marine Management Organisation (MMO) adopted its South East (Inshore) Marine Plan in June 2021. ~~It includes land to the south of South Woodham Ferrers.~~ The Marine Plan's jurisdiction overlaps with the Council's responsibilities (which extend to mean low water). The South East Inshore Marine Plan area ranges from Mean High Water Springs (MHWS) or the tidal limit out to the territorial limit to the south of South Woodham Ferrers. This remit covers both the marine area and tidal rivers, and extends up to MHWS where there is an overlap with terrestrial planning. The Marine and Coastal Access Act requires public authorities to have regard to marine plans when taking any non-enforcement or non-authorisation decision, such as the development of a local plan. The Local Plan has had regard for the South East Inshore Marine Plan during its development. Decisions on land, or in the intertidal area that affect the south east marine plan area will be undertaken in accordance with both the Local Plan and the South East Inshore Marine Plan. As such, the South East (Inshore) Marine Plan, must be considered alongside the Local Plan, to provide a consistent approach for planning on land, and within the inter-tidal and marine environment. It should also be noted that a marine licence may be required for certain activities carried out within the UK marine area.	Respond to PO24-10398
5	11		Paragraph 1.7	*Amend paragraph:* ~~Once adopted t~~This Local Plan ~~will~~ supersedes the previously adopted Local Plan (2013-2036) and its policies. A schedule of these superseded policies is included at Appendix A of this document.	Prepare the document for adoption

12	17		Paragraph 1.29	*Amend paragraph:* The Council is committed to co-operate with other councils and key organisations on strategic planning issues under the 'Duty to Co-operate'. The Council has complied with the Duty to Co-operate and~~. This has made sure that issues such as providing land for new homes, employment, infrastructure, and managing flood risk are properly co-ordinated. The Council has led discussions with a number of key partners including other local planning authorities, Essex County Council and National Highways. F~~further joint working will continue on the implementation of the Local Plan.	Prepare the document for adoption
13	17		Paragraph 1.30	*Delete paragraph.*	Prepare the document for adoption
14	17		Paragraph 1.32	*Delete paragraph.*	Prepare the document for adoption
15	17		Paragraph 1.33	*Amend paragraph:* All key Evidence Base documents prepared to support ~~this Pre-Submission~~ this Local Plan can be viewed on our website.	Prepare the document for adoption
16	20		Paragraph 1.48	*Amend first sentence:* Neighbourhood Plans have been 'made' (adopted) for South Woodham Ferrers, Writtle, Little Baddow, Sandon ~~and~~, Danbury, and Broomfield.	To reflect additional made Neighbourhood Plan
17		14	Paragraph 1.53	*Add additional bullet point:* • Education assessments for early years and childcare, primary and secondary education	Respond to AS-1120 from Essex County Council
18	28		Paragraph 2.21	*Amend fifth and sixth sentence:* The first phase of the Chelmsford North East Bypass (CNEB) (Section 1a) is programmed for delivery in 2026. The complete CNEB has planning permission and a safeguarded corridor and will provide when fully complete a new 4.6km single carriageway bypass from the A12 in the south to the A131 in the north.	To ensure the plan is up to date

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
19	29		Figure 8	*Amend to:* 2~~5~~6 Conservation Areas.	Reflect the latest position
20	32		Paragraph 2.27	*Amend paragraph:* Chelmsford is also rich in history, with over 1,000 listed buildings, 2~~5~~6 Conservation Areas, 19 Scheduled Monuments and 6 Registered Parks and Gardens of Special Interest. Its historic landscape contains many archaeological sites dating back to pre-historic times.	Reflect the latest position
21	32		Figure 11	*Amend to:* ~~Two~~ Four outstanding ~~grammar~~ schools - King Edward VI Grammar School, ~~and~~ Chelmsford County High School for Girls, Beaulieu Park School and Thriftwood (Special) School	Respond to PS25-185 from Essex County Council
22	37		Table at Paragraph 3.2	*Amend Strategic Priority 3:* Protecting and enhancing the Natural and Historic Environment, and supporting an increase in biodiversity and ecological networks *Amend Strategic Priority 5:* Meeting the need~~s~~ for new homes	For clarity
23	37		Paragraph 3.6	*Amend fifth sentence:* In addition, the Essex Local Nature Recovery Strategy ~~will~~ provides priorities and identify areas for nature recovery to help address the ecological emergency and climate change.	Reflect the latest position
24	41		Paragraph 3.32	*Amend third sentence:* Good design can also help mitigate the impacts of climate change and air pollution, enable people to reduce waste and recycle more, promote healthier lifestyles and build a sense of civic pride. This includes public realm improvements to create attractive places where people want to live, work and visit.	Respond to PS25-186 from Essex County Council
25	41		Paragraph 3.33	*Amend paragraph:* The Local Plan will further require the use of masterplans for Strategic Growth Sites and encourage design codes where appropriate for strategic scale	For clarity

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				residential developments of 100 or more units and non-residential development ~~in excess~~ of 1,000sqm or more.	
26	41		Paragraph 3.37	*Amend first sentence:* The Local Plan will seek to ensure that necessary new or upgraded strategic and local infrastructure and facilities are provided alongside the development of new residential communities including education, police, ambulance and fire and rescue, primary, acute, community and mental healthcare provision, recycling facilities and other waste infrastructure, ~~and~~ appropriate drainage, as well as community facilities such as halls and places of worship.	Respond to PS25-187 from Essex County Council; PSQ25-5232 from East of England Ambulance Service NHS Trust
27	42		Paragraph 3.40	*Amend fifth sentence:* Further work has been ~~is being~~ undertaken to consider the likely traffic impact on local junctions most affected by the allocation sites and the mitigation measures to help to improve the performance at the junctions. ~~The results of this additional modelling work will inform the review of the Local Plan.~~	Respond to PS25-188 from Essex County Council
28	42		Paragraph 3.42	*Amend second sentence:* Throughout the Local Plan period the Council will work with stakeholders to help promote gigabit speed broadband communications in all new developments, where it is viable to do so.	Respond to PS25-189 from Essex County Council
29	45		Paragraph 4.2	*Amend ninth bullet point:* • provide new and expanded infrastructure, services and facilities to support new development, including the provision of new education, healthcare~~and~~, police facilities and fire and rescue facilities and multifunctional green/blue infrastructure	Consistency and respond to PSQ25-6093 from Essex County Fire & Rescue Service
30	46		Paragraph 4.2	*Amend nineteenth bullet point:* • facilitate the provision of gigabit speed broadband (Essex County Council, PS25-190)	To respond to PS25-190 from Essex County Council
31	49		Paragraph 4.16	*Amend last sentence:*	For consistency

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				Infrastructure includes but is not limited to roads and other transport facilities, education and healthcare facilities, flood defences, open spaces and cultural and recreational facilities.	
32	53		Strategic Policy S2 Paragraph 5.11	*Amend last sentence:* Developments should accord with latest technical guidance, or as updated and amended, including The Environment Agency's Approach to Groundwater Protection; The CIRIA C753 SUDS Manual; and Sustainable Drainage Systems: Non-Statutory Technical Standards and have regard to the ECC Sustainable Drainage Systems Design Guide for Essex.	For consistency with changes to DM18
33	54		Strategic Policy S2 Paragraph 5.14	*Add additional paragraph after 5.14:* Development will deliver necessary mitigation and adaptation benefits through the delivery of Biodiversity Net Gain in accordance with Policy DM16.	Respond to Dandara PSQ25-6294
34	54		Strategic Policy S14	*Amend third paragraph:* In addition to the above, ~~all new strategic scale residential~~ developments ~~(defined as development for~~ of 100 or more units~~)~~ will be required to demonstrate through the masterplan process how ~~they~~ the following have been considered ~~the following~~ in their place making objectives:	For clarity
35	55		Strategic Policy S14	*Amend first sentence of fourth paragraph:* For development of 50 or more dwellings, Use Class C2 (Residential Institutions) and non-residential development ~~in excess~~ of 1,000sqm or more (excluding agricultural buildings) a Health Impact Assessment will be required to assess the likely positive and negative impacts on the health and wellbeing of different groups in the population, particularly those who may be more susceptible to poorer health outcomes, and on existing health services and facilities.	For clarity
36	55		Strategic Policy S14	*Delete last sentence of fourth paragraph:* ~~Where significant impacts are identified, planning permission will be refused unless measures to meet the health service requirements of the development are mitigated.~~	For clarity

Key to changes: Proposed new text with underline ~~Proposed deleted text with strikethrough~~ *Explanation change in italics*

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
37	57		Strategic Policy S14 Paragraph 5.26	*Amend third sentence:* For development of 50 or more dwellings, Use Class C2 (Residential Institutions) and non-residential development in excess of 1,000 sqm or more (excluding agricultural buildings) which have relatively little impact upon health and wellbeing and health services, a rapid or desktop assessment may be sufficient to satisfy the requirements of this policy	Respond to PS25-196 from Essex County Council
38	58		Strategic Policy S15 Paragraph 5.28	*Amend paragraph:* Masterplans will be required for Strategic Growth Sites, and they may also be appropriate for constrained or sensitive sites. Masterplans are separate from the planning application process. An approved masterplan must be in place for the relevant site prior to the determination of any planning application, and should set out the development principles and supporting evidence. Some allocated sites have existing masterplans/design/planning briefs. The Council will review and consider whether they are relevant and/or still up-to-date to determine whether further masterplanning is required and whether the masterplan process can be adapted to take account of them. Where identified under the relevant Growth Sites, the Council will require relevant sites to accord with a Planning Brief produced by the Council. The use of planning briefs or design coding may be required for smaller sites to provide a framework for development and clear guidance for design requirements.	Clarity/Consistency with updated Masterplan procedure
39	58		Strategic Policy S15 Paragraph 5.31	*Amend second sentence:* The two ~~N~~new ~~large Strategic Growth Sites~~ Garden Communities should have long-term place keeping arrangements which involve community engagement and involvement in the management and enhancement of public spaces and community assets so residents are at the heart of the community, alongside developer commitment to creating and maintaining a legacy for future generations.	For clarity
40	59		Strategic Policy S3	*Amend second and third sentence:* It has many heritage assets which are worthy of protection for their significance and for their contribution to the special character of Chelmsford.	Reflect the latest position

Key to changes: Proposed new text with underline ~~Proposed deleted text with strikethrough~~ *Explanation change in italics*

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
			Paragraph 5.32	Within Chelmsford's administrative area there are 1,01~~1~~3 listed buildings. There are also 2~~5~~6 Conservation Areas, 1~~9~~8 Scheduled Monuments, and 6 Registered Parks and Gardens all of which are shown on the Policies Map.	
41	60		Strategic Policy S3 Paragraph 5.34	*Amend last sentence:* 5 Conservation Areas cover the City Centre, 1~~8~~7 historic village centres, St John's Hospital and John Keene Memorial Homes and are designated for their special character.	Reflect the latest position
42	60		Strategic Policy S3 Paragraph 5.36	*Amend third sentence:* They also contribute to the local economy through organised events and formal and informal recreation.	Correction
43	60		Strategic Policy S3 Paragraph 5.38	*Amend fourth sentence:* ~~564~~ 786 buildings are included on the current Register of Buildings of Local Value, and 12 sites are identified on the Inventory of Design Landscapes of Local Interest prepared by the Essex Gardens Trust. Both the designated and non-designated heritage assets reflect the expansion of Chelmsford as a manufacturing and technology centre in the early twentieth century, when Hoffmann, Marconi, and Crompton were located in the town.	Reflect the latest position
44	61		Strategic Policy S4	*Amend second sentence of first paragraph:* All projects should have regard to reducing the impacts of climate change and respond to the ecological emergency, delivering multiple benefits in terms of but not ~~exclusive~~ limited to habitats, carbon storage and Natural Flood Management.	For consistency
45	61		Strategic Policy S4	*Amend second and third sentence of second paragraph:* The garden community developments will be required to deliver 20% Biodiversity Net Gain, subject to site constraints.~~,~~ ~~o~~Other ~~qualifying new~~ development, unless exempt, will be required to deliver a minimum 10% Biodiversity Net Gain. The needs and potential ~~of~~ for biodiversity will be considered together with those of natural, historic and farming landscapes,	For consistency

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				the promotion of health and wellbeing, sustainable travel, water management including water resources, and climate change adaptation.	
46	61		Strategic Policy S4	*Amend fifth paragraph:* The Council will ensure that new development maximises opportunities for the preservation, restoration, enhancement, and connection of natural habitats in accordance with the Local Nature Recovery Strategy and the Council's Green Infrastructure Strategic Plan or future replacements. Management, mitigation and compensation measures will be secured through planning conditions/obligations where necessary.	For completeness
47	61		Strategic Policy S4	*Move last sentence from third paragraph to a create a new seventh stand-alone paragraph.*	For clarity
48	61		Strategic Policy S4	*Amend last paragraph:* Contributions from qualifying residential developments within the Zones of Influence and any other mitigation measures, as defined in the adopted or subsequent revisions of the Essex Recreational disturbance Avoidance and Mitigation Strategy (RAMS), will be secured towards mitigation measures identified in the RAMS.	For consistency Respond to PSQ25-6243 from Natural England
49	62		Strategic Policy S4 Paragraph 5.44	*Amend paragraph:* The Environment Act, 2021, brought mandatory Biodiversity Net Gain (BNG) into law. This means that all new developments will, unless exempt, be required to deliver a minimum 10% ~~increase~~ net gain in biodiversity.	For clarity
50	62		Strategic Policy S4 Paragraph 5.45	Amend last sentence: The LNRS ~~will~~ was approved by ECC in June 2025 and sets out in detail a strategy for delivering this mandate, but overall the principle is that there is a need for better connectivity and scale to achieve nature recovery across Essex.	Reflect the latest position/information
51	62		Strategic Policy S4	*Amend paragraph:*	For consistency.

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
			Paragraph 5.46	New development should minimise pollution of the natural environment including potential light pollution from glare and spillage on intrinsically dark landscapes and areas of nature conservation.	
52	63		Strategic Policy S4 Paragraph 5.49	*Add additional sentence to end of paragraph:* New development will be required to have regard to the Essex Green Infrastructure Strategy (2020) and the Essex Green Infrastructure Standards (2022). The Standards provide a set of nine Green Infrastructure principles / standards created to demonstrate what 'good looks like' in designing and delivering Green Infrastructure.	Respond to PS25-200 from Essex County Council
53	64		Strategic Policy S4 Paragraph 5.53	*Amend fourth and fifth sentence:* Biodiversity net gain requirements must not undermine the existing range of protections, in planning policy and legislation, for irreplaceable habitats, ~~and~~ protected sites and protected species. ~~As part of the planning process a calculation in line with the latest Natural England Biodiversity Metric should be submitted and strict adherence to the mitigation hierarchy should be used to ensure harm is avoided in the first instance, that provision for a minimum 10% measurable net gain in biodiversity is made onsite wherever possible and that offsite compensation with a long-term management plan is used as a last resort.~~ Planning applications for new developments, unless exempt, must include the latest DEFRA Biodiversity Metric and must adhere to the mitigation hierarchy to ensure harm is avoided, that provision for a minimum 10% measurable net gain in biodiversity is made onsite wherever possible and that offsite compensation is used as a last resort.	For clarity
54	64		Strategic Policy S4 Paragraph 5.54	*Amend first sentence:* Residential development ~~proposed within the Local Plan~~ has the potential to result in an increase in recreational disturbance on the Essex Estuaries Special Area of Conservation (SAC) and Crouch and Roach Estuaries Special Protection Areas (SPA).	For clarity
55	64		Strategic Policy S4	*Amend last two sentences:*	For clarity

Key to changes: Proposed new text with underline ~~Proposed deleted text with strikethrough~~ *Explanation change in italics*

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
			Paragraph 5.55	Major developments (defined as sites of 10 or more dwellings) may also be required to provide or contribute towards additional recreational mitigation measures to address stand-alone impacts of the proposal as identified in paragraph 8.139 of DM16. This will be informed by a review of the RAMS and SPD which is expected to be complete in ~~late~~ 2026~~5~~ and/or project level HRAs.	
56	65		Strategic Policy S5	*Amend first sentence:* The Council recognises the important role that community facilities have in existing communities including health, police, fire and rescue, education, social, sports and leisure, parks and green spaces, arts and cultural facilities.	Respond to PSQ25-6097 from Essex County Fire and Rescue Services
57	65		Strategic Policy S5 Paragraph 5.58	*Amend first sentence:* An important element of sustainable development and creating safe, cohesive, resilient and sustainable communities is the provision and protection of community uses such as schools, health, police, fire and rescue, and recreation, education, community halls, pavilions, scout huts, places of worship and other cultural buildings at locations that are readily accessible.	Respond to PSQ25-6098 from Essex County Fire and Rescue Services
58		61	Strategic Policy S6 Paragraph 3.10	*Amend paragraph:* The City Council declared a housing crisis in Chelmsford in February 2022 and levels of homelessness continue to rise. Taking into account the range of housing needs identified in the SHNA 2023 and 2024 addendum note, the Council proposes a Housing Requirement figure of 1,210 homes per annum for the plan period 2022 – 2041. This equates to 84~~3~~% of the latest local housing needs figure of 1,433~~754~~ per year calculated using the Standard Method published in the December 2024 NPPF.	Update the Local Housing Needs Figure as of April 2026
59		62	Strategic Policy S6 Paragraph 3.13	*Amend paragraph:* Provision is made for a total of 24,914 ~~24,915~~ ~~23,326~~ new homes in the period 2022 - 2041. When considering existing housing completions (3,057~~2,650~~ ~~1,837~~), existing sites with planning permission (2,259 ~~2,510~~ ~~3,016~~), existing Local Plan allocations to 2036 (11,953 ~~11,975867~~) and	Updated completions and forecast land supply to reflect the April 2026 Housing Site Schedule

				employment and skills opportunities to benefit the local community. This may include apprenticeships, work experience, volunteering, careers information and training. This will support the agenda to reduce skills disparities in Chelmsford. In line with the ECC Developers Guide to Infrastructure Contributions ~~(2023)~~, the plan must be ~~shared with and agreed by the LPA and ECC ahead of~~ secured through the S106 agreement/planning condition. ~~being signed off~~. ~~The plan should include options such as the direct delivery or skills and employability programmes, school / college engagement and work experience opportunities, or construction or workplace apprenticeship schemes for local residents.~~ Further details will be set out in an updated Planning Obligations ~~Contributions~~ SPD. This will include a requirement to cover the Council's monitoring costs ~~associated with the monitoring of the plans~~, with reports provided to the Council by developers for inclusion in the Authority Monitoring Report.	
69	83		Strategic Policy S16	*Amend paragraph:* A) New development must be designed to prioritise and maximise opportunities for active and sustainable transport and movement, through strategic and local sustainable measures to:	For clarity
70	84		Strategic Policy S16	*Amend paragraph:* B) In addition to the above, all new strategic scale development (defined as development for 100 or more units ~~and~~ or non-residential development ~~in excess~~ of 1,000 sqm or more) will be required to demonstrate through the masterplan process how ~~they have~~ the following have been considered in their place making objectives:	For clarity and consistency with S14.
71	87		Strategic Policy S9	*Amend fifth bullet point under Green Infrastructure and Natural Environment:* • Contributions towards recreation disturbance avoidance and mitigation measures for European designated sites as identified in the Essex Recreational disturbance Avoidance and Mitigation Strategy and any future iterations.	Respond to PS25-6243 from Natural England

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
72	86		Strategic Policy S9	*Amend first bullet point under Community Facilities:* • ~~Early years,~~ ~~p~~Primary, ~~and~~ secondary, ~~and post-16,~~ early years education and childcare, including SEND provision ~~education provision~~	Respond to PS25-205 From Essex County Council
73	86		Strategic Policy S9	*Amend first bullet under Utilities:* • Utility infrastructure including electricity and gas distribution and supply, water supply, foul drainage and waste water treatment, telecommunications and gigabit speed broadband	Respond to PS25-205 From Essex County Council
74	89		Strategic Policy S9 Paragraph 6.79	*Amend first and second sentence:* New development can place additional demands upon existing infrastructure and services including the local and strategic transport network, sewers, healthcare, fire and rescue, police and ambulance services, education facilities, and green infrastructure such as open spaces ~~and education provision~~. These will be identified by the relevant infrastructure provider for example National Highways, Essex County Council as Highways and Transportation Authority and lead authority for Education, the Environment Agency, utility companies, ~~and~~ NHS England and the Mid and South - Essex Integrated Care Board as healthcare providers, Essex Police as the Police Authority and Essex County Fire & Rescue Service as the Fire Authority, the East of England Ambulance service NHS Trust and Sport England.	Respond to PSQ25 from Essex County Fire and Rescue and PSQ25-6126 from Essex Police and PSQ25-5239 From East of England Ambulance Service NHS Trust and for consistency
75	89		Strategic Policy S9 Paragraph 6.84	*Amend last two sentences:* Major developments (defined as sites of 10 or more dwellings) may also be required to provide or contribute towards additional recreational mitigation measures to address stand-alone impacts of the proposal as identified in paragraph 8.139 of DM16. This will be informed by a review of the RAMS and SPD which is expected to be complete in ~~late~~ 2026~~5~~ and/or project level HRAs.	For clarity
76	90		Strategic Policy S9	*Amend third sentence:* It will relieve crowding at Chelmsford railway station and act as a transport interchange to encourage sustainable travel by bus, cycle, electric vehicles	Respond to PS25-207 from Essex County Council

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
			Paragraph 6.90	and on foot to strategic and local housing development, including the new Chelmsford Garden Communitiesy.	
77	91		6.95	*Amend last sentence:* Section 1a is planned to be delivered by the end of Summer 2026, and works on the Northern Radial Distributor Road are planned to begin ~~delivered by March~~ during Summer 2026.	To reflect the latest position
78	91		Strategic Policy S9 Paragraph 6.98	*Amend paragraph:* The Army and Navy Sustainable Transport Package ~~was approved by Essex County Council in March 2022. It~~ includes the redesign of the junction in the form of a 'hamburger' roundabout; improved walking and cycling facilities at the junction and on approaches; improved bus priority/bus lanes on Parkway; extension to Essex Yeomanry Way bus lane; and a 350 space expansion of Sandon Park and Ride and 500-spaces at Chelmer Valley Park and Ride. Funding has been agreed in principle through the Government's Major Road Network (MRN) alongside funding from Essex County Council and Chelmsford City Council via CIL.	Respond to PS25-209 from Essex County Council
79	91		Strategic Policy S9 Paragraph 6.99	*Amend paragraph:* Planning applications (one for the Army and Navy junction and two for each of the Park and Ride expansions) were approved in November 2024 by Essex County Council ~~submitted in early 2024~~ and a Final Business Case is anticipated to be submitted to the Department for Transport in Spring ~~late~~ 20246, with construction scheduled to start in Spring 20257 and open to traffic in ~~early~~ 20289. The sequencing of the construction of the different elements of the package is yet to be agreed.	Respond to PS25-210 from Essex County Council
80	91		Strategic Policy S9 Paragraph 6.100	*Amend second sentence:* Route-based strategies ~~are~~ have been prepared ~~and delivered by Essex County Council for strategic road corridors, in consultation with local authorities.~~ in Mid Essex ~~of delivery post 2023/24~~ for the A414 from Chelmsford to Maldon and the A132 at South Woodham Ferrers.	Respond to PS25-211 from Essex County Council

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
81	93		Strategic Policy S10	*Add new paragraph at end of policy:* When particular circumstances justify the need for a viability assessment at planning application stage or in circumstances where a formal amendment is sought and the Council is satisfied that a development proposal cannot be fully compliant and remain financially viable, comprehensive review mechanisms will be applied through planning obligation agreements to enable Policy requirements to be met in full if viability improves over time.	Text moved from DM2 to S10 and amended to apply to the negotiation of all planning obligations not just those relating to affordable housing.
82	93		Strategic Policy S10 Paragraph 6.104	*Amend paragraph:* The new housing, employment and other development proposed in the Local Plan will increase demands on physical infrastructure such as roads and sewers, social infrastructure such as health, fire and rescue, police and ambulance services, ~~and~~ education facilities, and green infrastructure such as open spaces. The Council will work with partners such as National Highways, Essex County Council as the Highways and Transportation Authority~~, National Highways,~~ and the lead authority for Education, the Environment Agency, utility companies, NHS England and the Mid and South Essex Integrated Care System, Essex Police, Essex County Fire & Rescue Service, the East of England Ambulance service NHS Trust ~~emergency services~~ and Sport England, to bring forward the necessary infrastructure and facilities that are required in order to deliver the Spatial Strategy.	Respond to PSQ25-5239 from East of England Ambulance Service NHS Trust; PSQ25-6127 from Essex Police and PSQ25-6103 from Essex County Fire and Rescue Service and for consistency
83	94		Strategic Policy S10 Paragraph 6.105	*Amend paragraph:* For the purposes of this policy the widest reasonable definition of infrastructure and infrastructure providers will be applied. The term infrastructure can include any structure, building, system facility and/or provision required by an area for its social and/or economic function and/or wellbeing including (but not exclusively): footways, cycleways, bridleways and highways; public transport; drainage, SuDs and flood protection; waste recycling facilities; education and childcare; healthcare; sports, leisure and recreation facilities; community and social facilities; cultural facilities, including	Respond to Essex County Fire and Rescue Service PSQ25-6104 and Essex Police PSQ25-6128

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				public art; fire and rescue, police and ambulance ~~emergency~~ services; green and blue infrastructure; open space; affordable housing; live/work units and lifetime homes; broadband; and facilities for specific sections of the community such as younger people or the elderly.	
84	94		Strategic Policy S10 Paragraph 6.107	*Amend paragraph:* ~~In negotiating planning obligations, the Council will require a fully transparent open book viability assessment to demonstrate full mitigation cannot be afforded and that all possible steps have been taken to minimise the residual level of unmitigated impacts. Developers may be required to enter into obligations that provide for appropriate additional mitigation in the event that viability improves prior to completion of the development.~~ When a viability assessment is submitted, the assessment should be on an open book basis and undertaken in line with the Planning Obligations SPD. When the Council is satisfied that a viability assessment is justified, and that a development proposal cannot be fully compliant with Policy requirements and remain financially viable, the Council will require the following: • An early stage review when an agreed level of progress on implementation is not made within two years of the permission being granted • A late stage review which is triggered when 80 per cent of dwellings are occupied • Mid term reviews prior to implementation of phases for development proposals of more than 500 dwellings in total.	Text moved from DM2 to S10 and amended to provide more detail on the review mechanism that will apply to all planning obligations not just those relating to affordable housing.
85	97		Strategic Policy S11 Paragraph 6.121	*Add new second sentence to paragraph:* New development will be required to have regard to the Essex Green Infrastructure Strategy (2020) and the Essex Green Infrastructure Standards (2022). The Standards provide a set of nine Green Infrastructure principles / standards created to demonstrate what 'good looks like' in designing and delivering Green Infrastructure.	Respond to PS25-214 from Essex County Council

208	208		Strategic Growth Site Policy 16a Paragraph 7.371	*Amend first sentence:* Being a large area ~~strategic allocation~~, the wider site includes an area of flood risk. As shown on the Policies Map, development will only be located in areas at least risk of flooding.	Clarity
209	208		Strategic Growth Site Policy 16a Paragraph 7.372	*Amend last sentence:* The masterplan process will establish the detailed preservation and enhancement principles for this site which shall include the provision for the recommendations within the council's heritage impact assessment.	Respond to Historic England PSQ25-5810
210	208		Strategic Growth Site Policy 16a Paragraphs 7.371 and 7.372	*Swap order of paragraphs 7.371 and 7.372 so that it is clear that the requirement in current Paragraph 7.372 relates more clearly to Paragraph 7.370.*	Respond to PS25-254 from Wates and Hammonds Farm Ltd
211	209		Strategic Growth Site Policy 16a Paragraph 7.375	*Amend sixth sentence:* Given the scale of the Garden Communities, the opportunity exists for these developments to achieve 20% biodiversity net gain subject to site constraints and to be capped at what can be practically delivered onsite.	Respond to PS25-256 from Wates and Hammonds Farm Ltd
212	209		Strategic Growth Site Policy 16a Paragraph 7.376	*Amend first sentence:* The development will be required to provide appropriate habitat mitigation and creation, and appropriate buffers to avoid adverse impact on the adjacent local wildlife sites River Chelmer and Old Hare Wood, Waterhall Meadows Essex Wildlife Trust Nature Reserve, the ancient woodlands of Long Spring Wood and Hall Wood, and Blakes Wood & Lingwood Common SSSI, Danbury Common SSSI, and Woodham Walter Common SSSI, which lie within or immediately adjacent to the site.	Correction and to respond to PSQ25-6253 from Natural England

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
213	209		Strategic Growth Site Policy 16a Paragraph 7.377	*Add additional sentence to end of paragraph:* The provision of this quantum of greenspace would simultaneously provide recreational mitigation for potential impacts on the Essex Coast international designations, if required as identified in paragraph 8.139 of DM16.	Respond to PS25-257 from Wates and Hammonds Farm Ltd
214	210		Strategic Growth Site Policy 16a Paragraph 7.384	*Amend paragraph:* The site ~~may~~ contains archaeological deposits which will need to be considered by future development proposals, through an archaeological evaluation. ~~Of particular interest, land to the north of Rumbolds Farm, Hammonds Road contains a significant number and configuration of crop marks requiring further investigation. Other significant archaeological remains and their settings should also be identified and protected.~~ Therefore, a future planning application should be supported by the results of a comprehensive ~~The~~ archaeological evaluation ~~should~~ includeing expansion of existing ~~appropriate~~ trial trenchinges. Archaeological remains identified through this process should be treated appropriately according to their level of significance and in line with Policy DM15. Once completed this~~e evaluation~~ will ~~in~~form part of the informative evidence base on which to define the location of development parcels and open space within the masterplan.	Respond to PS25-258 from Wates and Hammonds Farm Ltd
215	211		Strategic Growth Site Policy 16b	*Amend policy title:* STRATEGIC GROWTH SITE POLICY 16b – LAND ADJACENT TO A12 JUNCTION 18 EMPLOYMENT AREA	Correction
216	211		Strategic Growth Site Policy 16b	*Amend first bullet point under Amount and type of development:* • Around 46,605~~43,000~~sqm (net) for a mix of employment Use Classes E(g)(i-iii), B2 and / or B8 along with other appropriate ancillary employment generating uses	Respond to Pigeon (Sandon) Ltd PS25-238 and to reflect approved planning application

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
217	211		Strategic Growth Site Policy 16b	*Include new fifth bullet point under Historic and natural environment:* • Undertake and Archaeological Assessment	Respond to Pigeon (Sandon) Ltd PS25-238 and to reflect approved planning application
218	211		Strategic Growth Site Policy 16b	*Amend ninth bullet point under Historic and natural environment:* • Provide suitable ~~SuDs and~~ flood risk management and Sustainable Drainage Systems (SuDS)	For consistency
219	212		Strategic Growth Site Policy 16b	*Amend last bullet point under Site infrastructure requirements:* • Appropriate Flood Risk management infrastructure ~~Assessment~~	Respond to Environment Agency PSQ25-6290
220	212		Strategic Growth Site Policy 16b Paragraph 7.386	*Amend first sentence and add new second sentence:* This site allocation will provide a strategic development of around 43,000sqm of mixed employment floorspace in Use Classes E(g)(i-iii), B2 and / or B8. The site has outline planning permission for up to 46,605sqm of mixed employment, logistics, storage and distribution uses (use classes E(g)(iii), B2, B8) supporting associated development, infrastructure and landscaping (Ref: 24/01768/OUT). If this permission is not implemented and a new proposal comes forward, the site capacity will be considered on its individual merit.	To reflect approved planning application
221	212		Strategic Growth Site Policy 16b Paragraph 7.387	*Amend paragraph:* The development of the site will be subject of a masterplan agreed with the Council prior to the determination of a detailed planning application. A conceptual masterplan has been approved as part of outline planning permission (Ref: 24/01768/OUT).	To reflect approved planning application
222	214		Strategic Growth Site Policy 16b Paragraph 7.400	*Add new fourth sentence and amend last sentence:* Open space requirements have been secured by a Section 106 agreement as part of the approved outline planning permission (Ref: 24/01768/OUT). If this permission is not implemented and a new proposal comes forward r~~R~~equirements for on-site sport, leisure and recreation facilities for employees	To reflect approved planning application

255		55	Growth Site Policy 21a Paragraph 2.187	*Add new sentence to the end of paragraph:* There is a surface water sewer within the site boundary. Layout should safeguard suitable access for the maintenance of sewerage infrastructure.	Respond to AS-1103 from Anglian Water
256	232		Policy SPA5	*Amend last sentence of policy:* New development proposals to the south of Sandford Mill will allow the provision of a new vehicular access ~~to Maldon Road (A414)~~ road to the Country Park with a new pedestrian and cycle bridge connecting the Country Park to Sandford Mill.	Respond to PS25-261 from Hopkins Homes Ltd and consistency with SGS3a
257	232		Policy SPA5 Paragraph 7.480	*Amend paragraph:* Vehicular access is achieved from Chelmsford via Brook End Road. There is an opportunity for ~~this~~ access to Sandford Mill to be improved. A ~~N~~new vehicular access ~~to Maldon Road (A414)~~ road is proposed into the adjacent country park from development to the south. It is intended for most visitors to Sandford Mill to park in the country park car park south of the Navigation and access Sandford Mill via a new pedestrian and cycle bridge ~~connections are proposed between the new development proposals to the south and Sandford Mill.~~ There is also an opportunity to promote more sustainable modes of transport to Sandford Mill, such as use of the Chelmer and Blackwater Navigation to link to the City Centre. Additional moorings may also be appropriate in order to increase access to the waterways.	Respond to PS25-261 from Hopkins Homes Ltd And for consistency with SGS3a
258	233		Policy SPA6	*Amend last sentence of policy:* The SPA masterplan should include proposals to maintain National Cycle Route 1 which runs through the Special Policy Area allocation ~~site~~.	Respond to PSQ25-6214 from ARU
259	240		Policy DM2	*Remove fourth paragraph of section A) of the policy:* ~~When particular circumstances justify the need for a viability assessment at planning application stage or in circumstances where a formal amendment is~~	Text amended and moved to Policy S10 so that it applies

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				~~sought, and the Council is satisfied that a development proposal cannot be fully compliant and remain financially viable, comprehensive review mechanisms will be applied through planning obligation agreements to schemes that do not meet, in full, the requirements of Policy DM2 A in order to ensure that affordable housing contributions are improved if viability improves over time.~~	equally to all planning obligations
260	244		Policy DM2 Paragraphs 8.35 and 8.36	*Delete paragraphs 8.35 and 8.36.*	Text amended and moved to Policy S10 so that it applies equally to all planning obligations
261	247		Policy DM3 Paragraph 8.50	*Amend third sentence:* New Gypsy and Traveller and Travelling Showpeople sites are not normally considered appropriate within the Green Belt or Green Wedge and would also be judged against the appropriate policies within the Local Plan for these areas.	Respond to PSQ25-6357
262	254		Policy DM6	*Amend part Aii:* ii provision of appropriate facilities for outdoor sport, outdoor recreation, ~~and~~ cemeteries and burial grounds and allotments as long as it preserves the openness of the Green Belt and does not conflict with the purposes of including land within it;	To accord with the December 2023 NPPF
263	256		Policy DM6 Paragraph 8.84	*Amend first sentence:* When assessing proposals for r~~R~~eplacement buildings the applicant must demonstrate that the original building is lawful.~~may not be inappropriate development but, amongst other matters, the original building must be lawful.~~ *Move the following text into a new paragraph after 8.84:* For the purposes of replacement dwellings, original means as built on 1 April 1974, or if built after this date, as originally built. The current district was	For clarity

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				formed on 1 April 1974 from the Borough of Chelmsford, and most of the Chelmsford Rural District.	
264	258		Policy DM7 Paragraph 8.89	*Amend first sentence:* Essential infrastructure is defined as being infrastructure that must be situated in the location proposed for connection purposes and the benefits of which override the impact of the designation such as sewage or water connections, power sources, waste water recycling/treatment sites, electricity substations, fire and rescue, police and ambulance ~~emergency~~ services or telecommunications including on-site and off-site reinforcements to existing networks.	For consistency
265	258		Policy DM7 Paragraph 8.92	*Amend paragraph:* The Council supports, in principle, the provision of new buildings for community use including educational facilities that can demonstrate a requirement for a Green Wedge location. This is likely to be due to the location of the community or facility in which it serves. These types of buildings will only be permitted where they are required to serve the immediate local community.; ~~i~~It is not intended for “regional centre” type facilities which serve a broader geographical area than a local facility often with more specialised services/facilities to be located in the Green Wedge.	For clarity and to respond to PS25-218 from Chelmsford City Football Club
266	259		Policy DM8	*Amend part A) viii:* viii an isolated dwelling which is of exceptional design quality in that it is truly outstanding, reflecting the highest standards in architecture, and would help to raise standards of design more generally in rural areas; and - would significantly enhance its immediate setting, and be sensitive to the defining characteristics of the local area; or	For clarity
267	260		Policy DM8 Paragraph 8.100	*Amend first sentence:* Essential infrastructure is defined as being infrastructure that must be situated in the location proposed for connection purposes and the benefits of which override any adverse impacts on the intrinsic character and beauty of the countryside such as sewage or water connections, power sources, waste	For consistency

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				water recycling/treatment sites, electricity substations, fire and rescue, police and ambulance ~~emergency~~ services or telecommunications, including on-site and off-site reinforcements to existing networks.	
268	262		Policy DM8 Paragraph 8.107	*Delete paragraph 8.107*	Included in policy for clarity
269			Policy DM11	*Amend policy:* A) Planning permission will be granted for extensions or alterations to existing buildings where they are in keeping with their context and surroundings. B ~~A~~) Green Belt ~~Planning permission will be granted for extensions or alterations to existing buildings~~ In addition to compliance with Part A of this Policy, planning permission will be granted for extensions or alterations to existing buildings where the building is located within the Green Belt and the extension or alteration would not: i result in disproportionate additions over and above the size and scale of the original building; and ii ~~be out of keeping with its context and surroundings or~~ result in any other harm. C ~~B~~) Green Wedge ~~Planning permission will be granted for extensions or alterations to existing buildings~~ In addition to compliance with Part A of this Policy, planning permission will be granted for extensions or alterations to existing buildings where the building is located within the Green Wedge and the extension or alteration would not: i be disproportionate in size and scale in relation to the existing building; and ii ~~be out of keeping with its context and surroundings or~~ result in any other unacceptable harm; and iii conflict with the purposes of the Green Wedge designation. D ~~C~~) Rural Area	Following appeal decision

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				~~Planning permission will be granted for extensions or alterations to existing buildings~~ In addition to compliance with Part A of this Policy, planning permission will be granted for extensions or alterations to existing buildings where the building is located within the Rural Area and the extension or alteration would not: i ~~be out of keeping with its context and surroundings and does not~~ result in any other unacceptable harm; and ii adversely impact on the identified intrinsic character and beauty of the Rural Area.	
270	274		Policy DM16	*Amend Part D) Biodiversity and Geodiversity in Development:* Development proposals ~~should~~must: ii Incorporate measures and features into the design of new development, including buildings, extensions or renovations to increase biodiversity; and iv Unless exempt, must provide a minimum 10% biodiversity net gain (20% on Chelmsford Garden Community and East Chelmsford Garden Community, subject to site constraints, above the ~~existing~~ ecological baseline value of the site, or subsequent government standard, to be calculated and reported in accordance with local and national best practice guidance prevailing at the time of the application, and for significant on-site enhancements or off-site gains, to be secured for a minimum of 30 years after completion of the development. Applications for engineering and other operations, and change of use, in order to create biodiversity sites in appropriate locations, including sites associated with the Local Nature Recovery Strategy, will be supported.	For clarity
271	274		Policy DM16	*Amend last two sentences:* Major developments (defined as sites of 10 or more dwellings) may also be required to provide or contribute towards additional recreational mitigation	For clarity and to update the text

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
			Paragraph 8.140	measures to address stand-alone impacts of the proposal as identified in paragraph 8.139 of DM16. This will be informed by a review of the RAMS and SPD which is expected to be complete in ~~late~~ 2026~~5~~ and/or project level HRAs.	
272	274		Policy DM16 Paragraph 8.141	*Amend paragraph:* For development effecting Nationally Designated Sites, proposals will need to take account of the Chelmsford Green Infrastructure Strategic Plan, the Local Nature Recovery Strategy (LNRS), and the Essex Green Infrastructure Strategy and Standards.	Respond to PS25-235 from Essex County Council
273	274		Policy DM16 Paragraph 8.143	*Amend first sentence:* The design of a development will be expected to incorporate beneficial biodiversity features, such as ~~swift boxes, bat or bird boxes,~~ swift, bat and bee bricks, swift boxes, bat or bird boxes, green roofs and walls, passageways to prevent access to roadways, wildlife kerbs, and gaps in bases of garden fences to facilitate the movement of native wildlife or the creation and connection of wildlife corridors through landscaping or other means.	Respond to PSQ25-3055 from Swifts Local Network: Swifts & Planning Group
274	274		Policy DM16 Paragraph 8.144	*Amend third sentence:* The development proposal should be informed by the results of the checklist, any relevant survey and apply the mitigation hierarchy and have regard to the Council's Green Infrastructure Strategic Plan and the Essex Green Infrastructure Strategy and Standards.	Respond to PS25-236 from Essex County Council
275	275		Policy DM16 Paragraph 8.145	*Add new sentence at end of paragraph:* The 20% target for the Garden Communities is capped at what is reasonably practical and deliverable onsite. Any shortfall in on-site units over and above the mandatory 10% net gain will not be required to be met through off-site units or statutory credits.	Respond to PS22-331 from Wates Developments and Hammonds Estates LLP
276	275		Policy DM16	*Amend first two sentences:* Planning applications must be supported by a draft Biodiversity Net Gain Plan and supporting reports with information to demonstrate how a minimum of	Respond to PS22-331 from Wates Developments and

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
			Paragraph 8.147	10% biodiversity net gain (or 20% for sites SGS6 and SGS16a) will be achieved, implemented, managed and maintained. These ~~should~~ must be carried out by suitably qualified professionals and use the most up-to-date Department of Environment, Farming and Rural Affairs (DEFRA) Biodiversity Metric Calculators, in order for the level of biodiversity value before and after a development takes place to be clearly measured. *Move and amend third sentence onwards to a separate paragraph:* All development proposals, including those for biodiversity enhancements, will be required to demonstrate the application of the mitigation hierarchy to ensure harm is avoided in the first instance. Loss or damage to irreplaceable habitats cannot be offset to achieve a net gain. ~~Public open space requirements or the provision of SANGs are separate to biodiversity net gain and will not be considered as an alternative to or a replacement for net gain provisions. Where possible, the provision of both on site should be segregated to ensure the quality of the habitat for wildlife is maximised.~~ Mitigation measures for protected sites (including SANG) can count towards BNG requirements as long as at least 10% of the biodiversity units come from additional activities other than mitigation and compensation. SANG provision must also demonstrate how through appropriate design and implementation that suitable habitats will be achieved to secure a genuine biodiversity uplift beyond Natural England's minimum SANG standards. Any additional features provided for BNG purposes should not conflict, and ideally complement, with the principal purpose of the SANG.	Hammonds Estates LLP
277	275		Policy DM16 Paragraph 8.148	*Amend paragraph:* ~~The Biodiversity Net Gain Plan must include a costed long-term management and maintenance plan to include enough funding to last for a minimum period of 30 years after completion of the development.~~ However, the Council will aim, where possible, to secure biodiversity net gain for the life-time of the development. A habitat management and monitoring plan (HMMP) will be	For clarity and ensure policy is up to date

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				required where there are significant on-site enhancements or where net gain is to be delivered off-site. The HMMP must demonstrate how the land will be managed for a minimum period of 30 years from the completion of the development. The Council would encourage, where possible, securing biodiversity net gain for the life-time of the development. This is in recognition of the climate and ecological emergency and of the wider long-term benefits that biodiversity net gain provides on improving health and well-being of local communities and improving the natural environment of the Council's administrative area.	
278	276		Policy DM16 Paragraph 8.150	*Amend paragraph:* Final Biodiversity N~~n~~et G~~g~~ain Plans~~proposals~~, and where necessary, Habitat Management and Monitoring Plans, will be secured by condition and/or legal agreement. This will include a requirement to cover the Council's costs associated with the long-term monitoring of the biodiversity net gain proposals, with reports provided to the Council by developers for inclusion in the Authority Monitoring Report and BNG reporting	For clarity and ensure policy is up to date
279	276		Policy DM16 Paragraph 8.151	*Amend paragraph:* Further information on the implementation of biodiversity net gain will be set out in a Biodiversity Net Gain Planning Advice Note. Ahead of this the Council will refer to the latest national best practice guidance including DEFRA guidance, Natural England guidance, 'Biodiversity Net Gain – Good Practice principles for development, a practical guide' (CIEEM, CIRIA, IEMA, 2019) and British Standard BS42020 'Biodiversity-Code of Practice for Planning and Development', or subsequent revisions.	For clarity and ensure policy is up to date
280	276		Policy DM17	*Amend policy:* A) Protected Trees and Woodland Planning permission will be granted for development proposals that do not result in unacceptable harm to the health, and do not result in an unacceptable future relationship, of a preserved tree, trees in a Conservation Area or Registered Park and Garden, preserved woodlands or ancient woodlands. Consideration will also be given to the	For completeness

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				impact of a development on aged or veteran trees found outside ancient woodlands, both now and in the future. Development proposals that have the potential to affect preserved trees, trees in a Conservation Area or Registered Park and Garden, preserved woodlands or ancient woodlands must set out measures to secure their protection. In exceptional circumstances there may be overriding public benefits arising from the development that could justify the removal of a preserved tree or trees. In such circumstances, a replacement tree, or trees, shall be provided of a size and type suitable for its location. In exceptional circumstances, and where there are overriding site constraints, financial contributions may be utilised to fund off-site tree planting. B) Other Landscape Features Planning permission will be granted for development proposals that do not result in unacceptable harm, and do not result in an unacceptable future relationship, to natural landscape features that are important to the character and appearance of the area. Harm or loss of these features will not be permitted unless a landscape strategy, which would compensate for the loss or harm, is secured or where there are overriding public benefits arising from the development. C) New Trees Three new trees per net new dwelling are required to be planted for all new housing development. All new strategic scale employment and infrastructure development (defined as development ~~in excess~~ of 1,000sqm or ~~0.1~~ ~~hectare~~more) will be required to plant a significant number of new trees as part of landscaping requirements.	

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
281	278		Policy DM18	*Amend part B iv:* provide wider sustainability ~~benefits~~ measures to the community, such as water quality, biodiversity and amenity, that mitigate flood risk.	To respond to PS25-143 from the Vistry Group and for clarity.
282	279		Policy DM18 Paragraph 8.163	*Add new first sentence:* "Flood risk" is a combination of the probability and the potential consequences of flooding.	To respond to PS25-143 from the Vistry Group
283	279		Policy DM18 Paragraph 8.167	*Amend paragraph:* SuDS can help make space for water to accommodate climate change as well as delivering other benefits. They shall be designed, constructed, maintained and operated following a natural approach to managing water. This should mimic natural drainage, manage surface runoff at or close to the surface and as close to its source as practicable. This approach should also control the flow of runoff and provide a range of additional benefits such as ~~can also promote~~ community amenity, biodiversity and habitat improvements. By following this natural approach, surface water shall be utilised as a resource on site with multiple benefits to the environment and society, helping to combat climate change, meet future water needs and protect receiving waters and their associated ecology. Relevant developments should consider Countryside Stewardship schemes to help prevent soil loss and to reduce runoff from agricultural land. Where development is located within a Critical Drainage Area (CDA) it may have the potential to impact on the CDA in respect of surface water flooding. Such sites are likely to require an individually designed mitigation scheme to address this issue. Developments should accord with the Environment Agency's Approach to Groundwater Protection; The CIRIA C753 SUDS Manual; and Sustainable Drainage Systems: Non-Statutory Technical Standards and have regard to the ECC Sustainable Drainage Systems Guide for Essex.	Respond to PS25-237 from Essex County Council and Environment Agency PSQ25-6265

298	289		Policy DM24 Paragraph 9.19	*Amend paragraph:* All new residential development will be required to comply with the development standards within Appendix B, unless it can be fully demonstrated that the specific site circumstances require a different design approach resulting in a departure from standard. Applicants should have regard to the Council's Making Places SPD and, where appropriate, Neighbourhood Development Plans, for detailed design guidance.	For clarity
299	290		Policy DM25	*Amend first paragraph in policy:* The Council will expect ~~all new buildings~~ development proposals to incorporate sustainable design features to reduce carbon dioxide and nitrogen dioxide emissions, and the use of natural resources, as follows: *Amend Part A) Water efficiency:* A) Water efficiency All new dwellings, including changes of use, are required to: *Amend second bullet point in Part A) Water efficiency:* • Provide rainwater harvesting on site, and integrated water management techniques where appropriate, ~~including use of specific roof pitch,~~ to optimise rainwater harvesting on site to minimise overall water consumption and maximise its reuse.	For clarity

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				Amend second paragraph in Part B) Electric Vehicle charging point infrastructure: • Proposals for ~~N~~new buildings, extensions or changes of use shall provide convenient access to Electric Vehicle (EV) charging point infrastructure as follows:	
300	291		Policy DM25 Paragraph 9.22	*Amend paragraph:* The Council ~~will encourage~~ requires ~~developers~~ all major development to incorporate integrated water management techniques ~~in schemes~~ to reduce water stress and to ensure the sustainable use of water. This may include site or development-wide rainwater recovery systems, including ~~or~~ the use of specific roof pitch within a development to optimise rainwater harvesting.	For clarity
301	291		Policy DM25 Paragraph 9.23	*Amend paragraph:* A rainwater collection and re-use system can contribute towards a reduction in non-potable (non-drinkable) water consumption, and is required for all new residential development due to wider considerations of water scarcity and to ensure the sustainable use of water. Recovered water can be used for tasks such as flushing toilets, washing laundry and watering gardens and plants. Site layouts will need to make the necessary space available to accommodate rainwater collection/reuse systems. Developers should also refer to Policy DM18 in relation to integrated water management techniques. Further guidance will be set out in the updated Making Places SPD.	Respond to PSG25-6395 from Anglian Water
302	292		Policy DM31	*Amend policy:* POLICY DM31 – OPERATIONAL ENERGY AND CARBON (NET ZERO) IN HOMES AND BUILDINGS ~~CARBON DEVELOPMENT (IN OPERATION)~~ A) New build development (residential and non-residential) All new buildings must be designed and built to be Net Zero Energy and Carbon ~~and Net Zero Energy~~ in operation. They must be ultra-low energy buildings, fossil fuel free, and generate renewable energy on-site to at least match predicted annual energy use.	To reflect changes to the Essex wide policy following Uttlesford Examination and updates to latest available information

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				All new buildings (1 dwelling and above for residential; 100m^2 floorspace and above for non-residential) are required to comply with Requirements 1 to 5 as set out below: Requirement 1: Space heating demand limits i Residential buildings (apart from 1 storey bungalows) and non-residential buildings must achieve a space heating demand of 15 kWh/m^2 GIA (gross internal floor area)/year or less ii Bungalows must achieve a space heating demand of 20 kWh/m^2 GIA/year or less. Requirement 2: Fossil fuel free i No new buildings shall be connected to the gas grid; and ii Fossil fuels must not be used on-site to provide space heating, domestic hot water or cooking. Requirement 3: Energy Use Intensity (EUI) limits i Residential buildings (Use Class C3 and C4) must achieve an Energy Use Intensity (EUI) of no more than 35 kWh/m^2 GIA/year ii On larger sites in exceptional circumstances this may be met on each individual phase as a site-wide residential average (weighted by floor area) provided that no single dwelling has an EUI greater than 45 kWh/m^2 GIA/yr. iii The following non-residential buildings must achieve an Energy Use Intensity (EUI) of no more than the following (where technically feasible) by building type or nearest equivalent: • Offices 70 kWh/m^2 GIA/year • Schools - 65 kWh/m^2 GIA/year • Light Industrial 35 kWh/m^2 GIA/year	

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				iv~~ii~~ For other residential and non-residential buildings, that are not covered by (i) and (iii) above, applicants should report their energy use intensity but are not required to comply with a certain limit. Requirement 4: On-site renewable energy generation Renewable energy must be generated on-site for all new developments by ~~whichever of the following results in the greater amount of~~ roof top solar PV energy (electricity) generation~~:~~ and the ~~i The~~ amount of energy generated in a year should match or exceed the predicted annual energy use of the building, i.e. renewable energy generation (kWh/m^2/year) = or > predicted annual energy use (kWh/m^2/year)*; ~~or~~ ~~ii The amount of energy generated in a year is:~~ • ~~at least 80 kWh/m^2 building footprint per year* for all building types; and~~ • ~~at least 120 kWh/m^2 building footprint per year* for industrial buildings.~~ *For development proposals where it is demonstrated to the satisfaction of the Local Planning Authority that meeting Requirement 4 is not technically feasible then renewable energy generation on-site should be maximised and the residual amount of renewable energy generation (equivalent to the shortfall in meeting the annual energy use of the building in kWh/year) must be offset by a financial contribution (to cover the administration, purchasing and installation of a solar PV renewable energy (electricity) system elsewhere in the plan area or County, which is able to generate a similar amount of energy) and be paid into the Council's offset fund. The offset price is set at £1.82 ~~1.35~~ per kWh or the most recent updated version published on the Essex Design Guide[1] and the contribution shall be calculated at the time of planning application determination.	

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				Requirement 5: As-built performance confirmation and in-use monitoring i All developments must submit as-built performance information at completion and prior to occupation; and ii In-use energy monitoring is required on a minimum of 10% of dwellings for development proposals of 100 dwellings or more, for the first 5 years of operation. Alternative routes to meeting policy requirements Proposals that are built and certified to the Passivhaus Classic or higher Passivhaus standard are deemed to have met Requirements 1 and 3. Requirements 2, 4 and 5 must also be met to achieve policy compliance. Minor residential development proposals (less than 10 dwellings) that are designed and built to the fabric and systems specifications (the 'minimum standards approach') set out in Table 7 (or successor) are deemed to have met Requirements 1 and 3. Requirements 2, 4 and 5a must also be met to achieve policy compliance. B) Extensions and Conversions Applications for residential extensions and conversions affecting existing buildings (but excluding Listed Buildings) are encouraged to meet the minimum standards approach fabric specifications set out in Table 7 and maximise renewable energy generation technology where practical and feasible. [1] ~~https://www.essexdesignguide.co.uk/climate-change/essex-net-zero-evidence/~~ https://www.essexdesignguide.co.uk/media/3171/essex-energy-offsetting-tariff-report-sept-2025.pdf	

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
303	294		Policy DM31 Paragraph 9.29	*Amend paragraph:* To meet the Requirements 1- 5, developments will need to be designed in a way that prioritises a fabric first approach to building design and embeds the energy hierarchy. This means improving building fabric and energy efficiency to ensure energy demand is minimised, and then installing renewable energy generation capacity to meet or exceed demand where possible, followed by offsetting residual energy (if required) as a last resort.	To reflect changes to the Essex wide policy following Uttlesford Examination and updates to latest available information
304	294		Policy DM31 Paragraph 9.30	*Amend paragraph:* Designing new development to be net zero carbon and net zero energy in operation needs to be addressed at both building level and site level and at the earliest possible stage so that factors such as the orientation, built form, building fabric, site layout and landscaping measures can be taken into account to minimise energy demand. These factors also influence the renewable energy generation potential of a site and through good design, can help make a development more resilient to a changing climate, for example, through using landscaping measures and green/blue infrastructure to mitigate potential overheating risk to the comfort and well-being of occupants. It is important when ~~that~~ designing homes and buildings to meet their own operational energy needs on average over a year (hence achieving ~~for~~ 'net zero'), that this is done in a holistic manner ~~at an early stage of the design process, and in a way~~ that considers wider sustainability objectives and issues. Report 2: Essex Net Zero Policy – Summary of Policy, Evidence and Validation Requirements (July 2023, updated September 2025) contains a 1 page high level design guide for a terrace block and low rise apartment block. Also the Essex Design Guide (EDG) contains practical advice on good solar design which focuses on balancing the needs of daylighting, useful solar gain and mitigating overheating risk. To support delivery, the Essex Net Zero Specifications Guide provides technical information and outline 'packaged solutions' which meet the policy requirements.	To reflect changes to the Essex wide policy following Uttlesford Examination and updates to latest available information

Key to changes: Proposed new text with underline ~~Proposed deleted text with strikethrough~~ *Explanation change in italics*

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
305	294		Policy DM31 Paragraph 9.31	*Amend paragraph:* The space heating demand is the amount of heat energy needed to heat a home or building over a year and is expressed in kWh/m^2/year. The ~~It is a~~ measure expresses ~~of~~ the building's elements annual ~~thermal~~ efficiency, so how effectively they are resisting heat transfer ~~of the building elements~~. ~~Various~~ All design and specification decisions affect space heating demand including building form and orientation, insulation, air-tightness, windows and doors and the type of ventilation system. The Essex Net Zero Specifications Guidance provides more information.	To reflect changes to the Essex wide policy following Uttlesford Examination and updates to latest available information
306	294		Policy DM31 Paragraph 9.32	*Amend paragraph:* Reducing space heating demand to the target levels identified is necessary to achieve a net zero energy and carbon (in operation) building and aligns with recommendations from the Climate Change Committee, Royal Institute of British Architects (RIBA), Low Energy Transformation Initiative (LETI) and the UK Green Building Council (UKGBC). It is also beneficial to residents and building users as it directly reduces energy costs.	To reflect changes to the Essex wide policy following Uttlesford Examination and updates to latest available information
307	294		Policy DM31 Paragraph 9.35	*Amend paragraph:* New buildings must not burn fossil fuels for heating, hot water and cooking if Essex, and the UK, is to stay within carbon budgets and successfully transition to a low carbon society. Alternatives are available. For example, heat pumps can provide both space heating (and cooling) and hot water and can serve individual homes or communal heating systems. They use renewable heat sources such as air, ground or water. The key benefit of heat pumps is their efficiency. Efficiencies vary but are typically around 250-400% for an Air Source Heat Pump. Direct electric heating systems are less efficient, typically 100%, and are therefore more expensive to run. Solar thermal panels, which turn solar energy into heat can help with space and water heating too.	To reflect changes to the Essex wide policy following Uttlesford Examination and updates to latest available information

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
308	295		Policy DM31 Paragraph 9.40	*Amend paragraph:* The EUI target set in the policy for dwellings is based on modelling undertaken in the technical evidence base (Report 1: Essex Net Zero Policy – Technical Evidence Base, July 2023, updated September 2025) and includes both regulated and unregulated energy uses. For clarity, the EUI target set out in 3i) applies to residential uses which include: dwellinghouses, flats, self-contained residential units (C3) and houses of multiple occupation (C4).	To reflect latest available information
309	295		Policy DM31 Paragraph 9.41	*Amend paragraph:* For non-residential buildings, the EUI's for the uses listed (office, school and light industrial) are based on gross internal floor areas (GIA) and include regulated and unregulated energy loads. Buildings which represent these generic typologies have been modelled in the evidence (Report 1: Essex Net Zero Policy – Technical Evidence Base, July 2023, updated September 2025) and appropriate EUIs limits identified.	To reflect latest available information
310	296		Policy DM31 Paragraph 9.45	*Amend paragraph:* Evidence (Report 1: Essex Net Zero Policy – Technical Evidence Base (July 2023, updated September 2025) shows that it is technically feasible for a building to generate sufficient renewable energy to match or exceed its predicted annual total energy use and thereby achieve an operational energy balance on-site ('net zero energy'). For clarity, the predicted annual total energy consumption of a building includes both regulated and unregulated energy uses, but excludes energy used for electric vehicle charging.	To reflect changes to the Essex wide policy following Uttlesford Examination and updates to latest available information
311	296		Policy DM31 Paragraph 9.46	*Amend paragraph:* The policy ~~sets out two routes for calculating the renewable energy provision required from a development to be policy compliant. Route i)~~ requires renewable energy generation to at least match the predicted annual energy use of a building. ~~Route ii) sets a minimum amount of renewable energy generation to be achieved in a year based on the building footprint (thereby ensuring that opportunities are taken for rooftop solar PV on large buildings~~	To reflect changes to the Essex wide policy following Uttlesford Examination and updates to latest available information

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				~~e.g. warehouses). Whichever calculation results in the greater amount of solar PV renewable electricity generation is the route that must be achieved.~~	
312	296		Policy DM31 Paragraph 9.47	*Amend paragraph:* The Report 1: Essex Net Zero Policy – Technical Evidence Base July 2023, updated September 2025 sets out some worked examples, and guidance on roof design and orientation is provided in Appendix 2 of that report, which will help applicants maximise renewable energy generation. The renewable energy generation output should be calculated following the Microgeneration Certification Scheme (MCS) guidance method including the impact of shading.	To reflect latest available information
313	296		Policy DM31 Paragraph 9.48	*Amend paragraph:* Matching or exceeding predicted total annual energy use on site with renewable energy generation achieves an on-site energy balance and hence a net zero energy and carbon development in operation from the outset. As well as helping progress towards climate targets, there are other benefits for ensuring new build development maximises renewable energy generation. For example, it would generate 'free' electricity close to its point of use and help deliver significant energy cost savings for residents and building users. It would also aid the transition to a more sustainable energy system by contributing to the significant increase in renewable energy generation required between now and 2050 in the UK and make efficient use of land and resources.	To reflect latest available information
314	296		Policy DM31 Paragraph 9.50	*Amend paragraph:* For the offset mechanism to be triggered, the applicant must justify and demonstrate, to the satisfaction of the Local Planning Authority (LPA), why it is not technically possible for the development to achieve policy compliance with Requirement 4. To do this, applicants should refer to, and meet, the minimum information requirements for policy compliance set out in Report 2: Essex Net Zero Policy – Policy Summary, Evidence and Validation Requirements (July 2023, updated September 2025). The information will be	To reflect latest available information

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				critically reviewed by the LPA, particularly as evidence shows that it is technically possible to achieve all the policy requirements and at a reasonable cost in most development typologies. It is generally only high rise blocks of flats that would likely need to use the offsetting mechanism.	
315	297		Policy DM31 Paragraph 9.51	*Amend paragraph:* If the offsetting mechanism is justifiably triggered by non-compliance with Requirement 4, then the development proposal must still meet the other Policy requirements 1, 2, 3 and 5, and maximise on-site renewable energy generation. By considering solar PV at the very earliest of design stages, it is possible to optimise roof shape and orientation to maximise output. How well a roof space is designed and utilised for PV can be expressed in kWh of energy generated per m^2 of building footprint. The Solar Design Guide (Sept 2022) on the Essex Design Guide provides further advice on how to maximise solar PV on buildings.	To reflect changes to the Essex wide policy following Uttlesford Examination and updates to latest available information
316	297		Policy DM31 Paragraph 9.52	*Amend paragraph:* The offset mechanism is expressed as a renewable energy offset and the price is set in £/kWh, which will be reviewed at least every 3 years and updated for Essex. The price (as of September 2025 ~~July 2023~~) is set at £1.82 ~~£1.35~~ per kWh ~~(published in the Report 1: Essex Net Zero Policy – Technical Evidence Base, July 2023)~~ and has been calculated using a robust methodology based on the cost of providing roof top solar PV in Essex and incorporating an allowance for maintenance and administration. The calculation of the contribution required will be made at the point a planning application is determined using the most up to date offset price (£/kWh) for Essex (and published on the Essex Design Guide[3]). [3] https://www.essexdesignguide.co.uk/climate-change/essex-energy-carbon-evidence/	To reflect latest available information

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
317	297		Policy DM31 Paragraph 9.55	*Amend paragraph:* Further information on how the offsetting mechanism will operate is ~~will be~~ available in the Renewable Energy Offsetting Framework[4] ~~document that is in preparation and will be~~ published on the Essex Design Guide[6] ~~Net Zero Implementation page (EDG~~). Current proposals are for a countywide funding mechanism to be administered by ECC. The Offset tariff will be secured through a planning obligation ~~collected as a single payment (via a direct payment / Section 106 / Unilateral Undertaking).~~ It is initially envisaged that the payments will be used to provide roof top solar PV on public amenity facilities (to be determined). Spending of the offset fund is preferred to be within reasonable distance of the original development, and within the plan area as the development. However, pooling may be necessary to enable installation of sufficient scale schemes. Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				Source: Essex Net Zero Policy Study (Report 2) – Policy Summary, Evidence & Validation Requirements (July 2023, updated September 2025)	
325	301		Policy DM31 Paragraph 9.74	*Amend paragraph:* To support the implementation of this policy in Greater Essex, ECC will publish via the Essex Design Guide (EDG) ~~a 'Net Zero (in operation)~~ Implementation and Monitoring Guidance ~~Guide~~' which will include simple proformas and templates for applicants to use when submitting their energy information. The guidance~~e~~ will help ensure that meeting the requirements of the policy is demonstrated efficiently, effectively and consistently. The Climate and Planning Unit at ECC is available as a consultee to provide support with implementing the policy. Arrangements for monitoring compliance of permissions granted will also be published, to give confidence that new homes and other buildings are built to the standards granted consent.	To reflect latest available information
326	302		Policy DM31 Paragraph 9.77	*Insert additional paragraph after paragraph 9.77:* It is important to take a design-led approach to the consideration of overheating risks, including evaluating the impact of different building materials and features around a building, such as green infrastructure. The Good Homes Alliance have produced a useful tool and guidance[10] to help design teams to identify and mitigate overheating risks at an early stage. [10]https://goodhomes.org.uk/overheating-in-new-homes	To reflect changes to the Essex wide policy following Uttlesford Examination and updates to latest available information
327	302		Policy DM26	*Delete Part B) of the policy.* *Amend Part C) of the policy:* B ~~C~~) All large houses in multiple occupation (accommodating 7 or more people) shall: i Achieve sufficient communal garden space; and	Clarity

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
				ii Provide cycle storage for one cycle per bedroom, within the plot of the building in which the property is located; and iii Provide appropriate and well-designed recycling and waste storage within the plot of the building in which the property is located, or a communal store where the development relates to more than one property; and iv Provide off-street parking at a ratio of one space per bedroom unless the site is located within the City Centre in a sustainable location. The above must be in accordance with the relevant development standards within the Local Plan, including Appendix B.	
328	303		Policy DM26 Paragraph 9.80	*Amend paragraph:* This policy is intended to provide developers with a checklist of requirements for new dwellings. All new dwellings (including flats, conversions, apartments, maisonettes, houses, Houses in Multiple Occupation (HMO's) or extensions) will be required to comply with the development standards within Appendix B, unless it can be fully demonstrated that the specific site circumstances require a different design approach resulting in a departure from standard. Consideration should be given to the detailed guidance contained within the Council's Making Places SPD and, where appropriate, Neighbourhood Development Plans, for detailed design guidance.	Clarity
329	307		Policy DM30 Paragraph 9.97	*Delete last sentence of paragraph.* *Add new paragraph after paragraph 9.97:* Developments should accord with latest technical guidance, or as updated and amended, including 'The Land Contamination Technical Guidance' and the Environment Agency's 'Land Contamination Risk Management' (LCRM) guidance.	Respond to PSQ25-6269 from the Environment Agency

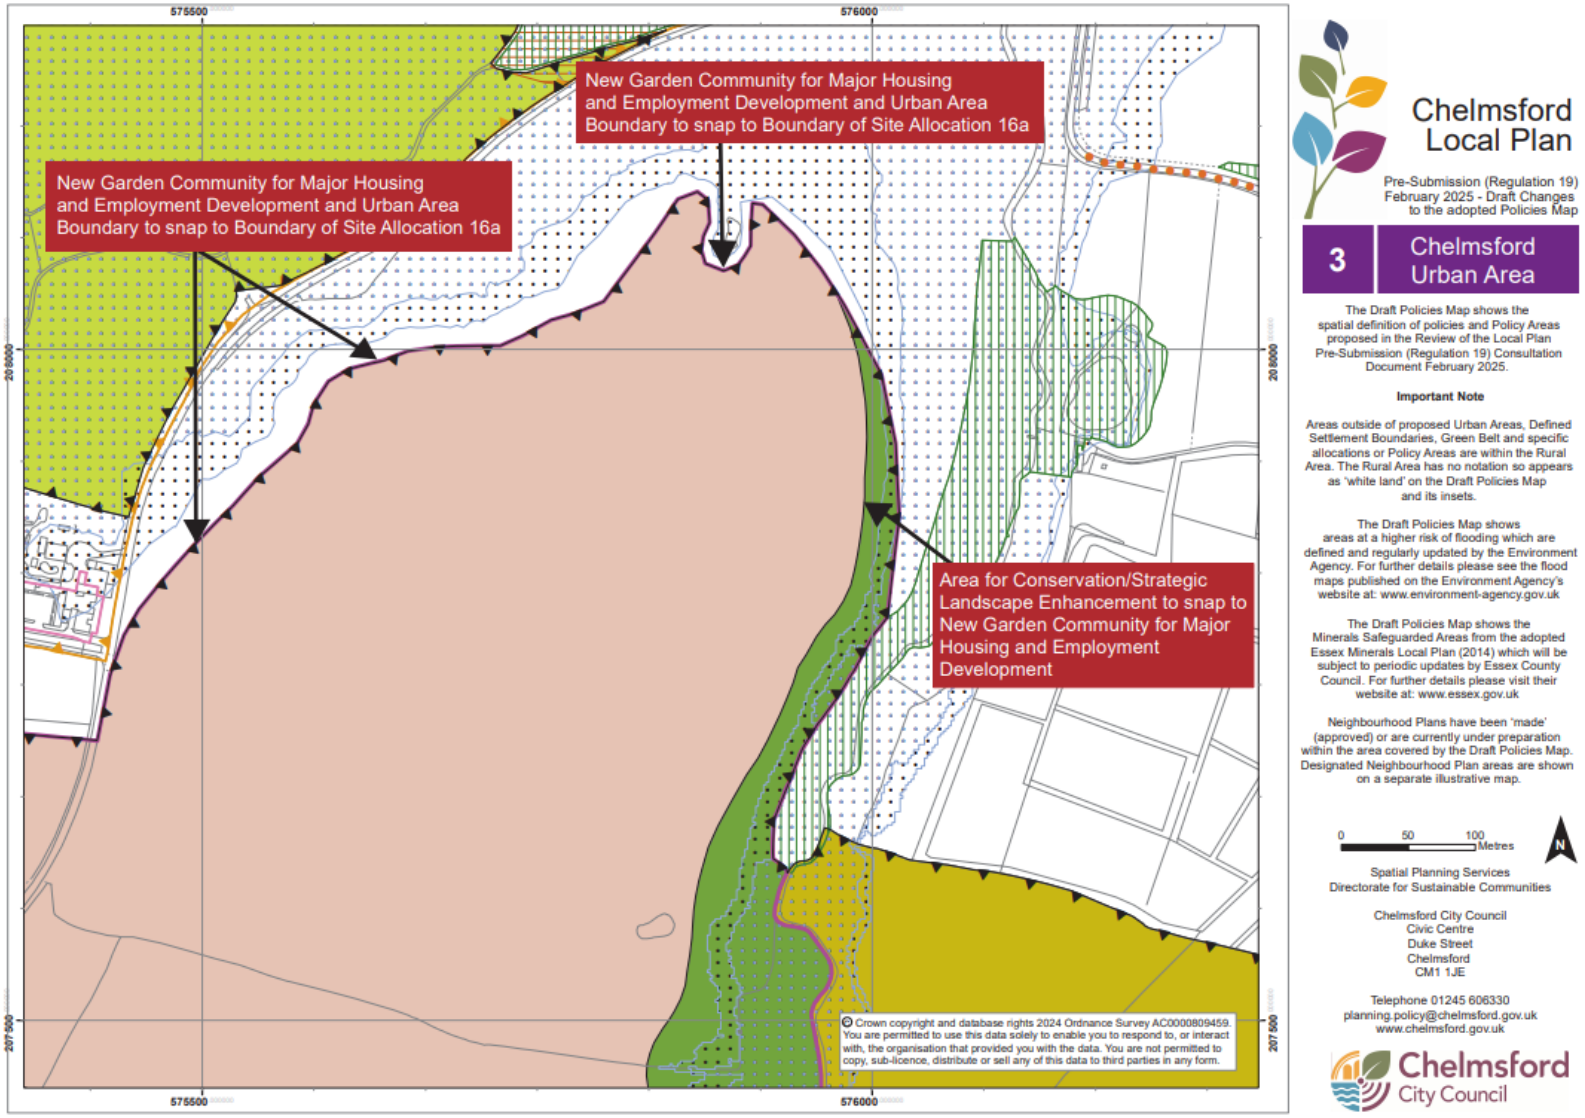
352	432		Appendix D Glossary	*Amend Growth Sites definition:* Growth Sites - ~~Smaller sites to accommodate less than 100 houses.~~ Residential sites of less than 100 new homes; or Employment uses for Use Classes E(g)(i-iii), B2 and B8 7.3 of less than 5,000sqm. These include smaller previously developed sites, or other small sites.	Inconsistent with Draft Submission LP

Ref	Page No in PS LP	Page No in AS LP	Policy / Paragraph etc.	Modification Proposed	Reason
353	432		Appendix D Glossary	*Amend Infrastructure definition:* Infrastructure - Any structure, building, system facility and/or provision required by an area for its social and/or economic function and/or wellbeing including (but not exclusively): footways, cycleways and highways, public transport, drainage, SuDs and flood protection, waste recycling facilities, education and childcare, healthcare, police, ambulance and fire & rescue facilities, sports, leisure and recreation facilities, community and social facilities, cultural facilities, including public art, green and blue infrastructure, open space, affordable housing, live/work units and lifetime homes, broadband and facilities for specific sections of the community such as youth or the elderly.	For completeness
354	433		Appendix D Glossary	*Delete Large Scale Sites definition.*	Inconsistent with Local Plan
355	434		Appendix D Glossary	*Add Mobility Hub definition:* Mobility Hub - Safe and connected places that facilitate convenient access to public, shared and active travel modes. Public travel modes refer to the local bus and rail services, whilst shared modes refer to micro-mobility solutions such as e-scooters, bike share facilities, cargo bike hire, and car clubs, and finally active travel modes refer to walking, cycling, and wheeling.	For completeness
356	436		Appendix D Glossary	*Amend Strategic Growth Sites definition:* Strategic Growth Sites - ~~Large sites to accommodate 100 or more houses.~~ Residential and/or mixed use sites for 100 or more new homes; or Employment uses for Use Classes E(g)(i-iii), B2 and B8 7.3 of 5,000sqm or more. These include both previously developed and greenfield sites.	For clarity

Annex A Proposed Modifications to Policies Map

MOD Ref: 357



Chelmsford Local Plan

Pre-Submission (Regulation 19) February 2025 - Draft Changes to the adopted Policies Map

3 Chelmsford Urban Area

The Draft Policies Map shows the spatial definition of policies and Policy Areas proposed in the Review of the Local Plan Pre-Submission (Regulation 19) Consultation Document February 2025.

Important Note

Areas outside of proposed Urban Areas, Defined Settlement Boundaries, Green Belt and specific allocations or Policy Areas are within the Rural Area. The Rural Area has no notation so appears as 'white land' on the Draft Policies Map and its insets.

The Draft Policies Map shows areas at a higher risk of flooding which are defined and regularly updated by the Environment Agency. For further details please see the flood maps published on the Environment Agency's website at: www.environment-agency.gov.uk

The Draft Policies Map shows the Minerals Safeguarded Areas from the adopted Essex Minerals Local Plan (2014) which will be subject to periodic updates by Essex County Council. For further details please visit their website at: www.essex.gov.uk

Neighbourhood Plans have been 'made' (approved) or are currently under preparation within the area covered by the Draft Policies Map. Designated Neighbourhood Plan areas are shown on a separate illustrative map.

Chelmsford Local Plan

Statement of Co-operation

May 2026

For Chelmsford Policy Board
18 May 2026

NOT FINAL VERSION

Our Planning Strategy 2022 to 2041

Chelmsford Local Plan

1. Introduction

1.1 The Duty to Co-operate (DtC) was introduced through the Localism Act 2011, and until recently set out in the 2024 National Planning Policy Framework (NPPF) (from Paragraph 24). However, this formal duty was removed from 25 March 2026 following introduction of the Levelling-up and Regeneration Act 2023 (Commencement No. 11 and Saving and Transitional Provisions) Regulations 2026.

1.2 The Housing and Planning Minister Matthew Pennycook MP, announcing the removal of the Duty to Co-operate, stressed that local authorities should continue to work together across boundaries.

1.3 Chelmsford's Local Plan has been developed along the formal lines of the Duty to Co-operate, and the Council is committed to ongoing co-operation with adjoining local planning authorities (LPAs), Essex County Council and key stakeholders to bring forward its Local Plan. Co-operation will continue on strategic planning issues that cross administrative boundaries, such as providing land for new homes, jobs and infrastructure. These have a wider impact than local issues and cannot be dealt with by one LPA alone.

1.4 Although no longer a legal test with regard to the Duty to Co-operate, this Co-operation Statement has been prepared to accompany the Submission of the Chelmsford Local Plan. It sets out the strategic context for Chelmsford, the bodies involved with strategic issues and how the strategic approaches and policies have resulted from effective co-operation and joint working. It also reports on how continuing co-operation will be taken forward to plan implementation and monitoring.

2. About Chelmsford

2.1 Chelmsford is located in the East of England, at the heart of Essex, 30 miles north-east of London. The City Council is within a two-tier area for local government, with Essex County Council (ECC) providing public services such as education, highways and social services. ECC is also the Minerals and Waste Planning Authority and Highway Authority for this area. The principal settlements of Chelmsford and South Woodham Ferrers are surrounded by villages set within countryside.

2.2 Chelmsford shares boundaries with seven Local Planning Authorities and covers around 34,000 hectares (shown at Figure 1). The Green Belt covers almost 34% of the land in the south and west of Chelmsford. A map of the strategic planning area and its settlements is included at Appendix A.

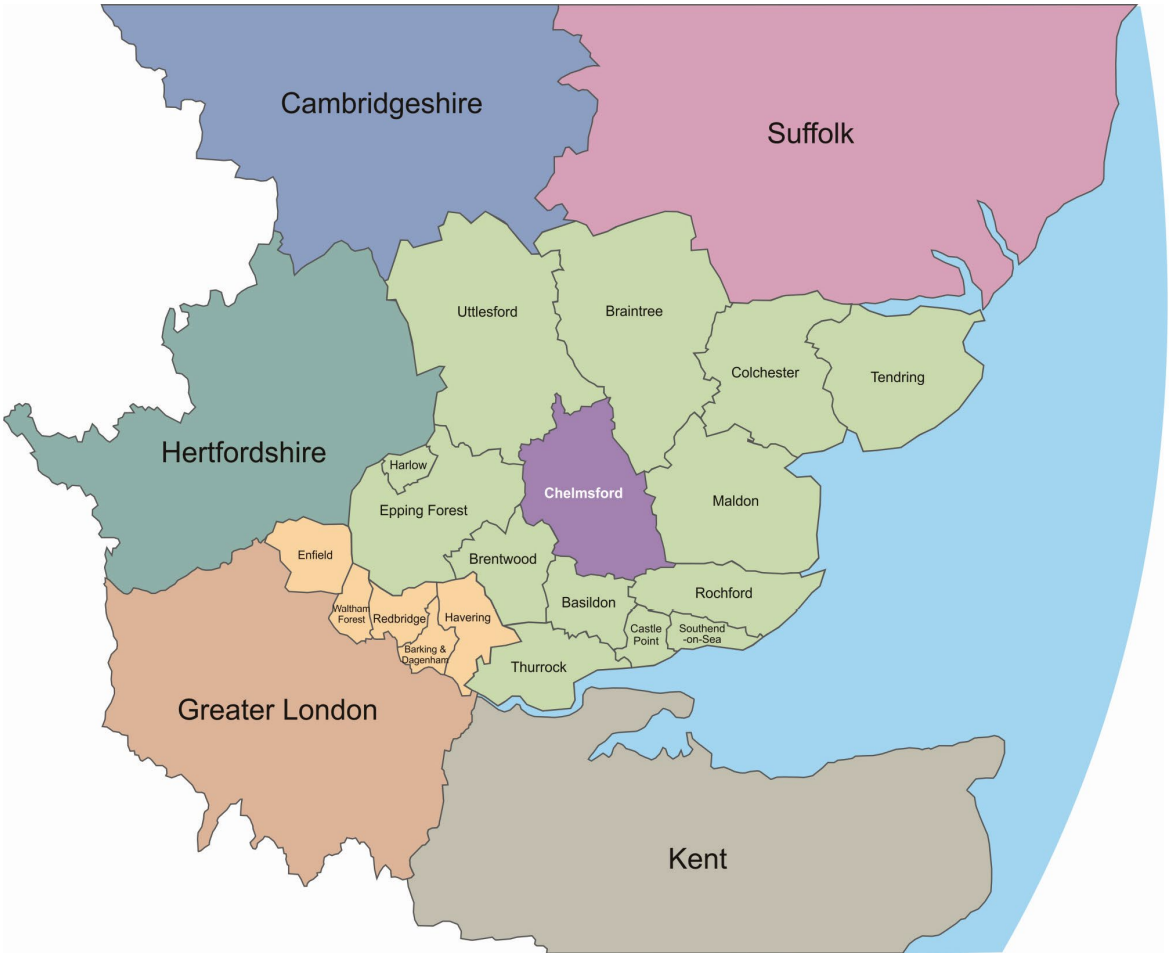

Figure 1: Map of Local Planning Authorities that surround Chelmsford

3. Review of Chelmsford's adopted Local Plan

3.1 Chelmsford's adopted Local Plan (May 2020) covers the period from 2013 to 2036. The Council's review of the Local Plan updates our planning framework to meet local development needs for the whole period of 2022-2041, running from when it is adopted until 2041. The key decisions and processes are attached at Appendix B.

3.2 The Local Plan outlines the strategic priorities and long-term vision for Chelmsford and identifies locations for delivering housing and other strategic development needs such as employment, leisure, community and transport development. It contains a Spatial Strategy to deliver this vision. It sets out the amount and location of new development, and how places will change and be shaped throughout the Local Plan period and beyond. The Local Plan together with the adopted Minerals and Waste Local Plan, South East (Inshore) Marine Plan and six made (adopted) Neighbourhood Plans form the statutory Development Plan for the area.

3.3 The Local Plan is supported by a range of up-to-date evidence studies relating to a number of topics including economy, environment and heritage, monitoring and equality, population and housing, sustainability and habitats, transport and infrastructure, together with documents focused on the then former Duty to Co-operate, consultation and feedback, and other City Council Strategies. The full evidence base can be viewed on the Council's website: https://www.chelmsford.gov.uk/planning-and-building-control/planning-policy-and-local-plan/local-plan-review/

4. Key Relationships and Bodies - Strategic Co-operation in Chelmsford

4.1 The Council makes every effort to seek co-operation on cross-boundary and strategic planning matters in a focused, positive and structured way. At the same time, the Council will continue to work constructively with nearby planning authorities on their own local plan preparation including Basildon Borough Council, Castle Point Borough Council, and Southend-on-Sea City Council.

4.2 The Duty to Co-operate Strategy relating to the adopted Local Plan was refreshed in advance of work commencing on the review of the adopted Local Plan, to ensure we are taking the correct approach to meeting the duty. Public bodies who are subject to the Duty to Co-operate were invited to comment, and we used the feedback to finalise the Strategy. The updated Duty to Co-operate Strategy was published in January 2022 (attached at Appendix C).

4.3 The Council has also reported progress in its Duty to Co-operate Position Statements, dated May 2024, December 2024, and November 2025 (attached at Appendix D, E and F) to accompany each stage of the review of the Local Plan.

4.4 The prescribed duty bodies are set out in Regulation 4 of the Town and Country Planning (Local Planning) (England) Regulations 2012. Of the bodies listed, the following are considered relevant to Chelmsford City Council:

- The Environment Agency
- Neighbouring and nearby planning authorities
- Historic England
- Natural England
- Mayor of London (Greater London Authority)
- Civil Aviation Authority
- Homes England
- Primary Care Trust / Clinical Commissioning Group
- Office of Rail and Road
- Transport for London
- Integrated Transport Authority (Transport East)
- Essex County Council (the Highway Authority)
- National Highways
- The Marine Management Organisation

4.5 The Council has also co-operated with a number of other public bodies including the following:

- Essex Police
- Essex Fire and Rescue
- Network Rail
- Office of Rail Regulation
- Sport England
- Essex Wildlife Trust
- Essex Local Nature Partnership
- Relevant private sector bodies (including higher education providers)
- Relevant utility and infrastructure providers (including transport network, water, sewerage, energy and telecoms).

Co-operation with the prescribed bodies

4.6 The Council continues to work with partners such as the Highway Authority, National Highways, Natural England, the Environment Agency, and the NHS Integrated Care Board to identify and bring forward the necessary infrastructure that will be required in order to deliver the Local Plan's Spatial Strategy, as follows:

- The Environment Agency – have been involved with the preparation of the Water Cycle Study (CC002, CC003, CC017) and Strategic Flood Risk Assessment (CC001, CC001-A to G, CC010, CC018) evidence base work.
- Historic England – have been consulted during the Local Plan preparation, including advice on heritage policy formation and individual site allocations.
- Natural England – have been involved during the Local Plan preparation, and particularly with the Essex-Wide Recreational Avoidance and Mitigation Strategy (RAMS).
- Homes England – have been involved in development proposals outside the Local Plan process.
- Essex County Council (as Highway Authority) – have been closely involved with the Local Plan development for traffic modelling; wider ECC involvement has included education, archaeology, waste and minerals advice.
- The Marine Management Organisation – the Local Plan takes consideration of the South East (Inshore) Marine Plan (OSP010), to provide a consistent approach for planning on land, and within the inter-tidal and marine environment in respect of a stretch of the Crouch Estuary in the Plan area.
- NHS Integrated Care System (Mid and South Essex) – have been kept informed of progress on the Local Plan and long-term growth; the Council has attended Mid-Essex Estates Forum meetings.
- National Highways – involved with Local Plan preparation and attended regular meetings, mainly in respect of impact on the A12 and strategic highway network.
- Mayor of London (Greater London Authority) – has been kept informed of progress on the Local Plan.
- Civil Aviation Authority – has been kept informed of progress on the Local Plan.

Key documents are listed above and in the evidence base listed in the sections below, including Statements of Common Ground. Evidence Base reference numbers are included alongside the document titles. They are all available to view on the Council's Local Plan web page: https://www.chelmsford.gov.uk/planning-and-building-control/planning-policy-and-local-plan/local-plan-review/

Co-operation with neighbouring authorities

4.7 Existing joint working arrangements include the Essex Planning Officers' Association (EPOA), the Co-operation for Sustainable Development Group, and the Officer Strategic Spatial Planning Liaison Group (associated with the London Plan), as well as close relationships with Essex County Council. EPOA is an Essex-wide group of LPA officers which brings forward strategic action on various topics such as Gypsy and Traveller provision, biodiversity net gain, health impacts, and response to national policy consultations.

4.8 As part of devolution and local government reorganisation proposals, the Council is engaged in ongoing discussions on strategic matters with the North Essex Councils (including councils for Epping Forest, Harlow, Uttlesford, Braintree, Colchester, Maldon and Tendring); and the Association of South Essex Authorities (including councils covering Basildon, Brentwood, Castle Point, Rochford, Southend-on-Sea and Thurrock).

4.9 Other joint working groups include the Chelmsford and Braintree Bus Group comprising the Council, Braintree District Council, the local bus operators First Bus and Hedingham Omnibus, Broomfield Hospital Foundation Trust, and Essex County Council. Discussions include network improvements, passenger information, access for people with disabilities, links to Broomfield Hospital, and ticketing.

4.10 The Council has also participated as a consultee on the East Anglia GREEN (Norwich to Tilbury) power lines proposal, Stansted Airport airspace redesign, the A12 Chelmsford to A120 Marks Tey widening scheme, and the Local Nature Recovery Strategy.

4.11 The Council has continued to engage with neighbouring authorities and arranged joint officer and Member briefings at each formal stage of the Local Plan in September 2022, June 2024 and March 2025. In addition, a programme of meetings has been maintained with individual authorities, as set out in the Duty to Co-operate Position Statements attached at Appendix D, E, and F.

4.12 In preparation for Submission of the Local Plan in June 2026, Statements of Common Ground have been agreed with the following neighbouring authorities and key bodies:

- Basildon Borough Council (TBC)
- Braintree District Council (SOCG005)
- Brentwood Borough Council (SOCG034)
- Castle Point Borough Council (SOCG013)
- Colchester City Council (SOCG024)
- Epping Forest District Council (SOCG025)
- Maldon District Council (SOCG010)
- Rochford District Council (SOCG011)
- Southend-on-Sea City Council (SOCG030)
- Tendring District Council (SOCG012)
- Thurrock Council (SOCG026)
- Uttlesford District Council (SOCG031)
- Essex County Council (SOCG021)
- Anglian Water (SOCG019)
- Environment Agency (SOCG018)
- Historic England (SOCG008)
- Natural England (SOCG014)
- National Highways (SOCG033)
- Marine Management Organisation (SOCG042)
- Essex Police (SOCG040)
- Defence Infrastructure Organisation (SOCG036)
- East of England Ambulance NHS Trust (SOCG037)
- Essex & Suffolk Water (SOCG041)

5. Strategic Planning Priorities and Cross Boundary Matters

5.1 A number of broad strategic matters with possible cross-boundary implications were examined in the early stages of the preparation of the Local Plan, through evidence gathering, consultation on the update to the Council's Duty to Co-operate Strategy and meetings from early 2022 with Duty to Co-operate bodies. Throughout the Local Plan preparation process, the list of strategic matters and co-operation activities has been kept under review.

The Chelmsford Local Plan Strategic Priorities, and the strategic policies which will deliver them, are set out below:

1 Addressing the climate and ecological emergency
Strategic policies S2, S4, and S16

2. Promoting smart, active travel and sustainable transport
Strategic policies S9, S10, and S16

3. Protecting and enhancing the natural and historic environment, and support an increase in biodiversity and ecological networks
Strategic policies S3, S4, and S11

4. Ensuring sustainable patterns of development and protecting the Green Belt
Strategic policies S1, S7, and S11

5. Meeting the needs for new homes including Gypsy and Traveller and Travelling Showpeople Accommodation
Strategic policies S6 and S7

6. Fostering growth and investment and providing new jobs
Strategic policies S6, S12, and S17

7. Creating well designed and attractive places, and promoting the health and social wellbeing of communities
Strategic policies S5, S14, and S15

8. Delivering new and improved strategic and local infrastructure
Strategic policies S9 and S10

9. Encouraging resilience in retail, leisure, commercial and cultural development
Strategic policies S8, S12 and S17

5.3 Using these Strategic Priorities and the outcomes of the on-going Duty to Co-operate process the following Strategic Planning Issues have been identified as the focus for co-operation:

i) Meeting the needs for new homes including Gypsy and Traveller and Travelling Showpeople accommodation
ii) Fostering growth and investment and providing new jobs
iii) Delivering new and improved strategic and local infrastructure
iv) Encouraging resilience in retail, leisure, commercial and cultural development
v) Protecting and enhancing the natural environment and support an increase in biodiversity and ecological networks
vi) Creating well designed and attractive places, and promoting the health and social wellbeing of communities

The sections below set out a summary of the background to the Strategic Planning Issues and key examples of co-operation activity. Where specific comments were received during consultation stages these are also summarised. More detail of the topics discussed is contained in the Duty to Co-operate Position Statements.

i) Meeting the needs for new homes

5.4 The requirements for all new housing in Chelmsford are outlined in Strategic Policy S6 – Housing and Employment Requirements, and the distribution in Strategic Policy S7 – The Spatial Strategy.

5.5 The adopted Local Plan was examined under the 2012 NPPF. There have subsequently been updates to the NPPF – the Review of the Local Plan Pre-Submission (Regulation 19) Local Plan has been considered against the 2023 NPPF as set out in the Strategic Housing Need Assessment (SHNA). A SHNA addendum was prepared in 2024 to have regard to the proposed housing numbers for the progression of Local Plans at an advanced stage of preparation using transitional arrangements set out in the NPPF published on 12 December 2024. Among other factors the SHNA looks at how higher growth might drive increased net in-migration to the Council's area from adjoining authorities, reflecting an increase in net in-commuting to the Chelmsford area for work.

5.6 Whilst it is still considered that Chelmsford shares a Housing Market Area with Braintree, Colchester, Maldon and Tendring Councils, joint housing need studies are no longer appropriate to address the requirements of meeting the Government's 2024 Standard Method of calculating housing need.

5.7 However, there are several evidence base documents which have been undertaken in partnership, and by the Council alone, to support the Local Plan, which include:

- Chelmsford Strategic Housing Needs Assessment 2023 (AH001)
- Chelmsford Strategic Housing Needs Assessment Addendum 2024 (AH004)
- Chelmsford Gypsy and Traveller Accommodation Assessment 2024 (AH003) undertaken in consultation with Basildon, Braintree, Brentwood, Epping, Maldon, Rochford and Uttlesford Councils and Essex County Council.

5.8 Taking into account the range of housing needs identified in the SHNA 2023 and 2024 addendum note, the Council proposes a Housing Requirement figure of 1,210 homes per annum for the plan period 2022 – 2041. This equates to 84% of the latest local housing needs figure of 1,433 calculated using the Standard Method published in the December 2024 NPPF.

5.9 In total, provision is made for a total of 24,914 new homes in the period 2022 – 2041. When considering existing housing completions (3,057), existing sites with planning permission (2,259), existing Local Plan allocations to 2036 (11,953) and Windfall Projection to 2041 (2,218), the residual new Local Plan Allocations for the period to 2041 is 5,427 new homes.

5.10 In accordance with the National Planning Policy for Traveller Sites (PPTS), the Council, in partnership with other Essex Local Authorities, undertook a Gypsy and Traveller Accommodation Assessment (GTAA) in 2023. This identifies a requirement for 40 permanent Gypsy and Traveller pitches and 38 permanent Travelling Showpeople plots to be developed by 2041 within Chelmsford for households that meet the definition of Gypsies and Travellers in the PPTS at the time the GTAA was published.

5.11 The Council expects to see Gypsy and Traveller Pitches and/or Travelling Showpeople accommodation provided on all suitable strategic development allocations, but not all the identified need can be met this way. In order to meet the identified need, sites providing a total of 30 permanent pitches for Gypsies and Travellers, and 28 permanent plots for Travelling Showpeople will be allocated with

the remainder of the need to be met through regularisation of existing pitches/plots and windfall applications using the criteria of Policy DM3.

5.12 With regard to unmet housing need, a Mechanism for the Consideration of Unmet Housing Need (AH005) was developed and agreed by the Essex Planning Officers' Association (EPOA) in September 2017 for use across the Essex authorities (Appendix G). This sets out the methodology by which each local planning authority, together with their HMA partners:

i) should agree their full objectively assessed housing number, and
ii) if there is likely to be an unmet housing need because of constraints applicable to the area of that authority, the process to follow to request an adjoining HMA to meet or contribute towards meeting the unmet need.

5.13 The following Councils wrote to Chelmsford City Council, making a formal request for assistance in meeting their unmet housing need:

- Basildon Borough Council – post Pre-Submission consultation stage
- Castle Point Borough Council – at Issues and Options and Preferred Options consultation stages
- Southend-on-Sea City Council – at Preferred Options stage, and at Regulation 18 Stage of its draft Local Plan.

5.14 These requests were seeking assistance due to Green Belt constraints and increased housing need identified through the Government's revised Standard Methodology. The Council responded that it did not share a housing market with these local authorities and noted more recently that its housing need had also risen, and that additional sites would need to be identified to meet its own housing supply requirements – meaning there was no capacity to accommodate any unmet housing need from other authorities. The Council also suggested that the South Essex authorities should undertake a strategic green belt review across the whole of the area to re-consider what level of housing could be met within their boundaries.

5.15 Basildon Borough Council also formally sought assistance on meeting its needs for Gypsy and Traveller pitches to meet increased needs identified in their Gypsy and Traveller Accommodation Assessment. The Council responded that it was unable to identify sites to meet its own need, and therefore had no capacity to help meet Basildon Borough Council's unmet need.

5.16 The Council will continue to work closely with neighbouring authorities and Essex County Council, to monitor requirements for all types of housing including affordable units and Gypsy and Traveller accommodation, through the Plan's Monitoring Framework and when the Plan is next reviewed.

5.17 Monitoring for the delivery of housing will be undertaken by the Council through its Annual Monitoring Report and the Five Year Land Supply Position Statement. Further detail on this and the evidence base can be found in the Submission Housing Topic Paper (TP009).

STRATEGIC PLANNING ISSUE i - MEETING THE NEEDS FOR NEW HOMES

Key Strategic Partners

Essex County Council
EPOA
Essex LPAs

ACTIONS

Action: Preparation of a joint evidence base on Gypsy and Traveller and Travelling Showpeople accommodation requirements (GTAA)

Partners: Essex local authorities/EPOA.

Outcome: The Chelmsford GTAA (2024) is part of a wider study that covers the whole of Essex, together with Southend-on-Sea and Thurrock. Although Basildon were not part of this commission, they have been a partner in the process and have used the same consultant and methodology for their GTAA.
Essex-wide guidance for unmet Gypsy and Traveller accommodation has been developed by EPOA, through a working group of officers from Chelmsford, Basildon, Harlow, Colchester and Thurrock Councils, and is maintained to date.

Date: Chelmsford GTAA, September 2024
Mechanism for the consideration of unmet Gypsy and Traveller Need, December 2018.

Action: Maintain the Essex-Wide Mechanism on unmet Housing Needs

Partners: EPOA comprising Essex Local Planning Authorities and Essex County Council.

Outcome: A Task and Finish group of officers from Essex Local Planning Authorities was formed by EPOA to agree a process of considering unmet housing need within and outside Essex Housing Market Areas, which is maintained to date.

Date: Mechanism for the consideration of unmet Housing Need, September 2017 (Appendix G).

Outcomes from Strategic Working

The key outcomes from strategic working are:

- Joint working with North Essex Councils and the Association of South Essex Authorities
- The completion of an Essex-Wide assessment of Traveller accommodation needs in partnership with Essex Local Authorities using a consistent and robust methodology
- Maintaining the Essex-Wide Mechanism on Unmet Housing Need agreed.

Comments made on the policy approach during consultation:

- Broad support of the policy and CCC's commitment to meeting its identified housing, employment and Gypsy and Traveller accommodation needs within the

administration's boundary (Brentwood Borough Council, Rochford District Council)

Local Plan Policies:

- **Strategic Policy S6 - Housing and Employment Requirements** has been formulated to ensure that the identified housing need is met in full. The Council will review housing numbers regularly in accordance with national policy requirements, and will continue to have regard to the housing market area when consulting on any strategic matters that apply, including any housing needs that cannot be met within neighbouring areas.
- **Strategic Policy S7 – The Spatial Strategy** sets out development locations and allocations for housing, and provision of Gypsy and Traveller pitches and Travelling Showpeople plots.
- **Policy DM1 – Size and Type of Housing** sets out the mix of housing sizes needed to meet future housing needs and create mixed communities. This policy reflects latest evidence from the Strategic Housing Needs Assessment, and from joint working with ECC for provision of Specialist residential Accommodation.
- **Policy DM2 – Affordable Housing and Rural Exception Sites** reflects the latest evidence from the Strategic Housing Needs Assessment.
- **Policy DM3 – Gypsy, Traveller and Travelling Showpeople Sites** sets out provision for the accommodation needs identified through the joint GTAA.

Unresolved issues

- There are no outstanding Duty to Co-operate Issues.

ii) Fostering growth and investment and providing new jobs

5.18 National policy requires Local Plans to proactively drive and support sustainable economic development to deliver jobs. This includes identifying sites to meet identified needs. Levels of proposed new employment and new housing are intrinsically linked, to accommodate anticipated growth. In particular, the Employment Land Review 2023 (and Focused Update 2024) which includes employment growth forecasts and identifies a functional economic market area with neighbouring LPAs, and the Retail Capacity Study Update 2023 have informed the amount and type of employment and retail floorspace that will be required within the Local Plan period.

5.19 The evidence base documents which have been produced to support the Local Plan include:

- Retail Capacity Study Update 2023 (ECON001)
- Employment Land Review 2023 (ECON002)
- Employment Land Review Focused Update 2024 (ECON003)
- Strategic Housing and Employment Land Availability Assessment (SHELAA001)
- Essex Sector Development Strategy 2022 (ECON005)

5.20 These studies have informed the amount of land allocated for employment use for the Local Plan. The Plan allocates 173,146sqm of new employment floorspace to accommodate economic growth and employment requirements. As a result, the Local Plan exceeds the recommended minimum employment space requirements over the period to 2041. The Council will monitor employment development growth alongside housing delivery through subsequent reviews of the Local Plan to ensure that new employment space broadly matches the future growth of the resident workforce in Chelmsford.

5.21 Over 50% of Chelmsford's working population both live and work in Chelmsford.

Around 20% of workers commute to London. Other popular destinations for Chelmsford residents to work are Basildon, Maldon, Brentwood and Braintree, where collectively 16% commute to work. Around 36% of Chelmsford's workforce lives outside the area with significant commuting across North Essex, with over 13,000 people commuting from Braintree, Colchester and Maldon each day to work in Chelmsford. This reflects the functional economic geography which Chelmsford shares with Braintree, Maldon and Colchester districts.

5.22 In 2022, Chelmsford City Council participated in an employment and economy workshop hosted by Basildon Borough Council as an early part of their Local Plan preparation. Strategic matters included transport for accessing jobs and challenges of relatively lower levels of employees needed for warehousing and logistics companies.

5.23 The Council is working closely with the Greater Essex Business Board and the North Essex Economic Board. The Council has also set up an Investors' and Developers' Network. The Council's Economic Strategy and Employment Land Review, alongside Essex County Council's Essex Sector Development Strategy and the Essex, Southend-on-Sea and Thurrock Local Skills Improvement Plan, provides the local evidence to support the relevant Local Plan policies.

5.24 There have been no requests for Chelmsford City Council to meet the employment needs of any neighbouring authorities.

5.25 The Council will continue to work closely with neighbouring authorities and Essex County Council, to agree requirements for employment growth. Ongoing engagement will continue through the Essex Planning Officers' Association (EPOA).

5.26 Monitoring for the delivery of employment will be undertaken by the Council through its Annual Monitoring Report. Further detail on this and the evidence base can be found in the Submission Employment Topic Paper (TP014).

STRATEGIC PLANNING ISSUE ii – FOSTERING GROWTH AND INVESTMENT AND PROVIDING NEW JOBS
Key Strategic Partners **Basildon Borough Council** **Castle Point District Council** **Essex County Council** **EPOA** **Other Strategic Partners** **Greater Essex Business Board** **North Essex Economic Board**
ACTIONS
Action: Preparation of evidence - Employment Land Review (ELR) **Partners:** All Essex LPAs and ECC. **Outcome:** Evidence document used to underpin Local Plan policy development. **Date:** Employment Land Review (2023) and Focused Update (2024) published alongside Local Plan consultation stages.

Outcomes from Strategic Working

The key outcomes from strategic working are:

- The completion of evidence base reports including an Employment Land Review, setting out a core functional economic market area, using a consistent and robust methodology.
- Ongoing strategic discussions with other LPAs through the EPOA.

Comments made on the policy approach during consultation:

- The Plan should seek to match employment growth and skills capacity to housing growth; an appropriate mix of uses should reflect market need (Essex County Council)
- Support for approach, and clarity sought on keeping jobs and housing growth balanced (Basildon Borough Council)
- Development of Thames Freeport could generate a substantial level of economic activity across a wider area (Castle Point Borough Council).

Local Plan policies:

- **Strategic Policy S6 – Housing and Employment Requirements** has been formulated to ensure that the full need for employment land is met, reflecting the most up to date assessment
- **Strategic Policy S8 – Delivering Economic Growth** sets the wider scene for economic growth including for investment, economic diversity and skills improvement. The new employment growth allocations will ensure a flexible rolling supply of employment land
- **Strategic Policy S9 – Infrastructure Requirements** sets out how the Council will continue to engage with infrastructure providers to ensure appropriate infrastructure can and will be provided and planned for.

Unresolved issues:

- There are no unresolved Duty to Co-operate issues.

iii) Delivering new and improved strategic and local infrastructure

5.27 A key consideration for the Local Plan is the additional demand on existing infrastructure as a result of new development and how this can be accommodated and/or mitigated. Infrastructure covers transport, healthcare, education, energy, utilities, emergency services and waste management.

5.28 Initial duty to co-operate activities indicated that there may be cross boundary impacts related to education provision, primary healthcare provision (GP surgeries, dentists), other emergency services and providing new or improved transport infrastructure.

The Infrastructure Delivery Plan (IDP) (INF012) was updated in 2026 and is a key evidence base document and sets out details of the infrastructure identified by the Council and other service providers as being needed to support the delivery of new development across the City up to 2041.

Other evidence base studies to support the Local Plan include:

- Planning Obligations Supplementary Planning Document 2026 (INF011)
- Local Plan Viability Note 2026 (V003)
- Strategic and Local Junction Modelling, and Transport Impact of the Local Plan (T001 to T007)

- ECC Guide to Developer Contributions 2025 (INF002)
- ECC School Organisation 10-year Plan 20204 (INF006)

5.29 From these studies, and ongoing engagement with Essex County Council, the Council has developed its requirements for infrastructure including transport and highways, flood risk management, community facilities, green and natural infrastructure, and utilities.

5.30 Strategic infrastructure requirements are outlined in Strategic Policy S9 – Infrastructure Requirements; Strategic Policy S10 - Securing Infrastructure and Impact Mitigation addresses the mechanisms; and individual site policies list the site-specific details for infrastructure provision.

5.31 The Council will continue to work closely with its partners, particularly with Essex County Council to progress the Housing Infrastructure Fund bids and transport mitigation, and with Braintree District Council on cross boundary matters of Chelmsford North East Bypass funding and proposals for provision of secondary education.

5.32 Monitoring for the delivery of infrastructure will be undertaken by the Council through its Annual Monitoring Report. Further detail on this and the evidence base can be found in the Submission Infrastructure Topic Paper (TP016).

STRATEGIC PLANNING ISSUE iii – DELIVERING NEW AND IMPROVED STRATEGIC AND LOCAL INFRASTRUCTURE
Key Strategic Partners **Essex County Council** **Essex LPAs** **Environment Agency** **Anglian Water Services** **Essex and Suffolk Water** **Other Strategic Partners** **National Highways, National Grid, UK Power Networks, Sport England, Mid Essex Hospital Services NHS Trust, Mid and South Essex Integrated Care Board, East of England Ambulance Trust, Essex Fire and Rescue Services, Essex Police, Natural England.**
ACTIONS
Action: Preparation of evidence – Strategic and Local Junction Modelling **Partners:** Essex County Council, National Highways **Outcome:** Joint commissioning between CCC and ECC for Local Plan transport modelling to inform Local Plan development. To assess current and 'do-nothing' scenarios, and Local Plan proposals. Outcomes of modelling have influenced the overall spatial strategy, and ongoing engagement has resulted in site specific requirements and mitigation – such as walking/cycling routes and road crossings, access points, bus priority measures. **Date:** Reports published at Issues and Options, Preferred Options, Pre-Submission and Additional Sites stages of Local Plan preparation (from 2021 to April 2026). Ongoing co-operation with regular meetings (at times, weekly) with ECC and National Highways to develop the Local Plan strategy.

Action: Preparation of Evidence – Infrastructure Delivery Plan (IDP)

Partners: Essex County Council, other Essex LPAs, Environment Agency, Anglian Water Services, Essex and Suffolk Water, National Highways, National Grid, UK Power Networks, Sport England, Mid Essex Hospital Services NHS Trust, Mid and South Essex Integrated Care Board, East of England Ambulance Trust, Essex Fire and Rescue Services, Essex Police.

Outcomes: Neighbouring authorities worked alongside the Council to produce a joint approach to infrastructure delivery, particularly through DtC meetings and through consultation on the IDP.
Service providers have worked alongside the Council to advise on the impact the Local Plan growth would have upon their services and facilities. As a result, the requirements for services, facilities and appropriate mitigation measures to support the Local Plan growth have been assessed and agreed with all partners.

Date: ECC – regular meetings on education and highway matters as part of wider DtC meetings, and as focused discussions.
Neighbouring Authorities and other providers engaged via online meetings and email in Autumn 2023, and Spring/Summer 2024.

Action: Funding for infrastructure

Partners: Essex County Council**.**

Outcome: CCC is working closely with ECC to secure funding for major projects included within the Local Plan, from the Housing Infrastructure Fund (HIF).

The new railway station at Beaulieu Park (opened in 2025) was largely funded through the HIF (£141 million) with £12 million from the South East Local Enterprise Partnership, and £22 million from developers. The Chelmsford North East Bypass will be delivered in stages with the first section funded by the HIF and further sections subject to developer contributions and DfT/Major Road Network funding. The Policies Map safeguards the route.

Date: Ongoing.

Action: Preparation of evidence – Water issues

Partners: Environment Agency, Anglian Water, Natural England, Essex and Suffolk Water.

Outcomes: a) Strategic Flood Risk Assessment prepared working closely with the Environment Agency, including: development of Sequential and Exception Tests for potential development sites; Flood Risk Assessment Level 1; and Level 2 to provide detailed data on flood risk for preferred sites.
b) Chelmsford Water Cycle Study prepared with partners to determine appropriate locations of development with respect to water infrastructure and the water environment. Mitigation included in Local Plan for upgrades/phasing of development at Great Leighs, otherwise no significant constraints identified for delivery of Local Plan development.

Date: a) February 2024, May 2024, October 2025; b) February 2024, October 2025

Outcomes from Strategic Working

The key outcomes from strategic working are:

- Traffic modelling has informed the Council's strategy for directing growth to the most sustainable locations where the impact on the local and strategic network can be minimised. It has also led to the emphasis on provision of sustainable transport infrastructure, non-car modes of travel, and sustainable access of future development.
- Consideration of cross boundary traffic impacts included in Local Plan.
- The IDP sets out the cost of infrastructure and how it will be delivered, giving clarity to developers on what development is required to deliver.
- Clear funding routes are set out for key strategic infrastructure projects.
- Robust evidence base developed with partners for water issues.

Comments made on the policy approach during consultation:

- Concerns over the potential impact of site SGS16a on the road network (Maldon District Council)
- Ensure that site SGS16b is adequately supported by local infrastructure (Rochford District Council)

Local Plan Policies:

- **Strategic Policy S7 – The Spatial Strategy** focuses development at well-connected locations for example in areas with a good level of existing or proposed transport infrastructure
- **Strategic Policy S9 – Infrastructure Requirements** includes requirements for contributions towards transport and highways, flood risk management, community facilities, green infrastructure and natural environment, and utilities
- **Strategic Policy S10 – Securing Infrastructure and Impact Mitigation** covers the requirements to demonstrate how infrastructure can be secured, including through Section 106 agreements and Community Infrastructure Levy
- **Site Policies –** include site specific requirements for provision of infrastructure

Unresolved issues:

- There are no unresolved Duty to Co-operate issues.

iv) Encouraging resilience in retail, leisure, commercial and cultural development

5.33 The Local Plan seeks to reinforce Chelmsford's important regional and sub-regional role as a focus for jobs, shopping, healthcare, education, leisure and recreation. The City Centre has recently seen significant expansion through the development of Bond Street comprising 27,900sqm of new retail and leisure floorspace, including John Lewis and other leading retailers.

5.34 Retail matters for the Local Plan are underpinned by the Chelmsford Retail Capacity Study 2023 (ECON001). This sets out how jobs in retail are focused in Chelmsford City Centre, South Woodham Ferrers Town Centre, and Principal Neighbourhood Centres. It also reviews the performance of the retail centres, leading to an assessment of predicted need from future growth and capacity to accommodate it. Neighbouring LPAs contributed to the evidence underpinning the Study.

5.35 The Retail Capacity Study is still considered robust, and nothing significant has changed. Impacts on the local economy remain following COVID 19 and businesses are changing the way they operate, and City Centre retail is contracting. The Study concluded that there was limited capacity for convenience goods floorspace (which

has now been completed), and no capacity for comparison goods floorspace, with no significant gaps in the provision of larger commercial facilities. Other LPAs are meeting their needs through their own Local Plan preparation.

STRATEGIC PLANNING ISSUE iv – ENCOURAGING RESILIENCE IN RETAIL, LEISURE, COMMERCIAL AND CULTURAL DEVELOPMENT
Outcomes from Strategic Working
The outcomes from strategic working are: • LPAs are meeting their needs through their own Local Plans. Local Plan Policies: • **Strategic Policy S6 – Housing and Employment Requirements** does not include provision of retail floorspace, based on the conclusions of the Chelmsford Retail Capacity Study 2023 • **Strategic Policy S17 – Future of Chelmsford City Centre** sets out a co-ordinated approach to the City Centre's future role for the economy, culture and heritage, living in the City Centre, climate and sustainability, and use of the waterways, along with site specific principles for key City Centre sites • **Policy DM5 – Designated Centres** seeks to control change of use applications to prevent the erosion of retail use, which is important for community needs and local economic vitality. Outstanding issues: • There are no outstanding Duty to Co-operate issues.

v) Protecting and enhancing the natural environment and support an increase in biodiversity and ecological networks

5.36 There are a number of Local Plans in preparation in Essex set to deliver thousands of new homes over the coming 15-20 years. These new homes have the potential to bring new visitors to the sensitive coastal area, resulting in impacts on protected sites both individually and in combination through recreational disturbance.

5.37 To provide a joint approach to this issue, a joint Essex Coast Recreational Disturbance Avoidance and Mitigation Strategy (RAMS) was adopted in May 2020.

5.38 The RAMS project assesses the mitigation measures required for European Designated Sites impacted upon by development from across Essex. It has been adopted together with an SPD by each of the participating authorities, and sets out where new development is required to make financial contributions towards implementation of the Strategy. Chelmsford City Council manages the project on behalf of all the partner authorities.

5.39 The RAMS has therefore informed the Council's policy approach to mitigation with the Spatial Principles of the Plan seeking to protect and enhance the character of valued landscapes, heritage and biodiversity. Strategic Policy S4 – Conserving and Enhancing the Natural Environment gives a commitment to securing management, mitigation and compensation measures, and Policy S9 – Infrastructure Requirements specifies the need to contribute towards the RAMS. This policy requirement is further set out in specific site policies.

5.40 The public facing tool to implement the RAMS comes in the form of a campaign called Bird Aware Essex Coast, with a website and a team of rangers who organise awareness events around the whole of the county's coastline.

5.41 The participating authorities have included the RAMS requirement in their Local Plans, and joint work with all the partners continues to enable appropriate monitoring of the Strategy.

5.42 The Council also participated in the development of the Essex Local Nature Recovery Strategy (BG007), led by Essex County Council and involving all Essex authorities to research and contribute to the development of the strategy.

Further detail on this and the evidence base can be found in the Submission Natural Environment Topic Paper (TP017).

STRATEGIC PLANNING ISSUE v – PROTECTING AND ENHANCING THE NATURAL ENVIRONMENT AND SUPPORT AN INCREASE IN BIODIVERSITY AND ECOLOGICAL NETWORKS
Key Strategic Partners **Natural England** **Essex County Council** **11 Essex LPAs**
Action: Essex Coast Recreational Disturbance Avoidance and Mitigation Strategy (RAMS) **Partners:** Natural England, Essex County Council, Basildon, Braintree, Brentwood, Castle Point, Colchester, Maldon, Rochford, Southend-on-Sea, Tendring and Thurrock Councils. **Outcomes:** Essex local authorities are working alongside Essex County Council and Natural England following a joint approach to recreational disturbance avoidance and mitigation across Essex. A joint Essex Coast Recreational Disturbance Avoidance and Mitigation Strategy (RAMS) was adopted in May 2020. **Date:** Monthly steering group meetings are on-going.
Action: Essex Local Nature Recovery Strategy **Partners:** Essex County Council (as Responsible Authority), all Essex authorities (and wider range of stakeholders such as landowners, businesses, charities) **Outcomes:** Essex Local Nature Recovery Strategy and interactive web map published, following a number of workshops and focused meetings with individual authorities (including Chelmsford). **Date:** Workshops held between June 2023 and publication in June 2025
Outcomes from Strategic Working
The outcomes from strategic working are: • Agreement to produce a joint strategy to recreational disturbance avoidance and mitigation across Essex • Inclusion in the Local Plan of the requirement for developers to have regard to the LNRS in formulating proposals

Local Plan Policies:

- **Strategic Policy S4 – Conserving and Enhancing the Natural Environment** sets the requirement for management, mitigation and compensation measures for impacts on the natural environment
- **Strategic Policy S9 – Infrastructure Requirements** includes requirements for contributions towards recreation disturbance avoidance and mitigation measures
- **Policy DM16 – Protection and Promotion of Ecology, Nature and Biodiversity** includes European Designated Sites, RAMS and LNRS requirements

Outstanding issues:

- There are no outstanding Duty to Co-operate issues.

vi) Creating well designed and attractive places, and promoting the health and social wellbeing of communities

5.43 The Local Plan is based around a commitment to secure sustainable development, reflecting the presumption in favour of sustainable development outlined in the National Planning Policy Framework.

5.44 Each stage of the Local Plan development has been subject to ongoing Sustainability Appraisal and Habitats Regulations Assessment (IIA001 to IIA013). These tested the emerging Plan against high level objectives, options for housing and employment targets, and the Vision and Spatial Principles. The outcomes have influenced the choice of location so that development proposals for new housing are focused at the most sustainable locations such as those, for example, with good transport links, and/or access to education and community facilities.

5.45 Evidence base documents guiding the Council's policy approach to well designed and healthy places include:

- Essex Parking Guidance Part 1 (Design and Good Practice) and 2 (Garden Communities/Large Scale Development) 2024 (PL016, PL017)
- Making Places Supplementary Planning Document 2021 (PL019)
- Chelmer Waterside Framework 2021 (PL020)
- A New Development Model for Essex (Walkable Neighbourhoods) 2023 (PL023)
- Historic England Advice Note: Tall Buildings (PL024)
- Sport England Active Design Guidance 2023 (HS004)
- Livewell Accreditation Guidance 2019 (HS002)
- Safer Parks Improving Access for Women and Girls Guidance 2025 (HS005)
- Chelmsford Health and Wellbeing Plan 2022 (HS007)
- Essex Net Zero documents (CC004 to CC007, CC020)

5.46 Monitoring for the delivery of design and wellbeing policies will be undertaken by the Council through its Annual Monitoring Report. Further detail on this and the evidence base can be found in the Submission Health and Wellbeing Topic Paper (TP013).

STRATEGIC PLANNING ISSUE vi – CREATING WELL DESIGNED AND ATTRACTIVE PLACES, AND PROMOTING THE HEALTH AND SOCIAL WELLBEING OF COMMUNITIES
Key Strategic Partners **Essex County Council** **Other Strategic Partners** **Sport England** **Mid and South Essex Integrated Care Board (Essex Integrated Care Board**

from 1 April 2026)

Action: Plan preparation – Design issues

Partners: Essex County Council

Outcome: The Essex Design Guide has been updated and relaunched by the EPOA and ECC. All Essex LPAs including Chelmsford City Council have been involved in its development. Theme specific and technical working groups agree updates to the new Essex Design Guide, and development continues on a rolling basis. The Essex Parking Guidance has been developed through this route, and has been included in the Council's Local Plan policy.

Date: Launched as an online resource February 2018, updated frequently.

Action: Development of model policy for Net Zero Carbon

Partners: Essex County Council

Outcome: CCC has engaged with ECC on a new model policy for all Essex LPAs to use relating to embodied carbon emissions from new development. A comprehensive evidence base has been collaboratively established between the Essex Climate Action Commission, Essex County Council and Essex LPAs. The aim of the evidence base is to provide a clearly defined, consistent planning policy approach to net zero carbon development providing certainty and clarity to the development industry and other stakeholders.

This has been translated into a new policy introduced at Preferred Options stage, included as Policy DM31 Net Zero Carbon Development (In Operation) and supporting evidence base has been included in Chelmsford's Local Plan. To date this has also been included in Uttlesford District Council's Local Plan, with the policy being found sound at Examination.

Date: Ongoing engagement since 2024.

Action: Plan preparation – Masterplans

Partners: Environment Agency, Historic England, Natural England, adjoining local planning authorities

Outcome: The Strategic Growth Sites will be expected to meet high standards of built and urban design, which will be informed by masterplans/development frameworks. CCC will work with site promoters and key partner stakeholders to develop masterplans, which site promoters will consult on, prior to reaching planning application stage. This approach has been supported by other Essex local planning authorities.

Date: Masterplan process updated in November 2025.

Outcomes from Strategic Working

Outcomes from strategic working are:

- Design policies are based on collaborative Essex-wide design guidance

- Model policy developed for embodied carbon
- Masterplans will involve key partners and stakeholders to bring sites forward.

Comments made on the policy approach during consultation:
- The wide range of functions and benefits of green and blue infrastructure for people and wildlife could be emphasised (ECC)
- Housing should be more readily adaptable to the changing requirements of occupiers (ECC)
- Larger scale developments should be subject to a Health Impact Assessment (Mid & South Essex ICB)

Local Plan Policies:
- **Strategic Policy S5 – Protecting and Enhancing Community Assets** seeks to ensure that new community facilities are provided in developments such as for education, community halls, social, sports and leisure facilities, and their role in creating safe, cohesive and sustainable communities is protected
- **Strategic Policy S9 – Infrastructure Requirements** identifies infrastructure priorities including green and blue infrastructure
- **Strategic Policy S14 – Health and Wellbeing** aims to promote active and healthier lifestyles, healthy living environments and reduced inequalities through high quality placemaking and Health Impact Assessments
- **Strategic Policy S15 – Creating Successful Places** requires development to be designed to be attractive, of high quality, accessible, inclusive and safe
- **Strategic Growth Site 6 – North East Chelmsford** sets out the requirements for this site including the Garden Community principles
- **Strategic Growth Site 16a – East Chelmsford Garden Community** sets out the requirements for this site including Garden Community principles
- **Policy DM1 – Size and Type of Housing** sets out the requirements for accessible and adaptable housing
- **Policy DM23 – High Quality and Inclusive Design** sets the overall principles for ensuring good design in new development including safe and accessible places
- **Policy DM24 – Design and Place Shaping Principles in Major Developments** includes urban design principles and includes the requirement for masterplans in major development
- **Policy DM25 – Sustainable Buildings; Policy DM26 – Design Specification for Dwellings; Policy DM27 – Parking Standards; Policy DM28 – Tall Buildings** contain further detail on specific design and place making matters to ensure high standards of design
- **Policy DM31 – Net Zero Carbon Development (In Operation)** lists policy requirements for designing new development to be net zero carbon in operation, to improve building fabric standards and energy efficiency to minimise energy demand.

Outstanding issues:
- There are no outstanding Duty to Co-operate Issues.

6. Position Statements

6.1 The Council has reported progress in its Duty to Co-operate Position Statements covering the following periods:
- August 2022 to May 2024 (DTC001)
- Update December 2024 (DTC002)
- Update November 2025 (DTC005)

6.2 In effect the November 2025 update supersedes the previous versions, and is available here: https://www.chelmsford.gov.uk/media/etkjneup/dtc005-additional-sites-duty-to-cooperate-position-statement-november-2025.pdf

6.3 The following account provides an update on activity that has taken place since November 2025.

Focused Consultation Additional Sites (Regulation 19) consultation

6.4 The Additional Sites consultation ran from November 2025 until January 2026. This programme of consultation followed (and exceeded) the requirements set out in legislation, and the commitments in the Council's adopted Statement of Community Involvement (November 2025) (DTC004).

6.5 Comments were received from seven Duty to Co-operate bodies and specific consultees including neighbouring LPAs, ECC, Historic England, the Environment Agency, National Highways, Essex Police, and the Integrated Care Board.

6.6 A summary of the main issues raised in the representations is contained within the Additional Sites Feedback Report published in March 2026, available on this page: https://www.chelmsford.gov.uk/planning-and-building-control/planning-policy-and-local-plan/local-plan-review/

6.7 Comments were mainly supportive of the Additional Sites consultation, with some minor proposed amendments on detailed site-specific requirements. However, wide support was expressed by the duty and specific bodies that CCC has maintained effective co-operation and engagement.

6.8 During this period, co-operation meetings have continued to take place including with ECC as Minerals and Waste authority, Highways authority, and on strategic matters including education, water efficiency and net zero policy, Maldon District Council on cross boundary impacts from development, National Highways on traffic modelling and strategic road programmes, and Mid and South Essex ICB on future healthcare needs.

6.9 In addition, a number of Statements of Common Ground have been agreed with duty and specific bodies, as set out at paragraph 4.12 of this statement.

7. Next Steps

7.1 The City Council will submit the Pre-Submission (Regulation 19) Local Plan (SD001) and the Focused Consultation Additional Sites (Regulation 19) Document (SD002), and all the representations received to both consultations, to the Independent Inspector prior to formal Examination anticipated to take place in 2026. Full feedback reports for both consultations have been published within a Regulation 22 Consultation Statement (SD003), as part of the Submission package.

7.2 The Submission will also include a Schedule of Proposed Modifications (SD005) for the Inspector's consideration, setting out non-material changes that the Council would like to make to the Local Plan. These address comments made to the Regulation 19 consultations, issues agreed through Statements of Common Ground and new information and updates since the close of the Regulation 19 consultations. The modifications include minor amendments to policy wording and other minor amendments to improve clarity or correct typographical errors. The Schedule of Proposed Modifications is intended to assist the Inspector and other parties in understanding the Council's position going into the examination process.

Chelmsford City Council

1. Introduction

1.1. Chelmsford City Council (CCC) is committed to co-operating with other bodies on strategic planning matters. We have a history of working together with neighbouring authorities and stakeholders on plan making and this continues today. This background of collaboration will provide a strong basis for us to continue effective joint working arrangements required to satisfy the legal duty test on our Local Plan review.

1.2. We adopted our previous Duty to Co-operate Strategy in March 2015, ahead of developing our Local Plan which was adopted in May 2020. We have a statutory duty to complete a review of the Local Plan at least every five years. The review needs to take into account changing circumstances affecting the area and any relevant changes in national policy. Our adopted Local Plan covers the period to 2036, and the review will move the Local Plan forwards to 2041. It is the ideal time to refresh our Duty to Co-operate Strategy, ahead of this review.

1.3. Legislation and national planning policy require strategic policy-making authorities to co-operate with each other, and other bodies, when preparing or supporting the preparation of policies which address strategic matters that cross administrative boundaries. This includes those policies contained in local plans (including minerals and waste plans), spatial development strategies, and marine plans.

1.4. This Strategy outlines our commitment to implementing the duty to co-operate for our Local Plan review. It explains in broad terms who we will seek to co-operate with, when we will co-operate and what co-operation mechanisms we will put in place. It provides a valuable guide to co-operation activity, and forms part of the evidence base supporting the Local Plan review.

1.5. Although the duty to co-operate is not a duty to agree, we will make every effort to seek co-operation on cross-boundary and strategic planning matters in a focused, positive and structured way. At the same time, we will continue to work constructively with nearby planning authorities on their own local plan preparation.

1.6. When the Local Plan review is finalised and reaches its Independent Examination, one of the legal tests will be whether we have complied with the duty to co-operate. Early engagement and demonstrating co-operation both with neighbours and the prescribed bodies through Statements of Common Ground are key to meeting the legal duty to co-operate.

1.7. The Government's Planning White Paper: Planning for the Future was published in 2020 setting out a series of proposals to reform the planning system in England, including a proposal to remove the duty to co-operate test.

1.8. Further consideration to any alternative approach to planning for cross boundary strategic issues has not been concluded. Until any alternative approach is announced, we will continue to use our Duty to Co-operate Strategy to ensure that strategic issues are fully considered as an important and helpful part of the plan-making process.

1.9. Comments were invited on the draft Strategy in November 2021 to ensure we are taking the correct approach to meeting the duty to co-operate. Public bodies who are subject to the duty to co-operate were invited to comment and we have used the feedback to finalise the Strategy.

2. What is the Duty to Co-operate Strategy?

2.1. This Strategy outlines how we will co-operate and engage on strategic matters when reviewing our Local Plan. Strategic matters are larger than local issues and cannot be dealt with by one local planning authority alone. For example, the provision of new housing, jobs, retail, infrastructure, and flood risk mitigation may impact on or depend on other organisations.

2.2. The Strategy sets out the co-operation and engagement arrangements which the prescribed bodies (see Appendix 1) and nearby planning authorities (see Appendix 2) can expect from us on strategic planning matters.

2.3. The Strategy aims to:

- Ensure proactive, on-going, focused and constructive co-operation on cross-boundary planning matters
- Achieve legally compliant and 'sound' Local Development Documents, and
- Facilitate effective strategic planning in the region.

2.4 We are determined to ensure that duty to co-operate activities positively influence the evolution of our Local Plan review and shape the proposals as they emerge. Whilst there is no duty to agree, we will make every effort to secure the necessary co-operation on strategic cross-boundary matters before we submit the Local Plan for Examination.

Strategic matters are defined in the Localism Act 2011 as:
(a) Sustainable development or use of land that has or would have a significant impact on at least two planning areas, including (in particular) sustainable development or use of land for or in connection with infrastructure that is strategic and has or would have a significant impact on at least two planning areas, and (b) Sustainable development or use of land in a two-tier area if the development or use - (i) is a county matter, or (ii) has or would have a significant impact on a county matter.

The Local Plan review will guide growth and development in Chelmsford City Council's administrative area for the period up to 2041. It will provide the Council's vision, objectives and Spatial Strategy. It will also contain Strategic Development Policies, Development Management Policies, Site Specific land use allocations and a Local Plan Policies Map.

This Strategy is concerned with the implementation of the Duty to Co-operate on the emerging review of the Chelmsford City Council Local Plan. It is a policy document that sits alongside the Council's Statement of Community Involvement (SCI).

3. Why do we need it?

3.1. The Localism Act creates a duty on all local authorities and prescribed bodies (defined in Regulations and guidance) to co-operate with each other to address strategic matters relevant to their areas. Specific guidance on how authorities are expected to address strategic planning matters and apply the duty to co-operate is given in the National Planning Policy Framework (NPPF) and Planning Practice Guidance (PPG). This guidance has been used to produce this Strategy.

3.2. When the Local Plan reaches its Independent Examination, one of the legal tests is whether we have complied with the duty to co-operate, as set out in the Planning and Compulsory Purchase Act 2004 (Para 33A). It is one of the first issues addressed at a local plan examination. Early engagement and demonstrating co-operation both with neighbours and Government bodies through Statements of Common Ground are key to meeting the legal duty to co-operate.

3.3. We will discuss the Local Plan review with neighbouring planning authorities and the prescribed bodies at stages which align with and inform the stages of the Local Plan review. These discussions will help to formulate the quantum and distribution of Chelmsford's future growth, which will be supported by updated evidence.

The estimated timetable for reviewing our Local Plan is set out within our emerging Local Development Scheme (LDS) and summarised below.

Local Development Scheme estimated timetable:

Issues and Options Consultation	May 2022
Preferred Options Consultation	Early 2023
Pre-Submission (Final Draft) Consultation	Early 2024
Submission of Local Plan for Examination	Summer 2024
Independent Examination	Autumn 2024
Adoption	May 2025

4. Who is the strategy for?

4.1. The Strategy is aimed at neighbouring and nearby local planning authorities, Essex County Council and a range of other prescribed bodies as defined in legislation and guidance. These are listed in Appendices 1 and 2. These prescribed bodies are required to co-operate with us on strategic cross-boundary planning matters of common concern.

The Strategy is not aimed at other Local Plan consultees such as local residents, community groups, Parish and Town Councils, landowners and developers as these are not duty to co-operate bodies. However, we will involve, engage and consult these people and organisations on our Local Plan review and when considering Planning Applications. More details are set out in our adopted Statement of Community Involvement (SCI).

5. The strategic issues

5.1. There is potential for a number of cross-boundary issues. The strategic matters that may apply to the Local Plan have been identified as follows:

- Delivering homes for all including Gypsy and Traveller accommodation
- Jobs and economy including green employment and regeneration
- Retail, leisure, and cultural development
- Sustainable transport, highways and active travel
- Climate change action and mitigation including flood risk and zero carbon
- Natural and historic environment including increased biodiversity and green/blue/wild spaces and connectivity of ecological networks
- Community infrastructure including education, health and community facilities
- Utility infrastructure including communications, waste, water and energy
- London Stansted Airport future airspace redesign.

6. Our approach to duty to co-operate

6.1. We and many other councils have a history of working together and with other bodies to address strategic planning matters of common concern. This historical background of co-operation will provide a strong foundation for implementing the duty to co-operate.

6.2. We will seek to ensure co-operation and engagement is undertaken appropriately for the Local Plan review i.e. that it is proactive, continuous, rigorous and constructive.

6.3. In some cases, discussion on strategic matters will continue through existing joint working arrangements. Key existing partnerships include:

Essex Planning Officers Association (EPOA)
County-wide group which considers Essex-wide approaches to strategic issues including working groups and commissioning of shared evidence base.

Housing Market Area
Chelmsford, Braintree, Colchester and Tendring Councils.
Collaboration on Strategic Housing Market Assessment.

Essex Coast Recreation disturbance Avoidance Mitigation Strategy (RAMS) Steering Group
Ongoing partnership of 12 Essex LAs, ECC, Essex Wildlife Trust, Natural England, and RSPB. Mitigation programme for the effects of anticipated residential development on Essex coastal habitats sites.

Essex Coastal Forum
Brings together decision makers for a wide range of coastline management activity and initiatives including Essex RAMS.

Essex Climate Action Commission
Includes a range of climate bodies, Chelmsford represented by Brentwood District Council.
Advisory group to inform ECC on county-wide action to tackle climate change

Essex Flood Partnership
Key stakeholders including all Essex Planning Authorities to contribute to a strategic overview of matters around flooding in Essex, and ensure a consistent and coordinated approach to flood risk management.

North Essex Economic Board
CCC, Colchester, Braintree, Maldon, Uttlesford, Tendring and ECC
Co-operation on strategic growth issues.

Co-operation for Sustainable Development Officer Group
Includes West Essex and Neighbouring London Boroughs
Considers plan-making, delivery, and impact of growth in the West Essex sector.

East of England Strategic Spatial Planning Officers Liaison Group
Considers the cross-boundary implications of the London Plan on areas outside the capital in the East and South East of England.

Transport East
Sub-national transport body for Essex with Norfolk, Suffolk, Southend-on-Sea and Thurrock, working on regional transport strategy with the Government.

Chelmsford and Braintree Public Transport Group
Officers from CCC, Braintree, ECC and First Bus.
Information sharing on operational and network planning for the Chelmsford to Braintree transport corridor.

Strategic Estates Forum
NHS provider and commissioning representatives, with CCC and other LAs.
Planning for new health facilities to accommodate anticipated residential development.

6.4 Other mechanisms may need to be established and any new authorities and bodies will need to be proactively engaged, in addition to the existing bodies and networks, depending on the strategic matters of common concern.

6.5 Throughout the Local Plan preparation process, we will keep the list of strategic matters and opportunities for joint working under review, which will in turn influence our engagement and co-operation activities. We are proposing the following co-operation arrangements and events:

- Joint Officer and Member meetings, committees and working groups
- Technical stakeholder meetings
- Issue or location focused workshops where appropriate
- Commissioning of joint evidence base studies and reports
- Memorandums of Understanding as a framework for co-operation
- Capturing key decisions from other authorities/bodies in Statements of Common Ground which we will maintain and update throughout the Local Plan review.

6.6 We will carry out these arrangements in addition to statutory Local Plan and planning application consultations, and general correspondence that we issue.

7. Demonstrating we have met the duty

7.1. The duty to co-operate is a legal requirement under the Localism Act 2011 and is the first thing that the Planning Inspectorate will assess before considering whether the Plan is sound. To do this, the Planning Inspectorate will require comprehensive and robust evidence to demonstrate that the duty has been met for the Chelmsford City Council Local Plan at Examination (expected in Autumn 2024, see Paragraph 3.3).

7.2. We will monitor and report on co-operation and engagement activities through position statements at each stage of consultation to include notes of meetings, decisions taken and justification for actions taken. We will report these to meetings of the Council and use them to update our annual Authority Monitoring Report.

7.3. We will collate all this evidence into a Duty to Co-operate Statement of Compliance which we will submit alongside the Local Plan. This will highlight how preferred strategic approaches and policies have resulted from effective co-operation and joint working. This will also report on how we will take the duty forward through to plan implementation and monitoring.

Duty to co-operate bodies

The following 'Duty to Co-operate' bodies are relevant to the preparation and implementation of the Chelmsford City Council Local Plan:

- Essex County Council
- Neighbouring and nearby local planning authorities including Braintree, Basildon, Uttlesford, Castle Point, Colchester, Rochford, Harlow, Southend-on-Sea, Tendring, Thurrock, Brentwood, Epping Forest, Maldon and London Boroughs adjoining Essex (see Appendix 2)
- Environment Agency
- Historic Buildings and Monuments Commission for England (Historic England)
- Natural England
- Mayor of London (Greater London Authority)
- Civil Aviation Authority
- Homes England (previously the Homes and Communities Agency)
- Primary Care Trust / Clinical Commissioning Group
- National Health Service Commissioning Board (NHS England)
- Office of Rail and Road
- Transport for London
- Integrated Transport Authority (Transport East)
- Highway Authority (Essex County Council)
- National Highways
- Marine Management Organisation

Although not subject to the requirements of the duty, regard will also be had to the activities of the following:

- South East Local Enterprise Partnership
- Local Nature Partnership

All these organisations are registered on our Local Plan Consultation Database.

Map of adjoining or nearby planning authorities

Chelmsford City Council is adjoined by seven local planning authorities. Essex County Council is the local Highway Authority and Education Authority. It is also responsible for the Minerals and Waste Local Plans with Southend-on-Sea Unitary Authority.

Chelmsford City Council

Chelmsford Local Plan

Review of the adopted Local Plan

Duty to Co-operate Position Statement

May 2024

Chelmsford Local Plan

1. Purpose of the Position Statement

This position statement provides an update on the activities undertaken by Chelmsford City Council (CCC) in respect to the Duty to Co-operate on the Review of the adopted Chelmsford Local Plan. The update focuses on activities since the publication of the Review Local Plan Issues and Options in August 2022. It also discusses future activities which will be further informed by formal consultation on the Review Local Plan Preferred Options starting on 8 May 2024.

2. Introduction

The Duty to Co-operate is set out in the 2023 NPPF (Paragraph 24). This requires Local Planning Authorities (LPAs) to co-operate with each other and other prescribed bodies on strategic planning issues that cross administrative boundaries, such as providing land for new homes, jobs and infrastructure. These have a wider impact than local issues and cannot be dealt with by one LPA alone. The Duty to Co-operate is the process by which strategic issues are planned for at a local level.

LPAs must produce evidence at a future Local Plan Examination to satisfy the Inspector that their Development Plan has met the legal test with regard to the Duty to Co-operate. It is expected that the co-operation sought has been a continuous process of engagement from initial scoping of a plan through to its preparation and implementation. The end result should be a plan that allocates land and promotes infrastructure provision to support future levels of sustainable growth and development. It is also expected that the co-operation sought has been constructive, pro-active and that the outcomes of collaborative working are embedded in the plan.

Although the Duty to Co-operate is not a duty to agree, the City Council will make every effort to seek co-operation on cross-boundary and strategic planning matters in a focused, positive and structured way. At the same time, the City Council will continue to work constructively with nearby planning authorities on their own local plan preparation.

3. What has happened so far?

Pre-Consultation

The City Council undertook a variety of Duty to Co-operate activities in advance of starting the review of the adopted Local Plan.

The Duty to Co-operate Strategy relating to the adopted Local Plan (2020) was refreshed in advance of work commencing on the review of the adopted Local Plan, to ensure we are taking the correct approach to meeting the duty. Public bodies who are subject to the Duty to Co-operate were invited to comment, and we used the feedback to finalise the Strategy.

The updated Duty to Co-operate Strategy was published in January 2022. The key strategic matters identified through the consultation are as follows:

- Delivering homes for all including Gypsy and Traveller accommodation
- Jobs and economy including green employment and regeneration
- Retail, leisure, and cultural development
- Sustainable transport, highways and active travel
- Climate change action and mitigation including flood risk and zero carbon
- Natural and historic environment including increased biodiversity and green/blue/wild spaces and connectivity of ecological networks
- Community infrastructure including education, health and community facilities
- Utility infrastructure including communications, waste, water and energy
- London Stansted Airport future airspace redesign.

Between the adoption of the Local Plan in May 2020 and the Issues and Options consultation in August 2020, the Council responded to a range of consultations from Essex LPAs, Essex County Council, and National Highways. The details, and a list of other collaborative work, is set out in the Council's Annual Monitoring Report for 2021-22.

Issues and Options

The Issues and Options consultation for the review of the Local Plan ran from August to October 2022. The consultation document reviewed and updated the key issues for the future growth and development of Chelmsford, with potential Spatial Options for addressing projected growth up to 2041.

Comments were received from 12 Duty to Co-operate bodies and specific consultees including neighbouring LPAs, Essex County Council (ECC), Historic England, Environment Agency, Mid and South Essex Integrated Care Board.

A summary of the main issues raised in the representations are contained within the Issues and Options You Said We Did Feedback Report published in May 2024, available on this page: www.chelmsford.gov.uk/lp-review. All the responses have been carefully considered and used to progress the second formal stage in the preparation of the Chelmsford Local Plan – the Preferred Options Local Plan.

Comments have informed the approach to developing the preferred Spatial Strategy and the assessment of reasonable alternatives, and have been considered in the forming of new policies relating to health and wellbeing, connectivity and travel, the future of the City Centre, and net zero carbon development. There were also minor changes to the content including updated data, and references to issues including provision for nature and ecology, access and connections, and tall buildings guidance.

Preferred Options

A programme of Duty to Co-operate activity has continued since consultation on the Issues and Options consultation. This has been used to inform the Preferred Options Local Plan. Key areas of work are discussed below:

Duty to Co-operate Meetings and Discussions

Regular meetings/discussions continue to be held with Essex County Council, other local authorities in Essex, the principal health and education providers in Chelmsford and other key partners such as Highways England.

As the current Local Plan activity is a review of the adopted Local Plan, many aspects of the Plan's content and approach are unchanged, meaning that major changes are limited. In addition, the preferred Spatial Strategy has only recently been developed to a stage where meaningful discussions can take place. However, these meetings/discussions have still been valuable in enabling issues affecting the future growth of Chelmsford to be identified at an early stage, and for officers to continue partnership working with those bodies to take forward the review of the Local Plan.

The Council also discusses strategic matters and Local Plan preparation at ongoing established strategic partnerships including the Essex Planning Officers Society (EPOA), Eastern Community Homes, and the Chelmsford and Braintree Public Transport Group.

Examples of ongoing meetings and the topics discussed is included below:

Organisation	**Topics**
ECC	Biodiversity net gain Minerals Local Plan and links to CCC LP preparation Transport Education Net zero policy
Maldon District Council	Evidence base updates Local Plan timetables Cross boundary issues such as traffic and education needs
Basildon District Council	Employment and economy workshop
Joint meeting with Brentwood and Rochford Councils	General updates on timing and evidence base Infrastructure Delivery Plan
National Grid	Ongoing engagement on East Anglia GREEN (Norwich to Tilbury) power lines proposal
National Highways	Traffic modelling for LP preparation
NHS Integrated Care System (Mid and South Essex ICS)	Updates on LP preparation

Commissioning of joint evidence base studies and reports

Due to the different timings of preparation for other LPA's Local Plans, and changes in the way that housing numbers are derived, there have been fewer opportunities to work collaboratively on joint evidence base studies.

The Levelling Up and Regeneration Act 2023 indicated that revised regulations will be published governing the preparation of Local Plans, with transitionary periods in place for LPAs that are already progressing a new or reviewed Local Plan. For Chelmsford the decision has been made to continue with preparation of the Local Plan review, with a commitment to submit the Plan for examination by the June 2025 deadline. Other LPAs in Essex have decided to continue with initial preparation stages but await the revised regulations which will govern submission after June 2025.

However, the following are key areas where recent joint working is helping to inform the review of the Local Plan:

Net zero carbon – a comprehensive evidence base has been collaboratively established between the Essex Climate Action Commission, Essex County Council and Essex LPAs. The aim of the evidence base is to provide a clearly defined, consistent planning policy approach to net zero carbon development providing much needed certainty and clarity to the development industry and other stakeholders. This has been translated into a proposed new policy for the Preferred Options Local Plan, included as DM31 Net Zero Carbon (In Operation). A detailed account of the evidence and policy development in contained within the Climate Change Topic paper prepared to accompany the Preferred Options consultation, available on this page: www.chelmsford.gov.uk/lp-review

Strategic Flood Risk Assessment – CCC has engaged with other LPAs, the Lead Local Flood Authority (LLFA) and the Environment Agency for relevant information to support the Strategic Flood Risk Assessment (SFRA) evidence update for the Preferred Options consultation.

Chelmsford Gypsy and Traveller Accommodation Assessment 2024 – the Council alongside the other Essex local authorities is undertaking an updated Gypsy and Traveller Accommodation Assessment.

Retail Capacity Study Update 2023 – CCC has engaged with neighbouring LPAs for relevant information to inform this evidence base update.

Water Cycle Study Reports 2024 – Regular consultation was undertaken throughout the preparation of the Scoping WCS and Detailed WCS reports with the Environment Agency.

Infrastructure Delivery Plan – Engagement with infrastructure providers and key stakeholders on this evidence base document including LPAs, ECC, Natural England, NHS Mid and South Essex Integrated Care Board.

Transport modelling – CCC has worked with ECC, as the local Highway and Transportation Authority to prepare the Preferred Options transport evidence base which has also been informed by discussions with National Highways.

4. What will happen next?

The Preferred Options Local Plan consultation will run from 8 May until 19 June 2024. The City Council will arrange Duty to Co-operate Officer and Member meetings for adjoining LPAs during the formal consultation period to discuss any strategic matters that may affect the preparation of Chelmsford's Local Plan and opportunities for further joint work. The Council will also respond to any requests for additional meetings or formal discussions with Duty to Co-operate bodies that may be made.

Following the consultation, the City Council will publish and analyse the comments and use them alongside other comments, national policy and the Local Plan evidence base to inform the final draft Local Plan – the Pre-Submission Local Plan. Other duty to cooperate meeting/discussions may be organised on request, if any strategic concerns or opportunities are identified or to support the preparation of the Pre-Submission Local Plan.

The Council will also continue with the preparation of joint evidence base studies and seek opportunities for other joint evidence bases where appropriate. Statements of Common Ground will be explored with key Duty to Co-operate bodies taking into account their responses to the Preferred Options consultation.

Chelmsford City Council

Chelmsford Local Plan

Review of the adopted Local Plan

Duty to Co-operate Position Statement

December 2024

Chelmsford Local Plan

1. Purpose of the Position Statement

This position statement provides an update on the activities undertaken by Chelmsford City Council (CCC) in respect to the Duty to Co-operate on the Review of the adopted Chelmsford Local Plan. The update covers activities including the Issues and Options Local Plan consultation launched in August 2022, and the Preferred Options Local Plan consultation launched in May 2024. It also discusses future activities which will be further informed by formal consultation on the Pre-Submission Local Plan consultation starting in February 2025.

2. Introduction

The Duty to Co-operate (DtC) is set out in the 2024 National Planning Policy Framework (NPPF) (from Paragraph 24). This requires Local Planning Authorities (LPAs) to co-operate with each other and other prescribed bodies on strategic planning issues that cross administrative boundaries, such as providing land for new homes, jobs and infrastructure. These have a wider impact than local issues and cannot be dealt with by one LPA alone. The Duty to Co-operate is the process by which strategic issues are planned for at a local level.

LPAs must produce evidence at a future Local Plan Examination to satisfy the Independent Inspector that their Development Plan has met the legal test with regard to the Duty to Co-operate. It is expected that the co-operation sought has been an ongoing process of engagement from initial scoping of a plan through to its preparation and implementation. The end result should be a plan that allocates land and promotes infrastructure provision to support future levels of sustainable growth and development, and which aligns with those of other strategic bodies. It is also expected that the co-operation sought has been constructive, pro-active and that the outcomes of collaborative working are embedded in the plan.

Although the Duty to Co-operate is not a duty to agree, the City Council makes every effort to seek co-operation on cross-boundary and strategic planning matters in a focused, positive and structured way. At the same time, the City Council will continue to work constructively with nearby planning authorities on their own local plan preparation.

3. What has happened so far?

Pre-Consultation

The City Council undertook a variety of Duty to Co-operate activities in advance of starting the review of the adopted Local Plan.

The Duty to Co-operate Strategy relating to the adopted Local Plan (2020) was refreshed in advance of work commencing on the review of the adopted Local Plan, to ensure we are taking the correct approach to meeting the duty. Public bodies who are subject to the Duty to Co-operate were invited to comment, and we used the feedback to finalise the Strategy.

The updated Duty to Co-operate Strategy was published in January 2022. The key strategic matters identified through the consultation are as follows:

- Delivering homes for all including Gypsy and Traveller accommodation
- Jobs and economy including green employment and regeneration
- Retail, leisure, and cultural development
- Sustainable transport, highways and active travel
- Climate change action and mitigation including flood risk and zero carbon
- Natural and historic environment including increased biodiversity and green/blue/wild spaces and connectivity of ecological networks
- Community infrastructure including education, health and community facilities
- Utility infrastructure including communications, waste, water and energy
- London Stansted Airport future airspace redesign.

Since the adoption of the Local Plan in May 2020 the Council has responded to a range of consultations from Essex LPAs, Essex County Council, and National Highways. The details, and a list of other collaborative work, is set out in the Council's Annual Monitoring Reports for 2021-22, 2022-23, and 2023-24.

Issues and Options

The Issues and Options consultation for the review of the Local Plan ran from August to October 2022. The consultation document reviewed and updated the key issues for the future growth and development of Chelmsford, with potential Spatial Options for addressing projected growth up to 2041.

Comments were received from 12 Duty to Co-operate bodies and specific consultees including neighbouring LPAs, Essex County Council (ECC), Historic England, Environment Agency, Mid and South Essex Integrated Care Board.

A summary of the main issues raised in the representations is contained within the Issues and Options You Said We Did Feedback Report published in May 2024, available on this page: www.chelmsford.gov.uk/lp-review. All the responses were carefully considered and used to progress the second formal stage in the preparation of the Chelmsford Local Plan – the Preferred Options Local Plan.

Comments informed the approach to developing the preferred Spatial Strategy and the assessment of reasonable alternatives, and were considered in the forming of new policies relating to health and wellbeing, connectivity and travel, the future of the City Centre, and net zero carbon development. There were also minor changes to the content including updated data, and references to issues including provision for nature and ecology, access and connections, and tall buildings guidance.

Preferred Options

The Preferred Options consultation for the review of the Local Plan ran from May to June 2024. The consultation document set out proposed sites where new homes, jobs and other facilities could be located to meet CCC's needs to 2041, along with

updated development management policies that we would use to decide planning applications.

Comments were received from 17 Duty to Co-operate bodies and specific consultees including neighbouring LPAs, Essex County Council (ECC), Historic England, Environment Agency, Highways England, and the Mid and South Essex Integrated Care Board.

A summary of the main issues raised in the representations is contained within the Preferred Options Feedback Report published in October 2024, available on this page: www.chelmsford.gov.uk/lp-review. All the responses have been carefully considered and used to progress the third formal stage in the preparation of the Chelmsford Local Plan – the Pre-Submission Local Plan.

Comments were mainly supportive of the key Plan elements including the Vision, Strategic Priorities, Spatial Principles, Spatial Strategy, and Development Management policies. Detailed comments have influenced amendments to the Pre-Submission Local Plan including in relation to accessible greenspace and natural habitats, addressing recreational pressure on Sites of Special Scientific Interest, water efficiency targets, and changes for consistency and clarity.

Duty to Co-operate Meetings and Discussions

Regular meetings/discussions continue to be held with Essex County Council, other local authorities in Essex, the principal health and education providers in Chelmsford and other key partners such as Highways England, as part of the ongoing programme of Duty to Co-operate activity.

As the current Local Plan activity is a review of the adopted Local Plan, many aspects of the Plan's content and approach are unchanged, meaning that major changes are limited. In addition, the preferred Spatial Strategy has only recently been developed to a stage where meaningful discussions can take place. However, these meetings/discussions have still been valuable in enabling issues affecting the future growth of Chelmsford to be identified at an early stage, and for officers to continue partnership working with those bodies to take forward the review of the Local Plan.

The Council also discusses strategic matters and Local Plan preparation at ongoing established strategic partnerships including the Essex Planning Officers Society (EPOA), Eastern Community Homes, and the Chelmsford and Braintree Public Transport Group.

Examples of ongoing meetings and the topics discussed is included below:

Organisation	Topics
ECC	Biodiversity net gain Minerals Local Plan and links to CCC Local Plan preparation Transport Education

	Net zero policy
Maldon District Council	Evidence base updates Local Plan timetables Cross boundary issues such as traffic and education needs
Basildon District Council	Employment and economy workshop
Braintree District Council	Local Plan progress Housing requirements Evidence base documents
Joint meeting with Brentwood and Rochford Councils	General updates on timing and evidence base Infrastructure Delivery Plan
Castle Point Council	Sustainable transport connectivity between South Essex and Chelmsford, and a desire to improve north-south sustainable travel connectivity
Colchester City Council	Transport matters including A12 widening and A120 improvement proposals
Thurrock Council	Local Plan progress Housing needs in relation to Green Belt Transport matters including A12 widening
National Grid	Ongoing engagement on East Anglia GREEN (Norwich to Tilbury) power lines proposal
National Highways	Traffic modelling for Local Plan preparation Strategic road programmes
NHS Integrated Care System (Mid and South Essex ICS)	Updates on Local Plan preparation Healthcare needs

Commissioning of joint evidence base studies and reports

Due to the different timings of preparation for other LPA's Local Plans, and changes in the way that housing numbers are derived, there have been fewer opportunities to work collaboratively on joint evidence base studies than during preparation of the now adopted Local Plan.

The revised NPPF published in December 2024 includes transitionary periods for LPAs to progress a new or reviewed Local Plan at an advanced stage, such as Chelmsford. It is proposed that the Pre-Submission Local Plan will be submitted for examination later in 2025 providing an opportunity for further joint evidence base work, where necessary before Submission. The response from other Essex LPAs to the transitionary arrangements is mixed, with some continuing with progress and others reviewing the revised regulations which will guide consultation and submission dates.

However, the following are key areas where recent joint working is helping to inform the review of the Local Plan:

Net zero carbon – a comprehensive evidence base has been collaboratively established between the Essex Climate Action Commission, Essex County Council and Essex LPAs. The aim of the evidence base is to provide a clearly defined, consistent planning policy approach to net zero carbon development providing much needed certainty and clarity to the development industry and other stakeholders. This has been translated into a proposed new policy introduced at Preferred Options stage, included as DM31 Net Zero Carbon (In Operation). A detailed account of the evidence and policy development was contained within the Climate Change Topic paper prepared to accompany the Preferred Options consultation, which will be updated for the Pre-Submission stage.

Strategic Flood Risk Assessment – CCC has engaged with other LPAs, the Lead Local Flood Authority (LLFA) and the Environment Agency for relevant information to support the Strategic Flood Risk Assessment (SFRA) evidence update for the plan consultations.

Chelmsford Gypsy and Traveller Accommodation Assessment 2024 – the Council alongside the other Essex local authorities undertook an updated Gypsy and Traveller Accommodation Assessment.

Retail Capacity Study Update 2023 – CCC has engaged with neighbouring LPAs for relevant information to inform this evidence base update.

Water Cycle Study Reports 2024 – Regular consultation was undertaken throughout the preparation of the Scoping WCS and Detailed WCS reports with the Environment Agency.

Infrastructure Delivery Plan Reports – Engagement with infrastructure providers and key stakeholders on these evidence base documents including LPAs, ECC, Natural England, NHS Mid and South Essex Integrated Care Board.

Transport modelling – CCC has worked with ECC, as the local Highway and Transportation Authority to prepare the transport evidence base which has also been informed by discussions with National Highways.

Parking guidance – CCC has contributed to Essex-wide consultation on updated parking guidance, which includes provision for electric charging points, and which has been translated into Local Plan policy.

4. Statements of Common Ground

Statements of Common Ground (SoCG) set out how strategic matters or issues of a common nature between a local authority and a statutory body or organisation are being addressed and progressed throughout the plan-making process to provide transparency, and wherever possible, show where parties are working towards areas of agreement.

SoCG are being prepared to record agreement between CCC and each of Chelmsford's neighbouring authorities, Essex County Council, Natural England, Historic England and the Environment Agency. Agreed SoCG will be published

alongside the Pre-Submission consultation and reviewed ahead of Submission of the plan for Independent Examination. The aim will be to resolve any outstanding matters where cross-boundary strategic matters will be addressed by email and/or DtC meetings.

5. What will happen next?

The Pre-Submission Local Plan consultation is planned to run from 4 February until 18 March 2025. The City Council will arrange Duty to Co-operate Officer and Member meetings for adjoining LPAs during the formal consultation period to discuss any strategic matters that may affect the preparation of Chelmsford's Local Plan and opportunities for further joint work. The Council will also respond to any requests for additional meetings or formal discussions with Duty to Co-operate bodies that may be made.

Following the consultation, the City Council will submit the consultation documents and all the representations received to the Independent Inspector, prior to formal Examination anticipated to take place later in 2025.

Chelmsford City Council

Chelmsford Local Plan

Review of the adopted Local Plan

Duty to Co-operate Position Statement

November 2025

Chelmsford Local Plan

1. Purpose of the Position Statement

This position statement provides an update on the activities undertaken by Chelmsford City Council (CCC) in respect to the Duty to Co-operate on the Review of the adopted Chelmsford Local Plan. The update covers activities including the:

- Issues and Options Local Plan consultation launched in August 2022
- Preferred Options Local Plan consultation launched in May 2024
- Pre-Submission Local Plan consultation launched in February 2025.

It also discusses future activities which will be further informed by formal consultation on the Focused Consultation Additional Sites (Regulation 19) Document starting in November 2025.

2. Introduction

The Duty to Co-operate (DtC) is set out in the 2024 National Planning Policy Framework (NPPF) (from Paragraph 24). This requires Local Planning Authorities (LPAs) to co-operate with each other and other prescribed bodies on strategic planning issues that cross administrative boundaries, such as providing land for new homes, jobs and infrastructure. These have a wider impact than local issues and cannot be dealt with by one LPA alone. The Duty to Co-operate is the process by which strategic issues are planned for at a local level.

LPAs must produce evidence at a future Local Plan Examination to satisfy the Independent Inspector that their Development Plan has met the legal test with regard to the Duty to Co-operate. It is expected that the co-operation sought has been an ongoing process of engagement from initial scoping of a plan through to its preparation and implementation. The end result should be a plan that allocates land and promotes infrastructure provision to support future levels of sustainable growth and development, and which aligns with those of other strategic bodies. It is also expected that the co-operation sought has been constructive, pro-active and that the outcomes of collaborative working are embedded in the plan.

Although the Duty to Co-operate is not a duty to agree, the City Council makes every effort to seek co-operation on cross-boundary and strategic planning matters in a focused, positive and structured way. At the same time, the City Council will continue to work constructively with nearby planning authorities on their own local plan preparation.

3. What has happened so far?

Pre-Consultation

The City Council undertook a variety of Duty to Co-operate activities in advance of starting the review of the adopted Local Plan.

The Duty to Co-operate Strategy relating to the adopted Local Plan (2020) was refreshed in advance of work commencing on the review of the adopted Local Plan,

to ensure we are taking the correct approach to meeting the duty. Public bodies who are subject to the Duty to Co-operate were invited to comment, and we used the feedback to finalise the Strategy.

This revised Duty to Co-operate Strategy was published in January 2022, to accompany the review of the Local Plan. The key strategic matters identified through the consultation are as follows:

- Delivering homes for all including Gypsy and Traveller accommodation
- Jobs and economy including green employment and regeneration
- Retail, leisure, and cultural development
- Sustainable transport, highways and active travel
- Climate change action and mitigation including flood risk and zero carbon
- Natural and historic environment including increased biodiversity and green/blue/wild spaces and connectivity of ecological networks
- Community infrastructure including education, health and community facilities
- Utility infrastructure including communications, waste, water and energy
- London Stansted Airport future airspace redesign.

Since the adoption of the Local Plan in May 2020 the Council has responded to a range of consultations from Essex LPAs, Essex County Council, and National Highways. The details, and a list of other collaborative work, is set out in the Council's Annual Monitoring Reports for 2021-22, 2022-23, and 2023-24.

Issues and Options

The Issues and Options consultation for the review of the Local Plan ran from August to October 2022. The consultation document reviewed and updated the key issues for the future growth and development of Chelmsford, with potential Spatial Options for addressing projected growth up to 2041.

Comments were received from 12 Duty to Co-operate bodies and specific consultees including neighbouring LPAs, Essex County Council (ECC), Historic England, Environment Agency, Mid and South Essex Integrated Care Board.

A summary of the main issues raised in the representations is contained within the Issues and Options You Said We Did Feedback Report published in May 2024, available on this page: www.chelmsford.gov.uk/lp-review. All the responses were carefully considered and used to progress the second formal stage in the preparation of the Chelmsford Local Plan – the Preferred Options Local Plan.

Comments informed the approach to developing the preferred Spatial Strategy and the assessment of reasonable alternatives, and were considered in the forming of new policies relating to health and wellbeing, connectivity and travel, the future of the City Centre, and net zero carbon development. There were also minor changes to the content including updated data, and references to issues including provision for nature and ecology, access and connections, and tall buildings guidance.

Preferred Options

The Preferred Options consultation for the review of the Local Plan ran from May to June 2024. The consultation document set out proposed sites where new homes, jobs and other facilities could be located to meet CCC's needs to 2041, along with updated development management policies that we would use to decide planning applications.

Comments were received from 17 Duty to Co-operate bodies and specific consultees including neighbouring LPAs, Essex County Council (ECC), Historic England, Environment Agency, Highways England, and the Mid and South Essex Integrated Care Board.

A summary of the main issues raised in the representations is contained within the Preferred Options You Said We Did Feedback Report published in October 2024, available on this page: www.chelmsford.gov.uk/lp-review. All the responses have been carefully considered and used to progress the third formal stage in the preparation of the Chelmsford Local Plan – the Pre-Submission Local Plan.

Comments were mainly supportive of the key Local Plan elements including the Vision, Strategic Priorities, Spatial Principles, Spatial Strategy, and Development Management policies. Detailed comments have influenced amendments to the Pre-Submission Local Plan including in relation to accessible greenspace and natural habitats, addressing recreational pressure on Sites of Special Scientific Interest, water efficiency targets, and changes for consistency and clarity.

Pre-Submission

The Pre-Submission consultation for the review of the Local Plan ran from February to March 2025. The Pre-Submission Local Plan was the third formal stage in the preparation of the review of the adopted Chelmsford Local Plan. It refined the proposals for the provision of new housing, jobs and schools as well as areas for protection, and policies to help determine planning applications, taking previous comments into account.

Comments were received from 33 Duty to Co-operate bodies and specific consultees including neighbouring LPAs, Essex County Council, Historic England, Environment Agency, Highways England, Essex Wildlife Trust, Essex Police, and neighbouring parish councils.

A summary of the main issues raised in the representations is contained within the Pre-Submission Feedback report published in July 2025, available on this page: www.chelmsford.gov.uk/lp-review

Comments were mainly supportive of the key Plan elements including the Vision, Strategic Priorities, Spatial Principles, Spatial Strategy, and Development Management policies, and for the changes made following the previous round of consultation. At this stage, changes being considered as a response to the comments received are not incorporated into a further version of the draft plan. Instead, a schedule of proposed changes will be submitted to the Independent

Inspector in advance of the formal Examination anticipated to take place in 2026, as part of part of the consideration of the soundness of the plan.

Duty to Co-operate Meetings and Discussions

Regular meetings/discussions continue to be held with Essex County Council, other local authorities in Essex, the principal health and education providers in Chelmsford and other key partners such as Highways England, as part of the ongoing programme of Duty to Co-operate activity.

As the current Local Plan activity is a review of the adopted Local Plan, many aspects of the Plan's content and approach are unchanged, meaning that major changes are limited. The preferred Spatial Strategy has now been developed to a stage where meaningful discussions can take place, including on the additional sites proposed, as set out in Section 5 of this Position Statement. These meetings/discussions have been valuable in enabling issues affecting the future growth of Chelmsford to be identified at an early stage, and for officers to continue partnership working with those bodies to take forward the review of the Local Plan.

The Council also discusses strategic matters and Local Plan preparation at ongoing established strategic partnerships including the Essex Planning Officers Association (EPOA), Eastern Community Homes, and the Chelmsford and Braintree Public Transport Group.

Examples of ongoing meetings and the topics discussed is included below:

Organisation	**Topics**
ECC	Biodiversity net gain Minerals Local Plan and links to CCC Local Plan preparation Transport Education Net zero policy Water efficiency
Essex Planning Officers Association	Gypsy & Traveller provision Biodiversity net gain Local Nature Recovery Strategy Health and wellbeing Response to national policy updates
Chelmsford and Braintree Public Transport Group	Bus routes, network improvements and ticketing Access for people with disabilities
Maldon District Council	Evidence base updates Local Plan timetables Cross boundary issues such as traffic and education needs Options for growth in Maldon District
Basildon District Council	Employment and economy workshop Meeting housing and Gypsy & Traveller needs
Braintree District Council	Local Plan progress Housing requirements

	Evidence base documents A12 Chelmsford to A120 Marks Tey widening scheme DCO
Joint meeting with Brentwood and Rochford Councils	General updates on timing and evidence base Infrastructure Delivery Plan
Castle Point Council	Sustainable transport connectivity between South Essex and Chelmsford, and a desire to improve north-south sustainable travel connectivity Castle Point Regulation 19 consultation
Colchester City Council	Transport matters including A12 Chelmsford to A120 Marks Tey widening scheme DCO; and A120 improvement proposals
Thurrock Council	Local Plan progress Housing needs in relation to Green Belt Transport matters including A12 widening
National Grid	Ongoing engagement on East Anglia GREEN (Norwich to Tilbury) power lines proposal
National Highways	Traffic modelling for Local Plan preparation Strategic road programmes Statement of Common Ground
NHS Integrated Care System (Mid and South Essex ICS)	Updates on Local Plan preparation Healthcare needs

Commissioning of joint evidence base studies and reports

Due to the different timings of preparation for other LPA's Local Plans, and changes in the way that housing numbers are derived, there have been fewer opportunities to work collaboratively on joint evidence base studies than during preparation of the now adopted Local Plan.

The revised NPPF published in December 2024 includes transitionary periods for LPAs to progress a new or reviewed Local Plan at an advanced stage, such as Chelmsford. It is proposed that the Pre-Submission Local Plan will be submitted for examination in early 2026 providing an opportunity for further joint evidence base work, where necessary, before Submission. The response from other Essex LPAs to the transitional arrangements is mixed, with some continuing with progress and others reviewing the revised regulations which will guide consultation and submission dates.

However, the following are key areas where recent joint working is helping to inform the review of the Local Plan:

Net zero carbon – a comprehensive evidence base has been collaboratively established between the Essex Climate Action Commission, Essex County Council and Essex LPAs. The aim of the evidence base is to provide a clearly defined, consistent planning policy approach to net zero carbon development providing much needed certainty and clarity to the development industry and other stakeholders.

This has been translated into a proposed new policy introduced at Preferred Options stage, included as DM31 Net Zero Carbon (In Operation). A detailed account of the evidence and policy development was contained within the Climate Change Topic paper prepared to accompany the Pre-Submission consultation, which will be updated for the Submission stage.

Strategic Flood Risk Assessment 2024 and updates 2025 – CCC has engaged with other LPAs, the Lead Local Flood Authority (LLFA) and the Environment Agency for relevant information to support the Strategic Flood Risk Assessment (SFRA) evidence update for the plan consultations.

Chelmsford Gypsy and Traveller Accommodation Assessment 2024 – the Council alongside the other Essex local authorities undertook an updated Gypsy and Traveller Accommodation Assessment.

Retail Capacity Study Update 2023 – CCC has engaged with neighbouring LPAs for relevant information to inform this evidence base update.

Water Cycle Study Reports 2024 and updates 2025 – Regular consultation was undertaken throughout the preparation of the Scoping WCS and Detailed WCS reports with the Environment Agency.

Infrastructure Delivery Plan Reports – Engagement with infrastructure providers and key stakeholders on these evidence base documents including LPAs, ECC, Natural England, NHS Mid and South Essex Integrated Care Board.

Transport modelling 2024 and updates 2025 – CCC has worked with ECC, as the local Highway and Transportation Authority, to prepare the transport evidence base which has also been informed by discussions with National Highways.

Parking guidance 2024 – CCC has contributed to Essex-wide consultation on updated parking guidance, which includes provision for electric charging points, and which has been translated into Local Plan policy.

4. Statements of Common Ground

Statements of Common Ground (SoCG) set out how strategic matters or issues of a common nature between a local authority and a statutory body or organisation are being addressed and progressed throughout the plan-making process to provide transparency, and wherever possible, show where parties are working towards areas of agreement.

SoCG are being prepared to record agreement between CCC and each of Chelmsford's neighbouring authorities, Essex County Council, Natural England, Historic England and the Environment Agency. Agreed SoCG were published alongside the Pre-Submission consultation and will be further reviewed ahead of Submission of the plan for Independent Examination. The aim will be to resolve any outstanding matters where cross-boundary strategic matters will be addressed by email and/or DtC meetings.

5. What will happen next?

Consultation on the Pre-Submission (Regulation 19) Local Plan in Spring 2025 was expected to be the third and final public consultation on the draft Local Plan before submission for examination. However, it has emerged that we need to add more land for homes and employment use into the plan to meet future needs. This is because some sites in the adopted Local Plan have not come forward and some sites will not be built as quickly as expected. When combined with the large increase in the Government's calculation of housing need in Chelmsford, this means we do not have enough allocated housing sites to meet these needs, especially for the first five years of the plan.

We have selected additional sites following detailed testing of site constraints and opportunities in relation to matters like flood risk, heritage, traffic and archaeology. The sites are located in settlements which are accessible to the local highway network and services and facilities such as schools and local shops.

We will consult on this focused Additional Sites Document for seven weeks from November 2025 to January 2026. This consultation is also a Regulation 19 consultation.

The City Council will arrange Duty to Co-operate Officer and Member meetings for adjoining LPAs during the formal consultation period to discuss any strategic matters that may affect the preparation of Chelmsford's Local Plan and opportunities for further joint work. The Council will also respond to any requests that may be made for additional meetings or formal discussions with Duty to Co-operate bodies.

Following the consultation, the City Council will submit the Pre-Submission (Regulation 19) Local Plan and the Focused Consultation Additional Sites (Regulation 19) Document, and all the representations received to both consultations, to the Independent Inspector prior to formal Examination anticipated to take place in 2026. Full feedback reports for both consultations will be published within a Regulation 22 Consultation Statement, and SOCGs added or updated, as part of the Submission package.

ESSEX PLANNING
EPOA
OFFICERS' ASSOCIATION

Guidance Note

Mechanism for the Consideration of Unmet Housing Need

This Guidance Note was approved by the Essex Planning Officers' Association at its meeting on 7 September 2017.

Essex Planning Officers' Association (EPOA)

Mechanism for the Consideration of Unmet Housing Need – September 2017

1 Introduction

1.1 At a Duty to Co-operate meeting for Chelmsford's Local Plan in May 2017, it was identified by participants that there was a need for a high-level process or mechanism to be agreed to guide how potential unmet housing needs are considered by all Essex authorities. Other requests by individual local authorities to potentially accommodate their `unmet' housing need have been made in responding to recent Local Plan consultations. It was considered important to address this matter, as the lack of such a mechanism was identified as key issue by the Inspector at the Castle Point Local Plan Examination.

1.2 The EPOA Policy Forum discussed the matter at its meeting on 6 June and a Task Finish Group with membership from each of the Essex HMAs was established.

Housing Market Areas in Essex

1. West Essex - Epping Forest, Harlow and Uttlesford (+East Hertfordshire)
2. South Essex - Basildon, Castle Point, Rochford, Southend-on-Sea and Thurrock
3. North and Central Essex - Braintree, Chelmsford, Colchester and Tendring
4. Maldon
5. Brentwood

2 Policy Context

2.1 ***Housing Need*** - Paragraphs 47 and 159 of the NPPF states the full, objectively assessed needs for market and affordable housing are assessed for the housing market area (FOAHN). Jointly prepared Strategic Housing Market Assessments (SHMAs) identify the 'policy off' demographic derived need, making further adjustments for employment projections, affordability, the needs of specific groups in the community and wider market signals.

2.2 ***Housing Supply*** – Paragraph 159 of the NPPF identified the need to prepare a Strategic Housing Land Availability Assessment which identifies the potential supply of housing sites.

3 Process

3.1 To have a clear understanding of the housing needs in their HMA, local planning authorities, in partnership with neighbouring authorities and HMAs, should:

1) Agree their full objectively assessed housing number

2) Irrespective of policy constraints, assess whether there are sufficient available and achievable housing sites to deliver the identified housing need

3) Agree a consistent approach and methodology for assessing policy constraints across the HMA

4) If there is an unmet housing requirement – reassess SHLAA, potentially re-distribute within HMA and then consider request to adjoining HMA.

3.2 Consideration will be given to the use of third parties such as the Planning Advisory Service (PAS) or Planning Officers Society (POS) in the case of disputes over this process.

21 May 2026

Chelmsford Local Plan – Draft Planning Obligations Supplementary Planning Document

---

Report by:
Cabinet Member for Planning and Place-Shaping

Officer Contact:
Liz Harris-Best, Strategic Planning Manager (Housing Policy) – liz.harris-best@chelmsford.gov.uk 01245 606378

Purpose
The purpose of this report is to present the Draft Planning Obligations Supplementary Planning Document (SPD) and to seek approval to adopt and publish the document before the 30 June 2026.

Options
1. Approve the Draft Planning Obligations SPD for adoption and publication.

2. Approve the Draft Planning Obligations SPD with amendments for adoption and publication

3. Not approve the Draft Planning Obligations SPD for adoption and publication.

Preferred option and reasons
Cabinet approve the adoption of the Draft Planning Obligations SPD as set out in Appendix 3 to assist with the implementation of policies in the proposed new Local Pla, and meet the Government deadline of the 30 June 2026

Recommendations

1. Cabinet approve the Planning Obligations SPD, as set out in Appendix 3, for publication before the 30 June 2026.

2. To give delegated authority to the Assistant Director – Planning and Place Making in consultation with the Cabinet Member for Planning and Place Making to make any necessary minor amendments to the Draft Planning Obligations SPD before adoption

1. Background or Introduction

1.1. The Planning Obligations SPD is an important tool in supporting delivery of the Local Plan and, in combination with the Council's Community Infrastructure Levy Charging Schedule, sets out the scope and scale of planning obligations applicable to different scales and types of development. It refers to the latest published Infrastructure Delivery Plan (IDP), which sets out what infrastructure is required to support the Local Plan, how it will be provided, who is to provide it and when.

1.2. The Planning Obligations SPD, which was published for consultation between 4 February and 18 March 2025 alongside the Pre-Submission (Regulation 19) Local Plan. Comments on the Draft Planning Obligations SPD were received from a range of external and internal consultees. All comments were reviewed and proposed modifications to the Consultation Draft Planning Obligations SPD were considered by Chelmsford Policy Board on the 15 January 2026. The Director of Sustainable Communities, in consultation with the Cabinet Member for a Greener Chelmsford, were given delegated authority to make any necessary amendments and updates to the document before publication as an evidence base document to support the review of the Local Plan.

1.3. The Planning Obligations Supplementary Planning Document supports the implementation of the Pre-Submission (Regulation 19) Local Plan and Focused Consultation Additional Sites (Regulation 19) Documents, which will be submitted under transitional arrangements in June 2026.

1.4. Ordinarily a revised SPD that supports a new Local Plan would be adopted after the new Local Plan. However, SPDs do not feature in the new style local plans and cease to have effect when the development plan documents to which the SPD relates no longer has effect as part of the development plan for the authority's area.

1.5. Schedule 1 of The Levelling-up and Regeneration Act 2023 (Commencement No. 11 and Saving and Transitional Provisions) Regulations 2026, which came

into force on the 25 March 2026, sets out that new SPDs must be adopted no later than 30 June 2026.

2. Further modifications to the SPD

2.1. Since the modifications to the draft Planning Obligations SPD were approved by Chelmsford Policy Board in January 2026, the Council has published a revised Stage 3 Infrastructure Delivery Plan (March 2026) and a Local Plan Viability Update (April 2026). Together with some typographical corrections and clarifications, the draft Planning Obligations SPD has been further amended to reflect these two updated evidence base documents.

2.2. A summary of further proposed changes to the document since its publication as an evidence base document, and the reasons for them, are set out in Appendix 1 of this report with track changes to the Draft Planning Obligations SPD shown in Appendix 2.

2.3. A clean modified version of the Draft Planning Obligations SPD proposed for adoption and publication is shown in Appendix 3.

3. Conclusion

3.1. Further minor amendments to the Draft Planning Obligations SPD have been made to align with updated evidence base documents and correct typographical errors or provide greater clarity.

3.2. To ensure guidance on the implementation of the new Local Plan continues in the form of a Planning Obligations SPD, it needs to be adopted before the 30 June 2026.

List of appendices:

Appendix 1: Summary of changes made to the evidence base version of the Draft Planning Obligations SPD

Appendix 2: Track change version of the Draft Planning Obligations SPD

Appendix 3: Clean version of the Draft Planning Obligations SPD proposed for adoption/publication

The Levelling-up and Regeneration Act 2023 (Commencement No. 11 and Saving and Transitional Provisions) Regulations 2026

Corporate Implications

Legal/Constitutional:

There is a need to ensure the Review of the Local Plan accords with the latest legislative requirements. There is a need to publicly consult on Supplementary Planning Documents. There are statutory Community Infrastructure Regulations that apply.

Financial:

Negotiated section 106 planning obligations, together with the Community Infrastructure Levy, make up the system of developer contributions used to secure funding towards mitigating the social and environmental effects of development. The value of section 106 contributions varies depending on the type of contribution.

Potential impact on climate change and the environment:

The review of the adopted Local Plan including the Draft Planning Obligations SPD will seek to ensure new development within the administration area will contribute towards meeting the Council's Climate Change agenda.

Contribution toward achieving a net zero carbon position by 2030:

The review of the adopted Local Plan including the Draft Planning Obligations SPD will seek to ensure new development within the administration area will contribute towards achieving a net zero carbon position by 2030

Personnel:

There are no personnel issues arising directly from this report

Risk Management:

There are several risk considerations associated with local plan production. These are set out in the report and in the Local Development Scheme 2025 with contingency measures.

Equality and Diversity:

The Public Sector Equality Duty applies to the council when it makes decisions. An Equalities and Diversity Impact Assessment forms part of the Integrated Impact Assessment for the review of the Local Plan and concludes that it will not have a disproportionate adverse impact on any people with a particular characteristic and in general will have

positive or neutral impacts across a wide range of people and will be compatible with the duties of the Equality Act 2010.

Health and Safety:

There are no Health & Safety issues arising directly from this report.

Digital:

There are no digital issues arising directly from this report.

Other:

The Review of the Local Plan will seek to contribute to priorities in the Council's Our Chelmsford, Our Plan 2020: A Fairer and Inclusive Chelmsford, A Safer and Greener Place, Healthy, Enjoyable and Active Lives and A Better Connected Chelmsford.

Statement of Community Involvement (2020)

Health and Wellbeing Plan (2019)

Public Open Spaces Policy (2022)

Climate and Ecological Emergency Action Plan (2020)

Housing Strategy 2022-27 (2022)

Homelessness and Rough Sleeping Strategy 2020-24 (2020)

Plan for Improving Rivers and Waterways (2022)

Chelmsford Green Infrastructure Strategic Plan 2018-2036

Essex Coast Recreational Disturbance Avoidance and Mitigation Strategy 2018-2038

Climate and Ecological Emergency Action Plan (2020)

Appendix 1:

Section	Amendment	Reason for Amendment
Section 5 Paragraphs 5.32 – Table 6	Further clarification on the calculation of additionality and how this will be applied to any shortfalls in three- and four-bedroom dwellings in the circumstances described in paragraph 5.32.	Officer clarification and request for further explanation in the worked example
Section 5 Paragraphs 5.42 – 5.43	Clarification regarding the provision of wheelchair accommodation in flats and the occupancy requirements of 2 bedroom plus wheelchair accessible accommodation.	Officer clarification and further details on communal accommodation from Housing Services
Section 5 Paragraph 5.49	Update to the table of price assumptions by type of development.	To align with the latest Local Plan Viability Update
Section 5 Table 9	Update to the values used in the example	To align with the latest Local Plan Viability Update
Section 5 Paragraph 5.63	Amendment to the percentage of shared ownership housing required	Typographical error
Section 10 Paragraph 10.3	Removal of the reference to SEND	To align with the latest IDP and new Local Plan
Section 11 Paragraphs 11.9, 11.13, 11.14, 11.16, 11.20, 11.22 and 11.23	Clarification regarding s106 contributions to be sought on a growth area basis for primary care. Ambulance, police and fire and rescue services now identified as s106 contributions or CIL spends depending on the advancement of projects/proposals.	To align with the latest IDP
Section 12 Paragraph 12.7	Flexibility for a new cemetery to be secured through S106 contributions or CIL as proposals advance.	To align with the latest IDP
Section 14 Paragraph 14.8 and 14.11	Flexibility for a new waste management facility and depot to be secured through S106 contributions or CIL as proposals advance.	Typographical error and to align with the latest IDP
Section 16 Paragraph 16.22 and Table 15	Clarification on the calculation and application of indices to financial contributions	Officer clarification and consistency

1- Introduction

Purpose of this Document

1.1 This consultation Planning Obligations Supplementary Planning Document (SPD) sets out the City Council's approach towards seeking planning obligations which are needed to make development proposals acceptable in planning terms. It will replace the Planning Obligations SPD published in January 2021.

1.2 This SPD identifies topic areas where planning obligations may be applicable depending on the scale of development and sets out the required obligations or contributions.

1.3 It should be noted that not all the obligation types within this SPD will apply to all types of development. This SPD has been produced to apply to varying scales of development, but proposals will be assessed on a site-by-site basis with the individual circumstances of each site being taken into consideration.

1.4 The combination of this SPD and the Council's Community Infrastructure Levy (CIL) Charging Schedule set out a clear position to developers, landowners and stakeholders, of the scope and scale of planning obligations applicable to different scales and types of development.

1.5 The implementation guidance provided in this document supplements the requirements set out in the Local Plan.

How have we got to this point?

1.6 This draft of the SPD was published for six weeks public consultation in February 2025 alongside the Pre-Submission Local Plan documents. It will be submitted as an evidence base document supporting the Independent Examination of the Local Plan.

1.7 The SPD has been revised to reflect changes to national planning policy guidance, proposed modifications to the Local Plan following a review that commenced in 2022, and new local strategies and policy guidance. Any references to Local Plan policies relate to the Pre-Submission (Regulation 19) Local Plan and Focused Consultation Additional Sites (Regulation 19) Document.

2- Policy Background

National Planning Policy Overview

2.1 The statutory framework for planning obligations is set out in Section 106 of the Town and Country Planning Act 1990, as amended. Regulations 122 and 123 of the Community Infrastructure Levy (CIL) Regulations 2010 (as amended) and paragraphs 56 to 59 of the National Planning Policy Framework (NPPF) December 2024, set out the Government's policy on planning obligations.

The National Planning Policy Framework (NPPF)

2.2 The NPPF advises that planning authorities should consider the use of planning obligations where they could make an otherwise unacceptable development acceptable. They should only be used where it is not possible to address unacceptable impacts through planning conditions.

2.3 Community Infrastructure Levy Regulation 122 (2) sets out what a planning obligation can constitute and paragraph 58 of the NPPF re-iterates that planning obligations should only be sought where they meet all the following tests:

- they are necessary to make a development acceptable in planning terms;
- they are directly related to a development;
- they are fairly and reasonably related in scale and kind to a development.

2.4 National Planning Practice Guidance (PPG) offers a web-based resource to support the NPPF.

The Community Infrastructure Levy (CIL)

2.5 The CIL is a charge which local authorities can place on developers to help fund infrastructure needed to support new development in their areas. Unlike Section 106 Planning Obligations, CIL receipts are not earmarked for particular infrastructure. Instead, CIL monies are pooled into one fund, which can be used for any infrastructure needed to support new development across the Council's administrative area. An infrastructure item can be funded using both Section 106 Planning Obligations and CIL receipts where necessary or required.

Chelmsford City Council Community Infrastructure Levy (CIL)

2.6 The City Council approved its CIL Charging Schedule on 26 February 2014 with an effective date of 1 June 2014. The Charging Schedule sets out a levy of £125 per sq.m for residential development, and £87 and £150 per sq.m for retail development, and a zero rating for all other types of development. The rate of CIL has increased each year since it was approved in line with an index of inflation.

Infrastructure Delivery Plan

2.7 The Chelmsford Infrastructure Delivery Plan (IDP) has been undertaken by independent consultants to inform Chelmsford's Local Plan and will be updated annually by the Council. The Chelmsford IDP shows what infrastructure is required and how it will be provided; who is to provide the infrastructure; and when the infrastructure could be provided. Due to the scale of the Garden Communities Development, they will have standalone IDPs developed in partnership with the land promoters. Any reference to an IDP in this document incorporates the Garden Community IDP's and the Chelmsford IDP for all other allocated development sites.

2.8 The infrastructure needed to support the Local Plan is split into three funding categories:

- Direct developer funding such as Section 106 agreements (or Section 278 agreements for highway matters) with developers for infrastructure investments necessary to make development acceptable on individual sites, or which are necessary on a cumulative basis because of development arising on a combination of sites.

- CIL paid by developers based upon the floorspace of their development for infrastructure of a more general and/or lower-scale nature, which is not directly linked to growth or for which a need already exists.

- External funding sources such as from Government through national programmes (e.g. Housing Infrastructure Fund) or funding delivered by Essex County Council for infrastructure of a higher scale or more strategic nature, too extensive to be solely funded through new development.

2.9 The IDP is a living document, where assessment of costs, funding, delivery, indexation and phasing will continue to be updated in conjunction with further work being undertaken with site promoters, ECC and funding partners to ensure the best and most up to date information is available.

2.10 The funding categories of items of infrastructure required to support the Local Plan are set out in the latest published IDP.

Chelmsford City Council Local Plan

2.11 Development proposals should be considered in line with the City Council's Local Plan. Proposals which require planning obligations should be considered in accordance with the relevant policies. This SPD supports and supplements the Local Plan and is an important material planning consideration in the decision-making process.

2.12 The overarching reasoning and justification for requiring planning obligations are set out in the Strategic Policies that underpin and guide the Council's Spatial Strategy in the Local Plan.

2.13 The site policies are within three Growth Areas, with a policy for each site allocation. These policies set out the amount and type of development provided within each site allocation. They also set out what specific supporting infrastructure and other requirements are needed for each site.

2.14 Other policies within the Local Plan provide specific and detailed justification for various types of planning obligations e.g. Policy DM2 - Affordable Housing and Exception Sites, such policies are referred to in the relevant sections of this SPD.

Corporate Objectives

2.15 'Our Chelmsford, Our Plan, is a strategy for creating a fairer, greener and more connected community so we can shape Chelmsford as a leading place in the East of England. The provision of planning obligations, through this SPD, seeks to address the priorities of Our Chelmsford, Our Plan' by:

A fairer and more inclusive place	Promoting sustainable and environmentally responsible growth to stimulate a vibrant, balanced economy, a fairer society and provide more homes of all types.
A greener and safer place	Creating a distinctive sense of place, making the area more attractive, promoting its green credentials, and ensuring that people and communities are safe.
A more connected place	Bringing people together and working in partnership to encourage healthy, active lives, building stronger, more resilient communities so that people feel proud to live, work and study in the area.

2.16 The Plan can be downloaded here:

https://www.chelmsford.gov.uk/your-council/our-chelmsford-our-plan/

3- Obligation Types

3.1 The following sections of this document set out the obligation types which may be required as part of any Section 106 Agreement. Each section sets out the policy background to requiring such obligations, when the obligation is expected to be provided, any exceptions and any other relevant information.

3.2 The Council is required to publish an Infrastructure Funding Statement each year setting out the infrastructure projects or types of infrastructure that the authority intends to fund, either wholly or partly, by the levy or planning obligations. Infrastructure Funding Statements also report on CIL and planning obligations revenue received, allocated and spent; as well as reporting on progress of works that have received funding. Essex County Council (ECC) is also required to publish an annual Infrastructure Funding Statement, primarily with regards education; highways and transportation; Public Rights of Way; libraries and monitoring.

3.3 ECC's Developer's Guide to Infrastructure Contributions (Revised 2024) provides details of the impacts that development may have on ECC services and infrastructure, and guidance to developers regarding how Section 106 agreements and CIL may be used to secure works, finance and/or land to mitigate these impacts. A copy of the Guide can be found here:

Planning advice and guidance: Guidance for developers | Essex County Council

3.4 Planning obligations should be clearly identified as early as possible in the planning process. This includes the Masterplan process, the pre- application process which is encouraged for all forms/scales of development and planning performance agreements to ensure all parties are clear what is required of them at each stage of the planning application process.

3.5 Due to the scale and complexity of delivering the infrastructure required for the Chelmsford Garden Community (Location 6) and East Chelmsford Garden Community (Location 16), bespoke infrastructure delivery mechanisms may be appropriate and will be considered through the garden community governance structures and consulted upon separately.

4- Housing

Policy Background

4.1 The NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, that the needs of groups with specific housing requirements are addressed and that land with permission is developed without unnecessary delay.

4.2 Strategic Policy S6 demonstrates the Council's commitment to plan positively for new homes and to help significantly boost the supply of housing to meet the needs of the area.

4.3 To ensure the provision of an appropriate mix of dwelling types and sizes that contribute to current and future housing needs and create mixed communities, Table 1 below will be used to inform the mix of market housing proposed as part of new residential development in accordance with Policy DM1.

Table 1 Size and Mix of New Market Housing

Size of new owner-occupied and private rented accommodation required in Chelmsford up to 2041	
Dwellings Size	**Mix Required**
One Bedroom	5 – 10 %
Two Bedroom	30 – 35 %
Three Bedroom	35 – 40 %
Four or more bedrooms	20 – 25 %
Total	100%

4.4 Policy DM26 provides information on the design specifications for dwellings, which includes a requirement for all new dwellings to comply with the Nationally Described Space Standards. As this applies to all new dwellings, evidence of compliance with this requirement will need to be provided prior to the validation of a planning application.

4.5 Policy DM1 (Aii) and Policy DM1 (Bi) describe the development thresholds and proportions of new dwellings that will be required to meet the enhanced access and adaptability standards set out in Part M, Category 2 (Accessible and adaptable dwellings) M4(2) and Part M, Category 3 (Wheelchair user dwellings) M4(3) (2) (b) of Schedule 1 (para 1) to the Building Regulations 2010 (as amended). These requirements will be secured through planning conditions and/or legal agreement.

4.6 Further information on the implementation of Policy DM1 (Bi) is provided in Section 5 Affordable Housing.

4.7 Policy DM1 (Ci) requires, within all new developments of more than 100 dwellings, 5% self-build homes, which can include custom house building. This requirement will be secured through a planning obligation.

4.8 Policy DM1 (Cii) requires all new development of more than 100 dwellings to provide Specialist Residential Accommodation (including Gypsy and Traveller needs), taking account of local housing needs. This requirement will also be secured through a planning obligation.

4.9 Policy DM1 (D) requires all new development of more than 500 dwellings to provide 10% of market housing for Older Persons. Evidence of compliance with this requirement will need to be provided prior to the validation of a planning application.

Build to Rent

4.10 The NPPF defines Build to Rent housing as that which is typically 100% rented out. The Strategic Housing Needs Assessment (SHNA) 2023 does not attempt to estimate the need for additional private rented housing, including Build to Rent housing, because it is likely that the decision of households as to whether to buy or rent a home in the open market is dependent on several factors which means demand can fluctuate over time.

4.11 The 2024 SHNA Addendum Report reviewed new lettings and showed much higher market rents are charged on new lettings in the private rented sector than those which cover the whole private rent sector. Consequently, lettings associated with new Build to Rent dwellings are likely to be much higher than those in the private rented sector as a whole.

4.12 All market rented homes in Build to Rent schemes are expected to reflect the indicative mix set out in the latest SHNA. For ease of reference the 2023 SHNA considered the below mix to provide a reasonable starting point for Build to Rent housing:

1 bedroom homes	25%
2 bedroom homes	45%
3 bedroom homes	25%
4 bedroom homes	5%

4.13 The NPPF states that Build to Rent homes should offer longer tenancy agreements of three years or more and should be on the same site or contiguous with the main development of a wider multi-tenure development.

4.14 Schemes proposing Build to Rent homes will be considered on their merits, which will include consideration of the level of the market rents, the proportion of Build to Rent homes provided as part of a multi-tenure development, mix of housing proposed and the proportion of affordable private rent homes to be provided. Further guidance on the level and mix of affordable private rent homes expected from Build to Rent proposals is set out in Section 5.

Definition of Self-Build and Custom Housebuilding

4.15 The Self-build and Custom Housebuilding Act 2015 (as amended) provides a legal definition of self-build and custom housebuilding. The Act does not distinguish between self-build and custom housebuilding and provides that both are where individuals, an association of individuals, people working with or for individuals or associations of individuals, build or complete houses to be occupied as homes by those individuals.

4.16 In considering whether a home is self-build or a custom build home, local authorities must be satisfied that the initial owner of the home will have primary input into its final design and layout. It does not include the building of a house or plot acquired from a person who builds the house mainly to plans or specifications decided or offered by that person. The 2015 Act also requires custom and self-build homes to be occupied as a sole or main residence. There are various types of self-build and custom build projects including:

- Individual self/custom build - individuals purchase a serviced plot of land and build a house to live in. They may do some or all the build themselves (Do-It-Yourself) or employ a builder, architect or project manager to oversee the build (self-commissioned).
- Group self/custom build - a group of people come together to design and develop a custom build housing development which they then live in. They may build this themselves or with help from a developer to manage the project (see Community-led and cohousing below).
- Developer-led custom build - a developer divides a larger site into individual serviced plots and provides a design and build service to purchasers through a choice of pre-approved designs. This gives people a chance to customise existing designs to suit their needs. Self-finish/shell homes – housing built as a watertight shell by a developer, the internal layout of which is then designed and finished by the initial occupant.

4.17 Community-led housing is development taken forward by or with a not-for-profit organisation that is primarily for the purpose of meeting the needs of its members or the wider local community. A Community Led Housing Planning Advice Note promotes greater understanding of Community Led Housing and shows the enhanced role that communities can have in influencing increased provision of Community Led Housing. It also provides further information on the different approaches in which a community group or organization can own, manage, or steward homes.

4.18 A cohousing project involves a legally recognised group of people creating their own neighbourhood of homes, with shared facilities such as a communal house. This is different to Co-living Housing, which also contains significant communal space but is provided by a commercial entity. Further advice on Co-Living Housing can be found in the Co-Living Housing Planning Advice Note.

What is the method of calculation for the quantum of Self-Build and Custom Housebuilding?

4.19 The Self and Custom Housebuilding Act 2015 (as amended) places a duty on the Council to keep a register of individuals, and associations of individuals, who are seeking to acquire self-build serviced plots of land in the Council's area for their own self-build and custom housebuilding.

4.20 The register provides information on the number of individuals and associations on the register; the number of serviced plots of land sought; the preferences people on the register have indicated, such as general location within the authority's area, plot sizes and type of housing intended to be built. This information is updated each year in the _ Self-Build and Custom Housebuilding Monitoring Report.

4.21 At the time a formal pre-application is submitted, the Council will review the requirements to provide 5% self-build and custom housebuilding against its register. It will not be necessary to review the requirements again if a full or detailed planning application is submitted within six months of the pre-application advice being provided. The Council would not seek more than 5% self-build and custom housebuilding.

4.22 The calculation of the self-build and custom housebuilding requirement will be undertaken in terms of the gross number of self-contained dwellings. Where the percentage of self-build and custom housebuilding sought does not result in whole numbers of units, the number of self-build and custom housebuilding dwellings or plots will be rounded up.

4.23 In this guide, reference to a 'serviced plot' means one self-build and custom housebuilding dwelling, regardless of the type of self-build and custom build project.

What is the definition of a Serviced Plot of Land?

4.24 A serviced plot of land must have legal access to a public highway and electricity, water, wastewater, telecommunications including fibre optic broadband and sewer connections at least to the plot boundary.

4.25 Legal access to a public highway can include sections of private or unadopted road, it does not mean that the plot is immediately adjacent to the public highway just that there is the guaranteed right of access to the public highway.

4.26 Connections for electricity, water and wastewater means that the services must either be provided to the boundary of the plot, so that during construction connections can be made, or adequate alternative arrangements are possible, such as the use of a cesspit rather than mains drainage.

Mix of Self-Build and Custom Housebuilding

4.27 At the time a planning application is submitted, the Council will review the preferences of the people on the register as reported in the latest published Self-Build and Custom Housebuilding Monitoring Report, to advise developers and landowners on the type of self and custom housebuilding required.

4.28 At application stage, all Self-Build/Custom Build areas are to be shown on the indicative layout plan and relevant parameter plans.

4.29 Providers should provide a mix of serviced plots to meet the range of demand and affordability evidenced by local demand on the register, as annually updated in the Self-Build and Custom Housebuilding Monitoring Report.

4.30 Where there is evidence of local demand for serviced plots, but they are not possible e.g. flatted schemes, the Council will require the provision of self-finish/shell homes where the purchaser can then define internal layouts, finishes and fixings as well as any exterior landscaping for flats with private gardens.

Section 106 Agreement

4.31 The Section 106 agreement will secure self-build or custom build homes that meet the legal definition of self-build and custom housebuilding in the Self-build and Custom Housebuilding Act 2015 (as amended). To ensure that self-build and custom housebuilding provision are delivered in a way that meets local demand, the Council will seek to secure a Section 106 obligation which sets out the location, phasing, build programme, amount, type, mix, marketing strategy and priority mechanisms that the self-build or custom housebuilding must achieve.

4.32 The Marketing Strategy will be expected to detail the proposed marketing of the self-build and custom build plots which shall not exceed 15 units at a time and include details of the sale price of the plots with supporting valuation methodology from a RICs qualified valuer, how, where and when the plots are to be offered to the market, plot passport details for each plot, marketing materials, promotional methods, on-site signage, promotional information for persons on the Council's Self Build and Custom Build Register, and any alternative or additional marketing in the event that the interest is low, the marketing periods of plots and priority mechanisms

4.33 The priority mechanism will include a restrictive marketing period of 3 months. In this 3-month period a household on Part 1 of the Self-Build and Custom Housebuilding Register will be given priority over other potential purchasers.

4.34 Custom and self-build developments will be required to deliver Biodiversity Net Gain (BNG) in accordance with national mandatory requirements, other than where the national custom and self-build exemption applies. The exemption will not apply to the application of the 5% obligation under Policy DM1 C as the 5% requirement is only triggered for development proposals of 100 or more dwellings. Arbitrarily dividing up development proposals to apply the exemption will not be acceptable. Where developments are exempt from mandatory BNG requirements, they are encouraged to deliver biodiversity gain proportionate to the scale of development. To qualify for BNG exemptions, planning applications must clearly demonstrate that the development meets the custom and self-build legal definition, and planning permissions must be secured as custom and self-build housing.

4.35 The Section 106 agreement will seek to ensure that self-build and custom housebuilding provision will need to be made available and actively marketed before occupation of 50% of market housing provision.

4.36 Providers of self-build and custom housing building will be required to market appropriately in accordance with an approved marketing strategy serviced plots and ensure they remain available for at least 12 months at a price which accounts for income and saving levels of those on Chelmsford's Self-Build and Custom Housebuilding Register (as detailed in the Self-Build and Custom Housebuilding Monitoring Report), and which is comparable to other serviced plots marketed in the administrative area of Chelmsford in the same 12-month period. If after 12 months a serviced plot has been made available and actively marketed in accordance with the approved marketing strategy but has not sold, the plot can either remain on the open market or

be built out by the Developer in accordance with the Design Code and other relevant Local Plan policies. The Council will release the owner from its obligations set out in the section 106 agreement when the owner has provided the Council with a satisfactory record of sale enquiries. Plot providers reverting self-build and custom housebuilding back to market housing will be responsible for the full CIL liability.

4.37 Self-build and custom housebuilding will not be considered as part of the affordable housing obligations set out in Policy DM2, irrespective of whether the accommodation is subject to suitable restrictions on occupation and price, because it meets a different identified housing demand.

Design Requirements

4.38 To ensure that self-build and custom housebuilding is of high-quality design, sites with multiple serviced plots (5 or more) or other forms of self-build and custom housebuilding provision, will be required to be supported by a Design Code unless secured through pre-approved plans. The implementation of a Design Code will be secured through a planning obligation.

4.39 A Design Code should normally be submitted by the provider at the outline planning stage and should set out a clear set of design rules and parameters that future development will comply with. Design Codes will vary depending on the amount of development proposed and the context of the site. They will need to be agreed with the Council.

4.40 A Design Code should include the information set out in the 'Design Code Template for Self-Build and Custom Housebuilding' which has been published alongside this SPD.

4.41 Pre-approved designs must be configured in a manner that secures as much design freedom for the initial occupant as possible and only fixes design parameters where demonstrably necessary. Pre-approved design options should show design freedom with a least three options offered to initial occupants over each of the matters listed below:

- Size and shape of the home, including outbuildings;
- Position, size and shape of all windows and doors across every elevation;
- Materials across every elevation and roof;
- Internal layout e.g. location, size and shape of rooms;
- Build specification e.g. insulation, heating configuration, heat pumps;
- Sustainability features e.g. solar panels, solar hot water, triple glazing; and
- Finishes e.g. kitchen, bathroom, flooring, lighting.

4.42 Plot Passports provide potential plot purchasers with a simple and concise summary of the design and development parameters for a specific plot. They should clearly show the plot size, any design and siting parameters, access arrangements, separation distances to adjacent sites, the cost of the site, developable footprint, building height, refuse storage areas, servicing infrastructure, CIL exemption, car parking provision, access to site wide survey information, site constraints and construction compound, materials storage area and location of plots. Plot passports can also contain information relating to the plot sales process and planning application process if applicable. Plot passports must be available to potential plot purchasers before plots are marketed and approved as part of the marketing strategy submitted to the Council.

The Council recognises that modular housing, which is built off-site, can help deliver custom house building that is more cost effective than traditional house building methods. The Council will support modular housing where it complies with design codes, policies and standards in the Local Plan.

4.43 All residential development, including self-build and custom housebuilding must comply with the relevant Local Policies set out in the Local Plan. Each serviced plot will need to submit a full or reserved matters application where the design and appearance of an individual home will be considered.

CIL Exemptions

4.44 The self-build exemption from CIL is applicable for all homes built or commissioned by individuals for their own use, either by building the home on their own or working with builders, so long as the home is occupied by that person as their sole or main residence for the duration of the claw back period (3 years).

4.45 Qualifying self-builders will be eligible to apply for CIL relief for self-build. Self-builders seeking relief are required to declare that their development is intended to be self-build, prior to commencement of development. The self-builder must remain as the occupant of the dwelling for a minimum of 3 years after completion. If the dwelling is sold or let within three years of completion, the Council will clawback the CIL liability from the self-builder.

4.46 On schemes delivering multiple self-build and/or custom housebuilding plots, to ensure that the self-builder of each plot can claim for CIL exemption for Self-Build, the developer bringing the scheme forward must submit a clearly marked 'phasing plan' and accompanying schedule with each phase (or plot) clearly listed. This information should be submitted with the planning application or submitted in response to a pre-commencement condition imposed by the planning permission. This is to prevent a CIL charge being triggered for all plots within the wider development as soon as development commences on the first dwelling. This will also ensure that if a disqualifying event occurs affecting one unit, it does not trigger a requirement for all to repay the exemption.

Definition of Specialist Residential Accommodation

4.47 Specialist Residential Accommodation can cater to the specific needs of a variety of people within the community, including older people; students; people with disabilities; people with support needs, looked after children and Gypsy and Travellers and Travelling Showpeople.

4.48 Disabilities can include, but are not limited to, people with ambulatory difficulties, blindness, learning difficulties, autism and mental health needs, which may generate a range of housing requirements which can change over time.

4.49 National Planning Practice Guidance recognises that local planning authorities may also wish to consider groups outside of the scope of the definitions in paragraphs 4.47 and 4.48 above, to meet specific needs within their communities.

4.50 The Specialist Residential Accommodation required by these groups varies from independent self-contained accommodation with limited support to non-self-contained nursing homes for

people with more complex needs who need medical support.

4.51 Accommodation with support can be delivered in a range of settings, including individual flats or houses, shared accommodation or clusters. The term 'Supported Living' refers to the way support is organized, rather than specifying one type of accommodation that is required.

4.52 ECC defines supported living schemes as clusters of single occupancy units with a shared core support for all service users, or tenants living in a shared house or bungalow with their own room and shared communal area. ECC has published Supported Living Accommodation Standards which set out the standards for any supported living properties.

4.53 Specialist Residential Accommodation does not necessarily have associated support requirements but could cater to the specific needs of the groups requiring it through the built form of the accommodation provided, such as purpose-built student accommodation or pitches for Gypsy and Travellers.

What is the method of calculation for the quantum of Specialist Residential Accommodation?

4.54 Any Specialist Residential Accommodation for older people is expected to be predominantly delivered within the 10% market housing requirement specified in Policy DM1 (D) on greenfield developments of more than 500 dwellings.

4.55 The demand and housing need for Specialist Residential Accommodation is very diverse and calculated in different ways. The Chelmsford Housing Strategy 2022-2027 identifies a need for over 60 supported accommodation units for homeless households and those in temporary accommodation (as of March 2022). The Gypsy and Traveller Accommodation Assessment (GTAA) (2023) identifies a need for 27 new pitches across the period 2023-2041 for Gypsies and Travellers who do not meet the PPTS definition. The Strategic Housing Needs Assessment (SHNA) (2023) estimates a potential need for 11 additional children requiring care and accommodation provided by ECC across the plan period. The SHNA 2023 also calculates that the Council could seek 5% of new market homes to be compliant with Part M, Category 3 (Wheelchair user dwellings) M4(3) (2) (a) of Schedule 1 (para 1) to the Building Regulations 2010 (as amended) to meet the needs of older and disabled people.

4.56 ECC has published a `Supported and Specialist Housing and Accommodation Needs Assessment' (August 2025), which estimates the need for supported and specialist housing and accommodation in five-year intervals from the base year of 2024 where possible.

4.57 Using the local housing need for Specialist Residential Accommodation identified in the Chelmsford Housing Strategy, GTAA and SHNA (excluding older person's housing demand) there is an identified local housing need for just over 100 Specialist Residential Accommodation dwellings. As this figure includes identified housing needs that have not been calculated across the whole plan period, it is anticipated that the local housing need for Specialist Residential Accommodation will be higher across the plan period.

4.58 In anticipation of a higher level of local housing need across the plan period, the quantum of Specialist Residential Accommodation sought to meet the local housing needs requirement of Policy DM1 (Ci) will be calculated at a ratio of one specialist residential dwelling per 100 residential

dwellings on sites of more than 100 dwellings. Using this ratio, and the forecast supply on development sites of more than 100 dwellings, it is anticipated the Specialist Residential Accommodation supply over the plan period will deliver approximately 165 dwellings.

4.59 Some Specialist Residential Accommodation requires additional revenue funding to provide support services. Where these costs cannot be met by residents of the accommodation, additional subsidy will need to be secured. In these circumstances, it might be more appropriate to secure a capital contribution towards the Specialist Residential Accommodation as a commuted payment in lieu of on-site provision. A commuted payment in lieu of on-site provision also allows flexibility to meet the range of identified local housing need for Specialist Residential Accommodation and flexibility in the location of the Specialist Residential Accommodation.

4.60 Whilst the local housing need for Specialist Residential Accommodation encompasses a range of accommodation sizes, for the purposes of calculating a capital contribution in lieu of on-site provision, it is assumed the local housing need is for one bed, two-person occupancy dwellings.

4.61 Table 2 below calculates the capital value of these dwellings using the assumptions / sources noted in the table:

Table 2 Specialist Residential Accommodation Capital Value Calculation

Item	Assumption/Source	Amount (£) per annum
Gross rent	Local Housing Allowance One Bed Rate April 2024	9,513.96
Service Charge	£25 per week	1,300
On cost	10% of gross rent	951.40
Management and Maintenance Cost		500
Void and bad debts	3% of gross rent	285.41
Net rent		6,477.15
Capitalised Value	Payback period 30 years	194,314.50
Value per sqm	Nationally Designed Space Standards for one bed two person flat – 50sqm	3,886.29

4.62 Using the average value per sqm in Table 41.5 of the Local Plan Viability Update (2023) of £4,734 per sqm, the contribution in lieu of on-site Specialist Residential Accommodation will be:

£42,400 per net new dwelling = (£4,734 - £3,886 = 848) x 50 sqm

4.63 The Specialist Residential Accommodation contribution on developments of more than 100 dwellings will therefore be:

i. in respect of on-site Specialist Residential Accommodation, 1% of the total new net residential dwellings; or

ii where there is a contribution in lieu of on-site provision the contribution will be £42,400 per Specialist Residential Accommodation dwelling.

4.64 The 1% applies to the whole development; it does not only apply to the part of the development above the threshold.

4.65 The Specialist Residential Accommodation requirement of Policy DM1 (Ci) is in addition to the requirements set out in Policy DM2, as Policy DM2 does not identify the specific housing needs of households requiring Specialist Residential Accommodation.

4.66 The Specialist Residential Accommodation requirement of Policy DM1 (Cii) applies to all new developments of more than 100 dwellings. It does not apply to standalone developments containing solely Specialist Residential Accommodation.

Mix of Specialist Residential Accommodation

4.67 At the time a formal pre-application is submitted, the Council will consider the published Specialist Residential Accommodation local housing needs to provide advice on how best the local housing need for this type of accommodation can be met.

4.68 The Council will also consult ECC to seek advice on their priority Specialist Residential Accommodation local housing needs

4.69 The Council will provide advice on the affordability of on-site Specialist Residential Accommodation as demonstrated by evidence base documents. Where affordability information is not provided in these statements / strategies, the default need is set out in Section 5 of this SPD.

Section 106 Agreement

4.70 To ensure that Specialist Residential Accommodation is delivered in a way that meets local need, the Council will seek to secure a Section 106 obligation which sets out the amount, type, mix and tenure and priority mechanisms of the Specialist Residential Accommodation to be provided in perpetuity.

4.71 Where Specialist Residential Accommodation is meeting local housing needs a priority mechanism for households that reside, work or have strong family connections with people living in the administrative area of Chelmsford City Council from whom they require support, will be prioritised for a period of three months.

4.72 The Section 106 agreement will seek to secure that Specialist Residential Accommodation is made available before occupation of 50% of market housing provision, to ensure timely delivery of the Specialist Residential Accommodation. The Specialist Residential Accommodation obligation could be met through the provision of a suitable serviced site, on-site completed dwellings or a contribution in lieu of on-site provision calculated in accordance with paragraph 4.62 above.

4.73 Where Specialist Residential Accommodation is required to be delivered under Policy DM1, it will not be considered to count towards the affordable housing requirement set out in Policy DM2, irrespective of whether the accommodation is subject to suitable restrictions on occupation and price, because it meets a different identified housing need.

4.74 Specialist Residential Accommodation required under Policy DM1 is in addition to any residential requirements set out in site policies in the Local Plan.

4.75 To ensure that Gypsy and Traveller and Travelling Showpeople Sites are delivered in a way that meets local needs the Council will secure a Section 106 obligation that sets out the number of plots, tenure, uses on site and prioritisation mechanism for the accommodation to be provided in perpetuity. Also, for Travelling Showperson plots the Section 106 agreement will include a mechanism for determining the 'market value' of a site.

4.76 The prioritisation mechanism will ensure that each pitch/plot shall only be occupied by persons who form part of a Gypsy and Traveller or Travelling Showperson household, they (one of them if the household consists of more than one person) are aged 18 or over, and can adhere to the 'Plot Eligibility and Allocation Prioritisation Policy' as defined at the time to reflect identified need in the latest published Gypsy and Traveller Accommodation Assessment.

Design Requirements

4.77 Specialist Residential Accommodation can cater to the specific needs of a variety of people within the community and design requirements will consequently vary significantly.

4.78 Accessible and adaptable housing enables people to live more independently while also saving on health and social costs in the future. Accessible and adaptable housing will provide safe and convenient routes into and out of the home and outside areas, suitable circulation space and suitable bathrooms and kitchens within the homes.

4.79 Wheelchair user dwellings include additional features to meet the needs of occupants who use wheelchairs or allow adaptations to meet such needs.

4.80 Inclusive design should not only be specific to the building but also include the setting of the building in the wider built environment, for example the location of the building on the plot; the gradient of the plot; the relationship of adjoining buildings; and the transport infrastructure. Further guidance on inclusive design of public spaces and the wider built environment is provided in the 'Making Places SPD'.

4.81 Design principles such as those set out in the Housing our Ageing Population Panel for Innovation (HAPPI) Report (2009) are applicable for older people and age-friendly places.

Gypsy, Traveller or Travelling Showperson sites

4.82 Gypsy, Traveller or Travelling Showperson sites, both allocated and non-allocated sites, will need to provide a suitable living environment for the proposed residents, with safe and convenient access to the local highway network. Mains water, electricity supply, drainage and sanitation should be available on-site or be made available on-site. Sewerage should normally be through mains systems, however, in some locations this may not always be possible and in that case suitable alternative arrangements can be made. All sanitation provision must be in accordance with current legislation, regulation and British Standards.

4.83 Surface drainage (which may take the form of Sustainable Drainage Systems), gigabit broadband and mobile infrastructure should be provided where possible.

4.84 The Site design and layout need to appropriately consider ways of 'Designing out Crime' and it is recommended that the applicant seek early engagement with Essex Police to help achieve this.

4.85 Provision of amenity green space should be made on Gypsy, Traveller and Travelling Showperson sites in accordance with Table 3 below.

Table 3 Amenity Space Provision on Gypsy, Traveller or Travelling Showperson Sites

Private/Communal Amenity Green Space	Form	Amount
Where amenity green space can be delivered on pitch/plot	• Grassy and/or woodland space without hardstanding. • Within boundary of plot. • Not accessible to motorised vehicles.	80 sqm minimum private green amenity space
Where amenity green space cannot be delivered in full on pitch/plot*	Demarcated private zone on each pitch/plot capable of use as a clothes drying area. Within boundary of plot. Not accessible to motorised vehicles.	10 sqm minimum demarcated private zone.
	Communal space, overlooked by other plots on site to promote safety through surveillance. Within site boundary. Grassy and/or woodland space without hardstanding – with exception being the presence of children's play equipment if appropriate. Not accessible to motorised vehicles.	20 sqm minimum per-pitch/plot communal green amenity space.

*Both demarcated private zone and communal space to be provided in this instance.

4.86 Spaces need to feel safe and be accessible to all intended users. It is advisable to consider the boundary treatment of the amenity green space provision to protect its users – particularly children – from the surrounding vehicular traffic.

4.87 All new Gypsy, Traveller and Travelling Showperson sites should seek the planting of three trees per net new pitch/plot. In line with the Environment Act 2021, all development proposals (except where exemptions apply) will be required to provide a minimum of 10% biodiversity net gain above the ecological baseline for the application site. Where it is possible to achieve, the Council will encourage delivery of a greater than 10% biodiversity net gain.

4.88 Each site should have a site office provided on-site, where a site manager can be based and residents on site can reasonably access. The site office would serve as a hub for residents to report and discuss issues and where appropriate facilitate site health, safety and well-being sessions. It is expected that the site owners/other residents of the site would collectively own and manage the office building. Planning conditions will be put in place to retain the use of a site office for site management in perpetuity.

4.89 To promote safety and security on site, consideration must be given towards the design, layout, and positioning of the site office. This site office must be situated within a suitable distance of the residential plots to provide security for the site without being intrusive and should be clearly visible to visitors entering the site. The site office must be designed to ensure it is easily accessible to all residents on site and suitably accommodate all abilities and stages of life. A site office must have connections to all on-site services. As a minimum, the building must include a WC with sink basin, kitchen, and lounge area. Provision of a site office should include at least two bays to accommodate a standard car. At least one bay for the site office must be suitable to accommodate drivers/ passengers who are wheelchair users.

4.90 All new Gypsy, Traveller and Travelling Showperson sites should provide a suitable living environment for the proposed residents. The perimeter of any site should be suitable bounded to help achieve this and provide safety and security to the site residents, deterring unauthorized entry.

4.91 Site boundaries should be clearly marked, and materials chosen should be sympathetic to the character of the area. Consideration should be given towards location of access points in the boundary to ensure connectivity between the site and the surrounding amenities can still be achieved.

4.92 Each pitch or plot within a site should have a clear boundary defining the area each individual household occupies to protect the living and amenity space of individual households.

4.93 In designing pitch and plot boundaries, consideration needs to be given towards achieving a balance of preventing overlooking onto individual households to provide privacy and retaining a level of natural surveillance across the site for resident safety.

4.94 Access into and within the site needs to be able to accommodate the turning space required by large trailers as well as emergency vehicles, refuse collection, without compromising the safety of residents nor the function of the connecting strategic highway. Early consultation with Essex Highways is advisable to ensure this is achieved.

4.95 Bays allocated for static mobile homes or touring caravans must be at least two metres away from any road. On each pitch or plot, at least one bay allocated for use by private car must be suitable to accommodate drivers/passengers who are wheelchair users.

4.96 All parking provision is to be provided in hardstanding areas and clearly designated to deter unsafe or obstructive parking. These areas must be constructed with material suitable to sustain large weight and regular movement attributed to the range of vehicles on site.

4.97 Each pitch or plot will be required to provide electric vehicle EV charging points at a rate of at least one EV charging point per pitch/plot. The EV charging point provided must be on the pitch/plot and accessible to vehicles parked within the allocated bays for cars and/or static mobile home and/or touring caravan. Provision of at least one EV charging point to serve the site office parking bays is also required. Provision of any additional EV charging points on pitch/plot will be welcomed.

4.98 For fire safety reasons, no bay allocated for static mobile home or touring caravan should be placed within three metres of the site boundary; and the distance between bays allocated for static mobile homes or touring caravans needs to be at least six metres.

4.99 Allocated bays for private cars ought to have a separation distance of at least six meters from a touring caravan or static home. Where this is not achievable, a separation distance of at least three meters can be allowed so long as the private cars would not obstruct entrance to the touring caravan or static home.

4.100 All separation distances must also be clear of any combustible structures. Early consultation with the Fire and Rescue Services is advisable.

4.101 An amenity building must be provided on each pitch/plot with connections to all on-site services. As a minimum, the building must include a WC with sink basin, a shower and utility room, kitchen, lounge, and a dining area.

4.102 The amenity building should suitably accommodate residents of all abilities and stages of life. In designing the amenity building, consideration must be given towards accessibility and adaptability provision. Consideration must also be given towards resident privacy in the siting and orientation of the amenity building. In accordance with Appendix B of the Local Plan, all habitable rooms must have at least one window in a wall allowing outlook and ventilation. Walls which form a boundary with another plot or a boundary to the site should not have windows.

4.103 Any amenity building provided on sites shall meet the Building Regulations optional requirement for water efficiency of 90 litres/person/day.

4.104 An external shed should be provided to serve as residential storage, and a secure enclosure to be provided for the storage of metal gas bottles.

4.105 Recycling and waste provisions are to be provided in the same manner as are expected for any other residential development. Space to store recycling and waste receptacles and ability for refuse collectors to reach these needs to be considered. See Appendix B of the Chelmsford Local Plan for details.

4.106 Infrastructure facilitating on-site energy generation and sustainable living will be supported. This may take the form of solar PV/solar thermal, rainwater harvesting, heat pumps, etc.

4.107 Where sites are allocated as part of a wider strategic site, certainty surrounding Local Plan Policy compliance and elements of the Scheme will also be required at earlier stages of the planning process.

4.108 All sites should be indicated on a site plan with high level consideration in the Masterplan submission to size of the site and number of plots to be provided, identification of any protected natural feature on the site and the impact upon the character of the area, historic or natural environmental assets and flood risk.

4.109 At outline planning application stage, all sites should be shown on an indicative layout plan and relative parameter plans. A Section 106 agreement will secure the delivery of pitches and plots. There should be detailed consideration given to vehicle access into the site and connectivity to the highway network, provision for the supply of all on-site services into the site boundary, provision of adequate community services and facilities within reasonable travelling distances as well as pitch/plot boundaries.

4.110 Whilst there are no prescribed standards for the design and layout of Gypsy and Traveller sites, site location and design should take into account the Ministry of Housing, Communities and Local Government's Designing Gypsy and Traveller sites: good practice guide and where appropriate, relevant legislation.

4.111 The term 'pitch' refers to the space required on a site to accommodate a Gypsy and Traveller household. There is no set size for an individual pitch. They can vary like house sizes depending on the number of family members. To help sites integrate into existing communities, new Gypsy and Traveller sites should seek to provide a maximum of 10 pitches. A pitch should, however, be large enough to provide at least all the following:

- hardstanding for one static caravan;
- hardstanding for one travelling caravan;
- two parking bays for larger vehicles;
- an amenity building containing a kitchen, lounge and dining area, shower and utility room; and separate toilet facilities;
- an external shed;
- a secure enclosure for metal gas bottles; and
- clothes drying area.

4.112 To help sites integrate into existing communities and to ensure sites are suitable for an extended family unit, new travelling Showperson sites should normally seek to provide up to 15 plots.

4.113 The term 'plot' refers to the space required on a site to accommodate a household of Travelling Showpeople. A number of plots are also sometimes referred to as 'yards'. The Local Plan expects 0.2 hectares per plot to be provided. This is considered an appropriate size to accommodate the proposed number of caravans, vehicles and ancillary areas to enable the storage, repair and maintenance of equipment as well as account for turning space required by large vehicles and amenity space for residents. Larger plots may be acceptable to facilitate future

sub-division of plots to accommodate any anticipated rise in need.

4.114 The area of land set aside for accommodation by one family unit and the area of land set aside for the storage and maintenance of equipment collectively forms a single plot. The storage and maintenance space can sometimes be a communal area, however, for security reasons there may be a preference for them to form part of individual plots.

4.115 Travelling Showpeople sites need to accommodate a range of vehicles including cars, vans, lorries, trailers, mobile homes, and caravans and be accessible to emergency vehicles and refuse collection vehicles. Access is required both onto the site as a whole and into individual plots.

4.116 The following parking provision is suggested for each plot as a minimum:

2 bays to accommodate private cars
1 bay to accommodate a static mobile home
1 bay to accommodate a touring caravan
4 bays to accommodate lorries and/or trailers

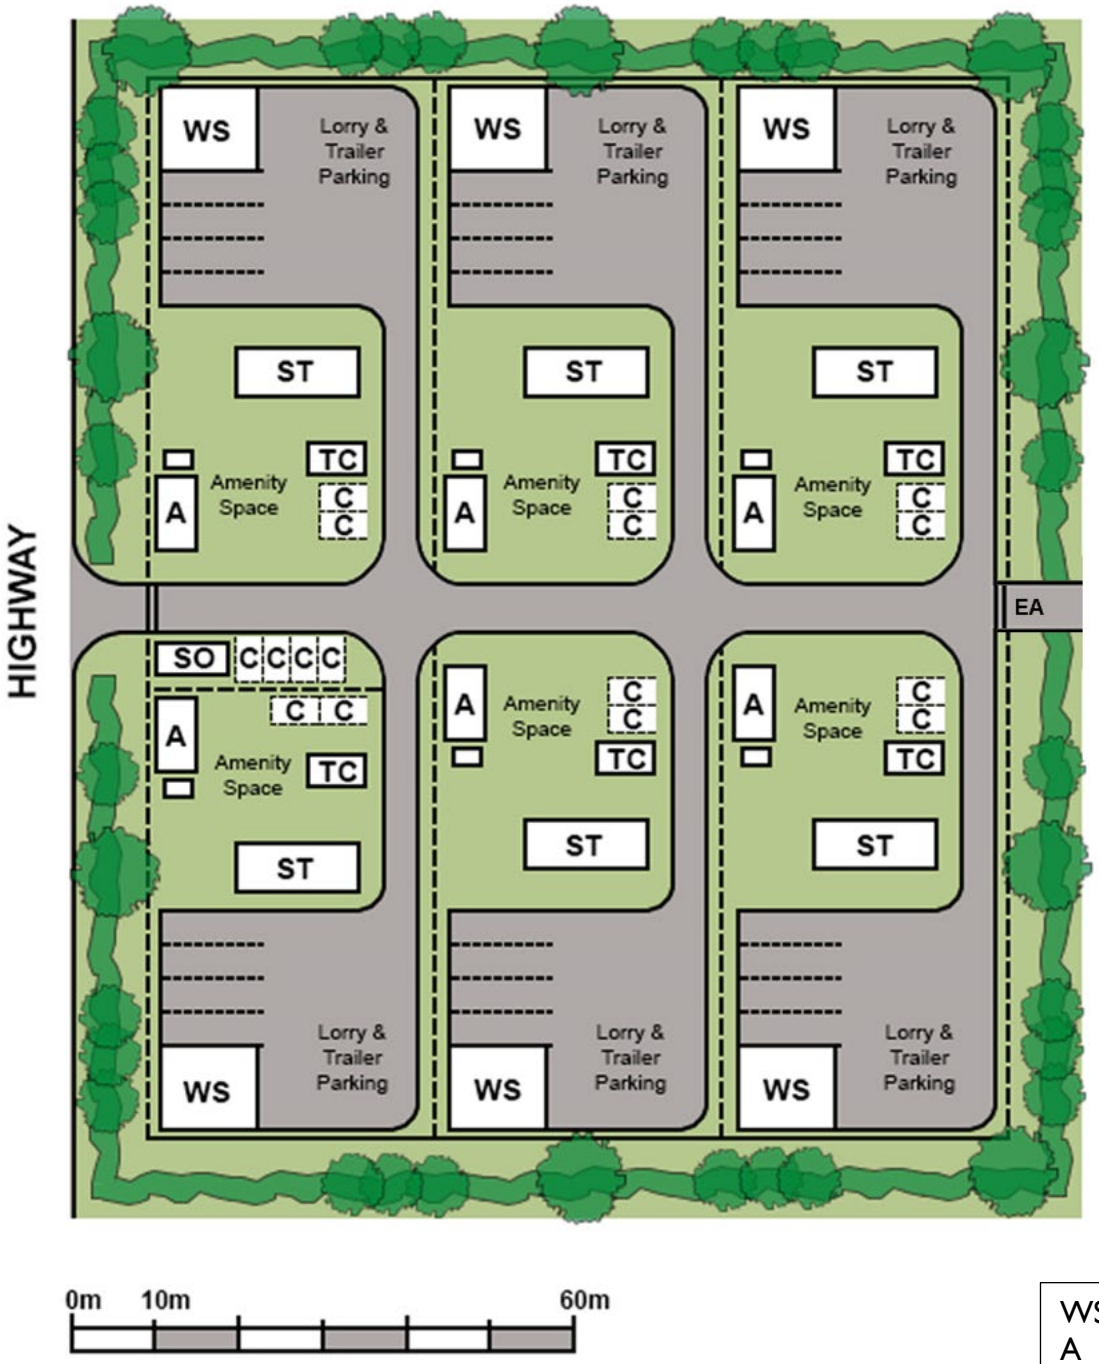
4.117 A maintenance/storage workshop of at least 100m2 floor space is to be provided on each plot. Water and electricity provision must be available as a minimum. Where feasible, the height should be around 1.5 stories to accommodate the height of a standard lorry/trailer.

4.118 If site constraints prevent delivery of maintenance/storage workshops on each plot, provision of these can be within communal areas. It is expected in this instance that at least 100m2 floor space per plot is still achieved. The maintenance/storage workshops should be positioned at a distance of at least six metres away from any amenity building, or parking bay for static or touring caravans to minimise the impact of visual, noise and odour pollution on residents. Conditions may be required to establish permissible activities/use classes and set operation times to reduce risk of nuisance.

4.119 For fire safety, the amenity building, site office, maintenance/storage workshop and any other storage units should be constructed from non-combustible materials such as masonry brick. Strict adherence to the Fire Safety Order and relevant Building Regulations will be sought and it is recommended that the applicant seek early engagement with the Essex County Fire & Rescue Service

4.120 Though not prescriptive, the following figures provide indicative layout designs of Travelling Showpeople sites that would be acceptable:

Figure 1: Indicative Travelling Showperson site example layout with separate provisions



WS	Workshop

SO	Site Office
EA	Emergency Access

Older Persons

4.121 The NPPF sets out that Older People are those over or approaching retirement age, including the active, newly retired through to the very frail elderly.

4.122 The 2024 SHNA Addendum Report reviews the housing needs of older people in terms of those aged 65 and over. It estimates the need for specialist older people's accommodation, which for market housing equates to 7% of the Housing Requirement.

4.123 This does not include the estimated need for other forms of housing that benefits older people such as wheelchair user housing, which the 2024 SHNA Addendum Report estimates to be 637 homes to meet current and future need to 2041.

4.124 The combined need for specialist market housing for older people and wheelchair user homes across the plan period in the 2024 SHNA Addendum Report is 2,299 homes, which equates to 10% of the Housing Requirement across the Plan Period.

4.125 The 2023 SHNA recommends that the Council seeks a proportion (up to 5%) of all new market homes to be M4(3) compliant to meet the identified need. The 2023 SHNA demonstrates a clear correlation between the age of a household reference person and the likelihood of there being a wheelchair user in the household therefore it is logical that this need is met through older persons housing.

4.125 The 10% requirement for older persons market housing is applied to sites of more than 500 dwellings in Policy DM1 D to enable a critical mass of Specialist Residential Accommodation to be achieved if that is the form of housing needed.

What is the method of calculation for the quantum of Older Person's housing?

4.126 In order to reflect the need, 10% should be calculated from the total number of dwellings and provided within the 65% market proportion. For example, a site providing a total of 1,500 residential units will be required to provide 150 older person residential units or bed spaces, or a combination of both, totaling 150. This will need to be provided as part of the 975 market residential units.

Mix of Older Persons Housing

4.127 Older persons housing to meet the requirements of Policy DM1 D can be provided as age restricted adaptable general needs housing that meets the requirements of Part M, Category 3 (Wheelchair adaptable dwellings) M4(3)(2)(a) of Schedule 1 (para 1) to the Building Regulations 2010 (as amended) and/or Specialist Residential Accommodation for Older People, including housing with support, housing with care, residential care bedspaces and/or nursing care bedspaces.

Section 106 Agreement

4.127 The amount, age restriction and form of the Older Person residential provision will be secured through a Section 106 agreement, but this will not contain any priority mechanisms set out in the Specialist Residential Accommodation section above when secured as market housing under Policy DM1 D.

Design Requirements

4.128 The NPPF notes that mixed tenure sites, including housing designed for specific groups, provide a range of benefits, creating diverse communities.

4.129 The Design principles set out in the Housing our Ageing Population Panel for Innovation (HAPPI) Report (2009) are applicable for older people and age-friendly places, so will apply to all older person's dwellings required by Policy DM1 D.

5 Affordable Housing

Policy Background

5.1 The NPPF states that where local planning authorities have identified that affordable housing is needed, they should set policies for meeting this need.

5.2 Paragraphs 20, 35, 63-6 of the NPPF and Strategic Policy S6 and Policy DM2 of the Local Plan set out the justification for requiring planning obligations in respect of securing affordable housing.

5.3 Strategic Policy S6 sets out the Council's housing requirement. This is evidenced by the Council's SHNA (2023) and SHNA Addendum Report (2024), which identifies the need for new affordable homes.

5.4 Policy DM2 (A) requires the provision of 35% of the total number of residential units to be provided and maintained as affordable housing within all new residential development sites which comprise of 10 or more residential units.

5.5 Planning obligations will be used to secure the following elements related to the provision of affordable housing:

5.5.1 the number of units;
5.5.2 the type of units;
5.5.3 tenure of units;
5.5.4 location of units;
5.5.5 space standards, accessibility and parking provision;
5.5.6 commuted sums in lieu of provision (where appropriate).

5.6 All affordable housing provided in areas covered by The Housing (Right to Acquire or Franchise) (Designated Rural Areas in the East) Order 1997 (SI 1997/623) and The Housing (Right to Enfranchise) (Designated Protected Areas) (England) Order 2009 (SI 2009/2098) will be subject to the retention restrictions imposed by these Orders.

5.7 The statutory right of tenants to acquire their affordable homes for rent (the "Right to Acquire") does not apply to any affordable dwellings for rent which are situated within a Designated Rural Area.

5.8 Where shared ownership leases of dwellings in Designated Protected Areas are concerned, the Registered Provider must ensure that all shared ownership leases contain a provision which either restricts staircasing to no more than 80%; or in instances where the leaseholder is permitted to acquire more than 80% (i.e. staircase to 100%), enables and obliges the Registered Provider to repurchase the property when the leaseholder wishes to sell.

5.9 These Orders currently include the whole Parishes of Chignal; East Hanningfield; Good Easter; Great and Little Leighs; Great Waltham; Highwood; Little Baddow; Little Waltham; Margaretting; Mashbury; Pleshey; Rettendon; Roxwell; Sandon; South Hanningfield; Stock; West Haningfield and Woodham Ferrers and Bicknacre. A significant part of the Parish of Writtle is also included.

Definition of Affordable Housing

5.10 The definition of affordable housing is set out in Annex 2 of the NPPF. This includes social rent, other affordable housing for rent, discounted market sales housing and other affordable routes to home ownership.

What is the method of calculation of the quantum of Affordable Housing?

5.11 Policy DM2 requires 35% of the total number of residential units on sites of 10 or more residential units to be provided and maintained as affordable housing.

5.12 The calculation of the affordable housing obligation will be undertaken in terms of the gross number of self-contained dwellings. Where the percentage of affordable housing sought does not result in whole numbers of units, the number of affordable dwellings will be rounded up to achieve the required 35% provision.

5.13 35% applies across the whole development; it does not only apply to the part of the development above the threshold.

5.14 Where there is a proposal to increase the number of residential units on a site following grant of permission, for example a non-residential ground floor use subsequently secures planning permission for additional residential dwellings, the Council will apply Policy DM2 (A) to the total number of residential dwellings on the site, if the increase in the number of units take the total on site to 10 units or more.

5.15 In instances where the initial proposal has been built, the additional proposed dwellings would be required to 'offset' the affordable housing requirement across the whole site.

5.16 Once the affordable housing requirement amount has been calculated, all other parts of this section of this SPD will apply.

Affordable Private Rent

5.17 The NPPF also includes a definition of Affordable Private Rent for Build to Rent schemes. National Planning Policy Guidance (NPPG) states that 20% is generally a suitable benchmark for the level of affordable private rent homes to be provided in any build to rent scheme and that a minimum rent discount of 20% for affordable private rent homes relative to local market rents.

5.18 The SHNA Addendum Report (2024) clearly sets out how the private rented sector has been playing a role in meeting the needs of households who require financial support in meeting their housing needs. Legislation through the 2011 Localism Action allows Councils to discharge their "homelessness duty" through providing an offer of a suitable property in the Private Rented Sector.

5.19 Given the notable need for affordable housing set out in the SHNA (2023) and SHNA Addendum Report (2024), where Build to Rent housing is proposed the Council will seek 24.5% of the total Build to Rent units to be provided as affordable private rent homes capped at Local Housing Allowance levels.

5.20 NPPG states that eligibility to occupy affordable private rent homes should be agreed

between the local authority and the scheme operator but with regard to criteria set out in planning guidance. It goes on to advise that where authorities maintain an 'intermediate housing list' they may wish to suggest names from this or potentially even their Statutory Housing list. The Council does not maintain an intermediate housing list and given the significant level of housing need that cannot be met, the Council will suggest names from the Statutory Housing register and developers of affordable private rent will be expected to have regard to the Council's housing allocation policies and prioritise potential candidates from the Statutory Housing list.

Vacant Building Credit

5.21 A Ministerial statement issued on the 28 November 2014 stated that where a vacant building is brought back into lawful use or is demolished to be replaced by a new building, the developer should be offered a financial credit equivalent to the existing gross floor space of the relevant vacant building when the local planning authority calculates any affordable housing contribution. Affordable housing contributions will be required for any increase in floorspace.

5.22 The vacant building credit applies where the vacant building has not been abandoned. The reference to abandonment is the applicable planning test for the vacancy credit and is already recognised in law.

5.23 Where there is an overall increase in floorspace in a proposed development that includes a vacant building, the Council will apply the following formula to calculate the affordable housing contribution:

- Revised Affordable Housing = 35 x 1 - (existing vacant gross internal area/proposed gross internal area)

5.24 In practice this means that if an existing vacant building has a gross internal area of 3,000 sqm and the gross internal area of the proposed 60 dwellings is 4,500 sqm, the revised affordable housing percentage that will be required is 11.667% and the revised affordable housing contribution will equal 7 dwellings.

Table 4 Example of calculating the Vacant Building Credit

Number of Dwellings	Vacant Building Gross Internal Area	Proposed Gross Internal Area of Residential Dwelling
60	3,000 sqm	4,500 sqm
Coefficient based on existing versus proposed areas	3,000/4,500 = 0.667	1 - 0.667 = 0.333
Revised Affordable Housing Percentage	35 x 0.333 = 11.655%	
Affordable Dwellings	Market Dwellings	Total Dwellings
7.00	53	60

5.25 For wholly residential schemes the total proposed Gross Internal Area (GIA) will be the GIA of the sum of all dwellings. Where flatted development is proposed the GIA will include all communal and circulation areas. For mixed use schemes, only the GIA of the proposed residential elements will be included.

5.26 The number of affordable dwellings will be calculated to two decimal points and rounded to the nearest whole number. It will be provided as affordable housing for rent.

Mix of Affordable Housing

5.27 To ensure new affordable provision is weighted to make a proportionate contribution to the assessed need, the Council expects the affordable housing to include 24.5% of the total number of dwellings within the development as either social or affordable rented accommodation.

5.28 Where the calculation of 24.5% of the total number of dwellings to be provided as affordable housing for rent does not result in whole numbers, it should always be rounded up to achieve the required 24.5%.

5.29 The balance, 10.5% of the total number of dwellings, should be provided as shared ownership housing.

5.30 The affordable housing provision for rent should proportionately reflect the needs identified in the latest SHNA and shortages relative to supply, in determining the optimum affordable housing mix by size and type.

5.31 The affordable housing provision for rent should reflect the 'Need requirement' in the Table 5 where possible. The Council will report on the size (by bedrooms) of new affordable housing for rent that achieves completion each year in the Authority Monitoring Report.

Table 5 Bedroom Size of Affordable Housing for Rent (general needs)

Size of additional units required to meet housing needs in Chelmsford	
Size of home	Need requirement As a % of net annual total
One Bedroom	25%
Two Bedrooms	35%
Three Bedrooms	30%
Four or more Bedrooms	10%
Total	100.0%

Source: Paragraph 5.34, page 115, SHNA.

5.32 When the quantum of residential accommodation sought is above the level identified in the Local Plan and there is a shortfall in the supply of new three and four bedroom affordable homes to rent recorded through the monitoring of planning permissions in the latest published Annual Monitoring Report, the Council will apply a revised affordable housing for rent mix that seeks to reduce the proportion of one-bedroom dwellings to zero, in favour of increasing the proportion

of larger family homes, as households requiring one bedroom accommodation are most likely to have their need met from the current supply. The distribution of the 25% one bedroom dwellings between the larger family units will be calculated in accordance with the percentage shortfalls reported in the latest published monitoring report.

5.33 This revised requirement will only apply to the quantum of residential housing above the total number identified in the Local Plan, so as not to affect the viability of the residential housing mix tested in the Local Plan, with the additional housing being a windfall to the developer/landowner.

Worked Example

The latest Annual Monitoring Report demonstrates that only 20% of three bedroom (10% shortfall) and 5% of four-bedroom affordable homes (5% shortfall) for rent have been secured on threshold sites in a monitoring year. The overall shortfall of three- and four-bedroom dwellings is 15% but with a proportionately greater deficit (67%) of three-bedroom dwellings compared to four-bedroom dwellings (33%). To calculate the revised mix of units this percentage split is applied to the number of dwellings that would have been provided as one bedroom dwellings and added to the dwelling outputs of the percentage requirements in Table 5.

A notional site with a residential 'allocation' of around 100 dwellings in the Local Plan that when master-planned can demonstrate that it can sustainably accommodation 150 dwellings would result in an increased provision of 12 affordable housing for rent units since:

100 x 24.5% = 24.5 which is rounded up to 25 dwellings

150 x 24.5% = 36.75 which is rounded up to 37 dwellings

With the additionality calculated as the difference between 37 – 25 = 12 dwellings the following bedroom mix would be required:

Table 6 Affordable Housing for Rent Additionality

	24.5%	1 Bed	2 Bed	3 Bed	4 Bed
SHNA Mix on 100 dwellings	25 dwellings	6 (25%)	9 (35%)	7 (30%)	3 (10%)
Revised Mix on 50 Dwellings	12 dwellings	0	4 (35%)	4 (30%) + 2 (67% of 3) = 6	1(10%) + 1 (33% of 3) = 2
Total	37	6	13	13	5

5.34 The Council's Housing Strategy will provide additional information on the size and type of affordable housing required to meet priority housing needs. The Council does not specify the mix of homes needed to meet demand for affordable home ownership dwellings. The SHNA Addendum (2024) notes that there was no evidence of need for First Homes or discounted market housing more generally. Shared ownership housing is likely to be suitable for households with more marginal affordability as it has the advantage of a lower deposit and subsidized rents.

5.35 The SHNA (2023) suggests the following mix of affordable home ownership would be appropriate although it notes that to make shared ownership affordable, very low equity shares would need to be sold for three + bedroom homes. Even then, four-bedroom shared ownership housing cannot be made affordable.

Table 7 Bedroom Size of Affordable Home Ownership

Size of home	
One Bedroom	25%
Two Bedroom	45%
Three Bedroom	25%
4+ Bedroom	5%
Total	100%

5.36 Policy DM26 of the Local Plan requires all new dwellings to achieve appropriate internal space through adherence to the Nationally Described Space Standards.

5.37 To accommodate the full range of bedroom requirements and associated occupancy guidelines set out in the Council's Housing Needs Register and Allocation Policy; and reflect the fact that a significant proportion of households assessed on the Council's Housing Register as requiring each size of accommodation will be at the maximum occupancy level; the Council will require affordable homes for rent to achieve appropriate internal space and number of bed spaces through adherence to the minimum defined levels of occupancy set out in Table 8.

5.38 Three-bedroom, six-person affordable housing for rent could be acceptable in lieu of four-bedroom, six-person dwellings, when they comply with the minimum gross internal floor areas and storage requirements set out in Table 1 of the Nationally Described Space Standards and two separate reception rooms are provided.

Table 8 Minimum Gross Internal Floor Areas and Storage (sq.m) for Affordable Housing for Rent

Number of bedrooms	Number of bedspaces	1 Storey	2 Storey	3 Storey	Built-in storage
1 bed	2 persons	50	58		1.5
2 bed	4 persons	70	79		2.0
3 bed	5 persons	86	93	99	2.5
4 bed	6 persons	99	106	112	3.0
5 bed	7 persons	112	119	125	3.5

Wheelchair Accessible Homes

5.39 Policy DM1 (Bi) states that within developments of 30 or more dwellings, the Council will require 5% of new affordable dwellings to be built to meet the requirements of Part M, Category 3 (Wheelchair user dwellings) M4 (3) (2) (b) of Schedule 1 (para1) to the Building Regulations 2010 (as amended), or subsequent government standard.

5.40 Part M of the Building Regulations sets a distinction between wheelchair accessible (a home readily useable by a wheelchair user at the point of completion) and wheelchair adaptable (a home that can be easily adapted to meet the needs of a household including wheelchair users) dwellings.

5.41 Local Plan policies for wheelchair accessible homes should be applied only to those dwellings where the local authority is responsible for allocating or nominating a person to live in that dwelling. They will need to be provided in a range of sizes as set out in the Wheelchair Accessible Homes Planning Advice Note, which is updated annually.

5.42 Wheelchair accessible homes in flats should only be provided on the ground floor to ensure an occupant can facilitate their own escape unassisted in the event of a fire. Any communal doors must enable remote access. Wheelchair users should have access to all parts of a dwelling. Within all wheelchair accessible homes, the principal living areas, i.e. the living, dining and kitchen space should be within the entrance storey, as well as a wet room (including an installed level access shower). All bedrooms should be accessible to a wheelchair user with various minimum dimensions and space clearance zone set out in the regulations.

5.43 For wheelchair accessible homes, the occupancy levels for each dwelling should allow for one additional person per bedroom size than those stated in Table 8 above for two-bedroom plus dwellings, with the corresponding increase in sqm set out in the Nationally Described Space Standards. Ideally, this will be provided in the form of an additional reception room on the ground floor.

5.44 The Council will apply a planning condition that ensures that 5% of all new affordable

homes on developments of 30 or more dwellings meet the requirements of Part M, Category 3 (Wheelchair user dwellings) M4(3)(2)(b) of Schedule 1 (para 1) to the Building Regulations 2010 (as amended) to ensure that the planning permission, under which the building works is carried out, meets the needs of occupants of the affordable housing for rent that use a wheelchair at the point of completion.

5.45 Where the 5% requirement does not result in whole numbers of units, the number of affordable dwellings for rent that meet the requirements of Part M, Category 3 (Wheelchair user dwellings) M4(3)(2)(b) of Schedule 1 (para 1) to the Building Regulations 2010 (as amended), will be rounded up.

Location of Affordable Housing

5.46 Affordable housing is an integral element of any market-led residential or mixed used development and is expected to be provided in-kind and on-site. The NPPF states that there is an expectation that the need for affordable housing is met on-site unless off-site provision or an appropriate financial contribution in lieu can be robustly justified and the agreed approach contributes to the objective of creating mixed and balanced communities.

5.47 The Council may consider a financial contribution in lieu of on-site provision of equivalent value on development sites which comprise between 10 and 15 units, to improve the provision of temporary accommodation for homeless households; or meet other affordable housing priorities identified in the Housing Strategy, which cannot be met on-site.

5.48 The ability to consider a financial contribution in lieu of on-site affordable housing provision will also enable the Council to improve the temporary accommodation offer. The Council has a limited portfolio of accommodation and is currently dependent on the private sector to meet the demand for temporary accommodation. This restricts the Council's ability to respond flexibly to changing patterns in demand for temporary accommodation and manage its statutory duties as a local housing authority.

5.49 Where the Council agrees to a commuted sum in lieu of an on-site affordable housing contribution, the methodology that will be used is to adopt the most recent new build sales values from the **appropriate typology** and location in the latest published Local Plan Viability Update, and then deduct from that the amount that a Registered Provider would pay for those units as affordable units, also using assumptions applied in the latest published Local Plan Viability Update. The difference is the commuted sum. For ease of reference, the relevant market values for each typology are listed below:

Table 9: Local Plan 2026 Price Assumptions		
Typology	**Area**	**£ per sqm**
Brownfield	Chelmsford	5,292
	South Woodham Ferrers	4,500
Urban Flats	Chelmsford	5,300
Large Greenfield	Chelmsford	5,047
	South Woodham Ferrers	4,300
Medium Greenfield	South West Area	5,292
	Eslewhere	4,300
Small Greenfield	All areas	5,400

5.50 The calculation of the commuted sum will be based on the proposed mix of market housing and will assume the affordable housing proportionately reflects the market mix of housing in terms of the bedroom size of the proposed market housing and the mix of flats and houses. If the proposed housing consists of maisonettes, the calculation will apply either the values of flats or houses, whichever is closest in square meters to the size of the maisonette of the relevant bedroom size. The floor area in sq.m for each property size will reflect the floor areas in Table 8.

5.51 The only exception to the above is where a calculation in lieu of on-site provision of affordable housing is sought from Co-living Housing. In this instance the commuted sum will be calculated based on the average size in sqm of the proposed Co-living Housing unit, rather than assign a floor area from those set out in Table 8. Otherwise, the calculation will be the same and based on market values less the amount a Registered Provider could pay for them (affordable rental value) using values in the latest published Local Plan Viability Update.

5.52 The calculation of the commuted sum will reflect all other requirements in this section of the SPD, except where an application benefits from a vacant building credit. Where a vacant building credit also applies, the calculation of the commuted sum will reflect an affordable housing contribution consisting of affordable housing for rent only.

5.53 An example of the calculation of a commuted sum in lieu of on-site affordable housing based on a market proposal consisting of 5 two-bedroom flats and 10 three-bedroom houses, is provided in Table 10. The mix of affordable homes for rent in the example in Table 10 reflects the need for affordable homes for rent set out in Table 5 and that the demand for affordable homes for shared ownership is predominantly for smaller dwellings.

5.54 If a commuted sum in lieu of on-site affordable housing is agreed by the Council, the commuted sum will need to be paid at commencement of the development.

5.55 Outline planning applications that include a commuted sum in lieu of on-site affordable housing will include the formula for calculating the commuted sum in the Section 106 agreement, using this guidance. Full planning applications, where the market mix of residential dwellings is agreed, will state the commuted sum amount and be index linked. An example showing the commuted sum calculation for a 15-unit small greenfield scheme is set out in Table 10 below.

Table 10 Example Calculation of a Commuted Sum in Lieu of Affordable Housing on-site

Size (Bedrooms)	Size sq.m (Flats/ Houses)	Market Housing Mix		Affordable Housing Mix				Market Value	Affordable Value	Commuted Sum
				Affordable Rent		Affordable Home Ownership				
		Flat £5,400 sq.m	House £5,400 sq.m	Flat £2,970 sq.m	House £2,970 sq.m	Flat £3,780 sq.m	House £3,780 Sq.m			
1	50/58									
2	70/79	5				2		2 x 70 = 140 x £5,400 = £756,000	2 x 70 = 140 x £3,780 = £529,200	£226,800
3	86/93		10		4			4 x 93 = 372 x £5,400 = £2,008,800	4 x 93 = 372 x £2,970 = £1,104,840	£903,960
4	99/106									
5	112/119									
Total		15		4		2		£2,764,800	£1,634,040	**£1130,760**

Layout

5.56 To achieve mixed, inclusive and sustainable communities the Reasoned Justification for Policy DM2 sets out that affordable housing should:

a) Be provided in more than one single parcel except in schemes where the overall number of residential dwellings is below 15 units.

b) On sites incorporating 30 or more residential dwellings, affordable housing should be provided in groups of no more than 15% of the total number of dwellings being provided or 25 affordable dwellings, whichever is less.

5.57 If the Council accepts that there are legitimate concerns relating to the management or maintenance of predominantly flatted development, which prevents pepper potting in strict accordance with this SPD, the Council will expect the provider of the affordable housing to be given an option to opt out of any management arrangements and costs associated with the remainder of the site.

5.58 Detailed plans submitted to the Council for planning consideration should clearly show the location and layout of all affordable dwellings within the development. The affordable housing provision should not be disproportionately concentrated above any non-residential uses.

5.59 Where possible the Council requires the same level, design and layout of car parking provision to apply to affordable and market housing. As a minimum, parking provision for affordable housing must comply with Policy DM27.

Green Belt

5.60 The NPPF states when considering any planning application, local planning authorities should ensure that substantial weight is given to any harm to the Green Belt, including harm to its openness. Inappropriate development is harmful to the Green Belt and should not be approved except in very special circumstances. Paragraph 154 of the NPPF lists some exceptions where development could be appropriate, which includes limited affordable housing for local community housing needs such as a rural exception site.

5.61 Paragraph 155 of the NPPF describes the circumstances in which development in the Green Belt should not be regarded as inappropriate and this includes:

5.61.1 The development would utilise grey belt land and would not fundamentally undermine the purposes (taken together) of the remaining Green Belt across the area of the plan;
5.61.2 There is a demonstrable unmet need for the type of development proposed;
5.61.3 The development would be in a sustainable location, with particular reference to paragraphs 110 and 115 of the NPPF; and
5.61.4 Where applicable the development proposed meets the Golden Rules requirements set out in paragraphs 156-157 of the NPPF.

5.62 As part of the 'Golden Rules' for Green Belt development set out in paragraphs 156-157 of the NPPF, a specific affordable housing requirement should be set for major development involving the provision of housing, either on land which is proposed to be released from the Green Belt, or which may be permitted within the Green Belt.

5.63 The affordable housing requirement for development proposals of 10 or more dwellings on land within or released from the Green Belt will be at least 50% of housing must be affordable. The affordable housing must include 15% social rent housing, and 24.5% affordable rent capped at Local Housing Allowance levels to address priority housing needs. The remaining 10.5% can be provided as shared ownership housing.

5.64 Small sites which comprise less than 10 dwellings and/or sites of less than 0.5 hectares within Designated Rural Areas that are located within the Green Belt and adjacent to a Defined Settlement Boundary and accessible to local services and facilities will be required to comply with Policy DM2 (B).

Rural Exception Sites

5.65 In the circumstances described in Policy DM2 (B), small affordable housing developments to meet local needs will be permitted within Designated Rural Areas which would not otherwise be released for housing. These will only be permitted if it can be demonstrated that there is a proven need for the number, type and tenure of dwellings proposed, and the Council is satisfied that the affordable housing will remain affordable and exclusively available for local needs in perpetuity.

5.66 The Reasoned Justification for Policy DM2 (B) identifies the Designated Rural Areas to which Policy DM2 (B) applies.

5.67 All Rural Exception Site applicants must be accompanied by a local housing need survey which should contain the information set out in the Reasoned Justification for the Policy DM2 (B). In addition, the survey analysis should identify types of local connection that households in housing need have with a Parish to inform the proposed method for prioritising and allocating the dwellings.

5.68 If a survey of local housing need supporting an application under Policy DM2 (B) has been conducted more than four years prior to a planning application being submitted, the Council will require the housing need and affordability data to be updated to ensure the continued suitability of the proposed housing to meet local needs.

5.69 Any local housing needs survey which has been conducted more than five years prior to a planning application being submitted, will not be considered adequate to support a development proposal under Policy DM2 (B).

5.70 The Council's Housing Register provides supplementary information on households in housing need that would prefer to live in a specific Parish. The Council can also provide information on the number of existing affordable homes and vacancies that have occurred in a Parish. If requested, this information can supplement a local housing needs survey but will not substitute it.

5.71 To ensure future occupancy from within the parish-wide survey area, applicants should plan to meet, in aggregate, 50% of the identified local housing need for affordable housing.

5.72 The Rural Community Council of Essex (RCCE) employs a Rural Housing Enabler to advise and assist Parish Councils and rural communities on conducting effective local housing need surveys. The Council expects all applicants proposing Rural Exceptions Sites to work in partnership with the Rural Housing Enablers and Parish Councils to identify the local housing need.

5.73 The Council encourages all applicants proposing affordable housing on Rural Exception Sites to work with a Registered Provider that supports the work of the Rural Housing Enabler employed by the RCCE. These Registered Providers have experience in delivering affordable housing in rural areas and work within an agreed framework.

First Homes Exception Sites

5.74 On 24 May 2021, the Government published a Written Ministerial Statement that set out plans for delivery of First Homes. First Homes are a specific kind of discounted market sale housing which must:

5.74.1 be discounted by a minimum of 30% against market values;
5.74.2 can only be sold to a person or persons meeting the First Homes eligibility criteria;
5.74.3 after the discount has been applied, the first sale must be no higher than £250,000 outside of London;
5.74.4 on the first sale, a First Home will have a restriction registered on the title of the property at HM Land Registry to ensure the discount (as a percentage of current market value) and certain other restrictions are passed on at each subsequent title transfer.

5.75 The First Homes eligibility criteria is set out in NPPG and advises that a purchaser (or, if joint purchase, all purchasers) of a First Home should be a first-time buyer as defined in paragraph 6 of schedule 6Za of the Finance Act 2003 for the purposes of Stamp Duty Relief for first-time buyer. Purchasers of a First Home, whether individuals, couples or group purchasers, should have a combined annual household income not exceeding £80,000 in the tax year immediately preceding the year of purchase. A purchaser of a First Home should also have a mortgage or home purchase plan (if required to comply with Islamic law) to fund a minimum of 50% of the discounted purchase price.

5.76 As part of Section 106 agreements, local authorities can apply eligibility criteria in addition to the national criteria described above. In Chelmsford, the following additional local criteria will apply to all First Homes on initial sales and resales for a period of three months from when a home is first marketed:

5.76.1 Households with an adult that at the time of marketing the First Homes lives or works in the administrative area of Chelmsford City Council; or
5.76.2 Households with an adult that at the time of marketing the First Home is an essential local worker (as defined in the NPPF) working in the administrative area of Chelmsford.

5.77 For an adult to meet the requirement of working in Chelmsford, they must be contracted to work with a company based in Chelmsford on either a full or part-time basis.

5.78 Annex 2 of the NPPF (2023) defines Essential Local Workers as public sector employees who provide frontline services in areas including health, education and community safety such as NHS staff, teachers, police, firefighters and military personnel, social care and childcare workers.

5.79 If a suitable buyer has not reserved a home after three months, the eligibility criteria for First Homes will revert to the national criteria to widen the consumer base.

5.80 In accordance with NPPG, the local eligibility criteria will be disapplied for all active members of the Armed Forces, divorced/separated spouses or civil partners of current members of the Armed Forces, spouses or civil partners of a deceased member of the armed forces (if their death was wholly or partly caused by their services) and veterans within 5 years of leaving the armed forces.

5.81 A First Homes exception site is a housing development that comes forward outside of local or neighbourhood plan allocation to deliver primarily First Homes as set out in the First Homes Written Ministerial Statement.

5.82 First Homes exception sites must include at least 25% of the homes proposed as affordable housing for rent to meet the most acute housing needs identified on the Council Housing Register at the time a planning application is submitted. The SHNA (2023) and SHNA Addendum Report (2024) note that there is an acute need for affordable housing in the administrative area of the Council and most of the need is from households who are unable to buy or rent and therefore points particularly towards a need for rented affordable housing.

5.83 The First Homes Exception Site policy in Policy DM2 (C) cannot be applied in the Green Belt.

5.84 In the circumstances described in Policy DM2 (C), planning permission will be granted for First Homes Exception sites.

Community-led Exception Sites

5.85 National Planning Policy states that local planning authorities should support the development of exception sites for community-led development on sites that would not otherwise be suitable as rural exception sites and on land which is not already allocated for housing.

5.86 In the circumstances described in Policy DM2 (D), planning permission will be granted for Community-led Exception sites.

6 Physical Infrastructure - Highways, Access and Transport

Policy Background

6.1 Section 9 of the NPPF requires a planning system to promote sustainable transport. The provision of viable transport infrastructure necessary to support sustainable development is important in facilitating sustainable development.

6.2 Strategic Policy S9 sets out the infrastructure required to facilitate the development set out in the Local Plan. Priorities for infrastructure provision or improvements are also contained within relevant Strategic Policies and Site Allocation policies.

6.3 Strategic Policy S10 sets out that infrastructure must be provided in a timely and, where appropriate, phased manner to serve the occupants and users of the development. Where development proposals require additional infrastructure capacity to be deemed acceptable, mitigation measures must be agreed with the Council and the appropriate infrastructure providers. Such measures can include:

- financial contribution towards new or expanded facilities and the maintenance thereof;
- on-site provision (which may include building works);
- off-site capacity improvement works; and/or
- the provision of land.

6.4 In negotiating planning obligations, the Council will consider local and strategic infrastructure needs.

6.5 Chelmsford benefits from good road accessibility to London and the wider region including Braintree, Stansted, Cambridge, and South Essex. The IDP summarises the capacity issues on the current road network which cause incidents, congestion and issues with journey reliability.

Possible Section 106 Obligations

6.6 ECC is the Highway and Transportation Authority for the Chelmsford City area. Chelmsford City Council consults ECC on planning proposals that affect the highway network. ECC provides advice on the scope of obligations for highway infrastructure works where it is considered that there is a need to mitigate the impact of new development(s) on the highway network.

6.7 All development proposals will be assessed on their own merits in relation to the impact they have upon the highway network. There are no types of development which are exempt from necessary highway infrastructure obligations. There are several proposed interventions to improve active travel in Chelmsford, and it will be important to ensure alignment with these as the Local Plan progresses. Cycle and walking network routes that promote active travel and a viable alternative to the car will be a key consideration for new development. The list of possible Highways, Access and Transport contributions may include:

- Access road from the highway into the site
- Bus Priority/Chelmsford Rapid Bus Transit (ChART) Bus services, Park and Ride and infrastructure
- Contribution to Car Clubs/Care Sharing schemes
- Active and Sustainable travel routes (Walking, Cycling and Public Transport links/improvements/crossing) and other infrastructure (e.g. seating, poles, real time passenger information)
- Multimodal Cycle, Pedestrian and Public Transport bridges
- Cycle parking on-street
- Link roads
- Mobility Hubs
- New junctions and capacity improvements
- New roads
- Pedestrian crossings
- Public Right of Way
- Raised kerbs
- Signage
- Traffic Regulation Orders e.g. to impose waiting restrictions
- Traffic lights
- Travel Planning (residential, workplace, school etc)
- Electric vehicle charging point infrastructure

Timing/Trigger for payment or provision of works

6.8 The developer is required to implement the agreed highway infrastructure works in such a way that the works can be adopted by the Highway Authority once it has been agreed that they are built to an adoptable standard. In general, the developer is obliged to submit suitable detailed engineering drawings to the Highway Authority prior to any commencement of the development on site, for the Highway Authority's approval.

6.9 Unless otherwise agreed, before occupation of a development, the developer is usually obliged to implement the approved scheme, and the Highway Authority will issue a certificate of practical completion. The developer will still have responsibility for maintaining the highway works for a minimum of 12 months and to carry out any remedial works required since the issue of the certificate of practical completion. After the 12-month period, or when the remedial works have been satisfactorily completed, a certificate of adoption will be issued, and the works adopted by the Highway Authority.

6.10 Developers will be required to pay fees to cover ECC's costs incurred in approving the detailed engineering drawings, processing and advertising Traffic Regulation Orders, and for inspecting the highway works and issuing the relevant certificate. Details of these fees are to be included in the Section 106 Agreement. A Section 278 Agreement under the Highways Act 1990 between the developer and the Highway Authority is the preferred mechanism for securing alterations or improvements to the public highway and is separate to a Section 106 Agreement. The full details of the processes will be set out in any relevant Section 106 or Section 278 Agreements.

6.11 ECC has published the 'Transport Assessment Guide for Large-Scale Developments and Garden Communities: A Guide for Developers' and a 'Travel Plan Guide for Large-Scale Developments and Garden Communities: A Guide for Developers'. These Guides relate to large-scale development of 1,000 residential units and/or 250+ employees delivered by one individual developer or delivered cumulatively by multiple residential developers and/or developments of high complexity/high potential highway and transport impacts (determined by the Highway Authority) A Transport Assessment Inception Meeting and Scoping Fee is required to be paid by the developer at the very outset of the process, once the need for a Transport Assessment has been established. The fees cover ECC's staff time in supporting the Pre-Application / Scoping Phase.

6.12 ECC staff time in supporting the Travel Plan process will be secured through developer contributions with set fees to be paid by the Developer, to ECC, with regards to the scoping; evaluation; and monitoring and support of Travel Plans.

Maintenance Payments

6.13 Where the infrastructure includes items with the possibility of a major maintenance requirement e.g. traffic signals or where the works are beyond the usual ECC specification, the Highway Authority requires a commuted sum from the developer to maintain that infrastructure. Where the Highway Authority takes assets from developers, there is a requirement for maintenance costs for the life of the assets, and replacement costs at the end of their useful life. Further information on this matter is available in ECC's Guide to Infrastructure Contributions (Revised 2024, Section 5.5).

Further Information

Insurance

6.14 Where a developer intends to carry out works to/in the public highway they will be required to provide third party insurance.

Bonds

6.15 Developers will be required to enter into a bond for an amount specified by the Highway Authority to ensure that the highways works are completed to the Authority's satisfaction, should the developer default on any of its obligations in relation to the works. This bond will vary depending on the work required. The bond can be a formal bond with an approved third-party surety, or it can be a deposit in cash to ECC as the Highway Authority.

6.16 Land compensation bonds will be required where there is a possibility of existing properties being affected by new highway development, e.g. by increased noise resulting from new highway development, including the possibility of a reduction in value.

7 Physical Infrastructure - Flood Protection and Water Management/Efficiency

Policy Background

7.1 Section 14 of the NPPF deals with the challenge of climate change, flooding and coastal change. It states that the planning system should support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change.

7.2 Strategic Policy S2 states that the Council will require that all development is safe, considering the expected life span of the development, from all types of flooding and appropriate mitigation measures are identified, secure and implemented. New developments should not worsen flood risk elsewhere.

7.3 Strategic Policy S4 sets out that new development will be expected to incorporate well connected, multi-functional network of green and blue infrastructure that protects, enhances and restores ecosystems and allows nature recovery across the Council's area. It also sets out that the Council will ensure that new development does not contribute to water pollution and where possible enhance water quality and water-related biodiversity taking account of Water Framework Directive objectives and River Basin Management Plan actions.

7.4 Strategic Policy S9 confirms that new development should be safe from all forms of flood risk and that strategic and/or site-specific measures may be needed to achieve this. As part of the Flood Resilience Partnership, the City Council and the Environment Agency are working together to devise main river, city centre and catchment-wide measures to safeguard Chelmsford City Centre.

7.5 Strategic Policy S10 clarifies that planning permission will only be granted if it can be demonstrated that there is enough appropriate infrastructure capacity to support that development or that such capacity will be delivered by a proposal and that such capacity is sustainable over time.

7.6 Strategic Policy S11 recognises the important function of the areas around the main river valleys both in terms of distinctive landscape qualities as well as flood storage. Policy DM18 sets out that planning permission for all types of development will only be granted where it can be demonstrated that the site is safe from all types of flooding and the development does not worsen flood risk elsewhere. It also provides detailed flood protection and water management requirements where development is proposed within areas of flood risk. It also states that planning permission for all types of development will only be granted where it can be demonstrated that the site is safe from all types of flooding. All major developments will be required to incorporate water management measures to reduce surface water run-off and ensure that it does not increase flood risk elsewhere.

7.7 In considering proposals for development the Council will follow a sequential risk-based approach, including the application of the 'exception test' which should consider flood risk from all sources when considering whether development in that location is appropriate.

7.8 Policy DM25 requires all new dwellings to achieve a water efficiency standard of 90 litres/person/day and to provide integrated water management techniques to optimise rainwater harvesting on site to minimise overall water consumption and maximise its reuse.

7.9 Level 1 and Level 2 Strategic Flood Risk Assessment (SFRA) for Chelmsford was published in February and May 2024 respectively. Some new and updated Level 2 site assessments were also published in January 2025 and November 2025. The Level 1 SFRA states that the main sources of flood risk in Chelmsford are fluvial (rivers), sea and surface water. There are numerous recorded flooding incidents across Chelmsford, predominantly in the vicinity of the City Centre.

Possible Section 106 Obligations

7.10 Areas of flood risk include risk from all sources of flooding such as rivers and the sea, directly from rainfall onto the ground surface and rising groundwater, overwhelmed sewers and drainage systems and from other water bodies. The agencies responsible for different sources of flooding are set out in the Infrastructure Delivery Plan.

7.11 In Chelmsford the principal sources of flood risk are from its rivers, the tidal River Crouch at South Woodham Ferrers, ground water and storm rainfall giving rise to extreme levels of surface water run-off.

7.12 The development strategy for Chelmsford seeks to avoid development in areas which are prone to flooding. Flood risk mitigation will need to be considered on a site-specific basis and respond to the conclusions of the Level 2 Strategic Flood Risk Assessment work for Chelmsford. The Level 2 Strategic Flood Risk Assessment includes detailed assessments of the site allocations in the Pre-Submission Local Plan and Focused Consultation Additional Sites Document.

7.13 In relation to fluvial flooding, the main watercourses associated with fluvial risk to the sites are the River Chelmer, River Can, River Crouch, and Sandon Brook. There are also other smaller watercourses and drainage channels presenting a fluvial risk to sites across Chelmsford - developers are likely to need to undertake detailed modelling to inform site-specific Flood Risk Assessments for these sites.

7.14 As part of the Flood Resilience Partnership, the Council and the Environment Agency are working together to devise main river, city centre and catchment-wide measures to safeguard Chelmsford City Centre. A series of flood resilience interventions along the main rivers, within the city centre and wider river catchment area are proposed. The precise locations of interventions are not yet determined however this has been included in the IDP and an indicative cost estimate has been identified based on discussions with the Environment Agency.

7.15 New development is likely to increase the risk of surface water flood risk, as the extent of built-up areas and the area of impermeable hard surfacing increases, meaning that mitigation measures such as Sustainable Drainage Systems (SuDS) are essential to reduce and manage the surface water flood risk. Additionally, the increase in runoff may result in more flow entering watercourses, increasing the risk of fluvial flooding downstream. In addition, climate change predictions indicate that the likelihood and frequency of surface water flooding will increase and this increase in risk must be considered when planning for new development within the administrative area. This is particularly important in those locations identified as Critical Drainage Areas.

7.16 As the Lead Local Flood Authority, ECC has produced a Surface Water Management Plan for the urban area of Chelmsford (2018). The Essex SuDS Design Guide (February 2020) sets out practical guidance for new development to promote SuDS. SuDs are most viable when considered early in the design process, so developers are required to engage in pre-application discussions with ECC (as Lead Local Flood Authority), and refer to ECC's SUDS Design Guide, and any future updates, when preparing applications incorporating SuDS schemes. ECC only adopts SuDS in exceptional circumstances and further guidance is contained in ECC's SuDS adoption policy.

7.17 All development proposals will be required to incorporate sustainable drainage principles and best practice for surface water management. This provides wider opportunities to propose flood alleviation schemes together with SuDS and green infrastructure inclusion to promote further green areas, strong green links to existing environment and benefit the community with use of multifunctional space.

7.18 There may be instances where individual sites come forward for development, which in turn raises issues of flood risk or water management. If these cannot be addressed on site or by way of condition, it is anticipated that a Section 106 Agreement may be needed. These may need to alleviate any/all forms of flood risk and such techniques could include:

- Flood alleviate controls - new or enhanced provision such as flood plains, levees, reservoirs
- Bio-retention areas
- Wetlands Channels Detention
- Basins ponds
- Infiltration/filtration
- Green roofs
- Permeable paving
- Rainwater harvesting

Timing/Trigger for payment or provision of works

7.19 There is no general rule for the timing of payments as each scheme will be judged on a case-by-case basis. Should off-site work be required, it is expected these would be in place prior to the first occupation or completion of the development.

Maintenance Payments

7.20 Where ECC is not the SuDS adoption body, the Council will work with developers to identify an alternative SuDS adoption body which could include a Water Authority or private management company. The Council will work with the developer to secure the long-term maintenance of all flood risk protection and water management through a combination of planning obligation, planning condition and commuted sum payment, guaranteeing their long-term maintenance.

8 Green and Blue Infrastructure - Recreation and Leisure

Policy Background

8.1 The NPPF states that the planning system has an important role in facilitating social interaction and creating healthy, inclusive and safe places. Safe and accessible green infrastructure and sports facilities make an important contribution to the health and well-being of communities. The Council recognises the important role community facilities such as social, sports and leisure, parks and green spaces, have in existing and new communities. These forms of infrastructure are highly valued and play a key role in the administrative area's sense of place and identity.

8.2 Strategic Policy S4 requires a well-connected multifunctional network of green and blue infrastructure that enhances the natural environment and improves water-related biodiversity, as well as providing amenity interest.

8.3 Strategic Policy S5 states that new facilities will be accessible to the community and secured by a range of funded measures, including planning obligations.

8.4 Strategic Policy S9 sets out that infrastructure necessary to support new development must provide or contribute towards ensuring a range of green and natural infrastructure. It also details a range of community facilities required to support new development, including sport leisure and recreation facilities.

8.5 Strategic Policy S10 describes some of the mitigation measures that will be required where additional infrastructure capacity is required. Strategic Policy S14 sets out how health and wellbeing can be encouraged and improved through high quality planning, design and management of the environment, including through the provision of open spaces.

8.6 Strategic Policy S17 sets out how City Centre developments should provide areas of functional open and green spaces for residents in the area.

8.7 When delivering new community facilities, Policy DM20 seeks to ensure that these facilities are accessible by sustainable modes of transport, physically compatible in form and appearance with their surroundings and cater for people with disabilities.

8.8 Policy DM24 embeds requirements for multifunctional public open space, to provide opportunities to promote healthy living and improve health and wellbeing and create attractive multi-functional public realm in the design and place shaping of new major developments.

8.9 Policy DM26 and Appendix B of the Local Plan provide further requirements for the provision of open space that applies to all new dwellings.

8.10 As part of the evidence base for the Local Plan, the Council has undertaken:

- Chelmsford City Council Open Space Study 2024, which covers all types of open space. It includes new open space standards which are set out in Appendix B of the Local Plan.

- Chelmsford City Council Playing Pitch and Outdoor Sports Assessment and Strategy 2024 which covers all outdoor sports requirements for both winter and summer sports. Sport England's Playing Pitch Calculator and Sports Facility Calculator are used alongside this strategy to help estimate the demand that may be generated for the use of playing pitches and outdoor sports facilities by a new population.

- Chelmsford City Council /Indoor Sports Assessment and Strategy 2024, which covers the indoor needs assessment and indoor sports strategy. Alongside the Assessment, Sport England's Playing Pitch Calculator and Sports Facility Calculator have been used to arrive at the recommendations in the Strategy.

Possible Section 106 Obligations

Open Space

8.11 Local Open Space in its entirety should be provided in accordance with the requirements of the site policies and Appendix B of the Local Plan. It may include:

- Allotments
- Children's play and youth facilities
- Cycle and footway links and improvements
- Informal local open space or amenity green space.

8.12 Strategic Open Space in its entirety should be provided in accordance with the requirements of the site policies and Appendix B of the Local Plan. It may include:

- Country Park
- Natural green space
- Outdoor sport and changing facilities
- Parks, Sport and Recreation grounds

8.13 New facilities should seek to offer flexible uses and combine facilities and services which might have historically been provided on a separate basis.

8.14 Access and quantity standards for the study for different types of open space are summarised in table 14 of Appendix B of the Local Plan and table 15 of Appendix B provides the quantity standard for accessible Local Open Space and Strategic Open Space.

8.15 Paragraph B.29 of Appendix B of the Local Plan converts the quantity of standards in table 15 to a dwelling requirement of 29 sqm per dwelling for Strategic Open Space, 43 sqm of Natural and Semi-natural open space, and a Local Open Space requirement of 22 sqm per dwelling, producing a total requirement of 94 sqm per dwelling. The proportions of different types of open space within the overall quantum should reflect the proportions contained within the quantity standards unless a different approach is agreed with the Council.

8.16 Table 16 of Appendix B of the Local Plan provides the thresholds for on or off-site provision of open space and is replicated below in Table 11:

Table 11 Thresholds for on or off-site provision of open space

Size of Scheme	Provision
Less than 10 dwellings	No provision required on site
10-29 dwellings	Accessible Local Open Space required at 22 sqm per-dwellings
30 dwellings or more	Accessible Local Open Space required onsite at 22 sqm per-dwelling Strategic Open Space required on-site at 29 sqm per-dwelling Natural and Semi-natural greenspace required on-site at 43 sqm per-dwelling

8.17 Where provision is not required on-site, or the Council considers a commuted sum in lieu of on-site provision is acceptable, the following calculations will apply:

Table 12 Local Open Space Formula – commuted sum in lieu of on-site provision

Type of Open Space	Description	(A) Quantity standards (ha/1,000 population)	(B) Rate per Ha	(C) Contribution per 1,000 population (A x B)	(D) Rate per person (C/1,000)	(E) Rate per dwelling (D x 2.4)
Accessible Open Space						
Allotments	Opportunities to grow own produce	0.30	1,450,966.50	435,289.95	435.29	1,044
Amenity Green Space	Opportunities for informal activities close to home, work or enhancement of the appearance of residential or other areas	0.53	251,660.25	133,379,93	133.389	320
Play Space (children)	Areas designed primarily for play and social interaction involving children	0.05	139,259,25	13,925.93	13.93	33
Play Space (youth)	Areas designed primarily for play and social interaction involving young people	0.05				
Total		0.93	£1,841,886	£582,595.81	£582.61	£1,397

8.18 The Local Open Space formula is based on the 'Chelmsford Open Space Study 2024', the Spons External Works, Landscape Price Book, Council Maintenance DATA, Valuation Office, Play Equipment Manufacturers. A maintenance contribution is set out in each of the rates per hectare based on the cost of maintaining all the categories of open space set out above where a commuted sum in lieu of on-site provision of local open space is acceptable. The rate per hectare has been re-based to 2024 rates and will be inflated annually in accordance with the BCIS PUBSEC Tender Price Index of Public Sector Building Non-Housing Indices.

8.19 In all cases the calculations are based upon an occupancy rate of 2.4 people per dwelling (Census 2021).

8.20 Where a proportion of on-site provision is made, a pro-rata reduction will be made in calculating the level of the off-site contribution.

8.21 Financial contributions in lieu of on-site provision for Local Open Space may be spent on one or more of the infrastructure items listed in the above table as 'Accessible Open Space'.

Table 13 Strategic Open Space Formula – commuted sum in lieu of on-site provision

Type of Open Space	Description	(A) Quantity standard (ha/1,000 population)	(B) Council Rate per Ha	(C) Contribution per 1000 population (A x B)	(D)Rate per per person (C/1000)	(E) Rate per dwelling (D x 2.4)
Parks and Recreation Grounds	Parks, formal gardens and recreation grounds, open to the general public. Accessible, high-quality opportunities for informal recreation and community events.	1.23	£293,391.49	£360,871.53	£361	£866
Natural and Semi-natural greenspace	Woodland (coniferous, deciduous, mixed) and scrub, grassland (e.g. down-land, meadow) heath or moor, wetlands (e.g. marsh, fen) wastelands (including disturbed ground), barerock habitats (e.g. quarries), commons and Local Nature Reserves. Many sites are intentionally without ancillary facilities to reduce misuse/inappropriate behaviour whilst encouraging greater flora and fauna. A site threshold of 0.2ha is generally applied.	1.80	£251,660.25	£452,988.45	£453	£1,087
Total						£2,051

8.22 The Natural Green Space formula is based on the 'Chelmsford Open Space Study 2024 the Spons External Works, Landscape Price Book and Council Maintenance Data.

8.23 The contribution for 'Park and Recreation Grounds' is based on average capital costs (excluding land acquisition) incurred by the Council for new parks and informal recreation facilities at 2025, excluding playing pitches and outdoor sports facilities, which are separately calculated using Sport England's Playing Pitch Calculator and Sports Facility Calculator and identified in the IDP.

8.24 The dwelling rate is based on the calculation of how much strategic open space is required per dwelling, as set out in the Local Plan, using the quality standard for accessible local open space and strategic open space identified in the Chelmsford Open Space Study 2024.

8.25 Early engagement with the Council is recommended to ascertain the exact type of open space required if not set out in the IDP.

Waterways

8.26 Where development has a direct impact upon, or a close connection with the main waterways in the City area, particularly the Chelmer and Blackwater Navigation System, contributions may be required to improve facilities and access to the rivers. Such contributions will be considered on a case-by-case basis and could include:

8.26.1 the extension of riverside walks and cycle paths to improve accessibility;

8.26.2 additional greenspaces adjoining rivers and waterways;

8.26.3 the provision of boat porterage facilities, to enable canoes etc. to access the rivers;

8.26.4 improvements to moorings, towpaths and other navigational infrastructure such as bridges and locks;

8.26.5 ensuring better access to the waterways;

8.26.6 creating attractive river frontages and/or riverside terraces;

8.26.7 greening the engineered canalized sections of the river

8.26.8 increasing local connections to the footpath and cycle way network; removal of non-native invasive species;

8.26.9 removal of hard ban reinforcement/revetment or replacement with soft engineering solution.

Indoor Sports Facilities

8.27 Indoor sporting facilities are not a statutory service that local authorities are required to provide, however provision must still be ensured through the plan-making process for sports and leisure facilities.

8.28 The 2024 Indoor Sports Assessment and Strategy will be used to determine how existing provision needs to be improved or expanded and where new provision is required because of new development. Sport England's Facility Calculator has been used to estimate the likely quantity of badminton courts and swimming lanes required to meet additional demand generated by new development and the cost associated with additional facilities. These requirements are set out on a site-by-site basis in the IDP using Appendix 2 of the 2024 Indoor Sports Assessment and Strategy and Action Plan.

8.29 New secondary schools should include sports halls that are upgraded for community use and with secure community access.

8.30 For indoor facilities other than swimming pools and sports halls, the calculation of facility requirements including dedicated sports facilities arising from new housing development relies on the finding of the Chelmsford 2024 Indoor Sports Assessment. The identified need for dedicated sports facilities including a new indoor tennis facility, enhanced gymnastics facilities and improved indoor bowls facilities will be identified in the IDP when a strategy to meet these needs has been developed and costed.

Outdoor Sports Facilities

8.31 The 2024 Playing Pitch and Outdoor Sports Assessment and Strategy will be used to determine how existing provision needs to be improved or expanded and where new provision is required because of new development.

8.32 The 2024 Playing Pitch and Outdoor Sports Assessment and Strategy uses Sport England's Playing Pitch Calculator to estimate the additional pitch and tennis court requirements generated by housing sites in the Local Plan and the likely developer contribution generated. Where available, site-specific information has been incorporated into the IDP and will be kept under review.

8.33 Where it is determined that new provision is required within a development, priority will be placed on providing facilities that contribute towards alleviating existing shortfalls within the locality using the 2024 Playing Pitch and Outdoor Sports Assessment and Strategy. The preference is for multi-pitch and potentially multi-sport sites to be developed, supported by a clubhouse and adequate parking facilities which consider the potential for future Artificial Grass Pitch development.

Maintenance Payments

8.34 Maintenance contributions will be required for all open space provided on-site when responsibility for the long-term maintenance resides with Chelmsford City Council. This will be calculated according to the landscape layout and quantified elements to be provided by the developer and will be required for 25 years after completion.

8.35 The Council's preference is for all open spaces to be transferred to and adopted by the Council with a commuted maintenance sum. If a developer chooses to retain open space, it should be maintained by a recognised not-for-profit management trust. Where appropriate, and following negotiation between the relevant parties, open space can also be transferred to a Parish or Town Council.

8.36 Adoption of local open space would take place after any construction and development maintenance liability periods have expired. The local open space needs to be safe and fit for public use, in accordance with prevailing safety and public use standards at the time of adoption.

8.37 Adoption of strategic open space would take place after any construction and development maintenance liability period has expired. The strategic open space needs to be safe and fit for general public use, in accordance with prevailing safety and public use standards at the time of adoption.

8.38 As part of the adoption process, land ownership will then be transferred to the Council by appropriate conveyancing processes.

8.39 In the event of handover to the Council, sports turf areas and facilities require the sports turf to be appropriately established, but final sports use layout and preparations for public sports use such as linework and similar will be undertaken by the Council.

8.40 Should a developer wish to self-manage open space, the Council require public access agreements and an agreed maintenance specification and inspection regime, secured through a legal agreement. In addition, the Council would require a conditional performance bond issued by a reputable financial institution in favour of the Council, to a specified indexed linked amount calculated in reference to Tables 14 and 15. This would enable the Council to call upon the bond in the event of the owner of the open space becoming financially unviable or failing to comply with its management and maintenance obligations under the Section 106 agreement.

8.41 The financial contribution per dwelling towards the maintenance of Local Open Space transferred to the Council or a Parish or Town Council is set out in Table 14 and the IDP where relevant for developments where no landscaping scheme has been provided to the Council.

8.42 Where a landscaping scheme has been provided, the Council will provide the maintenance costs for the specific scheme based on the landscape plan showing the layout and functionality of the open space. The calculation will be based on estimate maintenance costs based on similar or equivalent locations and grounds maintenance unit costs at the time the landscape scheme is submitted. The annual maintenance sum will be calculated over a 25-year period including an allowance for inflation based on Bank of England rates and the City Council's investment factors applicable at the time. The commuted sum will be secured in a Section 106 agreement at the consent stage and transferred to the Council upon adoption of the open space.

Table 14 Local Open Space Formula – commuted maintenance sum

Type of Open Space	(A) Quantity standards (ha/1,000 population)	(B) Rate per Ha	(C) Contribution per 1,000 population (A x B)	(D) Rate per person (C/1,000)	(E) Rate per dwelling (D x 2.4)
Accessible Open Space					
Allotments	0.30	£10,855.04	£3,256.51	£3.26	£7.82
Amenity Green Space	0.53	£162,825.70	£86,297.62	£86.30	£207.11
Play Space (children)	0.05	£162,825.70	£8,141.29	£8.14	£19.54
Play Space (youth)	0.05	£162,825.70	£8,141.29	£8.14	£19.54
Total	0.93	£499,332.14	£113,978	£105.84	£254.01

8.43 The annual maintenance amount varies for each type of open space and has been re-based to 2024 costs.

8.44 The amount of financial contribution towards the maintenance of Strategic Open Space transferred to the Council or Parish or Town Council is set out in Table 15 and the IDP where relevant for development where no landscaping scheme has been provided to the Council.

8.45 Where a landscaping scheme has been provided the Council will provide the maintenance costs for the specific scheme calculated in accordance with the relevant paragraphs above. Unless exceptional circumstances apply, no public open space is adopted without a commuted sum for maintenance.

Table 15 Strategic Open Space Formula – commuted maintenance sum

Type of Open Space	(A) Quantity standard (ha/1,000 population)	(B) Council Rate per Ha	(C) Contribution per 1,000 population (A x B)	(D) Rate per person (C/1,000)	(E) Rate per dwelling (Dx 2.4)
Parks and Recreation Grounds	1.23	£273,872.83	£336,863.58	£336.86	£808
Natural and semi-natural greenspace	1.80	£28,946.80	£52,104.23	£52.10	£125
Total					£1,054

8.46 The annual maintenance amount varies for each type of open space and has been re-based to 2025 using average costs incurred by the Council for parks and informal recreation space. The maintenance costs associated with playing pitches will be calculated separately using Sport England's Playing Pitch Calculator which provides lifecycle costs that are list separately in the IDP where relevant.

Timing/Trigger for payment or provision of works

8.47 In the case of a large-scale development, it may be that the payments or provision would be phased to meet the proportional impact of each phase. Trigger points for payments or provision will be included in the legal agreement, as will the period in which any contribution will have to be spent.

9 Green and Blue Infrastructure - Environmental Mitigation

Policy Background

9.1 Paragraph 187 of the NPPF seeks to conserve and enhance the natural environment by protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils. It seeks for the planning system to recognise the intrinsic character and beauty of the countryside and wider benefits from its natural ecosystems, maintain the character of the undeveloped coast, minimise impacts on and provide net gains in biodiversity. The planning system should prevent new and existing development from contributing to, being put at unacceptable risk from, or being adversely affected by, unacceptable levels of soil, air, water or noise pollution and land instability. Remediating and mitigating despoiled, degraded, contaminated and unstable land are other ways of enhancing the environment.

9.2 Paragraph 193 of the NPPF states that where significant harm to biodiversity resulting from a development proposal cannot be avoided, adequately mitigated, or, as a last resort, compensated for, planning permission should be refused.

9.3 Strategic Policy S1 applies a series of Spatial Principals to ensure the Local Plan focuses growth in the most sustainable locations as well as securing the enhancement and extension of the City's green infrastructure resources.

9.4 Strategic Policy S2 seeks to mitigate and adapt to climate changes through several measures aimed at enabling future development to move to a net zero carbon future. This includes through protecting and providing opportunities for well-connected multifunctional green and blue infrastructure including city greening, woodland creation, tree planting and new habitat creation.

9.5 Strategic Policy S4 sets out that new development will be expected to incorporate multi-functional green spaces including providing biodiversity net gain (minimum of 10% and 20% at garden communities) which protects, enhances and restores ecosystems and allows nature recovery. It also includes a requirement for new development to not contribute to water pollution and where possible enhance water quality.

9.6 New developments will need to maximise opportunities for the preservation, restoration, enhancement and connection of natural habitats in accordance with the Local Nature Recovery Strategy and the Council's Green Infrastructure Strategic Plan. Contributions from qualifying residential developments within the Zones of Influence, as defined in the adopted Essex Recreational disturbance Avoidance and Mitigation Strategy (RAMS), will be secured towards mitigation measures identified in the RAMS. Major developments (defined as sites of 10 or more dwellings) may also be required to provide or contribute towards additional recreational mitigation measures to address stand-alone impacts of the proposal as identified in DM16. This will be informed by a review of the RAMS and SPD which is expected to be completed in 2026 and/or project level HRAs.

9.7 Strategic Policies S9 and S10 require new development to provide or contribute towards a range of multi-functional green, blue and natural infrastructure, nature recovery, net gain in biodiversity and public realm improvements.

9.8 The protection and promotion of ecology, nature and biodiversity in new developments including mitigation measures identified in the RAMS and biodiversity net gain requirements are set out in Policy DM16.

9.9 The protection of trees, woodland and landscape features are set out in Policy DM17, as well as the requirement for three new trees per net new dwellings for all new housing development.

9.10 Policy DM18 specifies that Sustainable Drainage Systems should be multi-functional to deliver amenity, recreational and biodiversity benefit for the built, natural and historic environment as well as providing water management measures.

9.11 The sustainability requirements the Council expects of dwellings and non-residential buildings is set out in Policy DM25, whilst the requirement for development to avoid unacceptable levels of pollution emissions from noise, light, smell, fumes, vibrations and other issues unless appropriate mitigation measures can be put in place, is set out in Policy DM29.

9.12 Policy DM31 lists the requirements for development to achieve net zero carbon development in operation.

Possible Section106 Obligations

9.13 Any environmental mitigation measures will be considered on a site-by-site basis. Most issues will be localised and are likely to be small scale where it is appropriate to deal with them by way of planning conditions. There may be circumstances where schemes require environmental mitigation measures to be included within a Section 106 Agreement.

9.14 The Council has declared a Climate and Ecological Emergency to focus attention on reducing carbon and greenhouse gas emissions in the area and to plan for a more sustainable future.

9.15 The Council's Climate and Ecological Emergency Action Plan includes undertaking a greening programme to significantly increase the amount of woodland and the proportion of tree cover in Chelmsford.

9.16 The Council requires all residential development to plant at least three new trees for every new home in the Local Plan to assist in the Climate and Ecological Emergency. In most cases the planting of new trees should take place in landscaped areas maintained as part of the public realm. On some sites it may be possible to include trees within large private gardens providing there is sufficient space to allow the tree to grow and flourish during its normal expected lifetime.

9.17 Where it is not practicable to plant trees on-site, a commuted sum of £300 per dwelling will be used towards the following:

- Woodland planting – 2 square metres per new dwelling, planted as whips on sites identified as suitable for woodland planting; and
- Individual trees – 1 tree per new dwelling planted as heavy standards, generally 12 – 14 cm girth at 1m up the stem. These will be planted as street trees, or in a park or other open spaces including highway verge.

9.18 The figure of £300 per new dwelling is based on:

- Woodland planting - £4 per sqm for the cost of planting and aftercare for mass woodland planting (excluding land purchase); and

- Individual trees - £292 per semi-mature tree (excluding land purchase). The cost estimate assumes the trees will be staked and equipped with a watering bag and intensively care for, including regular watering for three seasons after planting.

9.19 The financial contribution of £300 per new dwelling will be sought and can either be paid in advance before planning permission is granted or secured through a planning obligation. When only part of the tree planting provision is achieved on-site, the commuted payment will be calculated based on £100 per missing tree and contributions pooled to deliver tree planting where funding is sufficient and alternative suitable locations available.

9.20 The Council has a 10-year woodland and tree planting aspiration to plant 192,000 new trees, creating 92 additional hectares of woodland/tree cover. To help meet this aspiration, the Council will seek to use commuted sums in the way described above on land already in the Council's ownership. In exceptional circumstances, the Council will consider a proposal for planting on land not in its ownership, where there is a willing landowner on land that lies adjacent to the development site, and this arrangement would help screen new development and/or enhance existing green infrastructure.

9.21 Woodland planting will be native species, UK grown and sourced and selected from the following:

Field Maple (Acercampestre), Common Alder (Alnus glutinous), Downey Birch (Betula pubescens), Hornbeam (Carpinus betulus), Hazelnut (Corylus avellane), Hawthorn (Crataegus monogyna), Wild Privet (Ligustrum vulgare), Crab Apple (Malus sylvestris), Cherry Plum (Prunus cerasifera), Blackthorn or Sloe (Prunus spinosa), English Oak (Quercus robur), Goat Willow or Pussy Willow (Salix caprea), Guelder Rose (Viburnum opulus), Dog Rose (Rosa canina), Scots Pine (Pinus sylvestris), English Yew (Taxus baccata), Holly (Ilex aquifolium) and Wild service tree (Sorbus torminalis).

9.22 Individual tree species will generally be native with some exceptions to non-native, but in parks settings where a specimen tree is appropriate some more exotic stock may be used. The native stock includes English oak (Qurcus robur) and lime (Tilia x europaea). The non-native stock includes Norway maple (Acer plantanoides) and London plane (Platanus x hispanica). More exotic stock includes Sweet gum (Liquidambar styraciflua), Dawn redwood (Metasequoia glyptostroboides), Giant sequoia (Sequoiadendron giganteum), Indian bean tree (Catalpa bignonioides) and ornamental maple trees (Acer).

9.23 On-site trees will be required by planning conditions to be watered and protected. Council planted trees will be staked and equipped with a watering bag. They will be intensively cared for, including regular watering for at least three seasons after planting, until established.

9.24 The Council will monitor the number of new trees planted or funded through commuted sums to ensure compliance with the Chelmsford Climate and Ecological Action Plan. Applicants will be asked to complete the template below as part of their proposed landscaping scheme submitted with their planning application:

Category	No. of trees to be removed from the sites (LOSS)	No. of trees to be planted on site (GAIN)	No. of trees on site NET/OTHER
Existing trees			
Proposed tree removals (if applicable)			
Trees planted as compensation for existing tree loss			
New tree planting – individual trees on-site			
Total			
Is there a need for a contribution towards new tree planting off-site (Y?N) Is this a partial or full contribution (partial/full)			

9.25 Planting relating to commuted sums received in lieu of on-site provision will be recorded in the annual Infrastructure Funding Statement, where relevant.

9.26 Proposals for biodiversity net gain must take into account local priorities set out in the Local Nature Recovery Strategy which guides the delivery of biodiversity net gain projects in Essex, the Essex Green Infrastructure Strategy and Standards, and the Chelmsford Green Infrastructure Action Plan as well as be informed by a comprehensive understanding of habitats and species associated with a site.

9.27 The Council expects the requirements for biodiversity net gain to be provided within the application site boundary and to be secured for a minimum of 30 years after completion of the development. Where possible the Council will aim to secure biodiversity net gain for the lifetime of development. The Council will only consider off-site provision or the purchase of off-site biodiversity units if it can clearly be demonstrated that biodiversity net gain cannot be adequately achieved onsite. A Habitat Management and Monitoring Plan (HMMP) will be required where there are significant on-site enhancements or where net gain is to be delivered off-site. The HMMP must demonstrate how the land will be managed for a minimum period of 30 years from the completion of the development. The Council would encourage, where possible, securing

biodiversity net gain for the lifetime of development.

9.28 Off-site measures will be expected to be in reasonable proximity to the development, strategically located for nature conservation and be informed by local and national guidance and data. Early discussions with the Council and Essex Local Nature Partnership are encouraged if off-site provision is necessary.

9.29 The purchase of statutory Biodiversity Credits as a mechanism to achieve biodiversity net gain will only be considered as a last resort.

9.30 Biodiversity net gain proposals and where necessary, Habitat Management and Monitoring Plans, will be secured by a condition and/or legal agreement. This will include a requirement to cover the Council's costs associated with the long-term monitoring of the biodiversity net gain proposals.

9.31 Mitigation measures for protected sites (including SANG) can count towards BNG requirements as long as at least 10% of the biodiversity units come from additional activities other than mitigation and compensation. SANG provision must also demonstrate how through appropriate design and implementation that suitable habitats will be achieved to secure a genuine biodiversity uplift beyond Natural England's minimum SANG standards. Any additional features provided for BNG purposes should not conflict, and ideally complement, with the principal purpose of the SANG.

9.32 The RAMS provides a mechanism for local planning authorities to comply with their responsibilities to protect habitats and species in accordance with the UK Conservation of Habitats and Species Regulations 2017. Measures required to mitigate the impacts of recreational disturbance on European Protected Sites will be delivered as detailed in the RAMS and the Essex Coast RAMS SPD.

9.33 The Essex Coast RAMS SPD provides the scope of RAMS; the legal basis for RAMS; the level of developer contributions being sought for strategic mitigation and how and when applicants should make contributions.

9.34 Environmental matters which may be included in a Section 106 Agreement include, but are not limited to:

- Biodiversity offsetting
- Biodiversity net gain
- Major contamination issues
- Ecological mitigation/remediation
- Climate change mitigation, including tree planting and new woodlands
- Environmental enhancements
- Archeological investigations, access and interpretation
- Repair and re-use of buildings or other heritage assets

9.35 Further guidance on matters relating to biodiversity, which should be borne in mind when considering a site and preparing a planning application, is set out in ECC's Developers' Guide to Infrastructure Contributions (Revised 2024).

9.36 Some cases may require payments; other cases may require the details of mitigation measures to be included in an agreement so that a robust legal mechanism is in place to ensure appropriate mitigation is carried out. Each site will be considered on its own merits.

Timing/Trigger for payment or provision of works

9.37 The cost of such mitigation measures will normally be covered in full by the developer. Any contamination matters will usually be required to be dealt with fully prior to commencement of any development.

9.38 Environmental mitigation will largely be required to be carried out prior to the commencement of the development, with some further work being complete prior to first occupation of the development. Some further environmental issues may require ongoing mitigation to take place. Where the development cannot fully mitigate its impact on these environmental matters, compensatory measures may be sought. This will only be sought where all other avenues of mitigation have been exhausted. The appropriate level of contribution will be considered on a case-by-case basis.

Further Information

9.39 The Chelmsford Green Infrastructure Strategic Plan 2018 – 2036 provides a framework for the planning and management of Chelmsford's Green Infrastructure resources both in terms of the protection of its integrity and enhancement to the benefit of residents, workers and visitors considering the significant scale of growth to be accommodated over the duration of the Local Plan. The Essex Green Infrastructure Strategy (2020) and the Essex Green Infrastructure Standards (2022) champion the enhancement, protection, and creation of an inclusive and integrated network of green spaces. from a multifunctional perspective, combining uses such as sustainable drainage, public open space, walking and cycling routes and biodiversity conservation to combine functional uses with amenity benefits

10 Community Infrastructure - Early Years, Childcare and Education

Policy Background

10.1 As set out in paragraph 100 of the NPPF, the Government attaches great importance to ensuring that a sufficient choice of school places is available to meet the needs of existing and new communities. Non-statutory guidance for local authorities for education to support housing growth and developers' contributions is provided in the Department for Education publication – 'Securing developer contributions for education,' (August 2023).

10.2 Strategic Policy S5 recognises that an important element of sustainable development is the provision and protection of community uses such as schools.

10.3 Strategic Policies S9 and S10 set out the infrastructure required to support new development, including early years education and childcare, primary, secondary, and post 16 education provision and how to secure the infrastructure and mitigate impact.

10.4 Policy DM20 focuses on the accessibility of new community facilities by sustainable modes of transport and to the multitude of users that will access them. Policy DM22 seeks to protect existing education establishments, support their extension/expansion, and only permit their change of use if they are surplus to educational requirements.

10.5 Section 106 obligations will include obligations to provide suitable land and/or financial contributions towards additional school places in accordance with Policy S10.

Possible Section 106 Obligations

10.6 Chelmsford will see significant growth over the plan period. New early years, co-located with primary education, and standalone childcare provision, primary, secondary and SEND education are required to be provided on-site in various strategic locations. In all cases, the developer will provide the land or provision within the built form at the development and a proportion of the build cost generated from the need for places. The remainder of the cost will potentially be covered through pooled Section 106 contributions. If it is not planned to build a new school or nursery, financial contributions will be used to fund capital works to add additional capacity at schools, or existing nurseries in the appropriate area.

10.7 Where the need for new schools or nurseries is identified against a site, other sites that benefit may be required to contribute towards both land and build costs as pooled Section 106 contributions.

10.8 The IDP provides details of the contribution form for specific items of early years, childcare and education infrastructure for each site referenced in the Local Plan. It includes pooled Section 106 contributions towards the expansion of existing primary and secondary education in specific locations to address needs arising from sites identified in the Local Plan.

10.9 The Essex School Organisation Service's 10 Year Plan, 'Meeting the demand for school places in Essex', is published on an annual basis and sets out the forecasted availability of school places in Chelmsford. The need for additional school places to serve new development may vary over time. It is considered reasonable to take account of the future demand for places as well as

the current picture since: there will be a time lag between the planning application and completion of the development; the peak of additional demand for places generally comes a few years after a development is first occupied and the development will be a permanent feature of the local community and it should not cater just for its immediate impact.

10.10 ECC's Developer's Guide to Infrastructure Contributions (Revised 2024) provides information on Education contributions, which incorporates early years and childcare, primary, secondary, post 16 and Special Educational Needs. The Guide provides information on how the need for additional school and early years places are assessed; how to calculate demand from new housing development and additional site requirements. The Guide also provides information on ECC's statutory responsibility to make suitable travel arrangements free of charge for eligible children, which depending on the location of a development, may require a developer contribution.

10.11 A new all-through secondary school, including primary and early years, will be required on-site to support strategic growth at Chelmsford Garden Community (Location 6). New all-through secondary school, or a secondary school co-located with primary school and early years and childcare will be required at East Chelmsford Garden Community (Location 16). New co-located primary schools with early years and stand-alone early years and childcare nurseries are also required and identified in relevant site policies.

10.12 Site specific contributions for early years, childcare and education are set out in the IDP.

Provision of works

10.13 Details of the criteria that any new school or pre-school site must meet and requirements for the provision of land for new facilities are set out in the ECC's Developers' Guide to Infrastructure Contributions and the `Garden Communities and Planning School Places Guide'. This sets out the ECC approach to delivering new schools and ensuring there are sufficient pupil places to serve large new settlements that are planned. The `Local and Neighbourhood Planners' Guide to School Organisation explains how ECC will help develop local and neighbourhood plans to ensure there are sufficient school places from new developments.

10.14 The ECC Developers' Guide to Infrastructure Contributions (Revised 2024) provides details of how school sites should be laid out, including the environment around schools (Appendix D). On Strategic Sites, adherence to an approved Design Code may also be required. The Essex Design Guide (2018) provides a School Design Checklist and criteria, which provides further advice on how schools should be designed to encourage community access outside of school hours.

10.15 It should be noted that Sport England's Strategy includes goals relating to schools opening up, or keeping open, their sports facilities for local community use. Schools can potentially offer sports halls, studios, activity rooms, fitness facilities, swimming pools (as well as outdoor courts, grass pitches, artificial grass pitches) for community use. It should be recognised that the specification of sports facilities for School use and Community use can differ however, so enhancements may be required on a standard school specification to ensure community use. Consideration of ancillary facilities such as changing, WC, circulation, floodlighting and car parking facilities is also required. Sport England also offers a range of Design Guidance and advice to maximise the public benefit of community use of sport facilities on education sites. Where appropriate Section 106 Agreements will seek to secure community use of school facilities, and a

separate contribution will be levied for this purpose

10.16 The Indoor Sports Assessment and Strategy (2024) produced to support the review of the Local Plan states that new secondary schools should include Sport England design compliant sports halls.

11 Community Infrastructure – Health, Community Safety, Cohesion and Social Wellbeing

Policy Background

11.1 Paragraph 96 of the NPPF states that planning policies and decisions should aim to achieve healthy, inclusive and safe places by enabling and supporting healthy lifestyles and promoting community safety, cohesion and social interaction.

11.2 An important element of enabling and supporting healthy, safe and cohesive communities is the provision and protection of community uses, such as health, policy, fire and rescue, ambulance and recreation and the access populations have to the environments and infrastructure that supports community health, safety, cohesion and well-being. Strategic Policy S5 requires the protection and enhancement of community assets whilst Strategic Policy S4 requires a well-connected multifunctional green and blue infrastructure network, helping to promote health and wellbeing.

11.3 Strategic Policies S9 and S10 state that new development must provide a range of infrastructure including essential primary, acute and community healthcare provision and ambulance facilities and wellbeing facilities and measures that mitigate the impact of new development.

11.4 Strategic Policy S14 seeks to ensure that future development proposals go further to support improvements in health and wellbeing of residents and communities, promote active and healthier lifestyles and reduce health inequalities. The policy also requires certain developments to undertake a Health Impact Assessment, making recommendations on how positive health impacts could be maximised and negative impacts on health and inequalities avoided or mitigated.

11.5 Strategic Policy S16 seeks to ensure that future development proposals maximise opportunities for active and sustainable travel with well-designed walking and cycling networks.

11.6 Strategic Policy S17 promotes a City Centre that multifunctional green routes and improvements to the recreational potential of the waterways and their associated green spaces.

11.7 Policy DM20 provides the requirements for community facilities for planning permission to be granted and Policy DM24 requires the built form and design of new development to provide opportunities to promote healthy living and improve health and wellbeing through the provision of walking and cycling and provision of multifunctional green infrastructure, including open space.

11.8 The Council implements the 'Livewell' accreditation scheme to recognize developers for their contributions to health and wellbeing. This is based on a two-stage assessment using the HIA criteria and a review by the Essex Quality Review Panel.

Possible Section 106 Obligations

11.9 New healthcare, policy, fire and rescue and ambulance infrastructure, which includes health and well-being measures, will usually be required through Section 106 agreements. This could include investment in existing premises or services if the proposed development generates the need for a new facility or service.

Primary Healthcare

11.10 Chelmsford is served by the Mid and South Essex Integrated Care System which provides health and social care across Braintree, Maldon, Chelmsford, Castle Point, Rochford, Southend, Thurrock, Basildon and Brentwood. It is made up of two main committees:

- Mid and South Essex Integrated Care Board – a statutory NHS organisation responsible for developing a plan to meet the health needs of the population, managing the NHS budget and arranging for the provision of health services in Mid and South Essex.

- Mid and South Essex Integrated Care Partnership – a statutory committee concerned with improving health, care and wellbeing of the population.

11.11 As an upper tier local authority, ECC has a responsibility for public health and wellbeing, to achieve lifestyle enhancements and behavioural change within the local community.

11.12 The Mid and South Essex Integrated Care Board has identified additional primary healthcare infrastructure and investment required to support delivery of the Local Plan. These projects have been set out in the IDP.

11.13 Within Growth Area 1, there is an existing deficit of primary care capacity, and this will be increased by proposed growth. The additional capacity required in Growth Area 1 cannot be provided by reconfiguration or extension of existing primary care premises and so there is likely to also be a requirement for a new build facility within this Growth Area. A site and delivery mechanism for this provision will need to be identified and Section 106 contributions will be sought to meet this need from all development sites located in Growth Area 1.

11.14 Within Growth Area 2, there is an existing deficit of primary care capacity, and this will be increased by proposed growth. New build facilities are proposed at Location 6 (North East Chelmsford Garden Community), and this is subject to a separate IDP. Section 106 contributions will be sought to meet this need from all development sites located in Growth Area 2.

11.15 At Location 7a (Great Leighs – Land at Moulsham Hall), a 1,000m2 medical centre is proposed as part of the hybrid planning applications which are pending on the site (Ref: 23/01583/OUT and 23/01583/FUL). The Integrated CB has confirmed that the proposed facilities at Location 6 and 7a should provide the capacity to accommodate increases in patient growth in Growth Area 2.

11.16 Within Growth Area 3, there is an existing deficit of primary care capacity, and this will be increased by proposed growth. The additional capacity required in Growth Area 3 cannot be provided by reconfiguration or extension of existing primary care premises and so there is likely to also be a requirement for a new build facility within this Growth Area. Section 106 contributions will be sought to meet this need from all development sites located in Growth Area 3. This will be partly required to support the development at Location 16 – East Chelmsford Garden Community although it is noted that the scale of development at this location alone wouldn't alone require a complete new 'full size' (1,000m2 surgery) but the demand it would create could not be accommodated at existing surgeries.

11.17 Where a small number of large sites generate the need for a new primary healthcare facility or service, such as a new GP surgery and other new healthcare infrastructure and services, the cost of this provision will be secured through pooled section 106 agreements and the location of the facility identified through the master planning and planning application process.

11.18 Section 106 resources may also be sought to fund health and wellbeing across the population and encouraging self-care, where there is on-site need. This includes digital and technological approaches.

11.19 Early contact should be made with Planning and Public Health teams within the council to discuss the application proposed and local Health Impact Assessment requirements.

Ambulance Services

11.20 Ambulance Services within Chelmsford are provided by the East of England Ambulance Services NHS Trust. They have identified that a new purpose-built Hub is required in Chelmsford before 2040 as there is no room to expand at the current location on Chelmer Valley Road. This requires circa 1ha of land for new build or an existing building 25,000sq ft (2,300sqm), close to Broomfield Hospital and major road links, with sufficient space to accommodate 35 Dual Staffed Ambulances/Rapid Response Vehicles and appropriate staff parking. Off-site contributions of land and/or financial contributions have been included in the IDP as either a Section 106 contribution, which would be applicable to all net new dwellings, or a CIL funded project. When the land and scheme is more advanced, the IDP will be updated to show a single delivery mechanism.

Police Services

11.21 Policing for Chelmsford is provided by Essex Police, under the direction of the Police, Fire and Crime Commissioner (PFCC) for Essex. Key priorities for the PFCC are set out in the Police and Crime Plan 2024-2028 which was published in April 2024.

11.22 Essex Police is an essential social infrastructure provider, whose operational capacity will be impacted by the increased demand on its services arising from planned housing and population growth. Developer funded police infrastructure/facilities will be required to mitigate and manage the increase in crime to persons and property arising from this growth, and to enable an appropriate level of community safety, cohesion and policies to be provided. Indicative costs have been included in the IDP as either a Section 106 contribution, which would be applicable to all net new dwellings, or a CIL funded project. When the requirements are more advanced, the IDP will be updated to show a single delivery mechanism.

Fire and Rescue Services

11.23 Essex County Fire and Rescue Service (ECFRS) is an essential social infrastructure provider, whose operational capacity will be impacted by the increased demand on its services arising from planned housing and population growth. Developer funded fire and rescue infrastructure/facilities will be required to mitigate and manage the increase in prevention, protection and response activities, including the increased number of incidents, increased attendance times and changes in the incident risk profile. Contributions are identified on a site-by-site basis in the IDP.

11.24 The timing for the provision of such healthcare, police, ambulance and fire and rescue facilities or financial mitigation will be considered on a case-by-case basis, with the specific requirements being set out within any Section 106 Agreement. It is likely to be linked to phases of development, with facilities being required either upon a certain level of units being completed, or when a certain threshold of occupation at a development is reached.

Timing/Trigger for payment or provision of works

11.25 Such facilities should be provided once a proportion of a proposed development is occupied, which is usually towards the latter end of the development's occupation. This will vary depending on the scale of development and will be agreed as part of a Section 106 Agreement.

12 Community Infrastructure – Social and Community Facilities

Policy Background

12.1 Paragraph 98 of the NPPF seeks to deliver social, recreational and cultural facilities and services needed by the community. It requires planning authorities to plan positively for the provision and use of shared space, community facilities and other local services to enhance the sustainability of communities and residential environments.

12.2 Strategic Policies S5, S9 and S10 recognise the important role community assets have in communities, set out the infrastructure required to support new development, including community buildings and space, and require appropriate infrastructure capacity to support new development is secured though several measures including on-site provision. This includes waste management, particularly in relation to the Chelmsford Garden Village.

12.3 Strategic Policy S14 requires new strategic scale residential development to consider opportunities for community involvement in the long-term management and stewardship of the new development.

12.4 Strategic Policy S17 sets out how planning policy can create conditions for resilience to future change and evolution and innovation in retail, leisure, entertainment and cultural development.

12.5 Policy DM20 sets out the justification for obligations relating to any community facilities that are required because of new development in the Chelmsford City area.

Possible Section 106 Obligations

12.6 Chelmsford is served by a broad range of community facilities that are spread across the geography of the authority. The IDP summarises the need for social and community infrastructure to meet demand for youth services, libraries, community halls and cemeteries.

12.7 Cemetery provision is fairly evenly distributed across the administrative area and the need for additional cemetery provision is driven by the requirement for burial demand and capacity. The existing Chelmsford Cemetery will be full by 2026 and there are ongoing plans to construct a new cemetery and modern crematorium within Chelmsford as outlined in 'Our Chelmsford, Our Plan' (2023) with a site already identified. The indicative cost of the proposal is just under £11 million and has been included in the IDP as either a Section 106 contribution, which would be applicable to all net new dwellings, or as a CIL funded project. As the proposal advances, the IDP will be updated to show a single delivery mechanism. .

12.8 For large scale strategic development of 500+ new residential units the Council may require the provision of indoor space which provides flexible use for the community. Such facilities should consider:

- The inclusion of a multi-use space for community groups and clubs to use, e.g. Village Halls which are sufficiently sized and designed to cater for multi-purpose health and fitness activities. Flooring material and air handling/ventilation are examples of the types of considerations that will enable successful, sustainable activities in a community hall environment. The 2024 Indoor Sports Assessment notes that whilst demand for village hall/community centre space is high, most community centres have some spare capacity.
- A flexible `satellite' service including space for library use may be sought within shared community buildings in the new garden communities. Funding via CIL will be used to enhance and extend existing library services and facilities where required.
- Flexible workspace supporting the creating sector where relevant.
- The ability, or otherwise, of nearby existing facilities to serve the community.
- The individual needs and requirements of the locality.

12.9 Any community hall provision included as part of these neighbourhood centres will be provided directly on site by the developer as part of the comprehensive masterplanning of relevant sites:

12.10 As part of the Section 106 Agreement a nominated partner or organisation will be required to be identified as the future operator/manager of the building or space. This can be a Parish Council, Charity, stewardship vehicle or other community group.

Timing/Trigger for payment or provision of works

12.11 Such facilities should be provided once a proportion of a proposed development is occupied, which is usually towards the latter end of the development's occupation. This will vary depending on the scale of development and will be agreed as part of a Section 106 Agreement.

12.12 Provision of floor space for community facilities will be required to ensure that as the Garden Communities populations grow, there will not be pressure on community buildings' availability when needed the most.

13 Community Infrastructure - Public Realm and Public Art

Policy Background

13.1 Section 12 of the NPPF states that the creation of high-quality buildings and places is fundamental to what the planning and development process should achieve. Planning policies and decisions should ensure that developments function well, are visually attractive, sympathetic to local character, establish a strong sense of place and sustain an appropriate amount and mix of development.

13.2 Enhancements to public realm, landscaping measures and attention to architectural detail are all important features that the Council wishes to see included in new development. Providing new public realm will continue to be an important catalyst for change as new schemes have been instrumental in the revitalisation of the City Centre. Public art is the principle of involving artists in the conception, development and transformation of a site or location, making an important contribution to the character and visual quality of the area. Artists can deliver public art in many ways, including being part of development teams alongside architects, engineers and designers, and undertaking residencies based in particular locations or with community groups. The Council is committed to the provision of public art within development and in the public realm.

13.3 Strategic Policies S5, S9 and S10 recognise the important role community assets have in communities, set out the infrastructure required to support new development, including cultural facilities and public art, and require appropriate infrastructure capacity to support new development is secured through several measures including on-site provision.

13.4 Strategic Policies S16 and S17 recognise that placemaking for all development is at the heart of achieving well connected and sustainable communities. In the City Centre, improvements along opportunity corridors will reinforce and create character or identity and positively contribute to increased footfall, activity and vibrancy.

13.5 Policies DM20 and DM24 are key policies which set out the justification for obligations relating to Public Art and Public Realm improvements that are required because of new development within the Chelmsford City area.

Possible Section 106 Obligations

13.6 For developments large enough to have public space within the site, most matters will be covered by planning conditions. Each case will be considered on its individual merits.

Public Realm Provision

13.7 Section 106 Agreements may require the following issues to be addressed in respect of on-site and off-site public realm improvements:

- Improvements to paving and planting on public highway and other space directly adjoining the site or a financial contribution towards the required off-site improvements
- Bespoke planting and any associated paths and boundary treatment directly relating to the site
- Where a development site is adjacent to a public space and requires direct mitigation e.g. to link the public space into the development or replacement boundary treatment to open space.
- City centre public realm enhancements
- Street lighting in vicinity of development sites
- Community facilities that contribute to the quality of the public realm (i.e. public seating in the city centre, other street furniture, public toilets)
- Conservation restoration and enhancement of the historic environment
- Access and use restrictions/assurances
- Adoption of improvement
- Financial arrangement for their management.

Public Art

13.8 On smaller schemes Public Art is likely to be dealt with by way of planning conditions. It may be required to be secured via a Section 106 Agreement in the following circumstances:

- All developments with a threshold of 10 or more dwellings
- All developments with a floor space of 1,000sqm of more

13.9 Where there is an obligation to deliver public art within a Section 106 agreement, the Council will expect the delivery of public art in accordance with the agreement and for this responsibility not to be transferred to the City Council.

Timing/Trigger for payment or provision of works

Public Realm

13.10 Development will not normally commence until the developer has submitted and received written approval for a Public Realm Scheme from the Council. Developers will be required to illustrate what parts of the scheme are to be offered for adoption. For the parts of the scheme that will be offered for adoption, there is a requirement for a developer to design and construct the area of Public Realm to a design and specification agreed by the Council. It will then be transferred to the appropriate Council (Parks or Highways) once it is in an adoptable condition. Upon transfer, a commuted maintenance payment will be required to cover the initial costs of maintaining the Public Realm. The Section 106 agreement will also put in place measures to agree the management and maintenance of any unadopted areas. Public realm improvements will usually be required to be completed prior to the first occupation of a development.

13.11 Once the scheme has been implemented and the Council are satisfied the scheme is acceptable, a Certificate of Practical Completion will be issued, and a 12-month maintenance period will commence. At the end of this maintenance period a Certificate of Adoption will be issued. It will then be transferred to the relevant Council, and a commuted maintenance payment will become payable. The amount will vary from site to site depending on the materials used and cost of maintaining the area of Public Realm. The maintenance period shall cover a period of 15 years with details of the appropriate payment for this being set out in any Section 106 Agreements.

Public Art

13.12 The commissioning of public art works should involve professional art organisations and include stakeholder and community engagement. A written public art statement, explaining the commissioning process, artist briefs and budget should be in place prior to commencement of the development. The completion date for public art will vary depending on the nature of the development, the type and the location of the art works, but will usually be expected to be completed prior to the first occupation of a development.

13.13 Place Services lead the delivery of ECC's Public Art Strategy to ensure the work and skills of artists feature in the structures and functioning of new development, either as part of an ECC funded programme, through liaison with Districts, City and Borough Councils, or by acting as expert consultants for privately funded development. As these arrangements range from district to district, early consultation is strongly recommended. Contact Place Services at www.placeservices.co.uk or email enquiries to enquiries@placeservices.co.uk.

14 Community Infrastructure – Waste Management

Policy Background

14.1 Section 2 of the NPPF states that to achieve sustainable development the planning system has three overarching objectives – economic, social and environmental. They are interdependent and need to be pursued in mutually supportive ways to secure net gains. The environmental objective includes minimising waste and pollution.

14.2 The NPPF is clear that there should be sufficient provision for strategic infrastructure such as waste management.

14.3 Strategic Policy S9 states that new development must be supported by the provision of infrastructure, services and facilities that are identified as necessary to serve its needs. This includes municipal waste and recycling facilities. Policy DM4 states that the Council will seek to retain Class E(g), B2 and B8 Use Classes or other sui generis uses of a similar employment nature unless it can be demonstrated that there is no reasonable prospect for the site to be used for these purposes. Waste management facilities are generally considered as sui generis.

14.4 A key aim of the Council's Climate and Ecological Emergency Action Plan includes reducing carbon emissions, lowering energy consumption, reducing waste and pollution as well as improving air quality, greening Chelmsford, increasing biodiversity and encouraging sustainable and active travel.

14.5 Recycling and waste collection provision for houses, apartments and flats are set out in Appendix B of the Local Plan.

14.6 New developments should have regard to the Council's Making Places Supplementary Planning Document (SPD) and be compliant with the Chelmsford City Council Recycling and Waste Collection Policy applicable at the time. This can be found on the Council's website.

14.7 Overall, development should seek to reduce waste and increase reuse and recycling in accordance with the waste hierarchy.

14.8 ECC acts as both the Minerals and Waste Planning Authority as well as the Waste Disposal Authority for Essex. As the Waste Planning Authority for Essex, it has specific responsibilities for strategic and waste land-use planning policy. This includes the preparation of the Waste Local Plan, the determination of planning applications for the management of waste and for ensuring compliance with planning permissions, for the disposal of Local Authority Collected Waste and for places to be provided for households to deposit their household recycling and waste.

14.9 Chelmsford City Council is the Waste Collection Authority for Chelmsford City and has a statutory responsibility to provide a waste collection service to householders and local businesses. Resource and waste reforms, introduced by Government in 2024 set the national context for waste management policy and activities. These include 'Simpler Recycling' and new regulations such as the Separation of Waste (England) Regulations 2024 which set out the requirements or the collection and treatment or disposal of waste materials. These are embodied in the Council's published Recycling and Waste Collection.

14.10 In 2024 the Essex Waste Partnership (representing the waste disposal authority and the twelve waste collections authorities in Essex) agreed a new Waste Strategy for Essex for the period 2024 to 2054. This replaces the Joint Municipal Waste Management Strategy for Essex previously agreed and reflects the changes in direction and approach driven by the provisions of the Environment Act 2021. Delivery of the Waste Strategy for Essex will be supported by cross Essex action plans focused on short, medium, and long-term plans for the provision of improved waste management services and associated infrastructure, as well as behaviour change. It is not a locational strategy and does not consider the number of facilities required or the capacity of an individual facility. Any plans for new or expanded waste infrastructure will emerge during the detailed action planning phases once the strategy has been adopted.

Possible Section 106 Obligations

14.11 The current depot facilities, vehicle workshops and waste transfer station operated by the City Council are at capacity. Additional capacity will be required to meet anticipated current demand and planned future growth. The site currently being used is constrained, being unable to increase capacity any further. The preferred approach for the City Council is for the acquisition of a site where a new, larger waste management facility and depot can be constructed to manage both current anticipated demand and planned future growth. Off-site contributions of land and/or financial contributions to meet the estimate costs of this project have been included in the IDP as either Section 106 contributions, which would be applicable to all net new dwellings, or a CIL funded project. When the location and project costs are more advanced, the IDP will be updated to show a single delivery mechanism.

14.12 Early engagement with the waste collection and waste disposal authorities is recommended to ensure that onsite waste management arrangements are designed appropriately.

14.13 ECC will seek contributions towards improvements at Essex Recycling Centre for Household Waste or municipal waste treatment sites, as per the ECC Developers' Guide to Developers Contributions 2024 or update, to deliver capacity, access or other identified requirements to support usage because of planned growth.

14.14 Contributions will be required in respect of the new Garden Communities to support development of local waste management infrastructure to deliver the operational integrity of the waste management system. The level of contributions requested will be assessed on a case-by-case basis following evaluation of infrastructure capacity within the locality prior to development, and an operational needs assessment and will be used to mitigate the impact of these large residential sites.

14.15 The East Chelmsford Garden Community (Location16) will be required to undertake a Waste Infrastructure Impact Assessment as part of a planning application given its proximity to the Chelmsford Wastewater Treatment Plant. A Site Waste Management Plan is also required to address the key issues associated with sustainable management of waste including waste reduction/recycling/diversion targets and monitoring processes. Waltham Road Employment Area (Location 9a) will also be required to undertake a Waste Infrastructure Impact Assessment as part of a planning application as a metal recycling business operates on the site.

Timing/Trigger for payment or provision of works

14.16 On-site waste facilities should be provided before the development is occupied.

14.17 Off-site contributions towards waste facilities should be provided once a proportion of a proposed development is occupied, which is usually towards the latter end of the development's occupation. This will vary depending on the scale of development and will be agreed as part of a Section 106 agreement.

15 Economic Infrastructure – Employment and Skills

Policy Background

15.1 Section 2 of the NPPF states that achieving sustainable development the planning system has three overarching objectives – economic, social and environmental. Skills levels are a key determinant of sustainable local economy. Increased skills and employability will enable residents to take advantage of opportunities created by new development.

15.2 Strategic Policy S8 demonstrates the Council's commitment to ensure that the Local Plan balances jobs and housing growth. A key part of this is improving local skills and access to employment opportunities through Employment and Skills Plans.

15.3 The Council expects all planning applications for 50 or more homes or employment space providing 2,500 sqm (Gross Internal Area) or more floor space to enter an Employment and Skills Plan to provide employment and skills opportunity to benefit the local community.

Possible Section 106 Obligation

15.4 Employment and skills plans will normally be secured through a section 106 obligation and be expected to increase employability levels and workforce numbers through:

- Apprenticeships
- Work experience
- Volunteering
- Careers information and training

15.5 The plan should include options for direct delivery or skills and employability programmes that include school / college engagement.

15.6 An Employment and Skills Plan will be produced in consultation between the developer, landowner, the Council and ECC. It must be agreed and secured through a Section 106 agreement/planning condition.

15.7 Further information, including templates for Employment and Skills Plans, are set out in the ECC Developers Guide to Infrastructure Contributions (2024).

Timing/Trigger for payment or provision of works

15.8 The Section 106 agreement will set out what the developer will need to do by way of providing information about progress against Employment and Skills Plan objectives. It will also contain a provision for a financial compliance payment that will be required if the Council is satisfied that the developer has not been using reasonable endeavours to deliver the target employment opportunities set out in the Employment Skills Plan. Further details on this penalty clause are provided in the appendix of the ECC Developers Guide to Infrastructure Contributions (2024).

16 Implementation of this Planning Obligations SPD

16.1 The Council has tested the viability of a range of site types that are most likely to come forward over the new plan period.

16.2 The Local Plan Viability Update 2023), uses Residual Value Methodology to assess the impact of meeting all the Council's policy requirements, including CIL at the current rate, and different levels of developer contributions on a range of development typologies. The Residue Value is the combined value of complete development less the cost of creating the asset, including a target profit margin. If the residual value exceeds the existing use value by a satisfactory margin, a scheme is judged to be viable.

16.3 The results of the Viability Study show that in most cases, the residual value exceeds the existing use value by a satisfactory margin indicating that most development likely to come forward under the Local Plan is viable and will be able to bear the range of developer contributions and CIL at the adopted, and subsequently indexed, rate.

16.4 Typically, the use of further viability assessments at the decision-making stage should not be necessary. It is up to the applicant to demonstrate whether circumstances justify the need for a viability assessment at the application stage.

16.5 Where an applicant formally requests the Council to consider a reduced level of planning obligations for a scheme it will need to demonstrate that either:

- The development proposed is wholly different in type to those used in the latest Local Plan Viability Update
- Further information on infrastructure or site costs is required
- Types of development are proposed which significantly vary from standard models of development for sale, or
- A recession or similar significant economic change has occurred since the latest Local Plan Viability Update.

16.6 Where a viability assessment is submitted to accompany a new planning application this should be based upon and refer to the typologies of development tested and the standardised inputs in the latest Local Plan Viability Update. The applicant must:

a) Explain and provide evidence of any changes since the latest Local Plan Viability Update was conducted.

b) Explain and provide full supporting evidence to substantiate any departures from the standardised inputs of the latest Local Plan Viability Update – in the case of build costs this will require a detailed breakdown of costs provided by an appropriate professional.

16.7 Failure to provide a – b above, will result in the Council giving no weight to the applicants' viability assessment. A full viability report prepared by the applicant should be submitted with the planning application.

16.8 Once submitted, this report (including scheme viability statements, appraisals and relevant information) will be considered and assessed by the Council and an independent viability advisor appointed by the Council with reasonable agreed costs borne by the applicant.

16.9 Any viability assessment should reflect the government's recommended approach to defining key inputs as set out in National Planning Guidance.

16.10 Essex Planning Officers Association (EPOA) has produced a Viability Protocol that sets out overarching principles for how Essex Local Planning Authorities will approach development viability. The protocol does not alter Local Plan policies or the guidance in this SPD but does provide additional advice and guidance on the information requirements and approach taken when assessing viability at the decision-making stage. The EPOA Viability Protocol is available to download at https://www.essexdesignguide.co.uk/supplementary-guidance/essex-planning-and-viability-protocol/

16.11 The assessment will define land value for any viability assessment based on the existing use value of the land, plus a premium for the landowner. Under no circumstances will the price paid for land be a relevant justification for failing to accord with relevant policies in the Local Plan.

16.12 The weight to be given to a viability assessment is a matter for the Council, having regard to all circumstances, including any changes since the Local Plan was brought into force, and the transparency of assumptions behind evidence submitted as part of the viability assessment.

16.13 If the viability report submitted by the Applicant fails to satisfy the Council that a reduced level of contributions should be applied or that the level of planning contributions that the development can viably support cannot mitigate the impact of the proposed development, then the planning application will be refused.

16.14 Where the level of planning contributions that the development can viably support cannot mitigate the impact of the proposed development, the development will need to wait until development values improve, land values can be re-negotiated, or alternative funding sources can be secured. If delayed development is not an option, applicants will be encouraged to consider their profit margins to see if the development could proceed with slightly reduced returns.

16.15 If the Applicant can demonstrate, to the satisfaction of the Council, that the scheme cannot be fully compliant and remain financially viable, the Council may consider a reduced level of contributions in one or more areas. In these circumstances, the Council will seek to protect and prioritise contributions for affordable housing for rent to address the critical need for this tenure of accommodation to tackle rising levels of homelessness, as identified in the housing crisis declared in February 2022. When a reduced level of contribution is accepted, measures will be included in the Section 106 agreement to ensure that the Council will benefit from improved contributions if viability improves over time.

16.16 The Council will apply the following formula as part of a review mechanism to calculate the surplus profit available for reduced contributions. A worked example is also provided below:

Surplus profit calculation:

X = Review Contribution

X = ((((A + B) – C) – ((D + E) - F)) – P) – G) * 0.6

Where:

A = Actual Gross Development Value (£)

B = Estimated Gross Development Value (£)

C = Application Stage Gross Development Value (£)

D = Actual Build Costs (£)

E =Estimated Build Costs (£)

F =Application Stage Build Costs (£)

P =(A + B – C) * Y

Y = Owner's Profit as a percentage of Gross Development Value as determined at the time the Planning Permission was granted being seventeen point five per cent (17.5 %)

G = Deficit (£)

Notes:

(A + B - C) represents the change in Gross Development Value from the date of the Planning Permission) to the Review Date.

(D + E – F) represents the change in Build Costs from the date of the Planning Permission to the Review Date.

P represents Owner's Profit on change in Gross Development Value (£)

0.6 represents sixty per cent (60%) of any Surplus to be used by the Council for the reduced contributions, after the Owner's Profit (P) and Deficit has been deducted.

Worked Example for Surplus Profit Calculation

X = Review Contribution

X = ((((A + B) – C) – ((D + E) - F)) – P) – G) * 0.6

Where: A =	Actual GDV (£)	6,774,600
B =	Estimate GDV (£)	1,090,000
C =	Application Stage GDV (£)	-7,452,000
D =	Actual Build Costs (£)	3,000,000
E =	Estimate Build Costs (£)	760,000
F =	Application Stage Build Costs (£)	3,660,111
P =	(A + B – C) * Y	72,205
Y =	Owner's Profit as a percentage of GDV as determined at the time the planning permission was granted being 17.5%	
G =	Deficit (£)	226,408
X = (((((6,774,600 + 1,090,000) - 7,452,000) - ((3,000,000 + 760,000) - 3,660,111)) - 72,205) - 226,408)*0.6		
X = ((((7,864,600 - 7,452,000) - (3,760,000 - 3,660,111)) - 72,205) - 226,408)*0.6		
X = (((412,600 - 99,889) - 72,205) - 226,408)*0.6		
X = ((312,711 - 72,205) - 226,408)*0.6		
X = (240,506 - 226,408)*0.6		
X = 14,298 * 0.6		
X = 8,458.80		

Drafting of Section 106 Agreements

16.17 Section 106 Agreements will be drafted by the Council's Legal Services team, or by external solicitors acting on behalf of the Council. Applicants will be required to pay the Council's reasonable costs incurred in drafting and completing the agreement or the costs of external solicitors acting on behalf of the Council, where relevant. In most cases ECC provides a first draft of the clauses required to deliver contributions it has requested. A template agreement is provided in Appendix A of ECC's Developers' Guide to Infrastructure Contributions (Revised 2024).

16.18 Straightforward obligations which normally require only a financial contribution and/or planning obligations on one party only will be the subject of a Unilateral Undertaking. A Unilateral Undertaking will be prepared or approved by the Planning Contributions Officer or, where appropriate, the Council's Legal Service team. Applicants will be expected to meet the Council's reasonable costs incurred in preparing or approving an Undertaking.

16.19 In all circumstances where a legal agreement is required, the applicant will be expected to provide details of land ownership at the beginning of the application process. These should be copies of the Title document and plan obtained within the preceding three months from the Land Registry, or if the land is unregistered, copies of the most recent conveyance.

Financial Contributions

16.20 Where a financial obligation is necessary, payment would normally be required on commencement or on first occupation of a development. However, in the case of a large-scale development, it may be that the payments would be phased to meet the proportional impact of each phase. Trigger points for payments will be included in the legal agreement, as will the period in which any contribution will have to be spent. Section 3.2 of ECC's Developers' Guide to Infrastructure Contributions (Revised 2024) provides further guidance for larger, phased development regarding contributions requested by ECC.

16.21 It is reasonable to expect that, when contributions are paid to the Council the monies will be held in an interest-bearing account. Those financial contributions (excluding commuted payment relating to maintenance) that are paid to the City Council and remain unspent at the end of 10 years from the date when the money was paid will be returned to the payee in accordance with the terms of the individual agreements, unless they relate to infrastructure items that are required beyond 2036.

Index Linking

16.22 The quantum of Section 106 financial contributions will be re-assessed at the point of planning application and fixed from the point of planning permission. All Section 106 financial contributions that are subject to indexation, will be calculated from the point of planning permission and end with the date each payment becomes due. The calculation will be based on the published index (indices) at the point of calculation divided by the index number at the date of the Section 106 agreement, multiplied by the contribution amount stated in the planning obligation, unless stated otherwise in Table 16 below. If a commuted sum is required for maintenance purposes, this will be assessed at the point of planning application and fixed from the point of planning permission.

16.23 The CIL charging rate is fixed in the CIL Charging Schedule and indexed on the 1st of January each year based on the RICS Community Infrastructure Levy (CIL) Index, published in the preceding November.

16.24 A summary of whether indexation applies, and the index used for the most common financial contributions is set out in Table 16 below:

Table 16 Indexation Applied to Financial Contributions

Contribution Type	Index Linked Y/N	Index Applied/Notes
Affordable Housing	Y	BCIS All-In Tender Price Index
CCC Monitoring Fees	N	
CIL	Y	CIL index number at the date of the planning permission divided by the index number at the date of adoption of the CIL Charging Schedule multiplied by the CIL rate set out in the CIL Charging Schedule.
ECC Monitoring Fees	N	
Education	Y	BCIS PUBSEC Tender Price Index of Public Sector Building Non-Housing Indices.
Healthcare	Y	Retail Price Index.
Maintenance (of any kind)	N	
Open Space	Y	BCIS PUBSEC Tender Price Index of Public Sector Building Non-Housing Indices.
Public Realm	Y	BCIS PUBSEC Tender Price Index of Public Sector Building Non-Housing Indices.
RAMS	Y	Retail Price Index calculated using the relevant published implementation guidance.
Specialist Residential Accommodation	Y	BCIS All-In Tender Price Index
Travel Plan	Y	Consumer Price Index (CPI) (see latest

Monitoring Fee/Smarter Choices Monitoring		published ECC developers guide).
Tree Planting	Y	BCIS PUBSEC Tender Price Index of Public Sector Building Non-Housing Indices.
* **ECC** applies different indexation indices to different types of infrastructure. Further guidance is provided in Section 3.3 of ECC's Developers' Guide to Infrastructure Contributions (Revised 2024).		

Monitoring and Enforcement of Obligations

16.25 Monitoring obligations will be undertaken by the Council's Planning Contributions Officer to ensure that all obligations entered are complied with by both the developer and the Council.

16.26 In cases where developers have difficulty making payments at the appropriate times as required by the legal agreement, the Council will work with the developer to find a solution. This may involve the payment of an obligation at a later stage in the development, or payment by installments. However, where it is imperative that the relevant measure is in place prior to a development being occupied, the obligation to fund it will always become payable on commencement.

16.27 If enforcement of financial obligations fails then the Council will use the relevant legal channels to remedy this, and the party in breach will be liable for any legal costs incurred by the Council.

Monitoring Fees (excluding affordable housing obligations)

16.28 A monitoring fee will be charged where Section 106 agreements include covenants to the Council. A charge of £350 per obligation type will be levied for each phase of the development containing the obligation. For example, a charge of £350 will be applied to monitoring planning obligations securing local open space. If the local open space is provided in three phases on a new development site, a total monitoring fee of £1,050 will apply to the local open space provisions secured through a Section 106 agreement. These charges exclude affordable housing obligations, which are subject to a separate monitoring fee.

16.29 The fee includes collection of information from the developer and other relevant internal and external sources, appropriate site visits, officer action associated with non-compliance, maintenance of the monitoring database and reporting on delivery of obligations.

Monitoring Fee (affordable housing obligations)

16.30 A monitoring fee of £100 per affordable housing unit will be charged. This fee will not be applied to commuted sums in lieu of on-site affordable housing.

16.31 The £100 monitoring fee includes monitoring, conducted on a plot-by-plot basis, of the completion and initial occupation of affordable dwellings. In respect of affordable housing for rent, monitoring this obligation includes the time and costs associated with entering into nomination agreements with Registered Providers (excluding the cost of the Council's Legal Services). Where relevant, it also includes monitoring housing costs.

16.32 In the event of a review mechanism being agreed as justified for a development proposal, a separate fee of £1,000 per review will be applied to meet the Council Officers' costs in reviewing the information. This is in addition to the Council's legal costs (where relevant) and the costs of the Council appointing independent viability experts to review the financial information submitted. All such costs will be met by the developer / landowner proposing the development

Monitoring Fees (Essex County Council)

16.33 ECC charge separate monitoring fees for Section 106 obligation types that they are responsible for, for example education and highways. Further guidance is provided in Section 3.3 of ECC's Developers' Guide to Infrastructure Contributions (Revised 2024). ECC staff time in supporting the Travel Plan process will be secured through developer contributions with set fees to be paid by the Developer, to ECC, with regards the monitoring and support of Travel Plans.

16.34 All ECC's monitoring fees will be subject to indexation and payable on commencement of the development.

Fees for Deeds of Variation to a Section 106 agreement

16.35 In respect of Section 106 Agreements the Planning Fee covers the cost of involvement of the Housing Policy Team (Spatial Planning Services), however where a Deed of Variation (DoV) to a Section 106 Agreement is required and the involvement of the Housing Policy Team is needed, a fee of £1,200 will be charged per agreement. This fee must be paid upfront, and the Housing Policy Team will not commence work on a DoV until payment is received. Should the DoV not be executed within three months of receipt of the initial fee a further fee of £1,200 will become due in respect of any work to be undertaken by the Housing Policy Team. For the avoidance of doubt a Housing Policy Team Fee of £1,200 will be due every three months until completion of the DoV. The Housing Policy Team Fees will be reviewed on a regular basis.

16.36 Legal Fees will also be due in respect of a DoV to a Section 106 Agreement and are reviewed on a regular basis. Legal work cannot commence on a DoV until an undertaking has been provided that the Council's legal fees will be met in full.

Reporting on the use of Section 106 Obligations

16.37 Infrastructure Funding Statements are required to set out the infrastructure projects or types of infrastructure that the authority intends to fund, either wholly or partly, by CIL or planning obligations.

16.38 Infrastructure Funding Statements need to be published annually from 31 December 2020 (for the preceding financial year 2019/20) reporting on CIL and planning obligations revenue received and allocated. ECC is also required to publish an annual Infrastructure Funding Statement, primarily with regards education; highways and transportation; Public Rights of Way; libraries and monitoring.

1- Introduction

Purpose of this Document

1.1 This consultation Planning Obligations Supplementary Planning Document (SPD) sets out the City Council's approach towards seeking planning obligations which are needed to make development proposals acceptable in planning terms. It will replace the Planning Obligations SPD published in January 2021.

1.2 This SPD identifies topic areas where planning obligations may be applicable depending on the scale of development and sets out the required obligations or contributions.

1.3 It should be noted that not all the obligation types within this SPD will apply to all types of development. This SPD has been produced to apply to varying scales of development, but proposals will be assessed on a site-by-site basis with the individual circumstances of each site being taken into consideration.

1.4 The combination of this SPD and the Council's Community Infrastructure Levy (CIL) Charging Schedule set out a clear position to developers, landowners and stakeholders, of the scope and scale of planning obligations applicable to different scales and types of development.

1.5 The implementation guidance provided in this document supplements the requirements set out in the Local Plan.

How have we got to this point?

1.6 This draft of the SPD was published for six weeks public consultation in February 2025 alongside the Pre-Submission Local Plan documents. It will be submitted as an evidence base document supporting the Independent Examination of the Local Plan.

1.7 The SPD has been revised to reflect changes to national planning policy guidance, proposed modifications to the Local Plan following a review that commenced in 2022, and new local strategies and policy guidance. Any references to Local Plan policies relate to the Pre-Submission (Regulation 19) Local Plan and Focused Consultation Additional Sites (Regulation 19) Document.

2- Policy Background

National Planning Policy Overview

2.1 The statutory framework for planning obligations is set out in Section 106 of the Town and Country Planning Act 1990, as amended. Regulations 122 and 123 of the Community Infrastructure Levy (CIL) Regulations 2010 (as amended) and paragraphs 56 to 59 of the National Planning Policy Framework (NPPF) December 2024, set out the Government's policy on planning obligations.

The National Planning Policy Framework (NPPF)

2.2 The NPPF advises that planning authorities should consider the use of planning obligations where they could make an otherwise unacceptable development acceptable. They should only be used where it is not possible to address unacceptable impacts through planning conditions.

2.3 Community Infrastructure Levy Regulation 122 (2) sets out what a planning obligation can constitute and paragraph 58 of the NPPF re-iterates that planning obligations should only be sought where they meet all the following tests:

- they are necessary to make a development acceptable in planning terms;
- they are directly related to a development;
- they are fairly and reasonably related in scale and kind to a development.

2.4 National Planning Practice Guidance (PPG) offers a web-based resource to support the NPPF.

The Community Infrastructure Levy (CIL)

2.5 The CIL is a charge which local authorities can place on developers to help fund infrastructure needed to support new development in their areas. Unlike Section 106 Planning Obligations, CIL receipts are not earmarked for particular infrastructure. Instead, CIL monies are pooled into one fund, which can be used for any infrastructure needed to support new development across the Council's administrative area. An infrastructure item can be funded using both Section 106 Planning Obligations and CIL receipts where necessary or required.

Chelmsford City Council Community Infrastructure Levy (CIL)

2.6 The City Council approved its CIL Charging Schedule on 26 February 2014 with an effective date of 1 June 2014. The Charging Schedule sets out a levy of £125 per sq.m for residential development, and £87 and £150 per sq.m for retail development, and a zero rating for all other types of development. The rate of CIL has increased each year since it was approved in line with an index of inflation.

Infrastructure Delivery Plan

2.7 The Chelmsford Infrastructure Delivery Plan (IDP) has been undertaken by independent consultants to inform Chelmsford's Local Plan and will be updated annually by the Council. The Chelmsford IDP shows what infrastructure is required and how it will be provided; who is to provide the infrastructure; and when the infrastructure could be provided. Due to the scale of the Garden Communities Development, they will have standalone IDPs developed in partnership with the land promoters. Any reference to an IDP in this document incorporates the Garden Community IDP's and the Chelmsford IDP for all other allocated development sites.

2.8 The infrastructure needed to support the Local Plan is split into three funding categories:

- Direct developer funding such as Section 106 agreements (or Section 278 agreements for highway matters) with developers for infrastructure investments necessary to make development acceptable on individual sites, or which are necessary on a cumulative basis because of development arising on a combination of sites.

- CIL paid by developers based upon the floorspace of their development for infrastructure of a more general and/or lower-scale nature, which is not directly linked to growth or for which a need already exists.

- External funding sources such as from Government through national programmes (e.g. Housing Infrastructure Fund) or funding delivered by Essex County Council for infrastructure of a higher scale or more strategic nature, too extensive to be solely funded through new development.

2.9 The IDP is a living document, where assessment of costs, funding, delivery, indexation and phasing will continue to be updated in conjunction with further work being undertaken with site promoters, ECC and funding partners to ensure the best and most up to date information is available.

2.10 The funding categories of items of infrastructure required to support the Local Plan are set out in the latest published IDP.

Chelmsford City Council Local Plan

2.11 Development proposals should be considered in line with the City Council's Local Plan. Proposals which require planning obligations should be considered in accordance with the relevant policies. This SPD supports and supplements the Local Plan and is an important material planning consideration in the decision-making process.

2.12 The overarching reasoning and justification for requiring planning obligations are set out in the Strategic Policies that underpin and guide the Council's Spatial Strategy in the Local Plan.

2.13 The site policies are within three Growth Areas, with a policy for each site allocation. These policies set out the amount and type of development provided within each site allocation. They also set out what specific supporting infrastructure and other requirements are needed for each site.

2.14 Other policies within the Local Plan provide specific and detailed justification for various types of planning obligations e.g. Policy DM2 - Affordable Housing and Exception Sites, such policies are referred to in the relevant sections of this SPD.

Corporate Objectives

2.15 'Our Chelmsford, Our Plan, is a strategy for creating a fairer, greener and more connected community so we can shape Chelmsford as a leading place in the East of England. The provision of planning obligations, through this SPD, seeks to address the priorities of Our Chelmsford, Our Plan' by:

A fairer and more inclusive place	Promoting sustainable and environmentally responsible growth to stimulate a vibrant, balanced economy, a fairer society and provide more homes of all types.
A greener and safer place	Creating a distinctive sense of place, making the area more attractive, promoting its green credentials, and ensuring that people and communities are safe.
A more connected place	Bringing people together and working in partnership to encourage healthy, active lives, building stronger, more resilient communities so that people feel proud to live, work and study in the area.

2.16 The Plan can be downloaded here:

https://www.chelmsford.gov.uk/your-council/our-chelmsford-our-plan/

3- Obligation Types

3.1 The following sections of this document set out the obligation types which may be required as part of any Section 106 Agreement. Each section sets out the policy background to requiring such obligations, when the obligation is expected to be provided, any exceptions and any other relevant information.

3.2 The Council is required to publish an Infrastructure Funding Statement each year setting out the infrastructure projects or types of infrastructure that the authority intends to fund, either wholly or partly, by the levy or planning obligations. Infrastructure Funding Statements also report on CIL and planning obligations revenue received, allocated and spent; as well as reporting on progress of works that have received funding. Essex County Council (ECC) is also required to publish an annual Infrastructure Funding Statement, primarily with regards education; highways and transportation; Public Rights of Way; libraries and monitoring.

3.3 ECC's Developer's Guide to Infrastructure Contributions (Revised 2024) provides details of the impacts that development may have on ECC services and infrastructure, and guidance to developers regarding how Section 106 agreements and CIL may be used to secure works, finance and/or land to mitigate these impacts. A copy of the Guide can be found here:

Planning advice and guidance: Guidance for developers | Essex County Council

3.4 Planning obligations should be clearly identified as early as possible in the planning process. This includes the Masterplan process, the pre- application process which is encouraged for all forms/scales of development and planning performance agreements to ensure all parties are clear what is required of them at each stage of the planning application process.

3.5 Due to the scale and complexity of delivering the infrastructure required for the Chelmsford Garden Community (Location 6) and East Chelmsford Garden Community (Location 16), bespoke infrastructure delivery mechanisms may be appropriate and will be considered through the garden community governance structures and consulted upon separately.

4- Housing

Policy Background

4.1 The NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, that the needs of groups with specific housing requirements are addressed and that land with permission is developed without unnecessary delay.

4.2 Strategic Policy S6 demonstrates the Council's commitment to plan positively for new homes and to help significantly boost the supply of housing to meet the needs of the area.

4.3 To ensure the provision of an appropriate mix of dwelling types and sizes that contribute to current and future housing needs and create mixed communities, Table 1 below will be used to inform the mix of market housing proposed as part of new residential development in accordance with Policy DM1.

Table 1 Size and Mix of New Market Housing

Size of new owner-occupied and private rented accommodation required in Chelmsford up to 2041	
Dwellings Size	**Mix Required**
One Bedroom	5 – 10 %
Two Bedroom	30 – 35 %
Three Bedroom	35 – 40 %
Four or more bedrooms	20 – 25 %
Total	100%

4.4 Policy DM26 provides information on the design specifications for dwellings, which includes a requirement for all new dwellings to comply with the Nationally Described Space Standards. As this applies to all new dwellings, evidence of compliance with this requirement will need to be provided prior to the validation of a planning application.

4.5 Policy DM1 (Aii) and Policy DM1 (Bi) describe the development thresholds and proportions of new dwellings that will be required to meet the enhanced access and adaptability standards set out in Part M, Category 2 (Accessible and adaptable dwellings) M4(2) and Part M, Category 3 (Wheelchair user dwellings) M4(3) (2) (b) of Schedule 1 (para 1) to the Building Regulations 2010 (as amended). These requirements will be secured through planning conditions and/or legal agreement.

4.6 Further information on the implementation of Policy DM1 (Bi) is provided in Section 5 Affordable Housing.

4.7 Policy DM1 (Ci) requires, within all new developments of more than 100 dwellings, 5% self-build homes, which can include custom house building. This requirement will be secured through a planning obligation.

4.8 Policy DM1 (Cii) requires all new development of more than 100 dwellings to provide Specialist Residential Accommodation (including Gypsy and Traveller needs), taking account of local housing needs. This requirement will also be secured through a planning obligation.

4.9 Policy DM1 (D) requires all new development of more than 500 dwellings to provide 10% of market housing for Older Persons. Evidence of compliance with this requirement will need to be provided prior to the validation of a planning application.

Build to Rent

4.10 The NPPF defines Build to Rent housing as that which is typically 100% rented out. The Strategic Housing Needs Assessment (SHNA) 2023 does not attempt to estimate the need for additional private rented housing, including Build to Rent housing, because it is likely that the decision of households as to whether to buy or rent a home in the open market is dependent on several factors which means demand can fluctuate over time.

4.11 The 2024 SHNA Addendum Report reviewed new lettings and showed much higher market rents are charged on new lettings in the private rented sector than those which cover the whole private rent sector. Consequently, lettings associated with new Build to Rent dwellings are likely to be much higher than those in the private rented sector as a whole.

4.12 All market rented homes in Build to Rent schemes are expected to reflect the indicative mix set out in the latest SHNA. For ease of reference the 2023 SHNA considered the below mix to provide a reasonable starting point for Build to Rent housing:

1 bedroom homes	25%
2 bedroom homes	45%
3 bedroom homes	25%
4 bedroom homes	5%

4.13 The NPPF states that Build to Rent homes should offer longer tenancy agreements of three years or more and should be on the same site or contiguous with the main development of a wider multi-tenure development.

4.14 Schemes proposing Build to Rent homes will be considered on their merits, which will include consideration of the level of the market rents, the proportion of Build to Rent homes provided as part of a multi-tenure development, mix of housing proposed and the proportion of affordable private rent homes to be provided. Further guidance on the level and mix of affordable private rent homes expected from Build to Rent proposals is set out in Section 5.

Definition of Self-Build and Custom Housebuilding

4.15 The Self-build and Custom Housebuilding Act 2015 (as amended) provides a legal definition of self-build and custom housebuilding. The Act does not distinguish between self-build and custom housebuilding and provides that both are where individuals, an association of individuals, people working with or for individuals or associations of individuals, build or complete houses to be occupied as homes by those individuals.

4.16 In considering whether a home is self-build or a custom build home, local authorities must be satisfied that the initial owner of the home will have primary input into its final design and layout. It does not include the building of a house or plot acquired from a person who builds the house mainly to plans or specifications decided or offered by that person. The 2015 Act also requires custom and self-build homes to be occupied as a sole or main residence. There are various types of self-build and custom build projects including:

- Individual self/custom build - individuals purchase a serviced plot of land and build a house to live in. They may do some or all the build themselves (Do-It-Yourself) or employ a builder, architect or project manager to oversee the build (self-commissioned).
- Group self/custom build - a group of people come together to design and develop a custom build housing development which they then live in. They may build this themselves or with help from a developer to manage the project (see Community-led and cohousing below).
- Developer-led custom build - a developer divides a larger site into individual serviced plots and provides a design and build service to purchasers through a choice of pre-approved designs. This gives people a chance to customise existing designs to suit their needs. Self-finish/shell homes – housing built as a watertight shell by a developer, the internal layout of which is then designed and finished by the initial occupant.

4.17 Community-led housing is development taken forward by or with a not-for-profit organisation that is primarily for the purpose of meeting the needs of its members or the wider local community. A Community Led Housing Planning Advice Note promotes greater understanding of Community Led Housing and shows the enhanced role that communities can have in influencing increased provision of Community Led Housing. It also provides further information on the different approaches in which a community group or organization can own, manage, or steward homes.

4.18 A cohousing project involves a legally recognised group of people creating their own neighbourhood of homes, with shared facilities such as a communal house. This is different to Co-living Housing, which also contains significant communal space but is provided by a commercial entity. Further advice on Co-Living Housing can be found in the Co-Living Housing Planning Advice Note.

What is the method of calculation for the quantum of Self-Build and Custom Housebuilding?

4.19 The Self and Custom Housebuilding Act 2015 (as amended) places a duty on the Council to keep a register of individuals, and associations of individuals, who are seeking to acquire self-build serviced plots of land in the Council's area for their own self-build and custom housebuilding.

4.20 The register provides information on the number of individuals and associations on the register; the number of serviced plots of land sought; the preferences people on the register have indicated, such as general location within the authority's area, plot sizes and type of housing intended to be built. This information is updated each year in the _ Self-Build and Custom Housebuilding Monitoring Report.

4.21 At the time a formal pre-application is submitted, the Council will review the requirements to provide 5% self-build and custom housebuilding against its register. It will not be necessary to review the requirements again if a full or detailed planning application is submitted within six months of the pre-application advice being provided. The Council would not seek more than 5% self-build and custom housebuilding.

4.22 The calculation of the self-build and custom housebuilding requirement will be undertaken in terms of the gross number of self-contained dwellings. Where the percentage of self-build and custom housebuilding sought does not result in whole numbers of units, the number of self-build and custom housebuilding dwellings or plots will be rounded up.

4.23 In this guide, reference to a 'serviced plot' means one self-build and custom housebuilding dwelling, regardless of the type of self-build and custom build project.

What is the definition of a Serviced Plot of Land?

4.24 A serviced plot of land must have legal access to a public highway and electricity, water, wastewater, telecommunications including fibre optic broadband and sewer connections at least to the plot boundary.

4.25 Legal access to a public highway can include sections of private or unadopted road, it does not mean that the plot is immediately adjacent to the public highway just that there is the guaranteed right of access to the public highway.

4.26 Connections for electricity, water and wastewater means that the services must either be provided to the boundary of the plot, so that during construction connections can be made, or adequate alternative arrangements are possible, such as the use of a cesspit rather than mains drainage.

Mix of Self-Build and Custom Housebuilding

4.27 At the time a planning application is submitted, the Council will review the preferences of the people on the register as reported in the latest published Self-Build and Custom Housebuilding Monitoring Report, to advise developers and landowners on the type of self and custom housebuilding required.

4.28 At application stage, all Self-Build/Custom Build areas are to be shown on the indicative layout plan and relevant parameter plans.

4.29 Providers should provide a mix of serviced plots to meet the range of demand and affordability evidenced by local demand on the register, as annually updated in the Self-Build and Custom Housebuilding Monitoring Report.

4.30 Where there is evidence of local demand for serviced plots, but they are not possible e.g. flatted schemes, the Council will require the provision of self-finish/shell homes where the purchaser can then define internal layouts, finishes and fixings as well as any exterior landscaping for flats with private gardens.

Section 106 Agreement

4.31 The Section 106 agreement will secure self-build or custom build homes that meet the legal definition of self-build and custom housebuilding in the Self-build and Custom Housebuilding Act 2015 (as amended). To ensure that self-build and custom housebuilding provision are delivered in a way that meets local demand, the Council will seek to secure a Section 106 obligation which sets out the location, phasing, build programme, amount, type, mix, marketing strategy and priority mechanisms that the self-build or custom housebuilding must achieve.

4.32 The Marketing Strategy will be expected to detail the proposed marketing of the self-build and custom build plots which shall not exceed 15 units at a time and include details of the sale price of the plots with supporting valuation methodology from a RICs qualified valuer, how, where and when the plots are to be offered to the market, plot passport details for each plot, marketing materials, promotional methods, on-site signage, promotional information for persons on the Council's Self Build and Custom Build Register, and any alternative or additional marketing in the event that the interest is low, the marketing periods of plots and priority mechanisms

4.33 The priority mechanism will include a restrictive marketing period of 3 months. In this 3-month period a household on Part 1 of the Self-Build and Custom Housebuilding Register will be given priority over other potential purchasers.

4.34 Custom and self-build developments will be required to deliver Biodiversity Net Gain (BNG) in accordance with national mandatory requirements, other than where the national custom and self-build exemption applies. The exemption will not apply to the application of the 5% obligation under Policy DM1 C as the 5% requirement is only triggered for development proposals of 100 or more dwellings. Arbitrarily dividing up development proposals to apply the exemption will not be acceptable. Where developments are exempt from mandatory BNG requirements, they are encouraged to deliver biodiversity gain proportionate to the scale of development. To qualify for BNG exemptions, planning applications must clearly demonstrate that the development meets the custom and self-build legal definition, and planning permissions must be secured as custom and self-build housing.

4.35 The Section 106 agreement will seek to ensure that self-build and custom housebuilding provision will need to be made available and actively marketed before occupation of 50% of market housing provision.

4.36 Providers of self-build and custom housing building will be required to market appropriately in accordance with an approved marketing strategy serviced plots and ensure they remain available for at least 12 months at a price which accounts for income and saving levels of those on Chelmsford's Self-Build and Custom Housebuilding Register (as detailed in the Self-Build and Custom Housebuilding Monitoring Report), and which is comparable to other serviced plots marketed in the administrative area of Chelmsford in the same 12-month period. If after 12 months a serviced plot has been made available and actively marketed in accordance with the approved marketing strategy but has not sold, the plot can either remain on the open market or

be built out by the Developer in accordance with the Design Code and other relevant Local Plan policies. The Council will release the owner from its obligations set out in the section 106 agreement when the owner has provided the Council with a satisfactory record of sale enquiries. Plot providers reverting self-build and custom housebuilding back to market housing will be responsible for the full CIL liability.

4.37 Self-build and custom housebuilding will not be considered as part of the affordable housing obligations set out in Policy DM2, irrespective of whether the accommodation is subject to suitable restrictions on occupation and price, because it meets a different identified housing demand.

Design Requirements

4.38 To ensure that self-build and custom housebuilding is of high-quality design, sites with multiple serviced plots (5 or more) or other forms of self-build and custom housebuilding provision, will be required to be supported by a Design Code unless secured through pre-approved plans. The implementation of a Design Code will be secured through a planning obligation.

4.39 A Design Code should normally be submitted by the provider at the outline planning stage and should set out a clear set of design rules and parameters that future development will comply with. Design Codes will vary depending on the amount of development proposed and the context of the site. They will need to be agreed with the Council.

4.40 A Design Code should include the information set out in the 'Design Code Template for Self-Build and Custom Housebuilding' which has been published alongside this SPD.

4.41 Pre-approved designs must be configured in a manner that secures as much design freedom for the initial occupant as possible and only fixes design parameters where demonstrably necessary. Pre-approved design options should show design freedom with a least three options offered to initial occupants over each of the matters listed below:

- Size and shape of the home, including outbuildings;
- Position, size and shape of all windows and doors across every elevation;
- Materials across every elevation and roof;
- Internal layout e.g. location, size and shape of rooms;
- Build specification e.g. insulation, heating configuration, heat pumps;
- Sustainability features e.g. solar panels, solar hot water, triple glazing; and
- Finishes e.g. kitchen, bathroom, flooring, lighting.

4.42 Plot Passports provide potential plot purchasers with a simple and concise summary of the design and development parameters for a specific plot. They should clearly show the plot size, any design and siting parameters, access arrangements, separation distances to adjacent sites, the cost of the site, developable footprint, building height, refuse storage areas, servicing infrastructure, CIL exemption, car parking provision, access to site wide survey information, site constraints and construction compound, materials storage area and location of plots. Plot passports can also contain information relating to the plot sales process and planning application process if applicable. Plot passports must be available to potential plot purchasers before plots are marketed and approved as part of the marketing strategy submitted to the Council.

The Council recognises that modular housing, which is built off-site, can help deliver custom house building that is more cost effective than traditional house building methods. The Council will support modular housing where it complies with design codes, policies and standards in the Local Plan.

4.43 All residential development, including self-build and custom housebuilding must comply with the relevant Local Policies set out in the Local Plan. Each serviced plot will need to submit a full or reserved matters application where the design and appearance of an individual home will be considered.

CIL Exemptions

4.44 The self-build exemption from CIL is applicable for all homes built or commissioned by individuals for their own use, either by building the home on their own or working with builders, so long as the home is occupied by that person as their sole or main residence for the duration of the claw back period (3 years).

4.45 Qualifying self-builders will be eligible to apply for CIL relief for self-build. Self-builders seeking relief are required to declare that their development is intended to be self-build, prior to commencement of development. The self-builder must remain as the occupant of the dwelling for a minimum of 3 years after completion. If the dwelling is sold or let within three years of completion, the Council will clawback the CIL liability from the self-builder.

4.46 On schemes delivering multiple self-build and/or custom housebuilding plots, to ensure that the self-builder of each plot can claim for CIL exemption for Self-Build, the developer bringing the scheme forward must submit a clearly marked 'phasing plan' and accompanying schedule with each phase (or plot) clearly listed. This information should be submitted with the planning application or submitted in response to a pre-commencement condition imposed by the planning permission. This is to prevent a CIL charge being triggered for all plots within the wider development as soon as development commences on the first dwelling. This will also ensure that if a disqualifying event occurs affecting one unit, it does not trigger a requirement for all to repay the exemption.

Definition of Specialist Residential Accommodation

4.47 Specialist Residential Accommodation can cater to the specific needs of a variety of people within the community, including older people; students; people with disabilities; people with support needs, looked after children and Gypsy and Travellers and Travelling Showpeople.

4.48 Disabilities can include, but are not limited to, people with ambulatory difficulties, blindness, learning difficulties, autism and mental health needs, which may generate a range of housing requirements which can change over time.

4.49 National Planning Practice Guidance recognises that local planning authorities may also wish to consider groups outside of the scope of the definitions in paragraphs 4.47 and 4.48 above, to meet specific needs within their communities.

4.50 The Specialist Residential Accommodation required by these groups varies from independent self-contained accommodation with limited support to non-self-contained nursing homes for

people with more complex needs who need medical support.

4.51 Accommodation with support can be delivered in a range of settings, including individual flats or houses, shared accommodation or clusters. The term 'Supported Living' refers to the way support is organized, rather than specifying one type of accommodation that is required.

4.52 ECC defines supported living schemes as clusters of single occupancy units with a shared core support for all service users, or tenants living in a shared house or bungalow with their own room and shared communal area. ECC has published Supported Living Accommodation Standards which set out the standards for any supported living properties.

4.53 Specialist Residential Accommodation does not necessarily have associated support requirements but could cater to the specific needs of the groups requiring it through the built form of the accommodation provided, such as purpose-built student accommodation or pitches for Gypsy and Travellers.

What is the method of calculation for the quantum of Specialist Residential Accommodation?

4.54 Any Specialist Residential Accommodation for older people is expected to be predominantly delivered within the 10% market housing requirement specified in Policy DM1 (D) on greenfield developments of more than 500 dwellings.

4.55 The demand and housing need for Specialist Residential Accommodation is very diverse and calculated in different ways. The Chelmsford Housing Strategy 2022-2027 identifies a need for over 60 supported accommodation units for homeless households and those in temporary accommodation (as of March 2022). The Gypsy and Traveller Accommodation Assessment (GTAA) (2023) identifies a need for 27 new pitches across the period 2023-2041 for Gypsies and Travellers who do not meet the PPTS definition. The Strategic Housing Needs Assessment (SHNA) (2023) estimates a potential need for 11 additional children requiring care and accommodation provided by ECC across the plan period. The SHNA 2023 also calculates that the Council could seek 5% of new market homes to be compliant with Part M, Category 3 (Wheelchair user dwellings) M4(3) (2) (a) of Schedule 1 (para 1) to the Building Regulations 2010 (as amended) to meet the needs of older and disabled people.

4.56 ECC has published a `Supported and Specialist Housing and Accommodation Needs Assessment' (August 2025), which estimates the need for supported and specialist housing and accommodation in five-year intervals from the base year of 2024 where possible.

4.57 Using the local housing need for Specialist Residential Accommodation identified in the Chelmsford Housing Strategy, GTAA and SHNA (excluding older person's housing demand) there is an identified local housing need for just over 100 Specialist Residential Accommodation dwellings. As this figure includes identified housing needs that have not been calculated across the whole plan period, it is anticipated that the local housing need for Specialist Residential Accommodation will be higher across the plan period.

4.58 In anticipation of a higher level of local housing need across the plan period, the quantum of Specialist Residential Accommodation sought to meet the local housing needs requirement of Policy DM1 (Ci) will be calculated at a ratio of one specialist residential dwelling per 100 residential

dwellings on sites of more than 100 dwellings. Using this ratio, and the forecast supply on development sites of more than 100 dwellings, it is anticipated the Specialist Residential Accommodation supply over the plan period will deliver approximately 165 dwellings.

4.59 Some Specialist Residential Accommodation requires additional revenue funding to provide support services. Where these costs cannot be met by residents of the accommodation, additional subsidy will need to be secured. In these circumstances, it might be more appropriate to secure a capital contribution towards the Specialist Residential Accommodation as a commuted payment in lieu of on-site provision. A commuted payment in lieu of on-site provision also allows flexibility to meet the range of identified local housing need for Specialist Residential Accommodation and flexibility in the location of the Specialist Residential Accommodation.

4.60 Whilst the local housing need for Specialist Residential Accommodation encompasses a range of accommodation sizes, for the purposes of calculating a capital contribution in lieu of on-site provision, it is assumed the local housing need is for one bed, two-person occupancy dwellings.

4.61 Table 2 below calculates the capital value of these dwellings using the assumptions / sources noted in the table:

Table 2 Specialist Residential Accommodation Capital Value Calculation

Item	Assumption/Source	Amount (£) per annum
Gross rent	Local Housing Allowance One Bed Rate April 2024	9,513.96
Service Charge	£25 per week	1,300
On cost	10% of gross rent	951.40
Management and Maintenance Cost		500
Void and bad debts	3% of gross rent	285.41
Net rent		6,477.15
Capitalised Value	Payback period 30 years	194,314.50
Value per sqm	Nationally Designed Space Standards for one bed two person flat – 50sqm	3,886.29

4.62 Using the average value per sqm in Table 41.5 of the Local Plan Viability Update (2023) of £4,734 per sqm, the contribution in lieu of on-site Specialist Residential Accommodation will be:

£42,400 per net new dwelling = (£4,734 - £3,886 = 848) x 50 sqm

4.63 The Specialist Residential Accommodation contribution on developments of more than 100 dwellings will therefore be:

i. in respect of on-site Specialist Residential Accommodation, 1% of the total new net residential dwellings; or

ii where there is a contribution in lieu of on-site provision the contribution will be £42,400 per Specialist Residential Accommodation dwelling.

4.64 The 1% applies to the whole development; it does not only apply to the part of the development above the threshold.

4.65 The Specialist Residential Accommodation requirement of Policy DM1 (Ci) is in addition to the requirements set out in Policy DM2, as Policy DM2 does not identify the specific housing needs of households requiring Specialist Residential Accommodation.

4.66 The Specialist Residential Accommodation requirement of Policy DM1 (Cii) applies to all new developments of more than 100 dwellings. It does not apply to standalone developments containing solely Specialist Residential Accommodation.

Mix of Specialist Residential Accommodation

4.67 At the time a formal pre-application is submitted, the Council will consider the published Specialist Residential Accommodation local housing needs to provide advice on how best the local housing need for this type of accommodation can be met.

4.68 The Council will also consult ECC to seek advice on their priority Specialist Residential Accommodation local housing needs

4.69 The Council will provide advice on the affordability of on-site Specialist Residential Accommodation as demonstrated by evidence base documents. Where affordability information is not provided in these statements / strategies, the default need is set out in Section 5 of this SPD.

Section 106 Agreement

4.70 To ensure that Specialist Residential Accommodation is delivered in a way that meets local need, the Council will seek to secure a Section 106 obligation which sets out the amount, type, mix and tenure and priority mechanisms of the Specialist Residential Accommodation to be provided in perpetuity.

4.71 Where Specialist Residential Accommodation is meeting local housing needs a priority mechanism for households that reside, work or have strong family connections with people living in the administrative area of Chelmsford City Council from whom they require support, will be prioritised for a period of three months.

4.72 The Section 106 agreement will seek to secure that Specialist Residential Accommodation is made available before occupation of 50% of market housing provision, to ensure timely delivery of the Specialist Residential Accommodation. The Specialist Residential Accommodation obligation could be met through the provision of a suitable serviced site, on-site completed dwellings or a contribution in lieu of on-site provision calculated in accordance with paragraph 4.62 above.

4.73 Where Specialist Residential Accommodation is required to be delivered under Policy DM1, it will not be considered to count towards the affordable housing requirement set out in Policy DM2, irrespective of whether the accommodation is subject to suitable restrictions on occupation and price, because it meets a different identified housing need.

4.74 Specialist Residential Accommodation required under Policy DM1 is in addition to any residential requirements set out in site policies in the Local Plan.

4.75 To ensure that Gypsy and Traveller and Travelling Showpeople Sites are delivered in a way that meets local needs the Council will secure a Section 106 obligation that sets out the number of plots, tenure, uses on site and prioritisation mechanism for the accommodation to be provided in perpetuity. Also, for Travelling Showperson plots the Section 106 agreement will include a mechanism for determining the 'market value' of a site.

4.76 The prioritisation mechanism will ensure that each pitch/plot shall only be occupied by persons who form part of a Gypsy and Traveller or Travelling Showperson household, they (one of them if the household consists of more than one person) are aged 18 or over, and can adhere to the 'Plot Eligibility and Allocation Prioritisation Policy' as defined at the time to reflect identified need in the latest published Gypsy and Traveller Accommodation Assessment.

Design Requirements

4.77 Specialist Residential Accommodation can cater to the specific needs of a variety of people within the community and design requirements will consequently vary significantly.

4.78 Accessible and adaptable housing enables people to live more independently while also saving on health and social costs in the future. Accessible and adaptable housing will provide safe and convenient routes into and out of the home and outside areas, suitable circulation space and suitable bathrooms and kitchens within the homes.

4.79 Wheelchair user dwellings include additional features to meet the needs of occupants who use wheelchairs or allow adaptations to meet such needs.

4.80 Inclusive design should not only be specific to the building but also include the setting of the building in the wider built environment, for example the location of the building on the plot; the gradient of the plot; the relationship of adjoining buildings; and the transport infrastructure. Further guidance on inclusive design of public spaces and the wider built environment is provided in the 'Making Places SPD'.

4.81 Design principles such as those set out in the Housing our Ageing Population Panel for Innovation (HAPPI) Report (2009) are applicable for older people and age-friendly places.

Gypsy, Traveller or Travelling Showperson sites

4.82 Gypsy, Traveller or Travelling Showperson sites, both allocated and non-allocated sites, will need to provide a suitable living environment for the proposed residents, with safe and convenient access to the local highway network. Mains water, electricity supply, drainage and sanitation should be available on-site or be made available on-site. Sewerage should normally be through mains systems, however, in some locations this may not always be possible and in that case suitable alternative arrangements can be made. All sanitation provision must be in accordance with current legislation, regulation and British Standards.

4.83 Surface drainage (which may take the form of Sustainable Drainage Systems), gigabit broadband and mobile infrastructure should be provided where possible.

4.84 The Site design and layout need to appropriately consider ways of 'Designing out Crime' and it is recommended that the applicant seek early engagement with Essex Police to help achieve this.

4.85 Provision of amenity green space should be made on Gypsy, Traveller and Travelling Showperson sites in accordance with Table 3 below.

Table 3 Amenity Space Provision on Gypsy, Traveller or Travelling Showperson Sites

Private/Communal Amenity Green Space	Form	Amount
Where amenity green space can be delivered on pitch/plot	• Grassy and/or woodland space without hardstanding. • Within boundary of plot. • Not accessible to motorised vehicles.	80 sqm minimum private green amenity space
Where amenity green space cannot be delivered in full on pitch/plot*	Demarcated private zone on each pitch/plot capable of use as a clothes drying area. Within boundary of plot. Not accessible to motorised vehicles.	10 sqm minimum demarcated private zone.
	Communal space, overlooked by other plots on site to promote safety through surveillance. Within site boundary. Grassy and/or woodland space without hardstanding – with exception being the presence of children's play equipment if appropriate. Not accessible to motorised vehicles.	20 sqm minimum per-pitch/plot communal green amenity space.

*Both demarcated private zone and communal space to be provided in this instance.

4.86 Spaces need to feel safe and be accessible to all intended users. It is advisable to consider the boundary treatment of the amenity green space provision to protect its users – particularly children – from the surrounding vehicular traffic.

4.87 All new Gypsy, Traveller and Travelling Showperson sites should seek the planting of three trees per net new pitch/plot. In line with the Environment Act 2021, all development proposals (except where exemptions apply) will be required to provide a minimum of 10% biodiversity net gain above the ecological baseline for the application site. Where it is possible to achieve, the Council will encourage delivery of a greater than 10% biodiversity net gain.

4.88 Each site should have a site office provided on-site, where a site manager can be based and residents on site can reasonably access. The site office would serve as a hub for residents to report and discuss issues and where appropriate facilitate site health, safety and well-being sessions. It is expected that the site owners/other residents of the site would collectively own and manage the office building. Planning conditions will be put in place to retain the use of a site office for site management in perpetuity.

4.89 To promote safety and security on site, consideration must be given towards the design, layout, and positioning of the site office. This site office must be situated within a suitable distance of the residential plots to provide security for the site without being intrusive and should be clearly visible to visitors entering the site. The site office must be designed to ensure it is easily accessible to all residents on site and suitably accommodate all abilities and stages of life. A site office must have connections to all on-site services. As a minimum, the building must include a WC with sink basin, kitchen, and lounge area. Provision of a site office should include at least two bays to accommodate a standard car. At least one bay for the site office must be suitable to accommodate drivers/ passengers who are wheelchair users.

4.90 All new Gypsy, Traveller and Travelling Showperson sites should provide a suitable living environment for the proposed residents. The perimeter of any site should be suitable bounded to help achieve this and provide safety and security to the site residents, deterring unauthorized entry.

4.91 Site boundaries should be clearly marked, and materials chosen should be sympathetic to the character of the area. Consideration should be given towards location of access points in the boundary to ensure connectivity between the site and the surrounding amenities can still be achieved.

4.92 Each pitch or plot within a site should have a clear boundary defining the area each individual household occupies to protect the living and amenity space of individual households.

4.93 In designing pitch and plot boundaries, consideration needs to be given towards achieving a balance of preventing overlooking onto individual households to provide privacy and retaining a level of natural surveillance across the site for resident safety.

4.94 Access into and within the site needs to be able to accommodate the turning space required by large trailers as well as emergency vehicles, refuse collection, without compromising the safety of residents nor the function of the connecting strategic highway. Early consultation with Essex Highways is advisable to ensure this is achieved.

4.95 Bays allocated for static mobile homes or touring caravans must be at least two metres away from any road. On each pitch or plot, at least one bay allocated for use by private car must be suitable to accommodate drivers/passengers who are wheelchair users.

4.96 All parking provision is to be provided in hardstanding areas and clearly designated to deter unsafe or obstructive parking. These areas must be constructed with material suitable to sustain large weight and regular movement attributed to the range of vehicles on site.

4.97 Each pitch or plot will be required to provide electric vehicle EV charging points at a rate of at least one EV charging point per pitch/plot. The EV charging point provided must be on the pitch/plot and accessible to vehicles parked within the allocated bays for cars and/or static mobile home and/or touring caravan. Provision of at least one EV charging point to serve the site office parking bays is also required. Provision of any additional EV charging points on pitch/plot will be welcomed.

4.98 For fire safety reasons, no bay allocated for static mobile home or touring caravan should be placed within three metres of the site boundary; and the distance between bays allocated for static mobile homes or touring caravans needs to be at least six metres.

4.99 Allocated bays for private cars ought to have a separation distance of at least six meters from a touring caravan or static home. Where this is not achievable, a separation distance of at least three meters can be allowed so long as the private cars would not obstruct entrance to the touring caravan or static home.

4.100 All separation distances must also be clear of any combustible structures. Early consultation with the Fire and Rescue Services is advisable.

4.101 An amenity building must be provided on each pitch/plot with connections to all on-site services. As a minimum, the building must include a WC with sink basin, a shower and utility room, kitchen, lounge, and a dining area.

4.102 The amenity building should suitably accommodate residents of all abilities and stages of life. In designing the amenity building, consideration must be given towards accessibility and adaptability provision. Consideration must also be given towards resident privacy in the siting and orientation of the amenity building. In accordance with Appendix B of the Local Plan, all habitable rooms must have at least one window in a wall allowing outlook and ventilation. Walls which form a boundary with another plot or a boundary to the site should not have windows.

4.103 Any amenity building provided on sites shall meet the Building Regulations optional requirement for water efficiency of 90 litres/person/day.

4.104 An external shed should be provided to serve as residential storage, and a secure enclosure to be provided for the storage of metal gas bottles.

4.105 Recycling and waste provisions are to be provided in the same manner as are expected for any other residential development. Space to store recycling and waste receptacles and ability for refuse collectors to reach these needs to be considered. See Appendix B of the Chelmsford Local Plan for details.

4.106 Infrastructure facilitating on-site energy generation and sustainable living will be supported. This may take the form of solar PV/solar thermal, rainwater harvesting, heat pumps, etc.

4.107 Where sites are allocated as part of a wider strategic site, certainty surrounding Local Plan Policy compliance and elements of the Scheme will also be required at earlier stages of the planning process.

4.108 All sites should be indicated on a site plan with high level consideration in the Masterplan submission to size of the site and number of plots to be provided, identification of any protected natural feature on the site and the impact upon the character of the area, historic or natural environmental assets and flood risk.

4.109 At outline planning application stage, all sites should be shown on an indicative layout plan and relative parameter plans. A Section 106 agreement will secure the delivery of pitches and plots. There should be detailed consideration given to vehicle access into the site and connectivity to the highway network, provision for the supply of all on-site services into the site boundary, provision of adequate community services and facilities within reasonable travelling distances as well as pitch/plot boundaries.

4.110 Whilst there are no prescribed standards for the design and layout of Gypsy and Traveller sites, site location and design should take into account the Ministry of Housing, Communities and Local Government's Designing Gypsy and Traveller sites: good practice guide and where appropriate, relevant legislation.

4.111 The term 'pitch' refers to the space required on a site to accommodate a Gypsy and Traveller household. There is no set size for an individual pitch. They can vary like house sizes depending on the number of family members. To help sites integrate into existing communities, new Gypsy and Traveller sites should seek to provide a maximum of 10 pitches. A pitch should, however, be large enough to provide at least all the following:

- hardstanding for one static caravan;
- hardstanding for one travelling caravan;
- two parking bays for larger vehicles;
- an amenity building containing a kitchen, lounge and dining area, shower and utility room; and separate toilet facilities;
- an external shed;
- a secure enclosure for metal gas bottles; and
- clothes drying area.

4.112 To help sites integrate into existing communities and to ensure sites are suitable for an extended family unit, new travelling Showperson sites should normally seek to provide up to 15 plots.

4.113 The term 'plot' refers to the space required on a site to accommodate a household of Travelling Showpeople. A number of plots are also sometimes referred to as 'yards'. The Local Plan expects 0.2 hectares per plot to be provided. This is considered an appropriate size to accommodate the proposed number of caravans, vehicles and ancillary areas to enable the storage, repair and maintenance of equipment as well as account for turning space required by large vehicles and amenity space for residents. Larger plots may be acceptable to facilitate future

sub-division of plots to accommodate any anticipated rise in need.

4.114 The area of land set aside for accommodation by one family unit and the area of land set aside for the storage and maintenance of equipment collectively forms a single plot. The storage and maintenance space can sometimes be a communal area, however, for security reasons there may be a preference for them to form part of individual plots.

4.115 Travelling Showpeople sites need to accommodate a range of vehicles including cars, vans, lorries, trailers, mobile homes, and caravans and be accessible to emergency vehicles and refuse collection vehicles. Access is required both onto the site as a whole and into individual plots.

4.116 The following parking provision is suggested for each plot as a minimum:

2 bays to accommodate private cars
1 bay to accommodate a static mobile home
1 bay to accommodate a touring caravan
4 bays to accommodate lorries and/or trailers

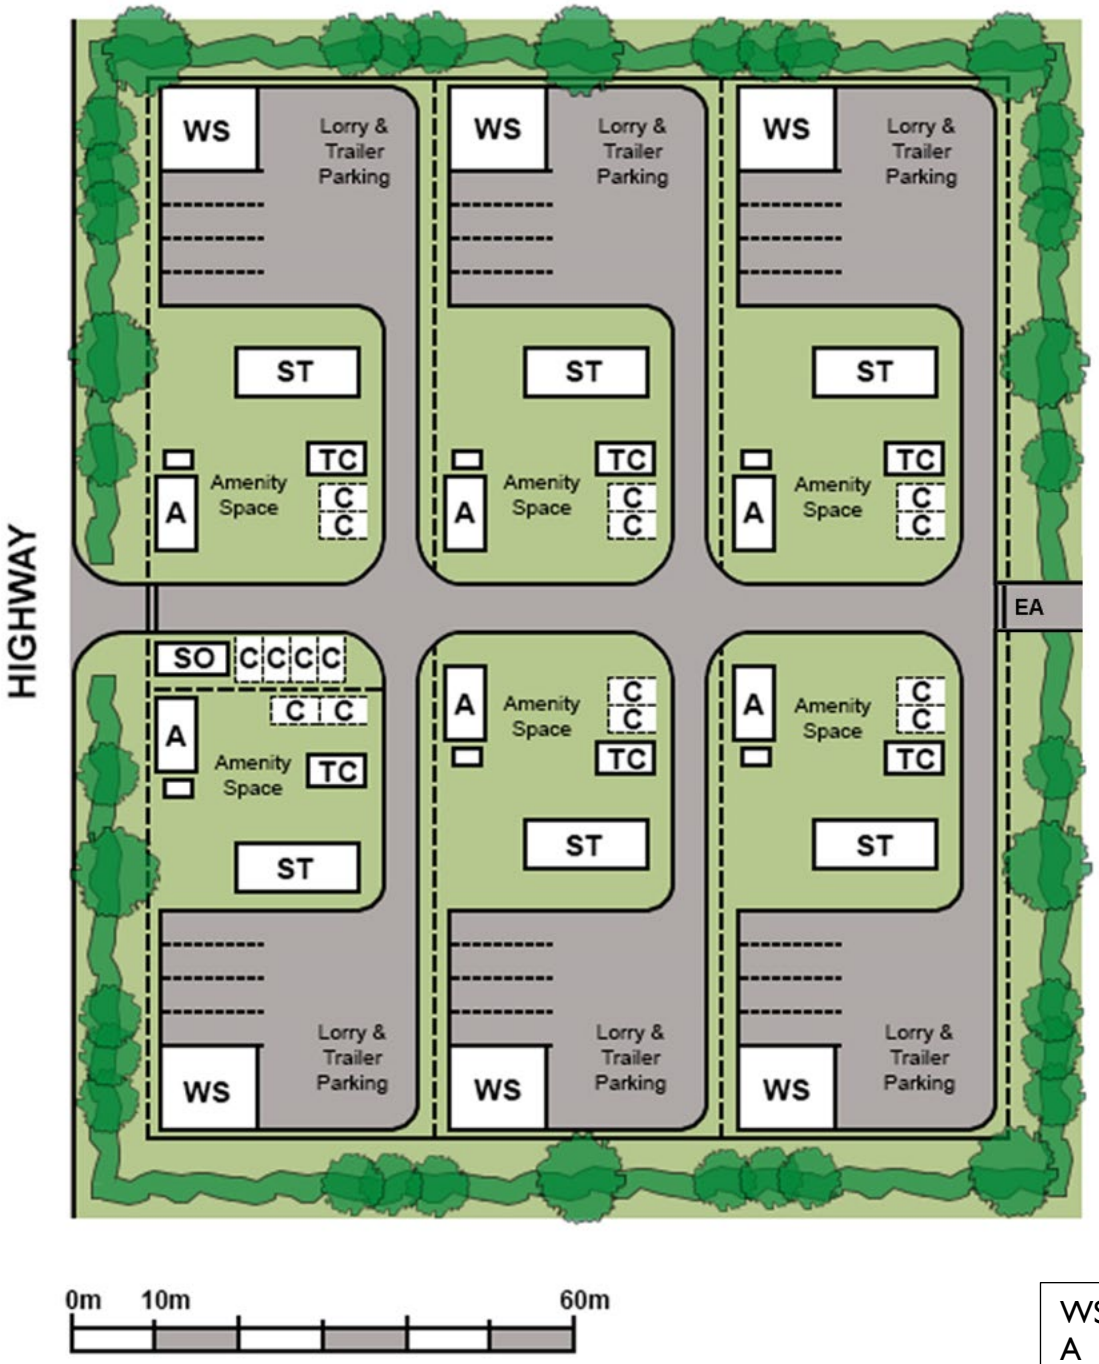
4.117 A maintenance/storage workshop of at least 100m2 floor space is to be provided on each plot. Water and electricity provision must be available as a minimum. Where feasible, the height should be around 1.5 stories to accommodate the height of a standard lorry/trailer.

4.118 If site constraints prevent delivery of maintenance/storage workshops on each plot, provision of these can be within communal areas. It is expected in this instance that at least 100m2 floor space per plot is still achieved. The maintenance/storage workshops should be positioned at a distance of at least six metres away from any amenity building, or parking bay for static or touring caravans to minimise the impact of visual, noise and odour pollution on residents. Conditions may be required to establish permissible activities/use classes and set operation times to reduce risk of nuisance.

4.119 For fire safety, the amenity building, site office, maintenance/storage workshop and any other storage units should be constructed from non-combustible materials such as masonry brick. Strict adherence to the Fire Safety Order and relevant Building Regulations will be sought and it is recommended that the applicant seek early engagement with the Essex County Fire & Rescue Service

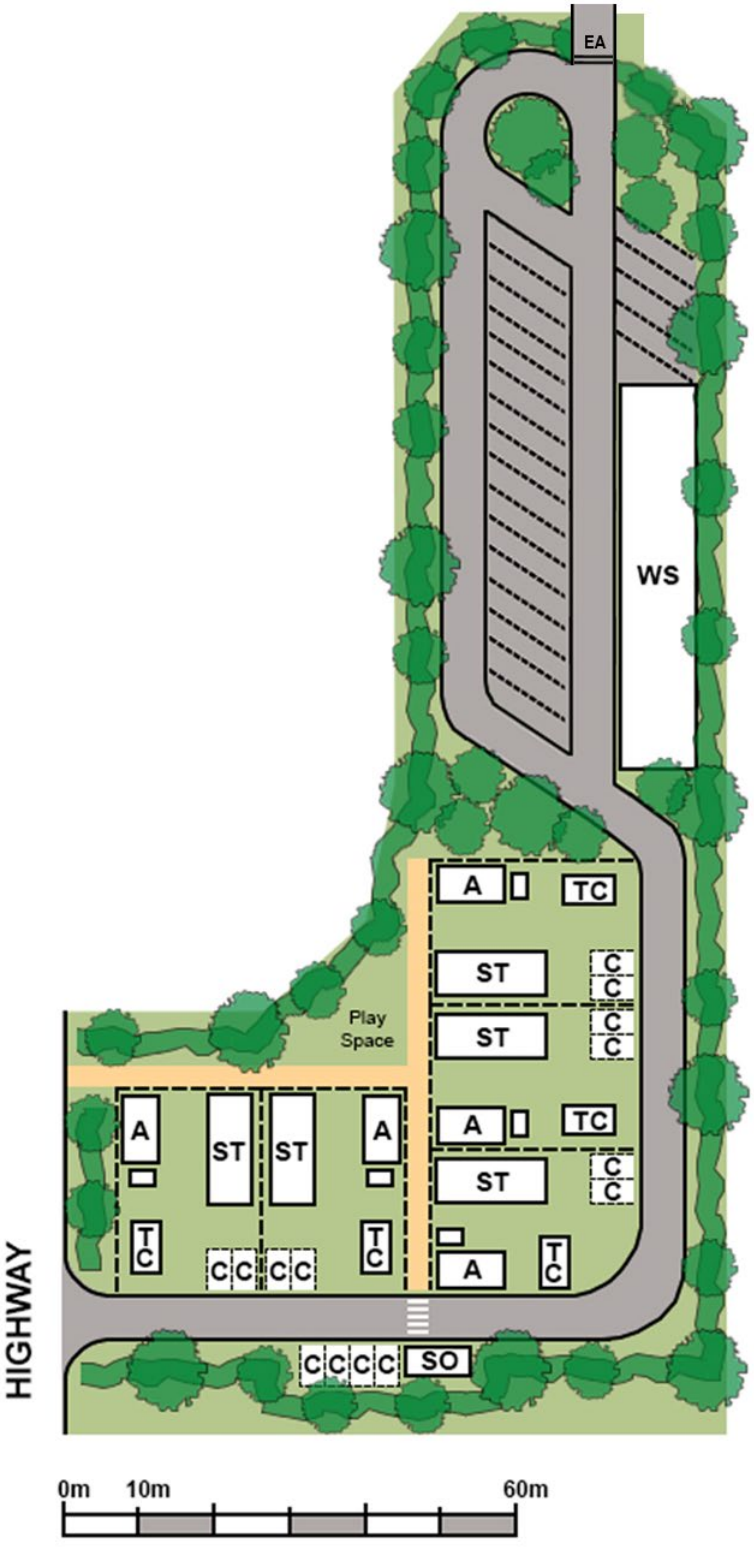
4.120 Though not prescriptive, the following figures provide indicative layout designs of Travelling Showpeople sites that would be acceptable:

Figure 1: Indicative Travelling Showperson site example layout with separate provisions



WS	Workshop
A	Amenity Building
TC	Touring Caravan
C	Car
ST	Static Mobile Home
SO	Site Office
EA	Emergency Access

Figure 2: Indicative Travelling Showperson site example layout with shared provisions



WS	Workshop
A	Amenity Building
TC	Touring Caravan
C	Car
ST	Static Mobile Home
SO	Site Office
EA	Emergency Access

Older Persons

4.121 The NPPF sets out that Older People are those over or approaching retirement age, including the active, newly retired through to the very frail elderly.

4.122 The 2024 SHNA Addendum Report reviews the housing needs of older people in terms of those aged 65 and over. It estimates the need for specialist older people's accommodation, which for market housing equates to 7% of the Housing Requirement.

4.123 This does not include the estimated need for other forms of housing that benefits older people such as wheelchair user housing, which the 2024 SHNA Addendum Report estimates to be 637 homes to meet current and future need to 2041.

4.124 The combined need for specialist market housing for older people and wheelchair user homes across the plan period in the 2024 SHNA Addendum Report is 2,299 homes, which equates to 10% of the Housing Requirement across the Plan Period.

4.125 The 2023 SHNA recommends that the Council seeks a proportion (up to 5%) of all new market homes to be M4(3) compliant to meet the identified need. The 2023 SHNA demonstrates a clear correlation between the age of a household reference person and the likelihood of there being a wheelchair user in the household therefore it is logical that this need is met through older persons housing.

4.125 The 10% requirement for older persons market housing is applied to sites of more than 500 dwellings in Policy DM1 D to enable a critical mass of Specialist Residential Accommodation to be achieved if that is the form of housing needed.

What is the method of calculation for the quantum of Older Person's housing?

4.126 In order to reflect the need, 10% should be calculated from the total number of dwellings and provided within the 65% market proportion. For example, a site providing a total of 1,500 residential units will be required to provide 150 older person residential units or bed spaces, or a combination of both, totaling 150. This will need to be provided as part of the 975 market residential units.

Mix of Older Persons Housing

4.127 Older persons housing to meet the requirements of Policy DM1 D can be provided as age restricted adaptable general needs housing that meets the requirements of Part M, Category 3 (Wheelchair adaptable dwellings) M4(3)(2)(a) of Schedule 1 (para 1) to the Building Regulations 2010 (as amended) and/or Specialist Residential Accommodation for Older People, including housing with support, housing with care, residential care bedspaces and/or nursing care bedspaces.

Section 106 Agreement

4.127 The amount, age restriction and form of the Older Person residential provision will be secured through a Section 106 agreement, but this will not contain any priority mechanisms set out in the Specialist Residential Accommodation section above when secured as market housing under Policy DM1 D.

Design Requirements

4.128 The NPPF notes that mixed tenure sites, including housing designed for specific groups, provide a range of benefits, creating diverse communities.

4.129 The Design principles set out in the Housing our Ageing Population Panel for Innovation (HAPPI) Report (2009) are applicable for older people and age-friendly places, so will apply to all older person's dwellings required by Policy DM1 D.

5 Affordable Housing

Policy Background

5.1 The NPPF states that where local planning authorities have identified that affordable housing is needed, they should set policies for meeting this need.

5.2 Paragraphs 20, 35, 63-6 of the NPPF and Strategic Policy S6 and Policy DM2 of the Local Plan set out the justification for requiring planning obligations in respect of securing affordable housing.

5.3 Strategic Policy S6 sets out the Council's housing requirement. This is evidenced by the Council's SHNA (2023) and SHNA Addendum Report (2024), which identifies the need for new affordable homes.

5.4 Policy DM2 (A) requires the provision of 35% of the total number of residential units to be provided and maintained as affordable housing within all new residential development sites which comprise of 10 or more residential units.

5.5 Planning obligations will be used to secure the following elements related to the provision of affordable housing:

5.5.1 the number of units;
5.5.2 the type of units;
5.5.3 tenure of units;
5.5.4 location of units;
5.5.5 space standards, accessibility and parking provision;
5.5.6 commuted sums in lieu of provision (where appropriate).

5.6 All affordable housing provided in areas covered by The Housing (Right to Acquire or Franchise) (Designated Rural Areas in the East) Order 1997 (SI 1997/623) and The Housing (Right to Enfranchise) (Designated Protected Areas) (England) Order 2009 (SI 2009/2098) will be subject to the retention restrictions imposed by these Orders.

5.7 The statutory right of tenants to acquire their affordable homes for rent (the "Right to Acquire") does not apply to any affordable dwellings for rent which are situated within a Designated Rural Area.

5.8 Where shared ownership leases of dwellings in Designated Protected Areas are concerned, the Registered Provider must ensure that all shared ownership leases contain a provision which either restricts staircasing to no more than 80%; or in instances where the leaseholder is permitted to acquire more than 80% (i.e. staircase to 100%), enables and obliges the Registered Provider to repurchase the property when the leaseholder wishes to sell.

5.9 These Orders currently include the whole Parishes of Chignal; East Hanningfield; Good Easter; Great and Little Leighs; Great Waltham; Highwood; Little Baddow; Little Waltham; Margaretting; Mashbury; Pleshey; Rettendon; Roxwell; Sandon; South Hanningfield; Stock; West Haningfield and Woodham Ferrers and Bicknacre. A significant part of the Parish of Writtle is also included.

Definition of Affordable Housing

5.10 The definition of affordable housing is set out in Annex 2 of the NPPF. This includes social rent, other affordable housing for rent, discounted market sales housing and other affordable routes to home ownership.

What is the method of calculation of the quantum of Affordable Housing?

5.11 Policy DM2 requires 35% of the total number of residential units on sites of 10 or more residential units to be provided and maintained as affordable housing.

5.12 The calculation of the affordable housing obligation will be undertaken in terms of the gross number of self-contained dwellings. Where the percentage of affordable housing sought does not result in whole numbers of units, the number of affordable dwellings will be rounded up to achieve the required 35% provision.

5.13 35% applies across the whole development; it does not only apply to the part of the development above the threshold.

5.14 Where there is a proposal to increase the number of residential units on a site following grant of permission, for example a non-residential ground floor use subsequently secures planning permission for additional residential dwellings, the Council will apply Policy DM2 (A) to the total number of residential dwellings on the site, if the increase in the number of units take the total on site to 10 units or more.

5.15 In instances where the initial proposal has been built, the additional proposed dwellings would be required to 'offset' the affordable housing requirement across the whole site.

5.16 Once the affordable housing requirement amount has been calculated, all other parts of this section of this SPD will apply.

Affordable Private Rent

5.17 The NPPF also includes a definition of Affordable Private Rent for Build to Rent schemes. National Planning Policy Guidance (NPPG) states that 20% is generally a suitable benchmark for the level of affordable private rent homes to be provided in any build to rent scheme and that a minimum rent discount of 20% for affordable private rent homes relative to local market rents.

5.18 The SHNA Addendum Report (2024) clearly sets out how the private rented sector has been playing a role in meeting the needs of households who require financial support in meeting their housing needs. Legislation through the 2011 Localism Action allows Councils to discharge their "homelessness duty" through providing an offer of a suitable property in the Private Rented Sector.

5.19 Given the notable need for affordable housing set out in the SHNA (2023) and SHNA Addendum Report (2024), where Build to Rent housing is proposed the Council will seek 24.5% of the total Build to Rent units to be provided as affordable private rent homes capped at Local Housing Allowance levels.

5.20 NPPG states that eligibility to occupy affordable private rent homes should be agreed between the local authority and the scheme operator but with regard to criteria set out in planning guidance. It goes on to advise that where authorities maintain an 'intermediate housing list' they may wish to suggest names from this or potentially even their Statutory Housing list. The Council does not maintain an intermediate housing list and given the significant level of housing need that cannot be met, the Council will suggest names from the Statutory Housing register and developers of affordable private rent will be expected to have regard to the Council's housing allocation policies and prioritise potential candidates from the Statutory Housing list.

Vacant Building Credit

5.21 A Ministerial statement issued on the 28 November 2014 stated that where a vacant building is brought back into lawful use or is demolished to be replaced by a new building, the developer should be offered a financial credit equivalent to the existing gross floor space of the relevant vacant building when the local planning authority calculates any affordable housing contribution. Affordable housing contributions will be required for any increase in floorspace.

5.22 The vacant building credit applies where the vacant building has not been abandoned. The reference to abandonment is the applicable planning test for the vacancy credit and is already recognised in law.

5.23 Where there is an overall increase in floorspace in a proposed development that includes a vacant building, the Council will apply the following formula to calculate the affordable housing contribution:

- Revised Affordable Housing = 35 x 1 - (existing vacant gross internal area/proposed gross internal area)

5.24 In practice this means that if an existing vacant building has a gross internal area of 3,000 sqm and the gross internal area of the proposed 60 dwellings is 4,500 sqm, the revised affordable housing percentage that will be required is 11.667% and the revised affordable housing contribution will equal 7 dwellings.

Table 4 Example of calculating the Vacant Building Credit

Number of Dwellings	Vacant Building Gross Internal Area	Proposed Gross Internal Area of Residential Dwelling
60	3,000 sqm	4,500 sqm
Coefficient based on existing versus proposed areas	3,000/4,500 = 0.667	1 - 0.667 = 0.333
Revised Affordable Housing Percentage	35 x 0.333 = 11.655%	
Affordable Dwellings	Market Dwellings	Total Dwellings
7.00	53	60

5.25 For wholly residential schemes the total proposed Gross Internal Area (GIA) will be the GIA of the sum of all dwellings. Where flatted development is proposed the GIA will include all communal and circulation areas. For mixed use schemes, only the GIA of the proposed residential elements will be included.

5.26 The number of affordable dwellings will be calculated to two decimal points and rounded to the nearest whole number. It will be provided as affordable housing for rent.

Mix of Affordable Housing

5.27 To ensure new affordable provision is weighted to make a proportionate contribution to the assessed need, the Council expects the affordable housing to include 24.5% of the total number of dwellings within the development as either social or affordable rented accommodation.

5.28 Where the calculation of 24.5% of the total number of dwellings to be provided as affordable housing for rent does not result in whole numbers, it should always be rounded up to achieve the required 24.5%.

5.29 The balance, 10.5% of the total number of dwellings, should be provided as shared ownership housing.

5.30 The affordable housing provision for rent should proportionately reflect the needs identified in the latest SHNA and shortages relative to supply, in determining the optimum affordable housing mix by size and type.

5.31 The affordable housing provision for rent should reflect the 'Need requirement' in the Table 5 where possible. The Council will report on the size (by bedrooms) of new affordable housing for rent that achieves completion each year in the Authority Monitoring Report.

Table 5 Bedroom Size of Affordable Housing for Rent (general needs)

Size of additional units required to meet housing needs in Chelmsford	
Size of home	Need requirement As a % of net annual total
One Bedroom	25%
Two Bedrooms	35%
Three Bedrooms	30%
Four or more Bedrooms	10%
Total	100.0%

Source: Paragraph 5.34, page 115, SHNA.

5.32 When the quantum of residential accommodation sought is above the level identified in the Local Plan and there is a shortfall in the supply of new three and four bedroom affordable homes to rent recorded through the monitoring of planning permissions in the latest published Annual Monitoring Report, the Council will apply a revised affordable housing for rent mix that seeks to reduce the proportion of one-bedroom dwellings to zero, in favour of increasing the proportion

of larger family homes, as households requiring one bedroom accommodation are most likely to have their need met from the current supply. The distribution of the 25% one bedroom dwellings between the larger family units will be calculated in accordance with the percentage shortfalls reported in the latest published monitoring report.

5.33 This revised requirement will only apply to the quantum of residential housing above the total number identified in the Local Plan, so as not to affect the viability of the residential housing mix tested in the Local Plan, with the additional housing being a windfall to the developer/landowner.

Worked Example

The latest Annual Monitoring Report demonstrates that only 20% of three bedroom (10% shortfall) and 5% of four-bedroom affordable homes (5% shortfall) for rent have been secured on threshold sites in a monitoring year. The overall shortfall of three- and four-bedroom dwellings is 15% but with a proportionately greater deficit (67%) of three-bedroom dwellings compared to four-bedroom dwellings (33%). To calculate the revised mix of units this percentage split is applied to the number of dwellings that would have been provided as one bedroom dwellings and added to the dwelling outputs of the percentage requirements in Table 5.

A notional site with a residential 'allocation' of around 100 dwellings in the Local Plan that when master-planned can demonstrate that it can sustainably accommodation 150 dwellings would result in an increased provision of 12 affordable housing for rent units since:

100 x 24.5% = 24.5 which is rounded up to 25 dwellings

150 x 24.5% = 36.75 which is rounded up to 37 dwellings

With the additionality calculated as the difference between 37 – 25 = 12 dwellings the following bedroom mix would be required:

Table 6 Affordable Housing for Rent Additionality

	24.5%	1 Bed	2 Bed	3 Bed	4 Bed
SHNA Mix on 100 dwellings	25 dwellings	6 (25%)	9 (35%)	7 (30%)	3 (10%)
Revised Mix on 50 Dwellings	12 dwellings	0	4 (35%)	4 (30%) + 2 (67% of 3) = 6	1(10%) + 1 (33% of 3) = 2
Total	37	6	13	13	5

5.34 The Council's Housing Strategy will provide additional information on the size and type of affordable housing required to meet priority housing needs. The Council does not specify the mix of homes needed to meet demand for affordable home ownership dwellings. The SHNA Addendum (2024) notes that there was no evidence of need for First Homes or discounted market housing more generally. Shared ownership housing is likely to be suitable for households with more marginal affordability as it has the advantage of a lower deposit and subsidized rents.

5.35 The SHNA (2023) suggests the following mix of affordable home ownership would be appropriate although it notes that to make shared ownership affordable, very low equity shares would need to be sold for three + bedroom homes. Even then, four-bedroom shared ownership housing cannot be made affordable.

Table 7 Bedroom Size of Affordable Home Ownership

Size of home	
One Bedroom	25%
Two Bedroom	45%
Three Bedroom	25%
4+ Bedroom	5%
Total	100%

5.36 Policy DM26 of the Local Plan requires all new dwellings to achieve appropriate internal space through adherence to the Nationally Described Space Standards.

5.37 To accommodate the full range of bedroom requirements and associated occupancy guidelines set out in the Council's Housing Needs Register and Allocation Policy; and reflect the fact that a significant proportion of households assessed on the Council's Housing Register as requiring each size of accommodation will be at the maximum occupancy level; the Council will require affordable homes for rent to achieve appropriate internal space and number of bed spaces through adherence to the minimum defined levels of occupancy set out in Table 8.

5.38 Three-bedroom, six-person affordable housing for rent could be acceptable in lieu of four-bedroom, six-person dwellings, when they comply with the minimum gross internal floor areas and storage requirements set out in Table 1 of the Nationally Described Space Standards and two separate reception rooms are provided.

Table 8 Minimum Gross Internal Floor Areas and Storage (sq.m) for Affordable Housing for Rent

Number of bedrooms	Number of bedspaces	1 Storey	2 Storey	3 Storey	Built-in storage
1 bed	2 persons	50	58		1.5
2 bed	4 persons	70	79		2.0
3 bed	5 persons	86	93	99	2.5
4 bed	6 persons	99	106	112	3.0
5 bed	7 persons	112	119	125	3.5

Wheelchair Accessible Homes

5.39 Policy DM1 (Bi) states that within developments of 30 or more dwellings, the Council will require 5% of new affordable dwellings to be built to meet the requirements of Part M, Category 3 (Wheelchair user dwellings) M4 (3) (2) (b) of Schedule 1 (para1) to the Building Regulations 2010 (as amended), or subsequent government standard.

5.40 Part M of the Building Regulations sets a distinction between wheelchair accessible (a home readily useable by a wheelchair user at the point of completion) and wheelchair adaptable (a home that can be easily adapted to meet the needs of a household including wheelchair users) dwellings.

5.41 Local Plan policies for wheelchair accessible homes should be applied only to those dwellings where the local authority is responsible for allocating or nominating a person to live in that dwelling. They will need to be provided in a range of sizes as set out in the Wheelchair Accessible Homes Planning Advice Note, which is updated annually.

5.42 Wheelchair accessible homes in flats should only be provided on the ground floor to ensure an occupant can facilitate their own escape unassisted in the event of a fire. Any communal doors must enable remote access. Wheelchair users should have access to all parts of a dwelling. Within all wheelchair accessible homes, the principal living areas, i.e. the living, dining and kitchen space should be within the entrance storey, as well as a wet room (including an installed level access shower). All bedrooms should be accessible to a wheelchair user with various minimum dimensions and space clearance zone set out in the regulations.

5.43 For wheelchair accessible homes, the occupancy levels for each dwelling should allow for one additional person per bedroom size than those stated in Table 8 above for two-bedroom plus dwellings, with the corresponding increase in sqm set out in the Nationally Described Space Standards. Ideally, this will be provided in the form of an additional reception room on the ground floor.

5.44 The Council will apply a planning condition that ensures that 5% of all new affordable homes on developments of 30 or more dwellings meet the requirements of Part M, Category 3 (Wheelchair user dwellings) M4(3)(2)(b) of Schedule 1 (para 1) to the Building Regulations 2010

(as amended) to ensure that the planning permission, under which the building works is carried out, meets the needs of occupants of the affordable housing for rent that use a wheelchair at the point of completion.

5.45 Where the 5% requirement does not result in whole numbers of units, the number of affordable dwellings for rent that meet the requirements of Part M, Category 3 (Wheelchair user dwellings) M4(3)(2)(b) of Schedule 1 (para 1) to the Building Regulations 2010 (as amended), will be rounded up.

Location of Affordable Housing

5.46 Affordable housing is an integral element of any market-led residential or mixed used development and is expected to be provided in-kind and on-site. The NPPF states that there is an expectation that the need for affordable housing is met on-site unless off-site provision or an appropriate financial contribution in lieu can be robustly justified and the agreed approach contributes to the objective of creating mixed and balanced communities.

5.47 The Council may consider a financial contribution in lieu of on-site provision of equivalent value on development sites which comprise between 10 and 15 units, to improve the provision of temporary accommodation for homeless households; or meet other affordable housing priorities identified in the Housing Strategy, which cannot be met on-site.

5.48 The ability to consider a financial contribution in lieu of on-site affordable housing provision will also enable the Council to improve the temporary accommodation offer. The Council has a limited portfolio of accommodation and is currently dependent on the private sector to meet the demand for temporary accommodation. This restricts the Council's ability to respond flexibly to changing patterns in demand for temporary accommodation and manage its statutory duties as a local housing authority.

5.49 Where the Council agrees to a commuted sum in lieu of an on-site affordable housing contribution, the methodology that will be used is to adopt the most recent new build sales values from the **appropriate typology** and location in the latest published Local Plan Viability Update, and then deduct from that the amount that a Registered Provider would pay for those units as affordable units, also using assumptions applied in the latest published Local Plan Viability Update. The difference is the commuted sum. For ease of reference, the relevant market values for each typology are listed below:

Table 9: Local Plan 2026 Price Assumptions		
Typology	**Area**	**£ per sqm**
Brownfield	Chelmsford	5,292
	South Woodham Ferrers	4,500
Urban Flats	Chelmsford	5,300
Large Greenfield	Chelmsford	5,047
	South Woodham Ferrers	4,300
Medium Greenfield	South West Area	5,292
	Eslewhere	4,300
Small Greenfield	All areas	5,400

5.50 The calculation of the commuted sum will be based on the proposed mix of market housing and will assume the affordable housing proportionately reflects the market mix of housing in terms of the bedroom size of the proposed market housing and the mix of flats and houses. If the proposed housing consists of maisonettes, the calculation will apply either the values of flats or houses, whichever is closest in square meters to the size of the maisonette of the relevant bedroom size. The floor area in sq.m for each property size will reflect the floor areas in Table 8.

5.51 The only exception to the above is where a calculation in lieu of on-site provision of affordable housing is sought from Co-living Housing. In this instance the commuted sum will be calculated based on the average size in sqm of the proposed Co-living Housing unit, rather than assign a floor area from those set out in Table 8. Otherwise, the calculation will be the same and based on market values less the amount a Registered Provider could pay for them (affordable rental value) using values in the latest published Local Plan Viability Update.

5.52 The calculation of the commuted sum will reflect all other requirements in this section of the SPD, except where an application benefits from a vacant building credit. Where a vacant building credit also applies, the calculation of the commuted sum will reflect an affordable housing contribution consisting of affordable housing for rent only.

5.53 An example of the calculation of a commuted sum in lieu of on-site affordable housing based on a market proposal consisting of 5 two-bedroom flats and 10 three-bedroom houses, is provided in Table 10. The mix of affordable homes for rent in the example in Table 10 reflects the need for affordable homes for rent set out in Table 5 and that the demand for affordable homes for shared ownership is predominantly for smaller dwellings.

5.54 If a commuted sum in lieu of on-site affordable housing is agreed by the Council, the commuted sum will need to be paid at commencement of the development.

5.55 Outline planning applications that include a commuted sum in lieu of on-site affordable housing will include the formula for calculating the commuted sum in the Section 106 agreement, using this guidance. Full planning applications, where the market mix of residential dwellings is agreed, will state the commuted sum amount and be index linked. An example showing the commuted sum calculation for a 15-unit small greenfield scheme is set out in Table 10 below.

Table 10 Example Calculation of a Commuted Sum in Lieu of Affordable Housing on-site

Size (Bedrooms)	Size sq.m (Flats/ Houses)	Market Housing Mix		Affordable Housing Mix				Market Value	Affordable Value	Commuted Sum
				Affordable Rent		Affordable Home Ownership				
		Flat £5,400 sq.m	House £5,400 sq.m	Flat £2,970 sq.m	House £2,970 sq.m	Flat £3,780 sq.m	House £3,780 Sq.m			
1	50/58									
2	70/79	5				2		2 x 70 = 140 x £5,400 = £756,000	2 x 70 = 140 x £3,780 = £529,200	£226,800
3	86/93		10		4			4 x 93 = 372 x £5,400 = £2,008,800	4 x 93 = 372 x £2,970 = £1,104,840	£903,960
4	99/106									
5	112/119									
Total		15		4		2		£2,764,800	£1,634,040	**£1,130,760**

Layout

5.56 To achieve mixed, inclusive and sustainable communities the Reasoned Justification for Policy DM2 sets out that affordable housing should:

a) Be provided in more than one single parcel except in schemes where the overall number of residential dwellings is below 15 units.

b) On sites incorporating 30 or more residential dwellings, affordable housing should be provided in groups of no more than 15% of the total number of dwellings being provided or 25 affordable dwellings, whichever is less.

5.57 If the Council accepts that there are legitimate concerns relating to the management or maintenance of predominantly flatted development, which prevents pepper potting in strict accordance with this SPD, the Council will expect the provider of the affordable housing to be given an option to opt out of any management arrangements and costs associated with the remainder of the site.

5.58 Detailed plans submitted to the Council for planning consideration should clearly show the location and layout of all affordable dwellings within the development. The affordable housing provision should not be disproportionately concentrated above any non-residential uses.

5.59 Where possible the Council requires the same level, design and layout of car parking provision to apply to affordable and market housing. As a minimum, parking provision for affordable housing must comply with Policy DM27.

Green Belt

5.60 The NPPF states when considering any planning application, local planning authorities should ensure that substantial weight is given to any harm to the Green Belt, including harm to its openness. Inappropriate development is harmful to the Green Belt and should not be approved except in very special circumstances. Paragraph 154 of the NPPF lists some exceptions where development could be appropriate, which includes limited affordable housing for local community housing needs such as a rural exception site.

5.61 Paragraph 155 of the NPPF describes the circumstances in which development in the Green Belt should not be regarded as inappropriate and this includes:

5.61.1 The development would utilise grey belt land and would not fundamentally undermine the purposes (taken together) of the remaining Green Belt across the area of the plan;
5.61.2 There is a demonstrable unmet need for the type of development proposed;
5.61.3 The development would be in a sustainable location, with particular reference to paragraphs 110 and 115 of the NPPF; and
5.61.4 Where applicable the development proposed meets the Golden Rules requirements set out in paragraphs 156-157 of the NPPF.

5.62 As part of the 'Golden Rules' for Green Belt development set out in paragraphs 156-157 of the NPPF, a specific affordable housing requirement should be set for major development involving the provision of housing, either on land which is proposed to be released from the Green Belt, or which may be permitted within the Green Belt.

5.63 The affordable housing requirement for development proposals of 10 or more dwellings on land within or released from the Green Belt will be at least 50% of housing must be affordable. The affordable housing must include 15% social rent housing, and 24.5% affordable rent capped at Local Housing Allowance levels to address priority housing needs. The remaining 10.5% can be provided as shared ownership housing.

5.64 Small sites which comprise less than 10 dwellings and/or sites of less than 0.5 hectares within Designated Rural Areas that are located within the Green Belt and adjacent to a Defined Settlement Boundary and accessible to local services and facilities will be required to comply with Policy DM2 (B).

Rural Exception Sites

5.65 In the circumstances described in Policy DM2 (B), small affordable housing developments to meet local needs will be permitted within Designated Rural Areas which would not otherwise be released for housing. These will only be permitted if it can be demonstrated that there is a proven need for the number, type and tenure of dwellings proposed, and the Council is satisfied that the affordable housing will remain affordable and exclusively available for local needs in perpetuity.

5.66 The Reasoned Justification for Policy DM2 (B) identifies the Designated Rural Areas to which Policy DM2 (B) applies.

5.67 All Rural Exception Site applicants must be accompanied by a local housing need survey which should contain the information set out in the Reasoned Justification for the Policy DM2 (B). In addition, the survey analysis should identify types of local connection that households in housing need have with a Parish to inform the proposed method for prioritising and allocating the dwellings.

5.68 If a survey of local housing need supporting an application under Policy DM2 (B) has been conducted more than four years prior to a planning application being submitted, the Council will require the housing need and affordability data to be updated to ensure the continued suitability of the proposed housing to meet local needs.

5.69 Any local housing needs survey which has been conducted more than five years prior to a planning application being submitted, will not be considered adequate to support a development proposal under Policy DM2 (B).

5.70 The Council's Housing Register provides supplementary information on households in housing need that would prefer to live in a specific Parish. The Council can also provide information on the number of existing affordable homes and vacancies that have occurred in a Parish. If requested, this information can supplement a local housing needs survey but will not substitute it.

5.71 To ensure future occupancy from within the parish-wide survey area, applicants should plan to meet, in aggregate, 50% of the identified local housing need for affordable housing.

5.72 The Rural Community Council of Essex (RCCE) employs a Rural Housing Enabler to advise and assist Parish Councils and rural communities on conducting effective local housing need surveys. The Council expects all applicants proposing Rural Exceptions Sites to work in partnership with the Rural Housing Enablers and Parish Councils to identify the local housing need.

5.73 The Council encourages all applicants proposing affordable housing on Rural Exception Sites to work with a Registered Provider that supports the work of the Rural Housing Enabler employed by the RCCE. These Registered Providers have experience in delivering affordable housing in rural areas and work within an agreed framework.

First Homes Exception Sites

5.74 On 24 May 2021, the Government published a Written Ministerial Statement that set out plans for delivery of First Homes. First Homes are a specific kind of discounted market sale housing which must:

5.74.1 be discounted by a minimum of 30% against market values;
5.74.2 can only be sold to a person or persons meeting the First Homes eligibility criteria;
5.74.3 after the discount has been applied, the first sale must be no higher than £250,000 outside of London;
5.74.4 on the first sale, a First Home will have a restriction registered on the title of the property at HM Land Registry to ensure the discount (as a percentage of current market value) and certain other restrictions are passed on at each subsequent title transfer.

5.75 The First Homes eligibility criteria is set out in NPPG and advises that a purchaser (or, if joint purchase, all purchasers) of a First Home should be a first-time buyer as defined in paragraph 6 of schedule 6Za of the Finance Act 2003 for the purposes of Stamp Duty Relief for first-time buyer. Purchasers of a First Home, whether individuals, couples or group purchasers, should have a combined annual household income not exceeding £80,000 in the tax year immediately preceding the year of purchase. A purchaser of a First Home should also have a mortgage or home purchase plan (if required to comply with Islamic law) to fund a minimum of 50% of the discounted purchase price.

5.76 As part of Section 106 agreements, local authorities can apply eligibility criteria in addition to the national criteria described above. In Chelmsford, the following additional local criteria will apply to all First Homes on initial sales and resales for a period of three months from when a home is first marketed:

5.76.1 Households with an adult that at the time of marketing the First Homes lives or works in the administrative area of Chelmsford City Council; or
5.76.2 Households with an adult that at the time of marketing the First Home is an essential local worker (as defined in the NPPF) working in the administrative area of Chelmsford.

5.77 For an adult to meet the requirement of working in Chelmsford, they must be contracted to work with a company based in Chelmsford on either a full or part-time basis.

5.78 Annex 2 of the NPPF (2023) defines Essential Local Workers as public sector employees who provide frontline services in areas including health, education and community safety such as NHS staff, teachers, police, firefighters and military personnel, social care and childcare workers.

5.79 If a suitable buyer has not reserved a home after three months, the eligibility criteria for First Homes will revert to the national criteria to widen the consumer base.

5.80 In accordance with NPPG, the local eligibility criteria will be disapplied for all active members of the Armed Forces, divorced/separated spouses or civil partners of current members of the Armed Forces, spouses or civil partners of a deceased member of the armed forces (if their death was wholly or partly caused by their services) and veterans within 5 years of leaving the armed forces.

5.81 A First Homes exception site is a housing development that comes forward outside of local or neighbourhood plan allocation to deliver primarily First Homes as set out in the First Homes Written Ministerial Statement.

5.82 First Homes exception sites must include at least 25% of the homes proposed as affordable housing for rent to meet the most acute housing needs identified on the Council Housing Register at the time a planning application is submitted. The SHNA (2023) and SHNA Addendum Report (2024) note that there is an acute need for affordable housing in the administrative area of the Council and most of the need is from households who are unable to buy or rent and therefore points particularly towards a need for rented affordable housing.

5.83 The First Homes Exception Site policy in Policy DM2 (C) cannot be applied in the Green Belt.

5.84 In the circumstances described in Policy DM2 (C), planning permission will be granted for First Homes Exception sites.

Community-led Exception Sites

5.85 National Planning Policy states that local planning authorities should support the development of exception sites for community-led development on sites that would not otherwise be suitable as rural exception sites and on land which is not already allocated for housing.

5.86 In the circumstances described in Policy DM2 (D), planning permission will be granted for Community-led Exception sites.

6 Physical Infrastructure - Highways, Access and Transport

Policy Background

6.1 Section 9 of the NPPF requires a planning system to promote sustainable transport. The provision of viable transport infrastructure necessary to support sustainable development is important in facilitating sustainable development.

6.2 Strategic Policy S9 sets out the infrastructure required to facilitate the development set out in the Local Plan. Priorities for infrastructure provision or improvements are also contained within relevant Strategic Policies and Site Allocation policies.

6.3 Strategic Policy S10 sets out that infrastructure must be provided in a timely and, where appropriate, phased manner to serve the occupants and users of the development. Where development proposals require additional infrastructure capacity to be deemed acceptable, mitigation measures must be agreed with the Council and the appropriate infrastructure providers. Such measures can include:

- financial contribution towards new or expanded facilities and the maintenance thereof;
- on-site provision (which may include building works);
- off-site capacity improvement works; and/or
- the provision of land.

6.4 In negotiating planning obligations, the Council will consider local and strategic infrastructure needs.

6.5 Chelmsford benefits from good road accessibility to London and the wider region including Braintree, Stansted, Cambridge, and South Essex. The IDP summarises the capacity issues on the current road network which cause incidents, congestion and issues with journey reliability.

Possible Section 106 Obligations

6.6 ECC is the Highway and Transportation Authority for the Chelmsford City area. Chelmsford City Council consults ECC on planning proposals that affect the highway network. ECC provides advice on the scope of obligations for highway infrastructure works where it is considered that there is a need to mitigate the impact of new development(s) on the highway network.

6.7 All development proposals will be assessed on their own merits in relation to the impact they have upon the highway network. There are no types of development which are exempt from necessary highway infrastructure obligations. There are several proposed interventions to improve active travel in Chelmsford, and it will be important to ensure alignment with these as the Local Plan progresses. Cycle and walking network routes that promote active travel and a viable alternative to the car will be a key consideration for new development. The list of possible Highways, Access and Transport contributions may include:

- Access road from the highway into the site
- Bus Priority/Chelmsford Rapid Bus Transit (ChART) Bus services, Park and Ride and infrastructure
- Contribution to Car Clubs/Care Sharing schemes
- Active and Sustainable travel routes (Walking, Cycling and Public Transport links/improvements/crossing) and other infrastructure (e.g. seating, poles, real time passenger information)
- Multimodal Cycle, Pedestrian and Public Transport bridges
- Cycle parking on-street
- Link roads
- Mobility Hubs
- New junctions and capacity improvements
- New roads
- Pedestrian crossings
- Public Right of Way
- Raised kerbs
- Signage
- Traffic Regulation Orders e.g. to impose waiting restrictions
- Traffic lights
- Travel Planning (residential, workplace, school etc)
- Electric vehicle charging point infrastructure

Timing/Trigger for payment or provision of works

6.8 The developer is required to implement the agreed highway infrastructure works in such a way that the works can be adopted by the Highway Authority once it has been agreed that they are built to an adoptable standard. In general, the developer is obliged to submit suitable detailed engineering drawings to the Highway Authority prior to any commencement of the development on site, for the Highway Authority's approval.

6.9 Unless otherwise agreed, before occupation of a development, the developer is usually obliged to implement the approved scheme, and the Highway Authority will issue a certificate of practical completion. The developer will still have responsibility for maintaining the highway works for a minimum of 12 months and to carry out any remedial works required since the issue of the certificate of practical completion. After the 12-month period, or when the remedial works have been satisfactorily completed, a certificate of adoption will be issued, and the works adopted by the Highway Authority.

6.10 Developers will be required to pay fees to cover ECC's costs incurred in approving the detailed engineering drawings, processing and advertising Traffic Regulation Orders, and for inspecting the highway works and issuing the relevant certificate. Details of these fees are to be included in the Section 106 Agreement. A Section 278 Agreement under the Highways Act 1990 between the developer and the Highway Authority is the preferred mechanism for securing alterations or improvements to the public highway and is separate to a Section 106 Agreement. The full details of the processes will be set out in any relevant Section 106 or Section 278 Agreements.

6.11 ECC has published the 'Transport Assessment Guide for Large-Scale Developments and Garden Communities: A Guide for Developers' and a 'Travel Plan Guide for Large-Scale Developments and Garden Communities: A Guide for Developers'. These Guides relate to large-scale development of 1,000 residential units and/or 250+ employees delivered by one individual developer or delivered cumulatively by multiple residential developers and/or developments of high complexity/high potential highway and transport impacts (determined by the Highway Authority) A Transport Assessment Inception Meeting and Scoping Fee is required to be paid by the developer at the very outset of the process, once the need for a Transport Assessment has been established. The fees cover ECC's staff time in supporting the Pre-Application / Scoping Phase.

6.12 ECC staff time in supporting the Travel Plan process will be secured through developer contributions with set fees to be paid by the Developer, to ECC, with regards to the scoping; evaluation; and monitoring and support of Travel Plans.

Maintenance Payments

6.13 Where the infrastructure includes items with the possibility of a major maintenance requirement e.g. traffic signals or where the works are beyond the usual ECC specification, the Highway Authority requires a commuted sum from the developer to maintain that infrastructure. Where the Highway Authority takes assets from developers, there is a requirement for maintenance costs for the life of the assets, and replacement costs at the end of their useful life. Further information on this matter is available in ECC's Guide to Infrastructure Contributions (Revised 2024, Section 5.5).

Further Information

Insurance

6.14 Where a developer intends to carry out works to/in the public highway they will be required to provide third party insurance.

Bonds

6.15 Developers will be required to enter into a bond for an amount specified by the Highway Authority to ensure that the highways works are completed to the Authority's satisfaction, should the developer default on any of its obligations in relation to the works. This bond will vary depending on the work required. The bond can be a formal bond with an approved third-party surety, or it can be a deposit in cash to ECC as the Highway Authority.

6.16 Land compensation bonds will be required where there is a possibility of existing properties being affected by new highway development, e.g. by increased noise resulting from new highway development, including the possibility of a reduction in value.

7 Physical Infrastructure - Flood Protection and Water Management/Efficiency

Policy Background

7.1 Section 14 of the NPPF deals with the challenge of climate change, flooding and coastal change. It states that the planning system should support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change.

7.2 Strategic Policy S2 states that the Council will require that all development is safe, considering the expected life span of the development, from all types of flooding and appropriate mitigation measures are identified, secure and implemented. New developments should not worsen flood risk elsewhere.

7.3 Strategic Policy S4 sets out that new development will be expected to incorporate well connected, multi-functional network of green and blue infrastructure that protects, enhances and restores ecosystems and allows nature recovery across the Council's area. It also sets out that the Council will ensure that new development does not contribute to water pollution and where possible enhance water quality and water-related biodiversity taking account of Water Framework Directive objectives and River Basin Management Plan actions.

7.4 Strategic Policy S9 confirms that new development should be safe from all forms of flood risk and that strategic and/or site-specific measures may be needed to achieve this. As part of the Flood Resilience Partnership, the City Council and the Environment Agency are working together to devise main river, city centre and catchment-wide measures to safeguard Chelmsford City Centre.

7.5 Strategic Policy S10 clarifies that planning permission will only be granted if it can be demonstrated that there is enough appropriate infrastructure capacity to support that development or that such capacity will be delivered by a proposal and that such capacity is sustainable over time.

7.6 Strategic Policy S11 recognises the important function of the areas around the main river valleys both in terms of distinctive landscape qualities as well as flood storage. Policy DM18 sets out that planning permission for all types of development will only be granted where it can be demonstrated that the site is safe from all types of flooding and the development does not worsen flood risk elsewhere. It also provides detailed flood protection and water management requirements where development is proposed within areas of flood risk. It also states that planning permission for all types of development will only be granted where it can be demonstrated that the site is safe from all types of flooding. All major developments will be required to incorporate water management measures to reduce surface water run-off and ensure that it does not increase flood risk elsewhere.

7.7 In considering proposals for development the Council will follow a sequential risk-based approach, including the application of the 'exception test' which should consider flood risk from all sources when considering whether development in that location is appropriate.

7.8 Policy DM25 requires all new dwellings to achieve a water efficiency standard of 90 litres/person/day and to provide integrated water management techniques to optimise rainwater harvesting on site to minimise overall water consumption and maximise its reuse.

7.9 Level 1 and Level 2 Strategic Flood Risk Assessment (SFRA) for Chelmsford was published in February and May 2024 respectively. Some new and updated Level 2 site assessments were also published in January 2025 and November 2025. The Level 1 SFRA states that the main sources of flood risk in Chelmsford are fluvial (rivers), sea and surface water. There are numerous recorded flooding incidents across Chelmsford, predominantly in the vicinity of the City Centre.

Possible Section 106 Obligations

7.10 Areas of flood risk include risk from all sources of flooding such as rivers and the sea, directly from rainfall onto the ground surface and rising groundwater, overwhelmed sewers and drainage systems and from other water bodies. The agencies responsible for different sources of flooding are set out in the Infrastructure Delivery Plan.

7.11 In Chelmsford the principal sources of flood risk are from its rivers, the tidal River Crouch at South Woodham Ferrers, ground water and storm rainfall giving rise to extreme levels of surface water run-off.

7.12 The development strategy for Chelmsford seeks to avoid development in areas which are prone to flooding. Flood risk mitigation will need to be considered on a site-specific basis and respond to the conclusions of the Level 2 Strategic Flood Risk Assessment work for Chelmsford. The Level 2 Strategic Flood Risk Assessment includes detailed assessments of the site allocations in the Pre-Submission Local Plan and Focused Consultation Additional Sites Document.

7.13 In relation to fluvial flooding, the main watercourses associated with fluvial risk to the sites are the River Chelmer, River Can, River Crouch, and Sandon Brook. There are also other smaller watercourses and drainage channels presenting a fluvial risk to sites across Chelmsford - developers are likely to need to undertake detailed modelling to inform site-specific Flood Risk Assessments for these sites.

7.14 As part of the Flood Resilience Partnership, the Council and the Environment Agency are working together to devise main river, city centre and catchment-wide measures to safeguard Chelmsford City Centre. A series of flood resilience interventions along the main rivers, within the city centre and wider river catchment area are proposed. The precise locations of interventions are not yet determined however this has been included in the IDP and an indicative cost estimate has been identified based on discussions with the Environment Agency.

7.15 New development is likely to increase the risk of surface water flood risk, as the extent of built-up areas and the area of impermeable hard surfacing increases, meaning that mitigation measures such as Sustainable Drainage Systems (SuDS) are essential to reduce and manage the surface water flood risk. Additionally, the increase in runoff may result in more flow entering watercourses, increasing the risk of fluvial flooding downstream. In addition, climate change predictions indicate that the likelihood and frequency of surface water flooding will increase and this increase in risk must be considered when planning for new development within the administrative area. This is particularly important in those locations identified as Critical Drainage Areas.

7.16 As the Lead Local Flood Authority, ECC has produced a Surface Water Management Plan for the urban area of Chelmsford (2018). The Essex SuDS Design Guide (February 2020) sets out practical guidance for new development to promote SuDS. SuDs are most viable when considered early in the design process, so developers are required to engage in pre-application discussions with ECC (as Lead Local Flood Authority), and refer to ECC's SUDS Design Guide, and any future updates, when preparing applications incorporating SuDS schemes. ECC only adopts SuDS in exceptional circumstances and further guidance is contained in ECC's SuDS adoption policy.

7.17 All development proposals will be required to incorporate sustainable drainage principles and best practice for surface water management. This provides wider opportunities to propose flood alleviation schemes together with SuDS and green infrastructure inclusion to promote further green areas, strong green links to existing environment and benefit the community with use of multifunctional space.

7.18 There may be instances where individual sites come forward for development, which in turn raises issues of flood risk or water management. If these cannot be addressed on site or by way of condition, it is anticipated that a Section 106 Agreement may be needed. These may need to alleviate any/all forms of flood risk and such techniques could include:

- Flood alleviate controls - new or enhanced provision such as flood plains, levees, reservoirs
- Bio-retention areas
- Wetlands Channels Detention
- Basins ponds
- Infiltration/filtration
- Green roofs
- Permeable paving
- Rainwater harvesting

Timing/Trigger for payment or provision of works

7.19 There is no general rule for the timing of payments as each scheme will be judged on a case-by-case basis. Should off-site work be required, it is expected these would be in place prior to the first occupation or completion of the development.

Maintenance Payments

7.20 Where ECC is not the SuDS adoption body, the Council will work with developers to identify an alternative SuDS adoption body which could include a Water Authority or private management company. The Council will work with the developer to secure the long-term maintenance of all flood risk protection and water management through a combination of planning obligation, planning condition and commuted sum payment, guaranteeing their long-term maintenance.

8 Green and Blue Infrastructure - Recreation and Leisure

Policy Background

8.1 The NPPF states that the planning system has an important role in facilitating social interaction and creating healthy, inclusive and safe places. Safe and accessible green infrastructure and sports facilities make an important contribution to the health and well-being of communities. The Council recognises the important role community facilities such as social, sports and leisure, parks and green spaces, have in existing and new communities. These forms of infrastructure are highly valued and play a key role in the administrative area's sense of place and identity.

8.2 Strategic Policy S4 requires a well-connected multifunctional network of green and blue infrastructure that enhances the natural environment and improves water-related biodiversity, as well as providing amenity interest.

8.3 Strategic Policy S5 states that new facilities will be accessible to the community and secured by a range of funded measures, including planning obligations.

8.4 Strategic Policy S9 sets out that infrastructure necessary to support new development must provide or contribute towards ensuring a range of green and natural infrastructure. It also details a range of community facilities required to support new development, including sport leisure and recreation facilities.

8.5 Strategic Policy S10 describes some of the mitigation measures that will be required where additional infrastructure capacity is required. Strategic Policy S14 sets out how health and wellbeing can be encouraged and improved through high quality planning, design and management of the environment, including through the provision of open spaces.

8.6 Strategic Policy S17 sets out how City Centre developments should provide areas of functional open and green spaces for residents in the area.

8.7 When delivering new community facilities, Policy DM20 seeks to ensure that these facilities are accessible by sustainable modes of transport, physically compatible in form and appearance with their surroundings and cater for people with disabilities.

8.8 Policy DM24 embeds requirements for multifunctional public open space, to provide opportunities to promote healthy living and improve health and wellbeing and create attractive multi-functional public realm in the design and place shaping of new major developments.

8.9 Policy DM26 and Appendix B of the Local Plan provide further requirements for the provision of open space that applies to all new dwellings.

8.10 As part of the evidence base for the Local Plan, the Council has undertaken:

- Chelmsford City Council Open Space Study 2024, which covers all types of open space. It includes new open space standards which are set out in Appendix B of the Local Plan.

- Chelmsford City Council Playing Pitch and Outdoor Sports Assessment and Strategy 2024 which covers all outdoor sports requirements for both winter and summer sports. Sport England's Playing Pitch Calculator and Sports Facility Calculator are used alongside this strategy to help estimate the demand that may be generated for the use of playing pitches and outdoor sports facilities by a new population.

- Chelmsford City Council /Indoor Sports Assessment and Strategy 2024, which covers the indoor needs assessment and indoor sports strategy. Alongside the Assessment, Sport England's Playing Pitch Calculator and Sports Facility Calculator have been used to arrive at the recommendations in the Strategy.

Possible Section 106 Obligations

Open Space

8.11 Local Open Space in its entirety should be provided in accordance with the requirements of the site policies and Appendix B of the Local Plan. It may include:

- Allotments
- Children's play and youth facilities
- Cycle and footway links and improvements
- Informal local open space or amenity green space.

8.12 Strategic Open Space in its entirety should be provided in accordance with the requirements of the site policies and Appendix B of the Local Plan. It may include:

- Country Park
- Natural green space
- Outdoor sport and changing facilities
- Parks, Sport and Recreation grounds

8.13 New facilities should seek to offer flexible uses and combine facilities and services which might have historically been provided on a separate basis.

8.14 Access and quantity standards for the study for different types of open space are summarised in table 14 of Appendix B of the Local Plan and table 15 of Appendix B provides the quantity standard for accessible Local Open Space and Strategic Open Space.

8.15 Paragraph B.29 of Appendix B of the Local Plan converts the quantity of standards in table 15 to a dwelling requirement of 29 sqm per dwelling for Strategic Open Space, 43 sqm of Natural and Semi-natural open space, and a Local Open Space requirement of 22 sqm per dwelling, producing a total requirement of 94 sqm per dwelling. The proportions of different types of open space within the overall quantum should reflect the proportions contained within the quantity standards unless a different approach is agreed with the Council.

8.16 Table 16 of Appendix B of the Local Plan provides the thresholds for on or off-site provision of open space and is replicated below in Table 11:

Table 11 Thresholds for on or off-site provision of open space

Size of Scheme	Provision
Less than 10 dwellings	No provision required on site
10-29 dwellings	Accessible Local Open Space required at 22 sqm per-dwellings
30 dwellings or more	Accessible Local Open Space required onsite at 22 sqm per-dwelling Strategic Open Space required on-site at 29 sqm per-dwelling Natural and Semi-natural greenspace required on-site at 43 sqm per-dwelling

8.17 Where provision is not required on-site, or the Council considers a commuted sum in lieu of on-site provision is acceptable, the following calculations will apply:

Table 12 Local Open Space Formula – commuted sum in lieu of on-site provision

Type of Open Space	Description	(A) Quantity standards (ha/1,000 population)	(B) Rate per Ha	(C) Contribution per 1,000 population (A x B)	(D) Rate per person (C/1,000)	(E) Rate per dwelling (D x 2.4)
Accessible Open Space						
Allotments	Opportunities to grow own produce	0.30	1,450,966.50	435,289.95	435.29	1,044
Amenity Green Space	Opportunities for informal activities close to home, work or enhancement of the appearance of residential or other areas	0.53	251,660.25	133,379,93	133.389	320
Play Space (children)	Areas designed primarily for play and social interaction involving children	0.05	139,259,25	13,925.93	13.93	33
Play Space (youth)	Areas designed primarily for play and social interaction involving young people	0.05				
Total		0.93	£1,841,886	£582,595.81	£582.61	£1,397

8.18 The Local Open Space formula is based on the 'Chelmsford Open Space Study 2024', the Spons External Works, Landscape Price Book, Council Maintenance DATA, Valuation Office, Play Equipment Manufacturers. A maintenance contribution is set out in each of the rates per hectare based on the cost of maintaining all the categories of open space set out above where a commuted sum in lieu of on-site provision of local open space is acceptable. The rate per hectare has been re-based to 2024 rates and will be inflated annually in accordance with the BCIS PUBSEC Tender Price Index of Public Sector Building Non-Housing Indices.

8.19 In all cases the calculations are based upon an occupancy rate of 2.4 people per dwelling (Census 2021).

8.20 Where a proportion of on-site provision is made, a pro-rata reduction will be made in calculating the level of the off-site contribution.

8.21 Financial contributions in lieu of on-site provision for Local Open Space may be spent on one or more of the infrastructure items listed in the above table as 'Accessible Open Space'.

Table 13 Strategic Open Space Formula – commuted sum in lieu of on-site provision

Type of Open Space	Description	(A) Quantity standard (ha/1,000 population)	(B) Council Rate per Ha	(C) Contribution per 1000 population (A x B)	(D)Rate per per person (C/1000)	(E) Rate per dwelling (D x 2.4)
Parks and Recreation Grounds	Parks, formal gardens and recreation grounds, open to the general public. Accessible, high-quality opportunities for informal recreation and community events.	1.23	£293,391.49	£360,871.53	£361	£866
Natural and Semi-natural greenspace	Woodland (coniferous, deciduous, mixed) and scrub, grassland (e.g. down-land, meadow) heath or moor, wetlands (e.g. marsh, fen) wastelands (including disturbed ground), barerock habitats (e.g. quarries), commons and Local Nature Reserves. Many sites are intentionally without ancillary facilities to reduce misuse/inappropriate behaviour whilst encouraging greater flora and fauna. A site threshold of 0.2ha is generally applied.	1.80	£251,660.25	£452,988.45	£453	£1,087
Total						£2,051

8.22 The Natural Green Space formula is based on the 'Chelmsford Open Space Study 2024 the Spons External Works, Landscape Price Book and Council Maintenance Data.

8.23 The contribution for 'Park and Recreation Grounds' is based on average capital costs (excluding land acquisition) incurred by the Council for new parks and informal recreation facilities at 2025, excluding playing pitches and outdoor sports facilities, which are separately calculated using Sport England's Playing Pitch Calculator and Sports Facility Calculator and identified in the IDP.

8.24 The dwelling rate is based on the calculation of how much strategic open space is required per dwelling, as set out in the Local Plan, using the quality standard for accessible local open space and strategic open space identified in the Chelmsford Open Space Study 2024.

8.25 Early engagement with the Council is recommended to ascertain the exact type of open space required if not set out in the IDP.

Waterways

8.26 Where development has a direct impact upon, or a close connection with the main waterways in the City area, particularly the Chelmer and Blackwater Navigation System, contributions may be required to improve facilities and access to the rivers. Such contributions will be considered on a case-by-case basis and could include:

8.26.1 the extension of riverside walks and cycle paths to improve accessibility;

8.26.2 additional greenspaces adjoining rivers and waterways;

8.26.3 the provision of boat porterage facilities, to enable canoes etc. to access the rivers;

8.26.4 improvements to moorings, towpaths and other navigational infrastructure such as bridges and locks;

8.26.5 ensuring better access to the waterways;

8.26.6 creating attractive river frontages and/or riverside terraces;

8.26.7 greening the engineered canalized sections of the river

8.26.8 increasing local connections to the footpath and cycle way network; removal of non-native invasive species;

8.26.9 removal of hard ban reinforcement/revetment or replacement with soft engineering solution.

Indoor Sports Facilities

8.27 Indoor sporting facilities are not a statutory service that local authorities are required to provide, however provision must still be ensured through the plan-making process for sports and leisure facilities.

8.28 The 2024 Indoor Sports Assessment and Strategy will be used to determine how existing provision needs to be improved or expanded and where new provision is required because of new development. Sport England's Facility Calculator has been used to estimate the likely quantity of badminton courts and swimming lanes required to meet additional demand generated by new development and the cost associated with additional facilities. These requirements are set out on a site-by-site basis in the IDP using Appendix 2 of the 2024 Indoor Sports Assessment and Strategy and Action Plan.

8.29 New secondary schools should include sports halls that are upgraded for community use and with secure community access.

8.30 For indoor facilities other than swimming pools and sports halls, the calculation of facility requirements including dedicated sports facilities arising from new housing development relies on the finding of the Chelmsford 2024 Indoor Sports Assessment. The identified need for dedicated sports facilities including a new indoor tennis facility, enhanced gymnastics facilities and improved indoor bowls facilities will be identified in the IDP when a strategy to meet these needs has been developed and costed.

Outdoor Sports Facilities

8.31 The 2024 Playing Pitch and Outdoor Sports Assessment and Strategy will be used to determine how existing provision needs to be improved or expanded and where new provision is required because of new development.

8.32 The 2024 Playing Pitch and Outdoor Sports Assessment and Strategy uses Sport England's Playing Pitch Calculator to estimate the additional pitch and tennis court requirements generated by housing sites in the Local Plan and the likely developer contribution generated. Where available, site-specific information has been incorporated into the IDP and will be kept under review.

8.33 Where it is determined that new provision is required within a development, priority will be placed on providing facilities that contribute towards alleviating existing shortfalls within the locality using the 2024 Playing Pitch and Outdoor Sports Assessment and Strategy. The preference is for multi-pitch and potentially multi-sport sites to be developed, supported by a clubhouse and adequate parking facilities which consider the potential for future Artificial Grass Pitch development.

Maintenance Payments

8.34 Maintenance contributions will be required for all open space provided on-site when responsibility for the long-term maintenance resides with Chelmsford City Council. This will be calculated according to the landscape layout and quantified elements to be provided by the developer and will be required for 25 years after completion.

8.35 The Council's preference is for all open spaces to be transferred to and adopted by the Council with a commuted maintenance sum. If a developer chooses to retain open space, it should be maintained by a recognised not-for-profit management trust. Where appropriate, and following negotiation between the relevant parties, open space can also be transferred to a Parish or Town Council.

8.36 Adoption of local open space would take place after any construction and development maintenance liability periods have expired. The local open space needs to be safe and fit for public use, in accordance with prevailing safety and public use standards at the time of adoption.

8.37 Adoption of strategic open space would take place after any construction and development maintenance liability period has expired. The strategic open space needs to be safe and fit for general public use, in accordance with prevailing safety and public use standards at the time of adoption.

8.38 As part of the adoption process, land ownership will then be transferred to the Council by appropriate conveyancing processes.

8.39 In the event of handover to the Council, sports turf areas and facilities require the sports turf to be appropriately established, but final sports use layout and preparations for public sports use such as linework and similar will be undertaken by the Council.

8.40 Should a developer wish to self-manage open space, the Council require public access agreements and an agreed maintenance specification and inspection regime, secured through a legal agreement. In addition, the Council would require a conditional performance bond issued by a reputable financial institution in favour of the Council, to a specified indexed linked amount calculated in reference to Tables 14 and 15. This would enable the Council to call upon the bond in the event of the owner of the open space becoming financially unviable or failing to comply with its management and maintenance obligations under the Section 106 agreement.

8.41 The financial contribution per dwelling towards the maintenance of Local Open Space transferred to the Council or a Parish or Town Council is set out in Table 14 and the IDP where relevant for developments where no landscaping scheme has been provided to the Council.

8.42 Where a landscaping scheme has been provided, the Council will provide the maintenance costs for the specific scheme based on the landscape plan showing the layout and functionality of the open space. The calculation will be based on estimate maintenance costs based on similar or equivalent locations and grounds maintenance unit costs at the time the landscape scheme is submitted. The annual maintenance sum will be calculated over a 25-year period including an allowance for inflation based on Bank of England rates and the City Council's investment factors applicable at the time. The commuted sum will be secured in a Section 106 agreement at the consent stage and transferred to the Council upon adoption of the open space.

Table 14 Local Open Space Formula – commuted maintenance sum

Type of Open Space	(A) Quantity standards (ha/1,000 population)	(B) Rate per Ha	(C) Contribution per 1,000 population (A x B)	(D) Rate per person (C/1,000)	(E) Rate per dwelling (D x 2.4)
Accessible Open Space					
Allotments	0.30	£10,855.04	£3,256.51	£3.26	£7.82
Amenity Green Space	0.53	£162,825.70	£86,297.62	£86.30	£207.11
Play Space (children)	0.05	£162,825.70	£8,141.29	£8.14	£19.54
Play Space (youth)	0.05	£162,825.70	£8,141.29	£8.14	£19.54
Total	0.93	£499,332.14	£113,978	£105.84	£254.01

8.43 The annual maintenance amount varies for each type of open space and has been re-based to 2024 costs.

8.44 The amount of financial contribution towards the maintenance of Strategic Open Space transferred to the Council or Parish or Town Council is set out in Table 15 and the IDP where relevant for development where no landscaping scheme has been provided to the Council.

8.45 Where a landscaping scheme has been provided the Council will provide the maintenance costs for the specific scheme calculated in accordance with the relevant paragraphs above. Unless exceptional circumstances apply, no public open space is adopted without a commuted sum for maintenance.

Table 15 Strategic Open Space Formula – commuted maintenance sum

Type of Open Space	(A) Quantity standard (ha/1,000 population)	(B) Council Rate per Ha	(C) Contribution per 1,000 population (A x B)	(D) Rate per person (C/1,000)	(E) Rate per dwelling (Dx 2.4)
Parks and Recreation Grounds	1.23	£273,872.83	£336,863.58	£336.86	£808
Natural and semi-natural greenspace	1.80	£28,946.80	£52,104.23	£52.10	£125
Total					£1,054

8.46 The annual maintenance amount varies for each type of open space and has been re-based to 2025 using average costs incurred by the Council for parks and informal recreation space. The maintenance costs associated with playing pitches will be calculated separately using Sport England's Playing Pitch Calculator which provides lifecycle costs that are list separately in the IDP where relevant.

Timing/Trigger for payment or provision of works

8.47 In the case of a large-scale development, it may be that the payments or provision would be phased to meet the proportional impact of each phase. Trigger points for payments or provision will be included in the legal agreement, as will the period in which any contribution will have to be spent.

9 Green and Blue Infrastructure - Environmental Mitigation

Policy Background

9.1 Paragraph 187 of the NPPF seeks to conserve and enhance the natural environment by protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils. It seeks for the planning system to recognise the intrinsic character and beauty of the countryside and wider benefits from its natural ecosystems, maintain the character of the undeveloped coast, minimise impacts on and provide net gains in biodiversity. The planning system should prevent new and existing development from contributing to, being put at unacceptable risk from, or being adversely affected by, unacceptable levels of soil, air, water or noise pollution and land instability. Remediating and mitigating despoiled, degraded, contaminated and unstable land are other ways of enhancing the environment.

9.2 Paragraph 193 of the NPPF states that where significant harm to biodiversity resulting from a development proposal cannot be avoided, adequately mitigated, or, as a last resort, compensated for, planning permission should be refused.

9.3 Strategic Policy S1 applies a series of Spatial Principals to ensure the Local Plan focuses growth in the most sustainable locations as well as securing the enhancement and extension of the City's green infrastructure resources.

9.4 Strategic Policy S2 seeks to mitigate and adapt to climate changes through several measures aimed at enabling future development to move to a net zero carbon future. This includes through protecting and providing opportunities for well-connected multifunctional green and blue infrastructure including city greening, woodland creation, tree planting and new habitat creation.

9.5 Strategic Policy S4 sets out that new development will be expected to incorporate multi-functional green spaces including providing biodiversity net gain (minimum of 10% and 20% at garden communities) which protects, enhances and restores ecosystems and allows nature recovery. It also includes a requirement for new development to not contribute to water pollution and where possible enhance water quality.

9.6 New developments will need to maximise opportunities for the preservation, restoration, enhancement and connection of natural habitats in accordance with the Local Nature Recovery Strategy and the Council's Green Infrastructure Strategic Plan. Contributions from qualifying residential developments within the Zones of Influence, as defined in the adopted Essex Recreational disturbance Avoidance and Mitigation Strategy (RAMS), will be secured towards mitigation measures identified in the RAMS. Major developments (defined as sites of 10 or more dwellings) may also be required to provide or contribute towards additional recreational mitigation measures to address stand-alone impacts of the proposal as identified in DM16. This will be informed by a review of the RAMS and SPD which is expected to be completed in 2026 and/or project level HRAs.

9.7 Strategic Policies S9 and S10 require new development to provide or contribute towards a range of multi-functional green, blue and natural infrastructure, nature recovery, net gain in biodiversity and public realm improvements.

9.8 The protection and promotion of ecology, nature and biodiversity in new developments including mitigation measures identified in the RAMS and biodiversity net gain requirements are set out in Policy DM16.

9.9 The protection of trees, woodland and landscape features are set out in Policy DM17, as well as the requirement for three new trees per net new dwellings for all new housing development.

9.10 Policy DM18 specifies that Sustainable Drainage Systems should be multi-functional to deliver amenity, recreational and biodiversity benefit for the built, natural and historic environment as well as providing water management measures.

9.11 The sustainability requirements the Council expects of dwellings and non-residential buildings is set out in Policy DM25, whilst the requirement for development to avoid unacceptable levels of pollution emissions from noise, light, smell, fumes, vibrations and other issues unless appropriate mitigation measures can be put in place, is set out in Policy DM29.

9.12 Policy DM31 lists the requirements for development to achieve net zero carbon development in operation.

Possible Section106 Obligations

9.13 Any environmental mitigation measures will be considered on a site-by-site basis. Most issues will be localised and are likely to be small scale where it is appropriate to deal with them by way of planning conditions. There may be circumstances where schemes require environmental mitigation measures to be included within a Section 106 Agreement.

9.14 The Council has declared a Climate and Ecological Emergency to focus attention on reducing carbon and greenhouse gas emissions in the area and to plan for a more sustainable future.

9.15 The Council's Climate and Ecological Emergency Action Plan includes undertaking a greening programme to significantly increase the amount of woodland and the proportion of tree cover in Chelmsford.

9.16 The Council requires all residential development to plant at least three new trees for every new home in the Local Plan to assist in the Climate and Ecological Emergency. In most cases the planting of new trees should take place in landscaped areas maintained as part of the public realm. On some sites it may be possible to include trees within large private gardens providing there is sufficient space to allow the tree to grow and flourish during its normal expected lifetime.

9.17 Where it is not practicable to plant trees on-site, a commuted sum of £300 per dwelling will be used towards the following:

- Woodland planting – 2 square metres per new dwelling, planted as whips on sites identified as suitable for woodland planting; and
- Individual trees – 1 tree per new dwelling planted as heavy standards, generally 12 – 14 cm girth at 1m up the stem. These will be planted as street trees, or in a park or other open spaces including highway verge.

9.18 The figure of £300 per new dwelling is based on:

- Woodland planting - £4 per sqm for the cost of planting and aftercare for mass woodland planting (excluding land purchase); and

- Individual trees - £292 per semi-mature tree (excluding land purchase). The cost estimate assumes the trees will be staked and equipped with a watering bag and intensively care for, including regular watering for three seasons after planting.

9.19 The financial contribution of £300 per new dwelling will be sought and can either be paid in advance before planning permission is granted or secured through a planning obligation. When only part of the tree planting provision is achieved on-site, the commuted payment will be calculated based on £100 per missing tree and contributions pooled to deliver tree planting where funding is sufficient and alternative suitable locations available.

9.20 The Council has a 10-year woodland and tree planting aspiration to plant 192,000 new trees, creating 92 additional hectares of woodland/tree cover. To help meet this aspiration, the Council will seek to use commuted sums in the way described above on land already in the Council's ownership. In exceptional circumstances, the Council will consider a proposal for planting on land not in its ownership, where there is a willing landowner on land that lies adjacent to the development site, and this arrangement would help screen new development and/or enhance existing green infrastructure.

9.21 Woodland planting will be native species, UK grown and sourced and selected from the following:

Field Maple (Acercampestre), Common Alder (Alnus glutinous), Downey Birch (Betula pubescens), Hornbeam (Carpinus betulus), Hazelnut (Corylus avellane), Hawthorn (Crataegus monogyna), Wild Privet (Ligustrum vulgare), Crab Apple (Malus sylvestris), Cherry Plum (Prunus cerasifera), Blackthorn or Sloe (Prunus spinosa), English Oak (Quercus robur), Goat Willow or Pussy Willow (Salix caprea), Guelder Rose (Viburnum opulus), Dog Rose (Rosa canina), Scots Pine (Pinus sylvestris), English Yew (Taxus baccata), Holly (Ilex aquifolium) and Wild service tree (Sorbus torminalis).

9.22 Individual tree species will generally be native with some exceptions to non-native, but in parks settings where a specimen tree is appropriate some more exotic stock may be used. The native stock includes English oak (Qurcus robur) and lime (Tilia x europaea). The non-native stock includes Norway maple (Acer plantanoides) and London plane (Platanus x hispanica). More exotic stock includes Sweet gum (Liquidambar styraciflua), Dawn redwood (Metasequoia glyptostroboides), Giant sequoia (Sequoiadendron giganteum), Indian bean tree (Catalpa bignonioides) and ornamental maple trees (Acer).

9.23 On-site trees will be required by planning conditions to be watered and protected. Council planted trees will be staked and equipped with a watering bag. They will be intensively cared for, including regular watering for at least three seasons after planting, until established.

9.24 The Council will monitor the number of new trees planted or funded through commuted sums to ensure compliance with the Chelmsford Climate and Ecological Action Plan. Applicants will be asked to complete the template below as part of their proposed landscaping scheme submitted with their planning application:

Category	No. of trees to be removed from the sites (LOSS)	No. of trees to be planted on site (GAIN)	No. of trees on site NET/OTHER
Existing trees			
Proposed tree removals (if applicable)			
Trees planted as compensation for existing tree loss			
New tree planting – individual trees on-site			
Total			
Is there a need for a contribution towards new tree planting off-site (Y?N) Is this a partial or full contribution (partial/full)			

9.25 Planting relating to commuted sums received in lieu of on-site provision will be recorded in the annual Infrastructure Funding Statement, where relevant.

9.26 Proposals for biodiversity net gain must take into account local priorities set out in the Local Nature Recovery Strategy which guides the delivery of biodiversity net gain projects in Essex, the Essex Green Infrastructure Strategy and Standards, and the Chelmsford Green Infrastructure Action Plan as well as be informed by a comprehensive understanding of habitats and species associated with a site.

9.27 The Council expects the requirements for biodiversity net gain to be provided within the application site boundary and to be secured for a minimum of 30 years after completion of the development. Where possible the Council will aim to secure biodiversity net gain for the lifetime of development. The Council will only consider off-site provision or the purchase of off-site biodiversity units if it can clearly be demonstrated that biodiversity net gain cannot be adequately achieved onsite. A Habitat Management and Monitoring Plan (HMMP) will be required where there are significant on-site enhancements or where net gain is to be delivered off-site. The HMMP must demonstrate how the land will be managed for a minimum period of 30 years from the completion of the development. The Council would encourage, where possible, securing

biodiversity net gain for the lifetime of development.

9.28 Off-site measures will be expected to be in reasonable proximity to the development, strategically located for nature conservation and be informed by local and national guidance and data. Early discussions with the Council and Essex Local Nature Partnership are encouraged if off-site provision is necessary.

9.29 The purchase of statutory Biodiversity Credits as a mechanism to achieve biodiversity net gain will only be considered as a last resort.

9.30 Biodiversity net gain proposals and where necessary, Habitat Management and Monitoring Plans, will be secured by a condition and/or legal agreement. This will include a requirement to cover the Council's costs associated with the long-term monitoring of the biodiversity net gain proposals.

9.31 Mitigation measures for protected sites (including SANG) can count towards BNG requirements as long as at least 10% of the biodiversity units come from additional activities other than mitigation and compensation. SANG provision must also demonstrate how through appropriate design and implementation that suitable habitats will be achieved to secure a genuine biodiversity uplift beyond Natural England's minimum SANG standards. Any additional features provided for BNG purposes should not conflict, and ideally complement, with the principal purpose of the SANG.

9.32 The RAMS provides a mechanism for local planning authorities to comply with their responsibilities to protect habitats and species in accordance with the UK Conservation of Habitats and Species Regulations 2017. Measures required to mitigate the impacts of recreational disturbance on European Protected Sites will be delivered as detailed in the RAMS and the Essex Coast RAMS SPD.

9.33 The Essex Coast RAMS SPD provides the scope of RAMS; the legal basis for RAMS; the level of developer contributions being sought for strategic mitigation and how and when applicants should make contributions.

9.34 Environmental matters which may be included in a Section 106 Agreement include, but are not limited to:

- Biodiversity offsetting
- Biodiversity net gain
- Major contamination issues
- Ecological mitigation/remediation
- Climate change mitigation, including tree planting and new woodlands
- Environmental enhancements
- Archeological investigations, access and interpretation
- Repair and re-use of buildings or other heritage assets

9.35 Further guidance on matters relating to biodiversity, which should be borne in mind when considering a site and preparing a planning application, is set out in ECC's Developers' Guide to Infrastructure Contributions (Revised 2024).

9.36 Some cases may require payments; other cases may require the details of mitigation measures to be included in an agreement so that a robust legal mechanism is in place to ensure appropriate mitigation is carried out. Each site will be considered on its own merits.

Timing/Trigger for payment or provision of works

9.37 The cost of such mitigation measures will normally be covered in full by the developer. Any contamination matters will usually be required to be dealt with fully prior to commencement of any development.

9.38 Environmental mitigation will largely be required to be carried out prior to the commencement of the development, with some further work being complete prior to first occupation of the development. Some further environmental issues may require ongoing mitigation to take place. Where the development cannot fully mitigate its impact on these environmental matters, compensatory measures may be sought. This will only be sought where all other avenues of mitigation have been exhausted. The appropriate level of contribution will be considered on a case-by-case basis.

Further Information

9.39 The Chelmsford Green Infrastructure Strategic Plan 2018 – 2036 provides a framework for the planning and management of Chelmsford's Green Infrastructure resources both in terms of the protection of its integrity and enhancement to the benefit of residents, workers and visitors considering the significant scale of growth to be accommodated over the duration of the Local Plan. The Essex Green Infrastructure Strategy (2020) and the Essex Green Infrastructure Standards (2022) champion the enhancement, protection, and creation of an inclusive and integrated network of green spaces. from a multifunctional perspective, combining uses such as sustainable drainage, public open space, walking and cycling routes and biodiversity conservation to combine functional uses with amenity benefits

10 Community Infrastructure - Early Years, Childcare and Education

Policy Background

10.1 As set out in paragraph 100 of the NPPF, the Government attaches great importance to ensuring that a sufficient choice of school places is available to meet the needs of existing and new communities. Non-statutory guidance for local authorities for education to support housing growth and developers' contributions is provided in the Department for Education publication – 'Securing developer contributions for education,' (August 2023).

10.2 Strategic Policy S5 recognises that an important element of sustainable development is the provision and protection of community uses such as schools.

10.3 Strategic Policies S9 and S10 set out the infrastructure required to support new development, including early years education and childcare, primary, secondary, and post 16 education provision and how to secure the infrastructure and mitigate impact.

10.4 Policy DM20 focuses on the accessibility of new community facilities by sustainable modes of transport and to the multitude of users that will access them. Policy DM22 seeks to protect existing education establishments, support their extension/expansion, and only permit their change of use if they are surplus to educational requirements.

10.5 Section 106 obligations will include obligations to provide suitable land and/or financial contributions towards additional school places in accordance with Policy S10.

Possible Section 106 Obligations

10.6 Chelmsford will see significant growth over the plan period. New early years, co-located with primary education, and standalone childcare provision, primary, secondary and SEND education are required to be provided on-site in various strategic locations. In all cases, the developer will provide the land or provision within the built form at the development and a proportion of the build cost generated from the need for places. The remainder of the cost will potentially be covered through pooled Section 106 contributions. If it is not planned to build a new school or nursery, financial contributions will be used to fund capital works to add additional capacity at schools, or existing nurseries in the appropriate area.

10.7 Where the need for new schools or nurseries is identified against a site, other sites that benefit may be required to contribute towards both land and build costs as pooled Section 106 contributions.

10.8 The IDP provides details of the contribution form for specific items of early years, childcare and education infrastructure for each site referenced in the Local Plan. It includes pooled Section 106 contributions towards the expansion of existing primary and secondary education in specific locations to address needs arising from sites identified in the Local Plan.

10.9 The Essex School Organisation Service's 10 Year Plan, 'Meeting the demand for school places in Essex', is published on an annual basis and sets out the forecasted availability of school places in Chelmsford. The need for additional school places to serve new development may vary over time. It is considered reasonable to take account of the future demand for places as well as

the current picture since: there will be a time lag between the planning application and completion of the development; the peak of additional demand for places generally comes a few years after a development is first occupied and the development will be a permanent feature of the local community and it should not cater just for its immediate impact.

10.10 ECC's Developer's Guide to Infrastructure Contributions (Revised 2024) provides information on Education contributions, which incorporates early years and childcare, primary, secondary, post 16 and Special Educational Needs. The Guide provides information on how the need for additional school and early years places are assessed; how to calculate demand from new housing development and additional site requirements. The Guide also provides information on ECC's statutory responsibility to make suitable travel arrangements free of charge for eligible children, which depending on the location of a development, may require a developer contribution.

10.11 A new all-through secondary school, including primary and early years, will be required on-site to support strategic growth at Chelmsford Garden Community (Location 6). New all-through secondary school, or a secondary school co-located with primary school and early years and childcare will be required at East Chelmsford Garden Community (Location 16). New co-located primary schools with early years and stand-alone early years and childcare nurseries are also required and identified in relevant site policies.

10.12 Site specific contributions for early years, childcare and education are set out in the IDP.

Provision of works

10.13 Details of the criteria that any new school or pre-school site must meet and requirements for the provision of land for new facilities are set out in the ECC's Developers' Guide to Infrastructure Contributions and the `Garden Communities and Planning School Places Guide'. This sets out the ECC approach to delivering new schools and ensuring there are sufficient pupil places to serve large new settlements that are planned. The `Local and Neighbourhood Planners' Guide to School Organisation explains how ECC will help develop local and neighbourhood plans to ensure there are sufficient school places from new developments.

10.14 The ECC Developers' Guide to Infrastructure Contributions (Revised 2024) provides details of how school sites should be laid out, including the environment around schools (Appendix D). On Strategic Sites, adherence to an approved Design Code may also be required. The Essex Design Guide (2018) provides a School Design Checklist and criteria, which provides further advice on how schools should be designed to encourage community access outside of school hours.

10.15 It should be noted that Sport England's Strategy includes goals relating to schools opening up, or keeping open, their sports facilities for local community use. Schools can potentially offer sports halls, studios, activity rooms, fitness facilities, swimming pools (as well as outdoor courts, grass pitches, artificial grass pitches) for community use. It should be recognised that the specification of sports facilities for School use and Community use can differ however, so enhancements may be required on a standard school specification to ensure community use. Consideration of ancillary facilities such as changing, WC, circulation, floodlighting and car parking facilities is also required. Sport England also offers a range of Design Guidance and advice to maximise the public benefit of community use of sport facilities on education sites. Where appropriate Section 106 Agreements will seek to secure community use of school facilities, and a

separate contribution will be levied for this purpose

10.16 The Indoor Sports Assessment and Strategy (2024) produced to support the review of the Local Plan states that new secondary schools should include Sport England design compliant sports halls.

11 Community Infrastructure – Health, Community Safety, Cohesion and Social Wellbeing

Policy Background

11.1 Paragraph 96 of the NPPF states that planning policies and decisions should aim to achieve healthy, inclusive and safe places by enabling and supporting healthy lifestyles and promoting community safety, cohesion and social interaction.

11.2 An important element of enabling and supporting healthy, safe and cohesive communities is the provision and protection of community uses, such as health, policy, fire and rescue, ambulance and recreation and the access populations have to the environments and infrastructure that supports community health, safety, cohesion and well-being. Strategic Policy S5 requires the protection and enhancement of community assets whilst Strategic Policy S4 requires a well-connected multifunctional green and blue infrastructure network, helping to promote health and wellbeing.

11.3 Strategic Policies S9 and S10 state that new development must provide a range of infrastructure including essential primary, acute and community healthcare provision and ambulance facilities and wellbeing facilities and measures that mitigate the impact of new development.

11.4 Strategic Policy S14 seeks to ensure that future development proposals go further to support improvements in health and wellbeing of residents and communities, promote active and healthier lifestyles and reduce health inequalities. The policy also requires certain developments to undertake a Health Impact Assessment, making recommendations on how positive health impacts could be maximised and negative impacts on health and inequalities avoided or mitigated.

11.5 Strategic Policy S16 seeks to ensure that future development proposals maximise opportunities for active and sustainable travel with well-designed walking and cycling networks.

11.6 Strategic Policy S17 promotes a City Centre that multifunctional green routes and improvements to the recreational potential of the waterways and their associated green spaces.

11.7 Policy DM20 provides the requirements for community facilities for planning permission to be granted and Policy DM24 requires the built form and design of new development to provide opportunities to promote healthy living and improve health and wellbeing through the provision of walking and cycling and provision of multifunctional green infrastructure, including open space.

11.8 The Council implements the 'Livewell' accreditation scheme to recognize developers for their contributions to health and wellbeing. This is based on a two-stage assessment using the HIA criteria and a review by the Essex Quality Review Panel.

Possible Section 106 Obligations

11.9 New healthcare, policy, fire and rescue and ambulance infrastructure, which includes health and well-being measures, will usually be required through Section 106 agreements. This could include investment in existing premises or services if the proposed development generates the need for a new facility or service.

Primary Healthcare

11.10 Chelmsford is served by the Mid and South Essex Integrated Care System which provides health and social care across Braintree, Maldon, Chelmsford, Castle Point, Rochford, Southend, Thurrock, Basildon and Brentwood. It is made up of two main committees:

- Mid and South Essex Integrated Care Board – a statutory NHS organisation responsible for developing a plan to meet the health needs of the population, managing the NHS budget and arranging for the provision of health services in Mid and South Essex.

- Mid and South Essex Integrated Care Partnership – a statutory committee concerned with improving health, care and wellbeing of the population.

11.11 As an upper tier local authority, ECC has a responsibility for public health and wellbeing, to achieve lifestyle enhancements and behavioural change within the local community.

11.12 The Mid and South Essex Integrated Care Board has identified additional primary healthcare infrastructure and investment required to support delivery of the Local Plan. These projects have been set out in the IDP.

11.13 Within Growth Area 1, there is an existing deficit of primary care capacity, and this will be increased by proposed growth. The additional capacity required in Growth Area 1 cannot be provided by reconfiguration or extension of existing primary care premises and so there is likely to also be a requirement for a new build facility within this Growth Area. A site and delivery mechanism for this provision will need to be identified and Section 106 contributions will be sought to meet this need from all development sites located in Growth Area 1.

11.14 Within Growth Area 2, there is an existing deficit of primary care capacity, and this will be increased by proposed growth. New build facilities are proposed at Location 6 (North East Chelmsford Garden Community), and this is subject to a separate IDP. Section 106 contributions will be sought to meet this need from all development sites located in Growth Area 2.

11.15 At Location 7a (Great Leighs – Land at Moulsham Hall), a 1,000m2 medical centre is proposed as part of the hybrid planning applications which are pending on the site (Ref: 23/01583/OUT and 23/01583/FUL). The Integrated CB has confirmed that the proposed facilities at Location 6 and 7a should provide the capacity to accommodate increases in patient growth in Growth Area 2.

11.16 Within Growth Area 3, there is an existing deficit of primary care capacity, and this will be increased by proposed growth. The additional capacity required in Growth Area 3 cannot be provided by reconfiguration or extension of existing primary care premises and so there is likely to also be a requirement for a new build facility within this Growth Area. Section 106 contributions will be sought to meet this need from all development sites located in Growth Area 3. This will be partly required to support the development at Location 16 – East Chelmsford Garden Community although it is noted that the scale of development at this location alone wouldn't alone require a complete new 'full size' (1,000m2 surgery) but the demand it would create could not be accommodated at existing surgeries.

11.17 Where a small number of large sites generate the need for a new primary healthcare facility or service, such as a new GP surgery and other new healthcare infrastructure and services, the cost of this provision will be secured through pooled section 106 agreements and the location of the facility identified through the master planning and planning application process.

11.18 Section 106 resources may also be sought to fund health and wellbeing across the population and encouraging self-care, where there is on-site need. This includes digital and technological approaches.

11.19 Early contact should be made with Planning and Public Health teams within the council to discuss the application proposed and local Health Impact Assessment requirements.

Ambulance Services

11.20 Ambulance Services within Chelmsford are provided by the East of England Ambulance Services NHS Trust. They have identified that a new purpose-built Hub is required in Chelmsford before 2040 as there is no room to expand at the current location on Chelmer Valley Road. This requires circa 1ha of land for new build or an existing building 25,000sq ft (2,300sqm), close to Broomfield Hospital and major road links, with sufficient space to accommodate 35 Dual Staffed Ambulances/Rapid Response Vehicles and appropriate staff parking. Off-site contributions of land and/or financial contributions have been included in the IDP as either a Section 106 contribution, which would be applicable to all net new dwellings, or a CIL funded project. When the land and scheme is more advanced, the IDP will be updated to show a single delivery mechanism.

Police Services

11.21 Policing for Chelmsford is provided by Essex Police, under the direction of the Police, Fire and Crime Commissioner (PFCC) for Essex. Key priorities for the PFCC are set out in the Police and Crime Plan 2024-2028 which was published in April 2024.

11.22 Essex Police is an essential social infrastructure provider, whose operational capacity will be impacted by the increased demand on its services arising from planned housing and population growth. Developer funded police infrastructure/facilities will be required to mitigate and manage the increase in crime to persons and property arising from this growth, and to enable an appropriate level of community safety, cohesion and policies to be provided. Indicative costs have been included in the IDP as either a Section 106 contribution, which would be applicable to all net new dwellings, or a CIL funded project. When the requirements are more advanced, the IDP will be updated to show a single delivery mechanism.

Fire and Rescue Services

11.23 Essex County Fire and Rescue Service (ECFRS) is an essential social infrastructure provider, whose operational capacity will be impacted by the increased demand on its services arising from planned housing and population growth. Developer funded fire and rescue infrastructure/facilities will be required to mitigate and manage the increase in prevention, protection and response activities, including the increased number of incidents, increased attendance times and changes in the incident risk profile. Contributions are identified on a site-by-site basis in the IDP.

11.24 The timing for the provision of such healthcare, police, ambulance and fire and rescue facilities or financial mitigation will be considered on a case-by-case basis, with the specific requirements being set out within any Section 106 Agreement. It is likely to be linked to phases of development, with facilities being required either upon a certain level of units being completed, or when a certain threshold of occupation at a development is reached.

Timing/Trigger for payment or provision of works

11.25 Such facilities should be provided once a proportion of a proposed development is occupied, which is usually towards the latter end of the development's occupation. This will vary depending on the scale of development and will be agreed as part of a Section 106 Agreement.

12 Community Infrastructure – Social and Community Facilities

Policy Background

12.1 Paragraph 98 of the NPPF seeks to deliver social, recreational and cultural facilities and services needed by the community. It requires planning authorities to plan positively for the provision and use of shared space, community facilities and other local services to enhance the sustainability of communities and residential environments.

12.2 Strategic Policies S5, S9 and S10 recognise the important role community assets have in communities, set out the infrastructure required to support new development, including community buildings and space, and require appropriate infrastructure capacity to support new development is secured though several measures including on-site provision. This includes waste management, particularly in relation to the Chelmsford Garden Village.

12.3 Strategic Policy S14 requires new strategic scale residential development to consider opportunities for community involvement in the long-term management and stewardship of the new development.

12.4 Strategic Policy S17 sets out how planning policy can create conditions for resilience to future change and evolution and innovation in retail, leisure, entertainment and cultural development.

12.5 Policy DM20 sets out the justification for obligations relating to any community facilities that are required because of new development in the Chelmsford City area.

Possible Section 106 Obligations

12.6 Chelmsford is served by a broad range of community facilities that are spread across the geography of the authority. The IDP summarises the need for social and community infrastructure to meet demand for youth services, libraries, community halls and cemeteries.

12.7 Cemetery provision is fairly evenly distributed across the administrative area and the need for additional cemetery provision is driven by the requirement for burial demand and capacity. The existing Chelmsford Cemetery will be full by 2026 and there are ongoing plans to construct a new cemetery and modern crematorium within Chelmsford as outlined in 'Our Chelmsford, Our Plan' (2023) with a site already identified. The indicative cost of the proposal is just under £11 million and has been included in the IDP as either a Section 106 contribution, which would be applicable to all net new dwellings, or as a CIL funded project. As the proposal advances, the IDP will be updated to show a single delivery mechanism. .

12.8 For large scale strategic development of 500+ new residential units the Council may require the provision of indoor space which provides flexible use for the community. Such facilities should consider:

- The inclusion of a multi-use space for community groups and clubs to use, e.g. Village Halls which are sufficiently sized and designed to cater for multi-purpose health and fitness activities. Flooring material and air handling/ventilation are examples of the types of considerations that will enable successful, sustainable activities in a community hall environment. The 2024 Indoor Sports Assessment notes that whilst demand for village hall/community centre space is high, most community centres have some spare capacity.
- A flexible `satellite' service including space for library use may be sought within shared community buildings in the new garden communities. Funding via CIL will be used to enhance and extend existing library services and facilities where required.
- Flexible workspace supporting the creating sector where relevant.
- The ability, or otherwise, of nearby existing facilities to serve the community.
- The individual needs and requirements of the locality.

12.9 Any community hall provision included as part of these neighbourhood centres will be provided directly on site by the developer as part of the comprehensive masterplanning of relevant sites:

12.10 As part of the Section 106 Agreement a nominated partner or organisation will be required to be identified as the future operator/manager of the building or space. This can be a Parish Council, Charity, stewardship vehicle or other community group.

Timing/Trigger for payment or provision of works

12.11 Such facilities should be provided once a proportion of a proposed development is occupied, which is usually towards the latter end of the development's occupation. This will vary depending on the scale of development and will be agreed as part of a Section 106 Agreement.

12.12 Provision of floor space for community facilities will be required to ensure that as the Garden Communities populations grow, there will not be pressure on community buildings' availability when needed the most.

13 Community Infrastructure - Public Realm and Public Art

Policy Background

13.1 Section 12 of the NPPF states that the creation of high-quality buildings and places is fundamental to what the planning and development process should achieve. Planning policies and decisions should ensure that developments function well, are visually attractive, sympathetic to local character, establish a strong sense of place and sustain an appropriate amount and mix of development.

13.2 Enhancements to public realm, landscaping measures and attention to architectural detail are all important features that the Council wishes to see included in new development. Providing new public realm will continue to be an important catalyst for change as new schemes have been instrumental in the revitalisation of the City Centre. Public art is the principle of involving artists in the conception, development and transformation of a site or location, making an important contribution to the character and visual quality of the area. Artists can deliver public art in many ways, including being part of development teams alongside architects, engineers and designers, and undertaking residencies based in particular locations or with community groups. The Council is committed to the provision of public art within development and in the public realm.

13.3 Strategic Policies S5, S9 and S10 recognise the important role community assets have in communities, set out the infrastructure required to support new development, including cultural facilities and public art, and require appropriate infrastructure capacity to support new development is secured through several measures including on-site provision.

13.4 Strategic Policies S16 and S17 recognise that placemaking for all development is at the heart of achieving well connected and sustainable communities. In the City Centre, improvements along opportunity corridors will reinforce and create character or identity and positively contribute to increased footfall, activity and vibrancy.

13.5 Policies DM20 and DM24 are key policies which set out the justification for obligations relating to Public Art and Public Realm improvements that are required because of new development within the Chelmsford City area.

Possible Section 106 Obligations

13.6 For developments large enough to have public space within the site, most matters will be covered by planning conditions. Each case will be considered on its individual merits.

Public Realm Provision

13.7 Section 106 Agreements may require the following issues to be addressed in respect of on-site and off-site public realm improvements:

- Improvements to paving and planting on public highway and other space directly adjoining the site or a financial contribution towards the required off-site improvements
- Bespoke planting and any associated paths and boundary treatment directly relating to the site
- Where a development site is adjacent to a public space and requires direct mitigation e.g. to link the public space into the development or replacement boundary treatment to open space.
- City centre public realm enhancements
- Street lighting in vicinity of development sites
- Community facilities that contribute to the quality of the public realm (i.e. public seating in the city centre, other street furniture, public toilets)
- Conservation restoration and enhancement of the historic environment
- Access and use restrictions/assurances
- Adoption of improvement
- Financial arrangement for their management.

Public Art

13.8 On smaller schemes Public Art is likely to be dealt with by way of planning conditions. It may be required to be secured via a Section 106 Agreement in the following circumstances:

- All developments with a threshold of 10 or more dwellings
- All developments with a floor space of 1,000sqm of more

13.9 Where there is an obligation to deliver public art within a Section 106 agreement, the Council will expect the delivery of public art in accordance with the agreement and for this responsibility not to be transferred to the City Council.

Timing/Trigger for payment or provision of works

Public Realm

13.10 Development will not normally commence until the developer has submitted and received written approval for a Public Realm Scheme from the Council. Developers will be required to illustrate what parts of the scheme are to be offered for adoption. For the parts of the scheme that will be offered for adoption, there is a requirement for a developer to design and construct the area of Public Realm to a design and specification agreed by the Council. It will then be transferred to the appropriate Council (Parks or Highways) once it is in an adoptable condition. Upon transfer, a commuted maintenance payment will be required to cover the initial costs of maintaining the Public Realm. The Section 106 agreement will also put in place measures to agree the management and maintenance of any unadopted areas. Public realm improvements will usually be required to be completed prior to the first occupation of a development.

13.11 Once the scheme has been implemented and the Council are satisfied the scheme is acceptable, a Certificate of Practical Completion will be issued, and a 12-month maintenance period will commence. At the end of this maintenance period a Certificate of Adoption will be issued. It will then be transferred to the relevant Council, and a commuted maintenance payment will become payable. The amount will vary from site to site depending on the materials used and cost of maintaining the area of Public Realm. The maintenance period shall cover a period of 15 years with details of the appropriate payment for this being set out in any Section 106 Agreements.

Public Art

13.12 The commissioning of public art works should involve professional art organisations and include stakeholder and community engagement. A written public art statement, explaining the commissioning process, artist briefs and budget should be in place prior to commencement of the development. The completion date for public art will vary depending on the nature of the development, the type and the location of the art works, but will usually be expected to be completed prior to the first occupation of a development.

13.13 Place Services lead the delivery of ECC's Public Art Strategy to ensure the work and skills of artists feature in the structures and functioning of new development, either as part of an ECC funded programme, through liaison with Districts, City and Borough Councils, or by acting as expert consultants for privately funded development. As these arrangements range from district to district, early consultation is strongly recommended. Contact Place Services at www.placeservices.co.uk or email enquiries to enquiries@placeservices.co.uk.

14 Community Infrastructure – Waste Management

Policy Background

14.1 Section 2 of the NPPF states that to achieve sustainable development the planning system has three overarching objectives – economic, social and environmental. They are interdependent and need to be pursued in mutually supportive ways to secure net gains. The environmental objective includes minimising waste and pollution.

14.2 The NPPF is clear that there should be sufficient provision for strategic infrastructure such as waste management.

14.3 Strategic Policy S9 states that new development must be supported by the provision of infrastructure, services and facilities that are identified as necessary to serve its needs. This includes municipal waste and recycling facilities. Policy DM4 states that the Council will seek to retain Class E(g), B2 and B8 Use Classes or other sui generis uses of a similar employment nature unless it can be demonstrated that there is no reasonable prospect for the site to be used for these purposes. Waste management facilities are generally considered as sui generis.

14.4 A key aim of the Council's Climate and Ecological Emergency Action Plan includes reducing carbon emissions, lowering energy consumption, reducing waste and pollution as well as improving air quality, greening Chelmsford, increasing biodiversity and encouraging sustainable and active travel.

14.5 Recycling and waste collection provision for houses, apartments and flats are set out in Appendix B of the Local Plan.

14.6 New developments should have regard to the Council's Making Places Supplementary Planning Document (SPD) and be compliant with the Chelmsford City Council Recycling and Waste Collection Policy applicable at the time. This can be found on the Council's website.

14.7 Overall, development should seek to reduce waste and increase reuse and recycling in accordance with the waste hierarchy.

14.8 ECC acts as both the Minerals and Waste Planning Authority as well as the Waste Disposal Authority for Essex. As the Waste Planning Authority for Essex, it has specific responsibilities for strategic and waste land-use planning policy. This includes the preparation of the Waste Local Plan, the determination of planning applications for the management of waste and for ensuring compliance with planning permissions, for the disposal of Local Authority Collected Waste and for places to be provided for households to deposit their household recycling and waste.

14.9 Chelmsford City Council is the Waste Collection Authority for Chelmsford City and has a statutory responsibility to provide a waste collection service to householders and local businesses. Resource and waste reforms, introduced by Government in 2024 set the national context for waste management policy and activities. These include 'Simpler Recycling' and new regulations such as the Separation of Waste (England) Regulations 2024 which set out the requirements or the collection and treatment or disposal of waste materials. These are embodied in the Council's published Recycling and Waste Collection.

14.10 In 2024 the Essex Waste Partnership (representing the waste disposal authority and the twelve waste collections authorities in Essex) agreed a new Waste Strategy for Essex for the period 2024 to 2054. This replaces the Joint Municipal Waste Management Strategy for Essex previously agreed and reflects the changes in direction and approach driven by the provisions of the Environment Act 2021. Delivery of the Waste Strategy for Essex will be supported by cross Essex action plans focused on short, medium, and long-term plans for the provision of improved waste management services and associated infrastructure, as well as behaviour change. It is not a locational strategy and does not consider the number of facilities required or the capacity of an individual facility. Any plans for new or expanded waste infrastructure will emerge during the detailed action planning phases once the strategy has been adopted.

Possible Section 106 Obligations

14.11 The current depot facilities, vehicle workshops and waste transfer station operated by the City Council are at capacity. Additional capacity will be required to meet anticipated current demand and planned future growth. The site currently being used is constrained, being unable to increase capacity any further. The preferred approach for the City Council is for the acquisition of a site where a new, larger waste management facility and depot can be constructed to manage both current anticipated demand and planned future growth. Off-site contributions of land and/or financial contributions to meet the estimate costs of this project have been included in the IDP as either Section 106 contributions, which would be applicable to all net new dwellings, or a CIL funded project. When the location and project costs are more advanced, the IDP will be updated to show a single delivery mechanism.

14.12 Early engagement with the waste collection and waste disposal authorities is recommended to ensure that onsite waste management arrangements are designed appropriately.

14.13 ECC will seek contributions towards improvements at Essex Recycling Centre for Household Waste or municipal waste treatment sites, as per the ECC Developers' Guide to Developers Contributions 2024 or update, to deliver capacity, access or other identified requirements to support usage because of planned growth.

14.14 Contributions will be required in respect of the new Garden Communities to support development of local waste management infrastructure to deliver the operational integrity of the waste management system. The level of contributions requested will be assessed on a case-by-case basis following evaluation of infrastructure capacity within the locality prior to development, and an operational needs assessment and will be used to mitigate the impact of these large residential sites.

14.15 The East Chelmsford Garden Community (Location16) will be required to undertake a Waste Infrastructure Impact Assessment as part of a planning application given its proximity to the Chelmsford Wastewater Treatment Plant. A Site Waste Management Plan is also required to address the key issues associated with sustainable management of waste including waste reduction/recycling/diversion targets and monitoring processes. Waltham Road Employment Area (Location 9a) will also be required to undertake a Waste Infrastructure Impact Assessment as part of a planning application as a metal recycling business operates on the site.

Timing/Trigger for payment or provision of works

14.16 On-site waste facilities should be provided before the development is occupied.

14.17 Off-site contributions towards waste facilities should be provided once a proportion of a proposed development is occupied, which is usually towards the latter end of the development's occupation. This will vary depending on the scale of development and will be agreed as part of a Section 106 agreement.

15 Economic Infrastructure – Employment and Skills

Policy Background

15.1 Section 2 of the NPPF states that achieving sustainable development the planning system has three overarching objectives – economic, social and environmental. Skills levels are a key determinant of sustainable local economy. Increased skills and employability will enable residents to take advantage of opportunities created by new development.

15.2 Strategic Policy S8 demonstrates the Council's commitment to ensure that the Local Plan balances jobs and housing growth. A key part of this is improving local skills and access to employment opportunities through Employment and Skills Plans.

15.3 The Council expects all planning applications for 50 or more homes or employment space providing 2,500 sqm (Gross Internal Area) or more floor space to enter an Employment and Skills Plan to provide employment and skills opportunity to benefit the local community.

Possible Section 106 Obligation

15.4 Employment and skills plans will normally be secured through a section 106 obligation and be expected to increase employability levels and workforce numbers through:

- Apprenticeships
- Work experience
- Volunteering
- Careers information and training

15.5 The plan should include options for direct delivery or skills and employability programmes that include school / college engagement.

15.6 An Employment and Skills Plan will be produced in consultation between the developer, landowner, the Council and ECC. It must be agreed and secured through a Section 106 agreement/planning condition.

15.7 Further information, including templates for Employment and Skills Plans, are set out in the ECC Developers Guide to Infrastructure Contributions (2024).

Timing/Trigger for payment or provision of works

15.8 The Section 106 agreement will set out what the developer will need to do by way of providing information about progress against Employment and Skills Plan objectives. It will also contain a provision for a financial compliance payment that will be required if the Council is satisfied that the developer has not been using reasonable endeavours to deliver the target employment opportunities set out in the Employment Skills Plan. Further details on this penalty clause are provided in the appendix of the ECC Developers Guide to Infrastructure Contributions (2024).

16 Implementation of this Planning Obligations SPD

16.1 The Council has tested the viability of a range of site types that are most likely to come forward over the new plan period.

16.2 The Local Plan Viability Update 2023), uses Residual Value Methodology to assess the impact of meeting all the Council's policy requirements, including CIL at the current rate, and different levels of developer contributions on a range of development typologies. The Residue Value is the combined value of complete development less the cost of creating the asset, including a target profit margin. If the residual value exceeds the existing use value by a satisfactory margin, a scheme is judged to be viable.

16.3 The results of the Viability Study show that in most cases, the residual value exceeds the existing use value by a satisfactory margin indicating that most development likely to come forward under the Local Plan is viable and will be able to bear the range of developer contributions and CIL at the adopted, and subsequently indexed, rate.

16.4 Typically, the use of further viability assessments at the decision-making stage should not be necessary. It is up to the applicant to demonstrate whether circumstances justify the need for a viability assessment at the application stage.

16.5 Where an applicant formally requests the Council to consider a reduced level of planning obligations for a scheme it will need to demonstrate that either:

- The development proposed is wholly different in type to those used in the latest Local Plan Viability Update
- Further information on infrastructure or site costs is required
- Types of development are proposed which significantly vary from standard models of development for sale, or
- A recession or similar significant economic change has occurred since the latest Local Plan Viability Update.

16.6 Where a viability assessment is submitted to accompany a new planning application this should be based upon and refer to the typologies of development tested and the standardised inputs in the latest Local Plan Viability Update. The applicant must:

a) Explain and provide evidence of any changes since the latest Local Plan Viability Update was conducted.

b) Explain and provide full supporting evidence to substantiate any departures from the standardised inputs of the latest Local Plan Viability Update – in the case of build costs this will require a detailed breakdown of costs provided by an appropriate professional.

16.7 Failure to provide a – b above, will result in the Council giving no weight to the applicants' viability assessment. A full viability report prepared by the applicant should be submitted with the planning application.

16.8 Once submitted, this report (including scheme viability statements, appraisals and relevant information) will be considered and assessed by the Council and an independent viability advisor appointed by the Council with reasonable agreed costs borne by the applicant.

16.9 Any viability assessment should reflect the government's recommended approach to defining key inputs as set out in National Planning Guidance.

16.10 Essex Planning Officers Association (EPOA) has produced a Viability Protocol that sets out overarching principles for how Essex Local Planning Authorities will approach development viability. The protocol does not alter Local Plan policies or the guidance in this SPD but does provide additional advice and guidance on the information requirements and approach taken when assessing viability at the decision-making stage. The EPOA Viability Protocol is available to download at https://www.essexdesignguide.co.uk/supplementary-guidance/essex-planning-and-viability-protocol/

16.11 The assessment will define land value for any viability assessment based on the existing use value of the land, plus a premium for the landowner. Under no circumstances will the price paid for land be a relevant justification for failing to accord with relevant policies in the Local Plan.

16.12 The weight to be given to a viability assessment is a matter for the Council, having regard to all circumstances, including any changes since the Local Plan was brought into force, and the transparency of assumptions behind evidence submitted as part of the viability assessment.

16.13 If the viability report submitted by the Applicant fails to satisfy the Council that a reduced level of contributions should be applied or that the level of planning contributions that the development can viably support cannot mitigate the impact of the proposed development, then the planning application will be refused.

16.14 Where the level of planning contributions that the development can viably support cannot mitigate the impact of the proposed development, the development will need to wait until development values improve, land values can be re-negotiated, or alternative funding sources can be secured. If delayed development is not an option, applicants will be encouraged to consider their profit margins to see if the development could proceed with slightly reduced returns.

16.15 If the Applicant can demonstrate, to the satisfaction of the Council, that the scheme cannot be fully compliant and remain financially viable, the Council may consider a reduced level of contributions in one or more areas. In these circumstances, the Council will seek to protect and prioritise contributions for affordable housing for rent to address the critical need for this tenure of accommodation to tackle rising levels of homelessness, as identified in the housing crisis declared in February 2022. When a reduced level of contribution is accepted, measures will be included in the Section 106 agreement to ensure that the Council will benefit from improved contributions if viability improves over time.

16.16 The Council will apply the following formula as part of a review mechanism to calculate the surplus profit available for reduced contributions. A worked example is also provided below:

Surplus profit calculation:

X = Review Contribution

X = ((((A + B) – C) – ((D + E) - F)) – P) – G) * 0.6

Where:

A = Actual Gross Development Value (£)

B = Estimated Gross Development Value (£)

C = Application Stage Gross Development Value (£)

D = Actual Build Costs (£)

E =Estimated Build Costs (£)

F =Application Stage Build Costs (£)

P =(A + B – C) * Y

Y = Owner's Profit as a percentage of Gross Development Value as determined at the time the Planning Permission was granted being seventeen point five per cent (17.5 %)

G = Deficit (£)

Notes:

(A + B - C) represents the change in Gross Development Value from the date of the Planning Permission) to the Review Date.

(D + E – F) represents the change in Build Costs from the date of the Planning Permission to the Review Date.

P represents Owner's Profit on change in Gross Development Value (£)

0.6 represents sixty per cent (60%) of any Surplus to be used by the Council for the reduced contributions, after the Owner's Profit (P) and Deficit has been deducted.

Worked Example for Surplus Profit Calculation

X = Review Contribution

X = ((((A + B) – C) – ((D + E) - F)) – P) – G) * 0.6

Where: A =	Actual GDV (£)	6,774,600
B =	Estimate GDV (£)	1,090,000
C =	Application Stage GDV (£)	-7,452,000
D =	Actual Build Costs (£)	3,000,000
E =	Estimate Build Costs (£)	760,000
F =	Application Stage Build Costs (£)	3,660,111
P =	(A + B – C) * Y	72,205
Y =	Owner's Profit as a percentage of GDV as determined at the time the planning permission was granted being 17.5%	
G =	Deficit (£)	226,408
X = (((((6,774,600 + 1,090,000) - 7,452,000) - ((3,000,000 + 760,000) - 3,660,111)) - 72,205) - 226,408)*0.6		
X = ((((7,864,600 - 7,452,000) - (3,760,000 - 3,660,111)) - 72,205) - 226,408)*0.6		
X = (((412,600 - 99,889) - 72,205) - 226,408)*0.6		
X = ((312,711 - 72,205) - 226,408)*0.6		
X = (240,506 - 226,408)*0.6		
X = 14,298 * 0.6		
X = 8,458.80		

Drafting of Section 106 Agreements

16.17 Section 106 Agreements will be drafted by the Council's Legal Services team, or by external solicitors acting on behalf of the Council. Applicants will be required to pay the Council's reasonable costs incurred in drafting and completing the agreement or the costs of external solicitors acting on behalf of the Council, where relevant. In most cases ECC provides a first draft of the clauses required to deliver contributions it has requested. A template agreement is provided in Appendix A of ECC's Developers' Guide to Infrastructure Contributions (Revised 2024).

16.18 Straightforward obligations which normally require only a financial contribution and/or planning obligations on one party only will be the subject of a Unilateral Undertaking. A Unilateral Undertaking will be prepared or approved by the Planning Contributions Officer or, where appropriate, the Council's Legal Service team. Applicants will be expected to meet the Council's reasonable costs incurred in preparing or approving an Undertaking.

16.19 In all circumstances where a legal agreement is required, the applicant will be expected to provide details of land ownership at the beginning of the application process. These should be copies of the Title document and plan obtained within the preceding three months from the Land Registry, or if the land is unregistered, copies of the most recent conveyance.

Financial Contributions

16.20 Where a financial obligation is necessary, payment would normally be required on commencement or on first occupation of a development. However, in the case of a large-scale development, it may be that the payments would be phased to meet the proportional impact of each phase. Trigger points for payments will be included in the legal agreement, as will the period in which any contribution will have to be spent. Section 3.2 of ECC's Developers' Guide to Infrastructure Contributions (Revised 2024) provides further guidance for larger, phased development regarding contributions requested by ECC.

16.21 It is reasonable to expect that, when contributions are paid to the Council the monies will be held in an interest-bearing account. Those financial contributions (excluding commuted payment relating to maintenance) that are paid to the City Council and remain unspent at the end of 10 years from the date when the money was paid will be returned to the payee in accordance with the terms of the individual agreements, unless they relate to infrastructure items that are required beyond 2036.

Index Linking

16.22 The quantum of Section 106 financial contributions will be re-assessed at the point of planning application and fixed from the point of planning permission. All Section 106 financial contributions that are subject to indexation, will be calculated from the point of planning permission and end with the date each payment becomes due. The calculation will be based on the published index (indices) at the point of calculation divided by the index number at the date of the Section 106 agreement, multiplied by the contribution amount stated in the planning obligation, unless stated otherwise in Table 16 below. If a commuted sum is required for maintenance purposes, this will be assessed at the point of planning application and fixed from the point of planning permission.

16.23 The CIL charging rate is fixed in the CIL Charging Schedule and indexed on the 1st of January each year based on the RICS Community Infrastructure Levy (CIL) Index, published in the preceding November.

16.24 A summary of whether indexation applies, and the index used for the most common financial contributions is set out in Table 16 below:

Table 16 Indexation Applied to Financial Contributions

Contribution Type	Index Linked Y/N	Index Applied/Notes
Affordable Housing	Y	BCIS All-In Tender Price Index
CCC Monitoring Fees	N	
CIL	Y	CIL index number at the date of the planning permission divided by the index number at the date of adoption of the CIL Charging Schedule multiplied by the CIL rate set out in the CIL Charging Schedule.
ECC Monitoring Fees	N	
Education	Y	BCIS PUBSEC Tender Price Index of Public Sector Building Non-Housing Indices.
Healthcare	Y	Retail Price Index.
Maintenance (of any kind)	N	
Open Space	Y	BCIS PUBSEC Tender Price Index of Public Sector Building Non-Housing Indices.
Public Realm	Y	BCIS PUBSEC Tender Price Index of Public Sector Building Non-Housing Indices.
RAMS	Y	Retail Price Index calculated using the relevant published implementation guidance.
Specialist Residential Accommodation	Y	BCIS All-In Tender Price Index
Travel Plan	Y	Consumer Price Index (CPI) (see latest

Monitoring Fee/Smarter Choices Monitoring		published ECC developers guide).
Tree Planting	Y	BCIS PUBSEC Tender Price Index of Public Sector Building Non-Housing Indices.
* **ECC** applies different indexation indices to different types of infrastructure. Further guidance is provided in Section 3.3 of ECC's Developers' Guide to Infrastructure Contributions (Revised 2024).		

Monitoring and Enforcement of Obligations

16.25 Monitoring obligations will be undertaken by the Council's Planning Contributions Officer to ensure that all obligations entered are complied with by both the developer and the Council.

16.26 In cases where developers have difficulty making payments at the appropriate times as required by the legal agreement, the Council will work with the developer to find a solution. This may involve the payment of an obligation at a later stage in the development, or payment by installments. However, where it is imperative that the relevant measure is in place prior to a development being occupied, the obligation to fund it will always become payable on commencement.

16.27 If enforcement of financial obligations fails then the Council will use the relevant legal channels to remedy this, and the party in breach will be liable for any legal costs incurred by the Council.

Monitoring Fees (excluding affordable housing obligations)

16.28 A monitoring fee will be charged where Section 106 agreements include covenants to the Council. A charge of £350 per obligation type will be levied for each phase of the development containing the obligation. For example, a charge of £350 will be applied to monitoring planning obligations securing local open space. If the local open space is provided in three phases on a new development site, a total monitoring fee of £1,050 will apply to the local open space provisions secured through a Section 106 agreement. These charges exclude affordable housing obligations, which are subject to a separate monitoring fee.

16.29 The fee includes collection of information from the developer and other relevant internal and external sources, appropriate site visits, officer action associated with non-compliance, maintenance of the monitoring database and reporting on delivery of obligations.

Monitoring Fee (affordable housing obligations)

16.30 A monitoring fee of £100 per affordable housing unit will be charged. This fee will not be applied to commuted sums in lieu of on-site affordable housing.

16.31 The £100 monitoring fee includes monitoring, conducted on a plot-by-plot basis, of the completion and initial occupation of affordable dwellings. In respect of affordable housing for rent, monitoring this obligation includes the time and costs associated with entering into nomination agreements with Registered Providers (excluding the cost of the Council's Legal Services). Where relevant, it also includes monitoring housing costs.

16.32 In the event of a review mechanism being agreed as justified for a development proposal, a separate fee of £1,000 per review will be applied to meet the Council Officers' costs in reviewing the information. This is in addition to the Council's legal costs (where relevant) and the costs of the Council appointing independent viability experts to review the financial information submitted. All such costs will be met by the developer / landowner proposing the development

Monitoring Fees (Essex County Council)

16.33 ECC charge separate monitoring fees for Section 106 obligation types that they are responsible for, for example education and highways. Further guidance is provided in Section 3.3 of ECC's Developers' Guide to Infrastructure Contributions (Revised 2024). ECC staff time in supporting the Travel Plan process will be secured through developer contributions with set fees to be paid by the Developer, to ECC, with regards the monitoring and support of Travel Plans.

16.34 All ECC's monitoring fees will be subject to indexation and payable on commencement of the development.

Fees for Deeds of Variation to a Section 106 agreement

16.35 In respect of Section 106 Agreements the Planning Fee covers the cost of involvement of the Housing Policy Team (Spatial Planning Services), however where a Deed of Variation (DoV) to a Section 106 Agreement is required and the involvement of the Housing Policy Team is needed, a fee of £1,200 will be charged per agreement. This fee must be paid upfront, and the Housing Policy Team will not commence work on a DoV until payment is received. Should the DoV not be executed within three months of receipt of the initial fee a further fee of £1,200 will become due in respect of any work to be undertaken by the Housing Policy Team. For the avoidance of doubt a Housing Policy Team Fee of £1,200 will be due every three months until completion of the DoV. The Housing Policy Team Fees will be reviewed on a regular basis.

16.36 Legal Fees will also be due in respect of a DoV to a Section 106 Agreement and are reviewed on a regular basis. Legal work cannot commence on a DoV until an undertaking has been provided that the Council's legal fees will be met in full.

Reporting on the use of Section 106 Obligations

16.37 Infrastructure Funding Statements are required to set out the infrastructure projects or types of infrastructure that the authority intends to fund, either wholly or partly, by CIL or planning obligations.

16.38 Infrastructure Funding Statements need to be published annually from 31 December 2020 (for the preceding financial year 2019/20) reporting on CIL and planning obligations revenue received and allocated. ECC is also required to publish an annual Infrastructure Funding Statement, primarily with regards education; highways and transportation; Public Rights of Way; libraries and monitoring.

This publication is available in alternative formats including large print, audio and other languages
